Every single American should be able to vote I don't care what the circumstances are it is obvious when we are letting the Russian government take our country over that it is time for All American to vote and it is also time to abolish all this Electro collagen all the individuals like you who try to change the rules all need to go every American should vote I don't care where they're at or what they're done if they're an American they should have the right to vote if it's okay for Russia to control our country every American should vote
