Hello:

Not fully making sense of this letter on Judges retention or not but we do know the following:

1. We want to know where the money is coming from and that's everyone / company / etc.
2. if you can impose limits; we want limits imposed.
3. yes they shouldn't be allowed to coordinate with candidates but at the same time; we have a group that does assist with the blue book on whether or not judges should be retained so how is this going to help or not help with that? The only thing we do know is that group with the blue book does a very poor job so if this group is going to advocate for or against retaining judges; we need to know who is giving them money and if needed; limit that amount.

They also should be required to file like candidates have to so we know who is giving them money right up to election day.

Thank you.

JM Fay
