(c) Ending the expansion of oil and gas operations in an orderly and planned manner through a gradual phase out of new permits by 2030, and prioritizing permit reductions in disproportionately impacted communities, will reduce greenhouse gas emissions and other pollution, protect lands and water, and enhance economic growth in the state as part of an ongoing transition to clean renewable energy; and

(d) ~~Establishing~~ ~~W~~orkforce development and other assistance for impacted workers and communities will help to ensure the most successful energy transition.
