8.540.7.B The criteria for approval of PDN services are based upon the submission of records that demonstrate the skilled nature of the nursing care needed, including physician and/or allowed practitioner records, specialty notes, and nursing notes. The URC shall review requests for prior authorization according to the information submitted and the application of the medical criteria as described herein.:

1. The URC shall consider combinations of technologies and co-morbidities when making medical determinations that would qualify the member for care pursuant to EPSDT exceptions to benefit limits and coverage standards. The medical judgment of the attending physician or allowed practitioner and the URC shall be used for an individual determination whenever the medical criteria are not defined by specific measurements.
2. Within 10 business days of receipt of the complete PAR, the URC shall approve or deny the PAR, or refer the PAR to the URC physician reviewer.
3. The URC shall process the physician review referrals and approve, partially approve, or deny the PAR within 10 business days of referral to the physician reviewer.

2. Services provided during the period between the provider's submission of the PAR to the URC through the final approval or denial by HCPF may be approved for payment. Payment may be made retroactive to the start date on the PAR form or for up to 30 calendar days prior to PAR approval, whichever is shorter.
3. When a PAR determination results in the reduction or termination of services, services shall be approved for 30 additional calendar days after the date on the member's notice of denial letter. If the termination or reduction of PDN services is appealed by the member in accordance with Section 8.057, services shall be maintained at the previously approved level for the duration of the appeal until the final agency action is rendered.
4. For appeals of an initial PAR denial, continuation of benefits is not applicable.

8.540.7.D Expedited PAR reviews may be requested in situations where adhering to the time frames above would seriously jeopardize the member's life or health.

8.540.8 REIMBURSEMENT

8.540.8.A No skilled services shall be authorized or reimbursed if the skilled hours of service, regardless of funding source, total more than 24 hours per day for members aged 20 or younger and no more than 23 hours per day for members aged 21 or older.

- 8.540.8.B No services shall be reimbursed if the care is duplicative of care that is being reimbursed under another benefit or funding source, including but not limited to home health or other insurance.
- 8.540.8.C Approval of the PAR by the URC shall authorize the HHA to submit claims to the Medicaid fiscal agent for authorized PDN services provided during the authorized period. Payment of claims is conditioned upon the member's benefit eligibility on the date of service and the provider's use of correct billing procedures.
- 8.540.8.D No services shall be reimbursed for dates of service prior to the PAR start date as authorized by the URC, except as provided in Section 8.540.7.C.2.
- 8.540.8.E Skilled Nursing services provided as a PDN benefit shall be reimbursed in units of one hour at the lesser of the provider's usual and customary charge or the maximum Medicaid allowable rates established by HCPF.
1. Units of one hour may be billed for RN or LPN.

 3. The LPN group rate shall be utilized when a licensed practical nurse is providing PDN services to more than one member at the same time in the same setting.
 4. The blended RN/LPN rate shall be requested by the HHA when utilizing an RN or LPN as the assigned staff for more than one member at the same time in the same setting.
 5. PDN services may be provided by a single nurse to an individual or to multiple individuals in a non-institutional group setting as described above. The nurse-member ratio shall not exceed what is required for one licensed nurse to safely care for each member simultaneously, based on member acuity and the availability of additional support in the home.
- 8.540.8.F Reimbursement shall not be allowed at any time when nursing staff is sleeping during the provision of PDN services.
- 8.540.8.G No individual nurse shall be reimbursed for over 16 hours of care per day, except in a documented emergency situation.

8.550.9 REIMBURSEMENT

8.550.9.A. Reimbursement Determination

Reimbursement follows the method prescribed in 42 C.F.R. §§ 418.301 through 418.309 (2018). No amendments or later editions are incorporated. Copies are available for inspection from the Custodian of Records, Colorado Department of Health Care Policy and Financing, 1570 Grant Street, Denver, Colorado 80203-1818.

