Subject: Comments: Review CCR 1505-11 Notary Rules

With respect to -

2.2.5 A notary must verify that the document signer has adopted an electronic signature to function as his or her signature before electronically notarizing a document.

What are the acceptable methods used to verify the document signer has adopted an electronic signature to function as his/her hand written signature?

12-55-110

Thank you,

Margaret P Raveling
