(i) "Indoor pest control product" means a product used: 1) to prevent, destroy, repel, mitigate, or control pests within or around structural foundations and other parts of structures; and 2) for interior plant pest control.

(j) "Interior plant pest control" means pests found in or on house plants and other indoor ornamental plants kept or located within structures occupied by humans, including, but not limited to houses, apartments, offices, shopping malls, and other dwelling places, to control invertebrate pests that adversely affect such plants, including insects, mites, slugs, snails and nematodes; and to control plant diseases in such structures or sites.

~~(i)~~(k) "Label" means the written, printed, or graphic matter on, or attached to, the pesticide or device or any of its containers or wrappers.

~~(j)~~(l) "Labeling" means all labels and all other written, printed, or graphic matter:

(1) accompanying the pesticide or device at any time; or

(2) to which reference is made on the label or in literature accompanying the pesticide or device, except to current official publications of the Environmental Protection Agency, the United States Departments of Agriculture and Interior, the United States Department of Health and Human Services, State experiment stations, State agricultural colleges, and other similar Federal or State institutions or agencies authorized by law to conduct research in the field of pesticides.

~~(k)~~(m) "Liquid chemical sterilant product" means any liquid chemical sterilant product (including any product with sterilant or subordinate disinfectant claims) for use on a critical or semi-critical device, as defined in the Federal Food, Drug and Cosmetic Act, 21 U.S.C. § 321 (h) (incorporated by reference herein, later amendments not included). For purposes of this definition, the term "critical device" includes any device that is introduced directly into the human body, either into or in contact with the bloodstream or normally sterile areas of the body; the term "semi-critical device" includes any device that contacts intact mucous membranes but that does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body.

~~(l)~~(n) "Pesticide product" means a pesticide in the particular form (including composition, packaging, and labeling) in which the pesticide is, or is intended to be, distributed or sold. The term includes any physical apparatus used to deliver or apply the pesticide if distributed or sold with the pesticide. The term also includes any device whose labeling includes or should include an establishment number issued pursuant to 40 C.F.R. § 167.20 (2016) (incorporated by reference herein, later amendments not included) except for those devices exempted in Part 14. The term also includes the characteristic designation by words, symbols, name, number, or trademark of a specific, particular pesticide or formulation thereof, under which the pesticide is distributed or sold in the State of Colorado. For more than one pesticide product to be considered the same pesticide product, each pesticide product must exhibit the same:

(1) product name;

(2) registrant name;

(3) manufacturer name;

(4) EPA registration number (if the pesticide product is subject to registration by EPA pursuant to the FIFRA); and

(5) labeling.

~~(m)~~(o) "Registrant" means any person who has registered any pesticide with the state of Colorado.

~~(n)~~(p) "State restricted use pesticide" means any pesticide which when used as directed or in accordance with the generally accepted practice, the Commissioner determines requires additional restrictions for that use to prevent unreasonable -adverse effects on the environment including, but not limited to people, lands, beneficial insects, animals, crops, and wildlife, other than pests.

~~(e)~~(q) "Under the direct supervision" means the application of a pesticide by a competent person acting under the instructions and control of a certified applicator who is available when needed, even though said applicator is not physically present at the time and place the pesticide is applied.

Part 2. Status of products as pesticides.

A substance or mixture of substances will be considered to be a pesticide if:

2.1. The label or labeling of the product bears claims for use as a pesticide.

2.2. Claims or recommendations for use as a pesticide are made in collateral advertising such as publications, advertising literature which does not accompany the product, or advertisements by radio or television.

2.3. Claims or recommendations for use as a pesticide are made verbally or in writing by representatives of the manufacturer or distributor.

2.4. The product is intended for use both as a pesticide and other purposes.

2.5 The product contains one or more substances that are listed as active ingredients in any pesticide that has been registered by EPA as a pesticide under FIFRA and that have no significant commercially valuable use in the product as distributed or sold other than use for a pesticidal purpose.

Part 3. The registration system.

3.1. Every pesticide product which is distributed in this state must be registered with the Commissioner.

(a) The Commissioner may exempt certain pesticides from registration in accordance with §35-9-106(2), C.R.S. (incorporated by reference herein, later amendments not included).

(b) The following pesticide products shall not be exempt from registration;

(1) minimum risk pesticides as described under 40 C.F.R.§ 152.25(f) (2016) (incorporated by reference herein, later amendments not included);

(2) pesticides distributed under an experimental use permit, as described under 40 C.F.R. § 152.30(c)(1) (2016) (incorporated by reference herein, later amendments not included).

(3) pesticides distributed under an emergency exemption, as described in 40 C.F.R. § 152.30(e) (2016) (incorporated by reference herein, later amendments not included).

3.2. Each pesticide product shall be registered separately.

3.3. Repealed.

3.4. The annual application fee for registration or renewal of a registration shall be $205.00.

3.5. Repealed.

3.6. Any person is eligible to be a registrant.

3.7. Effect of registration: If a pesticide product is registered under the Act, no further registration under the Act is required unless the label or ingredient statement differ from the representations made in connection with registration.

3.8. The Commissioner will send all correspondence concerning the application and any subsequent registration information to the address provided by the applicant. It is the responsibility of the applicant and any registrant to ensure that the Commissioner has a current and accurate address. Any change of address submitted on the application form or renewal form shall result in a change of address for the registrant. Otherwise, any change of address must be in writing and specifically indicate an intention to change the official mailing address of the registrant.

3.9. Any change of address submitted to the Commissioner by a registrant will result in a change of address for all pesticide products registered by said registrant.

3.10. Applications and correspondence relating to registration should be submitted as specified by the Commissioner to:

Colorado Department of Agriculture Division of Plant Industry 305 Interlocken Parkway, Broomfield, CO 80021

3.11. At any time the Commissioner, under the authority of the Act, may require from the registrant, a description or descriptions of tests and the results thereof upon which labeling claims are made.

3.12. Effective date of registration. Registration of a pesticide product shall become effective on the date the application is approved and accepted by the Commissioner. A Certificate of Registration will be issued to the registrant for each pesticide product registered with the Commissioner.

3.13. Responsibility of a registrant. The registrant is responsible for the accuracy and completeness of all information submitted in connection with his application for registration of a pesticide product.

3.14. Changes in labeling or ingredient statement. Changes in the labeling or ingredient statement of a registered pesticide product shall be submitted prior to any sales using the changed label or ingredients in Colorado. The exact changes shall be described.

3.15. Claims must conform to registration. Claims made for a pesticide product must not differ in substance from representations made in connection with registration or revised labeling submissions, including representations with respect to effectiveness, ingredients, directions for use, or pests against which the product is recommended. Any claims which differ in substance from representations made in connection with registration shall be described.

3.16. Compliance with the FIFRA. The Commissioner shall refuse application for registration of any pesticide product that is not in compliance with the FIFRA.

3.17. Failure to provide the information required by Section 3.11, Section 3.18 and/or Section 3.19 within 60 days from the date the first Notice of Lack of Compliance is printed, shall be considered an incomplete application and no registration or renewal of a registration for the pesticide product shall be issued.

3.18. Each applicant for a registration shall submit a signed, complete, accurate, and legible application, including: the form provided by the Commissioner; the application fee set by the Commissioner; unless provided on the application form, a list of each inert ingredient and its percentage when requested by the Commissioner; and a final printed label and labeling as it appears on the pesticide product in the marketplace.

3.19. Registration expiration and renewal:

(a) All pesticide registrations shall expire on December 31 of each year.

(b) Each applicant for renewal of a registration shall submit, prior to expiration on December 31, a signed, complete, accurate, and legible application, including: the form provided by the Commissioner and the application fee set by the Commissioner.

3.20. Repealed.

3.21. Repealed.

3.22. Repealed.

3.23. Repealed.

3.24. Repealed.

Part 4. Label requirements.

4.1. All pesticides except those pesticide products determined to be exempt from registration pursuant to § 35-9-106(2), C.R.S. (incorporated by reference herein, later amendments not included), and Part 3.1, that are distributed or registered in Colorado must have a label which conforms to this Part 4.

4.2. These Rules incorporate by reference rules of the Environmental Protection Agency, United States of America 40 C.F.R. §156 (2016) (later amendments not included) concerning labeling requirements and the rules of the Environmental Protection Agency, United States of America 40 C.F.R. §152.25(f) (2016) (later amendments not included) concerning minimum risk pesticides.

(a) Labels and labeling for pesticide products must comply with all of the labeling requirements of 40 C.F.R. §156 (2016), as incorporated above, unless exempted from federal registration pursuant to 40 C.F.R. §152.25(f) (2016), as incorporated above.

(b) Labels and labeling for pesticide products exempted from federal registration pursuant to 40 C.F.R. §152.25(f) (2016), as incorporated above shall:

(1) comply with 40 C.F.R. §152.25(f)(3) (2016), as incorporated above; and

(2) comply with all provisions of the act and these Rules except § 35-9-120(1)(g)(ii), C.R.S. (incorporated by reference herein, later amendments not included), and parts 6.1(i) and 6.1(j) of these Rules.

4.3. This Rule does not include later amendments to or editions of the incorporated material.

4.4. Repealed.

4.5. Repealed.

Part 5. Coloration and discoloration.

5.1. These Rules incorporate rules of the Environmental Protection Agency, United States of America 40 C.F.R.§ §153.140 through 153.155 (2016) (incorporated by reference herein, later amendments not included).

5.2. This Rule does not include later amendments to or editions of the incorporated material.

5.3. Repealed.

Part 6. Misbranding.

6.1. False and misleading statements. A pesticide or a device is misbranded if its labeling is false or misleading in any particular including both pesticidal and non-pesticidal claims. Examples of statements or representations in the labeling which constitute misbranding include:

(a) A false or misleading statement concerning the composition of the product;

(b) A false or misleading statement concerning the effectiveness of the product as a pesticide or device;

(c) A false or misleading statement about the value of the product for purposes other than as a pesticide or device;

(d) A false or misleading comparison with other pesticides or devices;

(e) Any statement directly or indirectly implying that the pesticide or device is recommended or endorsed by any governmental agency;

(f) The name of a pesticide product (except devices) which contains two or more principal active ingredients if the name suggests one or more but not all such principal active ingredients even though the names of the other ingredients are stated elsewhere in the labeling;

(g) A true statement used in such a way as to give a false or misleading impression to the purchase;

(h) Label disclaimers which negate or detract from labeling statements required. An example of a disclaimer which would render a product misbranded is: “The information furnished herein is provided gratuitously by the manufacturer who assumes no responsibility whatsoever for the effectiveness or safety of this product regardless of whether or not it is used as directed.”;

(i) Claims as to the safety of the pesticide or pesticide product or its ingredients, including statements such as “safe:, “nonpoisonous”, “noninjurious”, “harmless”, or “nontoxic to humans and pets” with or without such a qualifying phrase as “when used as directed”; or

(j) Non-numerical and/or comparative statements on the safety of the product, including but not limited to:

i) “Contains all natural ingredients”;

ii) “Among the least toxic chemicals known”;

iii) “Pollution approved”;

6.2. Justification of false and misleading statements not permitted. The use of any false or misleading statement on any part of the labeling, given as the statement or opinion of any person or based upon such statement or opinion shall not be justified nor may such statement be justified by the fact that the statement or opinion is actually that of such person.

Part 7. Refusal or cancellation of registration.

Any of the following causes is sufficient to justify refusal or cancellation of registration of a product:

7.1. If it is determined that the pesticide product will not perform its intended function;

7.2. If the labeling bears any statement, design, or graphic representation relative thereto, or to its ingredients, which is false or misleading in any particular;

7.3. If found to be an imitation of or illegally offered for sale under the name of another pesticide or pesticide product;

7.4. If the labeling accompanying the pesticide product does not contain directions for use which are necessary, and if complied with, adequate for the protection of the public under customary conditions of use;

7.5. If the label does not contain the required warning or precautionary statements;

7.6. If the label does not bear an ingredient statement as required;

7.7. If any word, statement, or other information required to appear on the label or labeling is omitted or not prominently placed thereon and in such terms as to render it likely to be read and understood under customary conditions of purchase and use;

7.8. If a pesticide product does not warrant the proposed claims for it, or if the pesticide or pesticide product and its labeling and other material required to be submitted, do not comply with the act or these Rules;

7.9. If it is determined that, when used in accordance with label directions or in accordance with commonly recognized standards of practice, the pesticide product will generally cause, or is likely to cause if the pesticide or pesticide product is registered, unreasonable adverse effects on the environment including, without limitation, groundwater, vegetation (except the target pest) to which it is applied, living man or other useful vertebrate animals, and the person applying such pesticide or pesticide product; or

7.10. If the registrant has been guilty of fraudulent and deceptive practices in the evasions or attempted evasions of the provisions of this act or any rules and regulations promulgated thereunder; provided, that no registration shall be revoked or refused until the registrant shall have been given an opportunity for a hearing by the Commissioner.

Part 8. Enforcement.

8.1. Collection of samples. Samples of pesticides and devices shall be collected by a designated agent. An official representative sample shall be one taken by the Commissioner or his designee. An unbroken original package shall be taken as the official sample where the pesticide is packed in small bottles, or small packages. Where the pesticide is packed in large containers, the official sample shall be a portion taken from one original package in a lot.

Part 9. Experimental use products.

9.1. Any pesticide product shipped or delivered for experimental use must be registered and the following information must be submitted to the Commissioner. If a pesticide product shipped or delivered for experimental use is registered in Colorado, no further registration is required. However, the following information must be submitted to the Commissioner.

(a) In addition to the information required for routine registration an application for registration shall include:

(1) the federal Experimental Use Permit number;

(2) a copy of the federal experimental use approval;

(3) a copy of the labeling;

(4) the Colorado contact for such use;

(5) if requested any information pertinent to the program being performed in Colorado.

9.2. A pesticide intended for experimental use shall not be offered or advertised for general sale.

Part 10. Distribution.

10.1. No person or business shall distribute any of the following:

(a) Any pesticide product which does not conform to its purported standard of quality.

(b) Any pesticide product except in the manufacturer's or registrant's original unbroken package, except for bulk, and there is affixed to such container a registered label.

(c) Any pesticide product which is not labeled, or on which the label is illegible in any respect.

(d) Any pesticide product on which the caps, lids, or other sealing devices on the container are not tight or secure. Defective, unsound or broken containers shall not be placed on display, sold, offered for sale or transported.

(e) Bags containing granular ready-to-use pesticides (including ready-to-use combinations of pesticide and fertilizer ingredients) shall not be considered broken if they are repaired in accordance with the following criteria.

(1) Any repairs to a broken bag must be sufficient to return the bag to its original condition of soundness such that no leakage can occur when the bag is subjected to normal handling.

(2) No repair may be made to a broken bag if the damage measures more than 3 inches in any dimension.

(3) All words, numbers, and warning symbols on the product bag must be legible and not obscured by the repair in any way.

(f) Any pesticide product which is misbranded or adulterated.

(g) Any pesticide product which has not been registered in accordance with the provisions of the Act.

(h) Any pesticide product in a refillable container for which the pesticide residue removal procedure was not conducted in accordance with Part 15 of these Rules.

10.2. Failure of any person or business to cease distributing any pesticide or pesticide product or device on which a written or printed cease and desist order has been issued in accordance with the Act shall be sufficient reason for the Department to enjoin said distribution.

10.3. Any pesticide that spills from a broken container in any area where a product is stored or displayed for sale must be cleaned up immediately and disposed of according to all applicable laws and regulations.

Part 11. Dealer licensing.

11.1. The Dealer Licensing System.

(a) Any person who distributes any restricted use pesticide to any other person must possess a valid pesticide dealer license.

(b) Each separate business location, including branch offices, and each separate business name must have a separate pesticide dealer license.

(c) Each applicant for a pesticide dealer license shall make application to the Commissioner. Said application shall be on a form furnished by the Commissioner and shall be accompanied by payment of an application fee of $50.00.

(d) Each pesticide dealer shall make an application to renew its license on or before the first working day of January for the year of renewal. Said application shall be on a form furnished by the Commissioner and shall be accompanied by payment of a $50.00 renewal fee.

(e) Licenses expire on January 1st of each year and must be renewed on an annual basis.

(f) Applicants for renewal of a pesticide dealer license whose applications are received after the first working day of January but received on or before February 1st must pay a penalty fee of 10%.

(g) No pesticide dealer license can be renewed until the entire fee is paid.

(h) If the application for renewal is not received on or before February 1, of the year following the year of licensure, the license will not be renewed and the dealer must apply for a new license.

(i) Any dealer distributing restricted use pesticides after the expiration date of their license and prior to their renewal or new license application acceptance date will be in violation of § 35-9-120(1)(f), C.R.S. (incorporated by reference herein, later amendments not included), and subject to civil penalties authorized under § 35-9-124, C.R.S. (incorporated by reference herein, later amendments not included).

11.2. Recordkeeping requirements for state and federal restricted use pesticides shall be as required by Section 13.3.

Part 12. Emergency exemptions.

The following general conditions are set in order to comply with provisions of exemptions which may be issued under Section 18 of the FIFRA (incorporated by reference herein, later amendments not included) for the use of pesticides in emergency situations. However, in addition, due to the highly unique and special nature of each exemption, each exemption shall have its own specific conditions.

12.1. Any Section 18 pesticide product must be registered in Colorado. If a Section 18 pesticide product is registered in Colorado, no further registration is required.

12.2. Definition and construction of terms. As used in this part, unless the context otherwise requires:

(a) "Authorization" means that document prepared by EPA and delivered to the Department by EPA stating the compound, the use and conditions for use under which approval for the Section 18 emergency exemption was granted.

(b) "Commercial applicator" means persons licensed by the state of Colorado as commercial applicators pursuant to §§ 35-10-101 to 128, C.R.S. (incorporated by reference herein, later amendments not included).

(c) "Permit" means a permit granted by the Department to persons for the sale or use of pesticides granted emergency exemption status under Section 18 of the FIFRA.

(d) "Section 18" means any exemption from registration under the authority of Section 18 of the FIFRA, and any rules or regulations thereto.

(e) "Section 18 pesticide" means any pesticide designated by the Commissioner for use in any Section 18 exemption.

12.3. Any pesticide compound determined to be a Section 18 pesticide shall maintain that status for the duration of the Section 18 authorization.

12.4. Permit Required.

(a) All persons wishing to sell, purchase, and/or use a Section 18 pesticide shall obtain a permit for such sale, purchase, and/or use from the Department of Agriculture prior to any such sale, purchase, and/or use. The Department may waive such requirement if such a permit is not included in the Section 18 authorization.

(b) In the event a permit is not required by a Section 18 authorization any and all individuals wishing to sell, purchase, and/or use a Section 18 pesticide shall be bound by all conditions and restrictions as set forth by the Commissioner, in the Section 18 authorization, and on the product label.

(c) Permits shall be requested by the submission of an application in the form prescribed by the Department.

(1) There shall be no charge for the issuance of a permit by the Department.

(2) Permits for the purchase and/or use of a Section 18 pesticide shall only be issued to persons licensed, registered, or certified by the Commissioner pursuant to §§ 35-10-101 through 128 C.R.S.

(3) Permits to sell a Section 18 pesticide shall only be issued to those persons who are dealers licensed pursuant to the Act.

(d) All permits shall be subject to the conditions specified and any and all conditions or restrictions which may appear on the approved product label or labeling.

(e) The permit shall authorize the sale or purchase and/or use of the pesticide product or products indicated in the Section 18 authorization. The sale or use of any other product containing the identical active ingredient(s) for control of the specified pest under the provisions of this permit is expressly prohibited.

(f) The Department may suspend or revoke any and all permits issued under these Rules in the event there is any reason to believe that the continued sale or use of the Section 18 pesticide by any or all persons presents an unreasonable hazard to man, any other

species, the environment or public or personal property. All administrative procedures and hearings shall be governed by the provisions of the Administrative Procedure Act.

(g) Any permit issued under these Rules may be suspended immediately if there is sufficient evidence to show the Section 18 pesticide was sold or used in violation of the conditions of the permit and/or in a manner so as to present an unreasonable hazard to man, any other species, the environment or public or personal property.

(h) Each permittee shall be furnished with a copy of the actual EPA Section 18 authorization by the Department.

12.5. Conditions of the Permit. The following conditions shall be placed upon the sale, purchase, and use of a Section 18 pesticide under the permits issued.

(a) Each Section 18 pesticide shall be subject to all specific restrictions and conditions as may be stated by the Commissioner and in the Section 18 authorization from the EPA to the Department and all permittees must abide by these conditions.

(b) No applications shall be performed in any area until the Department has determined that area to meet the qualifications for treatment as specified by the Commissioner and in the Section 18 authorization.

(c) No field or other site shall be treated unless it has been determined by the permittee or his representative that it fulfills each and all specific qualifications for treatment as specified by the Commissioner and in the Section 18 authorization.

(d) Under no circumstances shall applications be performed in any area to any site other than those specifically authorized by the Commissioner and in compliance with the Section 18 authorization.

(e) The Colorado Department of Agriculture must be notified in writing by the permittee within twenty-four (24) hours of knowledge of any adverse effects on man, any other species, the environment or public or personal property which result from the application of a Section 18 pesticide under any permit issued under the provisions of these Rules.

(f) All permittees shall keep records as required by the permit and must make such records available to the Department on request at any reasonable hour.

(g) All permittees shall submit such report(s) as required by the permit.

(h) All commercial applicators licensed pursuant to §§ 35-10-101 to 128, C.R.S. (incorporated by reference herein, later amendments not included) who are issued a permit under the provisions of these Rules shall take all necessary steps to notify their customers of the appropriate restricted entry, preharvest, crop rotation, root crop planting or other intervals, or feeding restrictions; and any other pertinent precautionary information as specified by the Commissioner, the Section 18 authorization to the Department, and the label. All such notification shall be in writing or be a copy of approved required labeling unless exempted by the Department and shall be in a timely manner or within such time period as may be specified by the Commissioner and in the Section 18 authorization so as to permit the customer to adequately comply with all restrictions and prohibitions.

(i) Persons permitted to apply, or applying, as the case may be, a Section 18 pesticide under these Rules shall not be construed to be pesticide dealers provided they do not engage in the resale for use of any Section 18 pesticide.

(j) The sale of any Section 18 pesticide for the purpose for which the Section 18 authorization was granted to any individual who does not meet the qualifications established by the Commissioner and of the Section 18 authorization as required is strictly prohibited. Violation of this provision will be deemed a violation of the regulations and Act, and may result in further administrative actions against the dealer or permittee or immediate suspension of the dealer permit.

12.6. Responsibilities of All Users and/or Dealers.

(a) Nothing herein shall be construed as abrogating applicator responsibility under the FIFRA or the Colorado Pesticide Applicators' Act, or as abrogating dealer responsibility under the FIFRA or the Colorado Pesticide Act.

(b) If the permit required has been waived, then no application, use, or sale shall be contrary to the requirements of the Commissioner, the Section 18 authorization, or the product's label.

(c) Storage and disposal of a Section 18 pesticide shall be in accordance with all provisions of the Commissioner, of the Section 18 authorization, the product's label, and all state and federal hazardous waste laws.

(d) All applications and sales shall be in accordance with all provisions established by the Commissioner and of the Section 18 authorization.

(e) All commercial applicators shall take all necessary steps to notify their customers of the appropriate restricted entry, preharvest, crop rotation, root crop planting or other intervals; or feeding restrictions; and any other pertinent precautionary information as specified by the Commissioner, in the Section 18 authorization to the Department, and on the label. All such notification shall be in writing or by copy of approved required labeling unless exempted by the Department.

(f) Any supplemental label or labeling for the use of a Section 18 pesticide must accompany the sale for use of such product(s).

(g) The Department may suspend the authorized sale or use of a Section 18 pesticide in the event there is any reason to believe that the continued sale or use of the Section 18 pesticide by any or all persons presents an unreasonable hazard to man, any other species, the environment, or public or personal property. All administrative procedures and hearings shall be governed by the provisions of the Administrative Procedure Act.

Part 13. Restricted and Limited use pesticides.

13.1. Pesticides containing the following active ingredients when used as herbicides are hereby declared to be state restricted use pesticides that may be distributed only to licensed dealers, licensed applicators, or their authorized agents. State restricted use pesticides shall not be distributed to any applicator who is not licensed in the appropriate category to apply that pesticide.

(a) Bromacil

(b) Diuron

(c) Monuron

(d) Prometon

(e) Sodium chlorate

(f) Tebuthiuron

(g) Sodium metaborate

13.2. Federal restricted use pesticides may be distributed only to licensed dealers, licensed applicators, or their authorized agents. Federal restricted use pesticides shall not be distributed to any applicator who is not licensed in the appropriate category to apply that pesticide.

13.3. Every pesticide dealer shall maintain at each licensed dealership location records of all transactions in which a state or federal restricted use pesticide is distributed by that dealership to any person. Records of each such transaction must be maintained for a period of 24 months after the date of the transaction, and must include the following information:

(a) The name of the licensed applicator, to whom the pesticide was distributed, and the name and address of his or her principle place of business.

(b) Either:

(1) The certification number on the document evidencing that person's certification, the State (or other governmental unit) that issued the document, the expiration date of the certification, and the appropriate categories in which the applicator is certified; or

(2) The pesticide dealer license number, if sold to another dealer.

(c) The product name, EPA registration number, and the Colorado special local need registration number, granted under section 24(c) of the FIFRA (incorporated by reference herein, later amendments not included) (if any) on the label of the pesticide;

(d) The quantity of the pesticide distributed in the transaction; and

(e) The date of the transaction.

(f) Restricted use pesticides may be distributed to a licensed applicator via an unlicensed person authorized by the licensed applicator to act as his or her agent for that purpose. If distribution is made through such an agent, the dealer records must also include:

(1) The name and current address of the authorized agent through which such distribution was made;

(2) A record of the applicator’s license showing the categories of licensure.

(3) A signed statement from the licensed applicator authorizing the agent to receive delivery of restricted use pesticides on behalf of that applicator.

13.4. Except as set forth in Part 13.5, any pesticide containing one or more of the following active ingredients is hereby declared to be a state limited-use pesticide that may be distributed only by licensed dealers.

(a) Acetamiprid

(b) Clothianidin

(c) Dinotefuran

(d) Imidacloprid

(e) Nitenpyram

(f) Nithiazine

(g) Thiacloprid

(h) Thiamethoxam

13.5. Pesticide products containing any of the neonicotinoid active ingredients outlined in Part 13.4 that are labeled for the following uses are exempt from the limited-use designation and dealer licensure requirements to distribute these products.

(a) For use in research;

(b) Pet care product;

(c) Products used by licensed veterinarians licensed pursuant to Article 315, Title 12;

(d) Indoor pest control product;

(e) Personal care product used for controlling lice;

(f) Products used in structural insulation;

(g) Products used as a wood preservative or in the manufacturing of wood preservatives;

(h) Bait products, including but not limited to bait station traps and scatter bait;

(i) Insect strip.

13.6. Effective July 1, 2024, any person distributing a pesticide product containing the neonicotinoid active ingredients outlined in Part 13.4 and that are not exempt pursuant to Part 13.5, must obtain a pesticide dealer license.

Part 14. Devices exempt from registration requirements.

14.1. The following classes of devices are not subject to the Act.

(a) Devices designed to deliver into burrows and ignite a mixture of propane and oxygen or similar combinations of explosive gases to control burrowing rodent pests.

Part 15. Pesticide refiller residue removal requirements.

15.1. Records. Refillers must maintain, at the refilling establishment, the registrant's written refilling residue removal procedure for each pesticide product distributed in refillable containers. These records must be maintained for the current operating year and for 3 years after that.

15.2. Refillers must clean each refillable container by conducting the pesticide product's refilling residue removal procedure before repackaging the pesticide product into the refillable container, unless the conditions in paragraph (a) of this Section and either paragraph (b) or (c) of this Section are satisfied:

(a) If required, each tamper-evident device and one-way valve is intact.

(b) The refillable container is being refilled with the same pesticide product.

(c) Both of the following conditions are satisfied.

(1) The container previously held a pesticide product with a single active ingredient and is being used to repackage a pesticide product with the same single active ingredient.

(2) There is no change that would cause the composition of the product being repackaged to differ from the composition described in its confidential statement of formula that is required under FIFRA section 3 (incorporated by reference herein, later amendments not included). Examples of unallowable changes include the active ingredient concentration increasing or decreasing beyond the limits established by the confidential statement of formula or a reaction or interaction between the pesticide product being repackaged and the residue remaining in the container.

15.3 Refillers must clean a refillable container that has a broken (non-intact) tamper-evident device or one-way valve as required in part 15.2 of this Section. Refillers must clean each refillable container that has a tamper-evident device or one-way valve that is not intact by conducting the pesticide product's refilling residue removal procedure before repackaging the pesticide product into the refillable container.

15.4 This part 15 shall become effective August 16, 2011.

Part 16. – 18. Reserved

Part 19. Materials Incorporated By Reference

19.1 Certified copies of material incorporated by reference in these Rules is available for public inspection during regular business hours. This incorporated material may be obtained at a reasonable charge or examined by contacting the Pesticide Section Chief, Department of Agriculture, 305 Interlocken Parkway, Broomfield, CO 80021. Further, the incorporated material may be examined at no cost on the internet at:

https://www.law.cornell.edu/uscode/text/7/chapter-6/subchapter-II FFDCA;

https://www.law.cornell.edu/uscode/text/21/chapter-9 40 CFR; or

https://www.ecfr.gov/cgi-bin/text-idx?tpl=/ecfrbrowse/Title40/40tab_02.tpl

Please contact the Department for assistance if you have difficulty in accessing any of these websites.

Part 20. Statements of Basis, Specific Statutory Authority, and Purpose

Statements of Basis, Specific Statutory Authority and Purpose for rulemaking activity from 1968 through 1992 are no longer in the Departments files and are presumably in the state archives.

20.1 Adopted July 28, 1994 – Effective September 30, 1994

These rules are adopted by the Commissioner of the Department of Agriculture pursuant to his authority under §35-9-118, C.R.S. (1993 Suppl.)

The purpose of these rules is to implement the provisions of the Pesticide Act, Title 35, Article 9, C.R.S. (1993 Suppl.).

These rules: establish procedures for registration of pesticides including experimental use products; establish requirements for pesticide labels; establish standards for coloration and discoloration of pesticides; establish what constitutes false and misleading statements; establish the reasons for refusal or cancellation of pesticide registration; establish the procedures for pesticide dealer licensing and record keeping requirements; establish the conditions for use of a Section 18 pesticide; and establish a list of pesticides whose use is restricted in the state.

Because of the revision of Article 9 of Title 35, and Article 10 of Title 35 (the Pesticide Applicators' Act) the language of the rules associated with the Pesticide Act needed to be changed to conform with the statutes. The language in Parts 1 to 13 now reflects the terminology in the current statutes. The language was also changed to conform with current terminology in the code of federal regulations where necessary. Other than Part 3 the requirements set out in Parts 1 to 13 remain basically unchanged from the rules in place.

The format and organization of the rules was also simplified.

Factual issues encountered when developing these rules include:

1. How to describe the administrative procedures for registering a pesticide product system so an applicant can understand and comply with them.

2. An application for registration, including a label, is received in the office. The pesticide product to be registered is then identified using the language on the label which accompanies the application. Often this label is not identical to, and sometimes does not even resemble, the label which appears on the product found in the marketplace. Inspections for compliance with the statute occur in the marketplace using data generated from the applications received in the office. Differences between the labels submitted for registration and the labels as they appear in the marketplace have caused numerous problems in enforcement complaints from registrants who believed their product to be registered.

3. It is not unusual for a registrant to submit several applications for product registration together with one check for payment of all applications.

4. It is not unusual to receive an application for registration of a pesticide product which is under Cease and Desist Order along with other applications for registration.

5. The state restricted use pesticide list has been in place since 1989. At that point in time the Cooperative Extension and/or the Department were receiving several complaints or reports each year concerning damage related to the use of the listed materials in landscape areas. Only one such case was reported last year.

6. Pesticides are regulated at the federal level under the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA). Some rules pertaining to pesticides at the state level must be identical to those associated with FIFRA.

Policy issues encountered when developing these rules include:

1. To help resolve the dilemma addressed in factual issues concerning labels submitted with the application and those found on the container in the field. The rules now state the label to be submitted with the application for registration is to be the final printed label as it appears on the pesticide product in the field.

2. To resolve the dilemma of which application to process first when multiple applications for the same registrant are received at the same time it was determined the applications would be processed in the order in which the registrant submitted them, except as noted.

3. To be responsive to the needs of Colorado businessmen it was decided if multiple applications from the same registrant were received at the same time and any of those applications were for products which were under Cease and Desist Order, the applications for the products under Cease and Desist Order would be processed first, even if that was not the order in which they were submitted.

4. It appears the state restricted use list had the desired result. Consequently, the list will continue with a minor modification which removes a trade name of a product.

5. It was decided to incorporated by reference those regulations which are identical to the code of federal regulations instead of duplicating all of the language in these rules.

20.2 Adopted January 19, 1995 - Effective March 2, 1995

Statement of Basis and Purpose

These rules are adopted by the Commissioner of the Department of Agriculture pursuant to his authority under §35-9-118, C.R.S. (1993 Suppl.)

The purpose of these rules is to implement the provisions of the Pesticide Act, Title 35, Article 9, C.R.S. (1993 Suppl.).

These rules: establish procedures for registration of pest control devices; and comply with the recommendations of Legal Services concerning consistency in wording with the statute.

Factual issues encountered when developing these rules include:

1. How to describe the administrative procedures for registering a pest control device so an applicant can understand and comply with them.

2. Pest control devices are regulated under the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA).

3. Rule 8.2 relating to the examination of pesticides samples failed to meet the incorporation by reference standards of §24-4-103 (12.5) of the Administrative Procedure Act C.R.S.

4. The date in Rule 11.1 does not coincide with the date of the statute.

Policy issues encountered when developing these rules include:

1. The Department needed to determine which pest control devices would require registration in order to apply and enforce the provisions in an equitable and consistent manner. After discussions concerning the numerous types of devices and device technologies, it was decided the manner which best achieved this was to use requirements already set forth in 40 CFR 150-189 and its associated interpretations and policies. Under these requirements producers of devices which work through the efforts of an individual, such as fly swatters or mouse traps, are exempted from registering their producing establishments; while producers of other devices must register their producing establishments. This requirement was used as the criteria for requiring registration with the Commissioner.

2. It was decided to use the same registration process already in place for pesticide products to administer the registration of devices with a few exceptions.

3. Methods used to analyze pesticides change constantly as new analytical instruments enter the marketplace, as new pesticides enter the marketplace, and as our own chemists modify methods to fit the instrumentation available to them. The statute does not require that the Department establish by rule the methods it will use to analyze pesticides. Consequently, it was decided to repeal the clause.

20.3 Adopted April 17, 1995 - Effective May 30, 1995

STATEMENT OF REASONS FOR ADOPTION OF EMERGENCY RULE

This rule is adopted under the Pesticide Act pursuant to §35-9-118 (2), C.R.S. (1994 Supp.) and pertains to the administration and enforcement of the registration of pesticides under the Pesticide Act.

Parts 4.1 and 4.2 of the Rules and Regulations Associated with the Pesticide Act state:

“All pesticides sold or registered in Colorado must have a label which conforms to this Part 4.”

“These rules incorporate rules of the Environmental Protection Agency, United States of America 40 C.F.R. §156.10.”

The rules in 40 C.F.R. §156.10 require such things as net contents, warning or precautionary statements, physical or chemical hazards, storage and disposal directions, etc.

The Commissioner has received application for registration of a “plant-pesticide”. This plant-pesticide has been registered by EPA. In so doing EPA is not requiring the label contain many of the elements set forth in 40 C.F.R. §156.10.

In order to register the plant-pesticide for distribution and use in Colorado the requirements set forth in part 4.2 must be modified to conform with current policy of EPA.

The immediate adoption of Parts 1.2 (j.5) and 4.5 is imperatively necessary and compliance with notice and hearing requirements of §24-4-103 of the Colorado Administrative Procedure Act would be contrary to the public interest.

20.4 Adopted December 6, 1999 – Effective January 30, 2000

STATUTORY AUTHORITY: C.R.S. 35-9-118 (2) and (3)

GENERAL DISCUSSION: To establish requirements for registration of pesticide products to reflect changes made in the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA); to codify existing policy for registration of discontinued products; and to make miscellaneous technical amendments.

20.5 Adopted November 9, 2000 – Effective December 30, 2000

Statutory Authority:

These permanent rules are adopted by the Commissioner of the Colorado Department of Agriculture (Commissioner) pursuant to his authority under the Pesticide Act (the “Act”) at §35-9-118 (2) and (3) C.R.S. (2000).

Purpose:

The purpose of this amendment is to: increase the amount of the annual application fee for the registration or renewal of a pesticide product registration from $70.00 to $80.00.

Factual and Policy Issues:

The factual and policy issues encountered in the proposal of this amendment are as follows:

(1.) The Commissioner adopted a rule change effective January 1, 2000 that established the registration renewal fee for pesticide products designated as discontinued. This rule reduced the registration renewal fee for the pesticide products designated as discontinued from $70.00 to $21.00.

(2.) In Fiscal Year 2000, this fee reduction decreased the pesticide product registration program's revenue by approximately $185,000.00.

(3.) Because of this loss of revenue, the pesticide product registration program expects that it will have personal services and operating expense deficits for Fiscal Year 2001.

(4.) The average pesticide product registration fee among the 50 states for calendar year 2000 is approximately $120.00.

(5.) The last pesticide product registration fee increase occurred in 1994 for the purpose of implementing the Agricultural Chemical Groundwater Protection Act. This fee change did not impact or produce any additional revenue for the pesticide product registration program.

(6.) The Department estimates that this proposed fee increase will be sufficient to meet the personal service and operating cost expenses of the pesticide product registration program for at least three years without additional fee increases.

20.6 Adopted August 29, 2002 – Effective October 30, 2002

Statutory Authority:

These amendments to the permanent rules are adopted by the Colorado Commissioner of Agriculture (Commissioner) pursuant to his authority under the Pesticide Act (the "Act") at section 35-9-118 (2) and (3) C.R.S.

Purpose:

The purpose of these amendments is to:

1. Increase the amount of the annual pesticide fee for registration or renewal of a pesticide product registration from $80.00 to $95.00.

2. Eliminate "Discontinued" product registration. With this type of registration, the registrant affirms that they are no longer producing the particular pesticide product, and then pays a reduced fee of $21 for up to four years. After four years, the product registration is automatically cancelled.

3. Revise the rules to conform with the decision of Judge Babcock of The United States District Court for the District of Colorado in Bioganic Safety Brands, Inc., v. Don Ament, Colorado Commissioner of Colorado, Civil Action No. 01-B-1808.

Factual and Policy Issues:

The factual and policy issues encountered in proposing these amendments are as follows:

1. Rule changes affecting registration fees:

    a) The pesticide registration and dealer licensing activities of the Colorado Department of Agriculture are funded solely by the fees collected for pesticide registrations and dealer licenses. These funds are credited to the pesticide fund. Annual appropriations are made from this fund to carry out the purposes of the Act. Of the funds collected, 97% are from pesticide registration fees, and 3% from dealer license fees.

    b) The current pesticide or pesticide device registration fee is $80. Of this $80, $20 goes to the groundwater fund, and $60 goes to the pesticide fund.

2. Rule changes affecting “discontinued” pesticide registrations.

    a) About 30% of registered products are in “discontinued” registration. These products pay a registration fee of $21. Of this $21, $20 goes to the groundwater fund, and only $1 goes to the pesticide fund.

    b) Maintaining and processing discontinued product registrations increases administrative efforts and costs. The $1 fee for these products does not support the administrative costs involved.

    c) There have been numerous cases of registrants requesting to change products back from “discontinued” to a normal active registration status. This was not anticipated to be a reversible process.

    d) There are some cases of products with cancelled federal registrations being renewed as “discontinued” in Colorado, even though sales are now illegal under federal law.

    e) The large number of registered products that are in “discontinued” status has contributed to the current financial shortfall in the pesticide registration program.

    f) Pesticides are registered on a calendar year basis, with most revenue received during the December-January registration renewal period. The Colorado fiscal year is on a July-June period. At the beginning of the 2003 fiscal year (July, 2002) the fund balance (including reserve fund balance) will be insufficient to pay expenses for the following months. By October of 2002, the projected fund deficit is about $150,000.

    g) With the proposed changes to the fee structure, the pesticide fund should be returned to a sound financial footing by the end of FY04, with funds sufficient to operate the program until the renewal period and a reserve reestablished for future emergencies or economic changes.

    h) Further registration fee increases for the portion allocated to the pesticide fund are not anticipated for the next five years.

3) Rule changes to conform with the decision of Judge Babcock of United States District Court for the District of Colorado in Bioganic Safety Brands, Inc., v. Don Ament, Colorado Commissioner of Colorado, Civil Action No. 01-B-1808.

    a) Section 35-9-120(1)(g)(II), C.R.S. states: “It is a false representation to make claims as to the safety of any pesticide or device or their components or ingredients, including, but not limited to, such claims as “safe”, “noninjurious”, “harmless”, or “nontoxic to humans and pets”, with or without such qualifying phrases as “when used as directed” and “when properly applied”.

b) The Pesticide Act Rules include the following as prohibited false and misleading statements on pesticide labels:

"(i) Claims as to the safety of the pesticide or pesticide product or its ingredients, including statements such as "safe:, "nonpoisonous", "noninjurious", "harmless", or "nontoxic to humans and pets" with or without such a qualifying phrase as "when used as directed"; or

(ii) Non-numerical and/or comparative statements on the safety of the product, including but not limited to:

i) "Contains all natural ingredients"

ii) "Among the least toxic chemicals known"

iii) "Pollution approved";"

c) In the court decision referenced above, Judge Babcock ruled that the sections of the Act and Rules prohibiting safety claims on labeling of pesticides exempted from federal regulation as minimum risk pesticides (section 25(b) of FIFRA) are preempted by FIFRA. This Pesticide Act prohibition with regards to Bioganic Shoobug insect repellant was declared a violation of both the First Amendment (free speech) and the Commerce clause of the U.S. Constitution.

d) The Commissioner did not appeal this ruling.

e) The proposed amendments conform to the order issued in this case.

20.7 Adopted October 19, 2006 – Effective January 1, 2007.

Statutory Authority:

These amendments to the permanent rules are adopted by the Colorado Commissioner of Agriculture (Commissioner) pursuant to his authority under the Pesticide Act (the "Act") at §§ 35-9-118 (2) and (3), C.R.S.

Purpose:

The purpose of these amendments is to:

1. Change references to licensed applicators to recognize that CDA will be licensing private pesticide applicators as of January 1, 2007.

2. Modify pesticide dealer licensing requirements to include record-keeping requirements for federal restricted use pesticides.

Factual and Policy Issues:

The factual and policy issues encountered in proposing these amendments are as follows:

1. House Bill 1274 amended the Pesticide Applicator Act (Title 25, Article 10) to authorize the CDA to begin issuing licenses to private pesticide applicators on and after January 1, 2007 and to require that any person acting as a private applicator using or supervising the use of restricted use pesticides be licensed as a private applicator by the Commissioner.

2. Historically private pesticide applicators making pesticide applications in Colorado have been licensed by the Environmental Protection Agency (“EPA”), specifically EPA region 8, Denver, Colorado. Once CDA assumes responsibility for licensing private applicators, EPA will cease issuing such licenses. We anticipate that this transfer of authority will take place on January 1, 2007.

3. Part 13 of the current rules for the Pesticide Act allows for the permitting of each user of a section 18 pesticide, and requires that each permittee be either licensed by the Commissioner or licensed with EPA region 8, Denver, Colorado as a private applicator.

4. The current rules of the Pesticide Act only require recordkeeping on the part of licensed dealers for state restricted use pesticides, not federal restricted use pesticides.

5. EPA currently imposes record-keeping requirements on Colorado pesticide dealers of federal restricted use pesticides, under the authority of FIFRA §11(a)(1) and CFR 171.11(g). However, this federal authority only exists in any state in which the EPA conducts a certification program. Once CDA takes over the private applicator certification program from EPA region 8, federal authority to require Colorado pesticide dealers to keep records concerning federal restricted use pesticides will cease.

20.9 Adopted January 4, 2007 – Effective March 4, 2007.

STATUTORY AUTHORITY:

These amendments to the Rules are adopted by the Colorado Commissioner of Agriculture (Commissioner) pursuant to his authority under the Pesticide Act (“Act”), § 35-9-110 (2), C.R.S.

PURPOSE:

The purpose of these amendments is to exempt a certain class of devices from the registration requirements of the Act.

FACTUAL AND POLICY ISSUES:

The factual and policy issues encountered in proposing these amendments are as follows:

1. The Act requires certain devices to be registered, and authorizes the Commissioner to designate which classes of devices are subject to this requirement.

2. Colorado producers are suffering an economic loss due to an increase in burrowing animals in and around agronomic fields and in rangeland areas. Black-tailed prairie dogs have been increasing in recent years across eastern Colorado. Although exact figures are not available from most agronomic production areas, the Comanche and Pawnee National Grasslands have documented increasing number of prairie dog colonies, with a 79% increase in active colonies in 2004 and a 30% increase in 2005. The overall hectares affected has more than doubled between 2003 and 2005 (from 2680 ha to 6323 ha).

3. The Commissioner has determined that destructive rodents pests, particularly prairie dogs, pose a significant threat to agricultural production in this State, and that additional control methods, including the devices that are the subject of this rulemaking, are needed to protect the public welfare.

4. The devices proposed for exemption from registration, which inject a mixture of propane and oxygen into the burrow and then ignite it, are currently available and widely used in adjacent states. Until recently, however, the use of these devices in Colorado was considered a prohibited

method of take by the Colorado Division of Wildlife ("DOW"). On November 1, 2006, a new DOW regulation took effect allowing the use of such devices. DOW decided to allow the use of these devices in response to the urgent need of agricultural producers to have better control methods for burrowing animals.

5. Because DOW has regulatory authority over use of such devices, the regulation of the distribution of these particular devices under the Act is duplicative and unnecessary. Due to the length of time that registration of a new device under the Act typically requires, the Commissioner adopted emergency amendments to the Rules, effective November 13, 2006, exempting this class of devices from registration to permit the timely use of these devices to control prairie dogs. These permanent amendments to the rules continue this exemption.

20.10 Adopted August 12, 2008 – Effective September 30, 2008.

STATUTORY AUTHORITY

These amendments to these rules are proposed for adoption by the Commissioner of the Colorado Department of Agriculture ("CDA") pursuant to his authority under the Pesticide Act (the "Act"), §§ 35-9-118(2)(c),(f), and (h), C.R.S.

PURPOSE

The purpose of these proposed rules is to:

1. Amend Rule 10.1 to specify conditions to allow distribution of repaired bags containing certain pesticides.

2. Create a new Rule 10.3 to require distributors to properly clean up and dispose of pesticides when pesticide spills occurred.

3. Amend Rule 13.1 and create a new Rule 13.2 to restrict distribution of State and Federal Restricted Use Pesticides to licensed dealers, licensed applicators, and their authorized agents and only for uses allowed by the applicator's license category.

4. Amend current Rule 13.3 to require pesticide dealers to maintain records of any distribution of a State or Federal Restricted Use Pesticide to an authorized agent of a licensed applicator.

FACTUAL AND POLICY ISSUES

The factual and policy issues encountered when developing these rules include:

1) Rules 10.1(b) and (d) currently do not allow any distribution of a pesticide except in its original unbroken container. The CDA believes that if bags containing granular ready to use pesticides or ready-to-use combinations of pesticide and fertilizer ingredients can be repaired to their original condition and the product's label does not become misbranded in the process, sale of such products should be allowed to facilitate application to a labeled site and minimize disposal of these pesticides in Colorado landfills. CDA proposes to amend Rule 10.1 to create guidelines to allow this practice.

2) CDA is proposing to create a new Rule Part 10.3 to require distributors to clean up and dispose of any pesticide product that spills from a broken container to prevent any pesticide exposure to customers or employees.

3) Currently, Rule 13.1 requires that State Restricted Use Pesticides only be distributed and used by licensed applicators or persons under their direct supervision and only for uses covered by the

applicator's licensure category(s). Part 13 of the Rules only addresses distribution and use of State Restricted Use Pesticides, but it does not currently address distribution and use of federal restricted use pesticides.

The CDA is proposing to amend Rule 13.1 and create a new Rule 13.2 to clarify that both state and federal restricted use pesticides may only be distributed to licensed dealers, licensed applicators or their authorized agents who are licensed in the appropriate category to use that product.

4) Prior to January 1, 2007, EPA was performing restricted use pesticide dealer record inspections and, under 40 C.F.R. §171.11(g)(2)(ii), required dealers to maintain a record of any distribution of an RUP to an uncertified agent of a certified applicator documenting that the RUP would be used by a certified applicator or persons under their supervision.

CDA is proposing to amend current Rule 13.3to require pesticide dealers to maintain records of any distribution of an RUP to a licensed applicator through an authorized agent.

20.11 Adopted July 16, 2009 – Effective August 30, 2009.

Statutory Authority

These amendments to these rules are proposed for adoption by the Commissioner of the Colorado Department of Agriculture ("CDA") pursuant to his authority under the Pesticide Act (the "Act"), §§ 35-9-107(2), and 35-9-118(3)(a) and (b) C.R.S.

Purpose

The purpose of this proposed rule amendment is to amend Rule 3.4 to increase the annual pesticide registration fee from $95 to $165.

Factual and Policy Issues

The factual and policy issues encountered when developing these rules include:

1. Under 35-9-118(3)(a) the Commissioner has the authority to promulgate Rules to determine the annual registration fee for each pesticide registered in the state of Colorado.

2. On January 1, 2007, the CDA obtained primacy over all private applicators.

3. CDA's budget projections for the private applicator program took into account the initiation of the program prior to any revenue generation, projected expenses to administer the program and projected revenue from private applicator licensing over a 4 year period. Budget projections showed an annual revenue shortfall of $250,000. To account for this shortfall CDA combined all pesticide cash funds and subsidized the private applicator expenses through a surplus in the pesticide registration fund. This was done to maintain private applicator examination and licensure fees at less than $100.

