DEPARTMENT OF PUBLIC HEALTH AND ENVIRONMENT

Water Quality Control Commission

REGULATION #93 - COLORADO'S SECTION 303(D) LIST OF IMPAIRED WATERS AND MONITORING AND EVALUATION LIST

5 CCR 1002-93

93.1 Authority

These regulations are promulgated pursuant to section 25-8-101 et seq C.R.S. as amended, and in particular, 25-8-202 (1) (a), (b), (i), (2) and (6); 25-8-203 and 25-8-204.

93.2 Purpose

This regulation establishes Colorado's Lists of Impaired Waters. These waters include Water-Quality-Limited Segments Requiring Total Maximum Daily Loads ("TMDLs"), impaired waters that do not require a TMDL, and Colorado's Monitoring and Evaluation List:

- (1) The list of Water-Quality-Limited Segments Requiring TMDLs fulfills requirements of section 303(d) of the federal Clean Water Act which requires that states submit to the U.S. Environmental Protection Agency a list of those waters for which technology-based effluent limitations and other required controls are not stringent enough to implement water quality standards. These segments are included in Section 93.3 with parameters included in the Clean Water Section 303(d) Impairment column.
- (2) Colorado's Monitoring and Evaluation List identifies water bodies where there is reason to suspect water quality problems, but there is also uncertainty regarding one or more factors, such as the representative nature of the data. Water bodies that are impaired, but it is unclear whether the cause of impairment is attributable to pollutants as opposed to pollution, are also placed on the Monitoring and Evaluation List. This Monitoring and Evaluation list is a state-only document that is not subject to EPA approval. These segments are included in Section 93.3 with parameters included in the Colorado's Monitoring and Evaluation column.
- (3) The list of Water-Quality-Limited Segments Not Requiring a TMDL identifies segments where data is available that indicates that at least one classified use is not being supported, but a TMDL is not needed. These segments and parameters are included in Section 93.4.

93.3 Water Bodies Requiring TMDLs or Identified for Monitoring and Evaluation

Only those segments where a Clean Water Section 303(d) Impairment has been determined require TMDLs. For these segments, TMDLs are only required for those parameters that are identified as impairments.

93.3 Water Bodies Requiring TMDLs or Identified for Monitoring and Evaluation

1 - When portion description matches segment description, the entire segment is listed. However, when descriptions differ, only the portion described is listed.

2 - EPA reporting categories are as follows: 1) meets all designated uses 2) meets some designated uses 3) insufficient data to make use support determination (Monitoring and Evaluation List) 4a) impaired with an approved TMDL 4b) impaired with appropriate 4b plan 4c) impaired due to pollution 5) impaired without a TMDL completed.

93.4 Impaired Water Bodies Not Requiring TMDLs

Segments may be determined to be impaired if available data and/or information indicate that at least one classified use is not being supported, but a TMDL is not needed. These waters are broken out into three additional subcategories. Waters in these lists do not require a TMDL for one of the following reasons:

- Segments where a TMDL has been completed and approved but uses are not yet attained;
- Segments where other required control mechanisms are expected to address waterbody/pollutant combinations and will attain water quality standards in a reasonable period of time. (Category 4b Segment/Parameters)
- Segments where the impairment is not caused by a pollutant. (Category 4c Segment/Parameters)

93.10 STATEMENT OF BASIS, SPECIFIC STATUTORY AUTHORITY AND PURPOSE; MARCH, 2004 RULEMAKING

The provisions of C.R.S. 25-8-202(1)(a), (b) and (i), (2) and (6); 25-8-203; 25-8-204; and 25-8-401; provide the specific statutory authority for adoption of these regulatory amendments. The Commission also adopted in compliance with 24-4-103(4) C.R.S. the following statement of basis and purpose.

BASIS AND PURPOSE (303(d) List)

A. Introduction

This regulation establishes Colorado's List of Water-Quality-Limited Segments Requiring Total Maximum Daily Loads ("TMDLs"). This list was prepared to fulfill section 303(d) of the federal Clean Water Act ("Act") which requires that states submit to the U.S. Environmental Protection Agency ("EPA") a list of those waters for which technology-based effluent limitations and other required controls are not stringent enough to implement water quality standards.

Once listed, the State is required to prioritize these water bodies or segments (rivers, streams, lakes reservoirs) based on the severity of pollution and other factors. It will then determine the causes of the water quality problem and allocate the responsibility for controlling the pollution. This analysis is called the TMDL Process, and results in the determination of: 1) the amount of a specific pollutant that a segment can receive without exceeding a water quality standard (the TMDL), and 2) the apportionment to the different contributing sources of the pollutant loading (the allocation). The TMDL must include a margin of safety, waste load allocation (for point sources) and a load allocation (for non-point sources and natural background). The TMDL must include upstream loads in the assessment and apportionment process.

B. List Development

1. Listing Methodology

The "Section 303(d) Listing Methodology - 2004 Listing Cycle" contains a description of the listing process, the criteria for listing, and the criteria for determination of TMDL priority. The Listing Methodology was developed through a public process and finalized as a policy at a Water Quality Control Commission administrative action hearing on September 9, 2003.

This Listing Methodology sets forth the criteria that generally were used to make decisions regarding which waters to include on the 2004 Section 303(d) List and the 2004 M&E List. However, this methodology was not adopted by the Commission as a rule. The Commission therefore has the flexibility to take into account other appropriate factors in making site-specific listing decisions.

2. Information Considered

The Commission has considered all existing and readily available information in developing the 2004 Section 303(d) List. In determining whether data and information are existing and readily available, it has taken into account such data and information as the Division has utilized in the preparation of those identification processes, calculations and models referenced in 40 CFR §130.7(a)(5)(i), (ii) and (iv) and that credible data and information presented in a readily usable format and submitted in reports provided to the Division as referenced in 40 CFR §130.7(a)(5)(ii). In addition, the Commission accepted credible data and information that was submitted in accordance with the listing process schedule, whether submitted by EPA or any other interested party. The Division also continues to independently collect and analyze new data on a rotating basin basis as part of its triennial review efforts and will utilize such data and information in making future listing determinations. Existing data which was not brought forward through one of the above mechanisms or otherwise presented to the Commission in accordance with the schedule was not treated as "readily available" for purposes of making the 2004 listing decisions. Such information will be considered in the next listing cycle.

C. Prioritization

The objective of prioritization is to identify those waterbody segments where the Division and the public should concentrate their resources. Priorities of High, Medium and Low were established according to section IV. of the 2004 Section 303(d) Listing Methodology. Segments/parameters where the Commission determined that an appropriate plan is in place to resolve the uncertainty as specified in section 93.4 have been denoted as "L*". A Low priority may also be assigned to other segments as per section IV.

D. Discussion of Issues Raised in the Hearing

During the course of the hearing, the status of approximately 30 segments was debated. The basis for the Commission's decisions regarding the major issues for these segments is recorded below.

- 1. Selenium: Several parties questioned whether selenium, where the source is underlying native shale, should be considered a pollutant. The Commission found that selenium, like many other naturally occurring metals in Colorado is a pollutant and is classified as such on EPA's list of priority toxic pollutants (62 FR 42160). If the source of impairment is natural, that is grounds for consideration of an ambient quality-based, site-specific standard as described in Regulation No. 31 at 31.7 1(b)(ii). However, the listing decisions must be made based upon a comparison of the current adopted standard and the ambient condition for the segment. Although parties to the rulemaking submitted testimony questioning the decision to list several specific segments for selenium, such as Lower Colorado River segment 3 and Lower Arkansas River segment 1a, the evidence provided was directed largely at questioning the appropriateness of the current selenium standards. The Commission has determined, based on the evidence submitted, that these segments are not in attainment of the current selenium standards.
- 2. Segments where there is no new data, but following the 2004 Listing Methodology resulted in a different conclusion than in 2002: The following segments had no new data included in the assessments since the 2002 listing cycle. However, clarification and changes in the 2004 Listing Methodology resulted in the segments moving from the Monitoring and Evaluation List to the 303(d) List. The modifications that resulted in the most changes had to do with more clearly specifying that segments with small datasets where the ambient condition exceeds the standard by more than 50 percent should be listed. The following segments were affected:

Gunnison River Basin: Lower Gunnison segment 27

Uncompangre segment 2

Lower Colorado River Basin: White River segment 9b

3. <u>Segments with multiple tributaries:</u> Issues were raised regarding what is the appropriate way to handle segments with multiple tributaries where there is evidence of impairment. The Commission found that since segments are generally treated as having consistent uses and characteristics, their impairment should be handled in a similar fashion. Unless either water quality data or other evidence has been presented that shows that the impairment is not present in the entire segment, the entire segment has been listed as impaired. "Other evidence" may include changes in geology within a segment or the confluence with a stream known to be impaired. Nevertheless, it is anticipated that before any TMDL is developed and implemented in "all tributary" segments, work will be performed to determine the causes and locations of the impairment, such that efforts and controls are not inappropriately directed towards individual tributaries that are not truly of concern, and the Section 303(d) List can be modified accordingly. Where other evidence shows that some portions are in exceedance and other portions are not, only the impaired portion needs to be listed. The following segments were listed based on this rationale:

Gunnison River Basin: Lower Gunnison segments 4a and 4b

North Fork segments 5 and 6

Lower Colorado River Basin: Lower Colorado segment 4a

E. Segment- Specific Issues

- 1. San Juan Basin. Dolores River below McPhee Reservoir: Despite a recent decline in the fish population in this reach, the Commission found that there was not adequate readily available evidence to conclude that there exists an impairment of the aquatic life use due to other than extraordinary events associated with the long-term drought that has existed in southwest Colorado for several years. In view of evolving operations of McPhee Reservoir and varying (and generally declining) hydrologic conditions, the Commission is not able at this time to identify an "expected condition" upon which to base a decision of impairment. Further, even if an impairment caused by other than the extraordinary events associated with the drought were found to exist, the Commission could not conclude based on this record that the decline was due to a "pollutant" as compared to "pollution." Nevertheless, the Commission encourages cooperation by all interested parties in the implementation of habitat improvement measures that may serve to enhance the quality of the fishery in the reach. The Commission is prepared to revisit the concept of "expected condition" as it applies to this reach should that be warranted by changes in habitat condition. Certainly the achievement of goals set under the 1996 Operating Agreement for McPhee Reservoir may influence the nature of the expected condition. Finally, any evidence of impairment due to pollutants can be brought forth at the next listing hearing.
- 2. South Platte Basin, Clear Creek, segments 14b and 15: Available data, with specific reference to biological information on fish species collected over time and visual observations of the physical condition of the stream bed, provide an indication of "use-impairment" for Clear Creek Segments 14b and 15 relative to aquatic life. Though organic sediment appears to be a significant contributor to the impairment, the exact interaction of potentially numerous causative factors need to be further explored. No single source or cause of the impairment has been identified to date. Coors Brewing Company has voluntarily come forward with a study plan for segments 14a, 14b and 15 as part of the "pilot study" approach outlined in the section 309 study report recently submitted to the State Legislature. This pilot study would assist in defining the expected condition for these segments in view of existing hydrological/habitat conditions and in fashioning the best approach to remedying the impairment. Should Coors decide to proceed with the pilot study, the Division will identify segments 14b and 15 as "low priority" and refrain from any further TMDL implementation measures until such time as the study results are known and an appropriate approach to rectifying the identified problems is crafted in cooperation with basin stakeholders.
- 3. Upper Colorado Basin, Blue River segments 6 and 8 (Camp Cr, Jones Gulch, Keystone Cr, and <u>Mozart Creek)</u>: The four identified tributaries in these two segments were proposed by the Division to be listed as impaired relative to measured pH levels. The evidence submitted raised questions regarding the representativeness of the data showing a possible standards exceedance, particularly in the absence of data regarding seasonality of pH levels for multiple years. Therefore, the Commission determined that it is more appropriate to include these specific tributaries on the Monitoring and Evaluation List at this time. Keystone Resorts has stated that it will complete a Use Attainability Analysis for Camp Creek and Jones Gulch, and that it is willing to include Keystone Creek and Mozart Creek in this analysis. The Commission believes that it is appropriate to revisit the attainment status of these segments following completion of the UAA. Depending on the results of this analysis, the adoption of site-specific seasonal pH standards is one option that can be considered. Indeed, the Commission notes that the evidence submitted to it showed that nearby snowmaking actually mitigates pH levels in the snow.

- 4. <u>Uncompany River, segment 6b (Red Mountain Creek)</u>: The Commission does not believe that an impairment of the aquatic life use of segment 6b relative to a realistic expected condition for this segment has been shown. The Commission found that the aquatic community in segment 6a is not the appropriate expected condition for this segment. The Commission endorses the Division's proposal not to list at this time, while moving forward to investigate segment 6b and make a recommendation to the Commission regarding the attainable aquatic life use and appropriate numeric standards in the context of the next basin-wide standards and classification rulemaking proceedings. However, it is uncertain at this time whether any future remediation activities in this area will improve the aquatic life use of this segment. In the absence of documentation that the attainable expected condition for this segment is an aquatic life use that is better than the current condition of this segment, it would be inappropriate to identify this segment as impaired.
- 5. <u>Bear Creek segment 1a:</u> This segment was proposed by the Division and by Trout Unlimited to be included on the Section 303(d) List. The evidence submitted demonstrated adverse impacts to the aquatic life use in this segment during 2002, and documented that the use had started to recover in 2003, although full recovery had not yet occurred. The evidence also demonstrated that the unusual and extreme drought conditions in 2002 were the determinative cause of the adverse impacts to aquatic life. Although there was evidence submitted indicating that ammonia concentrations or elevated temperatures may have adversely affected the aquatic life, the evidence demonstrated that these potentially harmful conditions would not have been present except for the drought. The Commission has concluded that this segment should be included on the Monitoring and Evaluation List for potential aquatic life, ammonia and temperature impairments, and that its status should be reconsidered in future updates of Regulations No. 93 and No. 94. Any evidence of impairment due to pollutants can be brought forth at the next listing hearing.
- 6. <u>Lower Colorado segment 13b:</u> This is an "all tributaries" segment that was proposed by the Division to be listed in its entirety for selenium. All of the ambient water quality data available in the record for this hearing was from tributaries on the north side of the Colorado River. In addition, there was testimony regarding significant differences in the geology on the north and south sides of the Colorado River in this area. Therefore, the Commission determined that it is appropriate that only the tributaries on the north side of this segment should be listed as impaired for selenium.
- 7. <u>West Fork of Clear Creek, segment 5:</u> The Commission found that the acute zinc standard in the West Fork of Clear Creek was exceeded more than once in three years. Because the chronic zinc standard is in attainment, and because Climax presented credible biological evidence that the aquatic life use classification is supported, the Commission determined that listing for acute zinc is not warranted in this instance. This segment is included on the Section 303(d) List as impaired for copper.
- 8. <u>Middle South Platte segment 1:</u> The Division proposed that the portion of this segment from Big Dry Creek to Highway 60 be included on the Section 303(d) List as impaired for dissolved oxygen during the months of August and September. The evidence submitted offered conflicting interpretations of what the available data for this segment show regarding attainment. Because this segment appears to be in compliance with dissolved oxygen standards based on the established convention of looking at the 15th percentile of the available data for the entire segment, the Commission determined that it is more appropriate at this time to include this segment on the Monitoring and Evaluation List for further assessment of dissolved oxygen conditions. The Commission also believes that future clarification of the appropriate methodology for assessing attainment of dissolved oxygen standards, e.g. within specific months of the year, would be helpful.

F. Plans to Resolve Uncertainty

Three parties presented plans to resolve uncertainty for segments that have temporary modifications based on uncertainty [see Regulation No. 31.7(3)(a)(iii)]. These segments will not be subject to the development of a TMDL as long as there is a plan in place that addresses the following:

- (1) There is an appropriate plan in place to remove the uncertainty;
- (2) The plan includes an implementation schedule that will resolve the uncertainty in a time frame consistent with Colorado's timeline for the development of TMDLs; and
- (3) The plan is being implemented in accordance with its terms.

The Commission found that the following segments have adequate plans. It is the Commission's intent to revisit these plans at the next listing cycle to determine if they continue to meet the Commission's intent.

- 1. <u>Fountain Creek segment 6 (Monument Creek from the National Forest boundary to Fountain</u> <u>Creek)</u>: The selenium water quality standard for Fountain Creek segment 6 has a temporary modification for uncertainty pursuant to section 31.7(3)(a)(iii) of the Basic Standards. The City of Colorado Springs submitted an appropriate plan to remove the uncertainty
- 2. <u>Lower Arkansas segment 1a (Arkansas River from Fountain Creek to the Colorado Canal)</u>: The selenium water quality standard for Lower Arkansas segment 1a has a temporary modification for uncertainty pursuant to section 31.7(3)(a)(iii) of the Basic Standards. The City of Pueblo submitted an appropriate plan to remove the uncertainty
- 3. <u>Upper Yampa segment 13d (Dry Creek)</u>: In the 2003 Upper Colorado River rulemaking hearing, the Commission adopted a temporary modification (based on uncertainty) of 60 ug/L for selenium in Dry Creek. This temporary modification was based on five WQCD samples collected in Dry Creek in 2001 and 2002 near its confluence with the Yampa River. The Commission approved Seneca Coal Company's plan to monitor Dry Creek with the objective of determining the source or sources of selenium loading, where the loading is isolated in the lower portion of Dry Creek and to determine whether the loading is due to natural or irreversible man-induced sources.

BASIS AND PURPOSE (Monitoring and Evaluation List)

A. Introduction

This regulation establishes Colorado's Monitoring and Evaluation List. This list was prepared as part of the effort to identify water bodies for which technology-based effluent limitations and other required controls are not stringent enough to implement water quality standards (those impaired waters requiring TMDLs). Regulation No. 93 is the list of impaired waters which require TMDLs. This regulation is the Monitoring and Evaluation List ("M&E List") that identifies water bodies where there is reason to suspect water quality problems, but there is also uncertainty regarding one or more listing factors, such as the representative nature of the available data. Water bodies that are impaired but it is unclear whether the cause of impairment is attributable to pollutants as opposed to pollution are also included on the M&E List.

B. List Development

The statement of basis and purpose for Regulation No. 93 contains a description of how the lists were developed.

C. Prioritization and Scheduling

The Division has committed to establishing a plan for monitoring and evaluating these water bodies prior to the list submission date for the subsequent listing cycle. Further, the Commission has committed to determining their appropriate status (as either impaired or fully supporting) within ten years of their placement on the M&E List.

D. Segment-Specific Issues

- 1. <u>Blue River segment 3:</u> The Commission has included Gold Run Gulch below Jessie Mine (for cadmium and zinc) and the South Branch Swan River below Royal Tiger Mine (for zinc) on the Monitoring and Evaluation List. The Royal Tiger Mine and the Jessie Mine are both part of a CERCLA remediation effort, for which remedial project design is currently out to bid. Therefore, the Commission understands that the conditions in this area affecting water quality will be changing and that it is currently uncertain what uses or water quality can be supported in these waters in the future. The Commission does not intend by including these waters on the Monitoring and Evaluation List to conclude that any actions other than those CERCLA-related activities already underway are necessary or appropriate at this site. The status of those efforts will be reviewed during the next update of this list.
- 2. Segments proposed for the Section 303(d) List: In several specific instances, the Commission made a determination in this rulemaking hearing that segments proposed by the Division or others for inclusion on the Section 303(d) List should instead be included on the Monitoring and Evaluation List. This applies in particular to Bear Creek segment 1a and Middle South Platte segment 1 in the South Platte Basin and to four named tributaries in Blue River segments 6 and 8 in the Upper Colorado River Basin. In each of these instances, the rationale for the Commission's decision to included these waters on the Monitoring and Evaluation List is set forth in the Statement of Basis and Purpose adopted for Regulation No. 93 as a result of this rulemaking.

93.11 STATEMENT OF BASIS, SPECIFIC STATUTORY AUTHORITY AND PURPOSE; FEBRUARY, 2006 RULEMAKING, EFFECTIVE DATE OF APRIL 30, 2006

The provisions of C.R.S. 25-8-202(1)(a), (b) and (i), (2) and (6); 25-8-203; 25-8-204; and 25-8-401; provide the specific statutory authority for adoption of these regulatory amendments. The Commission also adopted in compliance with 24-4-103(4) C.R.S. the following statement of basis and purpose.

BASIS AND PURPOSE (303(d) List)

A. Introduction

This regulation updates Colorado's List of Water-Quality-Limited Segments Requiring Total Maximum Daily Loads ("TMDLs") to reflect additional water quality information available since the Regulation was promulgated in 2004. This list was prepared to fulfill section 303(d) of the federal Clean Water Act ("Act") which requires that states submit to the U.S. Environmental Protection Agency ("EPA") a list of those waters for which technology-based effluent limitations and other required controls are not stringent enough to implement water quality standards.

B. List Development

1. Listing Methodology

The "Section 303(d) Listing Methodology - 2006 Listing Cycle" contains a description of the listing process, the criteria for listing, and the criteria for determination of TMDL priority. The Listing Methodology was developed through a public process and finalized as a policy at a Water Quality Control Commission administrative action hearing on May 9, 2005.

This Listing Methodology sets forth the criteria that generally were used to make decisions regarding which waters to include on the 2006 Section 303(d) List and the 2006 M&E List. However, this methodology was not adopted by the Commission as a rule. The Commission therefore has the flexibility to take into account other appropriate factors in making site-specific listing decisions.

2. Information Considered

The Commission has considered all existing and readily available information in developing the 2006 Section 303(d) List. In determining whether data and information are existing and readily available, it has taken into account such data and information as the Division has utilized in the preparation of those identification processes, calculations and models referenced in 40 CFR §130.7(a)(5)(i), (ii) and (iv) and that credible data and information presented in a readily usable format and submitted in reports provided to the Division as referenced in 40 CFR §130.7(a)(5)(ii). In addition, the Commission accepted credible data and information that was submitted in accordance with the listing process schedule, whether submitted by EPA or any other interested party. The Division also continues to independently collect and analyze new data on a rotating basin basis as part of its triennial review efforts and will utilize such data and information in making future listing determinations. Existing data which was not brought forward through one of the above mechanisms or otherwise presented to the Commission in accordance with the schedule was not treated as "readily available" for purposes of making the 2006 listing decisions. If submitted, such information will be considered in the next listing cycle.

C. Prioritization

The objective of prioritization is to identify those waterbody segments where the Division and the public should concentrate their resources. Priorities of High, Medium and Low were established according to section IV. of the 2006 Section 303(d) Listing Methodology.

D. Temporary Modifications and Plans to Eliminate Uncertainty

Consistent with the recent changes to the Basic Standards and Methodologies for Surface Water (Regulation No. 31) and the Discharge Permit Regulations (Regulation No. 61), the Commission deleted subsection 93.4 "Plans to Eliminate Uncertainty." The Statement of Basis for the June 2005 rulemaking hearing for Regulation No. 31 states:

The Commission recognizes that portions of the temporary modification provisions adopted in this rulemaking may be inconsistent with current provisions in Regulation No. 93. The Commission intends that the provisions adopted in this rulemaking will govern until appropriate revisions will be adopted in the Regulation No. 93 in the next rulemaking hearing reviewing that regulation.

In 2004, this provision was added to Regulation No. 93 to identify those waterbodies where work independent of the TMDL process was proceeding to identify the appropriate underlying standards. In these cases, TMDLs and permit limits were not to be based on the underlying standards until the uncertainty was resolved. The intent was that dischargers should not be forced to comply with underlying standards where there is ongoing work being done to resolve acknowledged uncertainty regarding the appropriateness of those underlying standards.

Dischargers are now protected from complying with underlying standards before the uncertainty is resolved by recent changes in the Basic Standards and the Permit Regulations. Now, for discharges to waters where a temporary modification has been adopted, a permit may contain compliance schedules that recognize this ongoing work and may extend beyond the end of the permit term. The Commission believes it appropriate for dischargers to focus their available resources on addressing uncertainty with respect to appropriate water quality standards, rather than on complying with standards that may change in a short time.

Consistent with this new approach to temporary modifications, the Commission intends that a more thorough consideration will be given to the causes and sources of non-attainment before temporary modifications are proposed. In cases where the appropriate way to address non-attainment of underlying standards is through the TMDL program, not through adoption of temporary modifications, the Commission may assign a higher TMDL priority to such waters.

E. Segment- Specific Issues

<u>Fountain Creek segment 2a:</u> The Division had proposed inclusion of this segment due to non-attainment of the assigned E. coli standard. The Division noted that its proposal erroneously identified the listing as a "low" priority. The Section 303(d) Listing Methodology, 2006 Listing Cycle indicates that TMDLs for waters in non-support of Recreation 1a use classifications be designated as "high" priority. The Commission has therefore adopted a "high" priority designation for this segment.

<u>Fountain Creek segment 2b:</u> This segment is the lowermost of three that comprise the mainstem of Fountain Creek. Both of the upper two segments are included on the List of Impaired Waters for E. coli. The Sierra Club had proposed that this lowermost segment should also be listed for E. coli. The Commission has decided that the Division's analysis of the available data is consistent with the procedures contained in the Section 303(d) Listing Methodology, 2006 Listing Cycle and that the results of that analysis do not support inclusion of this segment on the Section 303(d) List of Water-Quality-Limited Segments Requiring TMDLs.

<u>North Fork Gunnison River segment 6:</u> The Division had proposed that this "all tributary" segment be listed in its entirety for non-attainment of the aquatic life use-based chronic selenium standard. The Colorado River Water Conservation District provided evidence that the standard is, in fact, attained at several locations within this segment. It is therefore appropriate that only that portion of the segment for which non-attainment has been documented be included on the list. The Commission has identified the affected portion of the segment as "Cottonwood Creek" and has revised the proposal accordingly.

<u>Uncompander River segment 6b (Red Mountain Creek):</u> The Commission had in a February 2004 Rulemaking Hearing determined that there is not adequate data to support a finding of impaired Aquatic Life Use relative to the expected condition. Information offered in the 2006 hearing further reinforces this conclusion by demonstrating that the Commission's classification assumes an extremely limited aquatic life use in this segment. In a rulemaking hearing scheduled for June 12, 2006, the Commission will consider a proposal to delete the aquatic life use classification for this segment. The Commission has therefore opted not to include Red Mountain Creek on the 2006 Section 303(d) List of Water-Quality-Limited Segments Requiring TMDLs.

<u>Lower Gunnison segment 2:</u> The Division proposed that this segment be listed for selenium and temperature, with a "high" priority for each. In view of evidence that it may be appropriate to reconsider the cold water aquatic life classification of this segment prior to initiating a TMDL, the Commission chose to change the priority for the temperature listing to "low".

Lower Colorado River segment 3: The Division had initially proposed listing of this segment for ammonia. During discussions with the City of Grand Junction it was noted that during the course of the Division's assessment an error had been made relative to the dataset utilized. The Division subsequently modified its proposal to withdraw this segment from its proposal. The Commission has not included the segment on the 2006 Section 303(d) List of Water-Quality-Limited Segments Requiring TMDLs.

Lower Colorado River segment 13a (Salt Creek): Salt Creek was proposed by the Division to be listed for sediment based upon a study of this and other tributary segments performed in conjunction with the BLM and Chadwick and Associates. Mesa County objected to the inclusion of Salt Creek on the Section 303(d) List of Water-Quality-Limited Segments Requiring TMDLs, arguing that the assessment protocols used were inconsistent with Commission Policy 98-1, the Implementation Guidance for Determining Sediment Deposition Impacts to Aquatic Life in Streams and Rivers. The assessment performed utilized the same approach embodied in the Sediment Guidance with respect to comparison of the affected reach to an expected condition. The validity of this comparative, expected condition analysis is not dependent on this being a high gradient, cobble bottom stream. The Commission has determined that the assessment adequately demonstrated non-attainment of the narrative sediment standard and consequent impairment of Salt Creek.

Bear Creek segment 1a: The Division proposed that this segment be retained on the Monitoring and Evaluation list for non-attainment of the assigned aquatic life use classification and for temperature. The evidence submitted demonstrated adverse impacts to trout populations at two stations (Bear Creek cabins and O'Fallon Park) situated in the upper reach of this segment since 2002 and documented that the use continued to recover well into 2004, although full recovery had not yet occurred. This evidence is consistent with the Commission's conclusion in 2004 that the demonstrative cause of adverse impacts to aquatic life was the extreme drought in 2002. The 2006 Listing Methodology states that "Data collected during or immediately after temporary events influencing the waterbody that are not representative of normal conditions shall typically be discounted in making the listing decision." Several parties argued that water quality conditions might have adversely affected the aquatic life. However, there was no evidence submitted demonstrating exceedance of the Mean Average Weekly Temperature criterion during 2004 or 2005, or demonstrating that impairment was otherwise caused by pollutants. The Commission has decided that the Division's interpretation of the available data is consistent with the procedures contained in the Section 303(d) Listing Methodology, 2006 Listing Cycle and has determined that this segment should be retained on the Monitoring and Evaluation List for aquatic life impairments and temperature. and that its status should be reconsidered in future updates of Regulations No. 93 and No. 94.

