---

Good morning,

I have listened to the recording of the recent rulemaking hearing regarding this proposal and agree and support the proposal. I am in the process of building my business and while I use a bookkeeping application which would work to prove what I charged the customer as it is itemized I welcome the use of an invoice or receipt. I already have a book of receipts that I use right now if customers request one. In addition, I always tell the customer how much the notarial act will be prior to completion. I believe providing a receipt to the customer proves and supports an honest business.

In addition, I have read the comment from the National Notary Association and am in agreement with their comments and proposed amendments. I was also surprised by Mr. Young's response about proving his charges. Doesn't he have a bookkeeping application?

Thank you for the opportunity to comment.