4. The pesticide applicator program, which licenses commercial applicators, has not raised its fees to cover rising costs since 1994, when business licensure fees were increased to $350, and 2003, when examination licensure fees were increased to $100. Expenses in the pesticide applicator program have outpaced revenues in 2007 and 2008 by an average of $80,000. These shortfalls have been covered by the pesticide registration fund and EPA grant funds.

5. In 2007 the pesticide registration fund balance was $670,517. In FY 07 and FY 08 the private applicator program and the commercial pesticide applicator program operated at an average loss

of $251,000. In FY 2009 the pesticide program is projected to be at a $250,000+ loss, depleting the remaining pesticide registration funds at the end of FY 2009.

6. In 2009 and 2010 the administration of the private applicator exam and the commercial applicator exam will be shared between a private company, Metro Institute, Colorado State University and CDA. This is being done to allow private applicators to take their examination on-line and allow proctored computer based examinations with CSU and CDA. This will provide an easier, more accessible and improved testing environment for the applicator community; however, it will increase CDA's program expenses to maintain the examination software and hardware and result in a loss in revenue with each examination administered by Metro Institutes or CSU.

7. The current registration fee is set in the Pesticide Act Rules, Part 3.4, which is currently $95. The CDA registers an average of 11,000 pesticide products per year.

8. The CDA is proposing a fee increase of $70, making the new registration fee $165. The fee increase will generate, based on average registration renewals, an additional $770,000 in revenue. This will cover all projected expenses, allow the CDA to resolve the deficit created in FY 2010, rebuild its fund balance, cover increases in expenditures and allow program growth in future years without having to increase pesticide applicator licensure fees.

9. Under 35-10-118(3)(a) any fee collected under the pesticide registration program shall have an increment approved by the Agricultural Commission to fund the Groundwater Protection Program. Currently the Groundwater increment is set at $30. In conjunction with this rulemaking, CDA plans to ask the Agricultural Commission to approve an increase in the increment from $30 to $40 dollars. This will bring an additional $110,000 to the Groundwater Program to cover increased program expenses and allow for growth in future years.

10. Twenty-one states have pesticide registration fees that exceed $165 per product, the highest being $750 per product; ranking Colorado twenty-second in comparison to the nation.

20.12 Adopted October 21, 2010 – Effective November 30, 2010.

Statutory Authority

These amendments to these rules are proposed for adoption by the Commissioner of the Colorado Department of Agriculture ("CDA") pursuant to his authority under the Pesticide Act ("Act"), specifically §§ 35-9-118(2)(f), (g), (h) and (i), C.R.S.; § 35-9-117, C. R.S.; and § 35-9-117.5, C.R.S.

Purpose

The purpose of these proposed rules is to:

1) Create new Parts 3.1(a) & (b), The Registration System, to conform with new statutory provisions in regards to exempting pesticides consistent with the Federal Insecticide, Fungicide and Rodenticide Act ("FIFRA").

2) Repeal duplicative provision in Part 3.5.

3) Parts 3.10, 3.11, 3.12, 3.15, 3.18 and 3.19 are amended to update registration requirements, clearly reflect current business procedures and set registration expiration and renewal dates in Rule.

4) Repeal outdated business procedures, Parts 3.20 through 3.24.

5) Amend Parts 4.1 and 4.2 to reflect new statutory provision that allows CDA to exempt certain pesticides and update references to 40 C.F.R.

6) Create a new Part 11.1(i) to clearly state it is a violation for a dealer to sell an RUP after the expiration date and prior to the renewal of its dealer license.

7) Create a new Part 15. Part 15.1 creates recordkeeping requirements for pesticide refillers. Part 15.2 creates cleaning guidelines for refillable containers. Part 15.3 creates cleaning requirements when tamper-evident devices or one-way valves are not intact. Create a new Part 10.1(h) to prohibit distribution of a pesticide product in a container that has not had the residue removal procedure performed.

8) Update application submission language, address information, references to 40 C.F.R. and references to pesticide products through the rules.

Factual and Policy Issues

The factual and policy issues encountered when developing these rules include:

1. S.B. 10-034 changed the Act to permit the Commissioner to exempt certain pesticides from registration consistent with FIFRA. Part 3.1(a) reiterates the statutory provision that CDA may exempt products in accordance with FIFRA. Part 3.1(b) specifies certain products that are not exempt from registration in Colorado. CDA will exempt certain pesticides from registration through policy.

2. Part 3.5 is being repealed consistent with the recent repeal of the provisions in the pesticide act that specified collection of a penalty fee from registrants upon registration of a product that had previously been found unregistered in the marketplace.

3. Parts 3.10, 3.11, 3.12, 3.15, 3.18 and 3.19 are amended to update outdated language in the registration requirements, to clearly reflect current business procedures and set registration expiration and renewal dates in Rule as allowed now by S.B. 10-034. The ability to change renewal dates in Rule will allow CDA to stagger registration renewal dates and spread the work load of processing 11,000+ registration renewals if CDA chooses to in the future.

4. Parts 3.20 through 3.24 are business procedures that were placed in Rule in 1996 due to a back log of registration requests and complaints from industry. CDA has since modified procedures and registration processes to avoid backlogs. Repeal of these provisions will allow these processes to be more efficiently addressed through CDA's business procedures and policies.

5. All pesticides registered in Colorado must have labeling that conforms to provisions outlined under 40 C.F.R. § Part 156, which describes what elements must be on a pesticide label such as ingredient statements, net weight, EPA registration number, etc. The existing language in Part 4.1 requires all pesticides to meet these labeling requirements except liquid chemical sterilants. The amendment to Part 4.1 now addresses the additional authority provided as a result of S.B. 10-034 to exempt certain pesticides from registration by clarifying that those pesticides are exempt from the labeling requirements in Part 4.2. Part 4.2 was amended to update references to 40 C.F.R. that detail labeling requirements for pesticides required to registered in Colorado pursuant to Part 3.1 or the Pesticide Act.

6. Pesticide dealer licenses expire on December 31 of each year. CDA has found during records inspections that the some dealers continue to sell RUPs during the time period that their license was expired and prior to their renewal or a new application being submitted. The creation of a new Part 11.1(i) will clearly state that it is a violation, subject to civil penalties, for a dealer to sell an RUP after the expiration date and prior to the renewal or new application for a dealer license.

7. Section 19(f), Residue Removal Requirements, of FIFRA requires that states must have the authority to ensure pesticide refillers comply with the residue removal requirements. CDA historically has only had the authority to regulate registered pesticides from the distribution point forward and had no authority to regulate producer establishment or refiller establishment activities. S.B. 10-034 amended the Pesticide Act to provide CDA the authority to regulate producer establishments for the purpose of enforcing and ensuring compliance with the federal pesticide residue removal requirements. A new Part 15 was created to conform to the statutory provisions that require pesticide refillers to maintain records and clean refillable containers prior to distribution.

   A new Part 10.1(h) was created to prohibit distribution of a pesticide product in a container that has not had the residue removal procedure performed. Part 10.1(h) will make it a violation to distribute a product if the pesticide residue removal procedures have not been conducted in accordance with Part 15 of the Rule.

8. Throughout the Pesticide Act CDA is updating application submission language, such as applications must be “postmarked”, to remove impediments for future electronic submissions; updates to CDA’s address, references to 40 C.F.R. and references to pesticide products to ensure the Pesticide Act clearly reflects CDA’s current business practices and maintains consistent language throughout the Act.

20.13 Adopted November 10, 2015 – Effective December 30, 2015.

Statutory Authority

These amendments to these Rules are proposed for adoption by the Commissioner of the Colorado Department of Agriculture (“CDA”) pursuant to his authority under the Pesticide Act (“Act”), specifically § 35-9-118(2), C.R.S

Purpose

The purpose of these proposed Rules is to update language to reflect the Department’s current physical address and websites for materials incorporated by reference. Specifically:

1. Update Part 3 and Part 19 with the Department’s current address.

2. Update Part 19 with current website links.

3. Correct formatting and grammatical errors.

4. These amendments incorporate changes as a result of the Department’s Regulatory Efficiency Review Process.

5. Rule 12.4 is being updated to reflect the changes that resulted in the Department taking over the certification and regulation of Private Pesticide applicators in 2007 and who are no longer certified through the EPA.

Factual and Policy Issues

The factual and policy issues encountered when developing these Rules include:

1. In May of 2014 the Colorado Department of Agriculture moved from 700 Kipling St, Denver, CO to 305 Interlocken Parkway, Broomfield, CO. Part 3 of the Rule outlines registration requirements and references the Department’s address for submission. Part 19 outlines where certified copies of materials incorporated by reference may be obtained, which references the Department’s

address as well. The proposed amendments update the Department's address in each of these Parts.

2. Part 19 provides website address where materials incorporated by reference may be obtained at no cost. The proposed amendments update these web addresses.

20.14 Adopted November 9. 2016- Effective December 30, 2016

Statutory Authority

These amendments to these rules are proposed for adoption by the Commissioner of the Colorado Department of Agriculture ("CDA") pursuant to his authority under the Pesticide Act ("Act"), specifically § 35-9-118(2)(f), C.R.S

Purpose

The purpose of these proposed rules is to:

1. Amend Part 2 of the Rule to further clarify when substances or mixture of substances will be considered to be a pesticide subject to regulation under the Act.

Factual and Policy Issues

The factual and policy issues encountered when developing these rules include:

1. Part 2 of the current Rule lists several factors the Department considers in determining if a substance or mixture of substances is a pesticide that is subject to regulation under the Act, including: (1) if a product bears pesticidal claims; (2) if collateral advertising makes pesticidal claims or recommendations; (3) if pesticidal claims are made verbally or in writing by the manufacturer or distributor and; (4) if the product is intended for use as a pesticide or other purpose.

2. Part 2 does not address products that contain pesticides where the manufacturer or distributor has made no pesticidal claims or statement of intended use. This amendment clarifies that the physical presence of a pesticide in a product, for which there is no significant commercially valuable non-pesticidal purpose when the product is used as intended (e.g., applied to the leaves of a plant), is sufficient to establish that the product is a pesticide subject to regulation under the Act – regardless of the lack of any pesticidal claims, advertising or statements or intent by the distributor.

3. Recently, it came to the Department's attention that a product was being sold and distributed in Colorado. This product was sold as a leaf polish and made absolutely no pesticidal claims. The product was tested and found to contain the pesticide active ingredient pyrethrin. The Department has subsequently identified other products sold for use on plants that contain other pesticides not disclosed on the label or mentioned in any of the distributor's product advertising.

4. This amendment makes clear that any such product is considered a pesticide under the Act and thus must be registered under the Act in order to be legally distributed in this state. Products containing pesticidal substances that are not registered are subject to stop sale orders and /or civil penalties.

5. This amendment to the Rules implementing Colorado's Pesticide Act compliments the federal regulations implementing the Federal Insecticide, Fungicide and Rodenticide Act ("FIFRA"), 40 C.F.R. §152.15, which similarly requires registration under FIFRA of products containing active ingredients that have no non-pesticidal use, regardless of the absence of pesticidal claims.

20.15. Adopted September 20, 2017 - Effective November 30, 2017

Statutory Authority

The amendments to these Rules are proposed for adoption by the Commissioner of the Colorado Department of Agriculture ("CDA") pursuant to his authority under the Pesticide Act ("Act"), specifically § 35-9-118(2)(f) and (h), C.R.S.

Purpose

The purpose of the proposed Rules is to:

Amend Parts 1, 3, 4, and 5 of the Rule to cite the most current version of Title 40 of the Code of Federal Regulations ("C.F.R.").

Factual and Policy Issues

The factual and policy issues encountered when developing these Rules include:

1. On February 26, 2016, the Environmental Protection Agency revised 40 C.F.R Part 152 to more clearly describe the active and inert ingredients that are permitted in products eligible for the minimum risk pesticide exemption.

2. 40 C.F.R. is incorporated by reference in the Act at Part 1, Definitions and Construction of Terms; Part 3, The Registration System; Part 4, Label Requirements; and Part 5, Coloration and Discoloration. The last 40 C.F.R. date referenced in the Act is 2009.

3. Updating the C.F.R. date reference to 2016 ensures that CDA's administration of the Act is consistent with current Federal law concerning minimum risk pesticide exemptions.

20.16. Adopted September 17, 2019 – Effective October 30, 2019

Statutory Authority

These amendments to these rules are proposed for adoption by the Commissioner of the Colorado Department of Agriculture ("CDA") pursuant to the authority under the Pesticide Act ("Act"), specifically §§ 35-9-107(2) and 35-9-118(3)(a), C.R.S

Purpose

The purpose of these proposed amendments is to:

Amend Part 3 of the Rules Pertaining to the Administration and Enforcement of the Pesticide Act (the "Rule") to increase Pesticide Registration fees by $40 to increase funding for the Department's state waters protection efforts as expanded by Senate Bill 19-186.

Factual and Policy Issues

The factual and policy issues encountered when developing these rules include:

1. Pursuant to section 35-9-118(3)(a), C.R.S., any fee collected under the pesticide registration program shall have an increment approved by the Agricultural Commission to fund the Groundwater Protection Program. Currently, the Groundwater increment is set at $40.

2. During the 2019 legislative session, the Colorado General Assembly introduced SB 19-186, effective August 2, 2019. SB 19-186 modified section 35-9-118(3)(a), changing “groundwater protection efforts” to “state waters protection efforts.” This change expanded the scope and cost of implementing the program.

3. The current pesticide registration fee is set forth in the Pesticide Act, Part 3.4, and is $165. The Department of Agriculture registers an average of 14,000 pesticide products per year.

4. The Department of Agriculture proposes a fee increase of $40 per pesticide product registered in Colorado, increasing the registration fee to $205. The fee increase will generate, based on average registration renewals, an estimated $560,000 to the state waters program to cover increased program expenses.

5. SB 19-186 appropriated $239,592 for the 2019-20 fiscal year to assist with the implementation of the state water sampling program. Subsequent to the first year of implementation, the estimated annual budget to operate the full state waters program will be $623,605. The remaining expenditures, not covered by the pesticide registration funding increase, will be realized by fertilizer tonnage fee revenues, as set forth in SB 19-186.

6. The Department discussed the proposed $40 increase to pesticide registration fees with the Pesticide Advisory Committee on April 22, 2019, at a regularly scheduled committee meeting in accordance with section 35-9-118(3)(a), C.R.S.

7. In 2017 the Virginia Department of Agriculture conducted a national survey on state pesticide registration fees. Thirty-six states responded; of those twelve states have pesticide registration fees that exceed $205 per product, the highest registration fee being set at $1,150 per product. Colorado’s proposed fee is thirteenth in comparison to those states responding.

20.17. Adopted November 8, 2023 – Effective December 30, 2023

Statutory Authority

These amendments to these rules are proposed for adoption by the Commissioner of the Colorado Department of Agriculture (“CDA”) pursuant to her authority under the Pesticide Act ("Act"), specifically §§ 35-9-118(1), (2)(c)(I), and (7)(a) and (b), C.R.S.

Purpose

The purpose of these proposed amendments is to:

1. Amend Part 1.2 to include new definitions for the terms “indoor pest control product” and “interior plant pest control.”

2. Create a new Part 13.4 designating any pesticide containing one or more listed neonicotinoid active ingredients to be a state limited-use pesticide in the State of Colorado that may only be distributed by licensed dealers.

3. Create a new Part 13.5 exempting certain pesticide products containing those neonicotinoid active ingredients from designation as a state limited-use pesticide based upon specific use patterns identified on the pesticide product label.

4. Create a new Part 13.6 requiring that pesticide products containing the listed neonicotinoid active ingredients in Part 13.4 that are not otherwise exempt pursuant to Part 13.5 may only be distributed by licensed pesticide dealers starting July 1, 2024.

5. Amend the Rules to correct non-substantive numbering, formatting, and typographical errors.

Factual and Policy Issues

The factual and policy issues encountered when developing these rules include:

1. On May 17, 2023, SB23-266 was signed into law.

2. SB23-266 required that the Department designate certain neonicotinoid pesticides as limited-use pesticides by January 1, 2024. A new Part 13.4 designates any pesticide containing one or more of eight listed neonicotinoid active ingredients to be a state limited-use pesticide that may only be distributed by a licensed dealer.

3. SB23-266 also exempted certain pesticide products containing the identified neonicotinoid active ingredients from designation as a state limited-use pesticide if those pesticide products are used for academic research or if the pesticide product's label includes one or more specific use patterns. A new Part 13.5 exempts pesticide products containing the listed neonicotinoid active ingredients from classification as a limited-use pesticide if the product label includes one or more of the listed use patterns.

4. One of the exempted use patterns in Part 13.5 is if the neonicotinoid pesticide product label permits use as an "indoor pest control product." Because that term was not defined in SB23-266, the Department added a definition of "indoor pest control product" at Part 1.02(i), as well as an associated definition for "interior plant pest control" at Part 1.02(j).

5. SB23-266 requires licensure as a pesticide dealer to sell certain neonicotinoid pesticides. A new Part 13.6 requires licensure as a pesticide dealer to distribute pesticide products containing any of the neonicotinoid active ingredients in Part 13.4, except for those pesticide products exempted under Part 13.5, effective July 1, 2024.

NOTICE OF PUBLIC RULEMAKING HEARING

FOR AMENDMENTS TO

"Rules And Regulations Pertaining To The Administration And Enforcement Of The Pesticide Applicators' Act"

8 CCR 1203-2, Parts 1, 2, 4, 5, 8, 9, 10, 12, and 15

Notice is hereby given pursuant to § 24-4-103 C.R.S. that the Department of Agriculture will hold a public rulemaking hearing:

DATE: October 18, 2023
TIME: 10:30 a.m.
LOCATION: This hearing will be held via Zoom
CALL INFORMATION: 1-719-359-4580
Meeting ID: 876 4469 3347
Passcode: 597153

In order to maintain a proper hearing record you are encouraged to pre-register by completing this Google form. If you do not have access to Google you may send your name and telephone number to Hollis.Glenn@state.co.us
Pre-registration is not required to participate in the hearing.

The purpose of these Rules is to incorporate new federal certification and training requirements pursuant to 40 C.F.R. Part 171, to update the Rules consistent with requirements in Senate Bill 23-192 ("SB23-192"), and to clarify existing Rule requirements. Specifically, the revisions to Parts 1, 2, 4, 5, 8, 9, 10, 12 and 15.

The statutory authority for these rules is §§ 35-10-112(1)(e) and (f), C.R.S., and §§ 35-10-118(2)(a) – (d), (3)(a) – (c), (4), (5) and (9), C.R.S.

Any interested party may file written comment with the Commissioner's office prior to the hearing, or present at the aforementioned hearing written data, views or arguments. Emailed comments should be sent to the hearing officer at Hollis.Glenn@state.co.us. A copy of the proposed rule is available on the Department of Agriculture's website at www.colorado.gov/ag or may be obtained by calling 720-560-6286. The proposed rule shall be available for public inspection at the Colorado Department of Agriculture at 305 Interlocken Parkway, Broomfield, Colorado during regular business hours.

RULES AND REGULATIONS PERTAINING TO THE ADMINISTRATION AND ENFORCEMENT OF THE PESTICIDE APPLICATORS' ACT

8 CCR 1203-2

Part 1. Construction of Terms, Definitions and Incorporations by Reference.

1.01. As used in these Rules, the singular includes the plural, the masculine gender includes the feminine and neuter, and vice versa. All terms used in these Rules shall have the meaning set forth for such terms in the Act.

1.02. As used in these Rules, unless the context otherwise requires:

(a) "abut" means to join; to be contiguous, as where no other land, road, or street intervenes; "abut" includes two property sites that would otherwise be considered abutting, but for the fact that such sites are separated by an alley. ~~As used herein, "alley" means a passage way within a block set apart for public use, vehicular travel, and local convenience to provide a secondary means of access to the rear or side of abutting lots or buildings.~~ As used herein, "alley" means a street or highway intended to provide access to the rear or side of lots or buildings in urban areas and not intended for the purpose of through vehicular traffic. As used herein, "vehicle" shall have the meaning set forth at § 42-1-102(112), C.R.S.

(b) "category" shall include any sub-category thereof.

(c) "contiguous dwelling unit" means a dwelling unit that is contiguous with another dwelling unit, both of which units are owned, managed, leased, or subleased by the same landlord.

(d) "dwelling unit" means a structure or the part of a structure that is used as a home, residence, or sleeping place by a tenant.

(e) "engaged in the business of applying pesticides for hire" means: the evaluation of pest problems; the recommendation of pest controls and evaluation of results; the mixing, loading or application of pesticides; and/or the soliciting, advertising, offering or contracting to do any of the above, in return for money or anything of value, including goods or services. Notwithstanding anything to the contrary in the foregoing, the rendering of consultation services by an individual in evaluating pest problems, recommending pest controls and/or evaluating results, shall not be deemed to constitute the application of pesticides for hire, if said individual is not affiliated with, or soliciting business for, any person or business entity which performs the mixing, loading or application of pesticides.

(f) "in the possession of" means in the physical possession of the applicator or in a location at the site of the application, such as a service vehicle, that is readily accessible to the applicator.

(g) "fumigant" means any substance which by itself or in combination with other substances emits or liberates a gas or gases, fumes or vapors, and which gas or gases, fumes or

vapors when liberated and used will destroy vermin, rodents, insects, and other pests, but are usually lethal, poisonous, noxious, or dangerous to human life.

(h) "landlord" means the owner, manager, lessor, or sublessor of a residential premises.

(i) "pasture" means land which is managed primarily for the production of forage for domestic livestock. Pasture typically receives intensive renovation and/or cultural treatments, such as tillage, fertilization, mowing, irrigation and weed control.

(j) "proof of medical justification" means a statement signed by a physician licensed to practice medicine in Colorado pursuant to Article 240 of Title 12, C.R.S. which states

I certify that the individual named above is a patient of mine and should be placed on the list of pesticide sensitive individuals. This individual has a documented sensitivity to certain pesticides and should not be exposed to them because of the reason(s) described below:

(k) "property damage" includes, but is not limited to, injury to domestic animals, livestock and economically important insects.

(l) "ready to use pesticide" means, any pesticide that requires no mixing or loading of a pesticide into a service container or other application device; such as but not limited to: aerosols and pre-mixed formulations in the original container.

(m) "structure" means any building, regardless of its design or the type of material used in its construction, whether public or private, vacant or occupied, the foundation thereof, and the adjacent outside areas, and shall also include but shall not be limited to warehouses, trucks, boxcars, boats, airplanes, other vehicles, or the contents thereof, and fumigation vaults.

(n) "tenant" means a person entitled under a rental agreement to occupy a dwelling unit to the exclusion of others.

(o) "use" ~~means any and all aspects of the handling of pesticides from the time a pesticide container is opened until disposal of the pesticide container, including without limitation, the mixing, loading, application, spill control, and disposal of a pesticide or its container.~~ has the same meaning set forth in § 35-10-103(18), C.R.S.

(p) "to use any pesticide in a manner inconsistent with labeling directions or requirements" includes, but is not limited to, for termiticides only, the use of a termiticide at any concentration less than that stated on the labeling.

(q) "agricultural commodity" means any plant, or part thereof, or animal, or animal product, produced by a person (including farmers, ranchers, vineyardists, plant propagators, Christmas tree growers, aquaculturists, floriculturists, orchardists, foresters, or other comparable persons) primarily for sale, consumption, propagation, or other use by man or animals.

(r) "device" means any device for which licensure as a commercial applicator is required pursuant to § 35-10-118(9.5), C.R.S. For purposes of these Rules, use of a pesticide includes the use of any such device by a commercial applicator.

1.03. Material incorporated by reference does not include any later amendments or editions of the incorporated material. Copies of material incorporated by reference in these Rules is available for public inspection during regular business hours. This incorporated material may be obtained at a

reasonable charge or examined by contacting the Pesticide Section Chief, Department of Agriculture, 305 Interlocken Parkway, Broomfield, CO 80021. Further, the incorporated material may be examined at no cost on the Internet at:

Part 2. The Licensing System.
Subpart A Commercial Applicators

2.01. A person engaged in the business of applying pesticides must be licensed as a commercial applicator under the Act. To be licensed or to renew a license as a commercial applicator, any designated qualified supervisor(s) must be licensed in good standing in the category for which a commercial applicator's license is sought.

2.02. A person not engaged in the business of applying pesticides is not required to be licensed as a commercial applicator under the Act. For example, a person who evaluates and/or recommends pest controls while not engaging in the business of applying pesticides or working for a person who engages in the business of applying pesticides is not required to be licensed under the Act.

2.03. Each applicant for a license shall submit a signed, complete, accurate, and legible application, on a form provided by the Commissioner, which shall include, at a minimum: the name and address of the business, the name under which the business will operate (the doing business as name), the name of the person who is the primary contact, the address and telephone number of the location where the applicator records are to be kept, the name and identification numbers of all qualified supervisors employed or designated by the business, and any other information required on the form.

2.04. In addition to the application form described above, each applicant for a license or applicant for renewal of a license, shall submit the license fee set by the Commissioner. If the license fee does not accompany the application, the application for license or renewal of a license may be denied.

2.05. Each person applying as a corporation or other entity shall submit a certificate of good standing from the Secretary of State.

2.06. Each applicant shall submit to the Commissioner the name under which the business will operate. If the licensee operates under more than one name, each such name shall be listed with the Commissioner.

2.07. Beginning with license year 1994, the annual license fee for commercial applicators shall be $350.00.

2.08. Each applicant for renewal of a license shall annually submit a signed, complete, accurate, and legible application on a form provided by the Commissioner, which shall include, at a minimum: the name and address of the business, the name of the person who is the primary contact, the address and telephone number of the location where the applicator records are to be kept, the name and identification numbers of all qualified supervisors employed by the business, and any other information required on the form.

2.09. Each applicant for a license shall provide evidence of liability insurance to the Commissioner.

2.10. Each applicant for renewal of a license in all categories shall have on file at the time of submission of an application for renewal of a license evidence of liability insurance which is in force at the time of application.

2.11. Each commercial applicator shall have on file with the Commissioner evidence of liability insurance at the time any pesticide application is performed.

2.12. Adequate Supervision:

(a) A licensee must have at least one qualified supervisor for every fifteen (15) technicians, of which no more than eight (8) may be unlicensed technicians. For purposes of the provision, the term “unlicensed technician” means a technician who does not have a certified operator license.

(b) A responsible qualified supervisor must be available while any technician under their supervision is using a pesticide. For purposes of this provision, the term “available” means able to communicate verbally with the technician and the Department and to respond appropriately to any emergency.

(c) A qualified supervisor may act in a supervisory capacity for one or more commercial applicator businesses at any given time, but only for the licensure category(ies) the qualified supervisor holds.

(d) A qualified supervisor may supervise one or more technicians employed by multiple commercial applicator businesses, so long as the aggregate number of technicians supervised from among those commercial applicator businesses does not exceed 15 technicians at any one point.

2.13. A commercial applicator who conducts business at two or more business locations shall obtain a license for each location at which it employs one or more permanent employees engaged in the application of pesticides for hire. For purposes of this paragraph, “business locations” means any physical location at or through which the functional operations of business regularly occur,

including, but not limited to, financial transactions, arrangement of contracts, or assignment of work, and excluding buildings or locations used solely for storage of equipment or supplies or telephone answering services.

2.14. A commercial applicator may not apply pesticides aerially without an endorsement on its license by the Commissioner permitting such applications. In order to obtain such endorsement, the applicant or licensee shall present evidence that at least one pilot employed or to be employed by said applicant, currently holds a commercial agricultural aircraft operator certificate issued by the Federal Aviation Administration, U.S. Department of Transportation, pursuant to 14 C.F.R. Part 137 (2017) (as incorporated herein by reference). If the employment of said pilot or pilots is terminated for any reason, the licensee shall immediately cease aerial application of pesticides unless and until it is in compliance with this Rule.

2.15. A business not engaged in the business of applying pesticides for hire, and not licensed under the Act, may solicit and enter into a written contract which incidentally requires one or more pesticide applications only in accordance with the provisions of this Part 2.15. Examples of such contracts, but not by way of limitation, are maintenance and paving contracts. If such business hires a licensed commercial applicator to perform the pesticide application as a subcontractor, then the primary contractor need not itself be licensed under the Act. If the primary contractor does not hire a licensed commercial applicator to perform such applications, then the primary contractor must obtain a license prior to entering into the primary contract. Entry into any such contract that does not have an express written statement that the contractor will subcontract with a licensed commercial applicator to perform the pesticide application(s) called for in the contract, shall constitute a violation of § 35-10-117(1)(c), C.R.S. Failure to include such a statement in any solicitations, whether oral or written, to enter into such a contract shall constitute a separate violation of § 35-10-117(1)(c), C.R.S.

2.16. A commercial applicator not licensed in a category (“contractor”) may solicit and enter into a written contract with a customer to perform pesticide applications in said category only if the contractor subcontracts with a commercial applicator licensed in said category (“subcontractor”) to perform the pesticide application in that category. In this case, the subcontractor shall be responsible for all aspects of the application. If the contractor hires the subcontractor to perform the pesticide application, then the contractor need not itself be licensed in the category. If the contractor does not hire a subcontractor to perform such applications, then the contractor must obtain a license in said category prior to entering into any contract with a customer for any pesticide application in said category. Entry into any such contract that does not have an express written statement that the contractor will subcontract with a subcontractor licensed to perform the pesticide application(s) called for in the contract, shall constitute a violation of § 35-10-117(1)(c). C.R.S. Failure to include such a statement in any solicitation, whether oral or written, to enter into such a contract shall constitute a separate violation of § 35-10-117(1)(c), C.R.S.

2.17. A commercial applicator licensed in a category (“contractor”) may enter into a contract with a customer to perform pesticide applications in said category. The contractor may subcontract with another commercial applicator licensed in the same category (“subcontractor”) to perform the pesticide application under the primary contract. In this case, both the contractor and subcontractor shall be responsible for all aspects of the application. For example and not by way of limitation: both applicators are required to keep records of the application; both applicators are responsible for any notification required under the act or these Rules; and both applicators are responsible for the proper application of any pesticides.

Subpart B Registered Limited Commercial Applicators and Registered Public Applicators

2.18. Any person who in the course of conducting a business only in or on property owned or leased by the person or the person's employer (“limited commercial applicator”) is engaged in applying restricted use pesticides, and any agency of the state, any county, city and county, or municipality, or any other local governmental entity or political subdivision (“public applicator”) which applies restricted use pesticides shall register with the Commissioner.

2.19. An entity which does not apply restricted use pesticides but otherwise qualifies as a limited commercial applicator or a public applicator may register with the Commissioner.

2.20. A limited commercial applicator or public applicator which exclusively applies general use pesticides is not required to register with the Commissioner unless they have so designated in accordance with Part 2.19.

2.21. Any limited commercial applicator or public applicator registered pursuant to the Act and these Rules shall be governed by the Act and these Rules for all pesticide applications including those involving general use pesticides.

2.22. The limited commercial applicator or public applicator shall designate on its application one or more individuals, who are or will be employed by it in the capacity of qualified supervisor, to take the examination for each category and subcategory for which the registration is sought.

2.23. To be registered as a limited commercial applicator or public applicator, the designated qualified supervisor must be licensed in good standing and must meet all qualifications including, but not limited to, the experience and/or educational qualifications set forth in these Rules for each of the categories in which he or she will take the examination. For purposes of this Part 2.23, the term "good standing" includes but is not limited to, the fact that the qualified supervisor's license has not expired pursuant to § 35-10-116(1), C.R.S.

2.24. Each applicant for a registration shall submit a signed, complete, accurate, and legible application, on a form provided by the Commissioner, which shall include, at a minimum: the name and address of the applicant, the name of the person who is the primary contact, the address and telephone number of the location where the applicator records are to be kept, the name and identification numbers of all qualified supervisors employed by the applicant, and any other information required on the form.

2.25. In addition to the application form described above, each applicant for registration shall submit the registration fee set by the Commissioner. If the registration fee does not accompany the application, the application for registration may be denied.

2.26. Each person applying as a corporation or other entity shall submit a certificate of good standing from the Secretary of State.

2.27. The registration required pursuant to the Act shall expire on December 31 of the same year the registration is granted.

2.28. A registered limited commercial applicator or a registered public applicator may not apply pesticides aerially without an endorsement on its registration by the Commissioner permitting such applications. In order to obtain such endorsement, the limited commercial applicator or a public applicator shall present evidence that at least one pilot employed or to be employed by said limited commercial applicator or a public applicator, currently holds a commercial agricultural aircraft operator certificate issued by the Federal Aviation Administration, U.S. Department of Transportation, pursuant to 14 C.F.R. Part 137 (2017) (as incorporated herein by reference). If the employment of said pilot or pilots is terminated for any reason, the limited commercial applicator or a public applicator shall immediately cease aerial application of pesticides unless and until it is in compliance with this Rule.

2.29. A limited commercial entity or a public entity may designate separate sections, divisions, agencies, or their equivalent to be registered.

2.30. Adequate Supervision:

(a) A registered limited commercial applicator or a registered public applicator must have at least one qualified supervisor for every fifteen (15) technicians, of which no more than eight (8) may be unlicensed technicians. For purposes of the provision, the term “unlicensed technician” means a technician who does not have a certified operator license.

(b) A responsible qualified supervisor must be available while any technician under their supervision is using a pesticide. For purposes of this provision, the term “available” means able to communicate verbally with the technician and the Department and to respond appropriately to any emergency.

(c) A qualified supervisor may act in a supervisory capacity for one or more commercial applicator businesses at any given time, but only for the licensure category(ies) the qualified supervisor holds.

(d) A qualified supervisor may supervise one or more technicians employed by multiple commercial applicator businesses, so long as the aggregate number of technicians supervised from among those commercial applicator businesses does not exceed 15 technicians at any one point.

2.31. If before the expiration of a registration, a registered limited commercial applicator or registered public applicator wants to withdraw registration, said applicator may withdraw from registration. Notice of withdrawal must be in writing and is not effective until 10 days from receipt by the Commissioner. If before the original expiration of a registration the applicator wants to be registered, the applicator must submit a new application and submit a new registration fee.

Subpart C Qualified supervisors and certified operators

2.32. A person working for a person who is or should be licensed as a commercial applicator, registered limited commercial applicator, or registered public applicator and who without supervision, evaluates pest problems, or recommends pest controls using pesticides, or uses any pesticide, or sells application services, or supervises others in any of these functions must be licensed as a qualified supervisor.

2.33. A person who applies any restricted use pesticide without the on-site supervision of a qualified supervisor must be licensed as a certified operator.

2.34. Each qualified supervisor and certified operator applying for a license or the renewal of a license must be 18 years of age and shall submit an application on a form provided by the Commissioner prior to the date of expiration of any current license which contains, at a minimum, the following: the applicant's identification number, if any, his or her name, the name, address, telephone number, date of birth, and license or registration number of his or her employer, if any, and any other information required on the form.

2.35. The Commissioner may require verification of any fact, including but not limited to, any experience or education claimed on any application, and may investigate the truthfulness and accuracy of any and all information submitted by an applicant.

2.36. Upon a showing of exceptional circumstances by an applicant, the Commissioner may waive part of the experience requirements specified in these Rules. The Commissioner may accept, with sufficient verification, valid relevant field experience obtained in this state or any other state.

2.37. Each applicant for license as a qualified supervisor or certified operator, shall take and pass a general examination and any examinations required for the category for which the applicant has applied.

2.38. Repealed

2.39. Except as provided in Part 2.45 of these Rules, each applicant for a license as a qualified supervisor or certified operator shall pay a fee to be determined by the Commissioner. Said fee must be paid separately from any other fee, including but not limited to, any fee for examination as a qualified supervisor or certified operator or any fee for licensure as a commercial applicator.

2.40. The qualified supervisor(s) employed by a licensee shall be responsible for the complete supervision of all pest control recommendations, soliciting, mixing, loading, and application of pesticides for the licensee in the licensure category(ies) the qualified supervisor(s) hold(s).

2.41. The anniversary date of a qualified supervisor's license or certified operator's license shall be the birth date of the licensee.

2.42. Both qualified supervisors and certified operators will be licensed by category and must take and pass both a general exam and a category specific exam.

2.43. In order for a licensed qualified supervisor or licensed certified operator to become licensed in additional categories, the applicant must take and pass the examination in the new category.

2.44. If a qualified supervisor possesses all of the qualifications for licensure as a qualified supervisor in an additional category for which such person is not licensed, except for the required experience, such person shall be licensed as a certified operator in such additional category without payment of the application fee for the certified operator's license.

2.45. If a licensed qualified supervisor or licensed certified operator applies for licensure in an additional category, said qualified supervisor or certified operator shall not be required to pay an additional application fee for licensure in a new category. The applicant shall be required to pay an examination fee.

2.46. Any category added after the qualified supervisor or certified operator is originally licensed or renewed shall expire on the date of expiration of the original license.

2.47. In order to qualify for renewal of a license, any licensed qualified supervisor or licensed certified operator must either take and pass the general exam and any category specific exams for his category or complete any continuing education required pursuant to Part 4 of these Rules. Any renewal of a license shall be determined on a category basis. Any license that is not renewed on or before the expiration date of the license may be reinstated within one hundred eighty days after the expiration date upon:

(a) Application and payment of a reinstatement fee as determined by the Commissioner; and

(b) Proof that all renewal requirements have been satisfied as of the expiration date of the license.

2.48. An individual certified or licensed by another jurisdiction as a commercial pesticide applicator may obtain a certified operator license in Colorado without passing any examination, but only for the unexpired term of the certification or license issued by such other jurisdiction. Application for such licensure shall require proof of current certification or licensure in good standing in the other jurisdiction and payment of an application fee pursuant to Part 2.39. Any application for licensure pursuant to this Part 2.48 may be denied for any reason other than passage of any exam. If issued, said license shall expire on the expiration date of the certification or license issued by the other jurisdiction. Upon the expiration of the license issued pursuant to this Part 2.48, the individual may renew the certification or license issued by the other jurisdiction and re-apply to become a certified operator in Colorado as permitted by this Part 2.48, or apply for a license in

Colorado and satisfy all requirements therefore, including, but not limited to, taking and passing each examination applicable to such licensure.

Subpart D Private Applicators

2.49. Any person who uses or supervises the use of a restricted use pesticide for purposes of producing any agricultural commodity on property owned or leased by the applicator or the applicator's employer or, if the pesticide is applied without compensation other than trading of personal services between producers of agricultural commodities, on the property of another person must be a licensed private applicator. The holder of a private applicator license is only authorized to use restricted pesticides for the purpose of producing an agricultural commodity as defined in Part 1.02~~(m)~~(q).

2.50. Each applicant for a private applicator license or renewal of a license must be 18 years of age and shall submit an application on a form provided by the Commissioner, prior to the date of expiration of any current license, which contains, at a minimum, the following: the applicant's identification number, if any, his or her name, address, telephone number, date of birth, photocopy of their identification, and any other information required on the form.

2.51. The Commissioner may require verification of any fact, including but not limited to, type of agricultural commodity production claimed on any application, and may investigate the truthfulness and accuracy of any and all information submitted by an applicant.

2.52. Each applicant for a private applicator license shall take and pass an examination.

2.53. Each applicant for a private applicator license shall pay a fee to be determined by the Commissioner. Said fee must be paid separately from any other fee, including but not limited to, any fee for examination as a private applicator.

2.54. A licensed private applicator shall be responsible for the on-site supervision of any unlicensed ~~person~~ private applicator working under his or her direction, who mixes, loads, or applies a restricted use pesticide, for purposes of producing any agricultural commodity on property owned or leased by the applicator or the applicator's employer. For the purposes of this Part 2.54, supervision of any unlicensed person working "under his or her direction" shall mean work performed by an unlicensed individual acting under the instruction and control of a licensed private applicator~~, even if the licensed private applicator is not physically present at the work site at the time the work is performed~~ where that unlicensed individual has met all training, qualifications, and use-specific condition requirements in accordance with 40 C.F.R. § 171.201(b) - (d) (2017) (as incorporated herein by reference) prior to the unlicensed private applicator using a restricted use pesticide under the on-site supervision of a licensed private applicator.

2.55. The anniversary date of a private applicator license shall be the birth date of the licensee.

2.56. In order for a licensed private applicator to become licensed as a qualified supervisor or certified operator, the applicant must take and pass both a general exam and a category specific exam and meet any requirements outlined in Part 2, Subpart C, of these Rules.

2.57. If a licensed private applicator applies for licensure as a qualified supervisor or certified operator, the private applicator shall be required to pay an additional examination fee and application fee for licensure.

2.58. In order to qualify for renewal of a license, a licensed private applicator must either take and pass the private applicator exam or complete any continuing education required pursuant to Part 4 of these Rules. A license that is not renewed on or before the expiration date of the license may be reinstated within one hundred eighty days after the expiration date upon:

(a) Application and payment of a reinstatement fee as determined by the Commissioner; and

(b) Proof that all renewal requirements have been satisfied as of the expiration date of the license.

2.59. An individual certified or licensed by another jurisdiction outside Colorado as a private applicator may obtain a Colorado private applicator license without passing any examination, but only for the unexpired term of the certification or license issued by such other jurisdiction. Application for such licensure shall require proof of current certification or licensure in good standing in the other jurisdiction and payment of an application fee pursuant to Part 2.53. Said license shall expire on the expiration date of the certification or license issued by the other jurisdiction. Upon the expiration of the license issued pursuant to this Part 2.59, the individual may renew the certification or license issued by the other jurisdiction and re-apply to become a private applicator in Colorado as permitted by this Part 2.59, or apply for a license in Colorado and satisfy all requirements therefore, including, but not limited to, taking and passing an examination applicable to such licensure.

2.60. Private pesticide applicator licensure classification: Category 401, Private Pesticide Applicator Pest Control, is for the application of restricted use pesticides for the purpose of producing any agricultural commodity on property owned or leased by the applicator or the applicator's employer or, when the pesticide is applied without compensation other than trading of personal services between producers of agricultural commodities, on the property of another person.

2.61. Private applicators making aerial, structural, or soil / non-soil fumigant applications must hold one or more of the following categories that correspond to the application being made in addition to the category 401, Private Pesticide Applicator license:

(a) Category 114: Aerial Pest Control: The application of pesticides by unmanned aerial vehicle (UAV), fixed or rotary wing aircraft.

(1) The Aerial Pest Control category may be obtained by successfully passing an approved Aerial Pest Control Certification examination offered by the Colorado Department of Agriculture or any state with an approved Environmental Protection Agency Certification Plan. Proof of a passing score obtained within the last 12 months with exam results 70% or better must be provided to the Department with the application.

(2) A reciprocal Aerial Pest Control license may be issued if the license, issued by a state with an approved Environmental Protection Agency Certification Plan with the equivalent category, is current and in good standing. A reciprocal license will expire on the date of the original issuing state's license.

(3) Applicators must obtain at least one (1) Pest Management Continuing Education Credit in Aerial Pest Control prior to the expiration of the license to renew the category. Failure to obtain at least one continuing education credit will result in the expiration of the licensure category and the applicator will be required to retest.

(b) Category 309: Soil / Non-Soil Fumigation Pest Control: For the use of a fumigant to control pests in soil or non-soil sites not otherwise addressed in category 303, Structural Fumigation Pest Control.

(1) The Soil / Non-Soil Fumigation Pest Control category may be obtained by successfully passing the Soil / Non-Soil Fumigation Pest Control Certification examination offered by the Colorado Department of Agriculture.

(2) A reciprocal Soil / Non-Soil Fumigation Pest Control license may be issued if the license, issued by a state with an approved Environmental Protection Agency Certification Plan with the equivalent category, is current and in good standing. A reciprocal license will expire on the date of the original issuing state's license.

(3) Applicators must obtain at least one (1) Pest Management Continuing Education Credit in Soil / Non-Soil Fumigation Pest Control prior to the expiration of the license to renew the category. Failure to obtain at least one continuing education credit will result in the expiration of the license category and the applicator will be required to retest.

(4) The Soil / Non-Soil Fumigation Pest Control category does not allow application of fumigants to control pests in structures as described in category 303, Structural Fumigation Pest Control. To apply a fumigant in a structure, a person holding a category 401, Private Pesticide Applicator license, must also hold category 303.

Subpart E Licensure Actions, Suspension, Denial, Revocation

~~2.61.~~2.62. Any of the following actions shall constitute grounds for the suspension, restriction, refusal to renew, denial, or revocation of a license or certification, whether alone or in conjunction with violations of any provision of the act or of any other provision of these Rules:

(a) The application of pesticides in a negligent or willful manner which creates, either by pesticide residue or by direct damage, a hazard to property, which shall include without limitation, crops, ornamental plants, and animals (including economically important insects).

(b) The application of pesticides in a negligent or willful manner which endangers human health.

(c) The creation of a situation from improper handling of pesticides, including spillage, leakage, vapors or disposal, which constitutes a hazard to the health, welfare or safety of any person, the general public, any animal or animals (including economically important insects), any crops, any ornamental plants, or the environment.

Part 3. Examination.

3.01. The Commissioner, or his or her designated administrator, shall administer a general examination and/or an examination in each category established by these Rules. Each examination must meet all core standards for all categories in accordance with 40 C.F.R. §§ 171.103(c), 171.103(d), and 171.105(a) (as incorporated herein by reference). Each examination is for the purpose of licensing as a qualified supervisor, certified operator, or private applicator. An individual may take such examinations for the purpose of obtaining a license.

3.02. Each applicant for examination shall file an application for examination on a form provided by the Commissioner and shall pay a fee to be determined by the Commissioner. Said fee must be paid separately from any other fee, including but not limited to, any fee for application for licensure as a qualified supervisor, certified operator, or private applicator or any fee for licensure as a commercial applicator.

3.03. Each applicant shall be required to obtain the grade designated as passing on each section of the examination(s) under which he or she wishes to qualify. All examinations shall be graded uniformly.

3.04. Each applicant for examination shall complete an identification form, provided by the Commissioner, for the Commissioner's use in identifying persons who take the examinations. The information on the identification form shall consist of that which is reasonably necessary or appropriate for ensuring the integrity of the examination process, such as the physical description of the applicant.

3.05. Examinations shall be graded without reference to the application or personal identification forms which have been completed by the applicant.

3.06. The Commissioner shall keep an applicant's test results on file for a period of one year from the date of examination. Such results may be used by an applicant for licensing during that period of time. If an applicant fails to complete the licensing process within one year of the examination date, he or she shall be required to take new examinations in all applicable categories in which he or she wishes to be licensed.

3.07. The Commissioner may furnish, for a fee, study guides for the use of persons preparing for the examinations given under the Act. The fees for this material shall be sufficient to cover the cost of printing and postage.

3.08. Examination security provisions:

(a) No applicant or licensee testing in any qualified supervisor or certified operator licensure category shall use any outside information not provided by the Commissioner or his designee while taking a closed book examination, remove any examination question or answer sheets from the room where the examination is given, nor shall any applicant or licensee cause any examination question or answer to be disseminated to any person not employed by the Commissioner by any means whatsoever.

(b) No applicant or licensee testing for a private applicator license, or person proctoring a private applicator test session, shall cause any examination question or answer to be disseminated to any person not employed by the Commissioner by any means whatsoever. No person other than the applicant or licensee may complete the private applicator examination form.

Part 4. Continuing Education Requirements.

Subpart A General Continuing Education Requirements for Qualified Supervisor and Certified Operator

4.01. In order to renew a license without examination, each qualified supervisor and each certified operator must obtain the following credits prior to the expiration of his license:

(a) 2 credits in the subject area of applicable state, federal, and local laws and regulations;

(b) 1 credit in the subject area of pesticides and their families;

(c) 1 credit in the subject area of applicator safety;

(d) 1 credit in the subject area of public safety;

(e) 1 credit in the subject area of environmental protection;

(f) 1 credit in the subject area of use of pesticides;

(g) 1 credit for each licensed category in the subject area of pest management except for those categories described in Part 4.01(h); and

(h) 2 credits for each of the following licensed categories: residential/commercial pest control, turf pest control and ornamental pest control.

4.02. In order for a qualified supervisor or a certified operator attending a course to receive relicensing or continuing education credit:

(a) the course must be approved in advance by the Commissioner;

(b) requests for approval must be in submitted by the course sponsor to the Commissioner on a form provided by the Commissioner;

(c) requests for approval must be submitted no less than thirty days prior to the course; and

(d) requests for approval must include:

(1) The proposed agenda, with the length of time for each session and a synopsis of the topics to be addressed in each course for which credit is being requested;

(2) The identity of all speakers for each pertinent course. Upon request, the course sponsor must provide the Commissioner with speaker credentials confirming licensure or expertise in the subject matter for which the speaker will provide training. The Commissioner may deny approval of a speaker if the credentials or experience does not relate to the subject matter the speaker will teach; and

(3) An explanation of the process the course sponsor will use to confirm the identity of each course attendee.

(e) Core category recertification sessions, as indicated in Subparts C – H of this Part 4, must be no less than 30 minutes in length. Pest Management recertification sessions, as indicated in Subpart I of this Part 4, must be no less than 60 minutes in length. Multiple sessions may be grouped sequentially to meet the minimum time requirements if the course sponsor can show attendance can be tracked across grouped sessions.

(f) Attendance at approved recertification courses must be open to any person holding a Colorado pesticide applicator license, subject to space limitations.

4.03. If the Commissioner receives a request for continuing education approval at least sixty days prior to the course date, the Commissioner will notify applicators of the approval for continuing education credits. The Commissioner will not provide notification of such approval if the request for its approval was received less than sixty days prior to the course.

4.04. The list of those attending each approved course shall be sent by the sponsor to the Commissioner no later than 7 days after the conclusion of the course. The sponsor must provide each licensed attendee confirmation of attendance of the course no more than 7 days after the conclusion of the course. It is the attendee's responsibility to confirm that his or her name appears on the attendance list for each course or session attended. The course sponsor must provide attendance confirmation to the Commissioner in writing or electronically, using a form provided by the Commissioner or in a format preapproved by the Commissioner.