The fact that impacts to Bear Creek aquatic life continue to appear to be related to the 2002 extreme drought is an adequate and appropriate basis for including this segment on the Monitoring and Evaluation List, rather than the Section 303(d) List. However, the Commission also notes that, even if continuing impacts did not appear to be tied to the drought, where there is no evidence that a numerical standard has been exceeded, the Commission's practice has been to place waters on the Monitoring and Evaluation List if there is not evidence that a use impairment has been caused by a pollutant. The 2006 Listing Methodology states "Water bodies that are impaired but it is unclear whether the cause of impairment is attributable to pollutants as opposed to pollution will be placed on the M&E List." EPA's guidance for such circumstances differs. EPA's guidance says that where there is an impairment but there has not been a demonstration that the impact is not caused by a pollutant, the water segment should be included on the Section 303(d) List. Because this provision appears in EPA guidance only, and the Commission is aware of no specific provisions of the Clean Water Act or EPA regulations that would dictate this result, the Commission believes that it has policy discretion to use different approach – i.e., to refrain from listing unless a pollutant has been identified as the cause of the use impairment.

<u>Clear Creek segment 13b (North Fork Clear Creek):</u> The Division had proposed this segment be retained on the Section 303(d) List of Water-Quality-Limited Segments Requiring TMDLs for several parameters and for non-attainment of the assigned aquatic life use classification. The Commission has adopted this proposal, but notes that the segment attains the assigned numeric copper standard. The listing therefore does not include copper. Further, the Commission notes that the Division had proposed a "high" priority for completion of TMDLs for this segment, due to the fact that the North Fork of Clear Creek was included on the 1998 List of Impaired Waters and is therefore subject to provisions of the 1999 Settlement Agreement addressing TMDL development by the Division. The Commission has determined that a "medium" priority will be assigned for TMDL development, while recognizing that the Division remains obligated to completion of TMDLs for this segment by June 30, 2008. If the underlying standards are revised in the 2009 South Platte River basin rulemaking, TMDLs and/or Wasteload Allocations based on the superceded standards should be revisited. Cache la Poudre segment 14 (Horsetooth Reservoir): The Division proposed inclusion of Horsetooth Reservoir on the Section 303(d) List of Water-Quality-Limited Segments Requiring TMDLs due to nonattainment of the dissolved oxygen standard. Data for a ten-year period of record was found to be representative of conditions in the Reservoir. The Commission determined that in this instance it is appropriate to consider data for more than the most recent five years, in view of evidence that the most recent five years include a potentially unrepresentative period of reservoir drawdown. While the available data do not include samples spaced throughout a 24-hour period, the data are typical of that usually available for lakes and reservoirs. If diel variation were expected, it is likely that any such data would demonstrate a slight depression of dissolved oxygen concentration in the epilimnion during non-daylight hours. However, the area of non-attainment of dissolved oxygen in Horsetooth Reservoir is in the metalimnion, or middle layer of the reservoir. Testimony from Division staff indicated that it is unlikely that diel variation in dissolved oxygen levels would be expected in the metalimnion, since this deeper layer is unlikely to be affected by photosynthesis that occurs in the epiliminion. The Commission interprets the reference in the Listing Methodology to lake and reservoir samples representative of diel variation to apply only in those factual circumstances (e.g. dissolved oxygen in the epilimnion) where such variation would be expected.

The assessments and recommendations by the Division regarding Horsetooth Reservoir were consistent with the Section 303(d) Listing Methodology, 2006 Listing Cycle. However, the Commission notes that this hearing identified a need to provide further clarifications regarding appropriate procedures for assessing compliance with dissolved oxygen standards, particularly for lakes and reservoirs. The Commission encourages the Division to pursue such clarifications in preparation of the 2008 Listing Methodology, including, e.g., addressing variations in attainment status from year-to-year and further clarification of what constitutes representative data.

Evidence regarding the status of aquatic life in Horsetooth Reservoir does not override the fact that the data demonstrate a long term standards exceedance. The Commission's practice has been to list waterbodies on the Section 303(d) List whenever representative data demonstrate non-attainment of a numerical standard, including dissolved oxygen. For other waters listed for non-attainment of dissolved oxygen, the Commission has not required evidence of the cause of the non-attainment. Although the provisions of the 2006 Listing Methodology arguably contain potentially conflicting language on this point, the Commission's practice has not been to apply the provision regarding "water bodies that are impaired but it is unclear whether the cause of impairment is attributable to pollutants" to waters with dissolved oxygen impairments. Moreover, although the Commission was willing to consider listing Horsetooth Reservoir on the M&E List if the cause of the dissolved oxygen impairment was recent reservoir draw downs (i.e., reservoir operations), the evidence did not support this conclusion.

<u>Middle South Platte River segment 03a (Horse Creek Reservoir)</u>: The Division proposed that Horse Creek Reservoir be included on the Section 303(d) List of Water-Quality-Limited Segments Requiring TMDLs due to non-attainment of the assigned pH standard. The recommendation was based upon a representative dataset including four years of water quality monitoring results. The Commission has determined that inclusion of the Reservoir on the Section 303(d) List of Water-Quality-Limited Segments Requiring TMDLs for pH is appropriate and consistent with the Section 303(d) Listing Methodology, 2006 Listing Cycle. Dissolved oxygen data for the same four-year period demonstrate attainment of the dissolved oxygen data within the sampling profile or profiles for a single sampling event, the Commission has determined that this practice is acceptable and appropriate, and consistent with the 2006 Listing Methodology. EPA's proposal that Horse Creek Reservoir be listed for dissolved oxygen is based upon analytical procedures that are inconsistent with the Division's current assessment practice. The Commission has determined that the Reservoir is not impaired with respect to the dissolved oxygen standard.

<u>Upper Colorado River segment 07b (Muddy Creek):</u> The Division had proposed the listing of Muddy Creek for non-attainment of the assigned temperature standard. The Colorado River Water Conservation District objected to the Division's proposal and has provided evidence suggesting that the USGS sampling station (data from which formed the basis for the Division's proposal) is situated such that any temperature data generated is likely not representative. The Commission has therefore included the segment on the 2006 Monitoring and Evaluation List to allow further examination of temperature data from this station.

<u>Upper Yampa River segment 07b:</u> This segment comprises a portion of the Yampa River mainstem. The Division had proposed that this segment be listed for temperature, again based upon USGS monitoring data. The Colorado River Water Conservation District provided evidence concerning the location of the USGS sampling station below the Steamboat Springs hot springs discharge. Again parties have agreed that such data is likely not representative of instream conditions. The Commission has placed the segment on the 2006 Monitoring and Evaluation List.

<u>Upper Yampa River segment 20 (First Creek, Elkhead Creek)</u>: These waters are classified for Recreation Use 1a, and are assigned a numeric E coli standard of 126 org./100 mL. Ambient E. coli levels exceed the assigned numeric standard. The U. S. Forest Service has raised concerns regarding the current assigned Recreation Use and the associated numeric standards. The Commission has included the segment on the 2006 Section 303(d) List of Water-Quality-Limited Segments Requiring TMDLs based upon the current classification and standards. However, it is the intent of the Commission that these issues be examined in the context of the 2008 Upper Colorado surface water standards rulemaking prior to the initiation of the TMDL development process.

BASIS AND PURPOSE (Monitoring and Evaluation List)

A. Introduction

This regulation updates Colorado's Monitoring and Evaluation List to reflect additional water quality information available since the Regulation was promulgated in 2004.

B. List Development

The statement of basis and purpose for Regulation No. 93 contains a description of how the lists were developed.

C. Prioritization and Scheduling

The Division remains committed to establishing a plan for monitoring and evaluating these water bodies prior to the list submission date for the subsequent listing cycle. Further, the Commission has committed to determining their appropriate status (as either impaired or fully supporting) within ten years of their placement on the M&E List.

D. Segment-Specific Issues

In a number of instances, the Commission chose in this hearing to include on the Monitoring and Evaluation List waters that were initially proposed by the Division, or recommended by other rulemaking participants, for inclusion on the Section 303(d) List, Regulation #93. These waters include Bear Creek segment 1a, Upper Colorado River segment 07b (Muddy Creek), and Upper Yampa River segment 07b. In each instance, the Commission's rationale for these decisions is set forth in the statement of basis and purpose for Regulation #93.

PARTIES TO THE RULEMAKING

- 1. The City of Grand Junction
- 2. The Colorado Division of Wildlife
- 3. Evergreen Trout Unlimited and Colorado Trout Unlimited
- 4. The City of Colorado Springs
- 5. The City of Black Hawk
- 6. The Colorado River Water Conservation District
- 7. Friends of Bear Creek
- 8. Big Thompson Watershed Forum
- 9. The Bear Creek Watershed Association
- 10. The Northern Colorado Water Conservancy District
- 11. U.S. Environmental Protection Agency, Region 8
- 12. Evergreen Metropolitan District and West Jefferson County Metropolitan District
- 13. USDA Forest Service, Medicine Bow-Routt National Forests
- 14. Colorado Rock Products Association
- 15. City and County of Broomfield
- 16. Climax Molybdenum Company
- 17. The Metro Wastewater Reclamation District
- 18. Mount Carbon Metropolitan District

93.12 STATEMENT OF BASIS, SPECIFIC STATUTORY AUTHORITY AND PURPOSE; FEBRUARY, 2008 RULEMAKING, EFFECTIVE DATE OF APRIL 30, 2008

The provisions of C.R.S. 25-8-202(1)(a), (b) and (i), (2) and (6); 25-8-203; 25-8-204; and 25-8-401; provide the specific statutory authority for adoption of these regulatory amendments. The Commission also adopted in compliance with 24-4-103(4) C.R.S. the following statement of basis and purpose.

BASIS AND PURPOSE (303(d) List)

A. Introduction

This regulation updates Colorado's List of Water-Quality-Limited Segments Requiring Total Maximum Daily Loads ("TMDLs") to reflect additional water quality information available since the Regulation was promulgated in 2006. This list was prepared to fulfill section 303(d) of the federal Clean Water Act ("Act") which requires that states submit to the U.S. Environmental Protection Agency ("EPA") a list of those waters for which technology-based effluent limitations and other required controls are not stringent enough to implement water quality standards.

B. List Development

1. Listing Methodology

The "Section 303(d) Listing Methodology - 2008 Listing Cycle" contains a description of the listing process, the criteria for listing, and the criteria for determination of TMDL priority. The Listing Methodology was developed through a public process and finalized as a policy at a Water Quality Control Commission administrative action hearing on May 15, 2007.

This Listing Methodology sets forth the criteria that generally were used to make decisions regarding which waters to include on the 2008 Section 303(d) List and the 2008 M&E List. However, this methodology was not adopted by the Commission as a rule. The Commission therefore has the flexibility to take into account other appropriate factors in making site-specific listing decisions.

2. Information Considered

The Commission has considered all existing and readily available information in developing the 2008 Section 303(d) List. In determining whether data and information are existing and readily available, it has taken into account such data and information as the Division has utilized in the preparation of those identification processes, calculations and models referenced in 40 CFR §130.7(a)(5)(i), (ii) and (iv) and that credible data and information presented in a readily usable format and submitted in reports provided to the Division as referenced in 40 CFR §130.7(a)(5)(ii). In addition, the Commission accepted credible data and information that was submitted in accordance with the listing process schedule, whether submitted by EPA or any other interested party. The Division also continues to independently collect and analyze new data on a rotating basin basis as part of its triennial review efforts and will utilize such data and information in making future listing determinations. Existing data which was not brought forward through one of the above mechanisms or otherwise presented to the Commission in accordance with the schedule was not treated as "readily available" for purposes of making the 2008 listing decisions. Such information will be considered in the next listing cycle.

C. Prioritization

The objective of prioritization is to identify those waterbody segments where the Division and the public should concentrate their resources. Priorities of High, Medium and Low were established according to section IV. of the 2008 Section 303(d) Listing Methodology.

D. Fish Consumption Advisory Listings

Consistent with the 2008 Section 303(d) Listing Methodology, the Division proposed to include 12 segments on the 2008 303(d) List for non-attainment of the aquatic life use due to fish consumption advisories for mercury. The 2008 Section 303(d) Listing Methodology, states:

Fish Consumption Advisories are issued by the Colorado Department of Public Health and Environment ("CDPHE") in instances where analysis of fish tissue samples provides documentation of a public health risk. Issuance of a FCA by CDPHE indicates impairment of an Aquatic Life Use classification for any waters so classified.

The 2006 303(d) List included three of these reservoirs for impairment due to mercury: one in the Rio Grande basin: Sanchez Reservoir (Rio Grande, segment 30), and two in the San Juan basin: McPhee Reservoir (Dolores, segment 4) and Narraguinnep Reservoir (La Plata, segment 11). These listing were changed by the Commission to specify that the listing was based on non-attainment of the aquatic life. This is consistent with the 2008 Listing Methodology and avoids confusion that there is non-attainment of the mercury standard in the water column.

The Commission has included 12 segments on the 2008 303(d) List for non-attainment of the aquatic life use due to mercury fish consumption advisories for 13 lakes or reservoirs. The Commission also included one listing based on non-attainment of the aquatic life use due to a PCE fish consumption advisory in Willow Springs Ponds, Fountain Creek, segment 7a.

E. Discussion of Issues Raised in the Hearing

Dissolved Oxygen Standard in Lakes and Reservoirs: The issue of an appropriate D.O. standard in lakes and reservoirs was raised in this hearing by two parties, Northern and the River District. The River District focused its attention to high elevation lakes and reservoirs while Northern discussed the concept of representative data and assessment methods as outlined in the 2008 Listing Methodology. The Division agreed that work is needed to examine the D.O. standard for lakes and reservoirs and that additional refinement of the Listing Methodology is appropriate including consideration of whether and how refugia should be addressed. This standard is scheduled for review in preparation for the 2010 Basic Standards and Methodology, Regulation No. 31, RMH in June 2010. The Commission directs the Division to work with parties in 2008 and 2009 on any changes that are deemed appropriate for the 2010 Listing Methodology. The Commission made listing decisions based on the available data using the adopted standards and the 2008 Listing Methodology. Site-specific decisions made by the Commission are discussed below.

F. Segment- Specific Issues

<u>Fountain Creek segment 6, Monument Creek:</u> Mainstem of Monument Creek from the boundary of National Forest Lands to the confluence with Fountain Creek: The Division had proposed retaining the portion of Monument Creek below Mesa Road on the 2008 303(d) List because selenium concentrations in that portion exceed the water quality standard for Fountain Creek Segment 6. The Commission has determined that it is appropriate at this time to include this portion of Monument Creek on the 2008 303(d) List. However, because there is an appropriate plan in place to address the segment as a whole, the Commission directs the Division and Colorado Springs Utilities to revisit this plan to determine the causes and potential reversal of elevated Se concentrations and the appropriate long-term underlying standard for this section of COARFO06.

Lower Colorado segment 2, Colorado River (COLCLC02): Mainstem of the Colorado River from Parachute Creek to the Gunnison River. The Division originally proposed listing this segment based on non-attainment of the selenium standard. The Division based its proposal on data from multiple sampling locations. The River District questioned whether some of the sample locations, including the Humphrey backwater location and others, were in the segment. The Division reviewed the sampling locations and determined that some of the sampling locations used in the original proposal were outside the segment. The segment was reassessed and still showed impairment. The parties disagree whether Humphrey Backwater is located within the segment but agreed that it demonstrated exceedences of the selenium standard. The Commission ultimately decided to list the Humphrey Backwater portion of the Colorado River segment based on those data, rather than listing the entire segment.

<u>White River segment 13b:</u> Shell Frontier Oil and Gas Inc. provided additional analytical results for a number of locations within the Yellow Creek drainage. Re-assessment of several waters which had been proposed for inclusion on the Monitoring and Evaluation List indicated that Corral Creek, Box Elder Gulch, Stake Springs and Duck Creek, are all in attainment of the assigned standard for total recoverable iron. This additional data, however, also demonstrated that the lower portion of Corral Creek and Duck Creek are in non-attainment of the Aquatic Life Use-based chronic selenium standard. The Commission has added these waters to the 303(d) List for selenium.

<u>Upper Colorado segment 5, Wolford Mountain Reservoir (COUCUC05)</u>: The River District opposed the Division's proposal to move Wolford Reservoir from the 2006 M&E List to the 2008 303(d) List when no additional data has been collected. In addition, the River District expressed their concerns with the current D.O. standard and Listing Methodology especially as it is applied to high alpine lakes and reservoirs. The Commission moved Wolford Reservoir from the M&E List to the 303(d) List based on the current standards and listing methods. The Commission has encouraged the Division, the River District and other parties to continue to work towards an improved D.O. standard for the 2010 Basic Standards Rulemaking Hearing. The Commission adopted a low priority for this listing, since it is appropriate for the D.O. standard and listing methodology issues to be addressed before substantial resources are expended on development of a TMDL.

<u>Uncompanding segment 14, Sweitzer Lake (COGUUN14)</u>: The Division proposed listing for Sweitzer Lake due to exceedances of the D.O. standard in the mixed layer. The River District pointed out that there was no thermal stratification and adequate refugia present and therefore the segment should not be listed. They also indicated that there is evidence of chemical stratification. The Commission listed Sweitzer Lake, segment COGUUN14, on the 303(d) List due to exceedances in the mixed layer as defined in the Listing Methodology.

<u>Upper Yampa segment 13d, Dry Creek (COUCYA13d)</u>: The Division proposed listing the Hubberson Gulch tributary of this segment due to non-attainment of the total recoverable iron standard. Seneca Coal Company (Seneca) provided evidence that the tributary is in attainment of the standard. The Commission did not list the segment for total recoverable iron on the 303(d) List.

<u>Upper Yampa segment 13e. Sage and Grassy Creeks (COUCYA13e)</u>: The Division proposed listing this segment due to non-attainment of the total recoverable iron and dissolved selenium standards. Seneca provided evidence that the total recoverable iron standard is attained within the segment. The Commission did not include the segment on the 303(d) List for total recoverable iron. Seneca also provided evidence that the selenium standard is attained in the upper portions of the two creeks in the segment. The Commission did include the lower portion of the creeks (Sage Creek below Routt County Road 51D and Grassy Creek below Routt County Road 27A), on the 303(d) List for dissolved selenium.

BASIS AND PURPOSE (Monitoring and Evaluation List)

A. Introduction

This regulation updates Colorado's Monitoring and Evaluation List to reflect additional water quality information available since the Regulation was promulgated in 2006.

B. List Development

The statement of basis and purpose for Regulation No. 93 contains a description of how the lists were developed.

C. Prioritization and Scheduling

The Division remains committed to establishing a plan for monitoring and evaluating these water bodies prior to the list submission date for the subsequent listing cycle. Further, the Commission has committed to determining their appropriate status (as either impaired or fully supporting) within ten years of their placement on the M&E List.

D. Segment Specific Issues

- 1. Lower Dolores segment 3 (COGULD03): The Commission approved resegmentation of Lower Dolores segment 3 at the Regulation 35 Rulemaking Hearing in June 2006. The resegmentation was based on the Division's investigation identifying Salt Creek draining the Sinbad Valley. The Sinbad Valley is identified by the Colorado Geological Survey as a graben or a collapse feature that formed in response to salt migration and dissolution beneath the area. Based on this information the selenium and zinc standards for the new Salt Creek segment were set at ambient conditions. The Division proposed to delete this from the M&E List based on attainment of the new ambient standards. The Commission removed this segment from the M&E List.
- 2. <u>Bear Creek segment 1a (COSPBE01a):</u> This segment was removed from the M&E List based on assessment of annual fish surveys, water quality parameters and temperature data. It is noted that Bear Creek has seen significant improvement but still requires continued cooperative efforts by the Division, DOW, the Bear Creek Watershed Authority, Trout Unlimited and others to prevent future impairment or re-listing.

- 3. <u>Blue River segment 3 (COUCBL03):</u> The Commission has included Gold Run Gulch below Jessie Mine (for cadmium and zinc) and the South Branch Swan River below Royal Tiger Mine (for zinc) on the 2006 Monitoring and Evaluation List. The Royal Tiger Mine and the Jessie Mine are both part of a CERCLA remediation effort completed in 2007. Remediation results with respect to water quality are not yet available. In the past the Commission did not intend by including these waters on the Monitoring and Evaluation List to conclude that any actions other than those completed CERCLA-related activities are necessary or appropriate at this site. The status of those efforts will be reviewed during the next update of this list.
- 4. <u>White River segment 16 (COLCWH16):</u> The Commission has included Ryan Gulch on the Monitoring and Evaluation List for E. coli. Shell had argued that Ryan Gulch should not be included on the Monitoring and Evaluation List for E. coli due to the lack of more than a single sample and because *"the segment does not appear to support classification as recreation class 2."* The Commission notes that placement of the water on the Monitoring and Evaluation List does not indicate a finding that Ryan Gulch is in non-attainment with the assigned Recreational Use, only that more data is needed to accurately assess the attainment status. Further, the Commission would note that alternate Recreation Use designations have more stringent *E. coli* standards then that assigned with the current Recreation Use designation.
- 5. <u>Upper Yampa segment 13d, Dry Creek (COUCYA13d):</u> The Division proposed listing this segment due to exceedances of the lead standard. Seneca provided evidence that the lead standard is attained within the upper portion of this segment. The Commission included the lower portions of the segment (below Routt County Road 53 (Sec. 22, T6N, R88W)), on the 2008 M&E List for dissolved lead.
- 6. Uncompahgre segment 3b, Ridgeway Reservoir (COGUUN03b): Listing methods for temperature in lakes were changed in the Section 303(d) Listing Methodology 2008 Listing Cycle to reflect changes in the temperature standards in Regulation No. 31. In the Listing Methodology (p. 25) it states: "If the refuge is not adequate because of low dissolved oxygen, the lake or reservoir may be listed as impaired for dissolved oxygen rather than for temperature." The Division proposed a few segments for the M&E List that are listed for dissolved oxygen due to exceedances of temperature in the epilimnion where there was not adequate refugia in the lower levels of the lake or reservoir. Ridgeway Reservoir was one of those segments. The data showed that the temperatures in the epilimnion was not present on that day due to inadequate dissolved oxygen in the lower portion of the lake. Due to confusion that this type of listing caused, the parameter notation in Regulation No. 94 was changed to indicate that the D.O. listing was due to exceedances of the temperature standard. The Commission added Ridgeway Reservoir; segment COGUUN03b, to the M&E List for "D.O. (temperature)".
- 7. Fountain Creek segment 2a (COARFO02a): Fountain Creek segment COARFO02a includes the mainstem from its confluence with Monument Creek to the State Highway 47 Bridge. This segment was assigned an ambient-based chronic selenium standard of 8.0 ug/L during the Arkansas River Basin RMH in 2007. The Aquatic Life Use-based acute standard was set at TVS. Two acute exceedances were found during the data assessment for this rulemaking hearing that could place this segment on the 303(d) List. Further investigation of these acute exceedances showed discrepancies in the USGS and the WQCD data. The Division, as well as Colorado Springs, believed that because of the inconsistent nature of this data it may not be representative, and together the parties will investigate the validity of these data. For this reason, the Commission placed this segment on the M&E as opposed to the 303(d) List until further study of selenium in this segment can take place.

- 8. <u>Upper Colorado segment 2, Shadow Mountain Reservoir (COUCUC02)</u>: The Division originally proposed to include Shadow Mountain Reservoir on the 2008 303(d) List for dissolved oxygen. In their RPHS, Northern opposed the listing of Shadow Mountain for dissolved oxygen on the 303(d) List. They stated that the data was not representative because it was not spatially distributed, it did not have temporal variability, and it followed a temporary event, namely fall turn over following a historic drought. The Division disagreed regarding the representative nature of the sampling program but points out that there are questions about the validity of the September 2003 sample profile that was evaluated. For example, the Division believed that D.O. readings taken on September 16, 2003 may have been a calibration error. Moreover, that was the only reading that exceeded the standard during the entire period of record and thus may not have been representative. For these reasons the reservoir was placed on the M&E List as opposed to the 303(d) List until further evaluation can take place.
- 9. Upper Colorado segments 6 and 8, Camp Cr, Jones Gulch, Keystone Cr, and Mozart Creek (COUCBL06 and COUCBL08): During the 2004 rulemaking process, the four identified tributaries in these two segments were placed on the M&E List based upon measured pH levels during one spring one runoff season when pH levels are expected to be relatively low due to natural causes. Subsequent water quality monitoring conducted over a period of four years has found that these streams meet the pH standards and have 15th percentile values that are above the minimum 6.5 s.u. pH standard. Based upon these findings, the Commission removed segments COUCBL06 and COUCBL08 from the M&E List.
- 10. <u>Upper Colorado segment 10 (COUCUC10):</u> The Division proposed that segment COUCUC10 be placed on the M&E List for copper based on data from WQCD station 12193, located on the Fraser River at the Town of Fraser. Additional stations were assessed on this segment. The Districts questioned the data used in the assessment and upon reevaluation of data for five stations along the Fraser River, the Division revised its proposal to only list a portion of the segment on the M&E List. The WQCC placed the Fraser River from the Town of Fraser to the confluence with the Colorado River on the M&E List based on this data analysis. The Division will work with the Grand County Districts and the Grand County Water Information Network (GCWIN) to collect more data and look into copper issues on the Fraser River.

PARTIES TO THE RULEMAKING HEARING

- 1. The Metro Wastewater Reclamation District
- 2. Bear Creek Watershed Association
- 3. Keystone Resort
- 4. City of Colorado Springs and Colorado Springs Utilities
- 5. CAM-Colorado LLC and CAM Mining LLC
- 6. Colorado Division of Wildlife
- 7. Southeastern Colorado Water Conservancy District
- 8. Shell Frontier Oil and Gas, Inc.
- 9. The Grand County Water and Sanitation District #1, the Winter Park West Water and Sanitation District, the Fraser Sanitation District and the Winter Park Sanitation District
- 10. Trout Unlimited, Colorado Trout Unlimited, and the Evergreen Chapter of Trout Unlimited
- 11. Northern Colorado Water Conservancy District
- 12. Seneca Coal Company
- 13 Colorado River Water Conservation District
- 14. U.S. Environmental Protection Agency, Region 8
- 15. City of Black Hawk and Black Hawk/Central City Sanitation District
- 16. Cripple Creek & Victor Gold Mining Company
- 17. Town of Minturn
- 18. Homestake Mining Company of California
- 19. CBS Operations Inc

93.13 STATEMENT OF BASIS, SPECIFIC STATUTORY AUTHORITY AND PURPOSE; FEBRUARY, 2010 RULEMAKING, EFFECTIVE DATE OF APRIL 30, 2010

The provisions of C.R.S. 25-8-202(1)(a), (b) and (i), (2) and (6); 25-8-203; 25-8-204; and 25-8-401; provide the specific statutory authority for adoption of these regulatory amendments. The Commission also adopted in compliance with 24-4-103(4) C.R.S. the following statement of basis and purpose.

BASIS AND PURPOSE

A. Consolidation of Regulations #93 and #94

Prior to the 2010 listing cycle, Colorado's list of Water-Quality-Limited Segments Requiring Total Maximum Daily Loads was set forth in this Regulation #93, and Colorado's Monitoring and Evaluation List was set forth in Regulation #94. In this hearing, the Commission has approved the Division staff proposal to combine both lists into Regulation #93, and to repeal the former Regulation #94. The primary benefit of combining the regulations is to make the status of water segments in Colorado easier to understand by setting forth both lists in one table. This new structure will also make it easier to understand proposed revisions to either list during future rulemaking hearings. These benefits will be seen by the Division, the Commission and interested stakeholders.

Both regulations were heard by the Commission at the same rulemaking hearings in the past and decisions were made for both regulations at the same time. One reason for maintaining separate lists in the past is that Colorado's list of Water-Quality-Limited Segments Requiring Total Maximum Daily Loads is subject to EPA approval, while Colorado's Monitoring and Evaluation List is not. Although the Commission is now combining both lists into one regulation for simplicity and ease of use, it will continue to be only the list of Water-Quality-Limited Segments Requiring Total Maximum Daily Loads that requires EPA approval. In submitting the revised "Section 303(d) List" to EPA, the Commission will note that only that list is submitted for approval and that the separate Colorado Monitoring and Evaluation List is maintained as state-only information.

B. Revisions to 303(d) List

1. Introduction

This regulation updates Colorado's List of Water-Quality-Limited Segments Requiring Total Maximum Daily Loads ("TMDLs") to reflect additional water quality information available since the Regulation was promulgated in 2008. This list was prepared to fulfill section 303(d) of the federal Clean Water Act ("Act") which requires that states submit to the U.S. Environmental Protection Agency ("EPA") a list of those waters for which technology-based effluent limitations and other required controls are not stringent enough to implement water quality standards.

2. List Development

a. Listing Methodology

The "Section 303(d) Listing Methodology - 2010 Listing Cycle" contains a description of the listing process, the criteria for listing, and the criteria for determination of TMDL priority. The Listing Methodology was developed through a public process and finalized as a policy at a Water Quality Control Commission administrative action hearing on May 11, 2009.