1. Reimbursement rates are determined by the following:
 - a. Rates are published by the Department annually in compliance with the Centers for Medicare and Medicaid Services (CMS) state Medicaid Hospice reimbursement.
 - b. Each care-level per-diem rate is subject to a wage index multiplier, to compensate for regional differences in wage costs, plus a fixed non-wage component.
 - c. The Hospice wage indices are published annually by October 1 in the Federal Register.
 - d. Rates are adjusted for cost-of-living increases and other factors as published by the Centers for Medicare and Medicaid Services.
 - e. Continuous home care is reimbursed at the applicable hourly rate, the per-diem rate divided by 24 hours, multiplied by the number of hourly units billed from eight up to 24 hours per day of continuous care (from midnight to midnight).
 - f. Reimbursement for routine home care and continuous home care must be based upon the geographic location at which the service is furnished and not on the business address of the Hospice Provider.
2. Reimbursement for Hospice Services must be made at one of four predetermined care level rates, including the routine home care rate, continuous home care rate, inpatient respite care rate, and general inpatient care rate. If no other level of care is indicated on a given day, it is presumed that routine home care is the applicable rate.
 - a. Care levels and reimbursement guidelines:
 - i) The routine home care rate is reimbursed for each day the Client is at home and not receiving continuous home care. This rate is paid without regard to the volume or intensity of Home Care Services provided. This is the service type that must be utilized when a Client resides in a NF, ICF/IID, IRSS or GRSS unless the Client is in a period of crisis.

- ii) The continuous home care rate is reimbursed when continuous home care is provided and only during a period of medical crisis to maintain a Client at home. A period of crisis is a period in which a Client requires continuous care, which is primarily nursing care, to achieve palliation or for the management of acute medical symptoms. Either a registered nurse or a licensed practical nurse must provide more than half of the billed continuous homecare hours. Homemaker and certified nurse aide services may also be provided to supplement nursing care. The continuous home care rate is divided by 24 hours in order to arrive at an hourly rate. A minimum of eight hours must be provided. For every hour or part of an hour of continuous care furnished, the hourly rate shall be reimbursed up to 24 hours a day. Continuous home care must not be utilized when a Client resides in a NF, ICF/IID, IRSS or GRSS unless the Client is in a period of crisis.
 - iii) The inpatient respite care rate is paid for each day on which the Client is in an approved inpatient facility for respite care. Payment for respite care may be made for a maximum of five days at a time including the date of admission but not counting the date of discharge. Payment for the sixth and any subsequent days is to be made at the routine home care rate. Payment for inpatient respite care is subject to the Hospice provider's 20 percent aggregate inpatient days cap as outlined in 8.550.9.B.
 - iv) The general inpatient rate must be paid only during a period of medical crisis in which a Client requires 24-hour continuous care, which is primarily nursing care, to achieve palliation or for the management of acute medical symptoms. Payment for general inpatient care is subject to the Hospice provider's 20 percent aggregate inpatient days cap as outlined in 8.550.9.B.
- 3. The Hospice Provider is paid a Room and Board fee in addition to the Hospice per diem for each routine home care day and continuous care day provided to Clients residing in an ICF/IID or NF.
 - a. The payment for Room and Board is billed by and reimbursed to the Hospice provider on behalf of the Client residing in the facility. The Department reimburses 95 percent of the facility per diem amount less any patient payments.
 - b. Payments for Room and Board are exempt from the computation of the Hospice payment cap.
 - c. The Hospice Provider must forward the Room and Board payment to the NF or ICF/IID.
 - d. Clients who are eligible for Post Eligibility Treatment of Income (PETI) shall be eligible for PETI payments while receiving services from a Hospice Provider. The Hospice Provider must submit claims on behalf of the Client and nursing facility or ICF/IID.
 - e. Patient payments for Room and Board charges must be collected for Hospice Clients residing in a NF or ICF/IID as required by Section 8.482. While the Medicaid NF and ICF/IID Room and Board payments must be made directly to the Hospice Provider, the patient payment must be collected by the nursing facility or ICF/IID.

- f. Nursing facilities, ICF/IIDs, and Hospice Providers are responsible for coordinating care of the Hospice Client and payment amounts.
- 4. The Hospice Provider is reimbursed for routine home care or continuous home care provided to Clients residing in a NF or ICF/IID. If a Client is eligible for Medicare and Medicaid and the Client resides in a NF or ICF/IID, Medicare reimburses the Hospice Services, and Medicaid reimburses for Room and Board.
- 5. Reimbursement for date of discharge:
 - a. Reimbursement for date of discharge must be made at the appropriate home care rate for the day of discharge from general or respite inpatient care, unless the Client dies at an inpatient level of care. When the Client dies at an inpatient level of care, the applicable general or respite inpatient rate is paid for the discharge date.
 - b. Reimbursement for nursing facility and ICF/IID residents is made for services delivered up to the date of discharge when the Client is discharged, alive or deceased, including applicable per diem payment for the date of discharge.