4.05. A course will be approved for continuing education credit if, in the opinion of the Commissioner, it covers at least one topic from the following subject areas adequately to justify the approval for credit. (Subject areas and subtopics are listed in Subparts C - I of this Part 4.) Failure to meet any required recertification submission provision in this Part 4 may be grounds for course denial or future course denial.

Subpart B General Continuing Education Requirements For Private Applicators

4.06. In order to renew a license without examination, each private applicator must obtain the following credits prior to the expiration of his or her license:

(a) 2 credits in the subject area of applicable state, federal and local laws and regulations;

(b) 1 credit in the subject area of pesticides and their families;

(c) 1 credit in the subject area of applicator safety;

(d) 1 credit in the subject area of public safety;

(e) 1 credit in the subject area of environmental protection; and

(f) 1 credit in the subject area of use of pesticides.

4.07. In order for a private applicator attending a course to receive relicensing or continuing education credit:

(a) the course must be approved in advance by the Commissioner;

(b) requests for approval must be submitted by the course sponsor to the Commissioner on a form provided by the Commissioner;

(c) requests for approval must be submitted no less than thirty days prior to the course; and

(d) requests for approval must include:

(1) The proposed agenda, with the length of time for each session and a synopsis of the topics to be addressed in each course for which credit is being requested;

(2) The identity of all speakers for each pertinent course. Upon request, the course sponsor must provide the Commissioner with speaker credentials confirming licensure or expertise in the subject matter for which the speaker will provide training. The Commissioner may deny approval of a speaker if the credentials or experience do not relate to the subject matter the speaker will teach; and

(3) An explanation of the process the course sponsor will use to confirm the identity of each course attendee.

(e) Core category recertification sessions, as indicated in Subparts C – H of this Part 4, must be no less than 30 minutes in length. Multiple sessions may be grouped sequentially to meet the minimum time requirements if the course sponsor can show attendance can be tracked across grouped sessions.

(f) Attendance at approved recertification courses must be open to any person holding a Colorado pesticide applicator license, subject to space limitations.

4.08. If the Commissioner receives a request for continuing education approval at least sixty days prior to the course date, the Commissioner will notify applicators of the approval for continuing education credits. The Commissioner will not provide notification of such course approval if the request for its approval was received less than sixty days prior to the course.

4.09. The list of those attending each approved course shall be sent by the sponsor to the Commissioner no later than 7 days after the conclusion of the course. The sponsor must provide each licensed attendee confirmation of attendance of the course no more than 7 days after the

conclusion of the course. It is the attendee's responsibility to confirm that his or her name appears on the attendance list for each course or session attended. The course sponsor must provide attendance confirmation to the Commissioner in writing or electronically, using a form provided by the Commissioner or in a format preapproved by the Commissioner.

4.10. A course will be approved for continuing education credit if, in the opinion of the Commissioner, it covers at least one topic from the following subject areas adequately to justify the approval for credit. (Subject areas and subtopics are listed in Subparts C – H of this Part 4.) Failure to meet any required recertification submission provision in this Part 4 may be grounds for course denial or future course denial.

Subpart C Applicable State, Federal, and Local Laws and Regulations

4.11. State, federal and local regulations dealing with: pesticides, application, disposal, notification, transportation, registration, uses, licensing, worker protection, endangered species, storage, residues and tolerances, emergency planning and right to know, advertising, record keeping, business practices, insurance, training standards, supervision, responsibility of supervisors of non-certified applicators, agricultural chemicals and groundwater, or consumer protection.

4.12. Compliance problems/actions, analysis of most frequent violations, and discussions of specific problems and actions.

Subpart D Pesticides and Their Families

4.13. Pesticide label and labeling including: label requirements, label terminology, and effect of failure to comply with label requirements.

4.14. Pesticides in general including: families and types, mode of action, and other properties.

4.15. Formulation of pesticides: types, properties, advantages, limitations, toxicity, dilution, mixing, and uses.

4.16. Semiochemicals for pest detection and control.

4.17. Adjuvants and additives.

4.18. Specific pesticide characteristics and concepts including: compatibility, synergism, persistence, environmental fate, resistance, mode of action (contact, systemic, etc.), mobility, leachability, potential for biological concentration and/or accumulation, volatility, solubility, inert ingredients and/or carriers, and phytotoxicity.

4.19. National trends on pesticide problems.

Subpart E Applicator Safety

4.20. Safe use of pesticides by the applicator including: label requirements, transportation, mixing, loading, disposal, equipment cleanup, spill management, storage, application, and precautions to prevent exposure and injury.

4.21. Applicator protection including selection, care, and maintenance of protective clothing and safety equipment.

4.22. Human health effects including: acute and chronic toxicity, hazard determination, routes of exposure, symptoms of pesticide poisoning, and allergies.

4.23. First aid and emergency actions for pesticide exposure and use related injuries.

4.24. Reference sources pertinent to applicator safety including: Material Safety Data Sheet(s) (MSDS), telephone hotlines, emergency procedures, and label requirements.

4.25. Major label revisions and national trends and updates relevant to applicator safety.

4.26. Responsibilities of qualified supervisors, certified operators, technicians and other employees.

Subpart F Public Safety

4.27. Safe use of pesticides by the applicator including: label requirements, transportation, mixing, loading, disposal, equipment cleanup, spill management, storage, application, and precautions to prevent exposure and injury.

4.28. Human health effects including: acute and chronic toxicity, hazard determination, routes of exposure, symptoms of pesticide poisoning, and allergies.

4.29. Reference sources pertinent to public safety including: Material Safety Data Sheet (s) (MSDS), telephone hotlines, emergency procedures, and label requirements.

4.30. Major label revisions and national trends and updates relevant to public safety.

4.31. Responsibilities of qualified supervisors, certified operators, technicians and other employees.

4.32. Public education about pesticides and pesticide application, public relations, communication, professionalism, and trouble shooting.

4.33. Pesticide sensitivities, allergies, and phobias including chemophobia and entomophobia.

Subpart G Environmental protection

4.34. Precautions to protect the environment and minimize the effects of pest management on it, including: identification of meteorological and climatic factors affecting application (drift, runoff, etc.); identification of terrain, soil, substrata influence on possible surface and ground water contamination; recognition of sensitive areas and organisms that could be affected by application, drift and runoff such as endangered species, wildlife, ornamentals, beneficial insects, humans, and domestic animals; identification of methods of spill prevention, control, and cleanup; observation of preharvest intervals; timing of applications for specific pest controls; and pesticide storage and transportation.

4.35. Major label revisions and national trends and updates relevant to environmental protection.

4.36. Responsibilities of qualified supervisors, certified operators, technicians and other employees.

Subpart H Use

4.37. Mixing and loading including: proper mixing and loading techniques, label requirements, closed systems, adjuvants for drift control and other purposes, measuring, pH of water and other factors to consider, procedures for spill prevention, control and clean up, site location and construction, prevention of contamination, and security.

4.38. Application including: proper application techniques, techniques to control off target movement, new application techniques, procedures for spill prevention, control and clean up, label requirements, pest identification, and effective control.

4.39. Equipment including: calibration, selection of correct equipment for the job, maintenance and care, clean up, new equipment.

4.40. Storage and disposal including: bulk storage, label requirements, site requirements such as ventilation, containment, procedures for spill prevention, control and clean up, disposal of containers, rinsate, excess material, security, fire prevention, posting, temperature, and product separation to prevent cross contamination.

4.41. Responsibilities of qualified supervisors, certified operators, technicians and other employees.

4.42. Major label revisions and national trends and updates relevant to pesticide use.

4.43. Practical demonstration of use methods and techniques.

Subpart I Pest Management

4.44. Identification and biology including: principles of host and pest identification and recognition of such organisms, principles of site/habitat identification, damage and/or symptoms caused by pests, recognition of beneficial organisms, understanding host, pest and beneficial life cycles and susceptible stages, and evaluate environmental conditions and ecology on host and pest biology.

4.45. Pest management criteria including: determining economic or aesthetic threshold levels, consideration of environmental impact of control methods, selection of control method, post-treatment evaluation, ability to integrate various pest management methods, comparative effectiveness of management methods and techniques, sampling and survey techniques, host and pest resistance, effects of control methods on host and off target organisms, timing of control alternatives, and pest management history.

4.46. Chemical control methods and practices including: select material, formulation, and/or equipment, determine dosage of selected control, selection of proper pesticides and adjuvants for a particular job, and timing of pesticide application.

4.47. Alternative control methods and practices including: mechanical, biological, cultural, and physical methods, and timing of control methods.

4.48. References for decision making for pest management.

4.49. Major label revisions, evolution of pest management, and national trends and updates relevant to pest management.

Part 5. Technician Training.

Subpart A General

5.01. Definitions. For purposes of this Part 5 unless the context otherwise requires:

(a) “Applicator technician” means a technician whose job includes the use of pesticides;

(b) “Experienced technician” means a technician who has been trained and has the following minimum experience within the past 3 years: for applicator technicians doing structural applications, 6 months of experience including time in training, for applicator technicians doing agricultural, turf, ornamental or turf and ornamental applications, 1 season of experience including time in training, and for sales technicians, 1 season of sales experience;

(1) “New hire experienced technician” means any technician who has met the experience requirements, outlined in Part 5.01(b), within the last 3 years, but is a new employee of a commercial applicator, registered limited commercial applicator, or registered public applicator.

(2) "On-going experienced applicator technician" means an individual who has met the definition of an experienced technician and continues to work for the same commercial applicator, registered limited commercial applicator, or registered public applicator.

(c) "Sales technician" means a technician whose sole job is selling application services; and

(d) "Selling application services" means the sale of a pesticide application. Selling application services does not include the sale of an evaluation service, inspection service, or recommendation service. To qualify as a sale of an application service, the seller must make an evaluation of pest problems or a recommendation of pest controls using pesticides. A seller does not make an evaluation of pest problems or a recommendation of pest controls using pesticides if the seller answers questions from a customer using an answer sheet prepared by a licensed qualified supervisor.

(e) "Flagger technician" means an individual employed and compensated by the applicator who designates, with a flag or any other identification, the alignment of a pesticide application during the application of pesticides at that site.

5.02. Scope of Part 5.

(a) A person will not be considered a technician for purposes of these Rules if said person uses, sells, or recommends a general use pesticide while under the on-site supervision of a qualified supervisor.

(b) A person who evaluates any pest problem while under the on-site supervision of a qualified supervisor will not be considered a technician.

(c) Use or sales of restricted use pesticides by a technician:

(1) A person must be a trained technician ~~or must be training to be a technician~~ if said person uses a restricted use pesticide while under the on-site supervision of a qualified supervisor.

(2) A person must be training to be a technician to sell or recommend a restricted use pesticide while under the on-site supervision of a qualified supervisor.

(3) A person must be a trained technician to sell or recommend a restricted use pesticide while under the supervision of a qualified supervisor.

(4) All requirements for direct supervision at 40 C.F.R. § 171.201 (2017) (as incorporated herein by reference) must be met prior to a technician using a restricted use pesticide under the on-site supervision of a qualified supervisor.

(d) A person must be a technician or must be training to be a technician if said person uses, sells, or recommends a general use pesticide while on the job with a certified operator or experienced technician.

(e) A person may not use, sell, or recommend, general use pesticides unaccompanied by a qualified supervisor, certified operator, or experienced technician without completing the training required by these Rules.

(f) For the purposes of determining if a person is experienced and/or trained, upon a showing of exceptional circumstances by a commercial applicator, the Commissioner may waive all or part of the experience and training requirements specified in these

Rules. The Commissioner may accept, with sufficient verification, valid relevant field experience and training obtained from sources other than the commercial applicator in this state or any other state so long as safety is not compromised and the person has the necessary pertinent application skills.

(g) The amount of time given to each topic covered by these Rules is discretionary with the trainer. However, the technician's training must be relevant to each technician's job duties.

(h) Each commercial, registered limited commercial, or registered public applicator licensed or registered in any category shall record the training provided to each technician on a form or forms provided by the Commissioner. Any such form(s) must be completed in full in order to comply with this Part 5.02(h).

(i) Each commercial, registered limited commercial, or registered public applicator licensed or registered in any category may give a written examination to trained technicians to determine the comprehension of subjects covered by the training. However, said examination shall not in any manner substitute for any of the training required by these Rules.

(j) This Part 5 shall not apply to limited commercial applicator and public applicators not registered with the Department pursuant to Section 35-10-109, C.R.S., which are regulated by Part 16 of these Rules.

(k) All technician training conducted under this Part 5 and its Subparts must conform with all noncertified applicator training requirements in 40 C.F.R. § 171.201~~(d)~~ (2017) (as incorporated herein by reference).

(l) A commercial, registered limited or registered public applicator must obtain training records to verify that any new-hire experienced technician has met all the training requirements in this Part 5. These records must be maintained as part of the technician's training record in accordance with Part 5.02(m) below.

(m) Each commercial, registered limited commercial, or registered public applicator must maintain the training record(s) as follows~~:~~.

(1) The original training record reflecting all required classroom and on-the-job training hours, in accordance with Part 5 and its subparts for the category being trained in, must be maintained for the entirety of the technician's employment and for three years after the technician's separation from the employer~~;~~.

(2) The on-going training record reflecting all required training hours and topics, in accordance with Part 5 and its subparts for the category being trained in, must be maintained for a minimum of three years from the date training was conducted.

(3) A copy of all training records must be provided to the applicator technician upon request and must be provided to the Commissioner upon request.

Subpart B Agricultural

5.03. Except as otherwise expressly provided in these Rules, each applicator technician and flagger technician working for a commercial applicator, registered limited commercial applicator, or registered public applicator licensed or registered in any agricultural category shall have at a minimum 36 hours of training:

(a) At least 12 hours of which shall be classroom-instructional training covering: applicable State, Federal, and local laws and regulations, environmental precautions, use, equipment and calibration, pesticides and their families, pest management, applicator safety, pesticide label and labeling, host and pest identification, and public safety; and

(b) At least 24 hours of which shall be on the job training. At least 8 hours of this training shall be conducted by a licensed qualified supervisor or a licensed certified operator which licensed certified operator has at least 1 season of agricultural pesticide application experience within the last 2 years. No more than 16 hours of said on the job training may be conducted by an experienced technician trained by the applicator. Said training shall cover: environmental precautions, use, equipment and calibration, pesticides and their families, pest management, applicator safety, pesticide label and labeling, host and pest identification, and public safety.

5.04. Except as otherwise expressly provided in these Rules, each sales technician working for a commercial applicator licensed in any agricultural category shall have at a minimum 36 hours of training:

(a) At least 12 hours of which shall be classroom-instructional training covering: applicable State, Federal, and local laws and regulations, environmental precautions, pesticides and their families, pest management, pesticide label and labeling, host and pest identification, and public safety;

(b) At least 16 hours of which shall be on the job training. At least 8 hours of this training shall be conducted by a licensed qualified supervisor or a licensed certified operator which licensed certified operator has at least 1 season of agricultural pesticide application experience within the last 2 years. No more than 8 hours of said on the job training may be conducted by an experienced technician trained by the applicator. Said training shall cover: environmental precautions, pesticides and their families, pest management, pesticide label and labeling, host and pest identification, and public safety; and

(c) The remaining 8 hours shall be divided between classroom-instructional training and on the job training as the need is determined by the qualified supervisor.

5.05. Except as otherwise expressly provided in these Rules, each on-going experienced applicator technician, flagger technician, and sales technician continuing to work for the same commercial applicator, registered limited commercial applicator, or registered public applicator licensed or registered in any agricultural category shall have, during each year of employment after the first season of experience, at a minimum, the following on-going training: 4 hours of training conducted by a licensed qualified supervisor or licensed certified operator which licensed certified operator has at least 1 season of agricultural pesticide application experience within the last 2 years. The qualified supervisor shall determine from those topics enumerated in Part 5.03 the training required. Said training may be either classroom-instructional or on the job training as determined by the qualified supervisor.

5.06. Except as otherwise expressly provided in these Rules, each new hire experienced technician and flagger technician working for a commercial applicator, registered limited commercial applicator, or registered public applicator licensed or registered in any agricultural category shall have at a minimum 16 hours of training:

(a) At least 4 hours of which shall be classroom-instructional training covering: applicable State, Federal, and local laws and regulations, environmental precautions, use, equipment and calibration, pesticides and their families, pest management, applicator safety, pesticide label and labeling, host and pest identification, and public safety;

(b) At least 8 hours of which shall be on the job training conducted by a licensed qualified supervisor or a licensed certified operator which licensed certified operator has at least 1 season of agricultural pesticide application experience within the last 2 years. Said training shall cover: environmental precautions, use, equipment and calibration, pesticides and their families, pest management, applicator safety, pesticide label and labeling, host and pest identification, and public safety;

(c) The remaining 4 hours shall be divided between classroom-instructional training and on the job training as the need is determined by the qualified supervisor; and

(d) Experienced sales technicians are not required to complete training in use, equipment and calibration nor applicator safety.

Subpart C Turf

5.07. Each applicator technician working for a commercial applicator, registered limited commercial applicator, or registered public applicator licensed or registered in the turf category shall have at a minimum 36 hours of training:

(a) At least 8 hours of which shall be classroom-instructional training covering: applicable State, Federal, and local laws and regulations, environmental precautions, use, equipment and calibration, pesticides and their families, applicator safety, pesticide label and labeling, and public safety;

(b) At least 4 hours of which shall be classroom-instructional training covering: pest management and host and pest identification; and

(c) At least 24 hours of which shall be on the job training. At least 8 hours of this training shall be conducted by a licensed qualified supervisor or a licensed certified operator which licensed certified operator has at least 1 season of turf pesticide application experience within the last 2 years. No more than 16 hours of said on the job training may be conducted by an experienced technician trained by the applicator. Said training shall cover: environmental precautions, use, equipment and calibration, pesticides and their families, pest management, applicator safety, pesticide label and labeling, host and pest identification, and public safety.

5.08. Each sales technician working for a commercial applicator licensed in the turf category shall have at a minimum 40 hours of training:

(a) At least 8 hours of which shall be classroom-instructional training covering: applicable State, Federal, and local laws and regulations, environmental precautions, pesticides and their families, pesticide label and labeling, and public safety;

(b) At least 8 hours of which shall be classroom-instructional training covering: pest management and host and pest identification; and

(c) At least 24 hours of which shall be on the job training. At least 8 hours of this training shall be conducted by a licensed qualified supervisor or a licensed certified operator which licensed certified operator has at least 1 season of turf pesticide application experience within the last 2 years. No more than 16 hours of said on the job training may be conducted by an experienced technician trained by the applicator. Said training shall cover: environmental precautions, pesticides and their families, pest management, pesticide label and labeling, host and pest identification, and public safety.

5.09. Each technician who acts as both a sales technician and an applicator technician working for a commercial applicator, registered limited commercial applicator, or registered public applicator licensed or registered in the turf category shall have at a minimum 48 hours of training:

(a) At least 8 hours of which shall be classroom-instructional training covering: applicable State, Federal, and local laws and regulations, environmental precautions, use, equipment and calibration, pesticides and their families, applicator safety, pesticide label and labeling, and public safety;

(b) At least 16 hours of which shall be classroom-instructional training covering: pest management and host and pest identification; and

(c) At least 24 hours of which shall be on the job training. At least 8 hours of this training shall be conducted by a licensed qualified supervisor or a licensed certified operator which licensed qualified supervisor or licensed certified operator has at least 1 season of turf pesticide application experience within the last 2 years. No more than 16 hours of said on the job training may be conducted by an experienced technician trained by the applicator. Said training shall cover: environmental precautions, use, equipment and calibration, pesticides and their families, pest management, applicator safety, pesticide label and labeling, host and pest identification, and public safety.

5.10. Each on-going experienced applicator technician and sales technician continuing to work for the same commercial applicator, registered limited commercial applicator, or registered public applicator licensed or registered in the turf category shall have, during each year of employment after the first season of experience, at a minimum, the following on-going training: 4 hours of training conducted by a licensed qualified supervisor or licensed certified operator which licensed certified operator has at least 1 year of turf pesticide application experience within the last 2 years. The qualified supervisor shall determine from those topics enumerated in Part 5.09 the training required. Said training may be either classroom-instructional or on the job training as determined by the qualified supervisor.

5.11. Each new hire experienced technician working for a commercial applicator, registered limited commercial applicator, or registered public applicator licensed or registered in the turf category shall have at a minimum 16 hours of training:

(a) At least 4 hours of which shall be classroom-instructional training covering: applicable State, Federal, and local laws and regulations, environmental precautions, use, equipment and calibration, pesticides and their families, pest management, applicator safety, pesticide label and labeling, host and pest identification, and public safety;

(b) At least 8 hours of which shall be on the job training conducted by a licensed qualified supervisor or a licensed certified operator which licensed qualified supervisor or licensed certified operator has at least 1 season of turf pesticide application experience within the last 2 years which training shall cover: use, equipment and calibration, pesticides and their families, pest management, applicator safety, pesticide label and labeling, host and pest identification, and public safety;

(c) The remaining 4 hours shall be divided between classroom and the job site as the need is determined by the qualified supervisor; and

(d) Experienced sales technicians are not required to complete training in use, equipment and calibration nor applicator safety.

Subpart D Ornamental

5.12. Each applicator technician working for a commercial applicator, registered limited commercial applicator, or registered public applicator licensed or registered in the ornamental category shall have at a minimum 40 hours of training:

(a) At least 8 hours of which shall be classroom-instructional training covering: applicable State, Federal, and local laws and regulations, environmental precautions, use, equipment and calibration, pesticides and their families, applicator safety, pesticide label and labeling, and public safety;

(b) At least 8 hours of which shall be classroom-instructional training covering: pest management and host and pest identification; and

(c) At least 24 hours of which shall be on the job training. At least 8 hours of this training shall be conducted by a licensed qualified supervisor or a licensed certified operator which licensed certified operator has at least 1 season of ornamental pesticide application experience within the last 2 years. No more than 16 hours of said on the job training may be conducted by an experienced technician trained by the applicator. Said training shall cover: environmental precautions, use, equipment and calibration, pesticides and their families, pest management, applicator safety, pesticide label and labeling, host and pest identification, and public safety.

5.13. Each sales technician working for a commercial applicator licensed in the ornamental category shall have at a minimum 48 hours of training:

(a) At least 8 hours of which shall be classroom-instructional training covering: applicable State, Federal, and local laws and regulations, environmental precautions, pesticides and their families, pesticide label and labeling, and public safety;

(b) At least 16 hours of which shall be classroom-instructional training covering: pest management and host and pest identification; and

(c) At least 24 hours of which shall be on the job training. At least 8 hours of this training shall be conducted by a licensed qualified supervisor or a licensed certified operator which licensed certified operator has at least 1 season of ornamental pesticide application experience within the last 2 years. No more than 16 hours of said on the job training may be conducted by an experienced technician trained by the applicator. Said training shall cover: environmental precautions, pesticides and their families, pest management, pesticide label and labeling, host and pest identification, and public safety.

5.14. Each technician who acts as both a sales technician and as an applicator technician working for a commercial applicator, registered limited commercial applicator, or registered public applicator licensed or registered in the ornamental category shall have at a minimum 56 hours of training:

(a) At least 8 hours of which shall be classroom-instructional training covering: applicable State, Federal, and local laws and regulations, environmental precautions, use, equipment and calibration, pesticides and their families, applicator safety, pesticide label and labeling, and public safety;

(b) At least 24 hours of which shall be classroom-instructional training covering: pest management and host and pest identification; and

(c) At least 24 hours of which shall be on the job training. At least 8 hours of this training shall be conducted by a licensed qualified supervisor or a licensed certified operator which licensed certified operator has at least 1 season of ornamental pesticide application experience within the last 2 years. No more than 16 hours of said on the job

training may be conducted by an experienced technician trained by the applicator. Said training shall cover: environmental precautions, use, equipment and calibration, pesticides and their families, pest management, applicator safety, pesticide label and labeling, host and pest identification, and public safety.

5.15. Each on-going experienced applicator technician and sales technician continuing to work for the same commercial applicator, registered limited commercial applicator, or registered public applicator licensed or registered in the ornamental category shall have, during each year of employment after the first season of experience, at a minimum, the following on-going training: 4 hours of training conducted by a licensed qualified supervisor or licensed certified operator which licensed certified operator has at least 1 year of ornamental pesticide application experience within the last 2 years. The qualified supervisor shall determine from those topics enumerated in Part 5.14 the training required. Said training may be either classroom-instructional or on the job training as determined by the qualified supervisor.

5.16. Each new hire experienced technician working for a commercial applicator, registered limited commercial applicator, or registered public applicator licensed or registered in the ornamental category shall have at a minimum 16 hours of training:

(a) At least 4 hours of which shall be classroom-instructional training covering: applicable State, Federal, and local laws and regulations, environmental precautions, use, equipment and calibration, pesticides and their families, pest management, applicator safety, pesticide label and labeling, host and pest identification, and public safety;

(b) At least 8 hours of which shall be on the job training conducted by a licensed qualified supervisor or a licensed certified operator which licensed qualified supervisor or licensed certified operator has at least 1 season of ornamental pesticide application experience within the last 2 years. Said training shall cover: use, equipment and calibration, pesticides and their families, pest management, applicator safety, pesticide label and labeling, host and pest identification, and public safety;

(c) The remaining 4 hours shall be divided between classroom and the job site as the need is determined by the qualified supervisor; and

(d) Experienced sales technicians are not required to complete training in use, equipment and calibration nor applicator safety.

Subpart E Turf and Ornamental

5.17. Each applicator technician working for a commercial applicator, registered limited commercial applicator, or registered public applicator licensed or registered in both the turf category and the ornamental category shall have at a minimum 60 hours of training:

(a) At least 8 hours of which shall be classroom-instructional training covering: applicable State, Federal, and local laws and regulations, environmental precautions, use, equipment and calibration, pesticides and their families, applicator safety, pesticide label and labeling, and public safety;

(b) At least 12 hours of which shall be classroom-instructional training covering: pest management and host and pest identification; and

(c) At least 40 hours of which shall be on the job training. At least 16 hours of this training shall be conducted by a licensed qualified supervisor or a licensed certified operator which licensed certified operator has at least 1 season of turf and ornamental pesticide application experience within the last 2 years. No more than 24 hours of said on the job training may be conducted by an experienced technician trained by the applicator. Said

training shall cover: environmental precautions, use, equipment and calibration, pesticides and their families, pest management, applicator safety, pesticide label and labeling, host and pest identification, and public safety.

5.18. Each sales technician working for a commercial applicator licensed in both the turf category and the ornamental category shall have at a minimum 64 hours of training:

(a) At least 8 hours of which shall be classroom-instructional training covering: applicable State, Federal, and local laws and regulations, environmental precautions, pesticides and their families, pesticide label and labeling, and public safety;

(b) At least 24 hours of which shall be classroom-instructional training covering: pest management and host and pest identification; and

(c) At least 32 hours of which shall be on the job training, at least 8 hours of this training shall be conducted by a licensed qualified supervisor or a licensed certified operator which licensed qualified supervisor or licensed certified operator has at least 1 season of turf and ornamental pesticide application experience within the last 2 years. No more than 24 hours of said on the job training may be conducted by an experienced technician trained by the applicator. Said training shall cover environmental precautions, pesticides and their families, pest management, pesticide label and labeling, host and pest identification, and public safety.

5.19. Each technician who acts as both a sales technician and as an applicator technician working for a commercial applicator, registered limited commercial applicator, or registered public applicator licensed or registered in both the turf category and the ornamental category shall have at a minimum 80 hours of training:

(a) At least 8 hours of which shall be classroom-instructional training covering: applicable State, Federal, and local laws and regulations, environmental precautions, use, equipment and calibration, pesticides and their families, applicator safety, pesticide label and labeling, and public safety;

(b) At least 32 hours of which shall be classroom-instructional training covering: pest management and host and pest identification; and

(c) At least 40 hours of which shall be on the job training. At least 8 hours of this training shall be conducted by a licensed qualified supervisor or a licensed certified operator which licensed certified operator has at least 1 season of turf and ornamental pesticide application experience within the last 2 years. No more than 32 hours of said on the job training may be conducted by an experienced technician trained by the applicator. Said training shall cover environmental precautions, use, equipment and calibration, pesticides and their families, pest management, applicator safety, pesticide label and labeling, host and pest identification, and public safety.

5.20. Each on-going experienced applicator technician and sales technician continuing to work for the same commercial applicator, registered limited commercial applicator, or registered public applicator licensed or registered in both the turf category and the ornamental category shall have, during each year of employment after the first season of experience, at a minimum, the following on- going training: 4 hours of training conducted by a licensed qualified supervisor or licensed certified operator which licensed certified operator has at least 1 year of turf and ornamental pesticide application experience within the last 2 years. The qualified supervisor shall determine from those topics enumerated in Part 5.19 the training required. Said training may be either classroom-instructional or on the job training as determined by the qualified supervisor.

5.21. Each new hire experienced technician working for a commercial applicator, registered limited commercial applicator, or registered public applicator licensed or registered in both the turf category and the ornamental category shall have at a minimum 16 hours of training:

(a) At least 4 hours of which shall be classroom-instructional training covering: applicable State, Federal, and local laws and regulations, environmental precautions, use, equipment and calibration, pesticides and their families, pest management, applicator safety, pesticide label and labeling, host and pest identification, and public safety;

(b) At least 8 hours of which shall be on the job training conducted by a licensed qualified supervisor or a licensed certified operator which licensed certified operator has at least 1 season of turf and ornamental pesticide application experience within the last 2 years. Said training shall cover: environmental precautions, use, equipment and calibration, pesticides and their families, pest management, applicator safety, pesticide label and labeling, host and pest identification, and public safety;

(c) The remaining 4 hours shall be divided between classroom and the job site as the need is determined by the qualified supervisor; and

(d) Experienced sales technicians are not required to complete training in use, equipment and calibration nor applicator safety.

Subpart F Structural

5.22. Each applicator technician and sales technician working for a commercial applicator, registered limited commercial applicator, or registered public applicator licensed or registered in the structural categories of wood destroying organism pest control, fumigation, or residential/commercial pest control shall have at a minimum 160 hours of training:

(a) At least 32 hours of which shall be classroom-instructional training covering: applicable State, Federal, and local laws and regulations, environmental precautions, use, equipment and calibration, pesticides and their families, pest management, applicator safety, pesticide label and labeling, host and pest identification, and public safety;

(b) At least 120 hours of which shall be on the job training. At least 60 hours of this training shall be conducted by a licensed qualified supervisor or a licensed certified operator which licensed certified operator has at least 1 year of structural pesticide application experience within the last 2 years. No more than 60 hours of said on the job training may be conducted by an experienced technician trained by the applicator. Said training shall cover: environmental precautions, use, equipment and calibration, pesticides and their families, applicator safety, pesticide label and labeling, host and pest identification, and public safety;

(c) The remaining 8 hours shall be divided between classroom-instructional training and on the job training as the need is determined by the qualified supervisor; and

(d) Successfully complete a written examination prepared and given by the commercial applicator showing overall comprehension of the subject matter of the training.

5.23. Each on-going experienced applicator technician and sales technician continuing to work for a commercial applicator, registered limited commercial applicator, or registered public applicator licensed or registered in the structural categories of wood destroying organism pest control, fumigation, or residential/commercial pest control shall have during each year of employment after the first season of experience, at a minimum, the following on-going training:

(a) 2 hours per month of training which training shall over a period of 6 months include at least 3 hours of classroom-instructional training. 9 hours shall be divided between classroom-instructional training and on the job training as the need is determined by the qualified supervisor. Said classroom-instructional training and on the job training shall be conducted by either a licensed qualified supervisor or licensed certified operator which licensed certified operator has at least 1 year of structural pesticide application experience within the last 2 years. Said training shall cover those areas enumerated in Part 5.22; and

(b) Successfully complete a written examination prepared and given by the commercial applicator showing overall comprehension of the subject matter of the training.

5.24. Each new hire experienced technician working for a commercial applicator, registered limited commercial applicator, or registered public applicator licensed or registered in the structural categories of wood destroying organism pest control, fumigation, or residential/commercial pest control shall have at a minimum 32 hours of training:

(a) At least 16 hours of which shall be classroom-instructional training covering: applicable State, Federal, and local laws and regulations, environmental precautions, use, equipment and calibration, pesticides and their families, pest management, applicator safety, pesticide label and labeling, host and pest identification, and public safety; and

(b) At least 16 hours of which shall be the job training conducted by a licensed qualified supervisor or a licensed certified operator which licensed certified operator has at least 1 year of structural pesticide application experience within the last 2 years which training shall cover: use, equipment and calibration, applicator safety, pesticide label and labeling, host and pest identification, and public safety.

(c) Experienced sales technicians are not required to complete training in use, equipment and calibration nor applicator safety.

5.25. Each applicator technician working for a commercial applicator, registered limited commercial applicator, or registered public applicator licensed or registered in the structural categories of outdoor vertebrate pest control, stored commodities treatment, Post-Harvest Potato Pest Control, wood preservation and wood products treatment, or interior plant pest control shall have at a minimum 36 hours of training:

(a) At least 12 hours of which shall be classroom-instructional training covering: applicable State, Federal, and local laws and regulations, environmental precautions, use, equipment and calibration, pesticides and their families, pest management, applicator safety, pesticide label and labeling, host and pest identification, and public safety; and

(b) At least 24 hours of which shall be on the job training. At least 8 hours of this training shall be conducted by a licensed qualified supervisor or a licensed certified operator which licensed certified operator has at least 1 season of structural pesticide application experience within the last 2 years. No more than 16 hours of said on the job training may be conducted by an experienced technician trained by the applicator. Said training shall cover: environmental precautions, use, equipment and calibration, pesticides and their families, pest management, applicator safety, pesticide label and labeling, host and pest identification, and public safety.

5.26. Each sales technician working for a commercial applicator licensed in the structural categories of outdoor vertebrate pest control, stored commodities treatment, Post-Harvest Potato Pest Control, wood preservation and wood products treatment, or interior plant pest control shall have at a minimum 36 hours of training:

(a) At least 12 hours of which shall be classroom-instructional training covering: applicable State, Federal, and local laws and regulations, environmental precautions, pesticides and their families, pest management, pesticide label and labeling, host and pest identification, and public safety;

(b) At least 16 hours of which shall be on the job training. At least 8 hours of this training shall be conducted by a licensed qualified supervisor or a licensed certified operator which licensed certified operator has at least 1 season of structural pesticide application experience within the last 2 years. No more than 8 hours of said on the job training may be conducted by an experienced technician trained by the applicator. Said training shall cover: environmental precautions, pesticides and their families, pest management, pesticide label and labeling, host and pest identification, and public safety; and

(c) The remaining 8 hours shall be divided between classroom-instructional training and on the job training as the need is determined by the qualified supervisor.

5.27. Each on-going experienced applicator technician and sales technician continuing to work for the same commercial applicator, registered limited commercial applicator, or registered public applicator licensed or registered in the structural categories of outdoor vertebrate pest control, stored commodities treatment, Post-Harvest Potato Pest Control, wood preservation and wood products treatment, or interior plant pest control shall have, during each year of employment after the first season of experience, at a minimum, the following on-going training: 4 hours of training conducted by a licensed qualified supervisor or licensed certified operator which licensed certified operator has at least 1 season of structural pesticide application experience within the last 2 years. The qualified supervisor shall determine from those topics enumerated in Part 5.25 the training required. Said training may be either classroom-instructional or on the job training as determined by the qualified supervisor.

5.28. Each new hire experienced technician working for a commercial applicator, registered limited commercial applicator, or registered public applicator licensed or registered in the structural categories of outdoor vertebrate pest control, stored commodities treatment, ~~Post-Harvest Potato Pest Control~~post-harvest potato pest control, wood preservation and wood products treatment, or interior plant pest control shall have at a minimum 16 hours of training:

(a) At least 4 hours of which shall be classroom-instructional training covering: applicable State, Federal, and local laws and regulations, environmental precautions, use, equipment and calibration, pesticides and their families, pest management, applicator safety, pesticide label and labeling, host and pest identification, and public safety;

(b) At least 8 hours of which shall be on the job training conducted by a licensed qualified supervisor or a licensed certified operator which licensed certified operator has at least 1 season of structural pesticide application experience within the last 2 years. Said training shall cover: environmental precautions, use, equipment and calibration, pesticides and their families, pest management, applicator safety, pesticide label and labeling, host and pest identification, and public safety;

(c) The remaining 4 hours shall be divided between classroom-instructional training and on the job training as the need is determined by the qualified supervisor; and

(d) Experienced sales technicians are not required to complete training in use, equipment and calibration nor applicator safety.

Part 6. Records.

Subpart A Recordkeeping Requirements for Commercial, Registered Limited Commercial and Registered Public Applicators

6.01. Licensed commercial applicators shall maintain accurate and legible office records of each application of pesticides made for hire. Commercial applicators using devices shall maintain records in accordance with Part 15.07 of these Rules.

6.02. Registered limited commercial and registered public applicators shall maintain accurate and legible office records of each application of pesticides.

6.03. Except for device applications as provided in Part 6.01, such records shall include all of the following information:

(a) Name and address of person for whom application was made.

(b) Location where application was made, if different from Part 6.03(a). The location of a field should be fully described. In the case of roadside weed control applications, the record should include the county or state road number and the portion of roadside treated, described by reference to mileage markers or prominent geological features such as road intersections, river or creek crossings, or the like.

(c) Target pest. This means the specific pest for which the application was made. A general term is acceptable only if the pesticide label specifically refers to that exact term (such as “broadleaf weeds”).

(d) Site, crop, commodity or structure treated.

(e) Specific pesticide applied. This shall be accomplished by recording the EPA registration number of the pesticide product. The brand name of the pesticide product and the name and address of its manufacturer may also be included in this record.

(f) Dilution rate. This is the amount of formulated product or active material per unit of volume of carrier specified as such. In the case of a product applied out of the container without mixing, the entry should be “no dilution”, “aerosol”, or “RTU” (ready to use), as applicable.

(g) Application rate. This is the total gallons or pounds of the final tank mix applied per unit of area or volume. In the case of “crack and crevice” structural treatment, the entry should indicate “crack and crevice”. The entry for a livestock application should indicate “dip” or “spray”, as appropriate. In the case of an application of a pesticide labeled “spray until wet,” “spray to runoff,” or the like, the entry should indicate the nature of the application in language consistent with the label directions.

(h) Carrier, if other than water.

(i) Date and time of application. The record shall indicate the time, within at least one-half hour accuracy, when the application was started or stopped. Each applicator's records shall be kept consistently and clearly, in such a manner as to allow ready determination as to whether a noted time indicates the beginning or end of the application. An entry merely stating “A.M.” or “P.M.” is not sufficient to comply with this Rule.

(j) Name and license number of the person who made or supervised the application (i.e., technician, certified operator, qualified supervisor). If a restricted use pesticide application is performed by an applicator technician, the record of application shall include the names of both the technician and the responsible on-site qualified supervisor.

(k) Endangered Species Protection Bulletin for the county and month in which the application was made for any pesticide product used, when required by the label. If there is not an

active Endangered Species Bulletin use limitation for the county and month in which the application was made, no Endangered Species Protection Bulletin is required to be maintained in the applicator's records. For purposes of complying with this Part 6.03(k), a single Endangered Species Bulletin record may be applied to multiple applications that are subject to that Bulletin.

6.04. Any applicator performing wood destroying insect control, for the control of termites, shall keep, in addition to record keeping requirements outlined in Part 6.03 above, the following information:

(a) For all commercial pre-construction treatments, the licensee must maintain records of square footage treated per application site, flow rate of the application equipment, and the start and stop time for the treatment. If a physical barrier is used, the square footage of the physical barrier shall be recorded and a diagram describing the installation shall be provided.

(b) Each post construction termite liquid and bait treatment record shall include:

(1) A diagram, blueprint, or building plat and a description of the structure or structures to be treated, including the following:

(i) Approximate measurements as accurately as practical;

(ii) Areas of known current termite activity;

(iii) Areas of known previous termite activity;

(iv) Areas of known conditions conducive to termite activity;

(v) Areas to be treated and by what means, (i.e.: slab injection, trenching).

(2) A copy of the signed customer contract and any warranty information provided to the customer, including any job specific exclusions, limitations or amendments.

(3) An original or legible copy of the original label for any pesticide used.

(4) The signature of approval on the proposed treatment diagram by a qualified supervisor licensed in the wood destroying organism category who is employed by or associated with the applicator making the proposal.

(5) For termite baiting programs:

(i) The number and locations of baiting and monitoring stations to be installed;

(ii) All service inspections of termite bait stations must be kept as part of that customer's service record and service frequency must be performed as recommended by the manufacturer's label requirements.

Subpart B Recordkeeping Requirements for Private Applicators

6.05. Licensed private applicators shall maintain accurate and legible records of each restricted use pesticide application in accordance with all regulations of the United States Department of Agriculture's federal pesticide recordkeeping requirements set forth in the Code of Federal Regulations at 7 C.F.R. Part 110 (2017) (as incorporated herein by reference). Pursuant to § 35-10-111 of the Act, such records shall be retained for a period of two years from the date of the pesticide application.

Part 7. Business Practices, Equipment Identification, Notices.

7.01. Equipment identification.

(a) For the purposes of subparagraphs (b) and (c) below, the term “company business name” includes any name or trademark registered with the Colorado Secretary of State, any doing business as name as submitted in the licensee’s application, and any company logo that clearly communicates the licensee’s business name.

(b) Commercial applicator equipment identification:

(1) All motor vehicles, trailers, and mobile application equipment while used by or on behalf of any licensee for applying or carrying pesticides shall be identified by displaying thereon, in letters not less than two inches high, the company business name and, in letters not less than one inch high, the city and state of said licensee's place of business. Such lettering on a licensee's equipment shall be clearly legible~~,~~ and shall not be rendered difficult to read or illegible by means of paint fading, scuffing, wear and tear, damage, or any other cause. Any motor vehicle so identified shall be identified on both sides of the vehicle. This Part 7.01(b)(1) shall not apply to aircraft, small capacity sprayers with less than a ten-gallon capacity, and application equipment mounted on vehicles marked in accordance with these Rules.

(2) Vehicles with a spray tank holding more than a ten-gallon capacity that due to the size or design of the vehicle do not provide sufficient surface area to comply with the identification requirements outlined in Part 7.01(b)(1) shall be identified by displaying thereon, in letters not less than one inch high, the company business name of said licensee. Such lettering on a licensee's equipment shall be clearly legible~~,~~ and shall not be rendered difficult to read or illegible by means of paint fading, scuffing, wear and tear, damage, or any other cause. Any motor vehicle so identified shall, at a minimum, be identified on one side of the vehicle.

(c) Public applicator equipment identification:

(1) Any public applicator registered with the Department shall identify all motor vehicles, trailers, and mobile application equipment while used by or on behalf of such registrant for applying or carrying pesticides by displaying, in letters not less than two inches high, the city or state name, or a logo identifying the registered public entity they represent. Such lettering on a registrant's equipment shall be positioned and maintained so as to be clearly legible~~,~~ and shall not be rendered difficult to read or illegible by means of paint fading, scuffing, wear and tear, damage, or any other cause. Any motor vehicle so identified shall be identified on both sides of the vehicle. This Part 7.01(c)(1) shall not apply to aircraft, small capacity sprayers with less than a ten-gallon capacity, and application equipment mounted on vehicles marked in accordance with these Rules.

(2) Vehicles with a spray tank holding more than a ten-gallon capacity that due to the size or design of the vehicle do not provide sufficient surface area to comply with the identification requirements outlined in Part 7.01(c)(1) shall be identified by displaying thereon, in letters not less than one inch high, the city or state name, or logo, identifying which public entity they represent. Such lettering on a registrant's equipment shall be clearly legible~~,~~ and shall not be rendered difficult to read or illegible by means of paint fading, scuffing, wear and tear, damage, or any other cause. Any motor vehicle so identified shall, at a minimum, be identified on one side of the vehicle.

7.02. All licensees must inform the Commissioner, in writing, of any change in their address or telephone number.

7.03. Each qualified supervisor or certified operator must notify the Commissioner in writing when he or she begins employment with a commercial, registered limited commercial, or registered public applicator, terminates employment, or when he or she changes branches, divisions, satellite offices or employers. Such notification shall be within 15 days of said employment, termination, or change.

7.04. Each commercial, registered limited commercial, and registered public applicator must notify the Commissioner in writing when a qualified supervisor in its employ terminates employment, or changes branches, divisions or satellite offices, or when adding a qualified supervisor to its staff. Such notification shall be within 15 days of said termination, change, or addition.

7.05 The original product container with labeling or a copy of the pesticide label and any associated labeling for the intended use, for each product in use shall be in the possession of the commercial, registered limited commercial, or registered public applicator employee at the site of application whenever a pesticide application is performed. This Part 7.05 shall not apply to aerial applicators, private applicators, or Endangered Species Protection bulletins referenced on the label.

Part 8. Agricultural Applicators.

8.01. The agricultural classification includes the following categories:

(a) Category 101: Agricultural Insect Control: the application of pesticides to agricultural plants, including applications performed on pastures, croplands and non-crop agricultural lands, to control invertebrate pests, including insects, mites, slugs, snails, and nematodes.

(b) Category 102: Agricultural Plant Disease Control: the application of pesticides to agricultural plants, including applications performed on pastures, croplands and non-crop agricultural lands, to control plant diseases.

(c) Category 103: Agricultural Weed Control: the application of pesticides to agricultural lands, including pastures, croplands and non-crop agricultural lands, to control weeds.

(d) Category 104: Seed Treatment: the application of pesticides to seeds on agricultural establishments as defined at 40 C.F.R. § 170.3 (as incorporated herein by reference) or seed treatment facilities.

(e) Category 105: Livestock Pest Control: the application of pesticides to livestock.

(f) Category 106: Forest Pest Control: the application of pesticides in forests, forest nurseries, forest seed producing areas managed for the production of timber and other forest products or maintained as wood vegetation for such indirect benefits as protection of catchment areas or public recreation, including windbreaks and downed timber. For applications in forested areas within fifty (50) feet of a residential or commercial structure, an applicator must also hold the ornamental pest control category in accordance with Part 9 of these Rules and comply with all of the posting and notification requirements in Section 35-10-112, C.R.S., of the Pesticide Applicators' Act. This additional certification in the ornamental pest control category shall not apply to aerial applicators or ground applications made by federal, state, or local governments on property they own. This category does not apply to pesticide applications made to control vertebrate pests.

(g) Category 107: Rangeland Pest Control: the application of pesticides to land which is not managed for turf, pasture or forest on which the vegetation is predominantly native plant species or introduced species managed as native species such as grasses, grass-like plants, forbs or shrubs. Rangelands include but are not limited to natural grasslands, shrublands, deserts, tundras, and meadows. For applications performed in rangeland areas within fifty (50) feet of a residential or commercial structure, an applicator must also hold the turf pest control category in accordance with Part 9 of these Rules and comply with all of the posting and notification requirements in Section 35-10-112, C.R.S., of the Pesticide Applicators' Act. This additional certification in the turf pest control category shall not apply to aerial applicators or ground applications made by federal, state, or local governments on property they own. This category does not apply to pesticide applications made to control vertebrate pests.

(h) Category 108: Aquatic Pest Control: the application of pesticides to standing or running water when made to control weeds, amphibians, fish and other pests in water, except for pesticide applications which are included in the “Public Health” category, at Part 8.01(j).

(1) Category 113: Metam sodium for root control in sewers: the application of metam sodium in sewers to control roots. For purposes of this sub-category, “sewer” shall mean any artificial conduit for the transmission of wastewater to a wastewater treatment plant.

(i) Category 109: Industrial and Right-of-Way Weed Control: the application of pesticides to maintain roads, sidewalks, trails, paths, utility lines, railways, parking lots, drilling rigs, substations, open irrigation and drainage structures or similar areas and adjacent land within right of ways associated with such areas for the purpose of establishing or maintaining definable cover or bare ground.

(j) Category 110: Public Health Pest Control: ~~the application of pesticides for control of disease vectors, except vertebrates.~~ The application of pesticides for the control of pests having medical or public health importance, except vertebrates. This category applies to non-government commercial applicators who use pesticides for the management and control of pests having public health importance.

(1) Category 110G: Government-Sponsored Public Health Pest Control: The application of restricted use pesticides in government-sponsored public health programs for the control of pests having medical or public health importance.

(k) Category 111: Research and Demonstration: the application of pesticides in the course of conducting field research or demonstration. No license or certification will be issued in this category unless the applicant also obtains licensing or certification, in the specific category listed in these Rules, which is appropriate to the research activity.

(l) Category 114: Aerial Pest Control: The application of pesticides by unmanned aerial vehicle (UAV), fixed or rotary wing aircraft.

(1) The Aerial Pest Control category must be held in addition to the Agricultural Pest Management Category for the aerial application being made.

(2) The Aerial Pest Control category may be obtained by successfully passing an approved Aerial Pest Control Certification examination offered by the Colorado Department of Agriculture or any state with an approved Environmental Protection Agency Certification Plan. Proof of a passing score obtained within the last 12 months with exam results 70% or better must be provided to the Department with the application.

(3) A reciprocal Aerial Pest Control license may be issued if the license, issued by a state with an approved Environmental Protection Agency Certification Plan with the equivalent category, is current and in good standing. A reciprocal license will expire on the date of the original issuing state's license.

(4) Applicators must obtain at least one (1) Pest Management Continuing Education Credit in Aerial Pest Control prior to the expiration of the license to renew the category. Failure to obtain at least one continuing education credit will result in the expiration of the licensure category and the applicator will be required to retest.

(m) Category 309: Soil / Non-Soil Fumigation Pest Control: For the use of a fumigant to control pests in soil or non-soil sites not otherwise addressed in Category 303, Structural Fumigation Pest Control.