This Listing Methodology sets forth the criteria that generally were used to make decisions regarding which waters to include on the 2010 Section 303(d) List and the 2010 M&E List. However, this methodology was not adopted by the Commission as a rule. The Commission therefore has the flexibility to take into account other appropriate factors in making site-specific listing decisions.

b. Information Considered

The Commission has considered all existing and readily available information in developing the 2010 Section 303(d) List. In determining whether data and information are existing and readily available, it has taken into account such data and information as the Division has utilized in the preparation of those identification processes, calculations and models referenced in 40 CFR §130.7(a)(5)(i), (ii) and (iv) and that credible data and information presented in a readily usable format and submitted in reports provided to the Division as referenced in 40 CFR §130.7(a)(5)(ii). In addition, the Commission accepted credible data and information that was submitted in accordance with the listing process schedule, whether submitted by EPA or any other interested party. The Division also continues to independently collect and analyze new data on a rotating basin basis as part of its triennial review efforts and will utilize such data and information in making future listing determinations. Existing data which was not brought forward through one of the above mechanisms or otherwise presented to the Commission in accordance with the schedule was not treated as "readily available" for purposes of making the 2010 listing decisions. Such information will be considered in the next listing cycle.

c. Data Quality

In the Division's Quality Management Plan 2007 for the Collection and Utilization of Environmental Data, the WQCD states that "It is the expressed goal of the Division to use only those analytical data that are both reliable and have a defined level of quality." In order to meet this goal, the WQCD required that all information submitted in response to its August 2009 call for data have a certification of quality included with the data. All of the information received for this data call that was utilized to develop assessments for this rulemaking hearing had a quality certification submitted or has been identified as not having this certification. Only a small fraction of the data is not certified.

3. <u>Prioritization</u>

The objective of prioritization is to identify those waterbody segments where the Division and the public should concentrate their resources. Priorities of High, Medium and Low were established according to section IV. of the 2010 Section 303(d) Listing Methodology.

4. Fish Consumption Advisory Listings

The 2010 Section 303(d) Listing Methodology, states:

Fish Consumption Advisories are issued by the Colorado Department of Public Health and Environment ("CDPHE") in instances where analysis of fish tissue samples provides documentation of a public health risk. Issuance of a FCA by CDPHE indicates impairment of an Aquatic Life Use classification for any waters so classified.

The Commission has included 17 segments on the 2010 303(d) List for non-attainment of the aquatic life use due to mercury fish consumption advisories for 22 lakes or reservoirs. The Commission also included one listing based on non-attainment of the aquatic life use due to a PCE fish consumption advisory in Willow Springs Ponds, Fountain Creek, Segment 7a.

The following segments have been added to the 2010 303(d) List due to new Fish Consumption Advisories:

- Lower Gunnison Segment 4b, Juniata Reservoir
- Lower Colorado Segment 20, Rifle Gap Reservoir
- San Juan Segment 6a, Echo Canyon Reservoir
- Upper Colorado Segment 12, Lake Granby
- Yampa River Segment 2b, Elkhead Reservoir, Catamount Lake

5. <u>New Table Value Standards</u>

<u>Cadmium and Zinc:</u> As part of the Basic Standards hearing of 2005, new zinc and cadmium table values were adopted. The acute and chronic zinc and cadmium equations in each basin were modified to conform to Regulation No. 31 over the last four years. An increase in cadmium listings were the result of a more stringent cadmium standard.

The following segments were added to the 303(d) List for cadmium:

- Big Thompson Segment 2
- Clear Creek Segments 2a, 2b, 2c, 9b, 11, 13b
- Cache la Poudre Segment 7
- Upper South Platte Segments 2b, 2c, 5a, 5b, 15
- Blue River Segment 12
- Eagle River Segment 5c
- Upper South Platte Segments 3 (Hawkins Gulch), 5a

<u>Temperature:</u> As part of the Temperature Standards hearing of 2007, new temperature table values were adopted. The acute and chronic temperature standards in the Upper and Lower Colorado and the South Platte River Basins were modified to conform to Regulation No. 31 over the last two years.

The following segments were added to the 303(d) List for temperature:

- Upper Colorado Segments 3, 4, 7b and 10c

6. Listings Due to Exceedances of the Secondary Water Supply Standards

For the secondary water supply standards of dissolved iron, manganese and sulfate, the less restrictive of the following two options will apply as the numeric standard: existing quality as of January 1, 2000 or the table value criteria in Regulation No. 31, Tables II and III. For dissolved iron this value is 300 ug/l. For manganese this value is 50 ug/l. For sulfate this value is 250 ug/l.

The Division evaluated the water quality as of January 1, 2000 to determine in some cases where standards exceeded the water supply criteria in Tables II and III. The following segments were proposed for listing based on exceedances of the standards:

- Lower South Platte Segment 1: Manganese

7. Relisting Segments with Approved TMDLs Due to Standards Changes

Once a TMDL has been completed, impaired waters are removed from the 303(d) List and placed into Integrated Reporting Category 4a. TMDLs are written to the adopted standards at the time they are submitted to EPA. As standards are periodically reviewed they may become more stringent. In these cases the TMDL may no longer be protective of the current standards. The Division reviewed segments where both TMDLs have been written and new, more restrictive standards have been adopted by the Commission. The Commission has relisted the following segments:

South Platte Basin:

- Clear Creek Segments 09b, 11, and 13b: Cadmium
- Clear Creek Segment 02b: Zinc
- Upper South Platte Segments 2b, 2c and 15: Cadmium
- 8. Delisting of Segments with Recently Approved TMDLs

The Division submitted 64 TMDLs to EPA in the last biennium that have been approved. The following segments and parameters have been removed from the 303(d) List:

- Upper Arkansas Segment 2a: Zinc
- Upper Arkansas Segments 2b, 2c and 3: Cadmium and Zinc
- Upper Arkansas Segment 5: Lead and Cadmium
- Upper Arkansas Segment 7: Zinc
- Upper Arkansas Segment 11: pH, Aluminum, Cadmium, Copper and Zinc
- Upper Arkansas Segment 12a: Lead and Zinc
- San Miguel Segment 3a: Zinc
- San Miguel Segment 3b: Cadmium and Zinc
- San Miguel Segments 6a and 6b: Zinc
- Uncompany Segments 2, 3a, 6a: Cadmium, Copper, Iron, and Zinc
- Rio Grande Segment 4: Cadmium and Zinc
- Rio Grande Segment 30, Sanchez Reservoir: Aquatic Life Use (Hg FCA)
- Closed Basin Segment 9a: Cadmium
- Closed Basin Segment 9b: Copper
- Dolores River Segment 9: Cadmium and Zinc

- Boulder Creek Segment 4a: pH, Cadmium, Copper and Zinc
- Clear Creek Segment 2: Copper and Zinc
- Clear Creek Segment 3a: Zinc
- Clear Creek Segment 3b: Lead and Zinc
- Clear Creek Segment 9a: Copper
- Clear Creek Segment 9b: Copper, Lead and Zinc
- Clear Creek Segment 11: Lead and Zinc
- Clear Creek Segment 13b: Total Recoverable Iron, Manganese, Zinc, and Aquatic Life Use
- Upper South Platte Segment 4: Copper
- Upper South Platte Segment 5b: Zinc
- Blue River Segment 6: pH, Cadmium, Copper, Lead and Zinc
- Blue River Segment 7: pH, Cadmium, Copper, Lead, Manganese and Zinc
- Blue River Segment 12: Zinc
- Eagle River Segment 5a: Copper and Zinc
- Eagle River Segment 5b: Zinc
- Eagle River Segment 5c: Zinc
- Eagle River Segment 7b: Copper and Zinc

9. Delisting of Segments where Water Quality is Currently Meeting Standards

As additional water quality data is collected and assessed, new data may show attainment of the standards. The following segments and parameters have been removed from the 303(d) List due to attainment of current water quality standards:

- Upper Arkansas Segment 2a: NO₃
- Uncompany River Segment 14, Sweitzer Lake: D.O.
- Lower Colorado Segment 3: Total Recoverable Iron
- White River Segment 13b, Corral Creek: Selenium
- La Plata Segment 4a: Zinc
- Rio Grande Grande Segment 9 (Beaver Creek Reservoir): D.O.
- Closed Basin Segment 6, San Luis Lake: D.O.

- Cherry Creek Segment 2, Cherry Creek Reservoir: chlorophyll a
- Upper Colorado Segment 7a: Total Recoverable Iron
- Yampa River Segment 16: Total Recoverable Iron
- Lower Yampa Segment 20: E. coli
- Cache La Poudre Segment 14 (Horsetooth Reservoir): D.O.
- Upper Colorado Segment 5 (Wolford Reservoir): D.O.

10. Dissolved Oxygen Standard in Lakes and Reservoirs

In 2008, the Commission directed the Division to work with outside parties and stakeholders on changes to the Listing Methodology with regards to the assessment of dissolved oxygen in lakes and reservoirs. Refinement of assessment methods were discussed in workgroup meetings and updates to the dissolved oxygen methods were included in the 2010 Listing Methodology.

The revised 2010 Listing Methodology states that if the average temperature in the epilimnion of lakes and reservoirs exceeds the temperature standard, temperature and dissolved oxygen below the epilimnion will be evaluated for adequate refuge. Refuge is defined as the concurrent attainment of the temperature and dissolved oxygen standard at lower depths. If adequate refuge is not present in a single profile, the segment is listed as impaired for dissolved oxygen rather than for temperature. The Commission added the following segments to the 303(d) List due to exceedances of the temperature standard where adequate refuge was not found:

- Lower Arkansas Segment 5b, Trinidad Lake
- Clear Creek Segment 17a, Arvada Reservoir

The Listing Methodology also states that if the average dissolved oxygen concentration in the epilimnion falls below the standard in any profile, the lake will be placed on the 303(d) list. Where the dissolved oxygen standard is not attained in the metalimnion, but it is attained in the epilimnion, the lake may be placed on the M&E list, according to the Listing Methodology. The Commission added 25 new lakes to the M&E list due to exceedances in the dissolved oxygen standard in the metalimnion. The following twelve lakes and reservoirs were added to the 303(d) List due to exceedances in the dissolved oxygen standard in the metalimnion.

- Cache la Poudre Segment 20, Seaman Reservoir
- Middle South Platte Segment 4, Milton Reservoir
- Middle South Platte Segment 7, Prospect Lake
- Upper South Platte Segment 17a, Berkeley Lake, Duck Lake
- Upper South Platte Segment 17b, Sloan's Lake
- Upper South Platte Segment 23, Barnum Lake, Garfield Lake, Harvey Lake, Parkfield Lake and Houston Lake
- Upper Colorado Segment 2, Shadow Mountain Lake

The dissolved oxygen standard is slated for revisions in the 2010 Basic Standards and Methodology, Regulation No. 31, rule-making hearing in June 2010. The attainment decision for these lakes and reservoirs may be different when they are reassessed with the revised standard.

11. <u>Seasonal Listings of E. Coli</u>

The 2010 Listing Methodology included a provision to allow assessment of the *E. coli* standard on a seasonal basis. The Division proposed the following segments be placed on the 303(d) List based on seasonal impairments of the *E. coli* standard:

- Arkansas River Basin, Fountain Creek Segments 2b and 6
- South Platte Basin, Big Thompson Segment 9
- South Platte Basin, Cache la Poudre Segments 12 and 13a
- South Platte Basin, Bear Creek Segment 2
- South Platte, Clear Creek Segment 15
- South Platte, Upper South Platte Segment 16c: Harvard, West Harvard and Lakewood Gulches

The Commission adopted all proposed seasonal listings onto the 303(d) List as proposed by the Division.

12. Listing of Segments where Water Quality is not Meeting Standards not Identified Above

The following segments were added to the 303(d) List due to exceedances of water quality standards not identified above:

- South Platte, Bear Creek Segment 5: Swede Gulch/Kerr Gulch, E. coli
- South Platte, Cherry Creek Segment 3: *E. coli* and Se
- South Platte, Clear Creek Segment 2b: Zn
- South Platte, Clear Creek Segment 3a: Cu
- South Platte, Clear Creek Segment 9a: Silver Creek, Cu and Pb
- South Platte, Clear Creek Segment 9b: pH
- Upper Gunnison Segment 29a, Deadman Gulch: pH, Cd, Cu, Mn, Zn, Fe(Trec)
- Lower Colorado Segment 10: Se
- Lower Colorado, White River Segment 9d: Se
- South Platte, Bear Creek Segment 1c (Bear Creek Reservoir): Chl a, Phosphorus
- South Platte, Bear Creek Segment 5: E. coli
- South Platte, Boulder Creek Segment 2a, 2b and 3: Cu

- South Platte, Boulder Creek Segment 8: Se
- South Platte, Boulder Creek Segment 9: As
- South Platte, Big Thompson Segment 2: Cu, Zn
- South Platte, Big Thompson Segment 3, 6, 7: Cu
- South Platte, Big Thompson Segment 4a, 4b: Se
- South Platte, Big Thompson Segment 8: D.O
- South Platte, Big Thompson Segment 16 (Lake Estes): Cu
- South Platte, Cache La Poudre Segment 7: Pb
- South Platte, Cache La Poudre Segment 11: Se

- Upper Colorado, Yampa River Segment 13b: Total Recoverable Iron

13. <u>Segment- Specific Issues</u>

a. Upper South Platte Segment 15 and Middle South Platte Segment 1a – Category 4b Demonstration Plan

Metro Wastewater Reclamation submitted a Category 4b Demonstration Plan to the Division for two segments on the mainstem of the South Platte: Upper South Platte Segment 15 and Middle South Platte Segment 1a. Category 4b is an alternative to listing an impaired segment on the 303(d) List. A Category 4b Demonstration Plan, when implemented, must ensure attainment with all applicable water quality standards through pollution control mechanisms within a reasonable time period. This plan was accepted by the U.S. Environmental Protection Agency prior to the development of the Division's proposed 303(d) List. As a result, the Division did not include these segments in their proposal. No further discussion or comments were received by other parties. The Commission did not include Upper South Platte Segment 15 and Middle South Platte Segment 1a on the 303(d) List for ammonia and nitrate, for which the Category 4b Demonstration Plan was written. The Commission expects that after a reasonable period of time as defined in the Category 4b Demonstration Plan, water quality will be reexamined on these segments. If water quality standards are not achieved at this time the segment will be considered impaired and placed on the 303(d) List.

b. South Platte River (COSPUS14 and COSPUS15) - Trash

Two proposals were originally submitted in prehearing statements by P.U.R.E. and Wild Earth Guardians to list the South Platte River from Bowles Avenue to the confluence of Sand Creek as impaired for trash. Wild Earth Guardians withdrew their proposal but P.U.R.E maintained their proposal. The Division met prior to the Rulemaking hearing with representatives of P.U.R.E and discussed the issue. The Division maintained that a method to determine impairment for trash did not exist and that this must be determined before a decision of impairment can be made. The Division and P.U.R.E agreed to begin to address this issue in the 2012 303d Listing Methodology development stakeholder process that is to begin in the summer of 2010.

After listening to all of the testimony on this topic, the Commission took no action on listing these segments for trash at this time. It is expected that P.U.R.E, the Division and other stakeholders will work collaboratively to develop an appropriate methodology for determining impairment for trash through the 2012 303d Listing Methodology development process and other appropriate collaborative processes.

c. Muddy Creek (COUCUC07b) – Temperature

The Division proposed to list Muddy Creek (COUCUC07b) on the 303(d) List for temperature. The River Water Conservation District (River District) opposed this listing stating that exceedances at an upper station were due to a temporary construction at the outlet of Wolford Reservoir. Exceedances were still found at the lower station. The Commission adopted the Division's alternate proposal to include the upper portion from Wolford Reservoir to Cow Gulch on the M&E List the and lower portion from Cow Gulch to the Colorado River on the 303(d) List.

d. Colorado River (COUCUC03) – Temperature

The Division proposed to place all of the Colorado River mainstem from Lake Granby to the Roaring Fork River (COUCUC03) on the 303(d) List for temperature exceedances. Northern Colorado River Conservancy District (Northern) proposed an alternative portion of 578 Road bridge to the William Fork confluence. The Commission found that the portion that Northern recommended, omitted sites with exceedances both above and below their recommended portion. To encompass the entire scope of temperature exceedances, the Commission adopted the portion from 578 Road to immediately above the confluence with the Blue River.

e. Lower Colorado Segment 2b – Selenium

In 2008, the Commission adopted only the portion at Humphrey Backwaters Area onto the 303(d) List for selenium. For this cycle, the Division proposed to list the entire segment for selenium. The City of Grand Junction and the River District opposed this listing claiming that the Riverwatch data used in the assessment was not representative or of good quality. The Division supported the quality of this data but since the data was older than five years, the Division agreed that additional data collection was needed before a decision to list the entire segment could be made. The Commission placed the remainder of this segment on the M&E List while leaving the Humphrey Backwaters Area on the 303(d) List. Grand Junction and the River District have offered to collect data throughout the segment before the next 303(d) rulemaking hearing in 2012.

f. Upper South Platte Segment 16c

Upper South Platte Segment 16c is an all tributary segment and the Division proposed to place the entire segment on the 303(d) List for exceedances of *E. coli* and selenium.

E. coli: Denver Environmental Health (DEH) opposed listing all tributaries for both parameters. DEH put forward an alternative proposal for *E. coli* on this segment with some tributaries to be included on the 303(d) annually, some listed seasonally and one for the M&E List based on the attainment conclusions for each tributary individually. Those tributaries attaining the standard were not proposed for either list. The Division reviewed their proposal and agreed that it is a reasonable approach for *E. coli*. The Commission adopted the alternative proposal as presented by DEH.

Selenium: DEH also asked that the Commission to only list those tributaries that have selenium data on the 303(d) List. The Division opposed this alternative proposal. The Division pointed out that unlike the data found on *E. coli* for these tributaries, everywhere that selenium data was collected, exceedances were found. The Commission chose to place the entire segment on the 303(d) List for selenium.

g. Fountain Creek Segments 2a and 2b

The Division originally proposed to change the *E. coli* listing on Segment 2a from annual to seasonal (May through October) and to add Segment 2b to the 303(d) List seasonally. Rocky Mountain Environmental Labor Coalition/Sierra Club and Bill Thiebaut, District Attorney for the 10th Judicial District, asked that the listing be considered for the entire year for both segments as there are recreation uses in Fountain Creek year round. Through further investigation and reassessment of the data by the Division and the parties, data indicates that in Segment 2a, the *E. coli* standards are exceeded annually as opposed to seasonally as originally thought. In Segment 2b the exceedances were only found from May – October. The Commission chose to retain the listing on Segment 2a for *E. coli* annually and to add Segment 2b to the 303(d) List from May-October.

The Division also originally proposed to remove the selenium listings on Segment 2a and 2b. This proposal also received opposition from RMELC/Sierra Club and Bill Thiebaut as there are ongoing studies regarding selenium in Fountain Creek. Colorado Springs supported the Division's original proposal. Further investigation of acute selenium exceedances in Segment 2b in July 2005 prompted the Division and EPA to change their position prior to the hearing to retain this segment on the 303(d) List. The Commission agreed that this listing should remain on the 303(d) List until further evidence exist to support delisting. The Commission agreed with the Division that the data is meeting the ambient based standards in Segment 2a and removed the M&E listing for that segment.

h. Bear Creek (COSPBE05) – Swede Gulch and Kerr Gulch - E. coli

The Division originally proposed to list only Swede Gulch based on the Division's sampling at the mouth of the gulch. The Bear Creek Watershed Association (BCWA) identified this sampling location as Kerr Gulch. The Division used USGS and other maps indicating this as Swede Gulch. The Colorado Department of Transportation (CDOT) and residents identify this as Kerr Gulch. The Division met with the BCWA and agreed that the watershed, whatever the name of the stream, may be impacted by septic systems and livestock. The BCWA agreed to the development and implementation of a monitoring plan in the watershed to identify E. coli sources. The Division agreed that if the plan were implemented the priority of the listing should be changed from high to low to allow time for sampling and development of stakeholder involvement. The Commission agreed with the Division and the BCWA's plan for Swede Gulch and Kerr Gulch.

i. Clear Creek (COSPCL14b) – Manganese

The Division proposed to add manganese to the list of impairment parameters of Clear Creek segment 14b. During the 2009 South Platte River Basin RMH a new site-specific manganese standard was established for the segment. In the development of the new site-specific standard for segment 14b, data from both Clear Creek segments 14a and 14b were combined to determine a single standard for both segments. This procedure was used since segment 14a has very limited data and it was felt averaging would establish a more realistic standard. As it turns out when segment 14b only data is assessed against the new standard developed using data from both segments, the few samples from segment 14a with a lower ambient manganese concentration skewed the development of the site-specific standard enough that segment 14b data exceeds the new standard.

Based on the fact that the segment 14b site-specific standard was developed using data from the upstream segment it is not possible to evaluate if the segment is in attainment of the manganese standard. The proper site-specific standard indicating ambient conditions should be equivalent to the current assessment value and would not indicate impairment since they are the same dataset.

After reviewing the development of the segment 14b site-specific manganese standard, the Division agreed with MillerCoors that the Clear Creek segment should not be listed for exceeding the manganese standard. The Commission agreed with the Division and MillerCoors that Clear Creek segment 14b should not be listed for manganese.

j. Juniata Reservoir (COGULG04a)

The Division originally proposed to list Juniata Reservoir on the 303(d) List for impairment of the Aquatic Life Use due to a Fish Consumption Advisory (FCA). A mercury FCA was issued for Juniata Reservoir in 2009. The Section 303(d) Listing Methodology 2010 Listing Cycle states at III.D.6 "Issuance of a FCA by CDPHE indicates impairment of an Aquatic Life Use classification for any waters so classified." The City of Grand Junction and Colorado Division of Wildlife proposed to either close the reservoir or change the reservoir to "catch and release" in order for the Division to remove the FCA and therefore remove the basis for inclusion on the 303(d) List. The Division stated that the FCA would not be lifted if the reservoir changed to catch and release and the only way that the FCA could be lifted at Juniata is if the reservoir was completely fenced and fishing access was prohibited. At the time of the hearing, no action had been taken and the FCA was still in effect. Therefore the Commission chose to add this segment to the 303(d) List.

k. Marston Reservoir (COSPUS22)

The Division proposed that Marston Reservoir as part of COSPUS22 be placed on the M & E List for non-attainment of the DO standard in the metalimnion. The Denver Water Board argued that Marston was not waters of the state and was not used for aquatic life uses. There was discussion about what constitutes waters of the state and it was decided that that decision was not appropriate for this hearing, since this hearing addresses all waters for which classifications and standards have been adopted. The Commission decided to include Marston Reservoir on the 2010 M & E List because it fits within the description of waters in Upper South Platte segment 22.

C. Revisions to Monitoring and Evaluation List

1. Introduction

This regulation updates Colorado's Monitoring and Evaluation List (M&E List) to reflect additional water quality information available since the Regulation was promulgated in 2008.

2. <u>List Development</u>

See the discussion of list development under subsection B.2 above.

3. <u>Prioritization and Scheduling</u>

The Division remains committed to establishing a plan for monitoring and evaluating these water bodies prior to the list submission date for the subsequent listing cycle. Further, the Commission has committed to determining their appropriate status (as either impaired or fully supporting) within ten years of their placement on the M&E List.

4. Data Quality

See the discussion of data quality under subsection B.2.c above.

5. New Table Value Standards

<u>Cadmium and Zinc:</u> As part of the Basic Standards hearing of 2005, new zinc and cadmium table values were adopted. The acute and chronic zinc and cadmium equations in each basin were modified to conform to Regulation No. 31 over the last four years. An increase in cadmium listings were the result of a more stringent cadmium standard.

The following segments were added to the M&E List for cadmium:

- Gunnison River, San Miguel Segment 3a
- South Platte, Boulder Creek Segment 14, Barker Reservoir
- Boulder Creek Segments 2a, 2b, 3, 9 10 and 14
- Clear Creek Segment 6, Hoop Creek
- Cache la Poudre Segment 13a
- Upper South Platte Segment 3, Hawkins Gulch
- Cache La Poudre Segment 9

6. <u>Listings Due to Exceedances of the Secondary Water Supply Standards</u>

For the secondary water supply standards of dissolved iron, manganese and sulfate, the less restrictive of the following two options will apply as the numeric standard: existing quality as of January 1, 2000 or the table value criteria in Regulation No. 31, Tables II and III. For dissolved iron this value is 300 ug/l. For manganese this value is 50 ug/l. For sulfate this value is 250 ug/l.

The Division evaluated the water quality as of January 1, 2000 to determine in some cases where standards exceeded the water supply criteria in Tables II and III. The following segments were proposed for listing based on exceedances of the standards:

- Upper Colorado, Yampa River Segments 2a: Manganese
- Upper Colorado, Yampa River Segments 3: Manganese and Dissolved Iron

7. Delisting of Segments where Water Quality is Currently Meeting Standards

As additional water quality data is collected and assessed, new data may show attainment of the standards. The following segments and parameters have been removed from the M&E List due to attainment of current water quality standards:

- Fountain Creek Segment 2a: Selenium
- Fountain Creek Segment 3, Bear Creek and Cheyenne Creek: Sediment
- Middle Arkansas Segment 14: *E. coli*
- Upper Arkansas Segment 5, Turquiose Lake: D.O.
- Upper Arkansas Segment 13: Sediment
- Lower Colorado Segment 4a: Selenium

- Lower Colorado Segment 11h: Total Recoverable Iron
- Lower Colorado Segment 13b: D.O. and *E. coli*
- St. Vrain Segment 2: Sediment
- St. Vrain Segment 3: E. coli
- Upper South Platte Segment 2a: Sediment
- Upper South Platte Segment 3: Sediment and Temperature
- Upper South Platte Segment 4 (North Fork South Platte and Buffalo Creek): Sediment
- Upper South Platte Segment 6a: Sediment
- Upper Colorado, Yampa River Segment 3 (First Creek): Sediment
- Upper Colorado, Yampa River Segment 19 (Oliver Creek): Sediment
- Upper Colorado, North Platte River Segment 4a: Sediment
- Gunnison River, Uncompany Segment 3b, Ridgway Reservoir: D.O.
- Gunnison River, San Miguel Segment 7a: Total Recoverable Iron
- Lower Colorado, White River Segment 22: Sediment
- Upper Colorado, Blue River Segment 18: E. coli

8. Segments Moved to the 303(d) List

As additional water quality data is collected and assessed, a segment may be moved from the M&E List to the 303(d) List once the non-attainment is confirmed. In general, segments with less than 10 data points will be placed on the M&E List until more data is collected. The following segments and parameters have been moved from the M&E List to the 303(d) List due to additional data collection:

- Lower Arkansas Segment 5b: D.O.
- San Miguel Segment 3a: Cadmium
- Upper Gunnison Segment 29a, Deadman Gulch: Cd, Cu, Mn, Zn, Fe(Trec)
- Big Thompson Segment 4b: Selenium
- Boulder Creek Segment 8: Selenium
- Upper Colorado Segment 12, Shadow Mountain Lake: D.O.
- Upper Colorado, Yampa River Segment 3 (Bushy Creek): Sediment
- Upper South Platte 5a: Cadmium, copper and zinc

9. Dissolved Oxygen Standard in Lakes and Reservoirs

In 2008 the Commission directed the Division to work with parties in 2008 and 2009 on changes to the Listing Methodology in regards to dissolved oxygen. Refinement of assessment methods were discussed in workgroup meetings and included in the 2010 Listing Methodology. The dissolved oxygen standard is slated for revisions in the 2010 Basic Standards and Methodology, Regulation No. 31, RMH in June 2010.

The following segments were added to the M&E List due to exceedances of the dissolved oxygen standard in the metalimnion in at least one profile:

- Gunnison River, Uncompanyre Segment 14, Sweitzer Lake
- Rio Grande Segment 9, Beaver Creek Reservoir
- Big Dry Creek Segment 2, Standley Lake
- Boulder Creek Segment 14, Barker Reservoir
- Big Thompson Segment 12, Lake Loveland, Horseshoe Lake and Boyd Lake
- Big Thompson Segment 14, Lon Hagler Reservoir and Lonetree Reservoir
- Cache la Poudre Segment 14, Horsetooth Reservoir
- Lower South Platte Segment 3, North Sterling Reservoir
- Middle South Platte Segment 4, Barr Lake
- Middle South Platte Segment 7, Horse Creek Reservoir
- St. Vrain Creek Segment 7, Boulder Reservoir
- St. Vrain Segment 9, Union Reservoir
- St. Vrain Segment 13, Lake Thomas
- Upper South Platte Segment 16b, Aurora Reservoir
- Upper South Platte Segment 19, Tarryall Reservoir, Cheesman Reservoir, Elevenmile Reservoir, Spinney Mountain Reservoir
- Upper South Platte Segment 22, Marston Reservoir, Quincy Reservoir,
- Upper South Platte Segment 23, Vanderbilt Reservoir
- Upper Colorado Segment 5, Wolford Mountain Reservoir
- Upper Colorado, Yampa River Segment 2b, Stagecoach Reservoir

PARTIES TO THE RULEMAKING HEARING

- 1. Protect Urban River Environments (Confluence Kayaks and Telemark, Colorado Whitewater Association, Denver Trout Unlimited, The Shimoda Group, The Greenway Foundation)
- 2. Summit Water Quality Committee

- 3. Northwest Colorado Council of Governments
- 4. City of Boulder
- 5. City of Colorado Springs and Colorado Springs Utilities
- 6. City of Aurora
- 7. Denver Water
- 8. City and County of Denver
- 9. Bear Creek Watershed Association
- 10. City of Grand Junction
- 11. Northern Colorado Water Conservancy District
- 12. Metro Wastewater Reclamation District
- 13. Alamosa Riverkeeper
- 14. Bill Thiebaut, District Attorney for 10th Judicial District, Colorado
- 15. Farmers Reservoir and Irrigation Company
- 16. Barr Lake and Milton Reservoir Watershed Association
- 17. Colorado Division of Wildlife

- 30. Ute Water Conservancy District, acting by and through the Ute Water Activity Enterprise
- 31. US Environmental Protection Agency

93.14 STATEMENT OF BASIS, SPECIFIC STATUTORY AUTHORITY AND PURPOSE; DECEMBER 2011 RULEMAKING, EFFECTIVE DATE OF MARCH 30, 2012

The provisions of C.R.S. 25-8-202(1)(a), (b) and (i), (2) and (6); 25-8-203; 25-8-204; and 25-8-401; provide the specific statutory authority for adoption of these regulatory amendments. The Commission also adopted in compliance with 24-4-103(4) C.R.S. the following statement of basis and purpose.