8.550.9.B. Reimbursement Limitations

- 1. Aggregate payment to the Hospice Provider is subject to an annual indexed aggregate cost cap. The method for determining and reporting the cost cap must be identical to the Medicare Hospice Benefit requirements as contained in 42 C.F.R. Sections 418.308 and 418.309 (2018). No amendments or later editions are incorporated. Copies are available for inspection from the Custodian of Records, Colorado Department of Health Care Policy and Financing, 1570 Grant Street, Denver, Colorado 80203-1818.
- 2. Aggregate days of care provided by the Hospice Provider are subject to an annual limitation of no more than 20 percent general and respite inpatient care days. H. COVERED SERVICES

Under the description of each task below, Usual Frequency of Task refers to the number of times a typical client is likely to need a task performed. A PC Task will be performed at the usual frequency, unless otherwise specified on the 485 Plan of Care. If a client needs a PC Task performed more frequently than the usual frequency for that PC Task, it must be specified on the 485 Plan of Care.

Covered Pediatric PC Services include assistance with the following PC Tasks:

1. Bathing/Showering

a. Included in Task:

Bathing/shower includes: Preparing bathing supplies and equipment, assessing the water temperature, applying soap (including shampoo), rinsing off, and drying the client; cleaning up after the bath, shower, bed bath, or sponge bath as needed; all transfers and ambulation related to the bathing/showering task; and all hair care, pericare, and skin care provided in conjunction with the bathing/showering task.

b. Usual Frequency of Task: Once daily.

c. Factors that Make Task Personal Care:

Client is able to maintain balance and bear weight reliably, or able to use safety equipment (such as a shower bench) to safely complete the bathing/showering; client's skin is unbroken; client is independent with assistive devices; or when a PCW is assisting a medically-skilled care provider, caregiver, or Unpaid Family Caregiver who is competent in providing this aspect of care.

d. Factors that Make Task Skilled:

There is the presence of open wound(s), stoma(s), broken skin and/or active chronic skin disorder(s); or client is unable to maintain balance or to bear weight reliably due to illness, injury, or disability, history of falls, or a temporary lack of mobility due to surgery or other exacerbation of illness, injury, or disability.

e. Special Considerations:

A second person may be staffed when required to safely bathe the client, when supported by documentation that illustrates that the client requires moderate to total assistance to safely complete this task.

2. Dressing

a. Included in Task:

Dressing includes putting on and taking off clothing, including pantyhose or socks and shoes. Dressing includes getting clothing out and may include braces and splints if purchased over the counter and/or or not ordered by a Qualified Physician.

b. Usual Frequency of Task: Up to two times daily.

c. Factors that Make Task Personal Care:

Client only needs assistance with ordinary clothing and application of support stockings of the type that can be purchased without a physician's prescription; when assistance is needed with transfers and positioning related to dressing and undressing, which may include the cleaning and maintenance of braces, prosthesis, or other DME; or when a PCW is assisting a skilled care provider, caregiver, or Unpaid Family Caregiver who is competent in providing the application of an ace bandage and anti-embolic or pressure stockings or placement of braces or splints that can be obtained only with a prescription of a Qualified Physician, or when the client is unable to assist or direct care.

d. Factors that Make Task Skilled:

Client requires assistance with the application of anti-embolic or pressure stockings, placement of braces or splints that can be obtained only with a prescription of a Qualified Physician, or when the client is unable to assist or direct care. Services may also be skilled when the client experiences a temporary lack of mobility due to surgery or other exacerbation of illness, injury, or disability.

e. Special Considerations:

A PCW may be staffed with a skilled care provider or Unpaid Family Caregiver when required to safely dress the client, and when supported by documentation that illustrates that the client requires moderate to total assistance to safely complete this task.