(1) The Soil / Non-Soil Fumigation Pest Control category must be held in addition to the Agricultural Pest Management Category for the fumigation application being made.

(2) The Soil / Non-Soil Fumigation Pest Control category may be obtained by successfully passing the Soil / Non-Soil Fumigation Pest Control Certification examination offered by the Colorado Department of Agriculture.

(3) A reciprocal Soil / Non-Soil Fumigation Pest Control license may be issued if the license, issued by a state with an approved Environmental Protection Agency Certification Plan with the equivalent category, is current and in good standing. A reciprocal license will expire on the date of the original issuing state's license.

(4) Applicators must obtain at least one (1) Pest Management Continuing Education Credit in Soil / Non-Soil Fumigation Pest Control prior to the expiration of the license to renew the category. Failure to obtain at least one continuing education credit will result in the expiration of the license category and the applicator will be required to retest.

8.02. Applicants for licensing as a qualified supervisor in the agricultural pest control categories, except the metam sodium for root control in sewers sub-category, must have the following field experience or equivalents. Such field experience must have been obtained within the five years immediately preceding the date of the applicant's application for licensing.

(a) Said applicant shall have obtained a minimum of eight months field experience in agricultural pest control.

(b) If said applicant has earned college or university credit in agricultural pest control or related fields, such credit may be combined with field experience in agricultural pest control in order to qualify for licensing as a qualified supervisor, as follows:

(1) Two years college credit and two months field experience in agricultural pest control; or

(2) One year college credit and five months field experience.

8.03. Commercial applicators classified in the agricultural categories shall provide the following notices of pesticide applications.

(a) Prior to each application, the customer shall be informed of: (1) the pesticide(s) to be applied, (2) the site of application, (3) applicable re-entry intervals, (4) applicable grazing intervals, (5) applicable pre-harvest interval, and (6) any precautionary statements contained on the applicable pesticide label(s). This notice may be oral.

(b) After the application, the applicator shall promptly furnish the customer with a written notice which states: (1) the pesticide(s) applied; (2) the amount of each pesticide applied; (3) the date of application; (4) the site of application; (5) applicable re-entry intervals; (6) applicable grazing intervals; (7) applicable crop rotation intervals; and (8) any precautionary statements contained on the pesticide label(s).

(c) An applicator may furnish the information specified in Parts 8.03(a)(3) through (6), and/or Parts 8.03(b)(5) through (8) above, by giving the customer a copy of the applicable pesticide label(s).

(d) In the event that a commercial applicator classified in the agricultural categories performs an application at a site which is occupied by someone other than the applicator's customer, the applicator shall be responsible for giving the notices required by Parts 8.03(a) and (b) above to the person(s) who are occupying the site, as well as to the customer. This Part 8.03(d) does not apply to applications to crops or to large-scale pest control programs.

(e) Notices in this Part 8.03 may be provided electronically when the following conditions have been met.

(1) Commercial applicators must obtain a written request from each customer and occupant confirming their request to obtain any notice required by these Rules electronically.

(2) A commercial applicator must maintain a record of the written request(s) for electronic notices from each customer and occupant.

(3) A commercial applicator that does not have a record of the written request(s) for electronic notices on file at the time of an application must provide a notice as outlined in Parts 8.03(a) - (d).

(f) Commercial, registered limited commercial, or registered public applicators must comply with all applicable signage requirements for aquatic applications in Part 13 below.

8.04 An applicant for licensing in the sub-category of metam sodium for root control in sewers shall satisfy each of the following requirements:

(a) In addition to any other required examination, an applicant must take and pass the specific examination for this sub-category, but not the examination for the aquatic pest control category.

(b) An applicant for licensing as a qualified supervisor in this sub-category must have the following field experience or equivalents. Such field experience must have been obtained within the five years immediately preceding the date of the applicant's application for licensing.

(1) An applicant shall have obtained a minimum of 40 hours of field experience in the application of pesticides in sewers, including, but not limited to, metam sodium for root control in sewers; or

(2) If an applicant has a Level 2 or 3 wastewater collection certification issued by the Colorado Water Distribution and Wastewater Collection Systems Council, or a Class A, B, or C wastewater treatment plant operator certification issued by the Colorado Department of Public Health and Environment pursuant to Title 25, Article 9 of the Colorado Revised Statutes, the applicant shall have obtained a minimum of 20 hours of field experience in the application of pesticides in sewers, including, but not limited to, metam sodium for root control in sewers.

(c) Each applicator technician working for a commercial applicator, registered limited commercial applicator, or registered public applicator licensed or registered in this sub-category shall have at a minimum 32 hours of training:

(1) At least 8 of which shall be classroom-instructional training covering: applicable State, Federal, and local laws and regulations, environmental precautions, use, equipment and calibration, pesticides and their families, pest management, applicator safety, pesticide label and labeling, host and pest identification, and public safety; and

(2) At least 24 hours of which shall be on the job training. At least 8 hours of this training shall be conducted by a licensed qualified supervisor or a licensed certified operator, which licensed certified operator has at least 20 hours of experience in the application of pesticides in sewers, including, but not limited to, metam sodium for root control in sewers, within the last 2 years. No more than 16 hours of said on the job training may be conducted by an experienced technician trained by the applicator. Said training shall cover: environmental precautions, use, equipment and calibration, pesticides and their families, pest management, applicator safety, pesticide label and labeling, host and pest identification, and public safety.

(d) Each sales technician working for a commercial applicator licensed in this sub-category shall have at a minimum 32 hours of training:

(1) At least 8 hours of which shall be classroom-instructional training covering: applicable State, Federal, and local laws and regulations, environmental precautions, pesticides and their families, pest management, pesticide label and labeling, host and pest identification, and public safety;

(2) At least 16 hours of which shall be on the job training. At least 8 hours of this training shall be conducted by a licensed qualified supervisor or a licensed certified operator, which licensed certified operator has at least 20 hours of experience in the application of pesticides in sewers, including, but not limited to, metam sodium for root control in sewers, within the last 2 years. No more than 8 hours of said on the job training may be conducted by an experienced technician trained by the applicator. Said training shall cover: environmental precautions, pesticides and their families, pest management, pesticide label and labeling, host and pest identification, and public safety; and

(3) The remaining 8 hours shall be divided between classroom-instructional training and on the job training as the need is determined by the qualified supervisor.

(e) Each applicator technician or sales technician continuing to work for the same commercial applicator, registered limited commercial applicator, or registered public applicator licensed or registered in this sub-category shall have after the first season of experience, at a minimum, the following on-going training: 4 hours of training conducted by a licensed qualified supervisor or licensed certified operator, which licensed certified operator has at least 20 hours of experience in the application of pesticides in sewers,

including, but not limited to, metam sodium for root control in sewers, within the last 2 years. The qualified supervisor shall determine from those topics enumerated above in Parts 8.04(c)(1) and (2) the training required. Said training may be either classroom-instructional or on the job training as determined by the qualified supervisor.

(f) Each new hire experienced technician working for a commercial applicator, registered limited commercial applicator, or registered public applicator licensed or registered in this sub-category shall have at a minimum 16 hours of training:

(1) At least 4 hours of which shall be classroom-instructional training covering: applicable State, Federal, and local laws and regulations, environmental precautions, use, equipment and calibration, pesticides and their families, pest management, applicator safety, pesticide label and labeling, host and pest identification, and public safety;

(2) At least 8 hours of which shall be on the job training conducted by a licensed qualified supervisor or a licensed certified operator, which licensed certified operator has at least 20 hours of experience in the application of pesticides in sewers, including, but not limited to, metam sodium for root control in sewers, within the last 2 years. Said training shall cover: environmental precautions, use, equipment and calibration, pesticides and their families, pest management, applicator safety, pesticide label and labeling, host and pest identification, and public safety;

(3) The remaining 4 hours shall be divided between classroom-instructional training and on the job training as the need is determined by the qualified supervisor; and

(4) Experienced sales technicians are not required to complete training in use, equipment and calibration, nor applicator safety.

Part 9. Ornamental Applicators.

9.01. The ornamental classification includes the following categories:

(a) Category 206: Turf Pest Control: the application of pesticides to: (1) managed turf to control invertebrate pests, including insects, mites, slugs, snails, and nematodes, or to control plant diseases or weeds; (2) ornamental beds to control weeds; (3) xeriscaped or similar areas covered in mulch or other media to control weeds; or (4) sidewalks, driveways, paved areas other than parking lots or bare ground located on private or public property and that are not located in the zoned right-of-way to control weeds.

(1) Managed turf or ornamental beds located in a zoned right-of-way may be treated under this Category 206 or Category 109, as defined under Part 8.01(i).

(2) When making applications to managed turf or ornamental beds in right-of-way areas, all notification requirements applicable to Category 206 apply.

(3) Managed turf for this Part 9 is defined as ground cover that is watered, mowed, seeded, or regularly maintained for defined ground cover.

(b) Category 207: Ornamental Pest Control: the application of pesticides to ornamental trees, shrubs, beds, flowers and other ornamental plants, except turf or indoor ornamental plants, to control invertebrate pests, including insects, mites, slugs, snails and nematodes, or to control plant diseases.

9.02. Applicants for licensing as a qualified supervisor in the turf category, described in Part 9.01 (a) must have the following experience or equivalents. Such field experience must have been obtained within the two years immediately preceding the date of the applicant's application for licensing. Experience in the application of pesticides gained by the applicant in the maintenance of his own home shall not constitute experience which will satisfy experience requirements imposed by these Rules.

(a) Said applicant shall have obtained at least four months of field experience in turf pest control.

(b) If said applicant has earned college or university credit in turf pest control or related fields, such credit may be combined with field experience in order to qualify for licensing, as follows:

(1) Two years college credit and one month field experience; or

(2) One year college credit and two and one-half months field experience.

9.03. Applicants for licensing as a qualified supervisor in the ornamental category described in Part 9.01(b) must have the following field experience or equivalents. Such field experience must have been obtained within the five years immediately preceding the date of the applicant's application for licensing. Experience in the application of pesticides gained by the applicant in the maintenance of his own home shall not constitute experience which will satisfy experience requirements imposed by these Rules.

(a) Said applicant shall have obtained at least eight months field experience in ornamental pest control, gained within not less than two calendar years.

(b) If said applicant has earned college or university credit in ornamental pest control or related fields, such credit may be combined with field experience in order to qualify for licensing as a qualified supervisor, as follows:

(1) Two years college credit and four months field experience; or

(2) One year college credit and six months field experience in ornamental pest control.

9.04. Commercial applicators classified in the ornamental category shall provide the following notices of pesticide application:

(a) Except as provided below, at the time any pesticide is applied, the commercial applicator shall leave for each customer, or for an individual at each location where an application was made if different from the customer's address, a printed or legibly written statement disclosing the fact that a pesticide has been applied, naming the pesticide or pesticides applied, the date of application, and containing such precautionary statements appearing on the pesticide's label as are necessary or appropriate to avoid endangering the health of persons or animals, or to avoid an unreasonable risk of harm to property.

(b) When any pesticide is applied at a commercial property ~~site where an owner of the site~~ or any other site managed or owned by an off-site organization or entity where an owner of the site or an agent of an owner of the site is not present at the site, the commercial applicator shall, promptly after the application, furnish the customer with a written statement that ~~states: (1) the pesticide(s) applied; (2) the date of application; and (3) such precautionary statements~~ includes the name of the pesticide(s) applied, the date of the application, and such precautionary statements appearing on the pesticide's label as are

necessary or appropriate to avoid endangering the health of persons or animals, or to avoid an unreasonable risk of harm to property. This precautionary information may be furnished by giving the customer a copy of the label(s) of any pesticide applied.

(c) When any pesticide is applied at a multi-unit dwelling site where an owner of the site or an agent of an owner of the site is not present at the site, the commercial applicator shall, promptly after the application, furnish the customer with a written statement containing the information required in Part 9.04(b) above and shall post notice-of-application signs containing the information required by § 35-10-112(2)(d), C.R.S.

(d) Notices in this Part 9.04 may be provided electronically when the following conditions have been met.

(1) Commercial applicators must obtain a written request from each customer or an individual at each location where an application was made if different from the customer's address, confirming their request to obtain any notice required by these Rules electronically.

(2) A commercial applicator must maintain a record of the written request(s) for electronic notices from each customer or an individual at each location where an application was made if different from the customer's address.

(3) A commercial applicator that does not have a record of the written request(s) for electronic notices on file at the time of an application must provide a written notice as outlined in Parts 9.04(a) through (c).

(4) Electronic notices are not sufficient to meet the requirement in this Part 9.04(c) for posting a written notice-of-application sign at any multiunit dwelling site when common areas have been treated and the owner of the site or agent of the owner of the site is not present at the site.

(e) Commercial, registered limited commercial, or registered public applicators must comply with all applicable signage requirements in Parts 12 and 13 below.

Part 10. Structural Applicators.

10.01. The structural pest control classification includes the following categories.

(a) Category 301: Wood Destroying Organism Pest Control: the application of pesticides to control termites, carpenter ants, powder post beetles, fungi, and/or other wood destroying organisms in structures and/or adjacent outside areas.

(b) Category 302: Outdoor Vertebrate Pest Control: the application of pesticides intended for preventing, destroying, repelling or mitigating any reptile, bird, feral dogs and cats, moles, voles, bats, wild carnivores, rabbits, skunks, amphibian pests not in water and any other vertebrate pest, except rats and mice.

(c) Category 303: Structural Fumigation: the application of a fumigant to one or more rooms in a structure or to the entire structure at a desired concentration and for a length of time necessary for the control of rodents and/or insect pests, including the application of a fumigant to a localized space or harborage within a structure, including but not limited to railcars, storage containers, grain storage silos or other enclosures, including tarpaulin fumigations, for ~~local~~ insect and/or rodent control. This category is required for the use of a fumigant in any licensure category authorized by Title 35, Article 10, when the application of the fumigant is made to or in a structure as defined in Part 1.02(m).

(d) Category 304: Residential/Commercial Pest Control: the application of pesticides or bait stations intended for use for preventing, destroying, repelling or mitigating structural pests, including without limitation insects and rodents. However, this category does not include the application of fumigants or actions taken to control wood destroying organisms, outdoor vertebrates, or grain storage pests.

(e) Category 305: Stored Commodities Treatment: the application of pesticides for the treatment of pests in raw grain stored in facilities which are not used for animal or human habitation; the application of plant growth regulators to agricultural commodities stored in facilities which are not used for animal or human habitation; and the application of pesticides to commodity processing equipment or commodity storage facilities (not including offices or other structures). This category does not cover applications made to control pests in potato storage facilities covered by Category 308.

(f) Category 306: Wood Preservation and Wood Products Treatment: the application of pesticides to prevent, destroy, repel or mitigate pests in wood or wood products which are, or are capable of being, incorporated into a structure, not including downed timber prior to bark removal or sawing.

(g) Category 307: Interior Plant Pest Control: the application of pesticides to house plants and other indoor ornamental plants kept or located within structures occupied by humans, including, but not limited to houses, apartments, offices, shopping malls, other places of business and other dwelling places, to control invertebrate pests that adversely affect such plants, including insects, mites, slugs, snails and nematodes; and to control plant diseases.

(h) Category 308: Post-Harvest Potato Pest Control: the application of pesticides for the treatment of pests in raw potatoes stored in facilities which are not used for animal or human habitation; the application of plant growth regulators to potatoes stored in facilities which are not used for animal or human habitation; and the application of pesticides to potato processing equipment or potato storage facilities (not including offices or other structures).

~~(1) Applicators holding a valid Category 305, Stored Commodities Treatment, as of January 1, 2016, will be awarded the Category 308 license with no further examination. The Category 308 licensure category will be valid until the expiration date of the applicator's current license. If the applicator's license expires prior to January 1, 2017, license Category 308 will also be awarded when such license is renewed, so long as all Category 305 continuing education credit requirements have been met prior to the expiration of the license.~~

~~(2) On or after January 1, 2016, any applicator wishing to obtain the Category 308 category must take and pass the Stored Potato Treatment category examination and pay any necessary fees.~~

~~(3) Applicators wishing to renew the Category 308 license after December 31, 2016, will need to obtain one (1) continuing education category credit in the Post-Harvest Potato Pest Control category prior to the expiration of their current license.~~

(i) Category 309: Soil / Non-Soil Fumigation Pest Control: For the use of a fumigant to control pests in soil or non-soil sites, not otherwise addressed in category 303, Structural Fumigation Pest Control.

(1) The Soil / Non-Soil Fumigation Pest Control category must be held in addition to the Structural Pest Management category for the fumigation application being made.

(2) The Soil / Non-Soil Fumigation Pest Control category may be obtained by successfully passing the Soil / Non-Soil Fumigation Pest Control Certification examination offered by the Colorado Department of Agriculture.

(3) A reciprocal Soil / Non-Soil Fumigation Pest Control license may be issued if the license, issued by a state with an approved Environmental Protection Agency Certification Plan with the equivalent category, is current and in good standing. A reciprocal license will expire on the date of the original issuing state's license.

(4) Applicators must obtain at least one (1) Pest Management Continuing Education Credit in Soil / Non-Soil Fumigation Pest Control prior to the expiration of the license to renew the category. Failure to obtain at least one continuing education credit will result in the expiration of the license category and the applicator will be required to retest.

10.02. An applicant for licensing as a qualified supervisor in the structural pest control categories of wood destroying organisms, residential/commercial pest control, and fumigation must have the following field experience or equivalents. Such field experience must have been obtained during the five years immediately preceding the date of the applicant's application for licensing. Experience using pesticides gained while the applicant was maintaining his own home, or performing janitorial or maintenance duties for another in a residential, industrial or commercial location will not satisfy experience requirements imposed by these regulations.

(a) Said applicant must have obtained at least twenty-four months field experience in structural pest control. In addition, an applicant for licensing as a qualified supervisor in the structural pest control category of wood destroying organisms must have obtained, within the two years immediately preceding the date of the applicant's application for licensing, at least 100 hours of verifiable field experience in termite control. A minimum of 30 of said 100 hours must consist of verifiable "hands-on" field experience covering drill and inject and other post-treat methods and applications. Any or all of the 100 hours may be obtained in courses approved by the Commissioner.

(b) If said applicant has earned college or university credit in structural pest control or related fields, such credit may be combined with field experience in related categories of structural pest control in order to qualify for licensing as a qualified supervisor, as follows:

(1) Four years college credit and four months field experience; or

(2) Three years college credit and nine months field experience; or

(3) Two years college credit and fourteen months field experience; or

(4) One year college credit and nineteen months field experience.

10.03. An applicant for licensing as a qualified supervisor in the structural pest control categories of outdoor vertebrates, wood preservation and wood products treatment, stored commodities treatment,~~Post-Harvest Potato Pest Control~~ post-harvest potato pest control, or interior plant pest control must have the following field experience or equivalents. Such field experience must have been obtained within the five years immediately preceding the date of the applicant's application for licensing:

(a) Said applicant must have obtained at least eight months field experience in the related categories of structural pest control.

(b) If said applicant has earned college or university credit in the related categories of structural pest control, such credit may be combined with field experience in related categories of structural pest control in order to qualify for licensing as a qualified supervisor, as follows:

(1) Two years college credit and two months field experience; or

(2) One year college credit and five months field experience.

10.04. At the time of a pesticide application, a commercial applicator licensed in any structural pest control category shall leave for each customer, a printed or legibly written notice stating the name of each pesticide applied, the date applied, and such precautionary statements from the label of the pesticide or device as are necessary or appropriate to avoid endangering human or animal health, or to avoid creating an unreasonable risk of damage to property.

10.05. In the event that the customer is not the occupant, at the time of a pesticide application a commercial applicator licensed in any structural pest control category shall leave for the occupant, a printed or legibly written notice stating the name of each pesticide applied, the date applied, and such precautionary statements from the label of the pesticide or device as are necessary or appropriate to avoid endangering human or animal health, or to avoid creating an unreasonable risk of damage to property.

10.06. Notices in Parts 10.04 and 10.05 may be provided electronically when the following conditions have been met.

(a) Commercial applicators must obtain a written request from the customer or the occupant, as required, confirming their request to obtain any notice required by this Rule electronically.

(b) A commercial applicator must maintain a record of the written request(s) for electronic notices from each customer or occupant.

(c) A commercial applicator that does not have a record of the written request(s) for electronic notices on file at the time of an application must provide a written notice as outlined in Parts 10.04 and 10.05.

10.07 When making pesticide applications within a multiunit dwelling site and the owner of the site or agent of the owner of the site is not present at the site, a commercial applicator must post a written notice at the primary entrance(s) to interior common area(s) that has been treated. The notice shall state the name of each pesticide applied, the date applied, and such precautionary statements from the label of the pesticide or device as are necessary or appropriate to avoid endangering human or animal health, or to avoid creating an unreasonable risk of damage to property. Electronic notices may not be used to meet this requirement.

10.08. Bed Bug Reporting Requirements in accordance with C.R.S. 38-12-1003 and 1004:

(a) A commercial applicator, qualified supervisor, or certified operator inspecting a tenant's dwelling unit or any dwelling unit contiguous to a tenant's dwelling unit in single-family or multi-unit dwellings, in accordance with C.R.S. 38-12-1003, must provide a report of all bed bug activity that the commercial applicator, qualified supervisor, or certified operator identifies within the dwelling or any contiguous dwelling unit at the time of inspection, to the landlord within twenty-four hours of the inspection. Including:

(1) Units affected by bed bug activity; and

(2) Remediation recommendations.

(b) A commercial applicator , qualified supervisor, or certified operator inspecting a tenant's dwelling unit or any dwelling unit contiguous to a tenant's dwelling unit in single-family or multi-unit dwellings, in accordance with C.R.S. 38-12-1004, shall advise the tenant that any furniture, clothing, equipment, or personal property identified as having bed bug activity should not be removed from the dwelling unit until a pest control agent retained by the landlord determines that any bed bug treatment determined to be necessary has been completed.

(c) A commercial applicator, qualified supervisor, or certified operator providing any report in accordance with C.R.S. 38-12-1003 shall retain a copy of any such report required in Part 10.08(a) for three years.

Part 11. Storage.

Subpart A Storage Requirements for Commercial, Registered Limited Commercial, Registered Public Applicators

11.01. All commercial, registered limited commercial, or registered public applicators shall store pesticide concentrates and dilute mixtures using methods which are reasonably calculated to prevent the contamination of other products by means of volatilization, leakage, breakage or other causes, and which are reasonably calculated to avoid the creation of an unreasonable risk of harm to persons, property, domestic or wild animals, or the environment.

11.02. Pesticide storage areas shall be kept clean and orderly, and pesticide containers shall be positioned so that they are not exposed to unreasonable risk of damage to the containers or their labels.

11.03. Indoor pesticide storage areas shall be secured from access by unauthorized persons, including the general public, and locked when the building is unoccupied by an applicator or his employees.

11.04. Outdoor pesticide storage areas shall be fenced or walled, and locked. Pesticides and pesticide containers shall be covered or otherwise protected from the elements, in a manner which is reasonably calculated to minimize the risk of damage to labels, and to avoid the creation of an unreasonable risk of harm to persons, property or domestic or wild animals.

11.05. Pesticide storage areas shall be marked with a sign or signs, in letters at least one inch high, warning that pesticides are stored within and communicating the highest toxicity category any person may be exposed to within the storage area (i.e.: Danger, Danger skull and crossbones, Warning, Caution), such as: "Danger, Pesticide Storage, Authorized Personnel Only." Signage must also provide emergency contact information, in letters at least one half inch high and must state: "In case of emergency, contact: (name) at (telephone number)." Compliance with this Part 11.05 is not necessary for any person who has marked their pesticide storage areas with signs that comply with local fire department requirements. Applicators must obtain written confirmation from the local fire department if no sign(s) is required and maintain this record for inspection by the department.

11.06. Each commercial, registered limited commercial, or registered public applicator storing pesticides shall inform the local fire department of the location of the pesticide storage, and shall provide the fire department with safety data sheets for all pesticides held at the location.

11.07. Each commercial, registered limited commercial, or registered public applicator who stores pesticides shall have available, at each storage location, in good working order, one or more fire extinguishers rated for chemical fires, and materials for use in cleaning up pesticide spills.

11.08. A service container that is not at all times in the immediate custody or control of a qualified supervisor, certified operator, or technician shall have prominently displayed thereon the following information from the label affixed to the pesticide's original container: the common name of each active ingredient, if there is such a common name, or the chemical name of each active ingredient; the EPA Registration Number; each and every human hazard signal word shown on the label, and the name of the commercial, registered limited commercial, or registered public applicator. For purposes of this Part 11.08, "service container" shall mean any container holding pesticide, whether in a concentrated or diluted form, other than the pesticide's original container, that is of a size and capacity that permits it to be carried or moved by only one individual, unaided by any tool or apparatus; and "human hazard signal word" shall mean those human hazard signal words required by the U.S. Environmental Protection Agency in its rules and regulations at 40 C.F.R. § 156.10(h) (2017) (as incorporated herein by reference), to be shown on the front panel of the label affixed to the pesticide's original container. Compliance with this Rule is not necessary if the service container is marked in compliance with the rules and regulations of the occupational safety and health administration, U.S. Department of Labor at 29 C.F.R. § 1910.1200 and appendices A through E, inclusive, thereto (2017) (as incorporated herein by reference), applicable to hazard communication for chemicals.

Subpart B Storage Requirements for Licensed Private Applicators

11.09. All licensed private applicators shall store pesticide concentrates and dilute mixtures using methods which are reasonably calculated to prevent the creation of an unreasonable risk of harm to persons, property, domestic or wild animals, or the environment.

11.10. Pesticide containers shall be stored so that they are not exposed to unreasonable risk of damage to the containers or their labels.

11.11. Pesticides and pesticide containers, stored in outdoor pesticide storage areas, shall be covered or otherwise protected from the elements, in a manner which is reasonably calculated to minimize the risk of damage to labels, and to avoid the creation of an unreasonable risk of harm to persons, property or domestic or wild animals.

Part 12. Registry of Pesticide-Sensitive Persons.

12.01. Persons who apply to be placed on the pesticide-sensitive registry, which registry is hereby established, shall complete and submit an application for said registry. Said application shall be on a form provided by the Commissioner. The application shall include a statement of proof of medical justification by a physician licensed in the state of Colorado for the person who will be listed on the pesticide-sensitive registry.

12.02. Persons who apply to be placed on the registry or who apply for renewal of their registration~~,~~ shall list those addresses which abut their principal place of residence. Persons who apply to be placed on the registry or who apply for renewal of their registration may also include their principal place of employment, their principal school, or both. The principal residential, employment, and school address must be for the person for whom medical justification has been provided in accordance with Part 12.01. For the purpose of this Part 12, "school" means public and charter schools, as those terms are defined at § 22-1-101, C.R.S., as well as private schools that are supported in whole or in part by tuition payments or private donations, that serve as educational institutions for students in pre-kindergarten or kindergarten through twelfth grade or any portion thereof.

12.03. Each registration shall expire on November 1 of each year.

12.04. Each person shall report to the Commissioner, on a form provided by the Commissioner, any change to the information provided in such person's application or in such reports previously submitted, within fifteen days of such change.

12.05. Each person shall make an application to renew his registration on or before the first working day of November for the year of renewal. Said application shall be on a form provided by the Commissioner. The renewal application form shall include a statement of proof of medical justification by a physician licensed in the state of Colorado, which must be submitted every two years.

Subpart A Ornamental Notification

12.06. A commercial, registered limited commercial, or registered public applicator shall take reasonable actions to give notice of the date, ~~and~~ approximate time, and address or location of the property to be treated for ~~of~~ each and every turf or ornamental pesticide application, prior to the application, to any person who: ~~resides on property which abuts the property to be treated and whose name is on the published registry. Notification of each pesticide application to such an abutting property, including the address or location of the property to be treated, must be communicated to the pesticide sensitive person. An applicator may meet this requirement by making not less than two attempts to notify any owner or tenant who is on the registry. Such attempts shall be made as early as practicable but not later than twenty-four hours before the application.~~

(a) Principally resides on property which abuts the property to be treated and whose name is on the published registry.

(b) Has provided their principal employment address, their principal school address, or both to the Department and whose name is on the published registry.

12.07. ~~Notice may be by any method, including telephone, mail or personal notification. If attempts at notification by the applicator fail, and a pesticide application is necessary, the commercial, registered limited commercial, or registered public applicator shall attempt to notify the resident in person immediately prior to the application. Notice of the application and attempts at notification shall be placed on the door of the person requesting notification if all notification attempts fail.~~Manner of notification for turf or ornamental applications:

(a) Notification of each pesticide application to a property that abuts the principal residential address or to the principal employment address, principal school address, or both provided by the pesticide-sensitive person in his/her application must be communicated to the pesticide-sensitive person.

(1) Unless making electronic notifications pursuant to Part 12.07(b), an applicator may meet this requirement by making not less than two attempts to notify any owner or tenant who is on the registry.

(2) Such attempts shall be made as early as practicable but not later than twenty-four hours before the application.

(3) Notice may be by any method, including telephone, mail, or personal notification.

(4) If attempts at notification by the applicator fail, and a pesticide application is necessary, the commercial, registered limited commercial, or registered public applicator shall attempt to notify the pesticide-sensitive registrant in person immediately prior to the application by placing notice on the door of the pesticide-sensitive person’s principal place of residence.

(b) Electronic Notification:

(1) If an applicator provides notification to the pesticide-sensitive person electronically pursuant to § 35-10-112(1)(a)(III), C.R.S., only one attempt at notification is required, provided there has been no change to date, time, or location of the pesticide application communicated in the original electronic notice.

(2) Any change to the date, time, or location of the application must be communicated in a new electronic notification no later than twenty-four hours before the application.

(3) If a pesticide-sensitive person fails to acknowledge receipt of the applicator's electronic notification, the applicator is not required to make the additional notification attempts described in Part 12.07(a)(4) above.

(4) An applicator must maintain a record confirming that the applicator provided electronic notice to the pesticide-sensitive registrant in order for the single notification requirements in this Part 12.07(b) to apply.

(5) If an electronic means of notification is unavailable, the applicator must comply with Part 12.07(a)(2) and (4) above.

12.08. Effective July 1, 2024, a commercial, registered limited commercial, or registered public applicator shall provide notice to a pesticide-sensitive person if the applicator treats a property that is listed in the Department's searchable database as abutting, or being entirely located within two-hundred and fifty feet of, the pesticide-sensitive person's listed principal residential address. This notification may be provided electronically per Part 12.07(b).

Subpart B Structural Notification

~~12.08.~~12.09. A commercial, registered limited commercial, or registered public applicator shall take reasonable actions to give notice of the date and approximate time of any wood-destroying, residential/commercial, or interior plant pest control pesticide application, made to multi-unit dwellings, prior to the application, to any person who resides in the multi-unit dwelling to be treated and whose name is on the published registry unless otherwise noted in Part ~~12.10~~ 12.11.

~~12.09.~~12.10. Manner of notification for structural applications: ~~An applicator may meet the notification requirement by making not less than two attempts to notify any owner or tenant who is on the registry. Such attempts shall be made as early as practicable but not later than twenty-four hours before the application. Notice may be by any method, including telephone, mail or personal notification. If attempts at notification by the applicator fail, and a pesticide application is necessary, the commercial, registered limited commercial or registered public applicator shall attempt to notify the resident in person immediately prior to the application. Notice of the application and attempts at notification shall be placed on the door of the person requesting notification if all notification attempts fail.~~

(a) Notification of each pesticide application to a multi-unit dwelling where a pesticide-sensitive person resides must be communicated to the pesticide-sensitive person.

(1) Unless making electronic notifications pursuant to Part 12.10(b), an applicator may meet this requirement by making not less than two attempts to notify any owner or tenant who is on the registry.

(2) Such attempts shall be made as early as practicable but not later than twenty-four hours before the application.

(3) Notice may be by any method, including telephone, mail, or personal notification.

(4) If attempts at notification by the applicator fail, and a pesticide application is necessary, the commercial, registered limited commercial, or registered public applicator shall attempt to notify the pesticide-sensitive registrant in person immediately prior to the application by placing notice on the pesticide-sensitive registrant's door.

(b) Electronic Notification:

(1) If an applicator provides notification to the pesticide-sensitive person electronically pursuant to § 35-10-112(1)(a)(III), C.R.S., only one attempt at notification is required, provided there has been no change to date, time, or location of the pesticide application communicated in the original electronic notice.

(2) Any change to the date, time, or location of the application must be communicated in a new electronic notification no later than twenty-four hours before the application.

(3) If a pesticide-sensitive person fails to acknowledge receipt of the applicator's electronic notification, the applicator is not required to make the additional notification attempts described in Part 12.10(a)(4) above.

(4) An applicator must maintain a record confirming that the applicator provided electronic notice to the pesticide-sensitive registrant in order for the single notification requirements in this Part 12.10(b) to apply.

(5) If an electronic means of notification is unavailable, the applicator must comply with Part 12.10(a)(2) and (4) above.

~~12.10.~~12.11. The following circumstances do not require notification, as outlined in Part ~~12.08~~12.09, by structural applicators:

a) Emergency structural applications needed to ensure the safety or welfare of the general public, where it is not reasonably possible to comply with the notification requirements outlined in Part ~~12.08~~12.09.

(1) Applications specified in this Part ~~12.10~~12.11(a) require the applicator to attempt to notify any owner or tenant who is on the registry immediately prior to the application.

(2) Upon completion of the pesticide application, the applicator shall leave for each person on the registry, a printed or legibly written notice stating the name of each pesticide applied, the date and time the application was made, placement of the treatment, and such precautionary statements from the label of the pesticide that are necessary or appropriate to avoid endangering the pesticide sensitive person's health.

(3) The notification requirement in this Part ~~12.10~~12.11(a) is in addition to the requirements for the notice of application outlined in Parts 10.04 and 10.05 of these Rules.

b) The use of rodenticide baits or insecticide baits that are in any of the following formulations: gel baits, solid baits, granular, or self-contained bait stations that prevent

contact with the insecticide or rodenticide. Applications shall only be applied to common areas, in a manner where no physical contact can be made with the pesticide, or units, other than the pesticide sensitive person's individual dwelling unit. Compliance with the notice of application requirements in Parts 10.04 and 10.05 of these Rules are still required.

Part 13. Notification of Pesticide Applications.

13.01. Any commercial, registered limited commercial, or registered public applicator making a pesticide application in any turf or ornamental category shall post, at the time of application, at least one sign as specified in § 35-10-112(2)(c), C.R.S., notifying the public of the application.

13.02. The bottom of each notice-of-application sign must project at least 18 inches above the ground and the top of the sign shall be no higher than 48 inches above the ground. This provision does not apply to notice of application signs required to be posted at golf course clubhouses, which requirements are set forth in Part 13.04 below.

13.03. The sign must be posted on a lawn or yard at the property boundary between two feet and five feet from the sidewalk; if there is no sidewalk, between two and five feet from the road; or, if there is no road, between two and five feet from the property boundary. When landscaping or other conditions would make a sign inconspicuous or illegible if the sign were posted within the distances specified in this paragraph, the sign shall be posted in a similar manner such that it is conspicuous and easily legible to any adult or child entering or passing the property on foot.

13.04. For greenbelts, parks, golf courses, athletic fields, playgrounds, common property of multi-unit residential and commercial properties, or other similar recreational or common property, the signs must be posted immediately adjacent to areas within the property where pesticides have been applied in a manner that is conspicuous and easily legible to any adult or child entering the treated area(s). For applications on a golf course, the applicator shall post a sign at the clubhouse and at the first tee and the tenth tee notifying the public of the application. Notification signs at golf course clubhouses must be placed in a manner that is conspicuous and easily legible to any adult or child entering the treated area(s).

13.05. Any commercial, registered limited commercial, or registered public applicator making an aquatic pesticide application in any body of water with any legal public access shall post a sign notifying the public of the application at each place of legal public access.

Part 14. Invoice Statement.

14.01. Each commercial applicator shall include the following statement in at least 10 point legible type on the front, either at the top or bottom, of each customer invoice.

Commercial applicators are licensed by the Colorado Department of Agriculture.

14.02. This requirement may be met by any means other than handwriting or hand-printing including without limitation, printing, printed sticker, stamping, or typewriting.

Part 15. Enforcement.

15.01 The phrase "substantial danger or harm to public health and safety, to property, or to the environment" as used in § 35-10-121(2.5), C.R.S. means the existence of a condition which could reasonably be expected to cause, or the actual occurrence of:

(a) physical illness, injury, or death to one or more individuals;

(b) damage to property, either real or personal; or

(c) any adverse impact on land, air or water resources that is appreciable and not immediately reparable.

15.02 Any person who uses any pesticide classified for restricted use must be licensed as a qualified supervisor, certified operator, or private applicator in accordance with the Act and these Rules, except:

(a) any technician not licensed as a certified operator who is applying restricted use pesticides under the on-site supervision of a qualified supervisor or mixing and loading restricted use pesticides under the supervision of a qualified supervisor, and;

(b) any person working under the on-site supervision of a licensed private applicator for the purposes of raising an agriculture commodity.

(c) Any unlicensed technician or person working under the on-site supervision of a licensed private applicator must be at least 18 years old, except that an unlicensed technician must be at least 16 years old if all of the following requirements are met:

(1) The unlicensed technician is using the restricted use pesticide under the direct supervision of a private applicator who is an immediate family member.

(2) The restricted use pesticide is not a fumigant, sodium cyanide, or sodium fluoroacetate.

(3) The unlicensed technician is not applying the restricted use pesticide aerially.

15.03 Any person who supervises the use of any pesticide classified for restricted use must be licensed as a qualified supervisor or private applicator in accordance with the Act and these Rules.

15.04 A qualified supervisor, certified operator or private applicator shall not use or supervise the use of a restricted use pesticide in any category of licensure the person does not hold.

15.05 Any person who operates any device for hire that produces a pesticide as defined in § 35-10-103(10) C.R.S., must be licensed as a commercial applicator and be licensed as or employ or contract with a qualified supervisor in the appropriate licensure category. It is a violation of these Rules for a commercial applicator to use any such device in a manner inconsistent with labeling directions or these Rules, or in an unsafe or negligent manner.

(a) No such device may be used to treat any pest within a structure, unless otherwise allowed pursuant to Part 15.05(c) below;

(b) Such devices may only be used to control burrowing rodents, unless otherwise allowed pursuant to Part 15.05(c) below;

(c) The Commissioner may approve the use of such device in sites or to control pests other than those listed in Part 15.06(a) if he determines that such use will not pose a risk to the public health or safety. Such use shall be subject to additional requirements or restrictions the Commissioner deems necessary.

15.06 Any commercial applicator using a device for hire that produces carbon monoxide for the control of burrowing rodents must abide by the following application requirements and restrictions in addition to any device labeling directions:

(a) This Part 15.06 applies to commercial applications of carbon monoxide by means of a device to burrow openings of the following rodent species that are located within the specified distances from enclosed structures that are occupied or may be occupied by humans or animals.

(1) Pocket gopher: within 150 feet of such structures;

(2) Prairie dog: within 100 feet of such structures;

(3) Ground squirrel: within 20 feet of such structures;

(4) Rat: within 20 feet of such structures;

(5) Vole: within 11 feet of such structures;

(6) Field mice: within 8 feet of such structures;

(7) Any burrowing rodent species not listed in this Part 15.06(a): within 150 feet of such a structure.

(b) Any commercial applicator using a device to make applications of carbon monoxide to control burrowing rodents within the distances specified in Part 15.06(a) must abide by the following application requirements and restrictions:

(1) All persons or animals occupying any enclosed structure within the distances specified for the type of rodent burrow being treated in Part 15.06(a) must be evacuated from the structure during the application.

(2) If any existing carbon monoxide detectors installed in the structure activate during a burrowing rodent application, all applications within the distances specified for the type of rodent burrow being treated in Part 15.06(a) from the structure must cease immediately.

(3) Following any application listed in Part 15.06(a), applicators must enter and monitor the structure at least one hour after the application has concluded to verify that carbon monoxide levels have not risen above 9 ppm.

(4) Monitoring must be done with a carbon monoxide monitor that can detect carbon monoxide levels as low as 9 ppm. All structures must, through monitoring for carbon monoxide levels by the applicator, be verified to have carbon monoxide levels no higher than 9 ppm prior to any re-entry by the occupant.

(5) Upon any detection of carbon monoxide above 9 ppm, either from detection equipment installed in a structure or from the applicator's own monitoring equipment, all applications within the distances from the structure specified for the type of rodent burrow being treated in Part 15.06(a) must cease immediately and the following actions must be performed:

(i) The applicator must open all exterior doors of the structure and begin aerating the structure immediately.

(ii) After one hour of aeration, the applicator must enter the structure and verify that carbon monoxide levels have fallen to 9 ppm or less throughout the structure and remain at 9 ppm or less for one hour. If at any time during the monitoring process the applicator's monitoring

equipment detects carbon monoxide levels over 25 ppm, the applicator must leave the structure immediately, continue to aerate the structure, and repeat the monitoring process every hour until carbon monoxide levels fall and remain at 9 ppm or less throughout the structure for one hour.

(iii) Any detection of carbon monoxide above 9 ppm must be recorded in the applicator's records, including: (1) the time the detection occurred; (2) the level detected if known; (3) the time that levels were confirmed to have fallen to 9 ppm or less throughout the structure and; (4) the name of the applicator that performed the monitoring.

(6) In addition to the written notice required by Parts 10.04 and 10.05 of these Rules, applicators shall provide written precautionary information about carbon monoxide poisoning to the occupant or owner, including the following statement:

"Should you or a family member experience any symptoms associated with carbon monoxide poisoning within 24 hours of this treatment, such as headache, dizziness, weakness, nausea, vomiting, chest pain, or confusion, remove the person from the area where the onset of symptoms occurred and call 911 or seek medical attention."

15.07 Commercial applicators shall maintain accurate and legible office records of all carbon monoxide device applications made for hire. Such records shall include all of the following information:

(a) Name and address of the person for whom the application was made.

(b) Location where carbon monoxide application was made, if different from Part 15.07(a). The location of a field application should be fully described. In the case of roadside carbon monoxide applications, the record should include the county or state road number and the portion of roadside to which burrowing rodent treatments were applied, described by reference to mileage markers or prominent features such as road intersections, river or creek crossings.

(c) Specific rodent pest for which the carbon monoxide device application was made.

(d) Location of rodent burrow(s) to which carbon monoxide was applied.

(1) Areas treated within the distances specified in Part 15.06(a) must be recorded by specifying the number of burrow openings treated and the location of each in relation to the structure (e.g.: One prairie dog burrow opening 90 feet West of the residence).

(2) Applications made further than the distances specified in Part 15.06(a) may be recorded with a description of where the applications occurred on the property (e.g.: 10 acres located in the Northeast corner of property).

(3) An applicator may map the area(s) treated to meet this requirement; each application location made to a rodent burrow within the distances specified in Part 15.06 must be noted individually on the map.

(e) Records shall indicate that the specific pesticide applied is carbon monoxide.

(f) Date and time of application. The record shall indicate the time when the application was started and completed, in hour and minutes, with accuracy within 15 minutes.

(g) Name of the person(s) who made the application (i.e., technician, certified operator, qualified supervisor).

(h) If any detections of carbon monoxide occur, the information required in Part 15.06 (b)(5)(iii).

Part 16. Non-registered Limited Commercial Applicator and non-registered Public Applicator training requirements

16.01. This Part 16 applies to all limited commercial applicators and public applicators, as defined in Sections 35-10-103 (8) and (12), C.R.S., that are not registered with the Department pursuant to Section 35-10-109, C.R.S.

16.02. Any owner or designee of a non-registered limited commercial applicator and any employee of a non-registered public applicator must be trained prior to:

(a) The use of any general use pesticide that requires mixing or loading of a pesticide into a separate service container or application device.

(b) The use of any ready-to-use general use pesticide on the property of schools, children's day care facilities, hospitals and health care facilities required to obtain a license from the Colorado Department of Public Health and Environment pursuant to Section 25-3-101, C.R.S., and in children's playground areas.

16.03 Training is not required for the following uses of general use pesticides:

(a) The use of any anti-microbial pesticides such as those intended to disinfect, sanitize, reduce or mitigate growth or development of microbiological organisms.

(b) The use of any ready-to-use general use pesticide in areas other than those specified in Part 16.02(b).

16.04. Non-registered limited commercial applicator owners or their designee and all non-registered public applicator employees, before making any pesticide applications as specified in Part 16.02, must obtain training in all of the following subjects; laws and regulations, pesticides and their families, applicator safety, public safety, environmental protection and the use of pesticides. Persons that are required to be trained may meet these training requirements by:

(a) holding a current qualified supervisor, certified operator or private applicator license in any licensure category; or

(b) Taking and passing the qualified supervisor or certified operator general core examination or the private applicator examination within the last five years prior to the application of a pesticide; or

(c) Doing one of the following:

(1) Taking and passing the Department's on-line pesticide training course; or

(2) attending any continuing education courses that cover the required subjects and are approved by the Commissioner; or

(3) completing any other training that covers all of the above subjects and is approved by the Commissioner.

16.05. Training must be completed, at a minimum, within 3 years prior to the date of any application.

16.06. Training records for each person making applications must be maintained for a period of 3 years by the limited commercial applicator or public applicator.

Part 17. The Use of Pesticides in the Production of Cannabis

17.01. Definition and Construction of Terms for purpose of this Part 17, as used in these Rules unless the context otherwise requires:

(a) "Cannabis" means a plant of the genus Cannabis and any part of the plant.

(b) "Human consumption" means the consumption of cannabis by a person through oral ingestion, absorption through the skin, inhalation through smoking, vaporization or other means.

(c) "Tolerance" means a level of pesticide residue in or on food that the Environmental Protection Agency has determined with reasonable certainty will not pose a hazard to public health when used in accordance with label directions.

17.02. Pesticide Use on Cannabis: These Rules establish the criteria under which certain pesticides may be legally used on cannabis in the State of Colorado. To assist cannabis growers, the Department will publish a list of pesticides that it has determined meet these criteria. As of the effective date of these Rules, there are currently no pesticides that are specifically labeled or have pesticide residue tolerances established for use on cannabis by the federal government or the State of Colorado. The Colorado Department of Agriculture does not recommend the use of any pesticide not specifically tested, labeled and assigned a tolerance for use on cannabis because the health effects on consumers are unknown.

17.03. Any pesticide used in the cultivation of cannabis must be registered with the Colorado Department of Agriculture, except for purposes of research and demonstration conducted in accordance with 40 C.F.R. Part 172 (2017) (as incorporated herein by reference). Notwithstanding any other requirements in this Part 17, a pesticide on the list published pursuant to Part 17.02 that was registered at the time of purchase, but was not renewed with the Department in the subsequent registration year, may be used within that subsequent registration year until gone, unless the Department has determined that use is prohibited in accordance with Part 17.05.

17.04. Any pesticide registered with the Colorado Department of Agriculture may be used in accordance with its label or labeling directions for the cultivation of cannabis in the State of Colorado under the following conditions, provided that:

(a) For products registered by the Environmental Protection Agency under Section 3 of the Federal Insecticide, Fungicide, Rodenticide Act, no person may use a pesticide product in the cultivation of cannabis unless:

(1) All active ingredients of the pesticide product are exempt from the requirements of a tolerance, as established under 40 C.F.R. Part 180, Subparts D and E (2017) (as incorporated herein by reference);

(2) The pesticide product label allows use on the intended site of application. The term "site" for purposes of this Part 17.04 includes any location or crop to which the application is made;

(3) The pesticide product label expressly allows use on crops or plants intended for human consumption; and

(4) The active ingredients of the pesticide product are allowed for use on tobacco by the Environmental Protection Agency.

(b) Notwithstanding Part 17.04(a)(3), the Commissioner has the authority to permit the use of a pesticide product whose label does not expressly allow use on crops intended for human consumption if:

(1) The active and inert ingredients are exempt under 40 C.F.R. Part 180, Subparts D and E (2017) (as incorporated herein by reference);

(2) The pesticide product label allows use on the intended site of application; and

(3) The active ingredients of the pesticide product are allowed for use on tobacco.

(c) If the pesticide product label specifically allows use on cannabis, such use is permitted.

(d) For 25(b) minimum risk pesticide products as defined in 40 C.F.R. § 152.25(f) (2017) (as incorporated herein by reference), no person may use a minimum risk pesticide product in the cultivation of cannabis unless the pesticide product label allows use on the intended site of application and allows use on crops or plants intended for human consumption.

(e) For pesticide products with a Colorado Special Local Need registration, issued under Section 24(c) of the Federal Insecticide, Fungicide and Rodenticide Act, no person may use such a product in the cultivation of cannabis unless the Colorado Special Local Need label allows use on cannabis.

17.05. The Commissioner may prohibit the use of any pesticide product for the cultivation of cannabis if the Commissioner determines that such use poses a significant threat to public health and safety or the environment.

Part 18. Statements of Basis, Specific Statutory Authority & Purpose

Statements of Basis, Specific Statutory Authority and Purpose for rulemaking activity from 1968 through 1991 are no longer in the Departments files and are presumably in the state archives.

18.01. January 17, 1992 - Effective March 1, 1992

These rules are adopted by the Commissioner of the Department of Agriculture pursuant to his authority under § 35-10-118, C.R.S. (1991 Supp.).

The purpose of these rules is to: revise the licensing procedures for commercial applicators pursuant to § 35-10-118 (2) (b), (c), and (d); revise the licensing procedures for qualified supervisors pursuant to § 35-10-118 (2)(b) and (c); adopt registration procedures for limited commercial and public applicators pursuant to § 35-10-118 (2) (b) and (c); adopt licensing procedures for certified operators pursuant to § 35-10-118 (2)(b), (2) (c) and (4) ; and adopt technician training requirements pursuant to § 35-10-118 (2), § 35-10-106 (l)(c), and § 35-10-110 (3) of the Pesticide Applicators' Act, Title 35 Article 10, C.R.S. (1991 Supp.).

Most issues encountered when developing these rules were neither exclusively factual nor exclusively policy. Consequently most issues were considered as both factual and policy.