BASIS AND PURPOSE

A. Revisions to 303(d) List

1. Introduction

This regulation updates Colorado's List of Water-Quality-Limited Segments Requiring Total Maximum Daily Loads (TMDLs) to reflect additional water quality information available since the Regulation was revised in 2010. This list was prepared to fulfill section 303(d) of the federal Clean Water Act (Act) which requires that states submit to the U.S. Environmental Protection Agency (EPA) a list of those waters for which technology-based effluent limitations and other required controls are not stringent enough to implement water quality standards.

This regulation also updates Colorado's Monitoring and Evaluation List (M&E List) to reflect additional water quality information available since the Regulation was revised in 2010.

2. List Development

a. Listing Methodology

The "Section 303(d) Listing Methodology - 2012 Listing Cycle" contains a description of the listing process, the criteria for listing, and the criteria for determination of TMDL priority. The Listing Methodology was developed through a public process and finalized as a policy at a Water Quality Control Commission administrative action hearing in March 2011.

This Listing Methodology sets forth the criteria that generally were used to make decisions regarding which waters to include on the 2012 Section 303(d) List and the 2012 M&E List. However, this methodology was not adopted by the Commission as a rule. The Commission therefore has the flexibility to take into account other appropriate factors in making site-specific listing decisions.

b. Information Considered

The Commission has considered all existing and readily available information in developing the 2012 Section 303(d) List. In determining whether data and information are existing and readily available, it has taken into account such data and information as the Division has utilized in the preparation of those identification processes, calculations and models referenced in 40 CFR §130.7(a)(5)(i), (ii) and (iv) and that credible data and information presented in a readily usable format and submitted in reports provided to the Division as referenced in 40 CFR §130.7(a)(5)(ii). In addition, the Commission accepted credible data and information that was submitted in accordance with the listing process schedule, whether submitted by EPA or any other interested party. The Division also continues to independently collect and analyze new data on a rotating basin basis as part of its triennial review efforts and will utilize such data and information in making future listing determinations. Existing data which was not brought forward through one of the above mechanisms or otherwise presented to the Commission in accordance with the schedule was not treated as "readily available" for purposes of making the 2012 listing decisions. Such information will be considered in the next listing cycle.

c. Data Quality

In the Water Quality Control Division's (WQCD) Quality Management Plan 2011 for the Collection and Utilization of Environmental Data, the WQCD states that "It is the expressed goal of the Division to use only those analytical data that are both reliable and have a defined level of quality."

3. Prioritization

The objective of prioritization is to identify those waterbody segments where the Division and the public should concentrate their resources. Priorities of High, Medium and Low were established according to section IV. of the 2012 Section 303(d) Listing Methodology.

The Division remains committed to establishing a plan for monitoring and evaluating water bodies on the M&E List prior to the list submission date for the subsequent listing cycle. Further, the Commission has committed to determining their appropriate status (as either impaired or fully supporting) within ten years of their placement on the M&E List.

4. Fish Mercury (Hg) Listings

The 303(d) Listing Methodology was revised in 2012 for the assessment of Fish Mercury (Hg). The newly adopted methods compare the median fish Hg for each waterbody and species to a 0.3 ppm threshold. A sample size requirement of 30 fish tissue samples per waterbody/species was also introduced in order to list new waterbodies for Fish Hg. Waterbodies can also be listed if there is overwhelming evidence of impairment (>0.45 ppm Hg) and a sample size of at least 10 fish tissue samples.

The Commission retained the following 6 lakes on the 303(d) List because these lakes have a median Hg above the 0.3 ppm threshold and either meet the sample size requirements or show overwhelming evidence of impairment:

- Upper South Platte Segment 23, Berkeley Lake (COSPUS23)
- Upper Arkansas Segment 27, Brush Hollow Reservoir (COARUA27)
- Cache la Poudre Segment 14, Horsetooth Reservoir (COSPCP14)
- Upper South Platte Segment 17a, Rocky Mountain Lake (COSPUS17a)
- Lower Arkansas Segment 5b, Trinidad Reservoir (COARLA05b)
- Los Pinos Segment 3, Vallecito Reservoir (COSJPN03)

The Commission retained the following 10 lakes on the 303(d) List because they were on the 303(d) List prior and have a median Hg of greater than 0.3 ppm. Although the 2012 Listing Methodology requires a minimum sample size of thirty fish, the Commission chose to retain these segments on the 303(d) List as opposed to the Monitoring and Evaluation List:

- Big Thompson Segment 11, Carter Reservoir (COSPBT11)
- Yampa River Segment 2b, Catamount Reservoir (COUCYA02b)
- San Juan Segment 6a, Echo Canyon Reservoir (COSJSJ06a)
- Yampa River Segment 2b, Elkhead Reservoir (COUCYA02b)
- Middle Arkansas Segment 16, Horseshoe Lake– Lathrop (COARMA16)
- Dolores River Segment 4, McPhee Reservoir (COSJD004)
- Los Pinos, Segment 11, Narraguinnep Reservoir (COSJLP11)
- Lower Colorado Segment 20, Rifle Gap Reservoir (COLCLC20)
- La Plata Segment 11, Totten Reservoir (COSJLP11)
- Upper Arkansas Segment 14b, Teller Reservoir (COARUA14b)

The Commission retained the following 2 lakes on the 303(d) List because they were on the 303(d) List prior to the adoption of the new assessment methods. With median Fish Hg concentrations below 0.3 ppm, they will not be removed from the 303(d) List, however, until a minimum of 30 fish are collected:

- Big Thompson Segment 12, Boyd Lake (COSPBT12)
- Upper Colorado Segment 12, Lake Granby (COUCUC12)

The Commission added the following 3 lakes on the Monitoring and Evaluation List because they have a median Fish Hg of greater than 0.3 ppm but the sample size is insufficient for Listing:

- North Platte Segment 4a, Big Creek Lake (COUCNP04a)
- Boulder Segment 15, Gross Reservoir (COSPBO15)
- Big Thompson Segment 14, Lonetree Reservoir (COSPBT14)

The Commission removed the following lake from the 303(d) List. Additional data was collected meeting the minimum sample size requirement of thirty fish. Median Fish Hg concentrations are below the 0.3 ppm, threshold.

- Lower Gunnison Segment 4, Juniata Reservoir (COGULG04)

The Commission retained one listing based on non-attainment of the aquatic life use due to a PCE fish consumption advisory in Willow Springs Ponds, Fountain Creek, Segment 7a.

5. Aquatic Life Listings

280 Multimetric Index (MMI) scores were calculated for the 2012 listing cycle, utilizing the Water Quality Control Commission's (WQCC) Policy 10-1, Aquatic Life Use Attainment. Of the 280 MMI scores generated, 48 segments were found to be not attaining the Aquatic Life Use standard. From those segments, or portions of segments, determined to be in non-attainment, 31 will be provisionally listed, as there is currently no water quality data available to indicate impairment. This is in accordance with the Section 303(d) Listing Methodology for the 2012 Listing Cycle, approved by the WQCC in March 2011. The Commission anticipates that the Division will collect additional data for these segments in the next two years to continue the investigation into potential sources. Because of the site-specific nature of macroinvertebrate data, waterbodies in all tributary segments that were identified as impaired for their Aquatic Life Use were listed individually.

The following segment was 303(d) listed for non-attainment of the Aquatic Life Use based on Policy 10-1:

- White River, Segment 13c, Yellow Creek (COLCWH13c)

The following segments were provisionally 303(d) listed for non-attainment of their Aquatic Life Use based on Policy 10-1:

- Upper Arkansas Segment 21a, Cripple Creek (COARUA21a)
- San Miguel Segment 12, Maverick Draw (COGUSM12)
- Upper Gunnison Segment 6b, Cement Creek (COGUUG06b)
- Upper Gunnison Segment 15, S. Beaver Creek (COGUUG15)
- Upper Gunnison Segment 24, Cochetopa Creek from Forest Road 3076/Co. Rd 43 to confluence with Tomichi Creek (COGUUG24)

- Upper Gunnison Segment 29a, Lake Fork Gunnison River between Cooper and Silver Creek (COGUUG29a)
- Uncompany Segment 11, Deer Creek (COGUUN11)
- Lower Yampa Segment 22a, Talamantes Creek COLCLY22a)
- White River Segment 15, Piceance Creek (COLCWH15)
- White River Segment 20, Black Sulphur Creek (COLCWH20)
- White River Segment 23, West Douglas Creek (COLCWH23)
- Rio Grande Segment 12, Rio Grande River (CORGRG12)
- Bear Creek Segment 1a, Bear Creek from Witter Gulch to inlet to Evergreen Lake (COSPBE01a)
- Boulder Creek Segment 9, Boulder Creek from 107th Street to confluence with Coal Creek (COSPB009)
- Clear Creek Segment 14a, Clear Creek from Croke Canal diversion to McIntyre Street (COSPCL14a)
- St. Vrain Segment 3, St. Vrain Creek (COSPSV03), from Left Hand Creek confluence to confluence with Boulder Creek
- Upper South Platte Segment 3, Horse Creek (COSPUS03)
- Upper South Platte Segment 10a, West Plum Creek (COSPUS10a)
- Upper South Platte Segment 11a, Cook Creek (COSPUS11a)
- Eagle River Segment 6, Lake Creek (from below the confluence with East and West Lake Creek to the mouth), and Red Sandstone Creek (from north side I-70 Frontage Road to the confluence with Gore Creek) (COUCEA06)
- Eagle River Segment 8, Gore Creek (COUCEA08)
- Roaring Fork Segment 3a, Roaring Fork from Hunter Creek to Brush Creek confluence, Cattle Creek from Bowers Gulch to Mouth, W. Sopris Creek (COUCRF03a)
- Roaring Fork Segment 4, Brush Creek (COUCRF04)
- Roaring Fork Segment 7, South Fork Frying Pan River from transbasin diversion to confluence with unnamed tributary (COUCRF07)
- Upper Colorado Segment 10a, Fraser River, Vasquez Creek (COUCUC10a)
- Yampa River Segment 15, Elkhead Creek (COUCYA15)

The following segments were included on the M&E List for possible non-attainment of their Aquatic Life Use based on Policy 10-1:

- Bear Creek Segment 1e, Bear Creek (COSPBE01e)

- White River Segment 13b, Duck Creek (COLCWH13b)
- Eagle River Segment 6, Black Gore Creek Beaver Creek (from Wayne Creek to Mouth), Red Sandstone Creek (from USFS boundary to north side I-70 Frontage Road) (COUCEA06)
- Eagle River Segment 9a, Eagle River (from confluence with Berry Creek to confluence with Squaw Creek) (COUCEA09a)

Several segments were found to have data outside of the standard index period for data collection. The Commission included these segments on the Monitoring and Evaluation (M&E) List in order to gather more information within the standard index period. The following segments were listed on the M&E List for possible non-attainment of their Aquatic Life Use based on Policy 10-1:

- Fountain Creek Segment 4, Sand Creek (COARFO04)
- Upper Arkansas Segment 5, Lake Fork Creek (COARUA05)
- Upper Gunnison Segment 8, Slate River (COGUUG08)
- Saint Vrain Segment 3, Saint Vrain Creek from Hover Road to the confluence with Left Hand Creek (COSPSV03)
- Boulder Creek Segment 7b, Coal Creek (COSPBO07b)
- Bear Creek Segment 2, Bear Creek (COSPBE02)
- Clear Creek Segment 1, Kearney Gulch, Grizzly Gulch (COSPCL01)

Various parties questioned whether or not the data collected below reservoirs should be evaluated as being representative of an entire stream segment. They recommend that listings below reservoirs be placed on the M&E List while the applicability of the current thresholds below reservoirs is investigated. The Division agreed that a study was warranted and changed its proposal to the M&E List. The Commission placed the following segments on the M&E List for possible non-attainment of their Aquatic Life Use:

- COUCBL17, Blue River from outlet of Dillon Reservoir to N. Rock Creek confluence
- COARUA05, Lake Fork below Sugarloaf Dam
- COSPUS02a, South Fork South Platte River below Antero
- COSPUS06a, South Platte River below Cheesman at Cheesman Canyon
- COSPUS03, Trout Creek below Manitou Reservoir Dam
- COUCUC03, Colorado River from below Windy Gap Reservoir to FR 538

Several segments were found to have data outside of the assessed period of record. Therefore, the Division proposed to remove them from both the 303(d) and M&E Lists. The Commission did not include these segments on either list:

- Upper Arkansas Segment 5, S. Cottonwood Creek (COARUA05)

- Upper Arkansas Segment 18, Currant Creek (COARUA18)
- San Miguel Segment 2, Howard Fork (COGUSM02)
- Rio Grande Segment 2, South Clear Creek (CORGRG02)
- Animas and Florida Segment 13c, Salt Creek (COSJAF13c)
- Big Thompson Segment 2, Big Thompson River (COSPBT02)
- Blue River Segment 17, Blue River from N. Rock Creek confluence to Colorado River (COUCBL17)
- North Platte Segment 4a, Snyder Creek (COUCNP04a)
- Upper Colorado Segment 7a, Big Alkali Creek (COUCUC07a)

Other issues were raised in this rulemaking hearing in regards to listing decisions based on the assessment of macroinvertebrate data. In October 2010, the Commission adopted the Aquatic Life Use Attainment WQCC Policy 2010-1 which determined that the Colorado MMI is an appropriate tool for the quantitative bioassessment of the health of aquatic communities. The Commission adopted the 2012 Listing Methodology in March 2011. This Regulation No. 93 rulemaking hearing is the first occasion where the policies adopted by the Commission in Policy 2010-1 are being implemented into regulation. The Division followed the policies as defined in the methodologies to the intent for which they were adopted. The Commission recognizes that some of the policy decisions that were questioned by various parties may need additional review. The Commission directs the Division and interested parties to review WQCC Policy 2010-1 and the 2012 Listing Methodology and make appropriate changes in regards to the use of data for the MMI tool.

6. Listings Due to Exceedances of the Secondary Water Supply Standards

For the secondary water supply standards of dissolved iron, manganese and sulfate, the less restrictive of the following two options will apply as the numeric standard: existing quality as of January 1, 2000 or the table value criteria in Regulation No. 31, Tables II and III. For dissolved iron this value is 300 ug/l. For manganese this value is 50 ug/l. For sulfate this value is 250 mg/l.

The Division evaluated the water quality as of January 1, 2000 to determine in some cases where standards exceeded the water supply criteria in Tables II and III. The following segments were included on the 303(d) listing based on exceedances of the standards:

- Lower Gunnison Segment 4a, Whitewater Creek from below Brandon Ditch to confluence with Gunnison River: Manganese, Sulfate (COGULG04a)
- North Fork Segment 6b, Alum Gulch: Sulfate (COGUNF06b)
- Upper Gunnison Segment 11, Coal Creek: Manganese (COGUUG11)
- Upper Gunnison Segment 29a, Lake Fork Gunnison River: Manganese (COGUUG29a)
- Upper Gunnison Segment 32, N. Fork Henson Creek: Manganese (COGUUG32)
- Uncompany Segment 2, Uncompany River: Manganese (COGUUN02)
- Animas and Florida Segment 5a, Animas River: Manganese (COSJAF05a)

- La Plata Segment 4a, E. Mancos River, Manganese (COSJLP04a)
- Big Thompson Segment 8, Little Thompson River: Sulfate (COSPBT08)
- Clear Creek Segment 15, Clear Creek: Manganese (COSPCL15)
- Saint Vrain Segment 5, Left Hand Creek: Manganese (COSPSV05)
- Blue River Segment 2a, Blue River: Manganese (COUCBL02a)
- Upper Colorado Segment 3, Colorado River: Manganese (COUCUC03)

The following segments were included on the M&E List:

- Lower Gunnison Segment 4a, Callow Creek, Cummings Gulch, Peach Valley Creek: Sulfate (COGULG04a)
- Lower Gunnison Segment 4b, Kannah Creek: Sulfate (COGULG04b)
- North Fork Segment 6b, Cottonwood Creek: Manganese, Sulfate (COGUNF06b)
- San Miguel Segment 8, S. Fork San Miguel River: Manganese (COGUSM08)
- Upper Gunnison Segment 15, S. Beaver Creek: Manganese, Dissolved Iron (COGUUG15)
- Upper Gunnison Segment 17, Antelope Creek: Manganese (COGUUG17)
- Upper Gunnison Segment 23, Cochetopa Creek: Dissolved Iron (COGUUG23)
- Uncompany Segment 11, Cow Creek: Sulfate (COGUUN11)
- Piedra River Segment 6a, Stollsteimer Creek: Sulfate (COSJPI06a)
- 7. Delisting of Segments with Recently Approved TMDLs

The Division submitted 26 TMDLs to EPA in the last biennium that have been approved. The following segments and parameters have been removed from the 303(d) List:

- Arkansas, Upper Arkansas Segment 10, Lake Creek: Cu (COARUA10)
- Gunnison, Lower Gunnison Segment 2, Gunnison River: Se (COGULG02)
- Gunnison, Lower Gunnison Segment 4a, Tributaries to Gunnison River: Se (COGULG04a)
- Gunnison, Lower Gunnison Segment 4c, Red Rock Creek: Se (COGULG04c)
- Gunnison, North Fork Segment 3, North Fork Gunnison River: Se (COGUNF03)
- Gunnison, North Fork Segment 5, Leroux Creek, Jay Creek: Se (COGUNF05)
- Gunnison, North Fork Segment 6a, Short Draw: Se (COGUNF06a)
- Gunnison, North Fork Segment 6b, Big Gulch, Cottonwood Creek: Se (COGUNF06b)

- Gunnison, San Miguel Segment 3a, San Miguel River: Cd (COGUSM03a)
- Gunnison, San Miguel Segment 6a, Ingram Creek: Cd (COGUSM06a)
- Gunnison, San Miguel Segment 6b, Marshall Creek: Cd (COGUSM06b)
- Gunnison, Upper Gunnison Segment 30, Henson Creek: Cd, Zn(sc) (COGUUG30)
- Gunnison, Upper Gunnison Segment 31, Palmetto Gulch: Cd, Zn (COGUUG31)
- Gunnison, Uncompany Segment 4b, Uncompany River: Se (COGUUN04b)
- Gunnison, Uncompany Segment 4c, Uncompany River: Se (COGUUN04c)
- Gunnison, Uncompany Segment 12, Tributaries to Uncompany River: Se (COGUUN12)
- South Platte, Boulder Segment 2b, Boulder Creek from 13th Street to the confluence with South Boulder Creek: *E. coli* (COSPBO02b)
- South Platte, Boulder Segment 4a, Gamble Gulch: Cd (COSPBO04a)
- South Platte, Upper South Platte Segment 5a, Geneva Creek: Cd, Cu, Zn (COSPUS05a)
- South Platte, Upper South Platte Segment 5b, Geneva Creek: Cd (COSPUS05b)
- South Platte, Upper South Platte Segment 15, South Platte River: Cd (COSPUS15)
- Upper Colorado, Blue River Segment 12, Illinois Gulch: Cd (COUCBL12)
- 8. Delisting of Segments where Water Quality is Currently Meeting Standards

As additional water quality data is collected and assessed, new data may show attainment of the standards. The following segments and parameters have been removed from the 303(d) List due to attainment of current water quality standards:

- Arkansas, Fountain Creek Segment 1a, Fountain Creek: Se (COARFO01a)
- Arkansas, Fountain Creek Segment 2b, Fountain Creek: Se (COARFO02b)
- Arkansas, Fountain Creek Segment 6, Monument Creek below Mesa Road: Se (COARF006)
- Arkansas, Lower Arkansas Segment 4, Lorencito Canyon: Se (COARLA04)
- Arkansas, Lower Arkansas Segment 5a, Purgatoire River: Se (COARLA05a)
- Gunnison, Lower Dolores Segment 1, Dolores River: Fe(Trec) (COGULD01)
- Gunnison, Lower Gunnison Segment 2, Gunnison River: SO₄ (COGULG02)
- Gunnison, Lower Gunnison Segment 8, Kannah Creek: Se (COGULG08)
- Gunnison, Upper Gunnison Segment 11, Coal Creek: Pb (COGUUG11)

- Lower Colorado, Lower Colorado Segment 3, Colorado River mainstem: Se (COLCLC03)
- South Platte, Middle South Platte Segment 4, Barr Lake: NH₃ (COSPMS04)
- South Platte, Upper South Platte Segment 23, Barnum Lake: *E. coli* (COSPUS23)

The following segments and parameters have been removed from the M&E List due to attainment of current water quality standards:

- Arkansas, Upper Arkansas Segment 20, North Fork Wilson Creek: Cu (COARUA20)
- Arkansas, Upper Arkansas Segment 27, Brush Hollow Reservoir: pH (COARUA27)
- Gunnison, Lower Gunnison Segment 7, Surface Creek: Fe(Trec) (COGULG07)
- Gunnison, Lower Gunnison Segment 7, Ward Creek: Se (COGULG07)
- Gunnison, San Miguel Segment 2, Bilk Creek: Cd (COGUSM02)
- Gunnison, Upper Gunnison Segment 7, Slate River: Cd (COGUUG07)
- Gunnison, Upper Gunnison Segment 16, Ohio Creek: Zn(sculpin) (COGUUG16)
- Upper Gunnison Segment 17, Antelope Creek: Dissolved Oxygen (COGUUG17)
- Gunnison, Upper Gunnison Segment 18, Tomichi Creek: *E. coli* (COGUUG18)
- Gunnison, Upper Gunnison Segment 32, N. Fork Henson Creek: Pb, Zn(sculpin) (COGUUG32)
- Gunnison, Uncompany Segment 8, Mineral Creek: Cd (COGUUN08)
- Lower Colorado, Lower Colorado Segment 2b, Colorado River mainstem: Se (COLCLC02b)
- Rio Grande, Alamosa Segment 11, La Jara Reservoir: Cu, Se, Zn (CORGAL11)
- South Platte, Big Thompson Segment 11, Carter Lake: Cu (COSPBT11)
- South Platte, Big Thompson Segment 16, Lake Estes: As (COSPBT16)
- South Platte, Cache la Poudre Segment 14, Horsetooth Reservoir: D.O. (COSPCP14)
- South Platte, Lower South Platte Segment 3, N. Sterling and Jumbo Reservoirs: pH (COSPLS03)
- 9. Dissolved Oxygen Standard in Lakes and Reservoirs

Twenty-eight lakes were previously on the M&E List due to low dissolved oxygen (DO) in the metalimnion. With the adoption of a revised DO standard in 2011, the Division proposed to remove 24 of these lakes from the M&E list because the lakes are now in attainment. Barr Lake was proposed for the 303(d) List for DO because recent data show non-attainment. The Division proposed that Horse Creek Reservoir, North Sterling Reservoir and Lake Thomas remain on the M&E list for DO either because of a minimal sample size (n=1) or due to concerns of the representative nature of the data. The Commission supported the Division's proposal.

Lakes now in attainment with the revised DO standard:

- Upper South Platte Segment 16b, Aurora Reservoir (COSPUS16b)
- Boulder Segment 14, Barker Reservoir (COSPBO14)
- Bear Creek Segment 1c, Bear Creek (COSPBE01C)
- Rio Grande Segment 9, Beaver Creek Reservoir (CORGRG09)
- St. Vrain Segment 7, Boulder Reservoir (COSPSV07)
- Big Thompson Segment 12, Boyd Lake (COSPBT12)
- Upper South Platte Segment 19, Cheesman Reservoir (COSPUS19)
- Cherry Creek Segment 2, Cherry Creek Reservoir (COSPCH02)
- Upper South Platte Segment 19, Elevenmile Reservoir (COSPUS19)
- Big Thompson Segment 12, Horseshoe (Loveland) Lake (COSPBT12)
- Cache la Poudre Segment 14, Horsetooth Reservoir (COSPCP14)
- Big Thompson Segment 14, Lon Hagler Reservoir (COSPBT14)
- Big Thompson Segment 14, Lonetree Reservoir (COSPBT14)
- Big Thompson Segment 12, Lake Loveland (COSPBT12)
- Upper South Platte Segment 22, Marston Reservoir (COSPUS22) Now identified as Bear Creek Segment 11 (COSPBE11)
- Upper South Platte Segment 16c, Quincy Reservoir (COSPUS16c)
- Upper South Platte Segment 19, Spinney Mountain Reservoir (COSPUS19)
- Yampa River Segment 2b, Stagecoach Reservoir (COUCYA02b)
- Big Dry Segment 2, Standley Lake (COSPBD02)
- Uncompany River Segment 14, Sweitzer Reservoir (COGUUN14)
- Upper South Platte Segment 2a, Tarryall Reservoir (COSPUS02a)
- St. Vrain Segment 9, Union Reservoir (COSPSV09)
- Upper South Platte Segment 23, Vanderbilt Lake, Harvey Lake, Duck Lake (COSPUS23)
- Upper Colorado Segment 5, Wolford Mountain Reservoir (COUCUC05)

The Commission moved the following lakes to the 303(d) List for D.O.:

- Middle South Platte Segment 4, Barr Lake (COSPMS04)

- Middle South Platte Segment 7, Horse Creek Reservoir (COSPMS07)
- Upper South Platte Segment 23, Vanderbilt Lake (COSPUS23)

The Commission retained the following lakes on the M&E List for D.O.:

- Lower South Platte Segment 3, North Sterling Reservoir (COSPLS03)
- St. Vrain Segment 7, Thomas Reservoir (COSPSV07)
- 10. Listing of Segments where Water Quality is not Meeting Standards not Identified Above

The following segments or parameters were added to the 303(d) List due to exceedances of water quality standards not identified above:

- Arkansas, Upper Arkansas Segment 20, North Fork Wilson Creek: As (COARUA20)
- Gunnison River, Lower Gunnison Segment 3, Eggleston Reservoir: Fe(Trec) (COGULG03)
- Gunnison River, Lower Gunnison Segment 7, Tongue Creek: Fe(Trec) (COGULG07)
- Gunnison River, Lower Gunnison Segment 13, Crawford Reservoir: D.O. (temperature) (COGULG13)
- Gunnison River, North Fork Gunnison Segment 4, East Muddy Creek: Fe(Trec) (COGUNF04)
- Gunnison River, North Fork Gunnison Segment 6b, Alum Gulch: SO ₄ , Fe(Trec) (COGUNF06b)
- Gunnison River, San Miguel Segment 2, Bear Creek: Cd, Zn(sc) (COGUSM02)
- Gunnison River, San Miguel Segment 2, Howard Fork abv Swamp Gulch: pH, D.O. (COGUSM02)
- Gunnison River, San Miguel Segment 11, Miramonte Reservoir: D.O. (temperature) (COGUSM11)
- Gunnison River, Upper Gunnison Segment 9, Coal Creek: As (COGUUG09)
- Gunnison River, Upper Gunnison Segment 11, Elk Creek: As (COGUUG11)
- Gunnison River, Upper Gunnison Segment 11, Coal Creek: Cd, Zn, As (COGUUG11)
- Gunnison River, Upper Gunnison Segment 12, Coal Creek: Cu (COGUUG12)
- Gunnison River, Upper Gunnison Segment 26, Blue Creek: Cu (COGUUG26)
- Gunnison River, Uncompanyer Segment 4c, Uncompanyer River: Fe(Trec) (COGUUN04c)
- Gunnison River, Uncompanyere Segment 6a, Red Mountain Creek: Ag, Cu (COGUUN06a)

- Gunnison River, Uncompangre Segment 7, Gray Copper Gulch: Cu (COGUUN007)
- Gunnison River, Uncompany Segment 9, Sneffels Creek: Cd, (COGUUN09)
- Gunnison River, Uncompany Segment 12, Dry Creek: Fe(Trec) (COGUUN12)
- Gunnison River, Uncompanyer Segment 12, Loutzenhizer Arroyo: Fe(Trec) (COGUUN12)
- Gunnison River, Lower Dolores Segment 5, Roc Creek: Cu, Fe(Trec) (COGULD05)
- Lower Colorado, Lower Colorado Segment 13b, Leach Creek: *E. coli*, Fe(Trec) (COLCLC013b)
- Lower Colorado, White River Segment 13c, Yellow Creek: Fe(Trec) (COLCWH13c)
- Lower Colorado, White River Segment 14a, Piceance Creek from Willow Creek to Hunter Creek: Fe(Trec) (COLCWH14a)
- San Juan/Dolores Rivers, Animas and Florida Segment 3c, Arrastra Gulch: Cd, Zn COSJAF03c)
- San Juan/Dolores Rivers, Animas and Florida Segment 4a, Animas River: Al(Trec) (COSJAF04a)
- San Juan/Dolores Rivers, La Plata Segment 1, La Plata River: Ag (COSJLP01)
- San Juan/Dolores Rivers, La Plata Segment 4a, E. Mancos River: D.O. (COSJLP04a)
- San Juan/Dolores Rivers, La Plata Segment 4a, Mancos River: D.O. (COSJLP04a)
- San Juan/Dolores Rivers, La Plata Segment 7a, McElmo Creek: Fe(Trec), *E. coli* (COSJLP07a)
- San Juan/Dolores Rivers, La Plata Segment 8a, Mud Creek: Se (COSJLP08a)
- San Juan/Dolores Rivers, La Plata Segment 8a, Trail Canyon: Fe(Trec) (COSJLP08a)
- San Juan/Dolores Rivers, San Juan Segment 6a, Echo Canyon Reservoir: DO (Temperature) (COSJSJ06a)
- South Platte, Bear Creek Segment 1a, Bear Creek: Temperature (COSPBE01a)
- South Platte, Bear Creek Segment 1e, Bear Creek: Temperature (COSPBE01e)
- South Platte, Cherry Creek Segment 3, Cherry Creek: Fe(Trec) (COSPCH03)
- South Platte, Clear Creek Segment 17b, Ralston Creek: U (COSPCL17b)
- South Platte, Upper South Platte Segment 17a, Smith Lake: NH₃ (COSPUS17a)
- South Platte, St. Vrain River Segment 5, Left Hand Creek: Cu (COSPSV05)
- Upper Colorado, Eagle River Segment 9a, Eagle River from Ute Creek to Rube Creek: Temperature (COUCEA09a)

