**Subject:** Comments Regarding Gypsy Voters for Today's Recall Public Meeting  
**Importance:** High

What will be done to determine the true "intent" of the newly created "gypsy" voters for the 2 recall elections on Sept. 10th, especially when there are no elections in the 33 other state senate districts?

It certainly is not the intent or the will of the voters of Colorado for people from outside the voting district to determine the outcome of a recall election. With HB 13-1303 being found unconstitutional with regards to recall elections by Judge McGahey on 8/12/13, one has to consider all the aspects of 1303 which are not applicable to recall elections -- not just the time-line and the mandate for an all-mail election.

"Gypsy" voters should have no say in whether to recall or retain an elected representative who has not been representing them, particularly since they have been represented by a different elected official. Additionally, they do not have direct personal experience or knowledge regarding the issues, controversy, and local public debate of the recall election.

Thank you for considering my comments --

While the clerks talked about procedures they were planning to use in dealing with gypsy voters during your meeting today, no one addressed the 2nd and 3rd paragraphs of my comments below.

May I please have the Secretary's response to my points which were not presented or discussed during the meeting.

Thank you --
