corrected

Dear Ms Gyger,

I tried/sent earlier but with a mis-spelled address and heading -- please excuse.

Joel L. (my early geochemical work using Geiger counters-radion detectors did not help!)

Dear Ms. Geiger,

I am writing to support Mary Eberle's comments (attachment to her July 27 e-mail) to your new proposed rules. Her helpful suggestions & word changes will lead to more transparency and efficiency in the election and counting/audit processes and should be accepted/included. We need guidelines and rules, but they should make elections more transparent and smooth and not more difficult or confusing. Sometimes citizens who have "been there/done that" have useful suggestions and we appreciate (and I hope your office too) their input.

Sincerely,

Joel Leventhal, Ph.D. (former poll watcher, member of Logic & Acc. Com, Canvass Bd.)