- Upper Colorado, Eagle River Segment 9a, Eagle River from Berry Creek to Squaw Creek: Sediment (COUCEA09a)
- Upper Colorado, North Platte Segment 9, Lake John: D.O. (COUCNP09)
- Upper Colorado, Upper Colorado Segment 2, Willow Creek Reservoir: Mn (COUCUC02)

The following segments or parameters were added to the M&E List where there is a reason to suspect water quality problems, but there is also uncertainty.:

- Arkansas River, Fountain Creek Segment 2a, Fountain Creek: Fe(Trec)
- Gunnison River, Lower Gunnison Segment 3, Eggleston Reservoir: pH, Zn, Fe(Trec) (COGULG03)
- Gunnison River, Lower Gunnison Segment 4a, Callow Creek: *E. coli* (COGULG04a)
- Gunnison River, Lower Gunnison Segment 4a, Peach Valley Creek: Fe(Trec) (COGULG04a)
- Gunnison River, Lower Gunnison Segment 4a, Wells Gulch: pH (COGULG04a)
- Gunnison River, Lower Gunnison Segment 7, Ward Creek: Se (COGULG07)
- Gunnison River, Lower Gunnison Segment 7, Surface Creek: Pb (COGULG07)
- Gunnison River, Lower Gunnison Segment 12, Muddy Creek: *E. coli* (COGULG12)
- Gunnison River, North Fork Gunnison Segment 4, East Muddy Creek: Pb, Se (COGUNF04)
- Gunnison River, North Fork Gunnison Segment 4, Muddy Creek: *E. coli* (May-Oct) (COGUNF04)
- Gunnison River, North Fork Gunnison Segment 4, Island Reservoir: pH, Zn (COGUNF04)
- Gunnison River, North Fork Gunnison Segment 5, Leroux Creek: *E. coli* (COGUNF05)
- Gunnison River, North Fork Gunnison Segment 6a, Unnamed Tributary: Se (COGUNF06a)
- Gunnison River, North Fork Gunnison Segment 6b, Alum Gulch: Fe(Trec) (COGUNF06b)
- Gunnison River, North Fork Gunnison Segment 7, Paonia Reservoir: Zn (COGUNF07)
- Gunnison River, San Miguel Segment 2, Bear Creek: Pb (COGUSM02)
- Gunnison River, San Miguel Segment 2, Cornet Creek: Pb (COGUSM02)
- Gunnison River, San Miguel Segment 3b, San Miguel River: Pb (COGUSM03b)
- Gunnison River, San Miguel Segment 4a, San Miguel River: Pb (COGUSM04a)
- Gunnison River, San Miguel Segment 7a, Chapman Creek: Fe(Trec) (COGUSM07a)

-	Gunnison River, San Miguel Segment 7a, Iron Bog Creek: pH, D.O. (COGUSM07a)
-	Gunnison River, San Miguel Segment 10, Naturita Creek: E. coli, D.O. (COGUSM10)
-	Gunnison River, San Miguel Segment 12, Mesa Creek: Se (COGUSM12)
-	Gunnison River, San Miguel Segment 12, Calamity Draw: D.O. (COGUSM12)
-	Gunnison River, San Miguel Segment 12, Specie Creek: D.O. (COGUSM12)
-	Gunnison River, Upper Gunnison Segment 4, Taylor River: Pb (COGUUG04)
-	Gunnison River, Upper Gunnison Segment 10, Redwell Creek: pH (COGUUG10)
-	Gunnison River, Upper Gunnison Segment 15, S. Beaver Creek: Fe(Trec) (COGUUG15)
-	Gunnison River, Upper Gunnison Segment 16, Ohio Creek: E. coli (COGUUG16)
-	Gunnison River, Upper Gunnison Segment 17, Antelope Creek: E. coli (COGUUG17)
-	Gunnison River, Upper Gunnison Segment 23, Stewart Creek: Fe(Trec) (COGUUG23)
-	Gunnison River, Upper Gunnison Segment 26, Mesa Creek: Cu (COGUUG26)
-	Gunnison River, Upper Gunnison Segment 31, Palmetto Gulch: Ag (COGUUG31)
-	Gunnison River, Uncompahgre Segment 2, Uncompahgre River: Pb (COGUUN02)
-	Gunnison River, Uncompahgre Segment 3b, Ridgway Reservoir: Pb, Zn (COGUUN03b)
-	Gunnison River, Uncompahgre Segment 4c, Uncompahgre River: Pb (COGUUN04c)
-	Gunnison River, Uncompahgre Segment 7, Gray Copper Gulch: pH (COGUUN007)
-	Gunnison River, Lower Dolores Segment 2, Dolores River: E. coli (COGULD02)
-	Gunnison River, Lower Dolores Segment 3a, Disappointment Creek: Se, <i>E. coli</i> (COGULD03a)
-	Gunnison River, Lower Dolores Segment 4, West Paradox Creek: <i>E. coli,</i> Fe(Trec) (COGULD04)
-	Gunnison River, Lower Dolores Segment 5, Roc Creek: E. coli (COGULD05)
-	Lower Colorado, Lower Colorado Segment 4b, South Canyon Hot Springs: Pb (COLCLC04b)
-	San Juan/Dolores Rivers, Animas and Florida Segment 3c, Arrastra Gulch: Pb (COSJAF03c)
-	San Juan/Dolores Rivers, Animas and Florida Segment 12a, Electra Reservoir: Ag, Zn (COSJAF12a)

- San Juan/Dolores Rivers, Animas and Florida Segment 13a, Junction Creek: Ag, *E. coli* (COSJAF13a)

- San Juan/Dolores Rivers, Upper Dolores Segment 11, Lost Canyon Creek: *E. coli* (COSJD011)
- San Juan/Dolores Rivers, La Plata Segment 3a, Cherry Creek: Cu (COSJLP03a)
- San Juan/Dolores Rivers, La Plata Segment 4a, E. Mancos River: Pb (COSJLP04a)
- San Juan/Dolores Rivers, La Plata Segment 4a, Mancos River: Cu, Pb (COSJLP04a)
- San Juan/Dolores Rivers, La Plata Segment 8a, Tribs to McElmo Creek: *E. coli* (COSJLP08a)
- San Juan/Dolores Rivers, Piedra Segment 5, Williams Creek Reservoir: pH, Zn, Fe(Trec), D.O. (COSJPI05)
- San Juan/Dolores Rivers, Piedra Segment 8a, Williams Creek: pH, Cu (COSJPI05)
- San Juan/Dolores Rivers, Piedra Segment 6a, Stollsteimer Creek: Fe(Trec), *E. coli* (COSJPI06a)
- San Juan/Dolores Rivers, San Juan Segment 1, Navajo River: *E. coli* (COSJSJ01)
- San Juan/Dolores Rivers, San Juan Segment 5, San Juan River: Pb, (COSJSJ05)
- San Juan/Dolores Rivers, San Juan Segment 6a, San Juan River: Pb, Cu (COSJSJ06a)
- San Juan/Dolores Rivers, San Juan Segment 6a, Echo Canyon Reservoir: pH (COSJSJ06a)
- San Juan/Dolores Rivers, San Juan Segment 9a, Rio Blanco: Ag, Pb (COSJSJ09a)
- San Juan/Dolores Rivers, San Juan Segment 10, Rito Blanco: *E. coli* (COSJSJ10)
- South Platte, Upper South Platte Segment 17a, Rocky Mountain Lake: Cu, DO (COSPUS17a)
- South Platte, Upper South Platte Segment 23, Huston Lake: *E. coli* (COSPUS23)
- Upper Colorado, Eagle River Segment 9a, Eagle River from Berry Creek to Ute Creek: Temperature (COUCEA09a)
- Upper Colorado, Eagle River Segment 9a, Eagle River from Gore Creek to Berry Creek and from Squaw Creek to Rube Creek: Sediment (COUCEA09a)
- Upper Colorado, Upper Colorado Segment 10c, Fraser River: Pb (COUCUC10c)
- 11. Segments Moved to the 303(d) List

As additional water quality data is collected and assessed, a segment may be moved from the M&E List to the 303(d) List once the non-attainment is confirmed. In general, segments with less than 10 data points will be placed on the M&E List until more data is collected. The following segments and parameters have been moved from the M&E List to the 303(d) List due to additional data collection:

- Arkansas, Upper Arkansas Segment 10, Twin Lake West Cu (COARUA10)

- Gunnison, Lower Gunnison Segment 7, Tongue Creek: Se (COGULG07)
- Gunnison, Uncompany Segment 9, Sneffels Creek: Zn (COGUUN09)
- Lower Colorado, White River Segment 11, Rio Blanco Reservoir: pH (COLCWH11)
- South Platte, Boulder Creek Segment 9, Boulder Creek: Aquatic Life Use (COSPBO09)
- South Platte, Big Thompson Segment 11, Carter Lake: As (COSPBT11)
- South Platte, Big Thompson Segment 16, Lake Estes: Pb (COSPBT16)
- South Platte, Cache la Poudre Segment 14, Horsetooth Reservoir: Cu, As (COSPCP14)
- South Platte, Lower South Platte Segment 3, Jackson Reservoir: pH (COSPLS03)
- South Platte, Middle South Platte Segment 4, Barr Lake: D.O. (COSPMS04)
- South Platte, Middle South Platte Segment 7, Horse Creek Reservoir: D.O. (COSPMS07)
- South Platte, St. Vrain Segment 3, St. Vrain Creek from Left Hand Creek confluence to confluence with Boulder Creek: Aquatic Life Use (COSPSV03)
- South Platte, Upper South Platte Segment 17a, Rocky Mountain Lake: pH, Cu (COSPUS17a)
- South Platte, Upper South Platte Segment 17a, Ferril Lake, Smith Lake: pH (COSPUS17a)
- South Platte, Upper South Platte Segment 17a, Duck Lake: pH, NH₃ (COSPUS17a)
- South Platte, Upper South Platte Segment 23, Aqua Golf, Overland, Parkfield, and Huston Lakes: pH (COSPUS23)
- South Platte, Upper South Platte Segment 23, Vanderbilt Lake: DO (COSPUS23)
- 12. *E. coli* Listings

In June of 2010, the Commission adopted a two-month averaging period for the existing *E. coli* criteria. Evaluation of the E. coli standard is over fixed two-month intervals. Where adequate data were available two-month intervals were assessed. Where adequate data were not available data were assessed either seasonally or for the entire period of record.

13. Lakes and Reservoirs D.O. (temperature) listings

For lakes and reservoirs, the MWAT is assumed to be equivalent to the maximum WAT. When a lake or reservoir is stratified, the upper portion may exceed the applicable temperature standards in the basin regulations, provided that an adequate refuge exists in water below the upper portion. Adequate refuge depends on concurrent attainment within a given profile of the temperature standard below the upper portion is based on comparison with individual depths because of the need to verify concurrent attainment with the DO standard. If the refuge is not adequate because of low dissolved oxygen levels, the lake or reservoir will be listed as impaired for dissolved oxygen rather than for temperature.

14. Site-specific decisions made by the Commission are discussed below.

Eagle River Segments 6, 8 and 9a:

The Division originally proposed to list the following segments in the Eagle River Basin: the mainstem of Eagle River Segment 9a for sediment, temperature, and Aquatic Life Use impairment, and several tributaries to the Eagle River for impairment of the Aquatic Life Use (Provisional) including Black Gore Creek, Beaver Creek, Lake Creek, Red Sandstone Creek and Gore Creek. Division staff worked with stakeholders in the Eagle River watershed to examine the data and further narrow the issues potentially in dispute. Through this work additional data was made available. Based upon the additional data received and reviewed by Division staff, the Division revised its proposal. In general, parties agreed with the Division's refined proposal for the Aquatic Life Listings in the Eagle River Subbasin. Eagle River stakeholders opposed the Division's proposal to list the mainstem of the Eagle River (Segment COUCEA09a) for temperature. They presented an alternative proposal to M & E list a 6-mile long portion of the segment from Berry Creek to Ute Creek. Evidence presented by the Eagle River Water & Sanitation District showed that the only temperature excursions in this stream reach occurred in the early part of the winter shoulder season and wastewater effluent did not cause the excursions. The District will continue collecting data and will work with the Division to complete additional analysis to determine whether the temperature excursions are a result of anthropogenic activities in the watershed. The Commission adopted the Eagle River Basin stakeholders' proposal.

Upper Colorado River Segment 3 (COUCUC03):

Trout Unlimited referenced a report prepared by the Division of Parks and Wildlife (Nehring 2011) which contained significant site-specific macroinvertebrate and other aquatic life information and analysis for the portion of the Colorado River mainstem between Windy Gap Reservoir and its confluence with the Blue River. The Commission finds that given the fact that there are conflicting MMI scores on this segment, said portion of this segment should be placed on the Monitoring and Evaluation list at this time.

Western Resource Advocates White River Basin:

WRA proposed the addition of White River Segments COLCWH13b, COLCWH13c, COLCWH14a, COLCWH14b, COLCWH15 and COLCWH20 on either the 303(d) or M&E Lists for selenium (COLCWH13b) or total recoverable iron. Following additional data that was submitted by Shell in its Responsive Prehearing Statement, WRA modified its proposal. WRA supported listing a portion of COLCWH13b, Duck Creek, on the 303(d) List for selenium. However, the Commission agreed with the Division that the 2008 Statement of Basis and Purpose language in Regulation #37, Classifications and Numeric Standards for the Lower Colorado River Basin, identifies that the four sites used to create the ambient selenium standard should be assessed in aggregate. The Commission supports the Division's position to include COLCWH13c and a portion of COLCWH14a (the mainstem Piceance Creek from Willow Creek to Hunter Creek) for inclusion on the 303(d) List for total recoverable iron.

Southwestern Water Conservation District E. coli:

The Commission has placed several stream segments (COGULD02, COGULD03a, COGULD04, COGULD05, COSJAF13a, COSJDO11, COSJLP08a, COSJP106a, COSJSJ10, and COSJSJ03) on the M&E List for *E. coli* based on data from four or fewer measurements as outlined in the Listing Methodology. Because of the limited number of data points, the listings were based on either a seasonal or annual geometric mean, rather than the two-month averaging period. As a result, the Commission has concluded that the data at these sites indicate potential impairment of the *E. coli* standard, warranting listing on the M&E List so that additional measurements can be collected.

Lower Colorado Segment 3 (COLCLC03):

Lower Colorado Segment 3 was proposed to be removed from the 303(d) List for selenium impairment due to attainment of standards. USFWS opposed its removal from the list because the segment is critical habitat for the endangered Colorado pikeminnow and razorback sucker. The Commission acknowledges the significance of this issue, but given the fact that the segment is in attainment of its selenium standard, the segment should be removed from the list. If the USFWS feels that the standard is not protective of endangered fish species, the Commission recommends they pursue an alternative standard in the next Colorado basin rulemaking hearing.

Animas River (COSJAF05a):

La Plata Energy Council expressed concern with listing segment COSJAF05a as impaired for manganese. In segment COSJAF05a there is an actual water supply use in the upper portion of the segment. However, there is no actual water supply use in the lower reach below the intake to the Animas-La Plata Project. In 2000, when the Commission adopted the table value criteria for manganese based on secondary water supply standards, the Commission adopted Statement of Basis and Purpose language in Section 31.37(iv)(H) indicating that its action could result in the situation facing La Plata – that is, a segment with a water supply classification but where the only actual water supply use is upstream of point source dischargers. The Commission determined in 2000 that the appropriate course of action is for the Commission to consider resegmentation of that stream. Accordingly the Commission encourages La Plata to pursue resegmentation in the Regulation #34 basin rulemaking hearing if they believe it is warranted.

Marston Forebay (COSPUS22 or COSPBE11):

Marston Forebay was listed as Segment COSPUS22 in the 2010 version of Regulation #93, when in fact, it is correctly included in COSPBE11. Marston Forebay was originally placed on the M&E List in 2010 because dissolved oxygen (DO) concentrations were below the standard in the metalimnion (middle layer of the reservoir). In 2010, the DO standard was revised in Regulation 31. The current DO standard only applies to the top 0.5-2 meters of the water column, unless assessing for refuge with regards to the temperature standard. When assessing against the revised standard, Marston is now attaining the DO standard, as DO readings are above 6 mg/L in the top 2 meters of the water column on all dates. As a result, the Division proposed to remove Marston from the M&E List. The Commission agreed with the Division's recommendation and removed Marston from the M&E List for this reason.

Denver Water also requested a finding that Marston is not "waters of the state". The Commission believes that a Regulation #38 rulemaking hearing is the appropriate forum in which to consider any formal regulatory conclusion regarding this issue.

Ralston Creek (COSPCL17b):

The Division originally placed Ralston Creek on the 303(d) List for impairment of its Water Supply Use-based uranium standard. Cotter Corporation opposed this listing and its high priority listing due to ongoing cleanup work at the Schwartzwalder Mine Site. The Division recognizes that Cotter Corporation is actively addressing non-attainment of the primary drinking water uranium standard in Ralston Creek, and the Division anticipates continued cooperation during development of a Category 4b Plan. However, pending revisions to the standard, the Commission finds that COSPCL17b should be retained on the 303(d) List in the interim with a high priority.

Wildhorse Creek - Segment COARMA04a:

Bill Thiebaut, District Attorney for the Tenth Judicial District, Colorado submitted an alternative proposal to add selenium to the existing listing for *E.coli* for Wildhorse Creek. After review of the data submitted, the Division agreed with the alternative proposal. Pueblo West opposed this listing as data for the middle portion of the segment attains the ambient based selenium chronic standard of 597 ug/L as well as the ambient based acute standard of 708 ug/L. It has generally not been the practice of the Commission to 303(d) list the majority of a segment except for a portion in the middle. In addition, there was discussion in regards to the appropriateness of the adopted ambient based standard. Pueblo West has expressed interest in reviewing this standard in a future rulemaking hearing. Until revisions to the standard can be made, the Commission has added the entire segment to the 303(d) List for selenium.

Pueblo West raised concerns about whether the current ambient based selenium standard for Middle Arkansas segment 4a is still the appropriate standard. This issue was discussed and it was determined that revising the ambient based standard based on new data is not appropriate for this rulemaking but could be addressed in the next basin hearing for Regulation #32 in June 2013. If the ambient based standard is modified during that proceeding, the appropriateness of the 303(d) listing for this segment would be revisited in the next rulemaking hearing for Regulation #93 in December 2013. The Commission does not expect that the Division would proceed with development of a TMDL between now and the Regulation #32 hearing in June 2013.

PARTIES TO THE RULEMAKING HEARING

- 1. Western Resource Advocates
- 2. Bill Thiebaut, District Attorney for the 10th Judicial District
- 3. Colorado Division of Parks and Wildlife
- 4. Town of Avon
- 5. City of Grand Junction
- 6. Eagle River Watershed Council Inc
- 7. Town of Vail
- 8. Shell Frontier Oil and Gas Inc.
- 9. Denver Water
- 10. Roaring Fork Conservancy
- 11. City of Aurora
- 12. Northern Colorado Water Conservancy District
- 13. City and County of Denver
- 14. City of Colorado Springs and Colorado Springs Utilities
- 15. Cripple Creek & Victor Gold Mining Co
- 16. MillerCoors, LLC

93.15 STATEMENT OF BASIS, SPECIFIC STATUTORY AUTHORITY AND PURPOSE; DECEMBER 2015 RULEMAKING, FINAL ACTION JANUARY 11, 2016, EFFECTIVE DATE OF MARCH 1, 2016

The provisions of C.R.S. 25-8-202(1)(a), (b) and (i), (2) and (6); 25-8-203; 25-8-204; and 25-8-401; provide the specific statutory authority for adoption of these regulatory amendments. The Commission also adopted in compliance with 24-4-103(4) C.R.S. the following statement of basis and purpose.

BASIS AND PURPOSE

A. <u>Revisions to 303(d) List</u>

1. Introduction

This regulation updates Colorado's List of Water-Quality-Limited Segments Requiring Total Maximum Daily Loads (TMDLs) to reflect additional water quality information available since the Regulation was promulgated in 2006. This list was prepared to fulfill section 303(d) of the federal Clean Water Act (Act) which requires that states submit to the U.S. Environmental Protection Agency (EPA) a list of those waters for which technology-based effluent limitations and other required controls are not stringent enough to implement water quality standards.

This regulation also updates Colorado's Monitoring and Evaluation List (M&E List) to reflect additional water quality information available since the Regulation was last promulgated in 2012.

2. List Development

a. Listing Methodology

The Section 303(d) Listing Methodology - 2016 Listing Cycle ("Listing Methodology") provides the listing process, the criteria for listing, and the criteria for determination of TMDL priority. The Listing Methodology was developed through a public process and finalized as a policy at a Water Quality Control Commission (Commission) administrative action hearing in March 2015.

This Listing Methodology sets forth the criteria that generally were used to make decisions regarding which waters to include on the 2016 Section 303(d) List and the 2016 M&E List. However, this methodology was not adopted by the Commission as a rule. The Commission therefore has the flexibility to take into account other appropriate factors in making site-specific listing decisions.

b. Information Considered

To determine the final segments and parameters that would be included on the 303(d) list and M&E list, the Commission considered all existing and readily available information that relates to the segments included in the Notice of Rulemaking (published August 10, 2015). The Commission considered existing and readily available data, which includes the data used to prepare the identification processes, calculations and models referenced in 40 CFR §130.7(a)(5)(i), (ii) and (iv), and data that was presented in a readily usable format and submitted in conformance with 40 CFR §130.7(a)(5)(iii). In addition, the Commission accepted credible data and information that was submitted in accordance with the listing process schedule. The Division will continue to independently collect and analyze new data on a rotating basin basis as part of its triennial review efforts, and the Commission will utilize such data and information in making future listing determinations. Existing data which was not brought forward through one of these mechanisms or otherwise presented to the Commission in accordance with the schedule was not treated as "readily available" for purposes of making the 2016 listing decisions. Such information will be considered in the next listing cycle if the information is provided through a proper mechanism.

c. Data Quality

In the Division's Quality Management Plan 2011 for the Collection and Utilization of Environmental Data, the Division states that "[i]t is the expressed goal of the Division to use only those analytical data that are both reliable and have a defined level of quality."

3. Segment Prioritization

The objective of prioritization is to identify those segments where the Division and the public should concentrate their resources. Priorities of High, Medium and Low were established according to section IV of the 2016 Section 303(d) Listing Methodology.

The Division remains committed to establishing a plan for monitoring and evaluating water bodies on the M&E List prior to the list submission date for the subsequent listing cycle. Further, the Commission has committed to determining their appropriate status (as either impaired or fully supporting) within ten years of their placement on the M&E List. 4. Impaired Segments Not Requiring TMDLs

In the 2016 listing cycle, the Commission has added a list of impaired waters where a TMDL is not required. There are three primary reasons why the Commission did not require a TMDL for an impaired segment: (1) a TMDL has already been completed, but the classified uses are not yet attained but will be in the foreseeable future; (2) there is a required control mechanism in place that is expected to address all segment-pollutant combinations and the segment will attain water quality standards in a reasonable period of time; or (3) the Commission determined that the impairment is not caused by a pollutant. These segments have been included in section 93.4.

5. Fish Mercury (Hg) Listings

The 303(d) Listing Methodology was revised in 2014 for the assessment of Fish Mercury (Hg). The methods compare the weighted average fish Hg for each waterbody and species (and size class, where appropriate) to a 0.3 ppm threshold. The sample size must meet or exceed 30 fish tissue samples per waterbody/species to list new waterbodies for Fish Hg. Waterbodies can also be listed if there is overwhelming evidence of impairment (>0.45 ppm Hg) and a sample size of at least 10 fish tissue samples.

The Commission retained the following 15 lakes on the 303(d) List:

- Lower Arkansas segment 15, Trinidad Reservoir (COARLA15)
- Middle Arkansas segment 26, Horseshoe Lake (COARMA26)
- Upper Arkansas segment 40, Brush Hollow Reservoir (COARUA40)
- Lower Colorado segment 20, Rifle Gap Reservoir (COLCLC20)
- Dolores River segment 4b, McPhee Reservoir (COSJD004b)
- La Plata segment 11, Narraguinnep Reservoir (COSJLP11)
- La Plata segment 11, Totten Reservoir (COSJLP11)
- Los Pinos segment 3, Vallecito Reservoir (COSJPN03)
- San Juan segment 8, Echo Canyon Reservoir (COSJSJ08)
- Big Thompson segment 11. Carter Lake (COSPBT11)
- Cache la Poudre segment 14, Horsetooth Reservoir (COSPCP14)
- Upper South Platte segment 17a, Berkeley Lake (COSPUS17a)
- Upper South Platte segment 17a, Rocky Mountain Lake (COSPUS17a)
- Yampa River segment 23, Catamount Reservoir (COUCYA22)
- Yampa River segment 22, Elkhead Reservoir (COUCYA23)

The Commission retained the following 3 lakes on the M&E List:

- Middle Arkansas segment 27, Teller Reservoir (COARMA27)
- San Juan segment 8, Navajo Reservoir (COSJSJ08)
- Boulder Creek segment 18, Gross Reservoir (COSPBO18)

The Commission moved the following lake from the M&E List to the 303(d) List:

• North Platte segment 9, Big Creek Reservoir (COUCNP09)

The Commission added the following lake to the M&E List:

• Upper South Platte segment 19, Cheesman Reservoir (COSPUS19)

The Commission removed the following lakes from the 303(d) List or the M&E List:

- Big Thompson segment 12, Boyd Lake (COSPBT12)
- Big Thompson segment 14, Lonetree Reservoir (COSPBT14)
- Upper Colorado segment 12, Lake Granby (COUCUC12)

6. Aquatic Life Listings

In October 2010, the Commission adopted Policy 10-1, Aquatic Life Use Attainment Commission's Policy ("Policy 10-1"), which established that the Colorado multi-metric index ("MMI") is an appropriate tool for the quantitative bioassessment of the health of aquatic communities. Utilizing the Commission Policy 10-1, the Division calculated over 750 MMI scores for the 2016 listing cycle. Based on this assessment, the Commission determined that 53 new segments were not attaining, with an additional 14 new segments included on the M&E List. These segments are in addition to 23 segments that were previously included on the 2012 303(d) List, and 5 segments that were previously included on the 2012 M&E List. For 50 of these segments that are not attaining for aquatic life a specific pollutant could not be identified as the cause of non-attainment, accordingly these 50 segments were listed as provisional.

Several segments had data outside of the standard index period for data collection. The Commission included these segments on the M&E List in 2012 to allow the Division and parties to gather additional information within the standard index period. The 2016 Listing Methodology allowed additional flexibility to include additional data that was collected four weeks after the October deadline to be considered in the index period. This resulted in the Commission moving some segments from the M&E List to the 303(d) List. Any data collected outside of the standard index period was not used for the 2016 listing cycle.