Factual issues encountered when developing these rules include:

1. Commercial applicators are subcontracting with commercial applicators to perform pesticide applications. This activity can be divided into, two categories. First, there are subcontracts involving applications in the categories for which both commercial applicators are licensed. An example of this would be a commercial applicator licensed in agricultural weed control, but who has ground application equipment only, subcontracting with a qualified licensee applications for agricultural weed control that require application by air. Second, there are subcontracts involving applications for which the contracting commercial applicator is not licensed, but the subcontracting commercial applicator is. An example of this would be a commercial applicator licensed only in turf weed control subcontracting with a commercial applicator licensed in industrial and right of way applications for weed control in that category. Enforcement questions have arisen as to whom is responsible for such applications, i.e., the contracting applicator, the subcontracting applicator, or both.

2. A certificate of good standing from the Secretary of State will establish that an applicant for license is a bonafide business prior to issuance of such license.

3. In trying to define the level at which registration of public applicators should occur, the myriad of political subdivisions that may not need to register, nor choose to do so, while a sister subdivision may be required to do so by their use of restricted use pesticides was considered. It was decided to let each political entity determine what subdivision best described them as public applicators.

4. Expiration dates issued from the date of licensing have little meaning to the license holder. The birth date of the qualified supervisor and certified operator was chosen for the expiration date of their licenses, except for licenses issued pursuant to § 35-10-118(4).

5. The revised statute requires restricted use pesticides to be applied by a licensed qualified supervisor, licensed certified operator, or under the on site supervision of a licensed qualified supervisor. In the agricultural categories the pesticides being applied are often classified as restricted use. It is not uncommon for commercial applicators to employ individuals for short periods of time during the growing season to apply pesticides. The application equipment utilized often holds only one person. Therefore the individual applying restricted use pesticides from equipment holding only one person must be licensed as a qualified supervisor or certified operator. Many individuals working on this basis are licensed to use or supervise the use of restricted use pesticides in other states. Such licenses were issued pursuant to examination and/or continuing education. Because of the circumstances necessitating speedy issuance of credentials and the prior existence of similar credentials from other jurisdictions, it was the opinion of the advisory committee and the department that a certified operator's license could be reciprocal. In addition, in order to allow for emergency circumstances and still have assurance of competency, the provision for administration of an examination by the qualified supervisor so a person could apply restricted use pesticides for ten days was included.

6. When considering the requirements for continuing education the topics needed to be relevant and the opportunity to spread out the training was considered, as well as what areas were necessary to be updated every three years and how much credit was needed in each of these areas.

7. The factual issues considered when writing rules for technician training included who is a technician, the topics each type of technician should have knowledge about and be familiar with, the hours of training needed to adequately cover said topics, what is used and how the business operates, how the classroom vs. on the job training should be divided and who is responsible for the training and who can train.

Policy issues encountered when developing theses rules include:

1. Consideration of whom to hold responsible when a licensed commercial applicator is subcontracting with another licensed commercial applicator.

2. Not defining political subdivisions allows flexibility in the administration of registering public applicators.

3. In considering the continuing education requirements it was decided to allow credits vs. hours and not to assign time increments to the credits. This was done because an update in one area where there has been little change may be adequately covered in a minimum amount of time, whereas an update on another topic may require several hours to be considered adequate.

4. In relation to technician training the goal was to provide competent technicians using pesticides to assure proper application and minimization of hazards while not being overly burdensome or eliminating competition through regulation. The manner in which each business operates was also considered, i.e. the differences between an agricultural, turf, ornamental and structural business.

18.02. January 31,1992 - Effective February 1, 1992

This rule is adopted under the Pesticide Applicators' Act pursuant to § 35-10-118 and pertains to the administration enforcement of the licensing provisions authorized under Pesticide Applicators' Act.

During the 1990 legislative session, article 10 of title 35 was repealed and reenacted. Sections 35-10-105 - 107,35-10-109- 110, and 35-10-113-116 revised the types licenses issued to pesticide applicators by the department of agriculture and manner in which they are issued. The revisions included registration by limited commercial and public applicators under certain circumstances, licensing of certified operators, and training requirements for technicians.

These rules allow the Commissioner to comply with those provisions.

The notice and hearing requirements of § 24-4-103 of the Colorado Administrative Procedures Act have been met. In accordance with the timelines established for rule making the effective date for these rules will fall after the beginning of spray season. Therefore, the immediate adoption of Part 1. - 5. is imperatively necessary for the preservation of public health, safety, and welfare.

18.03. September 17, 1993 - Effective October 30, 1993

These rules are adopted by the Commissioner of the Department of Agriculture pursuant to his authority under § 35-10-118, C.R.S. (1992 Supp).

The purpose of these rules is to: (1) set the annual licensing fee for commercial applicators pursuant to 35-10-118 (2)(d); to permit the use of a termiticide only in accordance with label directions; and to houseclean the existing rules by correcting incorrect citations, eliminate conflicting provisions, correcting misspellings, etc.

Factual issues encountered when developing the rule setting the annual license fee for commercial applicators include:

1. In 1983 the legislature repealed and reenacted the Pesticide Applicators' Act. The 1983 statute established the Pesticide Applicators' fund for the purposes of administration and enforcement of the program. It also set the licensing fee for a commercial applicator's license at $250.00.

2. In 1990 the legislature repealed and reenacted the Pesticide Applicators' Act. The current statute authorizes the Commissioner to set the amount of the license fee for a

commercial applicator, business license, not to exceed $250.00 through licensing year 1991 and $350.00 thereafter.

3. The licensing fee for a commercial applicator's business license has not been raised since 1983.

4. Program costs now exceed revenues and the fund balance has been depleted.

Policy issues encountered when developing the rule setting the annual license fee for commercial applicators include:

1. The fee structure for the commercial pesticide applicator program has been carefully considered by the Department and the Pesticide Advisory Committee. After reviewing the projected shortfall and various fee increases it was decided that the most prudent course at this tune was to increase the annual commercial applicator business license fee $100 in order to help reduce the shortfall and continue the program services.

2. The remainder of the projected shortfall will be addressed by program cost reductions.

3. In addition the Department and the Advisory Committee will continue to study the program's fee structure for further refinement and recommendations.

Factual issues encountered when developing the rule pertaining to the use of termiticides include:

1. Under Section 2 (ee) of the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA) a pesticide application may be made at less than labeled rate as long as the label does not prohibit such an application and it is made in accordance with other label directions.

2. Many applications made for the control of termites are made at less than the labeled rate. This is especially true for pretreat applications.

3. To date there is no scientific data to support the efficacy of using a termiticide at less than the labeled rate.

4. Consumers, especially pretreat customers, may be purchasing termite control, assuming a protection has been afforded them when in actuality very little termiticide has been applied.

5. Efficacy studies at less than the current labeled rate are being performed.

6. If the studies show efficacy at less than labeled rates, then this rule will be reconsidered.

Policy issues encountered when developing the rule pertaining to the use of termiticide include:

1. The issue of applications at less than the rates stated on any label was considered. It was decided to limit the rule to termiticide applications only.

2. The issue is one of consumer protection and the potential for fraudulent applications if the 2 (ee) policy is continued as it relates to termiticides.

3. The Federal Insecticide, Fungicide and Rodenticide Act clearly authorizes a state to be more restrictive than the Act, but not less. This rule is more restrictive and falls well within statutory authority.

Factual issues encountered when developing the housekeeping measures included incorrect citations, misspellings, conflicting provisions and unclear provisions exist in the current rules.

Policy issues encountered when developing the housekeeping measures included the necessity of maintaining correct rules.

18.04. July 28, 1994 - Effective September 30, 1994

These rules are adopted by the Commissioner of the Department of Agriculture pursuant to his authority under § 35-10-118, C.R.S. (1993 Supp.)

The purpose of the rules is to: create a mixer/loader category pursuant to 35-10-118 (2) (b); clarify the qualifications for licensing in the wood destroying organisms category pursuant to 35-10-118 (2) (b); clarify the definition of technician to include flaggers for purposes of technician training; and correct the terminology in the requirements for licensing as a qualified supervisor/certified operator.

Most issues encountered when developing these rules were neither exclusively factual nor exclusively policy. Consequently most issues were considered as both factual and policy.

Factual issues' encountered when developing these rules include:

1. It is not unusual for commercial applicators licensed in the agricultural categories, especially aerial applicators, to employee individuals who only mix and load the pesticides being used. These employees do not evaluate pest problems, make recommendations, sell services, etc. Many of the pesticides used by applicators licensed in the agricultural pest control categories are restricted use pesticides. This means the employee can only handle these pesticides if they are licensed as a certified operator or qualified supervisor, or if a licensed qualified supervisor is on site. In order to obtain a license an individual must successfully complete a general examination and category specific examinations. The category specific examinations include questions on pests, hosts, pest control and various subjects related to evaluating pest problems, making recommendations, selling services, etc. Since mixer/loaders do not perform these functions, and will not perform them, the category specific examinations are difficult for them to successfully complete and irrelevant to their job. The subjects on the general examination cover the topics in which an individual acting strictly as a mixer/loader would need to be knowledgeable.

2. To control termites a structure may be treated prior to completion or a finished structure may be treated. The skills and knowledge needed to perform these two different types of applications are vastly different. The language setting out the experience for licensing in the wood destroying organism control category was nebulous. An individual with only pre-treat experience and knowledge could be licensed to perform any wood destroying organism control application whether or not he had any post-treat experience. Only a few commercial applicators perform termite applications because of the cost of the equipment and specialization of the service.

3. The code of federal regulations associated with the Federal, Insecticide, Fungicide and Rodenticide Act (FIFRA) has been amended to include expanded worker protection regulations. These regulations cover all handlers including flaggers.

Policy issues encountered when developing these rules include:

1. In relation to establishing a new mixer loader category we had to consider how to comply with both the letter and the intent of the statute without being unduly burdensome on the industry.

2. In relation to defining more specifically the experience needed for licensing in the wood destroying organism category the potential for restraint of trade had to be considered.

18.05. January 19, 1995 - Effective March 2, 1995

This rule is adopted by the Commissioner of the Department of Agriculture pursuant to his authority under § 35-10-118, C.R.S. (1994 Supp.)

The purpose of the rule is to correct a typographical error in the existing rule. Factual issues encountered when developing these rules include:

A typographical error was discovered in the Part 9.02 (b) of the rules. This rule as published states “Such field experience shall have been obtained within the five years immediately preceding the applicant's application for licensing as a qualified supervisor.

Policy issues encountered when developing these rules include:

To be consistent with Part 9.02 and with the original intent of the rule the error needed to be corrected.

18.06. July 23, 1996 - Effective August 30, 1996

STATUTORY AUTHORITY: These emergency rules are adopted by the Commissioner of the Colorado Department of Agriculture (the “Commissioner”) under the authority of §35-10-118 (2) and (9) C.R.S. (1995), and in accordance with §24-4-103 (6) C.R.S. (1988, 1995 Supp.).

STATEMENT OF REASON: The reasons for adopting these emergency rules is to: (1) create a sub-category for the use of the pesticide metam-sodium to control roots in sewers pursuant to §3510-118 (2)(b), and set out the standards and criteria associated with the establishment of such a sub-category; (2) repeal Part 8.04 and amend related language in the existing rules concerning mixer/loaders in order to be consistent with amendments to the Pesticide Applicators' Act derived from Colorado Senate Bill 96-086, which became law effective July 1, 1996; and (3) make miscellaneous technical amendments to conform the existing rules to the amendments hereby adopted.

On June 23,1996, the Commissioner ordered that proceedings be instituted for the adoption of new permanent rules and regulations pertaining to these matters, and notice was published on July 10,1996, in accordance with applicable law, for a hearing on such proposed new permanent rules and regulations to be held on July 30, 1996, at 9:00 a. m., at the Department of Agriculture, Division of Plant Industry Testing Room, 700 Kipling Street, Suite 4000, Lakewood, Colorado 80215-5894.

NEED FOR EMERGENCY RULES: These emergency rules pertaining to the creation of a sub-category for the use of metam-sodium to control roots in sewers, the standards and criteria associated with the establishment of such a sub-category, and the technical amendments in furtherance thereof, are made necessary by action of the U.S. Environmental Protection Agency (“EPA”). The EPA recently classified the pesticide metam-sodium as a restricted use pesticide when used to control roots in sewers. Applicators wishing to purchase or use this pesticide must now be certified to do so. I is imperative that these emergency rules be adopted in order to permit the Colorado Department of Agriculture, Division of Plant Industry to license and regulate the activities of pesticide applicators who wish to use metam-sodium for root control in sewers pending the conclusion of the formal rule-making proceedings initiated by the Commissioner for the adoption of permanent rules and regulation on this subject.

The emergency rules pertaining to the repeal of Part 8.04 and the amendment of related language in the existing rules concerning mixer/loaders, and the technical amendments in furtherance thereof, are necessary to conform the existing rules and regulations with amendments to the Pesticide Applicators' Act derived from Colorado Senate Bill 96-086, which became law effective July 1,1996, pending the conclusion of the formal rule-making proceeding initiated by the Commissioner for the adoption of permanent rules and regulations on this subject.

Based on the foregoing, the Commissioner hereby finds that immediate adoption of these rules is imperatively necessary to comply with state law and federal regulations, and for the preservation of public health, safety and welfare and that compliance with the formal rule- making requirements of §24-4-103 would be contrary to the public interest.

EFFECTIVE DATE: These emergency rules will be effective on the date adopted by the Commissioner, and shall remain in effect for ninety (90) days thereafter.

18.07. September 25, 1996 - Effective November 30, 1996

Statutory Authority: These permanent rules are adopted by the Commissioner of the Colorado Department of Agriculture pursuant to his authority under C.R.S. § 35-10-118(2), (4) and (9) (1995, as amended).

Purpose: The purpose of these permanent rules is to: (1) create a sub-category for the use of the pesticide metam sodium to control roots in sewers pursuant to C.R.S. § 35-10-118(2)(b), and set out the standards and criteria associated with the establishment of such a sub- category: (2) repeal Part 8.04 and amend related language in the existing rules concerning mixer/loaders in order to be consistent with amendments to the Pesticide Applicators' Act derived from Colorado Senate Bill 96-086, which became law effective July 1, 1996; (3) revise the recordkeeping requirements Part 6.03(e);(4) clarify the language in Part 2.49 concerning the issuance of reciprocal licenses; and (5) make miscellaneous technical amendments to conform the existing rules to the amendments hereby adopted and to correct grammatical errors.

Basis: Some of the issues encountered in the promulgation of these permanent rules were neither exclusively factual nor exclusively of a policy nature. Consequently, some issues were considered as both factual and of a policy nature.

The factual and policy issues encountered in adopting these permanent rules include:

1. Factful Issue(s): The U.S. Environmental Protection Agency (EPA) recently classified the pesticide metam sodium as a restricted-use pesticide when used to control roots in sewers. Applicators wishing to purchase or use this pesticide must now be certified to do so.

   Policy Issue(s): This classification by the EPA has made it necessary to create a new sub- category of aquatic applicators for the application of metam sodium for root control in sewers. In establishing this sub-category, consideration had to be given to complying with both the letter and the intent of the Pesticide Applicators' Act (the Act) without being unduly burdensome on the industry or the agency.

2. Factual Issue(s): Colorado SB 96-086 amended C.R.S. 3510-103(15)(a) (II) of the Act to amend the definition of “technician” to include individuals who exclusively mix and/or load pesticides. This makes the mixer/loader sub-category in the agricultural classification unnecessary.

3. Factual Issue(s): Part 6.03 of the existing rules requires licensed entities to identify the pesticide product they are using. Recording the EPA registration number of the pesti-cide product is a permitted method under the existing rule, but not required.

   Policy Issue(s): Generally, the EPA registration number can more accurately identify a product than the manner in which a licensee may choose to describe the product name, and under the adopted rule, is a required method of identifying the pesticide.

4. Factual Issue(s): Part 2.49 describes the procedure by which an individual certified or licensed by another jurisdiction can obtain a

Colorado license as a certified operator issued through reciprocity. The existing language in this part does not make it clear that the issuance of such a license can only be done through re-application, since the Colorado Department of Agriculture is not the original issuing agency. The adopted rule clarifies this point.

18.08. March 13, 1997 - Effective April 30, 1997

Statutory Authority:

These permanent rules are proposed for adoption by the Commissioner of the Colorado Department of Agriculture pursuant to his authority under the Pesticide Applicators' Act (the "Act") at C.R.S. §§ 35-10-118(2), (5) and (9) (1995, 1996 Supp.).

Purpose:

The purpose of these proposed permanent rules is to: amend the definition of the term "abut"; conform the rules and regulations to the amended statutory definition of the term "limited commercial applicator"; repeal Section 2.42; to clarify the language in Section 2.45 regarding when a qualified supervisor may be licensed as a certified operator in an additional category without payment of the application fee for the certified operator's license; consolidate the turf categories into a single category under the ornamental classification, and modify the continuing education requirements therefor; consolidate the ornamental categories into a single category under the ornamental classification, and modify the continuing education requirements therefor; expand, under certain circumstances, the customer notification requirements for pesticide applications at a commercial site; create a new category named "Interior Plant Pest Control" within the structural pest control classification, and establish standards therefor; establish requirements for the identification of service containers; amend the requirements for registration of pesticide sensitive persons pertaining to the statement of proof of medical justification, the frequency for submitting such statement, and payment of the administrative fee for registration; create a Part 15 for rules and regulations pertaining to enforcement, and establish a definition for the phrase "substantial danger or harm to public health and safety, to property, or to the environment" as required by Senate Bill 96-086, which amended C.R.S. § 35-10-121 by adding subsection (2.5); and make miscellaneous technical amendments to conform the existing rules to the amendments hereby proposed.

Factual and Policy Issues

The factual and policy issues encountered in the proposal of these permanent rules are as follows:

(1). Senate Bill 96-086 amended C.R.S. § 35-10-112(l)(c), which deals with requirements for notifying persons who reside on property abutting the site of a pesticide application. The amendment provides that two property sites that would be considered abutting but for the fact that they are separated by an alley are for the purposes of this section to be deemed abutting. This statutory change requires amendment of the term "abut" in Section 1.02(a) of the rules in order to make it consistent with this statutory amendment.

(2). Senate Bill 96-086 amended C.R.S. § 35-10-112 (l)(a), which pertains to the registry of pesticide-sensitive persons. This amendment requires that the proof of medical justification for inclusion on the registry be made by a physician licensed in the state of Colorado, that it be updated every two (2) years, and that the administrative fee for registration be repealed. These statutory changes require conforming amendments to the following sections of the rules: Sections 1.02(e), 12.01, 12.04, and 12.05.

(3). Senate Bill 96-086 amended C.R.S. § 35-10-103(8), which defines the term "limited commercial applicator." This amendment expands the definition of the term to include

persons engaged in applying pesticides in the course of conducting a business on property leased, as well as property owned by the person or the person's employer. This statutory change requires a conforming amendment in Section 2.18 of the rules.

(4). Section 2.42 of the rules is repealed because it was needed only for a limited time in order to facilitate the administrative transition from the previous licensing system to the current one.

(5). Section 2.45 of the rules is amended only to clarify its provisions. No substantive change to this rule is intended.

(6). The ornamental classification now in effect has the following categories: Turf Insect Control, Turf Plant Disease Control, Turf Weed Control, Ornamental Insect Control and Ornamental Plant Disease Control. The three turf pest control categories all pertain to working on one type of site, namely turf, except for weed control in ornamental beds. The two ornamental categories cover a wide range of sites, but labels for pesticide products used on these types of sites often state the site as “ornamentals” and do not distinguish between various hosts such as locust, elm, etc. A qualified supervisor or certified operator working in any of the current turf categories needs to be aware of symptoms indicative of environmental, cultural practice and pest stresses in the related turf categories in order to properly diagnose a problem and recommend the correct solution. This also applies to a qualified supervisor or certified operator working in any of the current ornamental categories.

The proposed amendments to Section 9.01 of the rules consolidates the three turf categories into a single category, and consolidates the two ornamental categories into a single category. This consolidation will require persons who wish to be licensed in either of these categories to possess a broader range of knowledge covering what was previously divided into separate categories. Thus, one examination for each of the two consolidated categories (i.e., turf and ornamental) will be given rather than the multiple examinations currently given for each of the five separate categories described above.

Also, because of the broader range of knowledge required for each of these consolidated categories, the continuing education requirements for these consolidated categories will be increased from one to two credits. This change is reflected in the amendments to Section 4.01, which will be phased in beginning January 1, 1998.

These proposed amendments to Section 9.01 require the technical conforming amendments that are proposed for Sections 9.02 and 9.03, and 5.7 through 5.21, inclusive.

(7). Senate Bill 90-086 amended C.R.S. § 35-10-112(2) (d) by adding sign posting notification requirements where a commercial or limited commercial applicator makes a pesticide application to a commercial site when the owner or agent of the owner is not present at the site. The proposed amendments to Section 9.04 of the rules are intended to broaden the notification requirements of that rule (which are unrelated to the statutory sign posting requirements) to specifically address the situation where a pesticide application is made to a commercial site when the owner or agent of the owner is not present.

(8). The number of interior plants in public structures has gradually increased over the last twenty years. Over time, more and more caretakers of these interior plants have come under the regulation of the Colorado Department of Agriculture with respect to the application of pesticides. These interior plant caretakers have had to qualify for licensing in categories that are not entirely applicable to the circumstances in which they work (e.g., Ornamental Insect Control and Ornamental Plant Disease Control, which cover exterior plants). The addition of an Interior Plant Pest Control category will correct this

situation. It will also provide the Colorado Department of Agriculture and the public with a greater assurance that the qualified supervisors, certified operators and technicians working in this category are qualified to do so.

Consideration was given to the placement of this category in either the ornamental classification or the structural pest control classification. Since pesticide applications to indoor plants are made inside buildings and other structures, this new category was placed in the structural pest control classification because the hazards related to such applications and the precautions that need to be taken when making them are more closely related to that classification than the ornamental classification.

The addition of this new category is reflected in the proposed Section 10.01(8) of the rules. The amendments to Sections 10.03 and Sections 5.25 through 5.28, inclusive, are technical amendments made to conform those rules to the addition of this new category.

(9). Under certain circumstances licensees under the Act transfer pesticides into smaller containers in order to perform or facilitate its application. For example, a structural pest control operator may purchase a 10 gallon pail of rodent bait and provide each of his technicians with a one gallon container of the bait taken from the 10 gallon container. Additionally, certain application equipment is of a size that can be carried and handled by one individual, e.g., a one gallon sprayer used to spot treat weeds in turf. The industry refers to these containers as “service containers.” At one point in time the EPA had an operating policy which detailed the requirements for marking service containers so the material in it could be identified. EPA's operating policy was rescinded and is no longer in force.

A new rule requiring the identification of service containers is necessary and appropriate for the public's health, safety and welfare now mat the EPA's operating policy has been rescinded. In establishing the requirements for marking service containers, consideration had to be given about providing information essential for safety and welfare without being unduly burdensome on the industry, and without conflicting with existing federal regulations. This new rule appears in the proposed Section 11.08.

(10). Senate Bill 96-086 amended C.R.S. § 35-10-121 by adding subsection (2.5), which relates to enforcement proceedings brought under the Act. This subsection (2.5) requires the Colorado Commissioner of Agriculture to define the phrase “substantial danger or harm to public health and safety, to property, or to the environment.” In response to this statutory amendment, the rules are amended to add a Part 15. Enforcement, and to define the foregoing phrase in proposed Section 15.01.

18.09. February 11, 2004 - Effective May 3, 2004

Statutory Authority

The amendments to these rules are proposed for adoption by the Commissioner of the Colorado Department of Agriculture pursuant to his authority under the Pesticide Applicators' Act, (the “Act”). §§ 35-10-118(2)(a)(b)(c), (5), and (9), C.R.S.

Purpose

The purpose of these proposed rule amendments is to: In Part 1, add the definition of “in the possession of to clarify the proposed rule 7.06, that requires the applicator to have label information at the site of any pesticide application; in Part 2, amend Rule 2.10 by requiring all categories to have on file at the time of submission of an application for renewal of a license, evidence of liability insurance which is in force at the time of the application; amend Rules 2.15 and 2.16 by adding a requirement for a written provision in contracts that incidentally require a pesticide application, that notes that a licensed subcontractor will be

used for any pesticide application the primary contractor is not licensed for; in Part 4, delete Rule 4.1 that expired on January 1, 1998 and remove language from the version of Rule 4.1 (h) noting the effective date of the current Rule; delete the version of Rule 4.5 that expired on January 1, 1993 and remove language from Rule 4.5 noting the effective date of the current Rule; in Part 5, amend Rule 5.1 by clarifying that the definitions outlined in 5.1 apply to all technician training outlined in Part 5 of the Rule; amend Rule 5.1(b) by adding the definition of a “new hire experienced technician” and “on-going experienced applicator technician” to clarify training differences outlined in Part 5; amend Rules 5.5, 5.10, 5.15, 5.20, 5.23, and 5.27 to clarify that training requirements outlined in each section pertain to on-going experienced applicator technicians and that on-going training must be conducted each year after the first season of experience; amend Rules 5.6,5.11,5.16, 5.21, 5.24, and 5.28 to clarify that the training requirements outlined in each section pertain to new hire experienced technicians; amend Rules 5.9(c) and 5.18(c) to clarify the amount of on the job training hours that must be conducted by a licensed qualified supervisor or certified operator; in Part 6, amend Rule 6.02 to require limited commercial and public applicators to maintain records of all pesticide applications they make; amend Rule 6.03 by adding a requirement that the record of application must have the name of the person(s) who made the application; amend Part 6 by adding a new Rule 6.04 requiring any applicator performing wood destroying insect control for termites to keep and maintain records in addition to those outlined and proposed in Rule 6.03; in Part 7, amend Rule 7.02 by adding requirements for commercial and public applicators to identify their ATV/off-road application equipment; amend Rule 7.02 by adding requirements for public applicators to identify their application equipment; amend Part 7 by adding a new Rule 7.06 to require that a copy of the label for the pesticide in use be in the possession of the applicator at the site of application; in Part 8, amend Rules 8.01 (f) and (g) to clarify that additional licensure in the turf and ornamental categories is required when performing applications in forest or rangeland areas that come within 50 feet of residential or commercial structures; amend Rule 8.01(j) by deleting the language “in programs” and “large scale” to clarify that the Public Health category applies to any pesticide application performed for disease vector control; in Part 11, amend Rule 11.08 to require the name of the applicator in addition to the existing service container labeling requirements; in Part 13, amend Rule 13.04 to clarify that notification signs must be posted within multi-unit residential and commercial properties in a conspicuous manner to prevent children or adults from entering a treated area; and make miscellaneous technical amendments to conform the existing rules to the amendments hereby proposed.

Factual and Policy Issues

The factual and policy issues encountered when developing these rules include:

1) Amendments and additions being made in Parts 1,2,4, 5, 6 and 8 are necessary to correct and clarify existing language, delete out dated and irrelevant language, and correct and clarify ambiguous language to reflect the regulatory intent of the existing licensure, business, record keeping, and training requirements.

2) A new Rule is proposed in Part 6 to require the signature of the applicator on the service record to help the CDA identify the technician, certified operator, or qualified supervisor responsible for each application during investigations.

3) In the last 10 years the termite activity in Colorado has increased. A high level of knowledge and experience in building construction, treatment techniques, and termite biology is needed when performing these applications. Since these applications are made in areas where the consumer can not verify the quality of the application and consumers generally do not possess the knowledge to know the correct steps and procedures to eradicate or control a termite infestation, it is easy for commercial applicators to defraud the consumer. The proposed Rule 6.04 will require applicators to record information specific to termite applications that will allow the CDA to confirm that all treatments were performed to label requirements and industry standards.

4) In recent years the Pesticide Application industry has begun using All Terrain Vehicles (ATV's) to perform applications in areas that are inaccessible to standard application

vehicles. Under the current Rule 7.02, these ATV's meet the specifications that require the vehicle to be identified, but due to their size applicators have been unable to comply. The proposed Rule addresses this issue and modifies the equipment identification requirements so applicators can identify their equipment, which will ensure the public and the CDA can identify these applicators.

5) Currently under Rule 7.02, public applicators are not required to identify their application equipment. Each year the CDA receives a number of inquiries and complaint calls pertaining to public entities that are performing pesticide applications that the CDA office staff must research to determine jurisdictional authority. A new Rule is proposed to require public applicators to identify their application equipment to enable the public and CDA to easily identify the public entity in the field, which will reduce public concern and minimize the CDA staff time required to identify currently registered public applicators.

6) Pine Beetle eradication has become a priority for the State of Colorado. As the Pine Beetle infestation has spread, more applications are being performed on private property where the trees are no longer being maintained as part of a forest, but rather as ornamental trees for aesthetics. Applications performed around residential and commercial structures create a higher likelihood that persons or pets may come in contact with the treated area. Ornamental applicators are trained in the precautions needed when making applications around structures, and under 35-10-112 of the PAA are required to post notification at the time of an application. The current Forest category does not address the hazard identification and safety precautions needed when performing pesticide applications in close proximity to inhabited structures. An amendment to Rule 8.01 (f), Forest Pest Control, is proposed to require applicators to hold the appropriate ornamental license, which addresses the safety, hazard, and notification requirements needed when performing applications close to an inhabited structure. The Rangeland Pest Control category, 8.01(g), has the same safety concerns when pesticide applications are made around inhabited structures for insect or noxious weed control. The Rangeland category requirements will be identical to the Forest category except that licensure in the Turf category will be required.

7) Rule 11.08 currently requires that any service container be labeled to identify the contents within. Since these service containers are in many cases left at the customer's residence (i.e.: rodent bait stations) or can be inadvertently left behind or left unattended by an applicator, the CDA is proposing an amendment to Rule 11.08 that will require the name of the licensee on the label. In case of an emergency this will provide the name of the licensee so pertinent information for the unattended product (i.e.: labels and Material Safety Data Sheets) can be obtained and the responsible licensee can be quickly contacted to take appropriate remedial action.

8) Currently turf and ornamental applicators are only required to post a notification flag at each entryway to a property regardless of its size or the number of buildings on it. Each year the CDA receives calls from pesticide sensitive individuals or concerned parents complaining of turf or ornamental applications that have been performed at their apartment complex and their child or pet, unbeknownst to them at the time, entered a treated area. The current rule in Part 13 does not specify that a flag(s) must be posted within the common areas of multi-unit residential or commercial properties. The proposed amendment to Rule 13.04 will help ensure that any person entering a common area that has been treated with pesticides will be able to see a flag notifying them of that application.

18.10. October 19, 2006 - Effective January 1, 2007

Statutory Authority

These amendments to these rules are proposed for adoption by the Commissioner of the Colorado Department of Agriculture pursuant to his authority under the Pesticide Applicators' Act, (the "Act"). §§ 35-10-118(2)(a)(b)(c), (5), and (9), C.R.S.

Purpose

The purpose of these proposed rules is to make conforming amendments is to address statutory changes made to the Pesticide Applicators' Act as a result of House Bill 1239, The Pesticide Applicators' Act Sunset Review Pesticide Applicators' Bill, and House Bill 1274, The Pesticide Applicators' Act Pesticide Private Applicators License Bill. The purpose of the proposed Rules is to:

- Make miscellaneous technical amendments to conform the existing rules to the amendments proposed;
- Add language to reinstate an pesticide applicator license within 180 days;
- Outline the private applicator examination and licensure requirements and provisions;
- Address examination security provisions for commercial and private applicators;
- Create continuing education requirements as it pertains to private applicators;
- Specify recordkeeping requirements for commercial, registered limited commercial, registered public applicators and licensed private applicators;
- Clarify the pesticide storage requirements of commercial applicators, registered limited commercial applicators, limited public applicators, and private applicators;
- Specify pesticide sensitive notification requirements and provisions that apply to turf and ornamental applicators vs. structural applicators;

Factual and Policy Issues

The factual and policy issues encountered when developing these rules include:

1) House Bill 1274 amended C.R.S. § 35-10-104 to expand the authority of the Colorado Department of Agriculture to regulate the use of pesticides by all persons in the State of Colorado. As a result of H.B. 1274, amendments and additions made in Parts 2, 3, 4, 5, 6, 7, 8, 11,12, and 13 and associated Rules are necessary to clarify what Part and Rule applies to "registered' or "licensed" persons and/or entities in the State of Colorado. Other changes include spelling and miscellaneous technical amendments to conform the existing rules to the proposed amendments.

2) House Bill 1274 amended C.R.S. § 35-10-103 to add the definition of a private applicator, which defines a private applicator as a person who "uses or supervises the use of a pesticide for producing an "agricultural commodity." C.R.S. § 35-10-114.5 requires any person who uses or supervises the use of a restricted use pesticide shall possess a valid private applicator license issued by the Commissioner. There is no State definition of "agricultural commodity" for CDA to refer to when it must determine if a private applicator is raising an agricultural commodity prior to certifying and issuing a private applicator license. CDA needs to verify that the license is being obtained and will be used in the manner intended. Upon request from EPA Region VIII, Part 1 was amended to create Rule 1.02 (k), which defines an "agricultural commodity". The definition will help clarify for CDA and applicants that a private applicator must be engaged in the production of an "Agricultural Commodity", as defined, to qualify to obtain a private applicator license

which will allow them to purchase, apply, and supervise the use of restricted use pesticides on property they own or lease.

3) House Bill 1239 amended C.R.S. §35-10-116(6) of the Act to give the CDA the authority to "reinstate" an applicators license, within 180 days of its expiration, on the condition that all continuing education requirements had been met prior to the expiration date. The currant language in Rule 2.46 addressed renewal requirements only. Rule 2.46 is amended by adding the licensure reinstatement provisions, outlined in C.R.S. §35-10-116 (6), for added clarity that an applicator may "reinstate" a license if certain provisions are met.

4) House Bill 1274 amended C.R.S. §35-10-115, which authorizes the CDA to begin issuing licenses to private applicators on and after January 1, 2007 and by adding a new statutory provision, C.R.S. §35-10-114.5, requiring any person acting as a private applicator using or supervising the use of restricted use pesticides be licensed as a private applicator by the Commissioner. Rule 2.50 is being repealed because it created a loophole that did not allow the CDA to enforce the provisions of the Act and Rules for someone acting as a certified operator if: they were a new employee, completed the private applicator exam issued by EPA Region VIII, their employer notified the department within 3 days and they completed the certified operator test within 14 days from their initial employment. EPA Region VIII will no longer be issuing private applicator licenses after January 1, 2007 and the CDA no longer wants to continue to allow a person to act in the capacity of a certified operator, which allows applications of RUPs in categories their employer is licensed in, without taking a closed book test, verifying that they have core knowledge of laws and regulations, applicator safety, public safety, environmental protection, use of pesticides, and pesticides and their families, to apply a "higher risk" pesticide in the general public.

5) House Bill 1274 amended C.R.S. §35-10-115, which authorizes the CDA to begin issuing licenses to private applicators on and after January 1, 2007. A new statutory provision, C.R.S. §35-10-114.5, requires any person acting as a private applicator using or supervising the use of restricted use pesticides be licensed as a private applicator by the Commissioner. Under H.B. 1274, C.R.S. §35-10-117 (1)(a) was amended to make it unlawful for any person to perform acts that require licensure as a private applicator. C.R.S. §35-10-118 (2)(b) and (c) authorize the Commissioner adopt Rules to establish qualifications for issuance and reinstatement of any license issued under the Act. These statutory changes require conforming amendments by the creation of a new Subpart D, part 2.48 through 2.58, which addresses private applicator licensure requirements, submission of information requirements, examination requirements, fee requirements, renewal and reinstatement provisions, supervision, licensure upgrades and reciprocity.

6) Under C.R.S. §35-10-118(2)(c) the Commissioner is authorized to adopt Rules for any disciplinary actions authorized under Title 35, Article 10. Part 2, Subpart E, "Licensure Actions, Suspension, Denial, Revocation", Rule 2.59, was existing language that was moved from Part 7 of the Rules. This Rule outlines actions that constitute grounds for denying, suspending or revoking a business entity's license or registration or an individual's license. This section was moved from Part 7 to Part 2, which outlines business licensure and registration requirements and individual license issuance and renewal requirements, for clarity.

7) Add language to coincide with H.B. 1239, C.R.S. §35-10-118(3)(c), by adding clarifying language stating the commissioner or "his or her designated administrator shall" administer a general examination to qualified supervisors and certified operators and add "private applicator" to the current examination administration provisions set forth in Rule 3.1 and 3.2 to include private applicators as a result of H.B. 1279.

8) Repeal Rule 3.3, to remove unnecessary language from the Rule pertaining to when the examinations will be administered by the Commissioner.

9) Part 3, Rule 3.8, was amended by adding language to the existing exam security provisions, creating a section (a) pertaining to commercial applicators and a new section (b) pertaining to private applicators. Rule 3.8(a) outlines examination security provisions to prevent the content of CDA's closed book commercial examinations from being disseminated by any person. Old language stated that an applicant or licensee could not remove examination material, but did not clearly make it a violation if an applicant cheated on the exam by bringing in outside information to reference during the test. New language has been added to make this a violation for any applicant or licensee.

Rule 3.8(a) currently states that an applicant or licensee shall not cause the "nature of" any exam question to be disseminated. It can be argued that any person that has ever taken an exam and then does pre-certification training for his or her company may unavoidably disseminate the "nature of" an exam question. The CDA feels the intent of Rule 3.8 was to prevent blatant dissemination of examination questions. Therefore, the words, "the nature of" were removed to more clearly define that an exam question or answer may not be disseminated to any person.

The private applicator exam is an open book test, which is not currently required to be proctored. Rule 3.8(b), outlines private applicator exam security provisions and was created to address circumstances that have been brought to the CDA's attention that, in some instances, a private applicator has had someone else fill out their test answer sheet (a spouse or family member) or may have attended a workshop where the administrator blatantly gave them the answers to the exam. This Rule is established to make it a violation for any person to disseminate the answers of the private applicator exam to an applicant or licensee or to allow someone other than the applicant or licensee to fill out the examination form.

10) Amend Part 4, Subpart A's title, "General Continuing Education Requirements for Qualified Supervisor and Certified Operator" to clarify that subpart A pertains only to qualified supervisors and certified operators.

11) Amend Part 4, Rule 4.3, to wordsmith the current notification of continuing education workshop provision for clarity and in Rule 4.5 language to clarify that the continuing education provisions must cover topics from subject areas and subtopics outlined in Subparts C through I, in Part 4 of the Rules.

12) Amend Part 4, Subpart B, Rule 4.6 through 4.10, to comply with H.B. 1274, C.R.S. §35-10-116(2) and §35-10-118(5) by adding new language outlining continuing education requirements pertaining to private applicators. Subpart B outlines the number of continuing education credits needed, course approval requirements, course notification provisions, workshop sponsor reporting requirements, and that the continuing education provisions must cover topics from subject areas and subtopics outlined in Subpart C through H, in Part 4 of the Rules.

13) Amend Part 6, Records, of the Rules by the creation of a Subpart A and Subpart B.

Subpart A outlines the current recordkeeping requirements for commercial, registered limited commercial and registered public applicators.

Pursuant to H.B. 1279, C.R.S. 35-10-111, which added recordkeeping requirements for private applicators that use restricted use pesticides (RUP), the CDA has amended Part 6 by creating a Subpart B, Rule 6.05, which requires private applicators to maintain

records of RUP applications, the elements of such records are currently required by the USDA under the Code of Regulations, 7 C.F.R., Part 110 (2006), which C.F.R. is referenced in Rule 6.05. C.R.S. 35-10-111 requires records to be kept for a minimum of 3 years, 1 year more than the USDA requirement, which is noted in Rule 6.05.

14) Part 7; amend Rule 7.02, by changing “licensee” from singular to plural to encompass private applicators. Clarifying statement.

15) Part 7, amend Rule 7.05 by adding language to exempt private applicators from this provision which requires licensed commercial, registered limited commercial, and registered public applicator employees to have a copy of the pesticide label at the site of application in case a question pertaining to the use of product, PPE, precautions, etc. come up during the course of the application. Adding this requirement for private applicators is not needed since all mixing, loading, and use are conducted on the private applicator’s property and the pesticide product label should be on the property site for reference when questions arise.

16) Amend Part 11, with the creation of a new Subpart A and Subpart B to clarify pesticide storage requirements for commercial applicators, registered limited commercial applicators, registered public applicators, and private applicators.

Subpart A, Rules 11.01 through 11.08, is existing language that outlines storage requirements and equipment identification for commercial, registered limited commercial, and registered public applicators.

Subpart B, is new language that is specific to licensed private applicators. H.B. 1274, C.R.S. 35-10-117(1)(i) makes it a violation of the Act to store a pesticide in a manner inconsistent with label directions. Subpart B, Rules 11.09 through 11.11, reiterates this statutory provision, due to the fact that the pesticides licensed private applicators will be storing may be restricted use pesticides, by stressing that pesticides should be stored in a manner as to prevent an unreasonable risk to persons, property or animals, that they are stored in a manor that prevents damage to the container or label, and if stored in an outdoor pesticide storage area that the pesticide is protected from the elements to prevent the risk of damage to the container or label and avoid the creation of an unreasonable risk to persons, property, or animals.

17) H.B. 1239 amended C.R.S. 35-10-112 by expanding the notification of pesticide sensitive individuals to structural pest control operators. Part 12 of the Rules was amended to create a new Subpart A and Subpart B.

Subpart A, Rule 12.06 and 12.07, retains existing language pertaining to turf and ornamental notification requirements.

Subpart B, Rule 12.08 through 12.10, outlines the structural notification requirements for giving prior notice, methods that notice may be given, instructions if notification attempts fail, and emergency and specific product formulations that are exempt from the notification provision, created under H.B. 1239 and allowed under C.R.S. 35-10-112(2)(e) of the Act.

18.11. August 12, 2008 – Effective September 30, 2008

Statutory Authority

These amendments to these rules are proposed for adoption by the Commissioner of the Colorado Department of Agriculture (“CDA”) pursuant to his authority under the Pesticide Applicators' Act (the “Act”), §§ 35-10-118(2)(a)(b)(c), (4), (5), and (9), C.R.S.

Purpose

The purpose of these proposed rules is to:

1. Amend Rule 2.12 and 2.30 to define adequate supervision by establishing a qualified supervisor to certified operator/technician ratio.

2. Amend Rule 2.32 to clarify that any person who uses any pesticide without supervision while employed by a commercial, registered limited commercial or registered public applicator, must be licensed as a qualified supervisor.

3. Amend Rule 2.49 to clarify that licensed private applicators may only apply restricted use pesticides for the production of an agricultural commodity.

4. Amend Rule 2.59 clarify that an individual licensed in another jurisdiction outside Colorado may become licensed as a private applicator without examination.

5. Amend Rule 9.04 to clarify turf and ornamental notification provisions when making applications to multi-unit residential units when no on-site management person is present.

6. Create a new Rule 15.02 ad 15.03 to clarify that any person using a restricted use pesticide must be licensed as a qualified supervisor, certified operator or a private applicator.

7. Fix typographical errors, including:

   Correct Rule 2.36 by replacing the word “retirements” with “requirements”

   Clarify language in Rule 2.48

   Correct Rule 2.50 by changing the stated date of license renewal eligibility from January 1, 2006, to January 1, 2007

   Clarify Rule 8.04(f) by adding the omitted words “new hire” to the experienced technician language.

Factual and Policy Issues

The factual and policy issues encountered when developing these rules include:

1) Rule 2.12 and 2.30 states that if a licensee’s or registrant’s business operation is so extensive that one individual cannot “adequately” supervise all pest control recommendations, soliciting, mixing and loading, and applications of pesticides, more than one qualified supervisor must be employed by the licensee. CDA has historically interpreted this as requiring at least one qualified supervisor for each seven technicians, in order to ensure that s/he has the time and ability to provide the necessary on-site guidance and respond to an accident involving a pesticide spill posing a threat to health or the environment. Under the current Rule, which does not mandate a specific ratio of qualified supervisors to technicians, CDA has observed commercial applicators employing as many as 40 technicians in multiple business locations under the supervision of one qualified supervisor.

   CDA is proposing to amend Rule 2.12 and Rule 2.30 to increase the maximum number of technicians that a qualified supervisor may supervise to fifteen (15), of which no more

than eight (8) may be unlicensed technicians and clearly state that a qualified supervisor must be available while any technician is using a pesticide.

2) The current Rule 2.32 does not clearly state that any person working for a commercial, registered limited commercial or registered public applicator, must be licensed as a qualified supervisor to "use" any pesticide, as defined in Part 1.02(i) of the Rules, without supervision.

3) There have been questions as to the scope of pesticide use authorized under a Private Applicator license. CDA is proposing to amend Rule 2.49 by adding language to clarify that, consistent with EPA's interpretation of FIFRA, it is a violation of the PAA to use a private applicator license to use restricted use pesticides for other purposes than raising an "agricultural commodity," as that term is defined in Rule 1.02(k).

4) Rule 2.59 is the provision that allows qualified out-of-state licensed private applicators to reciprocate their license without having to take the Colorado private applicator exam. As currently phrased, however, this Rule states that a private applicator from another state may "perform" restricted use pesticide applications in Colorado without holding a Colorado license. That conflicts with § 35-10-114.5, C.R.S., which requires any Private Applicator using restricted use pesticides to have a Colorado license. The requirement in Rule 2.59 was intended to be similar to the provision for qualified supervisors and certified operators in Rule 2.48.

   CDA, therefore, is proposing to amend Rule 2.59 to correctly state, "An individual certified or licensed by another jurisdiction outside Colorado as a private applicator may obtain a Colorado private applicator license without passing an examination..." and amend Rule 2.48 to make the language of the two provisions consistent.

5) Rule 9.04 (a) and (b) requires an applicator to leave a written statement at the time of application that a pesticide has been applied stating the pesticide or pesticides applied, the date of application, and any precautionary information for each person residing on the property, and to provide this same written statement to the owner of the site or agent of the owner of the site if s/he is not present. The current rule does not clearly address notification of residents of multi-unit residential dwellings (apartments, condos, townhomes, etc) where there is no property manager on-site.

   CDA is proposing to amend Rule 9.04 to specify the manner in which notification must be provided when making applications at multi-unit dwellings when no on-site management is present at the site.

6) Now that it has jurisdiction over all pesticide use, CDA believes it is useful to clearly state in a new Rule 15.02 that any person using a restricted use pesticide must be licensed as a qualified supervisor, certified operator or a private applicator.

7) Rule 2.36 contains a typographical error. Rule 2.36 currently states, "the Commissioner may waive part of the experience retirements..." The Rule should read, "the Commissioner may waive part of the experience requirements."

8) Rule 2.50 contains a typographical error. Rule 2.50 currently states, "Licenses issued by the Environmental Protection Agency prior to January 1, 2006 cannot be renewed." The Rule should read, "Licenses issued by the Environmental Protection Agency prior to January 1, 2007 cannot be renewed".

9) In promulgating Rule 8.04(f) CDA inadvertently omitted the words "new hire." These words are necessary clarify that the required technician training hours outlined in

8.04(f)(1 – 4) apply to a “new hire” experienced technician, as defined in Part 5, Rule 5.1 (b)(1).

18.12. December 9, 2008 – Effective January 30, 2009

Statutory Authority

These amendments to these rules are proposed for adoption by the Commissioner of the Colorado Department of Agriculture (“CDA”) pursuant to his authority under the Pesticide Applicators' Act (the “Act”), §§ 35-10-118(2)(b), C.R.S.

Purpose

The purpose of these proposed rules is to:

Amend Rule 15.02 to clarify that any applicator technician may use a restricted use pesticide under the on-site supervision of a qualified supervisor and mix and load a restricted use pesticide under the supervision of a qualified supervisor.

Factual and Policy Issues

The factual and policy issues encountered when developing these rules include:

The Office of Legislative Legal Services review of the Department's recently adopted new Rule 15.02(i), which went into effect on October 1, 2008, determined that the Rule was more restrictive with respect to the supervisory requirements for the mixing and loading of a restricted use pesticide by a technician than the Act itself. The new proposed Rule 15.02(i) eliminates this conflict by distinguishing the mixing and loading of a restricted use pesticide from its actual application.

18.13. October 21, 2010 – Effective November 30, 2010

Statutory Authority

These amendments to these rules are proposed for adoption by the Commissioner of the Colorado Department of Agriculture (“CDA”) pursuant to his authority under the Pesticide Applicators' Act (the “Act”), §§ 35-10-118(2)(a) & (b), C.R.S.

Purpose

The purpose of these proposed rules is to amend conflicting language between the Rule and statute in regards to sales technicians. All other proposed Rule amendments add clarification to the current interpretation, enforcement and intent of the existing Rules. Specifically:

1) Part 1.02 (f) is amended to add the definition of “pasture”.

2) Part 5.2 is amended to allow sales of a restricted use pesticide “under the supervision” of a qualified supervisor once all required training has been met, in accordance with statute.

3) Part 8.01, agricultural licensure classifications, are being amended to add additional examples of the types of applications allowed in each licensure category.

4) Part 12.06, ornamental notification, is being amended to more clearly explain pesticide sensitive person notification requirements.

5) A new 15.04 is being created to clearly state that a pesticide applicator must hold the appropriate category of licensure to use or supervise the use of a restricted use pesticide.

Factual and Policy Issues

The factual and policy issues encountered when developing these rules include:

1. The CDA has found that the current licensure category descriptions do not provide a clear explanation of similar geographic areas. To help distinguish between Rangeland and Agricultural pasture areas, a new Part 1.2(f) is being created to add the definition of "pasture" is to help clarify the difference between agricultural applications vs. rangeland applications in Part 8.

2. The current language in Rule Part 5.2, that outlines technician training requirements and the allowed activities of a sales technician, conflicts with the statutory definition of a technician in § 35-10-103(15)(a)(III), C.R.S. The amendment will match the Rule with the statutory definition to allow sales of a restricted use pesticide "under the supervision" of a qualified supervisor once all required training has been met.