3. Feeding

a. Included in Task:

Feeding includes ensuring food is the proper temperature, cutting food into bite-size pieces, or ensuring the food is at the proper consistency for the client, up to and including placing food in client's mouth.

b. Usual Frequency of Task: Up to three times daily.

c. Factors that Make Task Personal Care:

The client can independently chew and swallow without difficulty and be positioned upright; the client is able to eat or be fed with adaptive utensils.

d. Factors that Make Task Skilled:

The client requires syringe feeding and tube feeding, which may be performed by a CNA who has been deemed competent to administer feedings via tube or syringe;

Oral feeding when: The client is unable to communicate verbally, non-verbally, or through other means; the client is unable to be positioned upright; the client is on a modified texture diet; the client has a physiological or neurogenic chewing and/or swallowing problem; or when a structural issue (such as cleft palate), or other documented swallowing issue exists.

The client has a history of aspirating food or is on mechanical ventilations that may create a skilled need for feeding assistance, or; when oral suctioning is required.

e. Special Considerations:

Documentation must illustrate that the client needs moderate to total assistance to safely complete this task. If a client requires snacks in addition to three meals per day, this need must be specified in the 485 Plan of Care.

4. Medication Reminders

a. Included in Task:

Medication Reminders include verbally communicating to a client that it is time for medication, and/or opening and handing a pre-filled medication reminder container to a client.

b. Factors that Make Task Personal Care:

PCWs may assist clients with medication reminders by: inquiring whether medications were taken; verbally prompting the client to take medications; handing the appropriately marked medication reminder container to the client; and opening the appropriately marked medication reminder container for the client if the client is physically unable to open the container.

All medication (prescription medications and all over-the-counter medications) must be pre-selected by the client, the client's Unpaid Family Caregiver, a nurse, CNA, or a pharmacist, and stored in pre-filled medication reminder boxes which are marked with day and time of dosage.

c. Factors that Make Task Skilled:

Medication reminders are PCW tasks unless the client requires services within the scope of a certified CNA.

5. Ambulation/Locomotion

a. Included in Task:

Walking or moving from place to place with or without an assistive device (including wheelchair).

b. Factors that Make Task Personal Care:

A PCW may assist clients with ambulation only if the client has the ability to balance and bear weight reliably, when the client is independent with an assistive device, or when the PCW is assisting a skilled care provider or Unpaid Family Caregiver who is competent in providing the skilled aspect of care.

c. Factors that Make Task Skilled:

Ambulation is considered a skilled task when the client: is unable to assist in the task, direct care, or when hands-on assistance is required for safe ambulation.

The task is also considered skilled when a client is unable to maintain balance, unable to bear weight reliably, or has not been deemed independent with assistive devices ordered by a Qualified Physician.

d. Special Considerations:

Ambulation may not be the standalone reason for a visit. Transferring and positioning into and out of assistive devices is not ambulation, and is addressed in the transferring and positioning section of this standard. Documentation must illustrate the need for moderate to total assistance to safely complete this task.

6. Meal Preparation

a. Included in Task:

Meal preparation includes preparing, cooking, and serving food to a client. Includes formula preparation and ensuring food is a proper consistency based on the client's ability to swallow safely.

d. Factors that Make Task Skilled:

Hair care is considered a skilled task when the client requires shampoo or conditioner that is prescribed by a qualified physician and dispensed by a pharmacy; or when the client has one or more open wounds or stomas on the head.

a. Included in Task:

Mouth care includes brushing teeth, flossing, use of mouthwash, denture care, or swabbing with a toothette.

b. Usual Frequency of Task: Up to three times daily.

c. Factors that Make Task Personal Care:

Skilled nail care may only be completed by a CNA who has been deemed competent in nail care for this population.

e. Special Considerations:

Documentation must illustrate that the client needs moderate to total assistance to safely complete this task.

10. Hygiene – Shaving

a. Included in Task:

Shaving includes assistance with shaving of face, legs, and underarms with a safety or electric razor.

b. Usual Frequency of Task: Up to one time daily. Task may be completed with bathing or showering.

The skin care provided by a PCW must be preventive, rather than therapeutic, in nature. It includes the application of skin care lotions and solutions not requiring a physician's prescription.

c. Factors that Make Task Skilled:

Skin care is considered a skilled task when the client: requires skin care lotions or solutions requiring a physician's prescription; has broken skin, wound(s), or an active chronic skin problem; or is unable to apply product independently due to illness, injury, or disability.

d. Special Considerations:

Skin care completed in conjunction with bathing and toileting, as ordered on the 485 Plan of Care, is not included in this task. Documentation must illustrate that the client needs moderate to total assistance to safely complete this task.