The Commission added the following segments to the 303(d) List for non-attainment of their Aquatic Life Use based on Policy 10-1:

- White River segment 7 (COLCWH07)
- White River segment 23, East Douglas Creek (COLCWH23)
- Closed Basin segment 2a, North Fork Carnero Creek (CORGCB02a)
- Closed Basin segment 2b, La Garita Creek (CORGCB02b)
- Rio Grande segment 11 (CORGRG11)
- Rio Grande segment 20a (CORGRG20a)
- Big Thompson segment 2 (COSPBT02)
- Upper Gunnison segment 01, Stewart Creek (COGUUG01)
- Upper Gunnison segment 4, Taylor River (COGUUG04

The Commission provisionally added the following segments to the 303(d) List for non-attainment of their Aquatic Life Use based on Policy 10-1:

- Fountain Creek segment 3a, West Monument Creek (COARFO03a)
- Fountain Creek segment 6 (COARFO06)
- Lower Arkansas segment 6a, Apache Canyon (COARLA06a)
- San Miguel segment 12a, MaKenzie Creek (COGUSM12a)
- Upper Gunnison segment 2, Willow Creek (COGUUG02)
- Upper Gunnison segment 18b (COGUUG18b)
- Upper Gunnison segment 19, Razor Creek (COGUUG19)
- Upper Gunnison segment 26, Crystal Creek (COGUUG26)
- Closed Basin/San Luis Valley segment 9b, Kerber Creek from U S Gulch to the confluence with San Luis Creek (CORGCB09b)
- La Plata segment 5a (COSJLP05a)
- La Plata segment 6a (COSJLP06a)
- Piedra River segment 6a (COSJPI06a)

- Bear Creek segment 2 (COSPBE02)
- Boulder Creek segment 7a (COSPBO07a)
- Cache la Poudre segment 2a (COSPCP02a)
- Lower South Platte segment 2b, Kiowa Creek (COSPLS02b)
- Upper South Platte segment 3, Pine Creek, Fourmile Creek and West Creek (COSPUS03)
- Upper South Platte segment 10a, East Plum Creek (COSPUS10a)
- Upper South Platte segment 11b, Spring Creek (COSPUS11b)
- Blue River segment 1 (COUCBL01)
- Blue River segment 2b, Blue River to the confluence with Swan River (COUCBL02b)
- Blue River segment 2c (COUCBL02c)
- Blue River segment 5 (COUCBL05)
- North Platte segment 4a, Little Grizzly Creek (COUCNP04a)
- Yampa segment 12, Wolf Creek (COUCYA12)

The Commission retained the following segments on the 303(d) List for non-attainment of their Aquatic Life Use:

• White River segment 13c, Yellow Creek from Barcus Creek to the White River (COLCWH13c)

- Clear Creek segment 14b (COSPCL14b)
- Clear Creek segment 15 (COSPCL15)
- Big Thompson segment 9, Little Thompson River (COSPBT09)

The Commission retained the following segments provisionally on the 303(d) List for nonattainment of their Aquatic Life Use:

• Upper Arkansas segment 21a, Squaw Gulch to a point 1.5 miles upstream of the confluence with Fourmile Creek (COARUA21a)

- San Miguel segment 12a, Maverick Draw (COGUSM12a)
- Upper Gunnison segment 24, Cochetopa Creek from Forest Rd 43 to Tomichi Creek (COGUUG24)
- Uncompany segment 11, Deer Creek (COGUUN11)
- Lower Yampa/Green River segment 22a, Talamantes Creek (COLCLY22a)
- White River segment 15, Piceance Creek (COLCWH15)
- White River segment 20, Black Sulphur Creek (COLCWH20)
- Rio Grande segment 12 (CORGRG12)
- Boulder Creek segment 9, From 107th Street to the confluence with Coal Creek (COSPB009)
- Upper South Platte segment 10a, West Plum Creek (COSPUS10a)
- Upper South Platte segment 11a, Cook Creek (COSPUS11a)
- Eagle River segment 6, Mainstem of Lake Creek from confluence with East and West Lake Creek to the mouth (COUCEA06)
- Eagle River segment 6, Red Sandstone Creek to confluence with Gore Creek (COUCEA06)
- Eagle River segment 8 (COUCEA08)
- Roaring Fork segment 3a, Roaring Fork from Hunter Creek to Trentaz Gulch (COUCRF03a)
- Roaring Fork segment 3a, West Sopris Creek (COUCRF03a)
- Roaring Fork segment 3d, Cattle Creek from Bowers Gulch (COUCRF03d)
- Roaring Fork segment 7, South Fork of Frying Pan River from diversion to unnamed tributary (COUCRF07)
- Upper Colorado segment 10a, Fraser River and Vasquez Creek (COUCUC10a)

The Commission added the following segments to the M&E List for possible non-attainment of their Aquatic Life Use:

- Upper Arkansas segment 14c, North Hardscrabble Creek (COARUA14c)
- Upper Arkansas segment 15 (COARUA15)
- Rio Grande segment 7 (CORGRG07)
- Lower Yampa/Green River segment 3i (COLCLY03i)
- La Plata/Mancos/McElmo/San Juan segment 4a (COSJLP04a)
- San Juan segment 5, Mainstem San Juan River (COSJSJ05)
- Clear Creek segment 2c (COSPCL02c)

The Commission retained the following segments on the M&E List for possible non-attainment of their Aquatic Life Use:

- Upper Arkansas segment 5, Lake Fork below Sugarloaf Dam (COARUA05)
- White River segment 13b, Duck Creek (COLCWH13b)
- Boulder Creek segment 7b (COSPBO07b)
- Clear Creek segment 1, Kearney Gulch and Grizzly Gulch (COSPCL01)
- Upper South Platte segment 2a, South Fork of South Platte below Antero Reservoir (COSPUS02a)
- Upper South Platte segment 3, Trout Creek (COSPUS03)
- Blue River segment 17 (COUCBL17)
- Eagle River segment 6, Black Gore Creek (COUCEA06)
- Eagle River segment 6, Red Sand Stone Creek from USFS Boundary to northside of I-70 frontage road (COUCEA06)
- Upper Colorado segment 3, Colorado River from Windy Gap Reservoir to Derby Creek (COUCUC03)

The Commission expanded the portion of Upper Colorado segment 3 that is on the M&E List to include the portion from the outlet of Windy Gap Reservoir to Derby Creek. Despite improving MMI scores in the upper reach, the Commission was concerned about declining taxa in the upper reach, and feels the stream would benefit from additional investigation.

The Commission removed the following segments from the 303(d) List for attainment of their Aquatic Life Use:

• Upper Arkansas segment 21a, Cripple Creek from source to above Squaw Gulch (COARUA21a)

- Upper Gunnison segment 6b, Cement Creek (COGUUG06b)
- Upper Gunnison segment 29a, Lake Fork of the Gunnison River between Cooper and Silver Creek (COGUUG29a)
- White River segment 23, West Douglas Creek (COLCWH23)
- Bear Creek segment 1a, Bear Creek (COSPBE01a)
- St. Vrain segment 3, From the confluence with Left Hand Creek to the confluence with Boulder Creek (COSPSV03)
- Roaring Fork segment 4, Mainstem Brush Creek (COUCRF04)
- Yampa River segment 15, Elkhead Creek (COUCYA15)

The Commission removed the following segments from the M&E List for attainment of the Aquatic Life Use standard:

- Fountain Creek segment 4, Sand Creek (COARFO04)
- Upper Gunnison segment 8, Slate River (COGUUG08)
- Bear Creek segment 1e, All (COSPBE01e)
- Bear Creek segment 2, Below Kipling Parkway (CO 391) (COSPBE02)
- Boulder Creek segment 10 (COSPBO10)

- Lower South Platte segment 1 (COSPLS01)
- St. Vrain segment 3, From Hover Road to the confluence of Left Hand Creek (COSPSV03)
- Upper South Platte segment 11b, Bear Creek (COSPUS11b)
- North Platte segment 4a, Grizzly Creek (COUCNP04a)

The Commission moved the following segments from the M&E List to the 303(d) List, provisionally:

• Upper South Platte segment 6a, South Platte from Cheeseman Reservoir to Lazy Gulch (COSPUS06a)

- Upper South Platte segment 01a, South Platte River from the outlet of Elevenmile Reservoir to the Idlewilde picnic area (COSPUS01a)
- Upper South Platte segment 11b, Spring Creek (COSPUS11b)
- Eagle River segment 6, Beaver Creek from Wayne Creek to mouth (COUCEA06)
- Eagle River segment 9a, Eagle River from confluence with Berry Creek to confluence with Squaw Creek (COUCEA09a)
- North Platte segment 4a, Little Grizzly Creek (COUCNP04a)

The Commission removed the provisional qualifier for the non-attainment of the Aquatic Life Use standard for the following segments:

- Upper Gunnison segment 15a, South Beaver Creek (COGUUG15a)
- Clear Creek segment 14a, Clear Creek from Croke Canal to McIntyre Street (COSPCL14a)
- Upper South Platte segment 3, Horse Creek (COSPUS03)
- 7. Narrative Sediment Standard Listings

The Commission adopted a new approach in the 2016 Listing Methodology to evaluate impairment of the narrative sediment standard. This methodology, which is described in the Commission's Policy 98-1, Guidance for the Implementation of Colorado's Narrative Stream Standard Regulation #31, Section 31.11(1)(a)(i), includes assessment of the macroinvertebrate population using a sediment tolerance indicator score and the percent fines as compared to a regional threshold. An impairment listing is further supported by a review of the watershed for differences of the sampling site from the range of conditions used to establish the expected condition for the sediment region, as well as the presence of likely anthropogenic sources of sediment.

The Commission added the following segments to the 303(d) List for non-attainment of the narrative sediment standard:

- White River segment 13b (COLCWH13b)
- White River segment 23, East Douglas Creek from just below Tommy's Draw to the confluence with Douglas Creek (COLCWH23)
- Closed Basin segment 12a, East Pass Creek (CORGCB12a)

The Commission added the following segments to the M&E List for potential non-attainment of the narrative sediment standard:

- Yampa River segment 13b (COUCYA13b)
- North Platte segment 4a, Sand Creek (COUCNP04a)

The Commission removed the following segment from the 303(d) List for attainment of the narrative sediment standard:

• Upper South Platte segment 3, Trout Creek and its tributaries on USFS land (COSPUS03)

The Commission removed the following segments from the M&E List for attainment of the narrative sediment standard:

- Lower Yampa segment 2 (COLCLY02)
- Upper South Platte segment 3, Sugar Creek on USFS land (COSPUS03)
- Upper South Platte segment 3, Pine Creek on USFS land (COSPUS03)

The Commission retained these segments on the 303(d) List for non-attainment of the narrative sediment standard as no new data was available:

- Lower Colorado segment 13b, Salt Creek (COLCLC13b)
- White River segment 22, West Evacuation Wash, Douglas Creek (COLCWH22)
- Eagle River segment 6, Black Gore Creek, adjacent to I-70 (COUCEA06)
- Eagle River segment 9a, Eagle River from confluence with Berry Creek to confluence with Squaw Creek (COUCEA09a)
- Yampa River segment 3, Bushy Creek (COUCYA03)
- Clear Creek segment 14b (COSPCL14b)
- Clear Creek segment 15 (COSPCL15)

The Commission retained these segments on the M&E List for non-attainment of the narrative sediment standard as no new data was available:

- Lower Arkansas segment 7 (COARLA07)
- Lower Gunnison segment 2 (COGULG02)
- Lower Gunnison segment 11b, Lunch Creek (COGULG11b)
- Uncompany River segment 4a (COGUUN04a)
- Uncompany River segment 4b (COGUUN04b)
- Uncompany River segment 4c (COGUUN04c)
- Uncompany River segment 15b, Dry Creek Watershed (COGUUN15b)
- Lower Colorado segment 1 (COLCLC01)
- Lower Colorado segment 2a (COLCLC02a)
- Lower Colorado segment 2b (COLCLC02b)
- Lower Yampa segment 16 (COLCLY16)
- Rio Grande segment 13 (CORGRG13)
- Los Pinos segment 6a, Stollsteimer Creek above Southern Ute boundary (COSJPI06a)
- Eagle River segment 9a, Eagle River from Gore Creek to confluence with Berry Creek (COUCEA09a)

8. Listings Due to Exceedances of the Temperature Standards

The 2016 Listing Methodology requires that the party proposing a temperature listing is responsible for investigating the temperature excursions as defined in Regulation No. 31, Footnote 5c, Table 1. This footnote includes four allowable excursions to exceedances of the temperature standard. These include an air temperature excursion, a low flow excursion, an excursion for the upper portion of a lake or reservoir and a winter shoulder season excursion. For the 2016 listing cycle the Division analyzed water temperature data from more than 240 stations in more than 100 segments. In cases where the excursions were evaluated and exceedances of the temperature standards remained, the Commission included these segments on the 303(d) List. In cases where the excursions were not fully evaluated and exceedances of the temperature standards remained, the Commission included these segments on the 303(d) List. In cases where the excursions were not fully evaluated and exceedances of the temperature standards remained, the Commission included these segments on the 303(d) List. In cases where the excursions were not fully evaluated and exceedances of the temperature standards remained, the Commission included these segments on the 303(d) List.

The Commission added the following segments to the 303(d) List for exceedances of the temperature standards (portions are indicated where appropriate):

- Fountain Creek segment 6 (COARFO06)
- Lower Arkansas segment 3a (COARLA03a)
- Middle Arkansas segment 2 (COARMA02)
- Lower Dolores segment 2 (COGULD02)
- Upper Gunnison segment 8 (COGUUG08)
- Lower Colorado segment 1 (COLCLC01)
- White River segment 7 (COLCWH07)
- White River segment 13c, Yellow Creek below Greasewood Creek (COLCWH13c)
- White River segment 15, Piceance Creek from 3 miles above the confluence with the White River, to the confluence with the White River. (COLCWH15)
- White River segment 23 (COLCWH23)
- Rio Grande segment 4b (CORGRG04b)
- Bear Creek segment 1b (COSPBE01b)
- Bear Creek segment 1e (COSPBE01e)
- Bear Creek segment 3 (COSPBE03), Vance Creek
- Big Thompson segment 2, From Cedar Creek to Home Supply Canal (COSPBT02)
- Clear Creek segment 11 (COSPCL11)
- Clear Creek segment 13b, Mainstem of North Clear Creek (COSPCL13b)
- Clear Creek segment 14a (COSPCL14a)
- Clear Creek segment 15 (COSPCL15)
- Upper South Platte segment 3, Goose Creek (COSPUS03)
- Blue River segment 17, Blue River downstream of Green Mtn Reservoir (COUCBL17)
- Roaring Fork segment 3c (COUCRF03c)
- Upper Colorado segment 2, Colorado River from Shadow Mountain Reservoir to Granby Reservoir (COUCUC02)
- Upper Colorado segment 2, Willow Creek, Stillwater Creek and Arapaho Creek (COUCUC02)
- Upper Colorado segment 7a, mainstem of Muddy Creek (COUCUC07a)
- Yampa River segment 2a, Yampa River below Stagecoach Reservoir (COUCYA02a)
- Yampa River segment 2b (COUCYA02b)

The Commission added the following segments to the M&E List for exceedances of the temperature standards (where portions are not indicated the entire segment was listed):

- Lower Arkansas segment 5b (COARLA05b)
- Lower Arkansas segment 6a, Reilly Canyon and Sarcillo Canyon(COARLA06a)
- Lower Arkansas segment 6b (COARLA06b)
- Middle Arkansas segment 7b (COARMA07b)
- Upper Arkansas segment 4a (COARUA04a)
- Lower Gunnison segment 8 (COGULG08)

- Closed Basin segment 12a (CORGCB12a)
- San Miguel segment 10, Naturita Creek (COGUSM10)
- San Miguel segment 12b (COGUSM12b)
- Lower Colorado segment 4a (COLCLC04a)
- Alamosa River segment 11b (CORGAL11b)
- Los Pinos River segment 4a, East Mancos River (COSJLP04a)
- Piedra River segment 5 (COSJPI05)
- San Juan River segment 6a (COSJSJ06a)
- San Juan River segment 10 (COSJSJ10)
- Bear Creek segment 6a, Turkey Creek below Parmelee Gulch (COSPBE06a)
- Bear Creek segment 6b (COSPBE06b)
- Clear Creek segment 14b (COSPCL14b)
- Clear Creek segment 17b (COSPCL17b)
- Upper South Platte segment 3, Trout Creek and tributaries on USFS property (COSPUS03)
- Upper South Platte segment 10a, Plum Creek (COSPUS10a)
- Upper South Platte segment 15 (COSPUS15)
- Upper South Platte segment 16g (COSPUS16g)
- Yampa River segment 13e (COUCYA13e)

The Commission retained the following segments on the 303(d) List for exceedances of the temperature standards:

• Bear Creek segment 1a, Bear Creek below the confluence with Yankee Creek (COSPBE01a)

- Cache la Poudre segment 10a (COSPCP10a)
- Saint Vrain segment 2b (COSPSV02b)
- Upper Colorado segment 3, From 578 Road Bridge (COUCUC03)
- Upper Colorado segment 7b, Muddy Creek and tributaries (COUCUC07b)
- Upper Colorado segment 10a, Ranch Creek (COUCUC10a)

The Commission retained the following segment on the M&E List for exceedances of the temperature standards:

• Upper South Platte segment 2a, Twin Creek, on USFS Land (COSPUS02a)

The Commission delisted the following segments from the 303(d) List or the M&E List for exceedances of the temperature standards:

• Bear Creek segment 1e, Bear Creek from the outlet of Evergreen Lake to Kerr/Swede Gulch (COSPBE01e)

- Upper South Platte segment 2a, Salt Creek (COSPUS02a)
- Eagle River segment 9a, Eagle River from Berry Creek to confluence with Ute Creek (COUCEA09a)
- Eagle River segment 9a, Eagle River from Ute Creek to confluence with Rube Creek (COUCEA09a)
- Upper Colorado segment 10c (COUCUC10c)
- Yampa River segment 2c (COUCYA02c)
- Bear Creek segment 1a, Bear Creek from Witter Gulch to Evergreen Lake (COSPBE01a)

The Commission moved the following segment from the 303(d) List to the M&E List for exceedances of the temperature standards:

Big Thompson segment 8 (COSPBT08)

9. Listings Due to Exceedances of the Secondary Water Supply Standards

For the secondary water supply standards of dissolved iron, manganese and sulfate, the less restrictive of the following two options apply as the numeric standard: existing quality as of January 1, 2000 or the table value criteria in Regulation No. 31, Tables II and III. For dissolved iron, the table value standard (TVS) is 300 ug/l. For dissolved manganese, the TVS is 50 ug/l. For sulfate, the TVS is 250 mg/l.

In the 2016 303(d) Listing Methodology, the Commission included additional language regarding the determination of existing quality from the year 2000. This included a minimum data requirement of ten data points, and the ability to use data collected after the year 2000 when characterizing existing quality from 2000. However, pursuant to section 31.11(6) of Regulation 31, the use of data collected after 2000 may only be used upon a showing that there are no new or increased sources of these pollutants in the segment being assessed since 2000.

Some issues were raised regarding whether the data should be assessed station by station when comparing concentrations from 2000 to current conditions or can data be aggregated for the entire segment (or a portion of the segment). The Commission determined that unless a good reason was presented to assess station to station, data should be combined and assessed to characterize water quality as of 2000 and current conditions for manganese, dissolved iron and sulfate.

In the following segments, the TVS was less restrictive than water quality as of the year 2000. Therefore, the TVS was used as the standard for these listing decisions. The Commission added the following segments to the 303(d) List:

• Middle Arkansas segment 2, mainstem of the Arkansas River from Pueblo Reservoir to Blue Ribbon Creek: manganese (COARMA02)

- Lower Yampa/Green River segment 3c, Wilson Creek: sulfate (COLCLY03c)
- Boulder Creek segment 2a, Como Creek to the confluence of North Boulder Creek: dissolved iron (COSPB002a)
- Big Thompson segment 8, From source to St Vrain Supply Canal: sulfate (COSPBT08)
- Cache la Poudre segment 7: manganese (COSPCP07)
- Cache la Poudre segment 13a, Dry Creek: manganese and sulfate (COSPCP13a)
- Middle South Platte segment 1b: manganese (COSPMS01b)
- Upper Colorado segment 7a, Alkali Slough: sulfate (COUCUC07a)

In the following segments, the existing quality as of 2000 was greater (less restrictive) than the TVS. Therefore, the water quality representative of 2000 was used as the standard for these listing decisions. The Commission added the following segments to the 303(d) List:

- Fountain Creek segment 1a, Mainstem: manganese (COARFO01a)
- Lower Arkansas segment 1b: manganese (COARLA01b)
- Lower Arkansas segment 1c: manganese (COARLA01c)
- Lower Arkansas segment 4a: sulfate (COARLA04a)
- Middle Arkansas segment 6b: manganese and sulfate (COARMA06b)
- Lower Colorado segment 14c: manganese (COLCLC14c)
- Lower Yampa segment 3c, Stinking Gulch: sulfate (COLCLY03c)
- Clear Creek segment 2c, Turkey Gulch below Rockford Tunnel: manganese and dissolved iron (COSPCL02c)

• Upper South Platte segment 3, Trout Creek and tributaries on USFS property: manganese (COSPUS03)

- Upper South Platte segment 5b, Geneva Creek: manganese (COSPUS05b)
- Blue River segment 06a: manganese (COUCBL06a)
- Eagle River segment 5c: dissolved iron (COUCEA05c)

- North Platte segment 4a, Snyder Creek: manganese and dissolved iron (COUCNP04a)
- Upper Colorado segment 10c, below Fraser Canyon: dissolved iron (COUCUC10c)

In the following segments, the TVS was less restrictive than water quality as of the year 2000. Therefore, the TVS was used as the standard for these listing decisions. The Commission added the following segments to the M&E List:

- Middle Arkansas segment 6a: manganese (COARMA06a)
- Upper Arkansas segment 38, Skagway Reservoir: dissolved iron (COARUA38)
- Upper Gunnison segment 29a, Lake Fork of the Gunnison upstream of Cottonwood Creek: manganese (COGUUG29a)
- Lower Colorado segment 4a: sulfate (COLCLC04a)
- Lower Yampa/Green River segment 3c, Wilson Creek: manganese (COLCLY03c)
- Lower Yampa/Green River segment 6: sulfate (COLCLY06)
- Lower White segment 9b: manganese (COLCWH09b)
- Lower White segment 13b, Corral Gulch: manganese (COLCWH13b)
- Alamosa River segment 20: dissolved iron (CORGAL20)
- Closed Basin segment 12a, Ford Creek: manganese (CORGCB12a)
- Rio Grande segment 2, South Clear Creek: dissolved iron (CORGRG02)
- Rio Grande segment 38, Big Meadows Reservoir: dissolved iron and manganese (CORGRG38)
- Rio Grande segment 38, Road Canyon Reservoir: dissolved iron (CORGRG38)
- Boulder Creek segment 2a, North Boulder Creek from Caribou Creek to the confluence with Como Creek: dissolved iron (COSPBO02a)
- Big Thompson segment 7, Buckhorn Creek: manganese (COSPBT07)
- Boulder Creek segment 2a, from the outlet of Barker Reservoir to Longitude: 105.475577°Latitude: 39.971275°: manganese (COSPBO02a)
- Cherry Creek segment 1: manganese (COSPCH01)
- Clear Creek segment 3b, Leavenworth Creek: manganese (COSPCL03b)
- Clear Creek segment 6, North Empire Creek: sulfate (COSPCL06)
- Clear Creek segment 12a, Gilson Gulch and tributaries: dissolved iron, manganese, and sulfate (COSPCL12a)
- Cache la Poudre segment 7: dissolved iron (COSPCP07)
- Laramie River segment 2a: manganese (COSPLA02a)
- St. Vrain segment 4a, (Hwy 72 to James Creek): manganese (COSPSV04a)
- North Platte segment 3: dissolved iron (COUCNP03)
- Yampa River segment 18, South Fork Little Snake River: dissolved iron (COUCYA18)

In the following segments, the existing quality as of 2000 was greater (less restrictive) than the TVS. Therefore, the water quality representative of 2000 was used as the standard for these listing decisions. The Commission added the following segments to the M&E List:

- Lower Arkansas segment 2a: manganese and sulfate (COARLA02a)
- Middle Arkansas segment 6b: sulfate (COARMA06b)
- Upper Arkansas segment 5, Lake Fork below Sugarloaf Dam to the confluence with the Arkansas River and Colorado Gulch: manganese (COARUA05)
- Upper Arkansas segment 38, Skagway Reservoir: manganese (COARUA38)
- Lower Colorado segment 2b, Humphrey Backwater area: manganese and sulfate (COLCLC02b)
- Lower Yampa/Green River segment 3e: sulfate (COLCLY03e)
- Lower Yampa/Green River segment 6: manganese (COLCLY06)
- White River segment 13b, Stake Springs: sulfate (COLCWH13b)
- Alamosa River segment 2: dissolved iron and manganese (CORGAL02)
- Closed Basin segment 9a, Squirrel Creek: manganese (CORGCB09a)
- Rio Grande segment 4c: manganese (CORGRG04c)
- Clear Creek segment 6, North Empire Creek: dissolved iron (COSPCL06)

- Lower South Platte segment 1: sulfate (COSPLS01)
- Middle South Platte segment 1a: manganese (COSPMS01a)
- Blue River segment 12: manganese (COUCBL12)
- North Platte segment 4a, Canadian River: manganese (COUCNP04a)
- North Platte segment 4a, Illinois River: dissolved iron (COUCNP04a)
- North Platte segment 4b, Illinois River: manganese (COUCNP04b)
- North Platte segment 5b: dissolved iron and manganese (COUCNP05b)

In the following segments, there was not enough data available to characterize the water quality representative of the year 2000. Until additional information can be gathered to make a determination on the water quality as a 2000, the Commission added the following segments to the M&E List:

- Middle Arkansas segment 6a: sulfate (COARMA06a)
- Middle Arkansas segment 9: manganese (COARMA09)
- Middle Arkansas segment 11b: manganese (COARMA11b)
- Closed Basin segment 2a, North Fork Carnero Creek: manganese (CORGCB02a)
- Closed Basin segment 2a, South Fork Carnero Creek: dissolved iron and manganese (CORGCB02a)
- Closed Basin segment 2b, La Garita Creek: dissolved iron and manganese (CORGCB02b)
- Closed Basin segment 2c: manganese (CORGCB02c)
- Clear Creek segment 14b: dissolved iron (COSPCL14b)
- Boulder Creek segment 14, Barker Reservoir: dissolved iron, manganese (COSPBO14)
- Blue River segment 20, Spruce Creek: dissolved iron (COUCBL20)
- Upper Colorado segment 7a, Alkali Slough: manganese (COUCUC07a)
- Yampa River segment 3, Little Morrison Creek: manganese (COUCYA03)

For the following segments, existing 303(d) and M&E listings for exceedances of the secondary water supply standards were retained:

- Coal Creek segment 11: manganese (COGUUG11)
- Clear Creek segment 14b: manganese (COSPCL14b)
- Lower South Platte segment 1: manganese (COSPLS01)
- St. Vrain segment 5, Left Hand Creek below US 36 to a point above the Lefthand Feeder Canal: manganese (COSPSV05)
- North Platte segment 4a, Canadian River: dissolved iron (COUCNP04a)
- Yampa segment 2a, Yampa River below Stagecoach: manganese (COUCYA02a)

10. Listings Due to Exceedances of the Water Supply Standards for Arsenic and Nitrite

The 2016 303(d) Listing Methodology was modified to reflect changes in Regulation #31 for the assessment of arsenic, nitrite and nitrate. Previously, the assessment of arsenic, nitrite and nitrate water supply standards was solely conducted at the point of intake for a water supply. This provision was removed in the Regulation #31, resulting in the assessment of these standards throughout the entire segment.

Based on comments received from parties regarding the arsenic listings the Commission reiterates the following Commission decisions. The source of a pollutant is not considered during the listing analysis, and the Commission recommends that parties who believe that impairments are the result of high background levels of arsenic consider site-specific regulatory changes, such as site-specific standards or removal of a classified use through a use attainability analysis. Attainment is assessed against the underlying standard, not against a temporary modification. Data for dissolved arsenic may be used in determining attainment of total arsenic.

For arsenic listings the Commission determined that the Division may use "j data" in its assessment. "J data" is an analytical result that falls between the method detection limit ("MDL") and the minimum level ("ML"). The arsenic water supply standard ($0.02\mu g/L$) is below the MDL for arsenic (with the lowest MDL in data assessed for this rulemaking hearing at $0.022 \mu g/L$). J data may be used in assessing arsenic because a j data result means that the lab is 99% certain arsenic is present in the sample at a level higher than the MDL, which is higher than the standard for arsenic.