3. Agricultural licensure classifications are explained in Part 8.01 of the Rules. The CDA has found that the current licensure category descriptions do not provide a clear explanation of similar geographic areas, therefore making it difficult for an applicator to know what licensure category they must hold. Part 8.01 (f), (g) and (i), which are the Forest Pest Control, Rangeland Pest Control and Industrial and Right-of-Way Pest Control licensure categories have similar geographic and landscape features, but are inherently different based on the site of application and the types of applications occurring in each area. Part 8.01 (f), (g) and (i) are being amended to add additional examples of the types of geographic or landscape features found in each of these categories to provide additional guidance to pesticide applicators on what category they must carry to perform applications in these areas.

4. § 35-10-112(1)(c)(I), C.R.S. and Part 12.06, ornamental notification, currently state that a pesticide sensitive person must be notified of "any" turf or ornamental application occurring to an abutting property. Each separate application, in accordance with § 35-10-111, C.R.S., record-keeping requirements, requires a separate record be kept for each separate application. In situations where two abutting properties are being treated on the same day, the CDA has interpreted that the notification requirement that "any" application would require the applicator to inform the pesticide sensitive person of each separate application taking place. Part 12.06, ornamental notification, is amended to more clearly state that a pesticide applicator must notify the pesticide sensitive person of each and every location where pesticide applications are being made and in a manner that the pesticide sensitive person can identify which abutting property is being treated to take the necessary precautions to avoid adverse effects to themselves or their property.

5. The PAA requires all persons who want to obtain a qualified supervisor, certified operator or private pesticide applicator license to pass an examination and license in the pesticide application category in which they intend to make RUP applications. The PAA also requires that a business must have a qualified supervisor in its employment in the pesticide category(s) it intends to make commercial applications in. The intent in the business and applicator licensure requirements is that the applicator be restricted to use pesticides intended for and perform commercial activities only in the licensure category(s) held. A new Part 15.04 is being created to clearly state that a pesticide applicator must hold the appropriate category of licensure to use or supervise the use of a restricted use pesticide. This amendment will clearly state this rather than having to reference multiple areas of the PAA.

18.14. June 11, 2013 – Effective July 30, 2013

Statutory Authority

These amendments to these rules are proposed for adoption by the Commissioner of the Colorado Department of Agriculture ("CDA") pursuant to his authority under the Pesticide Applicators' Act (the "Act"), §§ 35-10-118(2)(a) & (b), and (9.5) C.R.S.

Purpose

The purpose of these proposed Rules is to clarify the Rule in regards to solicitations made prior to entering into a contract, create a new Rule to require that a record of active Endangered Species Bulletins be maintained and add a new Rule defining devices that produce a pesticide; which when used for hire require a commercial pesticide applicator license. All other proposed Rule amendments add clarification to the current interpretation, enforcement and intent of the existing Rules. Specifically:

1. Parts 2.15 and 2.16 are amended to clarify when solicitations to subcontract incidental pesticide applications can be made by a business that is not acting as and is not licensed as a commercial applicator.

2. Part 2.60 creates a new Rule defining the Private Applicator category and license purpose.

3. Part 6.03(k) creates a new Rule to require commercial applicators to maintain a record of any active Endangered Species Bulletin.

4. Part 7.05 is amended to clarify what labeling must be in the applicator's possession when applications are being performed and exempt Endangered Species Bulletins from this requirement.

5. Parts 8, 9 and 10 are amended to add the numeric category reference to each pesticide licensure category.

6. Parts 8.01(f),(g) and (h) and Part 10.01 (b) are amended to clarify which pests may be treated under these categories.

7. Part 10.02 is amended to correctly state the licensure category.

8. Part 15.05 creates a new Rule requiring that devices that produce a pesticide, such as carbon monoxide, that when used for hire to control a pest requires a commercial applicator license.

Factual and Policy Issues

The factual and policy issues encountered when developing these rules include:

1. Part 2.15 allows a business that does not apply pesticides for hire to enter into a contract that incidentally requires the application of pesticides as long as there is a written provision in the contract expressly stating that the business will subcontract the application to a licensed applicator. Part 2.16 similarly allows a business that applies pesticides for hire and is licensed as a commercial applicator to subcontract applications that require a qualified supervisor licensed in a category not held by the business's own qualified supervisors, to subcontract the work if the contract expressly discloses that plan. Absent such statements, the Department would consider such contracts to constitute violations of the statutory provision, § 35-10-117(1)(c), C.R.S., which makes it a violation of the Act to present oneself to be qualified to perform or to solicit pesticide related services without a "valid commercial license." The Department realizes that in order to enter into such contracts, businesses must necessarily engage in some form of a solicitation – i.e., they must make an offer to their potential customers, whether oral or written. These amendments to Parts 2.15 and 2.16 clarify that a business proposing to enter into a contract with such a subcontracting provision must also disclose that they will subcontract pesticide applications that require licensure beyond what they hold at the time of the solicitation.

2. Part 2.60 is being created as a result of amendments being made to Parts 8, 9 and 10, to add the numeric categories for all pesticide licensure categories. When creating the language to classify a Private Applicator license as Category 401, the Department felt that stating the purpose of this licensure category would more clearly define what the license may be used for and match the category classification definitions in Parts 8, 9 and 10 of the Rules.

3. Part 6.03(i) creates a new Rule to require commercial applicators to maintain a record of any active Endangered Species Bulletin.

   The Environmental Protection Agency in recent years has added Endangered Species (ES) specific language to certain pesticide labels that require pesticide applicators to obtain and abide by the Endangered Species Protection Bulletin. The requirements in an ES Bulletin are enforceable because compliance is mandated by the label. Therefore, applicators must follow all requirements on the ES Bulletin and failure to do so would be a label violation under both the Federal Insecticide, Rodenticide and Fungicide Act (FIFRA) and the PAA. In addition, as a condition of the EPA enforcement grant CDA is required to verify compliance with all elements of the label. EPA also has specified in our grant that the CDA must determine applicator compliance with the Endangered Species Act by verifying that applicators are referencing the ES Bulletins when required. In 2012 Colorado's first ES Bulletins for Rozol Prairie Dog Bait came into existence and ES Bulletin language is showing up on labels regularly now. The best way for CDA to verify that an applicator has referenced the ES Bulletin and followed all use restrictions for the pesticide, county and month the application was made is to require that the applicator maintain a copy of any active Bulletin that pertains to applications they have made in their records. A record of the Bulletin will only be required to be maintained when there is an active Bulletin for the product, county and month in which the application took place.

4. The intent of Part 7.05 is to require an applicator to have the original or a copy of the original pesticide label and any additional labeling directions in the possession of the applicator at the time of an application so all use directions are available at the job site. Currently Part 7.05 states, "...a copy of the pesticide label and any attached labeling for each product in use shall be in the possession of the commercial…applicator..." The word "attached" no longer represents how labels and labeling may be accessed with new technologies. Labels and labeling are now more likely to be downloaded from the registrant's or EPA's website and maintained electronically. Some products do not have labeling physically "attached" to a product. Therefore, the Department feels that changing the word "attached" to the word "associated" would clearly state the requirement of Part 7.05, which is to have copies of the pesticide label and all of its associated labeling. The word "copies" does not designate or restrict the form or manner in which the label copy must be in the applicator's possession.

   The definition of "labeling" found in the Pesticide Act in relation to the Endangered Species (ES) Bulletins excludes "current official publications" of the EPA. ES Bulletins are publications of EPA that are not created and distributed with the pesticide label. CDA is proposing to add a clarifying statement that, for the purposes of Part 7.05, ES Bulletins are not required to be in the possession of the applicator at the time of the application, since an ES Bulletin is not "labeling". It should be noted, however, that any requirements in an ES Bulletin are enforceable because compliance is mandated the label. Therefore, applicators must still follow all requirements on the ES Bulletin just as any other requirement on the label and failure to do so would be a violation of the PAA. CDA felt clarification is needed in Part 7.05 so applicators understand that although they must have a copy of the label in their possession at the time of application, they are not required to have the ES Bulletin in their possession. CDA is proposing to amend Part 7.05 to clearly state the ES Bulletin is not required to be in the applicator's possession at the time of an application.

5. Parts 8, 9 and 10 are amended to add the numeric category reference to each pesticide licensure category. CDA routinely refers to pesticide applicator licensure categories with a numeric reference in publications, enforcement documents, license documents, examination documents, etc.; i.e.: Category 101, Agricultural Insect Control. CDA is proposing that all licensure category

descriptions in Parts 8, 9 and 10 be amended to reflect the appropriate numeric category reference number to ensure Department publications, administrative documents and enforcement documents legally coincide.

6. Recently the question was brought to the Department's attention, asking if rodents can be treated in rangeland areas with the Rangeland Pest Control Category vs. the Outdoor Vertebrate Control Category. The licensure category description in the Rangeland category is a very broad, stating that this category is for the "application of pesticides to rangeland". Arguably this language would allow the applications of any pesticide, including those applied to rodents in Rangeland areas. However, the Outdoor Vertebrate licensure category clearly states that the Outdoor Vertebrate Pest Control category must be held to apply pesticides to control outdoor vertebrate pests, regardless of the site they inhabit; adding to the confusion.

   The original intent of the Rangeland category was for the application of pesticides to rangeland areas for pests other than rodents, i.e.: weeds, insects, etc. The Outdoor vertebrate category was intended to apply pesticides for the control of vertebrate pests, regardless of the site they may be found (i.e.: water, rangeland, structures, pasture, right-of-way, etc.). During our review, we found this broad statement not only in the Rangeland category but also in the Forestry and Aquatic categories, making the licensure requirements confusing unless the applicator reads the Outdoor Vertebrate licensure category with these other definitions. Even then, it is not clear if the Outdoor Vertebrate Pest Control license would be needed.

   The other licensure categories do have specific descriptions as to what that licensure category does and does not allow. For example:

8.01 (a) Agricultural Insect Control: the application of pesticides to agricultural plants, including applications performed on pastures, croplands and non-crop agricultural lands, to control invertebrate pests, including insects, mites, slugs, snails, and nematodes.

8.01 (j) Public Health Pest Control: the application of pesticides for control of disease vectors, except vertebrates.

9.01 (a) Turf Pest Control: the application of pesticides to: (1) turf to control invertebrate pests, including insects, mites, slugs, snails, and nematodes, or to control plant diseases or weeds; or (2) ornamental beds to control weeds.

   The CDA is proposing that the Rangeland Pest Control and Forest Pest Control category definitions be amended to clearly state that these categories allow the application of pesticides to be applied to control pests "except vertebrates", as similarly stated in the Public Health Pest Control Category.

   During our discussion with the Pesticide Advisory Committee it was pointed out that amphibian and fish pest control is currently under the Outdoor Vertebrate Control category. It was recommended that the Department allow these vertebrate pests to be treated under the Aquatic Pest Control license, since the pesticide applications are being made directly to water. The Department agreed with this reasoning and therefore is proposing to clarify the licensure requirements for controlling vertebrate pests in and out of water in the Part 8.01(h), Aquatic Pest Control and Part 10.01(b), Outdoor Vertebrate Pest Control.

7. CDA recently identified a discrepancy in Part 10.02, which outlines the structural pest control experience requirements for licensure as a qualified supervisor. The current language incorrectly references the Residential/Commercial Pest Control licensure category, found in Rule 10.01 (d), as "household pest control". The Department believes this was an oversight in the terminology when the Rule was originally enacted, since nowhere in the PAA is "household pest control" referenced as a license category. CDA proposes to amend Part 10.02 to remove the reference to

"household pest control" and correctly state the licensure category referenced in Part 10.01(d), Residential/Commercial Pest Control.

8. In FY 2012 it was brought to the attention of the Department that a licensed commercial applicator wanted to use a device, called the Pressurized Exhaust Rodent Control (PERC), to convert gasoline to carbon dioxide (and other gases) and then pump carbon monoxide into a building void (in a strip mall) to treat bird mites and other pests associated with a bird infestation. The PERC is a device intended to only control rodents; it generates carbon monoxide with an attached engine, pressurizes it into a large tank, and the gas is then pumped into rodent burrows. The directions prohibit use on structures and recommend the applicator maintain a 150 ft. buffer from structures.

   Under 35-10-118 (9.5) - Powers and duties of the Commissioner, adopted as a result of the 2006 Sunset review, it states:

   The Commissioner shall designate by rule which devices, when operated for hire, require the operator to be licensed as a commercial applicator. Licensure shall be required only for the use of those devices that, as determined by the Commissioner, may constitute a significant risk to public health or safety.

   Since the CDA does not currently have any devices in Rule designated to require licensure, the CDA has no regulatory authority over individuals using these devices. Therefore, the CDA cannot require licensure when using these devices for hire or take any enforcement action on a commercial applicator when the device is used incorrectly, even when it would cause a risk to the public's health or safety.

   The CDA is proposing the creation of a new Rule 15.05 that requires licensure for the use of any device that generates/produces a pesticide as defined in the Pesticide Applicators' Act § 35-10-103(10), C.R.S., to help ensure public safety, by requiring applicators have the proper training and licensing to use any device for hire that produces a pesticide. In addition, Rule 15.05 requires the applicator to use the device in accordance with the manufacturer's directions.

18.15. February 12, 2014 – Effective March 30, 2014

Statutory Authority

These amendments to these Rules are proposed for adoption by the Commissioner of the Colorado Department of Agriculture ("CDA") pursuant to his authority under the Pesticide Applicators' Act (the "Act"), §§ 35-10-118(2)(a) & (b), and (9.5), C.R.S.

Purpose

The purpose of these proposed Rules is to clarify the procedures that must be used when operating a device that produces a pesticide, specifically carbon monoxide; which when used for hire requires a Commercial Applicator license. Specifically:

1) Part 1.02 is amended to add the definition of a device that is regulated under this article.

2) Parts 6.01 and 6.03 are amended to reference record keeping requirements for the use of a device that generates a pesticide in Part 15.07 of these Rules.

3) Parts 10.04 and 10.05 are amended to include devices in the post application notification requirements.

4) Part 15.05 is amended and creates new Rules clarifying the pest and sites of application allowed with a device that generates a pesticide.

5) Parts 15.06 (a) and (b) create new Rules that outline the procedures and requirements a Commercial Applicator must follow when making applications within specified distances from occupied structures.

6) Part 15.07 creates a new Rule specifying the records Commercial Applicators that use devices that generate a pesticide must maintain.

Factual and Policy Issues

The factual and policy issues encountered when developing these Rules include:

1) In FY 2012 it was brought to the attention of the Department that a licensed Commercial Applicator wanted to use a device, called the Pressurized Exhaust Rodent Control (PERC), to convert gasoline to carbon monoxide (and other gases) and then pump carbon monoxide into a building void (in a strip mall) to treat bird mites and other pests associated with a bird infestation. The PERC is a device intended to only control rodents; it generates carbon monoxide with an attached engine, pressurizes it into a large tank, and the gas is then pumped into rodent burrows. The directions prohibit use on structures and recommend the applicator maintain a 150 ft. buffer from structures.

   Section 35-10-118 (9.5), C.R.S., powers and duties of the commissioner, adopted as a result of the 2006 Sunset review, states:

   The commissioner shall designate by rule which devices, when operated for hire, require the operator to be licensed as a commercial applicator. Licensure shall be required only for the use of those devices that, as determined by the commissioner, may constitute a significant risk to public health or safety.

   The CDA passed a new Rule on July 30, 2013, to require licensure for any person that uses any device that generates/produces a pesticide as defined in the Pesticide Applicators' Act § 35-10-103(10), C.R.S., to help ensure public safety by requiring applicators to have the proper training and licensing to use any device for hire that produces a pesticide. This rule also requires commercial applicators to follow label directions for such devices.

2) After the Rule hearing it was brought to the attention of the Department that current device directions may restrict applications around and up to a structure, impacting a Commercial Applicator's business negatively.

3) After the Rule hearing it was brought to the attention of the Department that these devices could be built by an individual and no "directions" would be associated with these devices used for hire, therefore there would be no way to ensure the device would be used in a manner that would not create an unsafe situation for the public.

4) In the normal registration process of a pesticide the Environmental Protection Agency (EPA) assesses the risk of using a pesticide and directs registrants on what labeling use directions or restrictions are needed. EPA only requires manufacturers of devices to register their device with EPA and they register an EPA establishment number. With respect to devices, EPA does not review their efficacy or risk created by their use. Neither does it review or require directions for use to be submitted to or approved by them. Therefore, to ensure public safety, this requirement fell on the Department and necessitated the development of these Rules.

5) The Department obtained input from USDA and the Colorado Department of Public Health and Environment (CDPHE) when creating this Rule. CDPHE generated modeling data showing the potential amount of carbon monoxide that could leak into a structure. This data showed that in

certain circumstances carbon monoxide levels could rise to deadly levels within minutes and create a situation where adverse impacts to health and safety were possible, including death.

6) Part 1.02 (m) was created to define devices for which licensure is required and link their definition to “pesticides”. This allowed all PAA licensure and business requirements for the use of a pesticide for hire to be extended to devices being used for hire where applicable.

7) Parts 6.01 and 6.03 were amended to clarify that recordkeeping requirements pertaining to the use of a device that requires licensure are outlined in Part 15.07 of the Rule.

8) Parts 10.04 and 10.05 were amended to address customer notification requirements for the use of devices that require licensure. The Rule now requires licensees using a device requiring licensure to meet similar notification requirements to the customer as for other pesticide applications, including providing the date and time of application and any precautionary statements from the device directions.

9) Part 15.05 was amended to clarify that it is a violation to use a device that generates a pesticide in a manner inconsistent with these Rules. It requires that these devices may only be used for burrowing rodent control and that the Commissioner may approve other uses if the Commissioner can determine that such use will not pose a risk to the public health or safety.

10) Part 15.06 was created to allow device applications up to the foundation of occupied structures. Part 15.06 (a) specifies the distances within which additional precautions must be taken. The additional precautions outlined in 15.06(b) are intended to ensure that occupants of structures will not be exposed to carbon monoxide in situations where carbon monoxide accidentally leaks into a structure. The precautions include evacuating the structure and require the applicator to “clear” the structure with a carbon monoxide monitoring device prior to allowing any occupants back into the structure. Part 15.06(b) also requires information be provided to the customer on carbon monoxide poisoning symptoms and directions to evacuate and seek medical attention, should they have symptoms following the application.

11) Part 15.07 was created to require recordkeeping of device applications. These recordkeeping requirements will allow the Department to investigate the proper use of a device in the case of a complaint and to ensure applicators are complying with the application precautions and requirements outlined in Part 15.06.

18.16. Adopted November 10, 2015 – Effective December 30, 2015.

Statutory Authority

These amendments to these Rules are proposed for adoption by the Commissioner of the Colorado Department of Agriculture (“CDA”) pursuant to his authority under the Pesticide Applicators' Act (the “Act”), §§ 35-10-109(2) and 35-10-118(2), C.R.S.

Purpose

The purpose of these proposed Rules is to adopt new Rules to: (1) meet the requirements of training specified in SB 15-119; (2) re-define commercial business locations; (3) create a new Post Harvest Potato Pest Control licensure category; (4) allow for electronic notification of pesticide applications and; (5) make necessary conforming language changes. Specifically:

(1) Rule 1.02 is amended to add the definition of a “ready to use pesticide”.

(2) Rule 5 is amended to fix a typographical error from previous Rules.

(3) Rule 5.02 is amended to clarify that the technician training required in Rule 5.02 does not apply to non-registered limited commercial applicator and non-registered public applicators.

(4) Rule 10.01 is amended to create a new Post Harvest Potato Pest Control category and provides for the award of the category for existing licensees holding the Stored Commodities Treatment category and for licensure and renewal requirements after January 1, 2016.

(5) Parts 8, 9 and 10 are amended to allow for electronic notification of pesticide applications.

(6) Part 11 is amended to correctly state new terminology regarding “safety data sheets”.

(7) Update address of the Department.

(8) Create a new Part 16 to address training requirements as a result of SB 15-119 for non-registered limited commercial applicators and non-registered public applicators. This Part outlines what training is required for the use of certain general use pesticides, when training is required, how training can be met and recordkeeping requirements.

(9) These amendments incorporate changes as a result of the Department’s Regulatory Efficiency Review Process.

Factual and Policy Issues

The factual and policy issues encountered when developing these Rules include:

(1) The current Stored Commodities Treatment category focuses on the fumigation and treatment of raw grains in storage facilities; such as silos and grain bins. It was brought to the Department’s attention that post-harvest potato treatments, which have been conducted under the current Stored Commodities category since the 90’s, are significantly different in the equipment required and knowledge needed to conduct these specialized pesticide applications. The Department verified this and in the course of considering this licensure category found several other states that have significant potato agricultural industries have a specific post-harvest potato treatment licensure category. Since the Department’s current Stored Commodities Treatment category does not adequately address post-harvest potato treatments and due to the complexity and knowledge needed to perform these applications, the Department is proposing this new licensure category. The study guide and exam was done in cooperation with post-harvest potato treatment applicators.

(2) The proposed Rule 10.01 (h) will provide for licensees with the current Stored Commodities treatment category to be awarded the Post-Harvest Potato Treatment category, because under the Stored Commodities category they were already allowed to perform these applications prior to the creation of this new licensure category, and outlines the time frames when examination, continuing education and renewal are required.

(3) The Department was approached by industry to consider a Rule change to allow required notices of pesticide applications outlined in Rules 8.03, 9.04 and 10.06 to be provided electronically to their customers. As technology has evolved more commercial applicator customers request that these notices of pesticide applications be sent via electronic means, rather than posting a written paper notification on a door that they may never enter. The proposed Rules in 8.03, 9.04 and 10.06 provide a means for commercial applicators to confirm and maintain a record that their customer has requested an electronic notice and clarifies the circumstances when an electronic notice can and cannot be used in place of written notification.

(4) Rule 10.07 is a new Rule addressing notification in multi-unit structures when common areas have been treated, which had previously not clearly required posting. The Department added this

additional clarification due to on-going complaints that structural applications made to common areas are not adequately communicated to persons living in the structure who must pass through these areas to gain entry to their unit.

(5) As a result of SB 15-119, a new Part 16 has been created to address the new training requirements for any owner or designee of a non-registered limited commercial applicator and any employee of a non-registered public applicator making applications with a general use pesticide. During the Department's discussions with the Department of Regulatory Agencies, this recommendation was made to address concerns expressed during the Pesticide Applicator Act Sunset review by those that felt that a higher level of training should be required for non-registered limited commercial and non-registered public applicators that make similar pesticide applications as those made by commercial applicators and who are held to a higher standard of training and knowledge. Additional training for individuals making pesticide applications in areas that are considered "sensitive sites", such as schools and health care facilities, were a concern as well. The Department took into consideration comments received from industry and during the legislative session that antimicrobial pesticides, i.e.: cleaning products, or those that were packaged in a ready to use containers that do not require mixing or loading of the pesticide into separate containers and limit the user to smaller quantities that limit potential exposures to the end user or public were beyond the scope of pesticide use that should require this additional training.

(6) The Department is proposing the following new Rules to address SB 15-119. Rule 1.02(i) provides the definition of a "ready to use" pesticide. Rule 16.01 outlines the scope of whom this Rule applies to. Rule 16.02 clarifies what general use pesticides require training to use. Rule 16.03 clarifies what general use pesticides do and do not require training. Rule 16.04 outlines what core pesticide safety training subjects must be covered and the manner in which the training may be met. Rule 16.05 clarifies how often the training must be conducted and Rule 16.06 outlines how long records of the training must be maintained.

(7) The Rules are being amended to address typographical errors, make conforming language changes and update verbiage to current regulatory references.

18.17. Adopted February 10, 2016-Effective March 30, 2016

Statutory Authority

Amendments to these Rules are proposed for adoption by the Commissioner of the Colorado Department of Agriculture ("CDA") pursuant to his authority under the Pesticide Applicators' Act ("PAA") Sections 35-10-118(2), 35-10-117(1)(i) and 35-10-117(2)(a), C.R.S.

Purpose

The purpose of these Rules is to establish the criteria for determining which pesticides may be used in the cultivation of cannabis to prevent unsafe use. They also change the recordkeeping period for Private Applicators. Specifically these Rules:

(1) Create a new Part 17 which specifically addresses the use of pesticides in the production of cannabis;

(2) Create a new Rule 17.01 which establishes definitions specific to "cannabis", "human consumption", and "tolerances";

(3) Create a new Rule 17.02 which provides that the Department will publish the list of pesticides that meet the criteria for use on cannabis;

(4) Create a new Rule 17.03 which provides that all pesticides used in the cultivation of cannabis must be registered with the Department;

(5) Create a new Rule 17.04 which establishes the criteria for determining which pesticides may be legally used in the cultivation of cannabis in accordance with Sections 35-10-117(1)(i) and (2)(a), C.R.S., which prohibits the use of pesticides in an unsafe manner;

(6) Create a new Rule 17.05 which allows the Commissioner to prohibit the use of any pesticide product on cannabis if he determines that such use may pose a significant threat to public health and safety or the environment, even though it otherwise satisfies the criteria for use on cannabis in Rule 17.04; and

(7) Update Rule 6.05 to match the two year private applicator recordkeeping requirement in the PAA.

Factual Policy and Issues

The factual policy and issues encountered when developing these Rules include:

(1) The use of pesticides in Colorado is regulated under the Pesticide Applicators' Act, Sections 35-10-101 – 128, C.R.S. Pesticide regulation is based on the labeling of the pesticide product, the language of which is enforceable under the PAA. Because cannabis is not a specifically listed crop on any label currently registered with the Department, products with broad label statements that do not prohibit use on cannabis are currently the only ones that may be used legally on cannabis in Colorado.

(2) These Rules and criteria are being established to allow the use of certain pesticides in the cultivation of cannabis based on the available science and information the Department can confirm at this time. Without these Rules and the criteria they set out, the use of a pesticide that has not had a tolerance established for use on edibles (food), or the use of a pesticide that is not intended to be consumed through inhalation by smoking, could be allowed on cannabis by a broadly worded label, even though such use would be "unsafe" under Sections 35-10-117(1)(i) and (2)(a, C.R.S.

(3) Both the PAA and the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA) require that all pesticides be applied in strict accordance with the label directions for the particular product. As part of the directions for use, pesticide labels specify the particular crops and/or sites to which they can be applied. Depending on the particular pesticide, the crops/sites listed on the label can be expressed very specifically (e.g., "wheat"), or more generally (e.g., "grain crops"). While a pesticide with a label that specifies "wheat" can only be applied to wheat, a pesticide that lists "grain crops" on the label can be applied to wheat, barley, oats, rye, etc. In determining which pesticides, if any, may be used legally on cannabis, CDA initially consulted with the U.S. Environmental Protection Agency (EPA) as to whether there might be any general crop groups, such as herbs, spices or vegetable gardens, into which cannabis might fit (note: there are no registered pesticides that specifically list cannabis as a crop on the label). The current position of EPA is that cannabis is not an herb, a spice or a vegetable. However, EPA agrees that, depending on actual label language, it is not a violation of a pesticide label under the PAA or FIFRA to use the product on cannabis if it has certain, very generally worded descriptions of crops/sites on the label, and the product's active ingredient is exempted from the requirement of a tolerance.

(4) Tolerances are established by EPA in accordance with the Federal Food and Drug Cosmetic Act, U.S.C. Title 21, Section 408. A tolerance is the maximum amount of the active ingredient of a pesticide product that is allowed to remain in or on a food crop as

residue after application of the product. Pesticide products that have significant toxicity, which could pose a hazard to public health if threshold amounts are exceeded when consumed and could result in acute or chronic poisoning, are required to have tolerances established by EPA. Tolerances for a given active ingredient typically vary depending on the specific food crop to which it is applied. EPA sets tolerances by determining that there is a reasonable certainty that no harm will result from aggregate exposure to the pesticide chemical residues at the tolerance levels established, including all anticipated dietary exposures. Exemptions from tolerances are established under 40 CFR, Part 180, Subpart D: 180.900: "… An exemption from a tolerance shall be granted when it appears that the total quantity of the pesticide chemical in or on all raw agricultural commodities for which it is useful under conditions of use currently prevailing or proposed will involve no hazard to the public health."

(5) Section 3 of FIFRA provides EPA the authority and 40 C.F.R., Parts 150-167, outline the requirements to register a pesticide with EPA. Pesticide labeling is derived through EPA's risk assessments required to be conducted as a condition of registration that determine the manner and rates of application in which a pesticide may be used on a site or a crop without resulting in adverse impacts to public health or the environment. To date no risk assessments have been conducted specifically for pesticide use on marijuana.

(6) Risk assessments have been conducted to determine what pesticide active ingredients are tolerance exempt. EPA has determined that for those active ingredients determined to be tolerance exempt, "…the total quantity of the pesticide chemical in or on all raw agricultural commodities…will involve no hazard to the public health."

(7) EPA requires that a pyrolysis study be conducted during the risk assessment process for products intended to be smoked such as tobacco, unless EPA has exempted the pesticide from pyrolysis studies due to the nature of the pesticide.

(8) The Colorado Food and Drug Act (CFDA) provides the Colorado Department of Public Health and Environment (CDPHE) with authority over cannabis contaminated with pesticide residues ("adulterated" under the CFDA) that is very similar to the authority used by the Food and Drug Administration to deal with pesticide contamination of all other agricultural crops. The CFDA gives CDPHE specific authority over "unsafe" "pesticide chemicals" in "raw agricultural commodities," the definition of which is broad enough to include cannabis which is grown, harvested and then processed and sold for consumption through various means, including ingestion as a component of food (in edibles).

Under the CFDA, "food" is defined to mean "articles used for food or drink for man or other animals…and articles used for components of any such article." C.R.S. § 25-5-402(11). "Food" includes any "raw agricultural commodity," which is "any food in its raw or natural state…." C.R.S. § 25-5-402(21). Cannabis, which is grown and used as a component in many forms of edible food products, thus qualifies as a raw agricultural commodity under the CFDA. Although not all cannabis is used in edibles ("food" under the CFDA) cannabis can be used for any purpose after harvest, including food use, thus warranting treatment of all cannabis crops as a food for pesticide regulation purposes. Under Section 25-5-410(1)(b)(II) of the CFDA, "a raw agricultural commodity" is "deemed to be adulterated" if "it bears or contains a pesticide chemical which is unsafe within the meaning of Section 25-4-413(1)" unless the concentration of the residue is less than the tolerance set for the commodity or is tolerance exempt as provided for in Section 25-5-413(1). Section 25-5-413(1) in turn states that, "[a]ny pesticide chemical in or on a raw agricultural commodity…shall be deemed unsafe for the purpose of application of Section 25-5-401(1)(b)" unless there is a tolerance established for that crop and the residue level is within that tolerance. Thus unless a pesticide found on a cannabis crop has a tolerance for use on cannabis or is tolerance exempt, its presence in any amount on cannabis

constitutes adulteration that renders the cannabis unsafe for human consumption under the CFDA as a matter of law. These Rules reflect and follow the General Assembly's determination in the CFDA that consumption of food containing pesticides without a tolerance or exemption is unsafe. The Rules thus prohibit the application of such pesticides to cannabis as similarly unsafe as under the PAA in order to prevent adulteration from pesticides as addressed in the CFDA from occurring.

This approach for regulating pesticide use in order to prevent contamination of cannabis is the same as EPA and CDA apply to any other multipurpose-purpose agricultural commodity that can be used in food after harvest. It reflects the fact that neither EPA nor CDA have any way of knowing or controlling what a grower of such crop chooses to do with the crop once harvested. For example, under EPA's registration system, any pesticide labeled for use on cotton, which once harvested can be used for both fiber and food (in the form of cotton oil), must have a tolerance established and be labeled for food use even though the particular cotton crop to which it is applied in the field may not ultimately be used as food.

(9) Depending on how it is processed and sold after harvest, cannabis may be consumed through inhalation (smoking), ingestion (eating) and through dermal exposures (creams and lotions applied topically). Due to the lack of specific risk assessments or tolerances for use of any pesticides specifically on cannabis CDA, in accordance with the CFDA, has determined that it is unsafe to apply any pesticide to cannabis that requires a tolerance for applications to raw commodities or that is not approved for use on tobacco.

The heightened safety concern created by the multiple ways in which cannabis is consumed was highlighted recently by the marijuana industry's widespread use of a product called Eagle 20 which contains the active ingredient myclobutanil. In a May 2015 lawsuit against the City of Denver and CDA challenging the City's hold orders preventing the sale of marijuana on which myclobutanil was found, a marijuana grower argued that myclobutanil was safe to ingest and smoke. Because no risk assessments had been conducted specifically for the use of myclobutanil on marijuana and no tolerances for such use were established, the City and CDA argued that it was unsafe to use myclobutanil on marijuana. Although the judge ruled in the City's and CDA's favor and sustained the hold orders, based on the scientific information available at that time and presented to the court, the judge stated in his ruling that, "The evidence at the hearing strongly suggests that myclobutanil is likely safe for use on marijuana and that the levels of myclobutanil found on the Plaintiff's marijuana would not constitute a health threat to those who ingest it, either through eating or smoking".

Only a month later, in June 2015, Frank Conrad, the Lab Director of Colorado Green Lab, confirmed the City's and CDA's concerns when he analyzed the known chemical and physical properties of myclobutanil and reported in his paper, "Eagle 20 and Myclobutanil in the Context of Cannabis Cultivation and Consumption," that when heated above 205 degrees Celsius (cigarette lighters burn at 450 degrees Celsius) myclobutanil forms hydrogen cyanide (HCN). Conrad's paper points out that HCN is known to cause serious neurological, respiratory, cardiovascular, and thyroid problems and that cannabis retaining even marginal amounts of myclobutanil (ex. 0.03 ppm) could potentially expose consumers to non-lethal, but clinically relevant levels of HCN. This illustrates the potential danger of using a pesticide on cannabis that does not meet the criteria established in these Rules, including tolerance exemption of all active ingredients and EPA approval of use on tobacco (which is consumed through inhalation).

(10) CDA has identified certain pesticide products whose use on cannabis would not constitute a violation of the label due to the very general use statements on the label. In addition, because the active ingredient(s) of these pesticide products are exempt from a tolerance requirement they in most cases provide for use on crops that may be

consumed. However, broad labeling and a tolerance exemption for food use does not necessarily mean the active ingredient was tested or approved for use on products to be smoked, such as tobacco. Since cannabis may also be consumed by smoking, any pesticide product allowed for use on cannabis must also have active ingredients that are approved for use on tobacco to ensure EPA has considered use on commodities intended to be smoked in their risk assessment.

(11) CDA is proposing that the only pesticides allowed for use on cannabis be those registered with CDA in accordance with Title 35, Article 9, C.R.S. This will prevent the application of "home-made" pesticide concoctions containing active ingredients that may be unknown and could pose a serious health risk to the applicator and end user if consumed. This will also ensure that any pesticide product applied to cannabis has had a risk assessment conducted to determine allowed uses.

(12) These Rules set forth the specific criteria, which if met, will prevent the use of pesticides for the cultivation of cannabis in an unsafe manner that would violate Sections 35-10-117(1)(i) and (2)(a) C.R.S.. Section 3 registered pesticide products may be used on cannabis if:

(a) The active ingredients have been determined to be tolerance exempt from the requirements of a tolerance, as established under 40 C.F.R. Part 180, Subparts D and E. EPA has established in the risk assessment process that these products are of lowest toxicity and therefore do not require tolerances to be established for use on raw commodities.

(b) The label has broad language that allows the use of the pesticide on the site of application. The term "site" includes all sites of application, including interior, exterior sites, structures in which application may be made, as well as the actual plant or crop.

(c) The pesticide product label expressly allows use on crops intended for human consumption. This is intended to prevent the use of pesticides on cannabis that although broadly labeled, are not tested or intended for use on food crops.

(d) The pesticide's active ingredients must be allowed by EPA for use on tobacco. Pesticide products may contain active ingredients that have had risk assessments conducted for consumption in food, but those active ingredients may not have been tested or intended to be burned and inhaled. Requiring that all active ingredients in pesticides used on cannabis have EPA-allowed uses on tobacco, will ensure that EPA has considered this in their risk assessment process.

(e) Some pesticide products may meet all of the required criteria except being expressly labeled for food use due to marketing toward other markets. Nevertheless, if CDA can verify with the manufacturer that the product's master label allows food uses and that all of the active and inert ingredients are allowed for use on food crops and tobacco, CDA through this Rule will have the authority to allow the product's use on cannabis.

(13) Under the authority of Section 24(c) of FIFRA, states may register an additional use of a federally registered pesticide product, or a new end use product, to meet special local needs. EPA reviews these registrations, and may disapprove the state registration if, among other things, the use is not covered by necessary tolerances, or the use has been previously denied, disapproved, suspended or canceled by the Administrator, or voluntarily canceled subsequent to a notice concerning health or environmental concerns.

These Rules will allow the use of pesticide products on cannabis that have gone through the 24(c) registration process. The 24(c) process will require additional data submission specifically to address use on cannabis, including residue studies and considerations for extracts as well as submission of specific use instructions for use on cannabis. EPA will review this information and deny the registration if it does not support the use.

(14) EPA has determined that certain “minimum risk pesticides,” commonly referred to as “25(b) pesticides,” pose little to no risk to human health or the environment. EPA has exempted them from the requirement that they be registered under FIFRA. These products must still be registered with CDA and meet minimum FIFRA standards for labeling requirements and claims.

There may be some 25(b) products that the manufacturer did not intend to allow end users to consume. The Rule will only allow the use of 25(b) minimum risk pesticide products on cannabis if the pesticide labeling allows use on crops or plants intended for human consumption.

(15) The Rules will allow the Commissioner to prohibit the use of any pesticide that he determines could pose a threat to public health and safety or the environment, even if it otherwise meets the Rules’ criteria. Pesticide use on cannabis is a newly regulated area of agriculture and new information is coming to light daily. This will give CDA the means to stop the use of any previously approved pesticide when new information or science establishes that such use would be unsafe.

(16) Applying the criteria in the Rules to the more than 12,000 pesticides currently registered with the State of Colorado, CDA has determined that there are less than two hundred pesticides that can be legally used in the cultivation of cannabis. In order to inform cannabis growers which pesticides are available to them, CDA has created a list of pesticides that can be legally used. This list will be published on CDA’s website and updated as needed.

(17) As a result of SB15-119 the Private Applicator recordkeeping requirement was changed from three years to two years, to match the federal recordkeeping requirement. This change to Rule 6.05 will make the Rule consistent with the PAA.

18.18. Adopted September 20, 2017- Effective November 30, 2017

Statutory Authority

The amendments to these Rules are proposed for adoption by the Commissioner of the Colorado Department of Agriculture (“CDA”) pursuant to his authority under the Pesticide Applicators' Act (the “Act”), §§ 35-10-118(2)(a) and (b), C.R.S.

Purpose

The purpose of these Rules is to add a new Post Harvest Potato Pest Control category; amend the criteria for determining which pesticides may be used in the cultivation of Cannabis to allow for the use of unregistered pesticides during research and demonstration activities only; to update commercial applicator storage signage requirements; and to make conforming changes to clarify existing Rules. Specifically, these Rules:

1. Correct typographical errors and references.

2. Amend Rules 5.25, 5.26, 5.27, 5.28 and 10.03 to add the new Post Harvest Potato Pest Control category.

3. Amend 8.01(g) to make the “turf” reference consistent throughout this Part 8.

4. Amend Rule 11.05 to provide a more flexible manner in which commercial applicators must post signs notifying employees, first responders, and other parties of the presence of pesticides in pesticide storage areas.

5. Amend Rule 17.03 to allow the use of unregistered pesticides in the cultivation of Cannabis for research and demonstration purposes only.

Factual and Policy Issues

1. Clarify which part of Rule 5.01 outlines the required training and experience to meet the qualifications of a New Hire Experienced Technician.

2. On December 30, 2015, a new licensure category, the Post-Harvest Potato Pest Control category (i.e., Category 308), was created. Prior to the creation of this licensure category, post-harvest potato pest control pesticide applications were performed under the Stored Commodities Treatment category (i.e., Category 305). Rules 5.25, 5.26, 5.27, 5.28 and 10.03 outline the technician training requirements and experience required to obtain a Qualified Supervisor’s license in the Stored Commodities Treatment category. To address the technician training and licensure experience requirements for the Post-Harvest Potato Pest Control category, the Department proposes to update Rules 5.25, 5.26, 5.27, 5.28 and 10.03 to add the Post-Harvest Potato Pest Control category so that the training and experience requirements are the same for this category as for its parent category.

3. The Turf Pest Control category and the Ornamental Pest Control category fall under the broad definition of “ornamental” applications. The Rangeland Pest Control category defines sites of applications for this licensure category and requirements that applicators who make applications in a forested area that is within fifty feet of a residence or commercial structure also comply with the posting and notification requirements in the Turf Pest Control category. Rule 8.01(g) currently references the Turf Pest Control requirement and uses the general “ornamental” term. To clarify the rule requirement, the Department proposes to reference the Turf Pest Control category throughout.

4. Rule 11.05 sets forth that warning signs are required for pesticide storage areas or entrances thereto. The current Rule has specific verbiage which pesticide storage signs must meet. When this Rule was originally created, applicators could purchase signs with this exact verbiage. However, pesticide storage signs currently available for sale no longer contain the required language in the PAA. Because the Rule states that pesticide storage signs “shall” be marked with the specific verbiage used in the Rule, companies must now create their own pesticide storage signs to be in compliance with the Rule. The Department wants to amend Rule 11.05 to permit the use of other types of standardized pesticide storage signage, while maintaining the emergency contact information requirement and storage marking provisions already contained in the Rule, as well as requiring that any applicator who obtains a waiver of this sign requirement from a local fire department maintain a copy of that waiver in the applicator’s files for Department review.

5. On March 30, 2016, the Department passed Rules that outlined the criteria for which pesticides may be applied in the cultivation of Cannabis. Specifically, Rule 17.03 limited the use of pesticides in the cultivation of Cannabis to registered pesticides only. In May 2017, HB 1367 was passed to allow marijuana cultivators and other persons to conduct research and demonstration activities related to pesticide use on marijuana. Research and demonstration activities are for the purpose of developing data on currently unregistered pesticides or pesticides that are not registered for a specific use. The Department proposes to amend Rule 17.03 to allow the use of unregistered pesticides in the cultivation of Cannabis for research and demonstration purposes in accordance with the intent of HB 1367 and 40 CFR Part 172.

18.19. Adopted February 22, 2018 – Effective April 15, 2018

The amendments to these Rules are proposed for adoption by the Commissioner of the Colorado Department of Agriculture ("CDA") pursuant to his authority under the Pesticide Applicators' Act (the "Act"), §§ 35-10-118(2)(a) and (b), C.R.S.

Purpose

The purpose of these Rules is to incorporate federal statutory provisions by reference pursuant to § 24-4-103(12.5)(a), C.R.S. Specifically, these Rules:

1. Amend the title to Part 1 of the Rule to include "Incorporations by Reference."

2. Amend Part 1 by adding a new Rule 1.03 to address the incorporation by reference provisions.

3. Amend Rules 2.28, 6.05, 11.08, 17.03, 17.04(a)(1), 17.04(b)(1), and 17.04(d) by updating the references to the Code of Federal Regulations ("C.F.R.") to include the date of the effective edition and by removing repetitive incorporation statements.

Factual and Policy Issues

The factual and policy issues encountered when developing these Rules include:

1. On September 20, 2017, the Commissioner of Agriculture adopted Rules to allow Research and Demonstration uses of unregistered pesticides for the cultivation of Cannabis. In this Rule the Department referenced the C.F.R.

2. On November 6, 2017, the Department was notified by the Office of Legislative Legal Services that the Department's C.F.R. references incorporated into Rule did not comply with the requirements of § 24-4-103(12.5)(a), C.R.S.

3. The proposed Rule changes amend the title of Part 1 to add "Incorporations by Reference" and add a new Rule 1.03 to meet required provisions to incorporate by reference set forth in § 24-4-103 (12.5)(a), C.R.S.

4. Rules 2.28, 6.05, 11.08, 17.03, 17.04(a)(1), 17.04(b)(1), and 17.04(d) are amended to update the C.F.R. edition date to meet required provisions of incorporation by reference as set forth in § 24-4-103 (12.5)(a), C.R.S.

5. Rule 11.08 was amended to remove the existing incorporation language that is now redundant to Rule 1.03.

18.20. Adopted November 15, 2019 – Effective December 30, 2019

Statutory Authority

These amendments to these rules are proposed for adoption by the Commissioner of the Colorado Department of Agriculture ("CDA") pursuant to her authority under the Pesticide Applicators' Act ("Act"), specifically §§ 35-10-118(2)(b).

Purpose

The purpose of these proposed amendments is to:

Amend Part 1 and Part 10 of the Rules Pertaining to the Administration and Enforcement of the Pesticide Applicators' Act (the "Rule") to address new landlord and tenant bed bug reporting requirements created by House Bill 19-1328.

Factual and Policy Issues

The factual and policy issues encountered when developing these rules include:

1. Pursuant to section 35-10-118(2)(b), C.R.S., the commissioner is authorized to adopt all reasonable rules for the administration and enforcement of this article, including, but not limited to: the establishment of qualifications for any applicant and standards of practice for any of the licenses authorized under this article.

2. During the 2019 legislative session, the Colorado General Assembly adopted HB 19-1328, effective January 1, 2020. HB 19-1328 amended Title 38, Article 12, Tenants and Landlords, concerning bed bugs in residential premises and established a requirement for commercial pesticide applicators to notify landlords and tenants of bed bug activity and provide remediation instructions.

3. Notification provisions created in HB 19-1328 expressly state that notification and reporting will be in accordance with rules established by the commissioner pursuant to Title 35, Article 10.

4. Part 1, Definitions; of the Rules associated with the Act is amended to add definitions established in HB 19-1328 to include "Contiguous Dwelling Unit," "Dwelling Unit," "Landlord," and "Tenant" to ensure clarity in the new rules established in Part 10.

5. Part 10, Structural Applicators; of the Rules associated with the Act is amended to add new Parts 10.08(a) and (b) to establish what bed bug activity must be reported to the landlord and what remediation recommendations must be provided to the tenant.

6. A new Part 10.08(c) is created to require that the structural applicator who makes the report to a landlord retain a record of the report for three years.

18.21. Adopted December 8, 2021 – Effective January 30, 2022

Statutory Authority

The amendments to these Rules are proposed for adoption by the Commissioner of the Colorado Department of Agriculture ("Department") pursuant to the Commissioner's authority under the Pesticide Applicators' Act (the "Act"), §§ 35-10-118(2)(a), (b), (c), (d), (3)(a), (4), (5) and (9) C.R.S.

Purpose

The purpose of these Rules is to incorporate new federal certification and training requirements pursuant to 40 C.F.R. Part 171 and to clarify existing Rule requirements. Specifically, the revisions to the Rules:

1. Update Part 1.02(j) to reflect that Article 36 of Title 12, C.R.S., was renumbered in 2019 and now exists at Article 240;

2. Amend Part 1.03 to incorporate by reference additional provisions from the Code of Federal Regulations;

3. Repeal Parts 2.05.5 and 2.38 consistent with Senate Bill 21-077 (Remove Lawful Presence Verification Credentialing);

4. Amend Parts 2.09 and 2.11 to clarify how applicants provide insurance information to the Department;

5. Create Parts 2.12(c) and (d) and 2.30(c) and (d) to clarify the meaning of adequate supervision by qualified supervisors;

6. Amend Part 2.34 and 2.50 to clarify qualified supervisor/certified operator and private applicator application requirements, respectively, including information on the age and date of birth of the applicant;

7. Amend Part 2.40 to clarify that qualified supervisors may only provide supervision in the licensure category or categories that he or she holds;

8. Amend Part 3.01 to adopt certification standards that meet or exceed federal standards for commercial and private applicators;

9. Amend Parts 4.01, 4.02, 4.04, 4.07 and 4.09 to clarify and update the process for submission of continuing education courses to the Department in a manner that meets federal recertification requirements in 40 C.F.R. § 171.107(b)(2)(iii);

10. Amend Parts 4.05 and 4.10 to clarify the requirements for approval or denial of continuing education courses;

11. Amend Part 5.02(h) to clarify that all training records must be recorded on forms provided by the Department and that those forms must be completed in full in order for a commercial, registered limited commercial, or registered public applicator to comply with the Department's Rules;

12. Create Part 5.02(k) to comport certification and training requirements for technicians with new federal requirements at 40 C.F.R. § 171.201(d);

13. Create Part 5.02(l) requiring licensed or registered applicators to obtain training records for certain new technicians when those new technicians are hired and to maintain those records consistent with the Rules;

14. Create Part 5.02(m) establishing record retention and record sharing requirements, as well as identifying the records to which those requirements apply;

15. Amend Part 6.03(j) to include the license number as information that must be included on application records;

16. Create Part 7.01(a) to define the term "company business name" as that term appears in Parts 7.01(b) and (c);

17. Create Parts 8.03(f) and 9.04(e) to cross-reference notification and signage requirements appearing in Parts 12 and 13 of the Rules;

18. Amend Part 9.01(a) to clarify sites of application allowed under Category 206, Turf Pest Control;

19. Update Part 13.01 to cross-reference statutory requirements for notification at § 35-10-112(c), C.R.S.;

20. Update Part 13.02 to clarify that signage height requirements do not apply to notices required to be placed in a golf course clubhouses;

21. Update Part 13.04 to clarify notice requirements for gold course clubhouses;

22. Create Part 15.02(c) to adopt private applicator supervision standards that meet or exceed federal standards;

23. Amend Part 17.03 to clarify when existing stocks of certain pesticide products may be used after the product becomes unregistered;

24. Amend Part 17.04 to clarify that no person may use pesticide products on Cannabis if those pesticide products do not meet the conditions specified in Rule; and

25. Correct non-substantive typographical, formatting, and grammatical errors throughout the Rules.

Factual and Policy Issues

The factual and policy issues encountered when developing these Rules include:

1. Article 36 of Title 12, C.R.S., was renumbered in 2019 and now exists at Article 240. Part 1.02(j) was updated to reflect the correct statutory provision

2. When an agency incorporates material by reference in its Rules, it must comply with § 24-4-103(12.5)(a), C.R.S. Various edits to these Rules reflect those requirements.