12. Toileting – Bowel Care

a. Included in Task:

Bowel Care includes changing and cleaning an incontinent client, or providing hands-on assistance with toileting. This includes returning the client to pre-bowel movement status, transfers, skin care, ambulation, and positioning related to elimination.

b. Factors that Make Task Personal Care:

A PCW may assist a client to and from the bathroom; provide assistance with bedpans and commodes; provide pericare; or change clothing and pads of any kind used for the care of incontinence.

A PCW may assist a skilled care provider or Unpaid Family Caregiver who is competent in providing this aspect of care.

d. Special Considerations:

A PCW may be aided by a skilled care provider or Unpaid Family Caregiver when required to safely complete Bowel Care with the client. Documentation must illustrate that the client needs moderate to total assistance to safely complete this task.

13. Toileting – Bowel Program

a. Included in Task:

Bowel Program includes emptying the ostomy bag, as ordered by the client's Ordering Provider. This includes skin care at the site of the ostomy and returning the client to pre-bowel program status.

b. Factors that Make Task Personal Care:

A PCW may empty ostomy bags and provide client-directed assistance with other ostomy care only when there is no need for skilled bowel program care, for skilled skin care, or for observation or reporting to a nurse.

A PCW may not perform digital stimulation, insert suppositories, or give an enema.

c. Factors that Make Task Skilled:

Bowel Program is considered a skilled task when: the client requires the use of digital stimulation, suppositories, or enemas; or when the client requires skilled skin care at the ostomy site.

d. Special Considerations:

Documentation must illustrate that the client needs moderate to total assistance to safely complete this task.

14. Toileting – Catheter Care

a. Included in Task:

Catheter Care includes perineal care and emptying catheter bags. This includes transfers, skin care, ambulation, and positioning related to catheter care.

b. Usual Frequency of Task: Up to two times a day.

c. Factors that Make Task Personal Care:

A PCW may empty urinary collection devices such as catheter bags when there is no need for observation or reporting to a nurse; and provide pericare for clients with indwelling catheters.

d. Factors that Make Task Skilled:

Catheter Care is considered a skilled task when: emptying indwelling or external urinary collection devices and there is a need to record and report the client's urinary output to the client's nurse; task involves insertion, removal, and care of all catheters; changing from a leg to a bed bag and cleaning of tubing and base; or if the indwelling catheter tubing needs to be opened for any reason and the client is unable to do so independently.

- e. Special Considerations:

Catheter Care may not be the sole purpose of the visit. Documentation must illustrate that the client needs moderate to total assistance to safely complete this task.

15. Toileting – Bladder Care

- a. Included in Task:

Bladder Care includes assistance with toilet, bedpan, urinal, or diaper use, as well as emptying and rinsing the commode or bedpan after each use. This includes transfers, skin care, ambulation, and positioning related to bladder care. This task concludes when the client is returned to his or her pre-urination state.

- b. Factors that Make Task Personal Care:

A PCW may assist a client to and from the bathroom, provide assistance with bedpans, urinals, and commodes; provide pericare; and change clothing and pads of any kind used for the care of incontinence.

- c. Factors that Make Task Skilled:

Bladder care is considered a skilled task when the client: is unable to assist or direct care; has broken skin or recently healed skin breakdown (less than 60 days); requires skilled skin care associated with bladder care; or has been assessed as having a high and ongoing risk for skin breakdown.

- d. Special Considerations:

A PCW may assist a skilled care provider or Unpaid Family Caregiver who is competent in providing this aspect of care. Documentation must illustrate that the client needs moderate to total assistance to safely complete this task.

16. Mobility – Positioning

- a. Included in Task:

Positioning includes moving the client from a starting position to a new position while maintaining proper body alignment and support to a client's extremities, and avoiding skin breakdown.

- b. Factors that Make Task Personal Care:

A PCW may assist a client with positioning when the client is able to identify to the provider, verbally, non-verbally, or through other means including but not limited to, a legally responsible adult or adaptive technologies, when his or her position needs to be changed, and only when skilled skin care is not required in conjunction with positioning. Positioning includes alignment in a bed, wheelchair, or other furniture; and the placement of padding required to maintain proper alignment. The PCW may receive direction from or assist a skilled care provider or Unpaid Family Caregiver who is competent in providing this aspect of care.

c. Factors that Make Task Skilled:

Positioning is considered a skilled task when the client is: unable to communicate verbally, non-verbally, or through other means; or unable to perform this task independently due to illness, injury, disability, or temporary lack of mobility due to surgery. Positioning includes adjusting the client's alignment or posture in a bed, wheelchair, other furniture, assistive devices, or Durable Medical Equipment that has been ordered by a Qualified Physician.

d. Special Considerations:

Positioning and padding may not be the sole purpose for the PC visit. Positioning is not considered a separate task when a transfer is performed in conjunction with bathing, bladder care, bowel care, or other PC Tasks that require positioning.