The Commission added the following segments to the 303(d) List for exceedances of the arsenic standard:

- Fountain Creek segment 1a, Mainstem (COARFO01a)
- Lower Arkansas segment 1b (COARLA01b)
- Lower Arkansas segment 1c (COARLA01c)
- Lower Arkansas segment 5a (COARLA05a)
- Lower Arkansas segment 5b (COARLA05b)
- Lower Arkansas segment 9a (COARLA09a)
- Middle Arkansas segment 3 (COARMA03)
- Middle Arkansas segment 9 (COARMA09)
- Upper Arkansas segment 2c (COARUA02c)
- Upper Arkansas segment 05, Colorado Gulch (COARUA05)
- Upper Arkansas segment 15 (COARUA15)
- North Fork of the Gunnison segment 4, Ruby Anthracite Creek (COGUNF04)
- Upper Gunnison segment 12, Coal Creek (COGUUG12)
- Lower Colorado segment 1, Colorado River from Roaring Fork confluence to confluence with Paradise Creek (COLCLC01)
- Lower Colorado segment 4c (COLCLC04c)
- Lower Colorado segment 10 (COLCLC10)
- Lower Colorado segment 15a (COLCLC15a)
- Lower Colorado segment 15c (COLCLC15c)
- Lower Yampa segment 3c, Stinking Gulch (COLCLY03c)
- White River segment 7, White River below Meeker (COLCWH07)
- White River segment 12 (COLCWH12)
- White River segment 14a, Piceance Creek (COLCWH14a)
- White River segment 20, Black Sulphur Creek (COLCWH20)
- White River segment 21 (COLCWH21)
- Closed Basin segment 2a, North Fork Carnero Creek and South Fork Carnero Creek (CORGCB02a)
- Closed Basin segment 2b, La Garita Creek (CORGCB02b)
- Closed Basin segment 2c (CORGCB02c)
- Closed Basin segment 4 (CORGCB04)
- Closed Basin segment 9b (CORGCB09b)
- Closed Basin segment 12a (CORGCB12a)
- Rio Grande segment 4b, South Fork Rio Grande to Del Norte (CORGRG04b)
- Rio Grande segment 4c (CORGRG04c)
- Rio Grande segment 09, North Branch of Pass Creek (CORGRG09)
- Rio Grande segment 11 (CORGRG11)
- Rio Grande segment 19 (CORGRG19)
- Bear Creek segment 2 (COSPBE02)
- Boulder Creek segment 2a (COSPBO02a)
- Boulder Creek segment 2b (COSPBO02b)
- Boulder Creek segment 3 (COSPBO03)
- Boulder Creek segment 4b (COSPBO04b)
- Boulder Creek segment 9 (COSPBO09)
- Boulder Creek segment 10 (COSPBO10)
- Boulder Creek segment 14, Barker Reservoir (COSPBO14)

- Big Thompson segment 1 (COSPBT01)
- Big Thompson segment 2 (COSPBT02)
- Big Thompson segment 3 (COSPBT03)
- Big Thompson segment 7, Buckhorn Creek and North Fork of Big Thompson (COSPBT07)
- Big Thompson segment 8 (COSPBT08)
- Cache la Poudre segment 2a (COSPCP02a)
- Cache la Poudre segment 6 (COSPCP06)
- Cache la Poudre segment 9 (COSPCP09)
- Cache la Poudre segment 10a (COSPCP10a)
- Cache la Poudre segment 10b (COSPCP10b)
- Middle South Platte segment 1b (COSPMS01b)
- Republican Basin segment 1 (COSPRE01)
- St. Vrain segment 2b (COSPSV02b)
- Saint Vrain segment 7, Boulder Reservoir (COSPSV07)
- Upper South Platte segment 2c, South Mosquito Creek (COSPUS02c)
- Upper South Platte segment 10a, East Plum Creek (COSPUS10a)
- Blue River segment 2c (COUCBL02c)
- Blue River segment 4a, Gold Run Gulch below Jessie Mine (COUCBL04a)
- Blue River segment 20, Spruce Creek (COUCBL20)
- Eagle River segment 2 (COUCEA02)
- Eagle River segment 5c (COUCEA05c)
- Eagle River segment 6 (COUCEA06)
- Eagle River segment 9a (COUCEA09a)
- Eagle River segment 9c (COUCEA09c)
- North Platte segment 1, South Fork Big Creek (COUCNP01)
- North Platte segment 4a, Illinois River, South Fork Big Creek and Snyder Creek (COUCNP04a)
- North Platte segment 4b, Illinois River (COUCNP04b)
- North Platte segment 5b (COUCNP05b)
- North Platte segment 09, Lake John and North Delaney Lake (COUCNP09)
- Upper Colorado segment 7a, Muddy Creek (COUCUC07a)
- Upper Colorado segment 7b, Muddy Creek (COUCUC07b)
- Upper Colorado segment 10c (COUCUC10c)
- Upper Colorado segment 12, Shadow Mountain Reservoir (COUCUC12)
- Yampa River segment 2a, Yampa River above Stagecoach Reservoir (COUCYA02a)
- Yampa River segment 2b (COUCYA02b)
- Yampa River segment 3, Little Morrison Creek and Gunn Creek (COUCYA03)
- Yampa River segment 15, Elkhead Creek (COUCYA15)

The Commission added the following segments to the M&E List for potential non- attainment of the arsenic standard:

- Middle Arkansas segment 11b (C)OARMA11b)
- Lower Arkansas segment 10, Adobe Creek Reservoir (COARLA10)
- Upper Arkansas segment 35 (COARUA35)
- Upper Arkansas segment 38, Skagway Reservoir (COARUA38)
- Lower Dolores segment 5, Mesa Creek and tributaries (COGULD05)
- Lower Colorado segment 2b, Humphrey Backwater area (COLCLC02b)
- Lower Colorado segment 14c (COLCLC14c)
- Lower Colorado segment 20, Rifle Gap Reservoir (COLCLC20)
- Bear Creek segment 11, Harriman Reservoir (COSPBE11)
- Cache la Poudre segment 7 (COSPCP07)
- Laramie segment 2a (COSPLA02a)
- Laramie segment 2b (COSPLA02b)
- Alamosa River segment 20 (CORGAL20)

- Rio Grande segment 37 (CORGRG37)
- Upper South Platte segment 12, Jackson Creek (COSPUS12)
- Blue River segment 12 (COUCBL12)
- Eagle River segment 9b (COUSEA09b)
- North Platte segment 4a, Grizzly Creek and Little Grizzly Creek (COUSNP04a)
- Upper Colorado segment 3, Lake Granby to Gore Canyon (COUCUC03)
- Upper Colorado segment 12, Willow Creek Reservoir (COUCUC12)
- Yampa River segment 18, South Fork of the Little Snake River (COUCYA18)
- Upper Gunnison segment 29a, Lake Fork of the Gunnison River Upstream of Cotonwood Creek (COGUUG29a)
- Yampa River segment 8, Lost Dog Creek (COUCYA08)

The Commission retained the following segments on the 303(d) List for exceedances of the arsenic standard:

- Upper Gunnison segment 09, Coal Creek (COGUUG09)
- Upper Gunnison segment 11, Elk Creek (COGUUG11)
- Upper Gunnison segment 11, Coal Creek (COGUUG11)
- Big Thompson segment 11 (COSPBT11)
- Cache la Poudre segment 14 (COSPCP14)
- Upper South Platte segment 3, Fourmile Creek (COSPUS03)
- Upper South Platte segment 3, Pine Creek (COSPUS03)
- Upper South Platte segment 14 (COSPUS14)
- Upper South Platte segment 17a, Berkeley Lake (COSPUS17a)

The Commission retained the following segment on the M&E List for exceedances of the arsenic standard:

• Upper South Platte segment 03, West Creek (COSPUS03)

The Commission retained the following segment on the M&E List for exceedances of the nitrite standard:

• Middle Arkansas segment 4a (COARMA04a)

The Commission added the following segment to the M&E List for exceedances of the nitrite standard:

• Lower Colorado segment 2b, Humphrey Backwater Area (COLCLC02b)

The Commission delisted the following segments as they are attaining the arsenic standard:

• Upper Arkansas segment 20, North Fork Wilson Creek below Independence Mine (COARUA20)

- Saint Vrain segment 4c (COSPSV04c)
- 11. Listings Due to Exceedances of the Total Phosphorus Standards

In May 2012, the Commission adopted nutrient control management regulations, as detailed in Regulation 85 and Regulation 31. Interim total nitrogen and total phosphorus values were included in Regulation 31, and as the Commission revises basin regulations, the interim value for total phosphorus is adopted as a numeric standard in waters upstream of domestic wastewater treatment facilities. A list of such dischargers has been included in each of the basin regulations. At the time of this hearing, the total phosphorus standard has been adopted in the upstream waters of the following basins: Upper Colorado, Lower Colorado, Arkansas, and Rio Grande.

For the 2016 303(d) Listing Methodology, the Commission outlined the assessment methodology for numeric nutrient standards. The ambient annual median is assessed against the numeric standard, with an allowable exceedance frequency of one in five years. If the annual median nutrient concentration exceeds the standard but fewer than five samples are available for a specific year, the segment should be included on the M&E until additional data can be collected.

The following segments have been included on the M&E list for exceeding the numeric total phosphorus standard but not meeting sample size requirements.

- Lower Colorado segment 4a (COLCLC04a)
- Closed Basin segment 2a, North Fork Carnero Creek (CORGCB02a)
- Closed Basin segment 2a, South Fork Carnero Creek (CORGCB02a)
- Closed Basin segment 2b, La Garita Creek (CORGCB02b)
- Closed Basin segment 2c (CORGCB02c)
- Closed Basin segment 12a (CORGCB12a)
- Rio Grande segment 11 (CORGRG11)
- Rio Grande segment 19 (CORGRG19)
- Rio Grande segment 20a (CORGRG20a)
- Rio Grande segment 20b (CORGRG20b)
- 12. Delisting of Segments with Recently Approved TMDLs

The Division submitted 11 TMDLs to EPA since the approval of the 2012 303(d) List that have been approved. The Commission has removed the following segments from the 303(d) List:

- Upper Arkansas segment 8b, Iowa Gulch: cadmium, lead, and zinc (COARUA08b)
- Lower Gunnison segment 9, Fruitgrowers Reservoir: dissolved oxygen (COGULG09)
- Alamosa segment 8, Terrace Reservoir: total recoverable iron (CORGAL08)
- La Plata segment 4a, East Mancos: copper and manganese (COSJLP04a)
- Middle South Platte segment 4, Barr Lake and Milton reservoir: pH and DO (COSPMS04)
- Saint Vrain segment 4a, Left Hand Creek from Hwy 72 to James Creek: copper, zinc, and pH (COSPSV04a)
- Saint Vrain segment 4b: copper and lead (COSPSV04b)
- Saint Vrain segment 4c: copper (COSPSV04c)
- 13. Delisting of Segments where Water Quality is Currently Meeting Standards

As additional water quality data is collected and assessed, new data may show attainment of the standards. The Commission removed the following segments and parameters from the 303(d) List due to attainment of current water quality standards:

- Fountain Creek segment 7a, Willow Springs Ponds #1 & #2: Aquatic life use (tetrachloroethylene fish tissue) (COARFO07a)
- Lower Arkansas segment 1a: selenium, sulfate (COARLA01a)
- Lower Arkansas segment 4a, Timpas Creek: total recoverable iron (COARLA04a)
- Lower Arkansas segment 7: selenium (COARLA07)
- Lower Arkansas segment 9b, Chicosa Creek: total recoverable iron, selenium (COARLA09b)
- Middle Arkansas segment 6a: selenium (COARMA06a)
- Middle Arkansas segment 14: selenium (COARMA14)
- Upper Arkansas segment 20, Wilson Creek below Independence Mine: arsenic (COARUA20)
- Upper Arkansas segment 40: dissolved oxygen (COARUA40)
- Lower Gunnison segment 9: dissolved oxygen (COGULG09)
- Upper Gunnison segment 29a, Lake Fork between Cooper and Silver Creeks: aquatic life (provisional) (COGUUG29a)

- Lower Colorado segment 10: selenium (COLCLC10)
- Lower Colorado segment 13b, Adobe Creek, Leach Creek: total recoverable iron (COLCLC13b)
- Lower Yampa segment 2: total recoverable iron (COLCLY02)
- Lower Yampa segment 5: selenium (COLCLY05)
- White River segment 14a, Willow Creek to Hunter Creek: total recoverable iron (COLCWH14a)
- Alamosa segment 3b, Alamosa River above Jasper Creek: cadmium (CORGAL03b)
- Alamosa segment 8, Terrace Reservoir: total recoverable iron (CORGAL08)
- Rio Grande segment 7, Nelson Creek, West Willow Creek below Nelson Creek to East Willow Creek: pH (CORGRG07)
- Rio Grande segment 37: dissolved oxygen (CORGRGR37)
- Big Dry segment 1: selenium (COSPBD01)
- Bear Creek segment 2, below Kipling Parkway: *E. coli* (COSPBE02)
- Bear Creek segment 5, Swede/Kerr Gulch: *E. coli* (COSPBE05)
- Big Thompson segment 2: cadmium, zinc, copper (from downstream of the UTSD discharge) (COSPBT02)
- Big Thompson segment 8: dissolved oxygen (COSPBT08)
- Big Thompson segment 9: copper (COSPBT09)
- Big Thompson segment 10, Big Hollow: selenium (COSPBT10)
- Cherry Creek segment 3: selenium (COSPCH03)
- Cherry Creek segment 3, Cherry Creek from Holly Street to the South Platte River: total recoverable iron (COSPCH03)
- Clear Creek segment 2b: cadmium (COSPCL02b)
- Clear Creek segment 6, Mad Creek: zinc (COSPCL06)
- Clear Creek segment 15: manganese (COSPCL15)
- Cache la Poudre segment 8: arsenic (COSPCP08)
- Cache la Poudre segment 10a: copper (COSPCP10a)
- Cache la Poudre segment 11: selenium (COSPCP11)
- Cache la Poudre segment 12: selenium (COSPCP12)
- Cache la Poudre segment 13a: selenium (COSPCP13a)
- Cache la Poudre segment 14: copper (COSPCP14)
- Middle South Platte segment 1b: selenium (COSPMS01b)
- Middle South Platte segment 7, Prospect Lake: dissolved oxygen (COSPMS07)
- Republican River segment 4: E.coli (COSPRE04)
- St. Vrain segment 2a: zinc (COSPSV02a)
- St. Vrain segment 2b: copper (COSPSV02b)
- St. Vrain segment 6: selenium (COSPSV06)
- Upper South Platte segment 17a, Duck Lake: dissolved oxygen (COSPUS17a)
- Upper South Platte segment 17b, Sloan's Lake: dissolved oxygen (COSPUS17b)
- Upper South Platte segment 23, Garfield and Huston Lakes: dissolved oxygen (COSPUS23)
- North Platte segment 4b, Illinois River: total recoverable iron (COUCNP04b)
- North Platte segment 9, Lake John: dissolved oxygen (COUCNP09)
- Upper Colorado segment 3, from 578 Rd Bridge to Blue River: manganese (COUCUC03)
- Yampa River segment 13d, Below Seneca sample location 8 (WSD5): selenium (COUCYA13d)

The Commission removed the following segments and parameters from the M&E List due to attainment of current water quality standards:

- Middle Arkansas segment 6a: uranium (COARMA06a)
- Middle Arkansas segment 6b: uranium (COARMA06b)
- Middle Arkansas segment 7b: copper, zinc (COARMA07b)
- Middle Arkansas segment 9: selenium (COARMA09)
- San Miguel segment 12a, Calamity Draw: dissolved oxygen (COGUSM12a)

- Lower Colorado segment 4a, Alkali Creek: *E. coli*, copper, total recoverable iron, lead, zinc (COLCLC04a)
- Lower Colorado segment 4c: copper and selenium (COLCLC04c)
- Lower Colorado segment 13b, Indian Wash: total recoverable iron (COLCLC13b)
- Lower Colorado segment 15a, Plateau Creek: selenium (COLCLC15a)
- Lower Yampa segment 3c, Stinking Gulch: copper, zinc (COLCLY03c)
- Lower Yampa segment 3c, Wilson Creek: selenium (COLCLY03c)
- Lower Yampa segment 18: *E.coli*, total recoverable iron, selenium (COLCLY18)
- White River segment 7, White River below Meeker: copper (COLCWH07)
- White River segment 9a, Strawberry Creek: copper, zinc (COLCWH09a)
- White River segment 23, East Douglas Creek: total recoverable iron (COLCWH23)
- White River segment 10b, Coal Creek below Ninemile Gulch: selenium (COLCWH10b)
- Closed Basin segment 9a, Squirrel Creek: cadmium, copper, zinc, total recoverable iron (CORGCB09a)
- Blue River segment 20, Spruce Creek: total recoverable iron (COUCBL20)
- Boulder Creek segment 1: lead, zinc (COSPBO01)
- Boulder Creek segment 2a: cadmium, copper (COSPBO02a)
- Boulder Creek segment 2b: cadmium, copper (COSPBO02b)
- Boulder Creek segment 3: cadmium, copper (COSPBO03)
- Boulder Creek segment 9: cadmium (COSPBO09)
- Boulder Creek segment 10: cadmium (COSPBO10)
- Boulder Creek segment 14, Boulder Reservoir: cadmium (COSPBO14)
- Big Thompson segment 2: sulfide (COSPBT02)
- Big Thompson segment 6, Dry Creek: E. coli (COSPBT06)
- Cherry Creek segment 6, Lollipop Lake: selenium (COSPCH06)
- Clear Creek segment 6, Mad Creek: pH (COSPCL06)
- Clear Creek segment 6, Hoop Creek: cadmium, lead, zinc (COSPCL06)
- Clear Creek segment 9a, Fall River: zinc, dissolved oxygen (COSPCL09a)
- Clear Creek segment 15: lead (COSPCL15)
- Cache la Poudre segment 6: copper (COSPCP06)
- Cache la Poudre segment 9: cadmium, lead (COSPCP09)
- Lower South Platte segment 3, Jackson Reservoir: selenium (COSPLS03)
- North Platte segment 1, South Fork Big Creek: copper, *E. coli* (COUCNP01)
- North Platte segment 4a, Little Grizzly Creek: *E. coli*, total recoverable iron (COUCNP04a)
- North Platte segment 4a, Grizzly Creek, Little Grizzly Creek: Aquatic Life Use (COUCNP04a)
- North Platte segment 4a, Lake Creek: pH (COUCNP04a)
- Roaring Fork segment 3a, Capitol Creek: selenium (COUCRF03a)
- Roaring Fork segment 10, Thompson Creek: total recoverable iron (COUCRF10)
- St. Vrain segment 13, Lake Thomas: dissolved oxygen (COSPSV13)
- Upper Colorado segment 10c, Fraser River: copper, lead (COUCUC10c)
- Upper Colorado segment 10c, from Town of Fraser to Colorado River: copper (COUCUC10c)
- Upper Colorado segment 10c, from Town of Tabernash to Town of Granby: lead (COUCUC10c)
- Upper South Platte segment 12, Jackson Lake: lead (COSPUS12)
- Upper South Platte segment 17a, Rocky Mountain Lake and Grasmere Lake: copper (COSPUS17a)
- Upper South Platte segment 17b, Sloan's Lake: total recoverable iron (COSPUS17b)
- Upper South Platte segment 23, Aqua Golf: total recoverable iron (COSPUS23)
- Yampa segment 2a, Yampa River below Stagecoach: selenium (COUCYA02a)
- Yampa segment 3, Little Morrison Creek: zinc, dissolved iron (COUCYA03)
- Yampa segment 3, Walton Creek: manganese (COUCYA03)
- Yampa River segment 13d, Dry Creek below Routt County Rd 53: lead and E.coli (COUCYA13d)

14. Delisting of Segments where Water Quality is Currently Meeting Ambient Based Standards

The Commission adopted a new assessment methodology in the 2016 Listing Methodology to evaluate ambient based standards. This methodology uses a statistical approach based on the concept of the confidence interval to minimize uncertainty of assessment conclusions. The following segments were delisted due to attainment of ambient based standards using the new assessment methodology for ambient based standards:

- Middle Arkansas segment 4a: selenium (COARMA04a)
- Middle Arkansas segment 6a: selenium (COARMA06a)
- 15. Listing of Segments where Water Quality is not Meeting Standards not identified above

The following segments or parameters were added to the 303(d) List due to exceedances of water quality standards not identified above:

- Fountain Creek segment 3b: copper (COARFO03b)
- Fountain Creek segment 4, Sand Creek: selenium (COARFO04)
- Lower Arkansas segment 1a, *E. coli* (COARLA01a)
- Lower Arkansas segment 9b, Big Sandy Creek: total recoverable iron (COARLA09b)
- Lower Arkansas segment 10, Nee Gronda: selenium (COARLA10)
- Lower Arkansas segment 12, Lake Meredith: selenium (COARLA12)
- Middle Arkansas segment 3: selenium (COARMA03)
- Middle Arkansas segment 14: total recoverable iron (COARMA14)
- Upper Arkansas segment 4a: copper (COARUA04a)
- Upper Arkansas segment 5, Lake Fork below Sugarloaf Dam: zinc (COARUA05)
- Upper Arkansas segment 5, Colorado Gulch: cadmium, copper, zinc (COARUA05)
- Upper Arkansas segment 12a: cadmium (COARUA12a)
- Uncompany segment 9, Imogene Creek: cadmium and zinc (COGUUN09)
- Lower Colorado segment 4a, Mamm Creek: total recoverable iron (COLCLC04a)
- Lower Colorado segment 4a, South Canyon Creek above Hot Springs: total recoverable iron (COLCLC04a)
- Lower Colorado segment 13b: total recoverable iron (COLCLC13b)
- Lower Colorado segment 14c, Roan Creek: total recoverable iron (COLCLC14c)
- Lower Yampa segment 3c, Wilson Creek: total recoverable iron (COLCLY03c)
- Lower Yampa segment 3c, Stinking Gulch: selenium (COLCLY03c)
- Closed Basin segment 3, Willow Creek: copper (CORGCB03)
- Closed Basin segment 12a: total recoverable iron (CORGCB12a)
- Rio Grande segment 2, South Clear Creek: total recoverable iron (CORGRG02)
- Rio Grande segment 4a: lead (CORGRG04a)
- Rio Grande segment 4c: copper (CORGRG04c)
- Rio Grande segment 7: cadmium, lead, zinc (CORGRG07)
- Rio Grande segment 9, North Branch of Pass Creek: zinc (CORGRG09)
- Big Dry Creek segment 1, Big Dry Creek downstream of Weld County Road 8: total recoverable iron (COSPBD01)
- Boulder Creek segment 2a, North Boulder Creek from Caribou Creek to the confluence with Como Creek: copper (COSPB002a)
- Boulder Creek segment 2a, Como Creek to the confluence of North Boulder Creek: total recoverable iron (COSPBO02a)
- Boulder Creek segment 2a, North Boulder Creek to confluence of Caribou Creek: copper and lead (COSPB002a)
- Boulder Creek segment 4a: copper (COSPBO04a)
- Boulder Creek segment 4b: copper (COSPBO04b)
- Boulder Creek segment 7b, below Rock Creek: selenium (COSPBO07b)
- Boulder Creek segment 9: *E. coli* (COSPBO09)
- Boulder Creek segment 10: pH (COSPBO10)

- Boulder Creek segment 14, Barker Reservoir: copper (COSPBO14)
- Big Thompson segment 2, from RMNP to above UTSD discharge: copper (CPSPBT02)
- Cherry Creek segment 2: chlorophyll and dissolved oxygen (COSPCH02)
- Cherry Creek segment 4a, Goldsmith Gulch: *E. coli* and selenium (COSPCH04a)
- Cherry Creek segment 4a, McMurdo Gulch: dissolved oxygen (COSPCH04a)
- Cherry Creek segment 4b, Upper Windmill Creek: selenium (COSPCH04b)
- Clear Creek segment 2c, Turkey Gulch below Rockford Tunnel: copper, nickel, total recoverable iron, zinc (COSPCL02c)
- Clear Creek segment 5, from Hoop Creek to confluence with Clear Creek: copper (COSPCL05)
- Clear Creek segment 6, Mad Creek: copper (COSPCL06)
- Clear Creek segment 6, North Empire Creek: copper (COSPCL06)
- Clear Creek segment 12a, Gilson Gulch and tributaries: cadmium, copper, nickel, lead, selenium and zinc (COSPCL12a)
- Clear Creek segment 12a, all tributaries except Gilson Gulch: cadmium, copper, and zinc (COSPCL12a)
- Clear Creek segment 15: ammonia (COSPCL15)
- Cache la Poudre segment 11: E. coli (COSPCP11)
- Cache la Poudre segment 13b: *E. coli* (COSPCP13b)
- Laramie segment 2b: copper (COSPLA02b)
- Lower South Platte segment 1: uranium (COSPLS01)
- Lower South Platte segment 3, North Sterling: dissolved oxygen and selenium (COSPLS03)
- Middle South Platte segment 1b: *E. coli* (COSPMS01b)
- St. Vrain segment 3: E. coli (COSPSV03)
- St. Vrain segment 5, Left Hand Creek: pH (COSPSV05)
- St. Vrain segment 6, Dry Creek: selenium (COSPSV06)
- Upper South Platte segment 2c, South Mosquito Creek: cadmium (COSPUS02c)
- Upper South Platte segment 3, Trout Creek and tributaries: dissolved oxygen and pH(COSPUS03)
- Upper South Platte segment 5b, Geneva Creek: pH(COSPUS05b)
- Upper South Platte segment 10a, Plum Creek: *E. coli*(COSPUS10a)
- Upper South Platte segment 16c: *E. coli*(COSPUS16c)
- Upper South Platte segment 16i: *E. coli*(COSPUS16i)
- Upper South Platte segment 16i, Sand Creek from Westerly Creek to the South Platte River: selenium (COSPUS16i)
- Upper South Platte segment 17a, Rocky Mountain Lake: dissolved oxygen (COSPUS17a)
- Upper South Platte segment 17a, Smith Lake: pH (COSPUS17a)
- Upper South Platte segment 17a, Grasmere Lake: ammonia (COSPUS17a)
- Upper South Platte segment 23, Garfield Lake: dissolved oxygen (COSPUS23)
- Upper South Platte segment 23, Aqua Gulf: pH (COSPUS23)
- Upper South Platte segment 23, Parkfield Lake: pH (COSPUS23)
- Blue River segment 2a, above South Barton Gulch: zinc (COUCBL02a)
- Blue River segment 4a, Gold Run Gulch below Jessie Mine: zinc (COUCBL04a)
- Blue River segment 4a, Meadow Creek: copper (COUCBL04a)
- Blue River segment 6a: zinc (COUCBL06a)
- Blue River segment 12: zinc (COUCBL12)
- North Platte segment 4a, Snyder Creek: total recoverable iron (COUCNP04a)
- North Platte segment 9, Lake John: pH (COUCNP09)
- Upper Colorado segment 2, north inlet to Grand Lake: copper (COUCUC02)
- Upper Colorado segment 10a, Vasquez Creek: copper (COUCUC10a)
- Yampa segment 3, Little Morrison Creek: total recoverable iron (COUCYA03)
- Yampa segment 3, Gunn Creek: zinc (COUCYA03)
- Yampa segment 13h: selenium (COUCYA13h)

The following segments or parameters were added to the M&E List due to exceedances of water quality standards not identified above:

• Fountain segment 4, Little Fountain Creek below Deadman Canyon: selenium (COARFO04)

- Lower Arkansas segment 3a: *E. coli* (COARLA03a)
- Lower Arkansas segment 7: *E. coli* (COARLA07)
- Lower Arkansas segment 9a, Adobe Creek: total recoverable iron (COARLA09a)
- Lower Arkansas segment 12, Lake Henry: total recoverable iron (COARLA12)
- Middle Arkansas segment 11b: total recoverable iron (COARMA11b)
- Upper Arkansas segment 5, Lake Fork below Sugarloaf Dam: cadmium (COARUA05)
- Upper Arkansas segment 5, Colorado Gulch: silver, lead (COARUA05)
- Upper Gunnison segment 29a, Lake Fork of the Gunnison upstream of Cottonwood Creek: zinc and cadmium (COGUUG29a)
- Uncompany segment 9, Imogene Creek: copper (COGUUN09)
- Lower Colorado segment 3: selenium (COLCLC03)
- Lower Colorado segment 4e: total recoverable iron, copper, selenium and cadmium (COLCLC04e)
- Lower Colorado segment 13a, Sulphur Gulch: total recoverable iron, copper and lead (COLCLC13a)
- Lower Colorado segment 16: total recoverable iron (COLCLC16)
- Lower Yampa segment 3c, Wilson Creek: selenium (COLCLY03c)
- Lower Yampa segment 3e: selenium (COLCLY03e)
- White River segment 7, White River below Meeker: total recoverable iron (COLCWH07)
- Alamosa River segment 10: total recoverable iron (CORGAL10)
- Alamosa River segment 12: total recoverable iron (CORGAL12)
- Closed Basin segment 3, Cottonwood Creek: copper (CORGCB03)
- Closed Basin segment 3, Major Creek: total recoverable iron (CORGCB03)
- Closed Basin segment 5: copper (CORGCB05)
- Closed Basin segment 10, Sand Creek: copper (CORGCB10)
- Closed Basin segment 12a, Ford Creek: cadmium and zinc (CORGCB12a)
- Rio Grande segment 3: total recoverable iron (CORGRG03)
- Rio Grande segment 9, North Branch of Pass Creek: copper (CORGRG09)
- Rio Grande segment 25: copper (CORGRG25)
- Rio Grande segment 28, Upper Rito Seco below Battle Mountain: copper (CORGRG28)
- Rio Grande segment 33, Alberta Park: silver (CORGRG33)
- Rio Grande segment 38, Road Canyon: silver (CORGRG38)
- Boulder Creek segment 14, Barker Reservoir: silver (COSPBO14)
- Big Thompson segment 5: *E. coli* (COSPBT05)
- Big Thompson segment 10: dissolved oxygen (COSPBT10)
- Clear Creek segment 3b: cadmium (COSPCL03b)
- Clear Creek segment 6, North Empire Creek: cadmium, total recoverable iron, zinc (COSPCL06)
- Clear Creek segment 12a, Gilson Gulch and tributaries: pH (COSPCL12a)
- Clear Creek segment 12a, all tributaries except Gilson Gulch: dissolved oxygen (COSPCL12a)
- Clear Creek segment 14b: ammonia (COSPCL14b)
- Clear Creek segment 17b: *E. coli* (COSPCL17b)
- Cache la Poudre segment 7: silver (COSPCP07)
- Cache la Poudre segment 9: pH (COSPCP09)
- Cache la Poudre segment 12: pH (COSPCP12)
- St. Vrain segment 2b: silver(COSPSV02b)
- Upper South Platte segment 1a, Middle South Platte: pH (COSPUS01a)
- Upper South Platte segment 3, West Creek: total recoverable iron, dissolved oxygen (COSPUS03)
- Upper South Platte segment 23, Aqua Gulf: ammonia (COSPUS23)

- Upper South Platte segment 23, Harvey Lake: total recoverable iron (COSPUS23)
- Blue River segment 4a, Meadow Creek: zinc (COUCBL04a)
- Blue River segment 12: copper (COUCBL12)
- North Platte segment 4a, Illinois River: copper (COUCNP04a)
- North Platte segment 5b: copper (COUCNP05b)
- North Platte segment 6: copper (COUCNP06)
- Roaring Fork segment 2: copper (COUCRF02)
- Upper Colorado segment 8, below Kinney: copper (COUCUC08)
- Yampa segment 13j: selenium (COUCYA13j)
- 16. Site-specific decisions made by the Commission are discussed below.
 - a. Segments COARF001a, COARF002a, COARF002b, COARF003a COARF004 and COARF006 Waldo Canyon Fire and Storm Events

The Arkansas Fountain Coalition for Urban River Evaluation ("AF CURE") raised sitespecific issues with listing segments that are within the geographic area that was affected by the Waldo Canyon Fire in 2012 and with using samples that are collected during or soon after storm events.