3. On May 27, 2021, Governor Jared Polis signed Senate Bill 21-077 into law. SB21-077 repealed requirements at § 24-34-107, C.R.S., that required individuals applying for licenses with the Department to provide evidence of lawful presence in the United States. As a result, the Department is repealing Parts 2.05.5 and 2.38 concerning the requirement to establish lawful presence as a condition of licensure.

4. Parts 2.09 and 2.11 concern requirements that applicants for licensure provide proof of insurance on a form provided by the Commissioner. However, over the past decade, insurance providers have expressed concern over the language in the Department's form. This causes delay in processing applications. The Department is aware that the information it requests is often covered by industry forms, such as the ACORD form. Therefore, the Department is revising Parts 2.09 and 2.11 to provide flexibility to applicants and to allow the Department to accept standard forms, including the ACORD form, issued by insurance carriers.

5. Part 2.12 of the Rules, concerning adequate supervision of technicians by a qualified supervisor, was last reviewed in 2008. Since then, the pesticide applicator industry has evolved, such that a qualified supervisor is often employed by more than one commercial applicator business. This has caused confusion in the industry concerning the number of technicians that can be supervised by one qualified supervisor, especially when that qualified supervisor is linked to multiple commercial applicator businesses. The new Parts 2.12(c) and (d) clarify and confirm that a qualified supervisor may supervise one or more technicians employed by multiple commercial applicator businesses, so long as the aggregate number of technicians supervised never exceeds 15 at any one time.

6. On January 4, 2017, the U.S. Environmental Protection Agency published revised certification standards for pesticide applicators (82 Fed. Reg. 952), which standards became effective on March 6, 2017. To comply with these new federal standards, the Department must promulgate and revise its rules pertaining to certification and training of pesticide applicators consistent with the revised State Certification Plan submitted to EPA on March 6, 2020. Therefore, the Department is revising Parts 2.34 and 2.50 of the Rules to reflect requirements in 40 C.F.R. §§ 171.103(a)(1) and 171.105(g), specifically adopting a minimum age requirement for commercial and private applicator certification of at least 18 years old.

7. Over the past few years, there has been some confusion surrounding the types of activity that a qualified supervisor may supervise. Therefore, the Department is revising Part 2.40 to make clear that a qualified supervisor is only responsible for (and can only provide) supervision in the specific categories of licensure that he or she holds.

8. As described above, EPA revised its federal standards for the certification and training of licensed pesticide applicators in 2017. States must adopt certification standards that meet or exceed these federal standards. Therefore, the Department is amending Part 3.01 to require compliance with federal certification standards set forth in 40 C.F.R. §§ 171.103 and 105 for commercial and private applicators.

9. Colorado must also meet federal continuing education requirements at 40 C.F.R. §§ 171.107(b)(2)(i) – (iii) when approving, verifying the content of, and confirming an applicator's attendance at continuing education courses (each a "CEC"). EPA updated these requirements in 2017, and the Department is updating Parts 4.02, 4.04, 4.05, 4.07, 4.09, and 4.10 accordingly. The Department is also providing clarification on the timing and process for a course sponsor to seek approval for CECs. Specifically:

    a. Revisions to Parts 4.02(b) and 4.07(b) clarify that requests for approval must be submitted on a form provided by the Commissioner;

    b. Revisions to Parts 4.02(c) and 4.07(c) increase the number of days required to submit CECs to the Department for approval, allowing the Department sufficient time to review and respond to the increasing number and complexity of CEC approval requests that it receives;

    c. Revisions to Part 4.02(d) and 4.07(d) provide clarity on what information must be provided to the Department to ensure that the content and quality of each proposed session complies with the Rules;

    d. A new Part 4.02(e) and Part 4.07(e) confirm the session length(s) required to comply with the Rules;

    e. A new Part 4.02(f) and Part 4.07(f) require that, subject to space availability, all courses must be open to all Colorado licensees. These revisions codify long-standing Department policy intended to ensure equitable CEC opportunities for all Colorado licensees. These revisions promote access to and availability of CEC courses to persons who must attend such courses in order to maintain and/or renew their respective licensure or registration status.;

    f. Revisions to Part 4.04 and Part 4.09 describe the method by which a course sponsor must provide attendance confirmation to each attendee and the manner in which course sponsors verify course attendance for each attendee with the Commissioner; and

    g. Revisions to Part 4.05 and 4.10 clarify when the Department may deny a CEC request.

10. As described above, EPA updated its standards in 2017 for training of applicators and for documenting that training, requiring that commercial applicators maintain, provide upon request, and verify training documentation for noncertified applicators and their qualifications. As such, consistent with 40 C.F.R. §§ 171.201(d) and 171.303(b)(7)(vi), the Department is adding the following Parts to the Rules:

    a. Part 5.02(h) to require that training be documented on a form provided by the Commissioner;

b. Part 5.02(k), which requires that all noncertified applicator training meets all provisions set forth in 40 C.F.R. § 171.201(d), which specifies subject matter that must be covered;

c. Part 5.02(l), which requires that an employer must obtain training records for a new hire experienced technician to ensure that the new hire experienced technician has met all of the training requirements established in the Rules; and

d. Part 5.02(m), which defines the records that make up a technician's training record, sets training record retention periods, and establishes a requirement that records be made available to the technician or the Commissioner upon request.

11. EPA also establishes recordkeeping requirements for commercial, registered limited commercial, and registered public applicators. In 2017, EPA updated the relevant standards at 40 C.F.R. § 171.303(b)(7)(vi)(I). Therefore, the Department is updating Part 6.03(j) accordingly, now requiring that commercial applicators record the name and certification number of those making or supervising pesticide applications.

12. Recently, the Department learned that commercial applicators and private applicators interpreted the term "company business name" in multiple ways when complying with Part 7.01 (Equipment Identification), sometimes including names or visual representations on equipment that differed from the name provided to the Department originally. Because the term "company business name" is not defined in Part 7.01, ambiguity exists with respect to whether the vehicle identification must be the company's legal name, a trade name, a company logo, etc. Therefore, the Department is adding Part 7.01(a) to define the term "company business name" to include any name or trade name or trademark registered with the Colorado Secretary of State, any doing business as name as submitted in the licensee's application, and any company logo that clearly communicates the licensee's business name.

13. The Department's Rules include requirements for notifying persons of pesticide applications in Part 12 and for posting specific signage with information on the pesticide application in Part 13. Because notification requirements are also referenced in Articles 8 and 9, and to ensure that the other notification and signage requirements in Rule are not overlooked, the Department is adding Parts 8.03(f) and 9.04(e) to cross-reference notification and signage requirements in Parts 12 and 13.

14. In 2010, the Department revised Part 8.01(i) concerning Category 109 to specify permitted sites of application within the Industrial and Right-of-Way Weed Control category. These sites included sidewalks, trails, paths, parking lots, and certain paved areas. This created confusion in the regulated community concerning whether Category 109 also covered areas that were abutted by or surrounded by turf because turf is covered under Category 206. Therefore, the Department is revising Part 9.01(a), Turf Pest Control, to provide additional clarity on what sites of application are allowed under Category 206 as compared with Category 109. Specifically, the Department is expanding Category 206 to allow application on certain managed turf, ornamental beds, xeriscaped areas, and sidewalks, driveways, etc. not located in a zoned right-of-way (which would fall under Category 109).

15. Part 13, Notification of Pesticide Applications, outlines specific flagging requirements for turf and ornamental applications. To provide additional clarification, the Department is proposing an amendment to Part 13.01 to add a reference to notification flags specified in statute.

16. Part 13, Notification of Pesticide Applications, outlines specific flagging requirements for turf and ornamental applications. Part 13.02 generally describes the required height of signs, but separate requirements exist for golf course clubhouses. To address this confusion, the Department is amending Part 13.02 to clarify that the height requirements do not apply when posting in golf course clubhouses and amending Part 13.04 to clarify signs posted at golf course clubhouses

must be placed in a manner that is conspicuous and easily legible to those entering treated areas.

17. In 2017, EPA revised its requirements at 40 C.F.R. §§ 171.201(2)(iii)(A)(B) and (C) related to the supervision of restricted use pesticide applications made by private applicators who are 16 years of age. Accordingly, the Department has created Part 15.02(c) to identify under what circumstances a 16-year-old unlicensed technician may apply a restricted-use pesticide. The Department uses the term "unlicensed technician" to refer to "non-certified technicians" or "non-certified applicators," these latter two terms reflecting the terminology used by EPA in the Code of Federal Regulations. The Department uses these three terms interchangeably in these Rules.

18. On March 30, 2016, the Department adopted Rules to outline the criteria for which pesticides were allowed for use in Cannabis cultivation. Part 17.03 requires that only registered pesticides be allowed for use in the cultivation of cannabis. However, Part 17.03 does not account for existing stocks policies at the state and federal level that allow for the limited use of existing stocks after a product becomes unregistered (absent a finding that the product poses a significant threat to public health and safety or the environment, in which case existing stocks cannot be used). Therefore, the Department is amending Part 17.03 to allow for the use during the subsequent registration year of an unregistered pesticide product that appeared on the Department's list of pesticides allowed for use on Cannabis at the time of purchase, but was not re-registered with the Department for the subsequent registration year. This change will allow end users to use any remaining unregistered pesticide product, but only during the registration year following the manufacturer's failure to renew the registration. This limited ability to use remaining stocks of an unregistered product does not extend to products that the Department has determined pose a significant threat to public health and safety or the environment.

19. The Department is also amending Part 17.04 to clarify that certain uses of pesticide products on cannabis are considered unlawful acts. Specifically, the Department is clarifying that it is unlawful for a person to use a registered pesticide in the production of cannabis when that product does not meet the criteria set forth in Rule – namely, the pesticide must met all requirements of Part 17.04(a)(1) – (4), Part 17.04(b)(1) – (3), Part 17.04(d), or Part 17.04(e).

18.22. Adopted November 8, 2023 – Effective December 30, 2023

Statutory Authority

The amendments to these Rules are proposed for adoption by the Commissioner of the Colorado Department of Agriculture ("Department") pursuant to the Commissioner's authority under the Pesticide Applicators' Act (the "Act"), §§ 35-10-112(1)(e) and (f), C.R.S., and §§ 35-10-118(2)(a) – (d), (3)(a) – (c), (4), (5) and (9), C.R.S.

Purpose

The purpose of these Rules is to incorporate new federal certification and training requirements pursuant to 40 C.F.R. Part 171, to update the Rules consistent with requirements in Senate Bill 23-192 ("SB23-192"), and to clarify existing Rule requirements. Specifically, the revisions to the Rules:

1. Amend Part 1.02(a) to use the same definition of "alley" as is found in § 42-1-102(3), C.R.S., and to align the meaning of "vehicle" with § 42-1-102(112), C.R.S.

2. Amend Part 1.02(o) to cross-reference the definition of "use" found in Title 35, Article 10, of the Colorado Revised Statutes.

3. Amend Part 1.03 to update materials incorporated by reference.

4. Amend Part 2.54 to match private applicator supervision and training requirements established in federal law.

5. Create a new Part 2.61(a) to establish and require licensure for private applicators in a new Aerial Pest Control licensure category as required by federal law.

6. Create a new Part 2.61(b) to establish and require licensure for private applicators in a new Soil / Non-Soil Fumigation Pest Control licensure category as required by federal law.

7. Amend Parts 4.11, 4.32, and 4.38 to add new continuing education subject matter requirements established in federal law.

8. Amend Part 5.02(c) and (k) to match and correctly refer to technician training and supervision requirements established in federal law.

9. Amend Part 8.01(d) to match language used in federal law.

10. Amend Part 8.01(j) and create a new Part 8.01(j)(1) to match the federal Public Health Pest Control category and to create a new "Government-Sponsored Public Health Pest Control" category.

11. Create a new Part 8.01(l) to establish and require licensure for commercial agricultural applicators in a new Aerial Pest Control licensure category as required by federal law.

12. Create a new 8.01(m) to establish and require licensure for commercial agricultural applicators in a new Soil / Non-Soil Fumigation Pest Control licensure category as required by federal law.

13. Amend Part 9.04(b) to clarify when and what notice of application must be provided for commercial properties or other sites managed or owned by an off-site organization or entity where an owner or agent of the site is not present at the time of application.

14. Amend Part 10.01(c) to align the Structural Fumigation licensure category with new federal requirements.

15. Amend Part 10.01(h) to remove language that is no longer applicable to the Post-Harvest Potato Pest Control licensure category.

16. Create a new 10.01(i) to establish and require licensure for commercial structural applicators in a new Soil / Non-Soil Fumigation Pest Control licensure category as required by federal law.

17. Amend Part 12.01 to clarify that the pesticide-sensitive registry application and medical justification must be for the person who will be listed on the registry.

18. Amend Part 12.02 to add addresses for principal place of employment, school, or both in accordance with new SB23-192 requirements and creates the definition of school this Part pertains to.

19. Amend Part 12.06 to clarify applicability and content of notice requirements for turf or ornamental pesticide applications for persons whose names appear on the pesticide-sensitive registry.

20. Amend Part 12.07 to clarify notice requirements for turf or ornamental pesticide applications and to include an electronic notification provision in accordance with SB23-192.

21. Create a new Part 12.08 to address other notice requirements in SB23-192 concerning turf or ornamental pesticide applications performed on a property that abuts or is entirely located within

two-hundred and fifty feet of a pesticide-sensitive person's listed principal residential address, provided the residential address appears in a database to be developed by the Department.

22. Amend Part 12.10 to clarify notice requirements for structural pesticide applications and to include an electronic notification provision for such applications.

23. Amend Part 15.02 to clarify supervision requirements established in federal law.

24. Correct non-substantive typographical, formatting, grammatical, and citation errors throughout the Rules.

Factual and Policy Issues

The factual and policy issues encountered when developing these Rules include:

1. The Department learned from stakeholders that the definition of "alley" in Part 1.02(a) is confusing in relation to abutting properties. The Department is updating the definition of "alley" to repeat the definition used in § 42-1-102(3), C.R.S., to clarify that an "alley" is not intended for through vehicular traffic by "vehicles" as that term is defined at § 42-1-102(112), C.R.S., and so would not include a bike path or trail.

2. In the 2023 legislative session, SB23-192 updated the definition of "use" (as in to "use" a pesticide) to meet the new federal definition of "use" established in 40 C.F.R. Part 171 in 2017. Part 1.02(o) now cross-references the new definition of "use" at § 35-10-103(18), C.R.S.

3. As a result of new federal certification and training requirements in 40 C.F.R. §§ 171.201(b) – (d), Part 2.54 is being amended to address new supervision requirements for private applicators that require "on-site" supervision for any use of a restricted use pesticide by an unlicensed individual, including specific training, qualifications, and use-specific conditions that must be met prior to the use of any restricted use pesticide by that unlicensed individual.

4. As a result of new federal certification requirements established in 40 C.F.R. Part 171 (2017), applicators must now hold, in addition to their primary licensure category, a new federal Aerial Pest Control category for any application(s) made aerially. A new Part 2.61(a) for private applicators and a new Part 8.01(l) for agricultural applicators has been created to establish the licensure category and the licensure requirement for aerial applications. The revisions provide for obtaining the new category by examination offered by the Department or other state lead agencies within the last 12 months, through reciprocal licensure, or through renewal of the category by obtaining continuing education credit.

5. As a result of new federal certification requirements established in 40 C.F.R. Part 171 (2017), applicators must now hold, in addition to their primary licensure category, a new federal Soil/Non-Soil Fumigation category for any application of a fumigant not made to a structure. A new Part 2.61(b) for private applicators, a new Part 8.01(m) for agricultural applicators, and a new 10.01(i) for structural applicators has been created to establish the licensure category and the licensure requirement for soil / non-soil fumigant applications. The revisions provide for obtaining the new category by examination offered by the Department within the last 12 months, through reciprocal licensure, or through renewal of the category by obtaining continuing education credit. Because soil and non-soil fumigation requirements change from state-to-state, the Department will not allow a person to obtain this licensure category by examination offered in another state.

6. The revised federal certification requirements also established additional core educational subject matter elements necessary for an applicator to obtain continuing education credit. Parts 4.11, 4.32, 4.38 have been amended to add these new elements.

7. The revised federal certification requirements now require that commercial applicator technicians must be fully trained prior to the use of an restricted use pesticide and that all supervision, training, qualification, and use-specific conditions at 40 C.F.R. §§ 171.201 must be met. Parts 5.02(c) and (k) have been amended to accurately reference these requirements.

8. Federal certification licensure categories were updated in 40 C.F.R. Part 171 (2017), and the language of Part 8.01(d) has been revised to match the federal Seed Treatment licensure category.

9. Federal certification licensure categories were updated in 40 C.F.R. Part 171 (2017). EPA updated the federal public health pest control category, requiring that the category address the use of restricted use pesticides in government-sponsored public health programs. Because this category no longer addresses general use pesticide applications for public health applications made for non-governmental persons or entities (which covers the majority of public health pest control applications in Colorado), the Department created a separate category for non-government commercial applicators who use pesticides for the management and control of pests having public health importance. The proposed amendment to Part 8.01(j) clarifies Colorado's existing public health category for the use of general use pesticides for non-governmental public health pest control applications and adds a new 8.01(j)(1), "Government Sponsored Public Health Pest Control", to meet the federal certification category.

10. The Department learned that Part 9.04(b) required clarification because the term "commercial" was not broad enough to cover the universe of applications contemplated in Part 9.04(b). The existing language had been specific to applications made to commercial properties, but it did not clearly address other sites that may not be considered "commercial" or zoned "commercial." Part 9.04(b) has been amended to address those sites, including greenbelts or open space areas managed by off-site organizations or entities where an owner of the site or an agent of an owner of the site is not present at the site.

11. As a result of new federal certification requirements established in 40 C.F.R. Part 171 (2017) concerning soil/non-soil fumigation pesticide applications, Colorado needed to differentiate its existing fumigation category from the new federal category. Therefore, the Department has amended Part 10.01(c) to specifically reference "Structural Fumigation"; define applicable structural sites of application; and ensure that applicators know that category 303, Structural Fumigation, must be held for the application of a fumigant when made to any structure, regardless of the pest being controlled or other licensure category(ies) held by the applicator.

12. Because Part 10.01(h) included language concerning the Post-Harvest Potato Pest Control licensure category that is now obsolete, the Department has removed that language.

13. Part 12.01 establishes the requirement for a pesticide-sensitive person to submit an application to be placed on the pesticide-sensitive registry. Part 12.01 is being amended to clarify that the application and medical justification submitted must be for the person intended to be listed on the registry.

14. As a result of SB23-192, pesticide-sensitive persons may list their principal place of employment, principal school address, or both as an address or addresses requiring notification of turf or ornamental applications made at those sites. Part 12.02 has been amended to account for this statutory change and adds the definition of schools this Part pertains to.

15. Part 12.06 specifies what notification information must be provided to a pesticide-sensitive person whose name is on the pesticide-sensitive registry and clarifies that such notice must be provided when a commercial applicator makes a turf or ornamental application to a property that abuts the pesticide-sensitive person's principal residential address and, if provided to the Department, to that person's principal place of employment, school, or both.

16. SB23-192 provided for the electronic notification of pesticide applications to pesticide-sensitive persons. To clarify underlying notice requirements, the Department has amended Parts 12.07(a) (concerning turf or ornamental applications) and 12.10(a) (concerning structural applications). To further clarify the circumstances and manner in which electronic notice is given to pesticide-sensitive persons whose names appear on the pesticide-sensitive registry, the Department has added Parts 12.07(b) and 12.10(b), which describe that only one attempt at electronic notification is required; a record of the attempt must be maintained in the applicator's records in order to avoid triggering non-electronic notification requirements; and any changes to the date, time, or location of application require an additional electronic notification to be made no less than 24 hours prior to the application.

17. SB23-192 required that, on or before July 1, 2024, the Department develop a searchable database of all properties that abut or are entirely located within two hundred and fifty feet of any residential address listed on the pesticide-sensitive registry. SB23-192 also required that, once that database was created, the Department adopt rules requiring that applicators provide notice of applications made to a property that is listed in the database as abutting, or being entirely located within two hundred and fifty feet of, the pesticide sensitive-person's listed residential address, which address must be the person's principal residential address in accordance with § 35-10-112(1)(c)(I)(A), C.R.S. A new Part 12.08 has been created to address these new requirements, effective July 1, 2024.I

18. As a result of new federal certification and training requirements in 40 C.F.R. Part 171 (2017), Part 15.02 is being amended to clarify new supervision requirements for private applicators and commercial applicators that now require "on-site" supervision for any use of a restricted use pesticide.

Subjects and issues involved

The purpose of this Permanent Rulemaking Hearing is for the Executive Director to consider adopting rules regarding Child Care Facility Licensing, to implement Colorado House Bill 22-1295. More specifically, the Executive Director will be considering rules regulating (General Licensing), Child Care Centers, Children's Resident Camps, School-Aged Child Care Programs, Special Activities, and Substitute Placement Agencies. These rules currently exist within the Colorado Department of Human Services, and are being transferred/re-adopted by the Colorado Department of Early Childhood. The proposed rule revisions include: new rule numbering; updates to departmental, statutory, and cross-rule references; and provide a general cleanup of the rule language to correct grammatical errors and add clarity.

Statutory authority

Sections 26.5-1-101, 26.5-1-105(1), 26.5-5-306(2), 26.5-5-311(1)(a), 26.5-5-313(4), 26.5-5-314(1) and (6), 26.5-5-316(1)(a)(I)(E), 26.5-5-316(1)(b)(II), 26.5-5-328(3)(b), and 24-4-103, C.R.S.

COLORADO DEPARTMENT OF EARLY CHILDHOOD~~HUMAN SERVICES~~

~~Social Services Rules~~Division of Early Learning, Licensing, and Administration

CHILD CARE FACILITY LICENSING RULES AND REGULATIONS

8~~12~~ CCR ~~2509-8~~1402-1

2.100 AUTHORITY

These rules and regulations are adopted pursuant to the rulemaking authority provided in section 26.5-1-105(1), C.R.S., and are intended to be consistent with the requirements of the State Administrative Procedures Act, sections 24-4-101 *et seq*. (the "APA"), C.R.S., the Anna Jo Garcia Haynes Early Childhood Act, sections 26.5-1-101 *et seq*. (the "Early Childhood Act"), C.R.S., the Child Care Licensing Act, sections 26.5-5-301, *et seq*., C.R.S.; and the Child Care Development and Block Grant Act of 2014, 42 U.S.C. sec. 9858e, and section 26.5-4-110(3), C.R.S.

2.101 SCOPE AND PURPOSE

These rules and regulations shall govern the processes and procedures to become a licensed child care facility, and the health and safety requirements of licensed child care facilities in Colorado. These rules will address the License Types, Application Process, Fees, Civil Penalties, Appeals And Waivers, Background Checks, Reporting requirements, Posting requirements, Confidentiality, Civil Rights, Fire, Health Inspection and Zoning Codes, and Emergency and Disaster Preparedness.

2.102 APPLICABILITY

The provisions of these rules and regulations shall be applicable to Family Child Care Homes 2.300, Child Care Facilities 2.200, School Age Child Care 2.500, Substitute Placement Agencies 2.800, Neighborhood Youth Organizations 2.700, and Children's Resident Camps 2.400, licensed and regulated by the Colorado Department of Early Childhood.

~~7.700 CHILD CARE FACILITY LICENSING~~

2.103~~7.701~~ GENERAL RULES FOR CHILD CARE FACILITIES

~~7.701.1 INTRODUCTION~~

~~All rules in Section 7.701, *et seq.*, shall be known and hereinafter referred to as the General Rules for Child Care Facilities and will apply to all child care applicants and licensees subject to the Child Care Licensing Act, Sections 26-6-101 to 26-6-119, C.R.S.~~

~~7.701.2~~2.104 DEFINITIONS

A. "Affiliate of a licensee," means any person or entity that owns more than five (5) percent of the ownership interest in the business operated by the licensee or the applicant for a license; or any person who is directly responsible for the care and welfare of children served; or any executive, officer, member of the governing board, or employee of a licensee; or a relative of a license, which relative provides care to children at the licensee's facility or is otherwise involved in the management or operations of the licensee's facility.

B. "Annually" means the time frame from the initial date of hire, training, licensing, or certification, and the following twelve months

C. "Calendar year" means the time frame from January 1 to December 31.

D. "Child abuse," and "child neglect" mean the same as in the definition of "child abuse or neglect" set forth in ~~s~~Section 19-1-103(1), C.R.S., unless otherwise indicated.

E. "Child Care Centers," are defined at section 26.5-5-303(3)~~26-6-102(5)~~, C.R.S.

~~Types of child care centers are further detailed at section 7.702, "Rules Regulating Child Care Centers".~~

~~A "school-age child care center" (referred to as the "center" in this subsection c1) means a child care center that provides care for five (5) or more children who are between five (5) years of age and up to the age of eighteen (18) years of age. Children 4 years of age, who will turn 5 on or before October 15th of the current calendar year may attend the center as part of a "building-based school-age child care program" or "building-based day camp" summer program prior to their kindergarten year. The center's purpose is to provide child care and/or an outdoor recreational experience using a natural environment. The center operates for more than one week during the year. The term includes facilities commonly known as "day camps", "summer camps", "summer playground programs", "before and after school programs", and "extended day programs." this includes centers operating with or without compensation for such care, and with or without stated educational purposes.~~

~~A "building-based school-age child care program" means a child care program that provides care for five (5) or more children who are between five (5) years of age and up to the age of eighteen (18) years of age. Four (4) year old children may attend a building based school age child care center the summer prior to attending kindergarten and the child's fifth (5th) birthday occurs on or before October 15th. The center is located in a building that is regularly used for the care of children.~~

~~A "mobile school-age child care program" provides care for five (5) or more children who are at least seven (7) years of age or have completed the first grade and up to the age of eighteen (18) years. Children move from one site to another by means of transportation provided by the governing body of the program. The program uses no permanent building on a regular basis for the care of children.~~

~~An "outdoor-based school-age child care program" provides care for five (5) or more children who are at least seven (7) years of age or have completed the first grade and up to the age of 18 years. This program uses no permanent building on a regular basis for the care of children. Children are cared for in a permanent outdoor or park setting.~~

~~"Child Placement Agency," is defined at section 26-6-102(7), C.R.S.~~

~~Child placement agencies are further detailed at section 7.710, "Rules and Regulations for Child Placement Agencies".~~

~~To arrange for placement is to act as an intermediary by assisting a parent or guardian or legal custodian to place or plan to place a child with persons unrelated to the child for 24-hour care.~~

~~Any agency from out-of-state placing a child within Colorado must be licensed as a child placement agency by the State Department unless the placement services are coordinated with and provided by a county department of social services, human services or a child placement agency licensed by the State Department.~~

~~"Children's Habilitation Residential Program (CHRP) Waiver provides services for children and youth, ages birth (0) through twenty (20) years of age, who have an intellectual or developmental disability and very high needs. Their needs for support put them at risk of, or in need of, out-of-home placement. Waiver services help children and youth learn and maintain the skills needed to live in their communities."~~

F. "Children's Residential Camp," is defined in section 26.5-5-303(5)~~26-6-102(8)~~, C.R.S.~~Types of children's resident camps are further detailed at section 7.711, "Rules Regulating Children's Resident Camps".~~

~~"Citizen/legal resident" means a citizen of the United States, current legal resident of the United States, or a person lawfully present in the United States.~~

G. "Consumer Product Safety Commission", as referred to in rules Regulating Child Care Facilities, means the National Commission that establishes standards for the safety of children's equipment and furnishings and for playground safety.

H. "Convicted" means a conviction by a jury or by a court and shall also include a deferred judgment and sentence agreement, a deferred prosecution agreement, a deferred adjudication agreement, an adjudication, and a plea of guilty or nolo contendere.

I. "Critical incident" is a serious incident or concern or potential incident or concern that poses a danger to a child or children at the facility or of a staff member at the facility.

~~"Cultural Responsiveness" means that an organization designs and implements services and practices that consider the unique culture of the individuals, families, and communities served.~~

~~"Day Treatment Center," is defined at section 26-6-102(10), C.R.S.~~

~~Day treatment centers are further detailed at section 7.706, 12 CCR 2509-8, "Rules Regulating Day Treatment Centers".~~

J. "Employee" or "applicant for employment," for the purpose of the child abuse or neglect records check required in rule section 2.117~~7.701.32~~, is defined as: an individual (other than an individual who is related to all children for whom child care services are provided):

1. Who is employed by a licensed or qualified exempt child care provider for compensation, including contract employees or self-employed individuals;

2. Whose activities involve the care or supervision of children for a licensed or qualified exempt child care provider or unsupervised access to children who are cared for or supervised by a licensed or qualified exempt child care provider; or

3. Any individual residing in a licensed or qualified exempt family child care home who is age 18 and older.

K. "Facility" is any business or operation established for the purpose of providing child care services that are required to be licensed pursuant to the Child Care Licensing Act, s~~S~~ection 26.5-5-301 ~~26-6-101~~ *et seq.*, C.R.S.

L. "Family Child Care Home," is defined at section 26.5-5-303(7)~~26-6-102(13)~~, C.R.S.~~ Types of family child care homes are further detailed at section 7.707, "Rules Regulating Family Child Care Homes".~~

M. "Final Agency Action" means the determination made by the State Department, after opportunity for hearing to deny, suspend, revoke, or demote to probationary status a license issued pursuant to the Child Care Licensing Act or an agreement between the State Department and the licensee concerning the demotion of such a license to a probationary license.

~~"Foster Care Home," is defined at section 26-6-106(14) C.R.S~~

~~Types of foster care homes are further detailed at section 7.708, "Rules Regulating Family Foster Care Homes".~~

N. "Governing Body" is the individual, partnership, corporation, or association in whom ultimate authority and legal responsibility are vested for the administration and operation of the child care facility.

O. "Health Department" is the Colorado Department of Public Health and Environment (CDPHE) or the local county department of health.

P. "Licensee" is the entity or individual to whom the license is issued and has the legal capacity to enter into agreements or contracts, assume obligations, incur and pay debts, sue and be sued in its own right, and to be held responsible for its actions. The licensee may be a governing body.

Q. "Licensing Specialist" is the authorized representative of the State Department who inspects and audits child care facilities to ensure compliance with licensing requirements and to investigate possible violations of those requirements.

R. "Negative licensing action" is defined in~~at~~ section 26.5-5-303(16)~~26-6-102(25)~~, C.R.S.**,** also known as adverse action, means a final agency action resulting in the denial of an application, the imposition of fines, or the suspension or revocation of a license issued pursuant to the Child Care Licensing Act or the demotion of such a license to a probationary license.

S. "Neighborhood Youth Organization," is defined in~~at~~ section 26.5-5-303(17)~~26-6-102(26)(a)~~, C.R.S. ~~Neighborhood youth organizations are further detailed at section 7.720, "Rules Regulating Neighborhood Youth Organizations".~~

T. "Relative" is defined at section 26.5-5-303(24)~~26-6-102(32)~~, C.R.S.

~~"Residential Child Care Facility" (RCCF) is defined at section 26-6-102(33), C.R.S.~~

~~Residential child care facilities are further detailed at section 7.705, "Rules Regulating Residential Child Care Facilities".~~

~~A "Transition Program" may be a component of an RCCF program in which the child is residing in the RCCF part of the time and in a living situation that the child is expected to move to after treatment in the RCCF is completed. The purpose of transition is to enable the child to transition to the home or a less restrictive setting in a manner that prepares the child for success in the new setting.~~

~~"Secure Residential Treatment Center," is defined at section 26-6-102(35), C.R.S.~~

~~Secure residential treatment centers are further detailed at section 7.713, "Minimum Rules and Regulations for Secure Residential Treatment Centers".~~

~~"Serious emotional disturbance" means a diagnosable mental, behavioral, or emotional disorder that is of sufficient duration and has resulted in a functional impairment that substantially interferes with or limits a child's role or functioning in family, school, or community activities. Serious emotional disturbances do not~~

~~include developmental disorders, substance-related disorders, or conditions or problems that may be a focus or clinical attention unless they occur with another diagnosable serious emotional disturbance.~~

~~"Specialized Group Facility," is defined at section 26-6-903(33), C.R.S. and includes "Specialized Group Homes" and "Specialized Group Centers".~~

~~Specialized group facilities are further detailed at section 7.709, "Rules Regulating Specialized Group Facilities".~~

~~SPECIALIZED GROUP FACILITY MAXIMUM CAPACITY~~

~~CHRP~~	~~NON-CHRP~~	~~TOTAL CHILDREN~~
~~0~~	~~11~~	~~11~~
~~1~~	~~7~~	~~8~~
~~2~~	~~6~~	~~8~~
~~3~~	~~5~~	~~8~~
~~4~~	~~4~~	~~8~~
~~5~~	~~3~~	~~8~~
~~6~~	~~2~~	~~8~~

~~Specialized Group Homes Or Group Centers who are serving children enrolled in the Children's Habilitation Residential Program (CHRP) waiver must be in compliance with rules contained within the Department Of Health Care Policy And Financing's Medical Assistance Manual at 10 CCR 2505-10 section 8.508 (2019), which is hereby incorporated by reference. No later additions or amendments incorporated. These regulations are available at~~ https://www.sos.state.co.us/CCR~~.~~

~~Specialized Group facilities that provide services for one or more children enrolled in the CHRP waiver must be staffed with a sufficient number of qualified staff members to ensure the needs of all children/youth residing in the facility are met. Ongoing assessments of the needs of all children/youth shall be conducted by the sponsoring agency during visits to the specialized group facility.~~

~~A Specialized Group Home is located in a house owned or otherwise controlled by the group home parents who are primarily responsible for the care of the children and reside at the home.~~

~~A Specialized Group Center is located in a facility owned or controlled by a governing body that hires the group center parents or personnel who are primarily responsible for the care of the children.~~

U. "State Department" is the Colorado Department of ~~Human Services~~Early Childhood.

V. "Trails" means the State Department's confidential information system which maintains abuse and neglect referrals, investigations, and the investigation outcomes.

APPLICATION PROCESS, LICENSE TYPES, AND LICENSING PROVISIONS~~"Trauma-Informed" means that the services or programs to be provided to or on behalf of the child/youth are provided under an organizational framework that involves understanding, recognizing, and responding to the effects of all types of trauma and in accordance with recognized principles of a trauma- informed approach and trauma-specific interventions to address trauma's consequences and facilitate healing.~~

~~7.701.3 APPLICATION PROCESS~~

~~7.701.31~~2.105 ORIGINAL APPLICATION

A. A completed original application accompanied by the appropriate fee ~~and proof of lawful presence in the United States (see section 3.140.11)~~ must be submitted to the State Department a minimum of sixty (60) days prior to the proposed opening date for the facility. ~~For 24-hour agencies or facilities, the addendum with specific requirements must be completed and submitted with the application.~~

B. A licensing evaluation will occur only after the State Department has received the complete application and appropriate fee.

~~C. If a county or agency establishes and plans to sponsor a Specialized Group Facility, the governing body for the Specialized Group Facility is the licensee. A written plan for the supervision of the Specialized Group Facility must accompany the application.~~

2.106~~7.701.35~~ CHANGES REQUIRING A NEW APPLICATION

A. A license is deemed surrendered and a new application is required in any of the following circumstances:

1~~A~~. Change of licensee, owner, or governing body;

2~~B~~. Change in classification of facility or service offered; or

3~~C~~. Change in location of the facility.

~~7.701.36 Types of Licenses~~

~~7.701.361~~2.107 PERMANENT LICENSE

A. A permanent license is granted when the State Department is satisfied that the facility or agency is in compliance with the appropriate Department rules and the Child Care Licensing Act. The permanent license remains in effect until surrendered or revoked.

B. Once a permanent license has been issued, the licensee must annually submit to the State Department a declaration of compliance with the applicable licensing rules and notice of continuing operation on the form prescribed by the State Department, along with the appropriate annual fee as set forth ~~at~~in rule section 2.110~~7.701.4~~.

C. Failure to submit the annual Continuation Notice and fee will constitute a consistent failure to maintain State Department standards and may result in fines or the revocation of the license.

~~7.701.362 TIME-LIMITED LICENSE~~

~~A. A time-limited license is granted for specific types of child care facilities or agencies when the State Department is satisfied that the facility or agency is in compliance with the appropriate State Department rules and the Child Care Licensing Act. The time-limited license will expire on a set date.~~

~~B. Once a time-limited license has been issued, the licensee must submit a renewal application and appropriate fee prior to the expiration of the time-limited license. This will keep the license in effect until a new time-limited license can be issued.~~

~~C. Failure to submit the renewal application prior to the expiration of the time-limited license will result in the expiration of the license and closure of the facility.~~

~~7.701.363~~2.108 PROVISIONAL LICENSE

A. A provisional license or certificate may be issued only for the initial six (6) month licensing period.

B. This license permits the facility to operate while it is temporarily unable to conform to all rules upon proof by the applicant that attempts are being made to comply with the rules.

C. If an applicant holds a valid provisional license at the time of application for a permanent license, the provisional license will remain in effect until the application is acted on by the State Department.

~~7.701.364~~2.109 PROBATIONARY LICENSE

A. The Department may make a probationary the license of any facility as provided in section 26.5-5-317(2)~~26-6-108(2)~~, C.R.S. making a license probationary is a negative licensing action as defined in section 26.5-5-303(16)(a)~~26-6-102(25)(A)~~, C.R.S.

B. If the applicant holds a valid probationary license and submits the renewal application and appropriate fee for a permanent license, the current license will remain in effect until the renewal application is acted on by the State Department.

~~7.701.365~~2.110 MULTIPLE LICENSES

A. If a licensee wishes to assume child care responsibility in more than one classification of care, separate applications, fees, and licensing evaluations are required for each classification. A family child care home ~~and a specialized group home~~ may only be licensed as one type of classification at any one location address.

B. If a licensee wishes to operate more than one facility of the same classification but at different locations, a separate application, fee, and evaluation are required for each location.

C. Operating multiple licenses of the same classification at a single location by the same licensee or governing body is prohibited.

~~7.701.4~~2.111 FEES

A. The appropriate application fee ~~outlined in 7.701.4.C~~, must be submitted to the State Department with the application for a child care, agency or neighborhood youth organization license at least sixty (60) calendar days prior to the anticipated opening date of the facility or the expiration date of the provisional or probationary license.

B. The appropriate annual continuation fee ~~outlined in 7.701. 4.C~~, must be submitted to the State Department annually, at least sixty (60) calendar days prior to the anniversary date of the license, along with a completed continuation declaration.

C. Following is a schedule of original and annual continuation fees for all types of child care facilities and agencies:

FAMILY CHILD CARE HOMES (1-6 CHILDREN)	
	JULY 1, 2020, and beyond*
Original Application	$65.00
Continuation	$65.00
(*One year from licensed anniversary date)	

LARGE FAMILY CHILD CARE HOMES (7-12 CHILDREN)	
	JULY 1, 2020, and beyond*
Original Application	$100.00
Continuation	$100.00
(*One year from licensed anniversary date)	

EXPERIENCED FAMILY CHILD CARE PROVIDER (UP TO 9 CHILDREN)	
	JULY 1, 2020, and beyond*
Original Application	$100.00
Continuation	$100.00
(*One year from licensed anniversary date)	

SMALL CHILD CARE CENTERS, PRESCHOOLS, SCHOOL-AGE CHILD CARE, CHILDREN'S RESIDENT CAMPS AND NEIGHBORHOOD YOUTH ORGANIZATIONS (5-15 CHILDREN)	
	JULY 1, 2020, and beyond*

Continuation	$200.00
(*One year from licensed anniversary date)	

LARGE CHILD CARE CENTERS, PRESCHOOLS, SCHOOL-AGE CHILD CARE, CHILDREN'S RESIDENT CAMPS AND NEIGHBORHOOD YOUTH ORGANIZATIONS (16-30 CHILDREN)	
Facilities in this category will pay a base fee + a per child in capacity fee not to exceed $1,800	
	JULY 1, 2020, and beyond*
Original Application	Base $175.00+ $3.00 Per Child
Continuation	Base $175.00+ $3.00 Per Child
(*One year from licensed anniversary date)	

LARGE CHILD CARE CENTERS, PRESCHOOLS, SCHOOL-AGE CHILD CARE, CHILDREN'S RESIDENT CAMPS AND NEIGHBORHOOD YOUTH ORGANIZATIONS (31 OR MORE CHILDREN)	
Facilities in this category will pay a base fee + a per child in capacity fee not to exceed $1,800	
	JULY 1, 2020, and beyond*
Original Application	Base $300.00 + $3.00 Per Child
Continuation	Base $300.00 + $3.00 Per Child
(*One year from licensed anniversary date)	

Day Treatment CENTERS			
	Beginning 2018*	Beginning 2019*	2020 and beyond*
Original Application	$500.00	$665.00	$884.00
Continuation 0-12 Students	$340.00	$438.00	$535.00
Continuation 13-25	$556.00	$716.00	$875.00
Continuation 26-50 Students	$770.00	$992.00	$1,216.00
Continuation 51 or more Students	$1,003.00	$1,291.00	$1,580.00
(*One year from licensed anniversary date)			

Specialized Group Facilities			
	Beginning 2018*	Beginning 2019*	2020 and beyond*
Original Application	$200.00	$266.00	$354.00
Continuation	$169.00	$217.00	$267.00
(*One year from licensed anniversary date)			

Child Placement Agency- Foster Care			
	Beginning 2018*	Beginning 2019*	2020 and beyond*
Original Application	$880.00	$1,133.00	$1,386.00
Continuation 0-5 Homes	$448.00	$577.00	$705.00
Continuation 6-15 Homes	$571.00	$732.00	$899.00
Continuation 16-30 Homes	$710.00	$914.00	$1,108.00
Continuation 31-50 Homes	$834.00	$1,074.00	$1,313.00
Continuation 51 or More Homes	$973.00	$1,253.00	$1,532.00
(*One year from licensed anniversary date)			

Child Placement Agency- Adoption			
	Beginning 2018*	Beginning 2019*	2020 and beyond*
Original Application	$672.00	$865.00	$1,059.00
Continuation 0-5 Finalized Adoptions	$340.00	$423.00	$513.00
Continuation 6-11 Finalized Adoptions	$379.00	$488.00	$597.00
Continuation 12-17 Finalized Adoptions	$401.00	$516.00	$632.00
Continuation 18-23 Finalized Adoptions	$448.00	$577.00	$705.00
Continuation 24 or More Finalized Adoptions	$463.00	$596.00	$730.00
(*One year from licensed anniversary date)			

A child placement agency licensed for both foster care and adoptions will pay only one fee, either the foster care fee or the adoption fee, whichever is greater. The annual report required by regulation 7.710.72, b, must be attached.

Homeless Youth Shelter			
-	Beginning 2018	Beginning 2019	2020 and beyond
Original Application	$500.00	$665.00	$884.00
Continuation	$463.00	$596.00	$729.00

Residential Childcare Facility			
-	Beginning 2018* ** ***	Beginning 2019* ** ***	2020 and beyond* ** ***
Original Application	$1,111.00	$1,430.00	$1,750.00
Continuation 0-12 Children/Youth	$340.00	$438.00	$535.00
Continuation 13-25 Children/Youth	$556.00	$716.00	$875.00
Continuation 26-50 Children/Youth	$770.00	$992.00	$1,216.00
Continuation 51-100 Children/Youth	$1,003.00	$1,291.00	$1,580.00
Continuation 101 or more Children/Youth	$1,235.00	$1,570.00	$1,800.00
(*One year from licensed anniversary date)	-	-	-
(**With Shelter add $100.00 to all listed license fees)	-	-	-
(***With PRTF add $200.00 to all listed license fees)	-	-	-

Secure Residential Childcare Facility			
-	Beginning 2018	Beginning 2019	2020 and beyond
Original Application	$1,297.00	$1,670.00	$1,800.00
Continuation	$1,297.00	$1,670.00	$1,800.00

Changes Made to All License Types	
	July 1, 2020, and JULY 1, beyond
Changes to Licensed Capacity	$97.00
Changes to Physical Premises	$97.00
Duplicate Licenses	$40.00

E. International adoption agencies with out-of-state offices will be required to reimburse the State for actual and necessary charges involved with travel to out-of-state offices.

DF. The appropriate fee must be submitted for each appeal request submitted within each calendarlicensing year. There will be no charge for waiver requests or emergency appeals.

LESS THAN 24-HOUR APPEAL AND FEES (PER CALENDAR YEAR)

Initial appeal request	Free
Second appeal request	$10.00 Each
Three or more requests	$25.00 Each
Emergency Appeals	Free

E~~G~~. Any eligible child care facility providing less than 24-hour care that holds a Colorado shines level 3-5 and an average annual enrollment of at least fifty (50) percent of total children enrolled receiving assistance from the Colorado Child Care Assistance Program (CCCAP) or enroll on average at least fifty (50) percent of the county's total CCCAP population may receive a discounted continuation fee of up to fifty (50) percent of their respective license type. The Colorado shines rating and CCCAP enrollment must be verified by the State Department.

~~7.701.11~~2.112 LICENSING EXEMPTIONS

A. A license must be obtained before care begins unless such care is exempt as set forth below.

B. A license is not required for:

1. A special school or class in religious instruction. Religious instruction is defined as instruction in religion as a subject of general education, or instruction in the principles of a particular religious faith. Faith-or spiritually-based programs which offer religious instruction combined with early childhood education, child care or child development activities as a part of the daily routine must obtain a child care license.

2. A special school or class operated for a single skill-building purpose. Single skill building includes activities or instruction in one subject area. A single skill program includes the development of an individual skill which does not include naptime periods or overnight care, or any other time children are not engaged in that specific activity. Any time activities other than the identified single skill are provided; the program is no longer considered a single skill program and must obtain the appropriate license. Meals and snacks may be incorporated into the single skill request.

3. A child care center operated in connection with a church, shopping center, or business where children are cared for during short periods of time, not to exceed three hours in any twenty-four (24) hour period of time, while parents or persons in charge of such children, or employees of the church, shopping center, or business whose children are being cared for at such location are attending church services at such location, shopping, patronizing or working on the premises of the business. This facility must be operated on the premises of the church, business, or shopping center. Only children of parents or guardians who are attending a church activity; patronizing the business or shopping center or working at the church, shopping center or business can be cared for in the center.

4. Occasional care of children with or without compensation, which means the offering of child care infrequently and irregularly that has no apparent pattern.

5. A family care home that provides less than 24-hour care. Care must only be provided using one (1) of the options below at any one time:

   a. Care of children who are directly related to the caregiver by blood, marriage or adoption. The relationship between the caregiver and child includes biological child(ren), step-child(ren), grandchild(ren), niece, nephew, sibling, or first cousin and provide care for children who are siblings from the same family household which is unrelated to the provider; or

b. Care of up to four (4) children, related or unrelated to the caregiver. No more than two (2) children under the age of two years may be cared for at any one time.

6. A child care facility that is approved, certified, or licensed by any other state department or agency, or by a federal government department or agency, which has standards for operation of the facility and inspects or monitors the facility.

7. The medical care of children in nursing homes.

8. Ski area guest child care facilities as defined at s~~S~~ections 26.5-5-303(10) and 26.5-5-307~~26-6-102(16) and 26-6-103.5~~, C.R.S.

9. Neighborhood Youth Organizations as defined at s~~S~~ections 26.5-5-308 and 26.5-5-303(17),~~26-6-102(5.8) and 26-6-103.7,~~ C.R.S.

10. Public services short-term child care facility as defined in section 26.5-5-303(22), C.R.S.

DISPUTE RESOLUTION

~~7.701.12~~2.113 CIVIL PENALTIES AND INJUNCTIONS

A. Violation of any provision of the Child Care Licensing Act or intentional false statements or reports made to the State Department or to any agency lawfully delegated by the State Department to make an investigation or inspection may result in fines assessed of not more than $250~~100~~ a day the first day, $500 for the second day, $1,000 a day for the third and subsequent to a maximum of $10,000:

1. A civil penalty will be assessed by the State Department only in conformity with the provisions and procedures specified in Article 4 of Title 24, C.R.S. No civil penalty will be assessed without a hearing conducted pursuant to the Child Care Licensing Act and Article 4 of Title 24, C.R.S., before an Administrative Law Judge acting on behalf of the State Department.

2. Prior to receipt of a cease and desist order from the State Department or from any agency delegated by the State Department to make an investigation or inspection under the provision of the Child Care Licensing Act, any unlicensed child care facility may be fined up to $250~~100~~ a day for the first day, $500 for the second day, $1,000 a day for the third and subsequent days to a maximum of $10,000 for each violation of the Child Care Licensing Act or for any statutory grounds as listed in section 26.5-5-317(2) C.R.S ~~to a maximum of $10,000 for providing care for which a license is required~~.

3. For providing child care for which a license is required after receipt of a cease and desist order, an unlicensed facility shall~~will~~ be fined up to $500; a sentence of up to 10 days in jail; or both.~~$100 a day to a maximum of $10,000.~~

4. Assessment of any civil penalty under this rule section will not preclude the State Department from initiating injunctive proceedings pursuant to s~~S~~ection 26.5-5-320, C.R.S.

5. A licensed child care facility may be fined up to $250~~100~~ a day for the first day, $500 for the second day, $1,000 a day for the third and subsequent days to a maximum of $10,000 for each violation of the Child Care Licensing Act or for any statutory grounds as listed at s~~S~~ection 26.5-5-317(2)~~26-6-108(2)~~, C.R.S.

6. Assessment of any civil penalty does not preclude the State Department from also taking action to deny, suspend, revoke, make probationary, or refuse to renew that license.

7. Any person intentionally making a false statement or report to the Department or to any agency delegated by the State Department to make an investigation or inspection under the provisions of the Child Care Licensing Act may be fined up to $250~~100~~ a day for the first day, $500 for the second day, $1,000 a day for the third and subsequent days to a maximum of $10,000.