If PC positioning is required for the completion of a skilled care task, visits must be coordinated to effectively schedule these services. A PCW may be accompanied by a skilled care provider or Unpaid Family Caregiver when required to safely position the client. Documentation must illustrate that the client needs moderate to total assistance to safely complete this task.

17. Mobility - Transfer

a. Included in Task:

Transfers include moving the client from a starting location to a different location in a safe manner. It is not considered a separate task when a transfer is performed in conjunction with bathing, bladder care, bowel care, or other PC Task.

b. Factors that Make Task Personal Care:

A PCW may assist with transfers only when the client has sufficient balance and strength to reliably stand, pivot, and assist with the transfer to some extent. Adaptive equipment, including, but not limited to, wheelchairs, tub seats, and grab bars, and safety devices may be used in transfers if: the client and PCW are fully trained in the use of the equipment; the client, or client's Unpaid Family Caregiver, can direct the transfer step-by-step; or when the PCW is deemed competent by the employer HCA in the specific transfer technique for the client. A gait belt may be used in a transfer as a safety device if the PCW has been properly trained in its use. A lift is not an included safety device and may not be used in PC transfers.

c. Factors that Make Task Skilled:

Transfers are considered a skilled task when the client: is unable to communicate verbally, non-verbally, or through other means; is not able to perform this task independently due to illness, injury, disability, or temporary lack of mobility due to surgery; lacks the strength and stability to stand or bear weight reliably; is not deemed independent in the use of assistive devices or Durable Medical Equipment that has been ordered by a Qualified Physician; or when the client requires a mechanical lift, such as a Hoyer lift, for safe transfer. In order to transfer clients via a mechanical lift, the CNA must be deemed competent in the particular mechanical lift used by the client.

d. Special Considerations:

Transfers may be completed with or without mechanical assistance. Transferring shall not be the sole purpose for the visit. A transfer is not considered a separate task when performed in conjunction with bathing, bladder care, bowel care, or other PC Task. A PCW may be aided by a skilled care provider or Unpaid Family Caregiver when required to safely transfer the client. A PCW may assist the Unpaid Family Caregiver with transferring the client, provided the client is able to direct and assist with the transfer. Documentation must illustrate that the client needs moderate to total assistance to safely complete this task.

I. LIMITATIONS

1. Medicaid clients ages 21 and older are not eligible for Pediatric PC Services.
2. The use of physical Behavioral Interventions such as restraints is prohibited, per CDPHE's consumer rights regulations. 6 C.C.R. 1011-1, Chapter 26, Section 6.
3. All PCWs and HCAs must comply with all applicable Colorado and federal requirements, rules, and regulations.
4. All Pediatric PC Services will be reimbursed at the Medicaid Pediatric PC Services rate, regardless of whether the PCW providing PC Services holds credentials for CNA, RN, or other skilled profession.
5. If a client requires a Skilled Transfer to complete a PC Task, the associated PC Task will be considered skilled in nature. PC Tasks considered skilled in nature are not covered PC Services, and will not be reimbursed by Colorado Medicaid under the Pediatric PC Services benefit.
6. PC Tasks provided as required components of skilled care tasks are not covered PC Services, and will not be reimbursed by Colorado Medicaid under the Pediatric PC Services benefit.
7. Clients eligible for the Pediatric PC Services benefit who are also eligible for the Colorado Department of Human Services Home Care Allowance program, described in rule at 9 C.C.R. 2503-5, Section 3.570, may receive services through one program, but not both.

2. All Pediatric PC Services require prior authorization by Colorado Medicaid or its Designated Review Entity using the approved utilization management tool.
3. Pediatric PC Services PARs may be submitted for up to a full year of anticipated services unless: the client is not expected to need a full year of services; the client's eligibility is not expected to span the entire year; or as otherwise specified by Colorado Medicaid or its Designated Review Entity.