Data collected after the Waldo Canyon Fire was appropriately used to assess segments COARF001a, COARF002a, COARF002b, COARF003a COARF004 and COARF006. Any variability in data was alleviated through application of the nonparametric statistical analysis as included in the Listing Methodology; removal of data that was collected by USGS as part of a special study specifically looking at the effects of the fire; or by comparing attainment of water quality standards before and after the fire event, and where available listing those segments on the 303(d) list that were out of attainment prior to the fire event and out of attainment after the fire event (segments that were in attainment prior to the fire event were listed on the M&E list). Additionally, the Commission was uncertain whether two years is a sufficient period of time for macroinvertebrate communities to recover from the impacts of sedimentation that result from forest fires, and the time may vary based on the proximity to the fire, the amount of water flowing through the waterway, and other factors. The Commission anticipates that the next iteration of the Listing Methodology will address the complexity of listing fire, flood, or other catastrophic event impacts on streams to provide further guidance for these types of decisions, and also acknowledges that there may be many case specific determinations.

Condition Prior to Fire	Condition After Fire	Recommended Listing
Out of Attainment	Out of Attainment	List on 303(d) List
In Attainment	Out of Attainment	List on M & E List
Out of Attainment	In Attainment	Do not list

Based on USGS standard operating procedure, the Commission determined that sampling should not be conducted for four weeks following a significant flushing event. However, the data on the record for these segments was collected outside of the four week window, and therefore was appropriately included in the assessment.

b. Portion of segment COSPCL03a (South Clear Creek downstream of Lower Cabin Creek Reservoir to Clear Lake) - Category 4b Plan for Nonattainment of the Aquatic Life Use

Public Service Company of Colorado (PSCo) submitted a Category 4b Demonstration Plan (the Plan) to the Division for Clear Creek segment 3a in the South Platte River Basin, for the portion of the segment of South Clear Creek downstream of Lower Cabin Creek Reservoir to Clear Lake. Category 4b is an alternative to listing an impaired segment on the 303(d) list. A Category 4b Demonstration Plan, when implemented, must ensure attainment of all applicable water quality standards through pollution control mechanisms within a reasonable time period. The Plan was accepted by the U.S. Environmental Protection Agency prior to the rulemaking hearing. The Commission approved Public Service Company of Colorado's Category 4b Plan for segment COSPCL03a (South Clear Creek downstream of Lower Cabin Creek Reservoir to Clear Lake) and as a result, the Commission did not include Clear Creek segment 3a, South Clear Creek downstream of Lower Cabin Creek Reservoir to Clear Lake, on the 303(d) List for the aquatic life use, for which the Category 4b Demonstration Plan was written. PSCo will provide updates on the implementation of the Plan to the Commission in future 303(d) rulemaking hearings. The Commission expects that after a reasonable period of time as defined in the Category 4b Demonstration Plan, the aquatic life use be reexamined on this portion of Clear Creek segment 3a. If the aquatic life use is not attained by this time, the segment will be considered impaired and placed on the 303(d) List.

c. Segment COLCLC03 – Chronic Aquatic Life Use-based Selenium Standard

In 2012, the Commission removed Lower Colorado segment 3 from the 303(d) List for selenium impairment due to attainment of standards. At that time, USFWS opposed its removal from the list because the segment is critical habitat for the endangered Colorado pike minnow and razorback sucker. The Commission acknowledged the significance of this issue and recommended USFWS pursue an alternative standard in the next Colorado basin rulemaking; however, USFWS did not submit a proposal in 2014. In this rulemaking there was consensus that the acute selenium standard was attained; however, there was disagreement among the parties regarding whether the chronic selenium standard is attained due to uncertainty regarding the representativeness of a portion of the data set used in the assessment.

During 2012-2014, EPA and USFWS collected samples in segment 3 targeting critical habitat for the endangered fish. These samples were collected during low-flow periods from August to October. Colorado River Water Conservation District and the Colorado Stone, Sand and Gravel Association disagreed about whether the tributary-influenced sample locations and time periods are representative of conditions in the mainstem. Specifically, these parties argued that the majority of the data comes from poorly mixed sites located downstream of tributaries, and therefore is not representative of the spatial and temporal variability.

When the Commission adopts a standard it applies to the entire segment including areas of the segment that are under the influence of tributaries. The Listing Methodology excludes data collected within the mixing zone of a discharge (as defined by Regulation 31), however it does not exclude data collected at the confluences of tributaries and river mainstems. Because selenium bio-accumulates in fish, the chronic selenium standard is designed to protect fish from cumulative life-long exposure. The default from the Listing Methodology is that data from the entire segment (including data at the confluences) is representative because the data represents the levels of selenium that aquatic food chain is exposed to through the segment.

However, where a sampling study targets a particular constituent in a portion of a segment, the data from that study may be skewed and may not be representative of the spatial and temporal nature of the whole segment. Here the Commission determined that it is unclear whether the data collected in the EPA and USFWS's study was representative of the entire segment, and therefore included segment 3 (COLCLCO3) on the 2016 M&E List for selenium.

The River District and the Colorado Stone Sand and Gravel Association have agreed to work with the Division, the Selenium Task Force, and other stakeholders to evaluate whether an alternative approach to a TMDL may be a more effective approach to achieving load reductions

d. COUCEA05c – Upstream Sources of Loading

Segment 5c on the Eagle River is located downstream of the Eagle Mine superfund site with a history of being impacted by the mine. Remedial activities conducted at the Eagle Mine superfund site beginning in the late 1980s resulted in reductions in metals loading and improved water quality in the Eagle River in the vicinity of the superfund site.

At the 2005 Regulation No. 33 rulemaking hearing (Reg. 33 RMH), the Commission adopted resegmentation of Eagle River segment 5 into segments 5a, 5b, and 5c, based on recognized changes in water quality, hardness, and use. In this rulemaking hearing, the Commission placed segment 5c on the 303(d) list for dissolved iron and total recoverable arsenic. Although it was argued that the upstream segments (segments 5a and 5b) should also be included on the 303(d) list as the primary source of contamination in segment 5c, segments 5a and 5b were not included in the Notice for this Rulemaking. The Commission finds that data collected in segment 5c which consisted of 123 total arsenic values with lower detection limits were representative of water quality conditions. The majority of data submitted to assess segments 5a and 5b, however, used a reporting limit of 15 ug/L for the water quality standard of 0.02 ug/L, and all such data were reported as non-detect (43 of the 65 values for segment 5a, and 79 of the 98 values for segment 5b). It is the Commission's intent that TMDLs for this segment 5c will consider upstream sources of loading occurring in the Eagle River as is the division's typical practice for TMDL development.

e. COUCNP04b – Total Recoverable Iron

Jackson County Water Conservancy District (District) proposed to remove the Illinois River (COUCNP04b) from the 303(d) List for total recoverable iron. The division assessed total recoverable iron for the Illinois River portion of the segment. After locational issues with sampling sites were resolved, the division concluded that the segment was in attainment of the total recoverable iron standard. The 50th percentile of the 10 total recoverable iron values for the portion was found to be 746 ug/L, a value less than the aquatic life standard of 1000 ug/L. Therefore, the data supported delisting of this portion and the Commission removed this segment from the 303(d) List for total recoverable iron.

f. COSPUS06a – Aquatic Life

Several parties raised issues with the representative nature of the aquatic life data for Upper South Platte segment 6a. Specifically they state that one data point is not enough to make a listing decision, that the location of the data point collected was not representative of the segments and that the 2003 EPA Standard Operating Procedure (SOP) for collecting benthic macroinvertebrate samples were not used. All of these issues are inconsistent with the Listing Methodology. The Listing Methodology establishes the standard procedure for collecting macroinvertebrate data, which is the procedure established in Policy 10-1. The Commission reiterates that one data point is sufficient to include or remove a segment on the 303(d) List. Appendix B of the Listing Methodology ensures that samples are collected in stream reaches that are representative but does not necessarily prohibit sampling near areas of human disturbance. The Commission determined that both stations used in the assessment of segment 6a are located at a substantial and sufficient distance upstream from the nearest road or bridge crossing, which in this instance is a highway. Finally, the Commission determined that following the procedures in Policy 10-1 is the appropriate methodology, or standard operating procedure for collecting macroinvertebrate data.

The Commission determined that the data was representative and that segment 6a should be included on the 303(d) List provisionally. The Commission directs the division and interested parties to study this segment to determine the stressors and pollutants that are impacting aquatic life in this segment.

g. Indian Reservations

The Commission intends that the list of water quality-limited segments requiring total maximum daily loads shall apply to waters within the external boundaries of the Southern Ute Indian Reservation only to the extent that the state has jurisdiction, and is not attempting to resolve that jurisdictional issue here.

h. COSPUS10a E. coli

Chatfield Watershed Authority will continue its proactive monitoring program, including current *E. coli* data collection efforts. The Authority is in the early stages of the data analysis and interpretation. Any potential control measures will be based on data and science.

i. COSPUS16h – Selenium in Toll Gate Creek, East Toll Gate Creek and West Toll Gate Creek

Toll Gate Creek, East Toll Gate Creek, and West Toll Gate Creek are meeting adopted ambient selenium standards. Toll Gate Creek, East Toll Gate Creek, and West Toll Gate Creek were resegmented from Upper South Platte segment 16c to segment 16h at the 2008 Temporary Modifications RMH but never formally delisted from the 303(d) List.

j. COUCNP04a – Sand Creek

State Line Ranch submitted a proposal as part of written public comment proposing that Sand Creek be listed as impaired for sediment due to impacts to a beneficial use. While the Commission found the evidence submitted to be persuasive and compelling evidence of impairment, the Commission was reluctant to list the segment as impaired in this hearing for a number of reasons. One reason was that the proposal was made late in the process and therefore the Division had not had an opportunity to thoroughly review and evaluate the proposal. In addition, potentially affected parties, such as the BLM and the affected local community, were not able to participate in the process. Also, because this would be the first time a segment would be listed for sediment impairing a beneficial use, the Commission would like to proceed thoughtfully to establish appropriate precedent about the factors to be considered in such a decision. Therefore, the Commission included the segment on the M&E List. A proposal may be made for a special hearing to consider this proposal, or that it may be proposed to be included on the 303(d) List as part the next 303(d) listing cycle.

93.16 STATEMENT OF BASIS, SPECIFIC STATUTORY AUTHORITY AND PURPOSE; AUGUST 2016 RULEMAKING, FINAL ACTION OCTOBER 11, 2016, EFFECTIVE DATE OF NOVEMBER 30, 2016

The provisions of C.R.S. 25-8-202(1)(a), (b) and (i), (2) and (6); 25-8-203; 25-8-204; and 25-8-401; provide the specific statutory authority for adoption of these regulatory amendments. The Commission also adopted in compliance with 24-4-103(4) C.R.S. the following statement of basis and purpose.

BASIS AND PURPOSE

- A. Revisions to 303(d) List
- 1. Introduction

This regulation updates Colorado's List of Water-Quality-Limited Segments Requiring Total Maximum Daily Loads (TMDLs) to reflect additional water quality information available since the Regulation was last updated. This change was prepared to fulfill section 303(d) of the federal Clean Water Act (Act) which requires that states submit to the U.S. Environmental Protection Agency (EPA) a list of those waters for which technology-based effluent limitations and other required controls are not stringent enough to implement water quality standards.

2. List Development

a. Listing Methodology

The Section 303(d) Listing Methodology - 2016 Listing Cycle ("Listing Methodology") provides the listing process, the criteria for listing, and the criteria for determination of TMDL priority. The Listing Methodology was developed through a public process and finalized as a policy at a Water Quality Control Commission (Commission) administrative action hearing in March 2015.

This Listing Methodology sets forth the criteria that generally were used to make decisions regarding which waters to include on the 2016 Section 303(d) List and the 2016 M&E List. However, this methodology was not adopted by the Commission as a rule. The Commission therefore has the flexibility to take into account other appropriate factors in making site-specific listing decisions.

b. Information Considered

To determine whether Sand Creek, a portion of segment COUCNP04a, should be included on the 303(d) List rather than the M&E List, the Commission considered existing and readily available data, which includes the data used to prepare the identification processes, calculations and models referenced in 40 CFR §130.7(a)(5)(i), (ii) and (iv), and data that was presented by Cody Resources LP/State Line Ranch.

3. Sand Creek, a Portion of Segment COUCNP04a

Cody Resources LP/State Line Ranch proposed that Sand Creek be listed as impaired for sediment due to impacts to a beneficial use at the Commission's December 2015 303(d) Rulemaking. The Commission, however, placed Sand Creek on the Monitoring & Evaluation List effective March 1, 2016 based on the State Line Ranch's proposal submitted as part of written public comment. While the Commission found the evidence submitted to be persuasive and compelling evidence of impairment, the Commission was reluctant to list the segment as impaired because the proposal was made late in the process and the Division had not had an opportunity to review and evaluate the proposal. In addition, potentially affected parties were not able to participate in the process. This was the first time a segment has been listed for sediment impairing a beneficial use, and so the Commission wanted to proceed thoughtfully to establish precedent about the factors considered in such a decision. The Commission, however, stated that a proposal could be made for a special hearing to consider the sediment listing proposal. State Line Ranch subsequently requested and the Commission granted and scheduled this special hearing.

In support of listing Sand Creek as impaired, State Line Ranch submitted engineering reports prepared by Hydros Consulting, work logs from the Ranch's irrigator, and presented testimony of the Ranch President and Ranch Manager. The Commission found that Hydros appropriately analyzed the four factors required to find sediment impairment using Policy 98-1, and that State Line Ranch established with clear and convincing evidence:

- 1. The represented expected condition in terms of sediment deposition for Sand Creek;
- 2. The actual observed sediment condition for Sand Creek is significantly different than the expected condition;
- 3. The sediment is attributable to an anthropogenic source, which is Off-Highway Vehicle use at North Sand Hills;
- 4. There is a beneficial irrigation use at State Line Ranch to which the excess sediment is a determent.

The Commission has accordingly updated Colorado's List of Water-Quality-Limited Segments to move Sand Creek, a portion of Segment COUCNP04a, onto its 303(d) list from its M&E list.

The Commission considered the Division's recommendation to establish quantitative benchmarks to assess conditions on Sand Creek for future listing/delisting decisions. The Commission adopted the benchmarks proposed by Cody Resources/State Line Ranch:

- 1. Reduction in Sand Deposition in Blankenship Meadow State Line Ranch has and is now experiencing the formation of long sediment "fingers" in the meadow. The extent of these "fingers" should be quantified each year on the same date and compared to previous years. Quantification could occur using LandSat imagery (based on sand-related parameters such as emissivity and albedo measurements) and / or on-the-ground field measurements. This benchmark would seek to verify that sand deposition in the meadow is no longer increasing and quantify a return to pre-2011 conditions when sand deposition was not inundating additional meadowlands.
- 2. Return to Historical Maintenance Activities Historical irrigation activities at State Line Ranch did not include the use of heavy equipment such as excavators or backhoes. This benchmark would track whether and when the Ranch could consistently return to those practices.

For both of these recommended benchmarks, the period of assessment will need to cover several years (due to movement of existing sediment downstream and past the headgate) and include years with wet hydrologic conditions. The Commission anticipates that the Division will work with Cody Resources/State Line Ranch to implement these benchmarks because this is the first instance in which the Commission has applied Section V of Policy 98-1 since it made revisions in November 2014.

The Commission recommends that the Bureau of Land Management evaluate the impacts of off highway vehicle use in the North Sand Hills Special Recreational Management Area to water quality and sediment impairment during the next update to the Kremmling Resource Management Plan and any related Environmental Impact Statement.

PARTIES TO THE RULEMAKING HEARING

1. Cody Resources, LP/State Line Ranch

93.15 STATEMENT OF BASIS, SPECIFIC STATUTORY AUTHORITY AND PURPOSE; DECEMBER 2017 RULEMAKING, EFFECTIVE DATE OF MARCH 1, 2018

The provisions of C.R.S. 25-8-202(1)(a), (b) and (i), (2) and (6); 25-8-203; 25-8-204; and 25-8-401; provide the specific statutory authority for adoption of these regulatory amendments. The commission also adopted in compliance with 24-4-103(4) C.R.S. the following statement of basis and purpose.

BASIS AND PURPOSE

A. Revisions to 303(d) List

1. Introduction

This regulation updates Colorado's List of Water-Quality-Limited Segments Requiring Total Maximum Daily Loads (TMDLs) to reflect additional water quality information available since the Regulation was promulgated in 2006. This list was prepared to fulfill section 303(d) of the federal Clean Water Act (Act) which requires that states submit to the U.S. Environmental Protection Agency (EPA) a list of those waters for which technology-based effluent limitations and other required controls are not stringent enough to implement water quality standards.

This regulation also updates Colorado's Monitoring and Evaluation List (M&E List) to reflect additional water quality information available since the Regulation was promulgated in 2012.

For the draft proposal of the 2018 Regulation #93, the format of the 303(d) and M&E List tables was changed substantially. The division developed a new format generated directly from the state's assessment tracking database (ATTAINS). The new 303(d) and M&E tables can be directly linked to the state's GIS segmentation layer and the standard's database. This new format will streamline the development of the 303(d) and M&E Lists throughout the hearing process by eliminating the need to track and change listings in two places (an assessment database and a Word table). The new format will also allow for queries and reports to be easily generated and will make for efficient and accurate reporting to EPA at the conclusion of each listing cycle as well as an automated generation of the Integrated Report.

The division studied 303(d) lists from many other states to come up with the new format. The division modeled the new tables after the State of Virginia's 303(d) List. In speaking with staff from Virginia, the division learned about the efficiencies associated with using a format generated out of the tracking database and decided that Colorado should use a similar model.

2. List Development

a. Listing Methodology

The "Section 303(d) Listing Methodology - 2018 Listing Cycle" contains a description of the listing process, the criteria for listing, and the criteria for determination of TMDL priority. The Listing Methodology was developed through a public process and finalized as a policy at a Water Quality Control Commission (commission) administrative action hearing in March 2017.

This Listing Methodology sets forth the criteria that generally were used to make decisions regarding which waters to include on the 2018 Section 303(d) List and the 2018 M&E List. However, this methodology was not adopted by the commission as a rule. The commission therefore has the flexibility to take into account other appropriate factors in making site-specific listing decisions.

b. Information Considered

The commission considered all existing and readily available information in developing the 2018 Section 303(d) List. In determining whether data and information are existing and readily available, it has taken into account such data and information as the division has utilized in the preparation of those identification processes, calculations and models referenced in 40 CFR §130.7(a)(5)(i), (ii) and (iv) and that credible data and information presented in a readily usable format and submitted in reports provided to the division as referenced in 40 CFR §130.7(a)(5)(ii). In addition, the commission accepted credible data and information that was submitted in accordance with the listing process schedule, whether submitted by EPA or any other interested party. The division also independently collected and analyzed new data on a rotating basin basis as part of its triennial review efforts. This data and information was utilized in making listing proposals. Existing data which was not brought forward through one of the above mechanisms or otherwise presented to the commission in accordance with the schedule was not treated as "readily available" for purposes of making the 2018 listing decisions. The commission determined that such information will be considered in the next listing cycle.

c. Data Quality

In the division's "Quality Management Plan 2016 for Surface Water Monitoring and Assessment", the division states that "It is the expressed goal of the division to use only those analytical data that are both reliable and have a defined level of quality."

3. Prioritization

The objective of prioritization is to identify those segments where the division and the public should concentrate their resources. Priorities of High, Medium and Low were established according to section VI. of the 2018 Section 303(d) Listing Methodology.

The division is directed to establish a plan for monitoring and evaluating water bodies on the M&E List prior to the next listing cycle. Further, the commission has committed to determining their appropriate status (as either impaired or fully supporting) within ten years of their placement on the M&E List.

4. Impaired Segments Not Requiring TMDLs

Below the 303(d) and M&E Lists, the regulation includes a table in Section 93.4 with waterbodies that are impaired but that do not require a TMDL. A TMDL may not be required for three main reasons: a TMDL has already been completed but uses are not yet attained; there is a required control mechanism in place that is expected to address all segment-pollutant combinations and will attain water quality standards in a reasonable period of time; or it has been determined that the impairment is not caused by a pollutant.

5. Listings Due to Exceedances of the Temperature Standards

In 2016, the commission adopted a new definition of existing quality for temperature which specifies a 1 in 3 year average recurrence frequency of a "warming event". The 2018 303(d) Listing Methodology defines an allowable cumulative impact during this once in three year period. This method relies on the concept of "degree-days" which integrates both the magnitude of temperatures over the standard, as well the duration, in days, experienced by the aquatic community. Temperature excursions (air, low flow and shoulder season) are evaluated after the warming event is considered. If temperatures exceed the number of 'degree-days' specified, and the dates that exceed temperature standards do not have applicable excursions, the segment is placed on the 303(d) List as impaired for temperature.

The party proposing a temperature listing is responsible for investigating the temperature excursions as defined in Regulation No. 31, Footnote 5c, Table 1. This footnote includes three allowable excursions to exceedances of the temperature standard. These include an air temperature excursion, a low flow excursion and a winter shoulder season excursion. For the 2018 listing cycle, the division analyzed water temperature data from more than 68 stations in more than 43 segments. In cases where the excursions were evaluated and exceedances of the temperature standards remained, the commission included these segments on the 303(d) List. In cases where the excursions were not fully evaluated and exceedances of the temperature standards remained, these segments on the M&E List.

6. Listings Due to Exceedances of the Secondary Water Supply Standards

For the secondary water supply standards of dissolved iron, dissolved manganese and sulfate, the less restrictive of the following two options apply as the numeric standard: existing quality as of January 1, 2000 or the table value criteria in Regulation No. 31, Tables II and III. For dissolved iron, the table value standard (TVS) is 300 ug/I. For dissolved manganese, the TVS is 50 ug/I. For sulfate, TVS is 250 mg/I.

For the 2016 303(d) Listing Methodology, the commission included additional language regarding the determination of existing quality from the year 2000. This includes a minimum data requirement and the ability to use data collected after the year 2000 when characterizing existing quality from 2000. The utilization of data collected past the year 2000 is contingent upon there being no known new or increased sources of these parameters in the segment being assessed since 2000.

The following table summarizes the values that were used for the assessment of dissolved iron, manganese and sulfate for those waterbodies being proposed for the 303(d) or M&E List:

Portion ID	Analyte	List	TVS or 2000	Period of Record for 2000 dataset	Value	Units	Sample size of 2000 dataset
COARFO02a_A	Fe-D	303(d)	TVS		300	ug/L

7. Delisting of Segments with Recently Approved TMDLs

The division submitted 3 TMDLs to EPA since the approval of the 2016 303(d) List that have been approved. The commission has removed the following segments from the 303(d) List:

- COARMA18a Mainstem of Boggs Creek from the source to Pueblo Reservoir (Selenium, Uranium)
- COSPBD01 Mainstem of Big Dry Creek, including all tributaries and wetlands, from the source to the confluence with the South Platte River (E. coli)
- COSPUS15 South Platte, Burlington Ditch to Big Dry Creek (E. coli)
- 8. Segments with TMDLs Currently under EPA Review:
 - COARMA04a Mainstem of Wildhorse Creek from the source to the confluence with the Arkansas River (E. coli).

9. Delisting of Segments Where Water Quality is Currently Meeting Standards

As additional water quality data are collected and assessed, new data may show attainment of the standard. The commission removed the following segments and parameters from the 303(d) List due to a recent assessment of water quality data:

Table 2. Water Bodies Removed from 303(d) List					
Assessment Unit ID	Parameter	Assessment Unit ID	Parameter		
COARFO03b_A	Dissolved copper	COGUSM12b_H	Temperature

- 11. Site-specific decisions made by the commission are discussed below.
 - a) COUCEA09a_B Sediment

Eagle River Water and Sanitation District proposed that a portion of the Eagle River from Berry Creek to Squaw Creek be removed from the 303(d) List for a few reasons. In this portion, the gradient of the Eagle River flattens and as flow velocities decrease the river channel and floodplain broaden. Under the Sediment Policy 98-1, Sediment Region 3 for mid-elevation mountain streams include slopes that range from 0.4% to 10%, with percent fines that range from 9% to 41%. The questionable area for this portion has a slope of 0.12 %, which is below the range of slopes used to establish the expected condition of Sediment Region 3. The portion of Segment 9a above the deposition zone (Segment 9a from Gore Creek to Berry Creek), and Segment 9b downstream of the deposition zone (Squaw Creek to Rube Creek), have stream slopes within the slope ranges for Sediment Region 3 and attain the TIVSED and percent fines for Sediment Region 3. Therefore the increased sediment is limited to the low gradient depositional zone. The division recommended not to use the thresholds in Sediment Region 3 for the lower slope depositional zone and therefore based on data upstream and downstream that show attainment, the commission decided to remove segment COUCEA09a B from the 303(d) List as impaired for sediment.

b) COGULD02 – Temperature

The division proposed that the Dolores River from Big Gypsum Creek to the San Miguel River (COGULD02) be placed on the 303(d) List due to exceedances in the aquatic life use based temperature standards. The Dolores Water Conservancy District (DWCD) raised an issue regarding whether the cause of the temperature impairment had been considered and whether the waterbody should be placed into Category 4c instead of the 303(d) List. When reviewing the topic of Category 4c in the 2018 Listing Methodology, some inconsistent language was noticed between Regulation #93 and the 2018 Listing Methodology. The introduction in Regulation #93 states that "Water bodies that are impaired, but it is unclear whether the cause of impairment is attributable to pollutants as opposed to pollution, are also placed on the Monitoring and Evaluation List." The 2018 303(d) Listing Methodology states that "Before placing impaired waterbody segments into Category 4c, thorough monitoring and assessment needs to be performed on the segment to confirm that no pollutants are contributing to the waterbody's failure to meet water quality standards. If adequate monitoring and assessment is not performed to rule out pollutant(s) as a cause, then the impaired waterbody should be placed on the 303(d) List (Category 5)".

The most recent policy decisions that relate to impairment decisions for temperature are reflected in the Listing Methodology and not Regulation #93. However, the division recognizes that where there is a conflict between the regulation and the listing methodology, the language in the regulation would prevail and must be followed. Therefore the commission placed segment COGULD02 on the M&E List for temperature until 2020 when the language in the regulation can be changed to better reflect recent policy decisions. The inconsistency was not noticed until after the submittal of the responsive prehearing statement by DWCD and therefore the division could not propose a change to the regulation as it would be outside of the scope of this rulemaking hearing.

c) COSJAF09 – Fe, Mn, SO4 Water Supply Standards

The commission adopted an alternative methodology for assessing ambient based water quality standards in the 2016 Listing Methodology (Appendix B). This assessment methodology incorporates confidence intervals into the assessment of ambient standards. The confidence interval is a more statistically sound approach in determining impairments in situations when an impairment is slightly above the standard because it takes into account the "normal variability in the available concentration of the data" (Appendix B, 2018 LM).

For segment COSJAF09 (Mineral Creek), the 85th percentiles of dissolved manganese and dissolved iron were exceeding the standard, that was based on the ambient conditions of the stream from the year 2000. The Animas River Stakeholder Group proposed to re-assess both dissolved manganese and iron using the ambient-based approach to determine the level of confidence that the parameters were exceeding the standards. Based on the information provided by the Animas River Stakeholders Group, using the confidence interval approach, both dissolved manganese and iron are attaining standards. The commission concluded that dissolved iron, dissolved manganese and sulfate water supply standards based on 2000 conditions are in essence, ambient standards and should be assessed as such. The commission did not include Mineral Creek on the 303(d) list for manganese and iron.

d) Multiple segments in Fountain Creek - Storm Events

The second paragraph in § III.B.7 of the 2018 Listing Methodology states that data collected during or immediately after temporary events influencing the waterbody that are not representative of normal conditions shall typically be discounted in making the listing decision. For example, scouring storm flows which lead to diminished aquatic life use or accidental spills of toxic chemicals would not be a basis upon which to list the affected segment. However, such events may be considered as a basis for listing in instances where nonattainment of standards arises from a reversible source of pollutants.

The commission maintains that storms are a normal part of the hydrologic cycle. If samples collected during a storm event are obtained using established procedures and analyzed using standard methods, those results are representative of conditions within the stream at that time.

The commission acknowledges that changes in the volume of stream flow, such as those caused by precipitation events, can affect water quality indicators. However, assessment procedures are in place to deal with the variation, including those values that might be perceived as outliers within the data set. These procedures include bias removal, the averaging of daily and weekly samples, the use of percentiles to determine ambient concentrations for total and dissolved constituents, and the calculation of the geometric mean for the observed E. coli concentrations. In the latter case, the geometric mean is a statistical description of the central tendency of a set of results and serves to mute the effect of outliers.

The commission concluded that not all high flow events can be automatically considered to be either a substantial storm or scouring event. If such instances are known to exist, then the associated data would be removed. However, a blanket removal of such data should not be expected.

e) All tributary segments

The commission requested that in the next listing methodology work group, that the division further explore the listing of "all tributary" segments, particularly for E.coli, and also consider what happens to "all tributary" segments that are on the 303(d) list when they are resegmented.