8. Civil penalties assessed by the State Department must be made payable to the Colorado Department of ~~Human Services~~Early Childhood.

B. In addition to civil penalties that may be assessed under rule s~~S~~ection 2.114(A)~~7.701.12.A~~, when an individual operates a facility after a license has been denied, suspended, revoked, or not renewed, or before an original license has been issued, injunctive proceedings may be initiated to enjoin the individual from operating a child care facility without a license.

C. Within ten (10) working days after receipt of a notice of final agency action with regard to a negative licensing action or the imposition of a fine, or when the State Department identifies and documents in a report of inspection serious violations of any of the standards that could impact the health, safety or welfare of a child cared for at the facility or family child care home, each child care center, facility or family child care home must provide the State Department with the names and mailing addresses of the parents or legal guardians of each child cared for at the facility so that the State Department can notify the parents or legal guardians of the negative licensing action taken or the serious violation impacting the health, safety or welfare of a child. The facility will be responsible for paying a fine to the State Department that is equal to the direct and indirect costs associated with the mailing of the notice.

~~7.701.13~~2.114 APPEALS AND WAIVERS

The State Department is authorized to hear and decide three kinds of appeal or waiver requests by applicants or licensees: hardship appeals in this rule set, also referred to as hardship waivers, stringency appeals, and materials waiver requests, according to the ~~following~~ procedures set forth in this rule section. ~~For purposes of this sSection 2.1067.701.13, a county department of human/social services that certifies foster homes under § 26-6-106.3, C.R.S., is a "licensee."~~

A. Hardship Waivers

1. Any applicant or licensee who has applied for or been issued a license to operate a child care facility ~~or child placement agency~~ has a right to appeal, pursuant to section 26.5-5-314(5)~~§ 26-6-106(3)~~, C.R.S., any rule or standard which, in ~~his or her~~their opinion, poses an undue hardship on the person, facility, or community.

   a. "Undue hardship" is defined as a situation where compliance with the rule creates a substantial, unnecessary burden on the applicant or licensee's business operation or the families or community it serves, which reasonable means cannot remedy. An undue hardship does not include the normal cost of operating the business.

   b. Emergency hardship appeals are requests by applicants or licensees to excuse noncompliance with a specific child care licensing rule due to urgent, significant, and unexpected situations outside the applicant's or licensee's control. Specific situations that may be considered "emergencies" under this paragraph include, but are not limited to:

1) Natural disasters;

2) Infectious disease outbreaks;

3) Mold outbreaks; or

4) Acts of nature or an accident resulting in structural damage to the child care facility.~~; or~~

~~5) For foster care homes and residential child care facilities, an immediate, child(ren) specific, emergency placement, situation which may disrupt placement, or situation posing a safety risk to a child(ren) in out-of-home placement.~~

2. Such appeal must be submitted to the State Department in writing within sixty (60) calendar days from the date on which the rule, standard, or emergency situation allegedly created the hardship. The applicant or licensee or their designated representative must send an appeal on the state-prescribed form to the appropriate division. Each rule appealed requires an individual appeal and applicable fee. If the appeal is an emergency hardship appeal, the applicant or licensee must mark it as such on the state-prescribed form.

3. When submitting an appeal, the applicant or licensee must consider the impact on the health, safety, and wellbeing of any children in care and include a proposed alternate compliance plan.

4. The State Department must consider the impact of an appeal on the health, safety, and wellbeing of the children in care, which must take priority over any undue hardship alleged, when determining whether an appeal should be granted.

5. If the State Department grants an appeal for undue hardship, it will issue the applicant or licensee an official decision notification letter temporarily excusing the applicant or licensee from compliance with the appealed rule or standard and accepting the alternate compliance plan.

B. Stringency Appeals

1. Any applicant or licensee who has applied for or been issued a license to operate a child care facility ~~or child placement agency~~ has a right to appeal, pursuant to section 26.5-5-314(5)~~§ 26-6-106(3)~~, C.R.S., any violation of a child care licensing rule cited in a report of inspection, on the basis that the rule has been too stringently applied by a representative of the State Department. “Stringency,” as used in this rule s~~S~~ection 2.115~~7.701.13~~, means the child care licensing representative applied rules too strictly, improperly, or unfairly. Disputes over the factual accuracy of a cited violation are not reviewable under this provision and must be resolved with the licensing representative’s supervisor.

2. Such appeal must be submitted to the State Department in writing within sixty (60) calendar days from the date of the report of inspection at issue. The applicant or licensee or their designated representative must send an appeal on the state-prescribed form to the appropriate division. Each rule citation requires an individual appeal and applicable fee.

3. When submitting an appeal, the applicant or licensee must provide all evidence that it believes shows the rule was applied too stringently.

4. The State Department must consider the impact of an appeal on the health, safety, and wellbeing of the children in care.

5. If the State Department finds a licensing rule was too stringently applied in the appealed citation, it will issue the applicant or licensee a new report of inspection with that citation removed, which shall for all purposes supersede the original report of inspection.

C. Materials Waiver Requests

1. A child care center that is applied for or has been issued a license may request a waiver, pursuant to section 26.5-5-313~~§ 26-6-105.7~~, C.R.S., to use certain hazardous materials in its program or curriculum that would otherwise violate child care licensing rules.

2. The child care center must submit a materials waiver request in writing on the state-prescribed form to the appropriate division. Each rule for which waiver is requested requires an individual request and applicable fee. If the request also seeks to remove a citation on a report of inspection involving the materials, it must be submitted within sixty (60) calendar days from the date of the report of inspection; otherwise, it may be submitted at any time.

3. A child care center requesting a materials waiver must adopt a safety policy, included with the waiver request, that provides that:

   a. Early childhood teachers are trained in the use of the specific material(s) in a way that provides reasonable, developmental-and age-appropriate safety provisions for children;

   b. Current training certificates are provided for each staff/classroom where the materials waiver is being sought. Training must be completed through nationally recognized programs related to the curriculum or philosophy, or through other State Department-approved training, curriculum, or program validation; and,

   c. Parents are notified in writing regarding the use of the hazardous materials in the child care center. The notice must include all of the potential safety risks associated with the materials. The child care center must obtain signed parental consent forms acknowledging awareness of the risks in using the materials in the child care center prior to implementing use of the identified materials and prior to any newly enrolled children attending the center after the waiver is implemented.

4. The State Department must consider the impact of a materials waiver request on the health, safety, and wellbeing of the children in care.

5. If the State Department grants a materials waiver request, it will issue the child care center an official decision notification letter allowing the use of the requested materials according to the provided safety policy. The applicant or licensee must post the decision letter next to the child care license until the letter's expiration date. If there is no expiration date, the decision letter expires three (3) years from the date of the letter. The approved waiver must be in place before using materials that pose a risk to children.

D. Administrative Review and Appeal Panel Procedures

1. The applicant or licensee must comply with all child care licensing rules and standards, including the rule(s) subject to an appeal or materials waiver request, until the applicant or licensee has received a written decision granting the appeal or waiver.

2. The State Department will receive, review, and schedule all appeals and materials waiver requests for review by the appeal panel constituted under section 26.5-5-314(5)~~§ 26-6-106(3)~~, C.R.S.

a. For hardship appeals, the State Department may propose that the appeal panel grant one or more appeals as part of a consent agenda, which the appeal panel may approve with a single vote; except if any panel member objects to the consent agenda, the appeals on such agenda must be decided individually. The appeal panel may not deny appeals by consent agenda.

b. For emergency hardship appeals, the State Department may administratively grant the appeal if it meets the definition of an emergency situation and the proposed alternate compliance plan adequately protects the health, safety, and wellbeing of children in care. If the State Department does not administratively grant the emergency hardship appeal, it must schedule the appeal for review by the appeal panel.

c. For materials waiver requests, the State Department will administratively grant or deny the waiver request within sixty (60) days after receipt of the request. If it denies a waiver, the State Department must provide notice in its decision of the child care center's right to appeal the denial within forty-five (45) days and the center's right to meet with State Department personnel as part of that appeal.

d. If a child care center appeals the denial of a materials waiver request within forty-five (45) days of the denial, the State Department will schedule the appeal for review by the appeal panel within forty-five (45) days of the appeal. The entire appeal process must not last longer than one hundred (100) days from the date of the notice of denial.

3. The appeal panel will adopt a written decision recommending that the State Department grant, deny, or grant with modifications an appeal or materials waiver request. The State Department must send an official decision letter, including the written decision of the appeal panel, to the applicant or licensee, within ten (10) days from the date of the appeal panel meeting.

a. For hardship appeals and materials waiver requests, the official decision letter must be posted next to the child care license until its expiration date. If there is no expiration date, the letter expires three (3) years from its date.

b. If the State Department approves a hardship appeal or materials waiver request and the applicant or licensee wishes to make changes to the alternate compliance plan or safety policy submitted with the original appeal or request, the applicant or licensee must submit a new hardship appeal or materials waiver request.

c. If, after the State Department approves a hardship appeal or materials waiver request, the applicant or licensee violates the terms and conditions described in the approved alternate compliance plan, approved safety policy, or official decision letter, the State Department's approval will immediately be rescinded and considered null and void. For purposes of this provision, any injuries, accidents, or founded complaints or investigations related to the appealed or waived licensing rule constitute a violation.

4. Hearing requests

a. For hardship or stringency appeals, if an applicant or licensee is aggrieved by the decision of the State Department, the applicant or licensee may request an administrative hearing pursuant to section§ 24-4-105, C.R.S. Written requests for an administrative hearing must be received in writing within 30 calendar days

from the date the applicant or licensee received the State Department's decision. In all such administrative hearings, the applicant or licensee will bear the burden or proof by a preponderance of the evidence.

b. For appeals from denials of materials waiver requests, the State Department's decision is a final agency decision subject to judicial review pursuant to section~~§~~ 24-4-106, C.R.S.

~~7.701.14~~2.115 CIVIL RIGHTS

All facilities licensed under the Child Care Licensing Act are subject to the following federal laws and regulations: the non-discrimination provisions of Title VI of the Civil Rights Act of 1964, 42 U.S.C. section~~§~~ 2000D *et seq*. (2018), and its implementing regulation, 45 C.F.R. Part 80 (2018); the Age Discrimination Act of 1975, 42 U.S.C. sections~~§§~~ 6101-6017 (2018) and its implementing regulation, 45 C.F.R., Part 91 (2018); Section 504 of the Rehabilitation Act of 1973, 29 U.S.C. section~~§~~ 794 (2018), and its implementing regulation, 45 C.F.R. Part 84 (2018). All of which are hereby incorporated by reference. No later editions or amendments are incorporated. These statutes and regulations are available for public inspection and copying at the Colorado Department of~~-~~ Early Childhood at 710 S. Ash St., Bldg. C, Denver, CO 80246~~Human Services 1575 Sherman St., 8th floor, Denver, Colorado 80203~~, during regular business hours. These statutes and regulations are also available at no cost at http://uscode.house.gov and http://www.ecfr.gov.

All facilities licensed under the Child Care Licensing Act are also subject to Titles I through V of the Americans with Disabilities Act, 42 U.S.C. section~~§~~ 12101 *et seq*. (2012), and it's implementing regulation, 29 C.F.R., part 1630 (2018), which are hereby incorporated by reference. No later editions or amendments are incorporated. These statutes and regulations are available for public inspection and copying at The Colorado Department of ~~-~~Early Childhood at 710 S. Ash St., Bldg. C, Denver, CO 80246~~Human Services 1575 Sherman St., 8th floor, Denver, Colorado 80203~~, during regular business hours. These statutes and regulations are also available at no cost at http://uscode.house.gov and http://www.ecfr.gov.

Decisions related to the enrollment ~~, placement,~~ or dismissal of a child with a disability or chronic condition must be in compliance with the Americans with Disabilities Act. The facility must provide reasonable accommodations for the child with a disability who has special needs.

A lack of independent ambulation or the need for assistance in feeding, toileting, or dressing or in other areas of self-care cannot be used as sole criteria for enrollment or placement or denial of enrollment ~~or denial of placement~~. Efforts must be made to accommodate the child's needs and to integrate the child with his/her peers who do not have disabilities.

BACKGROUND CHECKS

~~7.701.32~~2.116 ~~USE OF RECORDS AND REPORTS OF~~ CHILD ABUSE OR NEGLECT FOR BACKGROUND AND EMPLOYMENT INQUIRIES

A. An operator of a licensed facility, guest child care facility as defined in section 26.5-5-303(6)~~26-6-102(16)~~, C.R.S., or an exempt family child care home provider must submit a request to determine if an operator, applicant for employment or current employee has been found responsible for a confirmed report of child abuse or neglect in the State Department's automated system (Trails).~~B. Foster Homes must also obtain a child abuse or neglect records check for each adult eighteen (18) years of age or older living in the home in every state where the adult has resided in the five 5 years immediately preceding the date of application.~~

B~~C~~. An child abuse or neglect records check is not necessary regarding out-of-state employees of a children's resident camp or school-age child care center for a camp or center that is in operation

for fewer than ninety (90) calendar days; out-of-state employees operating under this exemption must be supervised at all times by a staff member who has successfully completed all background checks.

C~~D~~. The Trails child abuse or neglect records request must be made on the State prescribed form, accompanied by the required fee ~~(for fee assessment see section 7.000.73)~~ within the following required time frames:

1. Child care centers (less than 24-hour care), school-aged child care facilities, family child care homes, and qualified exempt providers must meet the following:

   a. For all individuals whose activities involve the care or supervision of children or who have unsupervised access to children, requests must be submitted and successfully completed prior to caring for children or allowing unsupervised access to children.

      1) Individuals who have obtained a successfully completed CBI or FBI record check may care for children, for no longer than ninety (90) calendar days, while waiting for all other required background checks to be completed. The individual must be supervised at all times by an individual who has successfully completed all required background checks.

   b. For each adult eighteen (18) years of age or older, residing in a licensed family child care home or a qualified exempt provider home, requests must be submitted at time of application.

   c. For each adult eighteen (18) years of age or older, who begin residing in the home after care begins, requests must be submitted within five (5) calendar days of when he or she begins residing in the home, and these adults must not be allowed unsupervised access to children in care until all background checks have been successfully completed.

2. All other requests except those specified in rule section 2.117(C)(1)~~7.701.32.D.1~~ must be submitted within ten (10) calendar days of the first day of employment for each employee or facility.

D~~E~~. The Trails child abuse and neglect records request must be made within ten (10) calendar days of the first day of employment for each employee or facility on the State prescribed form, accompanied by the required fee ~~paid by check or money order (for fee assessment see section 7.000.73)~~.

E~~F~~. The Trails child abuse and neglect records request must be accompanied by the individual's written authorization to obtain such information from the State automated system, if applicable.

F~~G~~. The State Department will inform the requesting party in writing of whether the individual has been confirmed to be a person responsible for an incident of child abuse or neglect.

1. If the result of the inquiry is that the individual has been confirmed as responsible for an incident of child abuse or neglect, the State Department must provide the requesting party with information regarding the date of the reported incident, the type of abuse or neglect with the severity level, and the county department that confirmed the report.

2. If the result of the inquiry is that the individual has not been confirmed to be responsible for an incident of child abuse or neglect, the State Department must notify the requesting party of this fact.

G~~H~~. The information provided by the State Department must serve only as the basis for further investigation. The director or operator may inform an applicant or employee that the report from the State Department's automated system was a factor in the director or operator's decision with regard to the applicant or employee's employment.

H~~I~~. Any person who willfully permits or who encourages the release of data or information related to child abuse or neglect contained in the State Department's automated system to persons not permitted access to such information commits a Class 1 misdemeanor and must be punished as provided in section 18-1.3-501(1), C.R.S.

I~~J~~. Every five (5) years, all child abuse and neglect inquiry background checks must be renewed by resubmitting an inquiry form and current fee to the State Department for processing. An updated clearance letter or verification of the submission of the inquiry form must be obtained before five (5) years from the date reflected on the current clearance letter.

J~~K~~. The results of the abuse and neglect inquiry must be maintained at the center, facility, or agency and must be available for review upon request by a Licensing Specialist.

2.117~~7.701.33~~ CRIMINAL RECORD CHECK

A. Criminal records checks are required under the following circumstances:

1. In order to obtain any Colorado bureau of investigation (CBI) and/or Federal Bureau of Investigation (FBI) fingerprint criminal history records, each applicant listed below must have their fingerprints taken and processed at a vendor approved by CBI. Approved vendors may be located using the CBI website at Colorado.gov/cbi. Payment of the fee for the criminal record check is the responsibility of the individual being checked, identified as follows:

a. Each applicant for an original license for a center, facility, or agency and any adult eighteen (18) years of age or older who resides in the licensed center, facility or agency.

b. Each exempt family child care home provider who provides care for a child and each individual who provides care for a child who is related to the individual (referred collectively in this rule section as a "qualified provider"), if the child's care is funded in whole or in part with money received on the child's behalf from the publicly funded Colorado Child Care Assistance Program; and, any adult eighteen (18) years of age or older who resides with a qualified provider where the care is provided.

~~c. Applicants for an original certificate for a foster care home, and any adult eighteen (18) years of age or older who resides in the foster care home.~~

~~d. Any person working in a twenty-four (24) hour child care agency or facility.~~

2. Each applicant for an original license for a Neighborhood Youth Organization must comply with the criminal background check requirements found at section 26.5-5-308~~26-6-103.7(4)~~, C.R.S.

The applicant must ascertain whether the person being investigated has been convicted of felony child abuse as specified in section 18-6-401, C.R.S., or a felony offense involving unlawful sexual behavior as defined in section 16-22-102(9), C.R.S. The Neighborhood Youth Organization must not hire a person as an employee or approve a person as a volunteer after confirmation of such a criminal history.

B. Only in the case of a children's resident camp or school-age child care center, out-of-state persons employed in a temporary capacity for less than ninety (90) days are not required to be fingerprinted to obtain a criminal record check. Each person exempted from fingerprinting and being checked with the State Department's automated system must sign a statement which affirmatively states that she/he has not been convicted of any charge of child abuse or neglect, unlawful sexual offense, or any felony. Out-of-state employees operating under this exemption must be supervised at all times by a staff member who has successfully completed all background checks.

Prospective employers of such exempted persons must conduct reference checks of the prospective employees in order to verify previous work history and must conduct personal interviews with each such prospective employee.

C. At the time the annual declaration of compliance (see rule section 2.106(B)~~7.701.35.B~~) is submitted to the Department, except as required per this rule section ~~7.701.33.C.1 and 7.701.33.C.2~~2.117(C), a criminal record check is required only for adults living at the licensed facility who have not previously obtained one. Because the CBI provides the Department with ongoing notification of arrests, owners, applicants, licensees, and persons who live in the licensed facility who have previously obtained a criminal record check, they are not required to obtain additional criminal record checks.

1. Any resident of the family child care home or qualified exempt provider home turning eighteen (18) years of age shall complete the fingerprint process at an approved vendor fourteen (14) calendar days prior to their 18th birthday.

2. The fingerprint process shall be completed at an approved vendor within five (5) calendar days of when any new resident, eighteen (18) years of age or older, begins residing in a family child care home or qualified exempt provider home. Adults must not be allowed unsupervised access to children in care until all background checks have been successfully completed.

D. Each owner and~~,~~ employee sixteen (16) years of age or older of a facility or agency shall complete the fingerprint process at an approved vendor. Payment of the fee for the criminal record check is the responsibility of the individual being checked or the facility or agency. The results of the criminal record check, the CBI and FBI response letters, must be maintained at the home, center, facility, or agency and must be available for review upon request by a Licensing Specialist.

1. Employees and volunteers who are transferring from one child care facility to another may have their CBI, but not their FBI, fingerprints transferred if they complete the following process:

a. Employees must contact CBI to determine if they are eligible for transfer. If eligible, employees must visit a CBI approved vendor and indicate they are completing a criminal background check (CBC) transfer per ~~C.R.S.~~section 26.5-5.-316 (1)(a)(I)(D)~~26-6-107(1)(a)(I)(C.7)~~, C.R.S. Employees must pay the current transfer fee.

b. When an individual leaves employment, the facility must submit to the Department a completed Notification of Name Removal form to request the removal of the individual's name from their facility license number in the CBI database.

c. School district employees who currently work at a child care facility must have their criminal history report linked to the license number of the child care facility.

2. Except as required per rule section ~~7.701.33.D.3~~2.117(D)(3), any adult volunteer, working as a staff member to meet the required staff-child ratio or staff qualifications, who works fourteen (14) days (112 hours) or more in a calendar year shall complete the fingerprint process at an approved vendor. The results of the criminal record check must be maintained at the facility or agency and must be available for inspection by a Licensing Specialist. An employee operating as a volunteer to meet required staff-child ratio that does not have a completed background check on file must be supervised at all times by a qualified staff member who has successfully completed all background checks.

3. Criminal background check requests for volunteers, whose activities involve the care and supervision of children; or who have unsupervised access to children, must be submitted and successfully completed prior to caring for children or allowing the individual unsupervised access to children in child care centers (less than 24-hour care), school-aged child care facilities, family child care homes, and qualified exempt provider homes.

4. Requests for a criminal record check, other than those required per this rule section 2.117(D)(4)~~7.701.33.D.4.a, b~~ must be completed at an approved vendor within five (5) working days of the day that the individual begins to work at the facility or agency.

   a. Criminal background check requests must be successfully completed prior to an individual caring for children or allowing the individual unsupervised access to children in child care centers (less than 24-hour care), school-aged child care facilities, family child care homes, and qualified exempt provider homes.

   b. A National Sex Offender Registry check request must be submitted and successfully completed prior to an individual caring for children or allowing the individual unsupervised access to children in child care centers (less than 24-hour care), school-aged child care facilities, family child care homes, and qualified exempt provider homes.

5. Every five (5) years, requests for FBI criminal record checks must be renewed by completing the fingerprint process at an approved vendor. An updated clearance letter or verification of the submission of the request must be obtained prior to five (5) years from the date reflected on the current clearance letter.

6. Facilities and agencies that hire individuals who have been convicted of any felony, except those listed in rule ~~sub~~section 2.117(D)(7)~~8.a.-f~~ below, unlawful sexual behavior, or any misdemeanor, the underlying factual basis of which has been found by the court on record to include an act of domestic violence must inform the State Department of that hiring within fifteen (15) calendar days of receiving knowledge of the conviction.

7. A child care facility shall not employ~~, or a child placement agency shall not employ~~ or certify~~,~~ an individual who has been convicted of:

   a. Child abuse, as specified in section 18-6-401, C.R.S.

   b. A crime of violence, as defined in section 18-1.3-406(2)(a)(I), C.R.S.

c. An offense involving unlawful sexual behavior, as defined in section 16-22-102(9), C.R.S.

d. A felony, the underlying factual basis of which has been found by the court on the record to include an act of domestic violence, as defined in section 18-6-800.3, C.R.S.

e. A felony involving physical assault, battery, or a drug-related offense within the five years preceding the date of application for a license or certificate.

f. A pattern of felony or misdemeanor convictions within the ten (10) years immediately preceding submission of the application. "Pattern of misdemeanor" shall include consideration of section 26.5-5-317~~26-6-108~~(2), C.R.S., regarding suspension, revocation and denial of a license, and shall be defined as:

1. Three (3) or more convictions of third (3rd) degree assault as described in section 18-3-204, C.R.S., and/or any misdemeanor, the underlying factual basis of which has been found by any court on the record to include an act of domestic violence as defined in section 18-6-800.3, C.R.S.; ~~or~~

2. Five (5) misdemeanor convictions of any type, with at least two (2) convictions of third (3rd) degree assault as described in section 18-3-204, C.R.S., and/or any misdemeanor, the underlying factual basis of which has been found by any court on the record to include an act of domestic violence as defined in section 18-6-800.3, C.R.S.; or~~,~~

3. Seven (7) misdemeanor convictions of any type.

g. Any offense in any other state, the elements of which are substantially similar to the elements listed in this rule ~~sub~~section 2.117(D)(7)~~a-f~~.

E. Payment of the fee for the FBI check is the responsibility of the individual who is obtaining the check or the facility or agency. Certified foster parent(s) or any person eighteen (18) years of age or older who resides with a certified foster parent must obtain a criminal record check from the FBI regardless of the length of residence in Colorado.

F. The Department may deny, revoke, suspend, change to probationary or fine a child care facility ~~or child placement agency~~ if the applicant(s), an affiliate of the applicant, or any person living with or employed by the applicant has been found to violate any of the provisions set forth in section 26.5-5-317(2)~~26-6-108(2)~~, C.R.S.

G. The Department may deny an application for a child care facility license ~~or a child placement agency license~~ if the applicant is a relative affiliate of a licensee, as described in section 26.5-5-303(1)(d)~~26-6-102(1)(d)~~, C.R.S., of a child care facility ~~or child placement agency~~, which is the subject of a previous negative licensing action or is the subject of a pending investigation by the State Department that may result in a negative licensing action.

H. For all CBI fingerprint-based criminal history record information checks required in this rule section~~s~~ 2.11X and 2.117~~7.701.33~~, including those confirming a criminal history as well as those confirming no criminal history, the State Department will conduct a comparison search on the State Judicial Department~~"~~s court case management system and the sex offender registry of the Colorado Department of Public Safety. The court case management search must be based on name, date of birth, and address, in addition to any other available criminal history data that the State Department deems appropriate, is used to determine the type of crime(s) for which a

person was arrested or convicted and the disposition thereof. The sex offender registry search is used to determine whether the address of a licensee or prospective licensee is listed as belonging to a registered sex offender, except that:

1. County departments of human or social services must conduct sex offender searches in the CBI sex offender registry and the national sex offender public website operated by the United States Department of Justice prior to certification and annually; include a copy in the provider record using the following criteria at a minimum:

    a. Known names and addresses of each adult residing in the foster care home or kinship foster care home; and~~,~~

    b. Address only, of the foster care home or the kinship foster care home.

~~2. Child placement agencies must conduct sex offender searches in the CBI sex offender registry and the national sex offender public website operated by the United States Department of Justice prior to certification and annually, include a copy in the provider record using the following criteria at a minimum:~~

~~a. Known names and addresses of each adult residing in the foster care home or kinship foster care home; and,~~

~~b. Address only of each adult residing in the foster care home or the kinship foster care home.~~

I. Portability of Background Checks

1. Where two or more individually licensed facilities are wholly owned, operated, and controlled by a common ownership group or school district, a fingerprint-based criminal history records check and a check of the records and reports of child abuse or neglect maintained by the State Department, completed for one of the licensed facilities of the common ownership group or school district pursuant to this rule section for whom a criminal records check is required under section 26.5-5-316~~26-6-107~~, C.R.S., may satisfy the records check requirement for any other licensed facility under the same common ownership group or school district. A new fingerprint-based criminal history records check or new check of the records and reports of child abuse or neglect maintained by the Department is not required of such an individual if the common ownership group or school district maintains a central records management system for employees of all its licensed facilities; takes action as required pursuant to section 26.5-5-309~~26-6-104~~, C.R.S., when informed of the results of a fingerprint-based criminal history records check or check of the of records and reports of child abuse or neglect maintained by the Department that requires action pursuant to the Child Care Licensing Act; and informs the State Department whenever an additional licensed facility comes under or is no longer under its ownership or control.

2. When a licensee is inspected pursuant to the Child Care Licensing Act and records regarding CBI and FBI fingerprint-based criminal background checks, as well as records and reports of child abuse and neglect maintained by the State Department, and the comparison search on the State Judicial Department's court case management system are held at a central records management system, the licensee must be afforded fourteen (14) calendar days to provide to the State Department documentation necessary to verify that employees at the licensed facility have the required records related to fingerprint-based criminal background checks.

J. State-based background checks

1. The following background check requests must be submitted and successfully completed for each state an individual has resided in, in the past five years, prior to an individual caring for children or allowing the individual unsupervised access to children in child care centers (less than 24-hour care), school-aged child care facilities, family child care homes, and qualified exempt provider homes:

    a. State criminal history check

    b. State sex offender registry check

    c. State abuse and neglect registry check

ADMINISTRATION

~~7.701.34~~2.118 FIRE INSPECTIONS, ~~AND~~ HEALTH INSPECTIONS, AND~~,~~ ZONING CODES

A. Prior to the original license being issued, following the renovation of the facility that would affect the licensing of the facility and at least every two (2) years thereafter, all child care facilities except family child care homes and Neighborhood Youth Organizations must be inspected and obtain an approving inspection report from the local department of health or the Colorado Department of Public Health and Environment and from the local fire department. These reports must be maintained at the facility and be available for review upon request by a Licensing Specialist.

B. Prior to the original license being issued, all child care facilities, except for foster homes and specialized group facilities, that are providing care for three or fewer children who are determined to have a developmental disability by a community centered board or who have a serious emotional disturbance, must submit to the State Department written approval from the local zoning department approving operation of the facility. The approval must include the address of the child care facility and the ages and number of children to be served. The facility must also submit written zoning department approval to the State Department any time there is a change to the license, including moving the facility to another location, increasing the capacity, or adding different ages of children.

C. All child care facilities must operate in compliance with local planning and zoning requirements of the municipality, city and county, or county where the facility is located.

~~7.701.5 ADMINISTRATION~~

~~7.701.51~~2.119 GOVERNING BODY

A. The governing body must be identified by its legal name on the original application and annual continuation notice. The names and addresses of individuals who hold primary financial control and officers of the governing body must be fully disclosed to the State Department.

B. The governing body must demonstrate to the State Department, upon request, that there is sufficient financial support to operate and maintain the facility in accordance with all general licensing rules defined in rule section 2.103~~7.701~~, the rules regulating the specific type of facility, and the goals and objectives of the facility.

~~7.701.52~~2.120 REPORTS~~A. Critical incident reporting for 24-hour agencies, facilities and day treatment centers:~~

~~Within twenty four (24) hours, excluding weekends and holidays, of the occurrence of a critical incident at the facility or within twenty four (24) hours of a child's return to the facility:~~

1. Death

a. Report any child/youth death in the facility or foster home while a child has an open placement, to include while a child is on or off grounds;

b. Report death of a child/youth while a child is on the premises of a day treatment center;

c. Report death of staff while on duty;

d. Report death of foster parent with child(ren)/youth in placement; and

e. Report death of volunteer or visitor while on premises.

2. Abuse and neglect

a. Report any allegation, suspicion, reasonable cause to know, observation or condition of physical, sexual, verbal, emotional, psychological, or financial abuse to a child/youth when they are in placement or on the premises;

b. Report any allegation, suspicion, reasonable cause to know, observation or condition of physical, deprivation of needs, medical, supervisory, emotional, psychological, or financial neglect to a child/youth while they are in placement or on the premises; and

c. Report notification of an open investigation conducted by the county department.

3. Injury

a. Report any serious injury to a child/youth that requires emergency medical attention by a health care professional outside of the facility or admission to a hospital;

b. Report any serious injury in which there is no known cause or due to alleged lack of supervision;

c. Report any injury, bruise, or abrasion on the child/youth that occurs as a result of a physical management.

d. Report any injury to a foster parent, staff, volunteer or visitor as a result of an altercation with a child/youth.

4. Illness

a. Report any serious illness that requires emergency medical attention by a health care professional outside of the facility or admission to a hospital;

b. Report when the wrong medication or dosage is given, or when the prescribed medication is not given to the child/youth, which results in an adverse side effect (physiological or psychological) which requires treatment from a medical professional outside of the facility to address the adverse effects and ensure the safety of the child/youth to sustain life;

c. A reportable disease, as required by the Colorado Department of Public Health and Environment, of a child or staff member;

d. Report any suicidal attempt by a child/youth that requires emergency medical attention by a health care professional outside of the facility or admission to a hospital;

~~**e. Report any self-injurious behavior by a child/youth that requires emergency medical attention by a health care professional outside of the facility or admission to a hospital;**~~

~~**f. Report if a child/youth is placed on a 72-hour/M1 hold;**~~

~~**g. Report if a child, foster parent, or staff on duty receives medical or emergency attention outside of the facility as a result of a drug or alcohol related incident.**~~

~~**5. Emergency response**~~

~~**a. Report if a fire department responds to a fire;**~~

~~**b. Report a hazardous situation that occurs that could have possibly threatened the lives of other people around a facility or foster home;**~~

~~**c. Report incidents that result in law enforcement taking control of a situation or taking control of a facility or foster home;**~~

~~**d. Report any major or/credible threat to the security and/or safety of a facility, foster home, or child/youth in out-of-home care;**~~

~~**e. Report if a law enforcement agency files charges; issues a summons or citation to a child/youth, and/or a child/youth is arrested while the child/youth has an open placement at the facility or foster home, to include when child/youth is on or off grounds;**~~

~~**f. Report if a child/youth leaves without consent if under the age of 18 and does not return to the facility or foster home within 24 hours;**~~

~~**g. Report if division of youth services child/youth escapes the facility or foster home.**~~

~~**A report of a critical incident must be submitted directly through the Colorado Department of Human Services, Division of Child Welfare, Trails automated system.**~~

A~~B~~. Reporting for family child care homes, child care center, preschools, school-age child care, children's resident camps and neighborhood youth organizations.

1. Within twenty-four (24) hours, excluding weekends and holidays, of the occurrence of a critical incident at the facility or within twenty-four (24) hours of a child's return to the facility the licensee must report in writing to ~~The Office of Early Childhood~~the Colorado Department of Early Childhood, Division of Early ~~Care And~~ Learning, Licensing, and Administration the following critical incidents involving a child in the care of the facility or a staff member on duty:

   a. ~~All deaths~~Any fatality including the death of a child, staff member or volunteer as a result of an accident, suicide, assault, Sudden Unexpected Infant Death or any natural cause while at the facility, or while on authorized or unauthorized leave from the facility. This report must be completed in the online injury system within 24 hours of an incident. If a provider is unable to access the online system, you must use the paper form, and submit the form to the State Department within 24 hours of the incident.

   b. An injury to a child ~~or staff member~~ that requires ~~emergency~~ medical attention by a health care professional or admission to a hospital, whether or not treatment was given. This report must be completed in the online injury system within 24 hours of an incident. If a provider is unable to access the online system, you

must use the paper form, and submit the form to the State Department within 24 hours of the incident.

c. A child or staff member with a reportable disease, as defined by the Colorado Department of Public Health and Environment at 6 CCR 1009-1~~:1~~, Appendix A (February 15, 2023~~2019~~), which is hereby incorporated by reference. No later editions or amendments are incorporated. These statutes and regulations are available for public inspection and copying at the Colorado Department of ~~Human Services~~Early Childhood at 710 S. Ash St., Bldg. C, Denver, CO 80246~~1575 Sherman St., 8TH floor, Denver, Colorado 80203~~, during regular business hours. These statutes and regulations are also available at no cost from the Colorado Department of Public Health and Environment at 4300 Cherry Creek Drive South, Denver, Colorado 80246 or at www.sos.state.co.us/ccr. This report must be completed in the online injury system within 24 hours of an incident. If a provider is unable to access the online system, you must use the paper form, and submit the form to the State Department within 24 hours of the incident.

d. Any allegation of physical, sexual, or emotional abuse or neglect to a child that results in a mandatory report to law enforcement or a county department of human or social services agency, or the child abuse reporting hotline as described in section 19-3-304, C.R.S.

e. Any fire that is responded to by a local fire department.

f. Any major threat to the security of a facility including, but not limited to, a threat to kidnap a child, riots, bomb threats, hostage situations, use of a weapon, drive by shootings, active shooter situations, lock downs, or lock out situations.

g. A drug or alcohol related incident involving a staff member or a child that requires outside medical or emergency response.

h. An assault which results in a report to law enforcement, as defined by sections 18-3-201 through 18-3-204, C.R.S., by a child upon a child; a child upon a staff member, volunteer or other adult; a staff member, volunteer, or other adult upon a child, other staff member or other adult.

i. A suicide attempt by a child at the facility which requires emergency intervention.

j. Felony theft or destruction of property by a child at the facility for which law enforcement is notified.

k. Any police or sheriff contact with the facility ~~for a crime committed by a resident while in placement at the facility~~.

l. Any damage to the facility as a result of severe weather, fire, flood, mold or other natural disaster, or damage to the facility by any means that prevents the facility from normal operation.

2~~C~~. Reports Made to the State Department within Ten (10) Working Days.

a~~1~~. Any legal action against a facility, agency, owner, operator, or governing body that relates to or may impact the care or placement of children.

b~~2~~. Change of director of facility or agency; and

c~~3~~. Closure of the facility or agency.~~;~~

~~4. Change of placement supervisor for a child placement agency.~~

~~5. Change in Trails child placement agency (CPA) supervisor or trails public provider profile.~~

3~~D~~. Changes to a License Requiring Written Notification to the State Department and Prior State Department Approval.

a~~1~~. Proposed change in the number, ~~sex,~~ or age of children for whom the facility is licensed that differs from that authorized by the license.

b~~2~~. Changes in the physical facility or use of rooms for child care at a facility.

c~~3~~. Change of name of the facility or agency.

d~~4~~. Change of residents in the facility, not to include those residents placed in the facility by a county department ~~or a child placement agency~~.

~~7.701.55~~2.121 REPORTING OF LICENSING COMPLAINTS

Child care facilities must provide written information to parents or legal guardians at the time of admission and staff members at the time of employment on how to file a complaint concerning suspected licensing violations. For family child care homes, child care centers, preschools, school age child care, children's resident camps, and neighborhood youth organizations, the information must include the complete name, mailing address, and telephone number of the Colorado Department of Early Childhood~~Human Services, Division of Early Care and Learning. For 24-hour care agencies and facilities providing out-of-home care and day treatment centers, the information must include the complete name, mailing address, and telephone number of the Colorado Department of Human Services, Division of Child Welfare~~.

~~7.701.53~~2.122 REPORTING AND INVESTIGATING ~~OF~~ CHILD ABUSE

A. A child care facility must require each staff member of the facility to read and sign a statement clearly defining child abuse and neglect pursuant to state law and outlining the staff member~~''~~s personal responsibility to report all incidents of child abuse or neglect according to state law.

B. Pursuant to section 19-3-304, C.R.S., any caregiver or staff member in a child care facility who has reasonable cause to know or suspect that a child has been subjected to abuse or neglect or who has observed the child being subjected to circumstances or conditions that would reasonably result in abuse or neglect shall immediately upon receiving such information report or cause a report to be made of such fact to the state hotline, county department of human or social services or local law enforcement agency.

C. At the time of admission the facility must give the child~~''~~s parent or guardian information that explains how to report suspected child abuse or child neglect.

~~7.701.54~~D. Investigation of Child Abuse

1~~A~~. Staff members of the county department of human or social services or a law enforcement agency that investigates an allegation of child abuse must be given the right to interview staff and children in care, and to obtain names, addresses, and telephone numbers of parents or legal guardians of children enrolled at the child care facility.

2~~1~~. An agency or facility must not interfere or refuse to cooperate with a child protection investigation.

3~~2~~. An agency or facility must not interview staff or children regarding the specific allegation(s) of child abuse or child neglect until the county department of human or social services and/or local law enforcement agency has had the opportunity to interview all appropriate individuals and completed their investigation.

4~~B~~. Any report made to the law enforcement authorities or a county department of human or social services of an allegation of abuse of any child at the child care facility will result in the temporary suspension or reassignment of duties of the alleged perpetrator to remove the risk of harm to the child/children if there is reasonable cause to believe that the life or health of the victim or other children at the facility is in imminent danger due to continued contact between the alleged perpetrator and the child/children at the facility. Such suspension or reassignment of duties will remain in effect pending the outcome of the investigation by the appropriate authorities.

~~7.701.56~~2.123 POSTING LICENSING INFORMATION

A. At all times during the operating hours of the facility, except for foster care homes, the facility/agency must post the current child care license in a prominent and conspicuous location easily observable by those entering the child care facility ~~or agency~~. ~~For foster care homes, the certificate must be available for review/upon request of the public.~~

B. At all times during the operating hours of a family child care home, child care center, school-age child care center, or children~~''~~s resident camp, the facility must post its most recent licensing inspection report or a notice as to where the report may be reviewed at the facility by the parent or legal guardian of a child or their designee.

C. At all times during the operating hours of a family child care home, child care center, preschool, school-age child care center, children's resident camp And neighborhood youth organization, the facility must post in a prominent and conspicuous location information regarding the procedures for filing a complaint with the Colorado Department of Early Childhood~~Human Services, Division of Early Care and Learning~~, including the telephone number and mailing address. ~~All 24-hour care agencies and facilities providing out-of-home care and day Treatment centers must post in prominent and conspicuous location information regarding the procedures for filing a complaint with the Colorado Department of Human Services, Division of Child Welfare, including the telephone number and mailing address. For foster care homes and child placement agencies, information for filing a complaint must be made available upon request.~~

D. All facilities, except family child care homes must post in every room of the child care facility, excluding bedrooms and living areas, the license capacity of the room and the staff-to-child ratio required by regulation to be maintained for the age of children cared for in the room.

~~7.701.62~~.124 ~~CONFIDENTIALITY OF~~ RECORDS

A. Confidentiality of Records

1. The records concerning the licensing of facilities and agencies are open to the public except as provided below.

2~~B~~. Anyone wishing to review a record must make a written request to the State Department.

3~~C~~. The following documents are confidential and not available for review:

a~~1~~. Information identifying children or their families;

b~~2~~. Scholastic records, health reports, social or psychological reports. These are available only to the person to whom the records pertain or his or her legal guardian;

c~~3~~. Personal references requested by the State Department; and

d~~4~~. Reports and records received from other agencies, including police and child protection investigation reports.

~~7.701.65~~B. Maintenance and Confidentiality of Child~~/Youth~~ Records

1~~A~~. Each licensed child care facility shall maintain records as required by the State Department pertaining to the admission, progress, health, and discharge of children in care at the facility.

a~~1~~. These records shall be made available to the state department upon request.

b~~2~~. These records shall be maintained and stored in a confidential format.

c~~3~~. All information regarding children and their families shall be kept confidential.

~~7.701.7~~C. ~~PARENTAL~~ Accessibility of Records

1~~A~~. During hours of operation, a facility must allow access to parents and guardians having legal custody of a child in care to those areas of the facility that are licensed for child care.

2~~B~~. During the hours of operation, the Facility's most recent licensing, fire department, and health department inspection reports must be accessible to parents and legal guardians of children in care or their designee and to parents and legal guardians considering placing their children in care at the facility.

3~~C~~. A facility does not violate this rule section when it restricts access by a parent, guardian or their designee to a child during an emergency as instructed by local authorities.

~~7.701.8~~D. Perjury ~~STATEMENT -~~

1. Application Forms for Employment with a Child Care Provider

a. Every application used in the state of Colorado for employment with a child care provider or facility, or for the certification of a foster home, must include the following notice to the applicant:

"Any applicant who knowingly or willfully makes a false statement of any material fact or thing in the application is guilty of perjury in the second degree as defined in section 18-8-503, C.R.S., and, upon conviction thereof, shall be punished accordingly."

~~7.701.9~~ GENERAL HEALTH RULES

~~7.701.91~~2.125 SMOKING AND TOBACCO PRODUCTS

Pursuant to sections 26.5-5-314(2)(e)~~26-6-106(2)(e)~~, 25-14-103.5, and 18-13-121, C.R.S., tobacco and nicotine products are prohibited by law from use in and around licensed child care facilities.

A. Smoking and tobacco product use is prohibited at all times while transporting children on field trips and excursions.

B. Smoking and tobacco product use is not prohibited in family child care homes during non-business hours.~~C. Foster parents are exempt from this rule when no children are in placement.~~

~~7.701.100~~2.126 EMERGENCY AND DISASTER PREPAREDNESS FOR CHILD CARE CENTERS, FAMILY CHILD CARE HOMES, SCHOOL-AGE PROGRAMS, AND CHILDREN'S RESIDENT CAMPS

A. Staff Training

1. Prior to caring for children, all staff must complete a State Department-approved training in emergency and disaster preparedness: Evacuation, Shelter in Place, Lockdown, and Active Shooter on Premises Plans for Children in Care. For seasonal children's resident camp programs, operating no more than 90 days per calendar year, at least one on site director must be trained in the State Department approved training~~.~~

~~B. Evacuation, Shelter in Place, Lockdown, and Active Shooter on Premises Plans for Children in Care.~~

2. Each staff member of the facility must be trained in fire safety and the use of available fire extinguishers and fire alarms.

2.127 EVACUATION, SHELTER IN PLACE, LOCKDOWN, AND ACTIVE SHOOTER ON PREMISES PLANS FOR CHILDREN IN CARE

1. All child care providers must have a written plan for: evacuating and safely moving children to an alternate site; lockdown; shelter in place; and an active shooter on premises. The plan must include provisions for multiple types of hazards, such as floods, fires, tornadoes, and active shooter situations. The plan must be updated as changes occur and reviewed annually. All employees of a child care provider must also be annually trained on the provider's written plan prior to caring for children, and retrained as changes occur.

a.~~1~~ "Lockdown drill" means a drill in which the occupants of a building are restricted to the interior of the building and the building is secured.

b~~2~~. "Shelter-in-place drill" means a drill in which the occupants of a building seek shelter in the building from an external threat.

c~~3~~. "Active shooter on premises drill" means a drill to address an individual actively engaged in killing or attempting to kill people in a confined space or other populated area.

2.128~~C.~~ REUNITING FAMILIES AFTER AN EMERGENCY OR DISASTER.

All child care providers must have a written plan for emergency notification of parents and reunification of families following an emergency or disaster.

2.129~~D.~~ CHILDREN WITH DISABILITIES AND THOSE WITH ACCESS AND FUNCTIONAL NEEDS~~.~~

All child care providers must have a written plan that accounts for children with disabilities as defined in 42 U.S.C. Section 12102 and those with access and functional needs as defined in the State Emergency Operations Plan (2019) The (SEOP). The state SEOP is hereby incorporated by reference. No later editions or amendments are incorporated. The state SEOP is available for public inspection and copying at the Colorado Department of ~~Human Services~~Early Childhood at 710 S. Ash St., Bldg. C, Denver, CO 80246~~1575 Sherman St., 8TH floor, Denver, Colorado,~~ during regular business hours. The state SEOP is also available for no cost from the Colorado Division of Homeland Security & Emergency Management at https://www.colorado.gov/pacific/dhsem/state-eop. The plan must include a specific requirement indicating how all children with special needs will be included in the emergency plan.

2.130~~E.~~ CONTINUITY OF OPERATIONS AFTER A DISASTER.

1. All child care providers must have a written plan for continuity of operations in the aftermath of an emergency or disaster. Components of the plan must include:

   a. Responsibility for essential staffing needs and predetermined roles during and after the emergency or disaster;

   b. Procedure for backing up or retrieving staff and children's files; and

   c. Procedure for protecting confidential and financial records.

2. During an emergency or other significant, unexpected event, a child care facility may request an emergency waiver to move to a temporary location or exceed capacity, on a temporary basis, to accept children and families from affected areas.

2.131~~F~~. FIRE, NATURAL DISASTER, AND EMERGENCY DRILLS.

1. Each staff member of the facility must be trained in fire safety and the use of available fire extinguishers and fire alarms.

2. Emergency drills, lockdown and active shooter on premises drills must be held at least quarterly but often enough so that all occupants are familiar with the drill procedure and their conduct during a drill is a matter of established routine. Fire drills must be held monthly and be consistent with local fire department procedures. Tornado drills must be held monthly from March to October. A record of all emergency drills held over the past twelve (12) months must be maintained by the facility or center, including date and time of drill, number of adults and children participating, and the amount of time taken to evacuate.

3. Drills must be held at unexpected times and under varying conditions to simulate the conditions of an actual fire or other emergency event.

4. Drills must emphasize orderly evacuation under proper discipline rather than speed. No running should be permitted.

5. Drills must include suitable procedures for ensuring that all persons in the building, or all persons subject to the drill~~, actually~~ participate.

6. Fire alarm equipment must be used regularly in the conduct of fire exit drills. Hand bells or other alarm emanating devices may be used in lieu of fire alarm equipment if use of

fire alarm equipment is not feasible including, but not limited to, facilities operating in buildings where multiple unrelated tenants share a common fire alarm system.

7. If appropriate to the location of the facility, forest fire, and/or flood drills must be held often enough that all occupants are familiar with the drill procedure and their conduct during a drill is a matter of established routine. A record of drills held over the past twelve (12) months must be maintained by the facility.

8. For children's resident camps~~,~~ and school age day camps, at least one fire drill must be held within twenty-four (24) hours of the commencement of each camp session. The dates of the fire drills must be recorded in the camp office.

9. There must be a carbon monoxide detector installed in the area of the child care facility as recommended by the manufacturer and in the area where children ~~and youth~~ sleep.

~~**7.701.200 THE REASONABLE AND PRUDENT PARENT STANDARD REQUIREMENTS FOR FACILITIES PROVIDING TWENTY-FOUR (24) HOUR OUT-OF-HOME CARE TO APPROVE ACTIVITIES FOR A CHILD OR YOUTH IN FOSTER CARE**~~

~~**Children and youth in foster care are entitled to participate in age or developmentally appropriate extracurricular, enrichment, cultural, and social activities as part of their well-being needs.**~~

~~**Providers must use a "reasonable and prudent parent standard" when determining whether to allow a child or youth in foster care, under the responsibility of the county or in non-secure residential settings under the Division of Youth Services (DYS), to participate in such activities following the criteria in both A. and B. below:**~~

~~**A. For an activity to be approved consistent with the reasonable and prudent parent standard, the activity must:**~~

~~**1. Maintain the health, safety, and best interests of each child or youth;**~~

~~**2. Encourage his/her emotional and developmental growth;**~~

~~**3. Be age or developmentally appropriate; and,**~~

~~**4. Be otherwise appropriate for the provider to approve.**~~

~~**B. When applying the reasonable and prudent parent standard and prior to approval of the activity, the provider must take reasonable steps to obtain or determine:**~~

~~**1. Adequate information about the child or youth, including the youth's particular religious, cultural, social, or behavioral attributes and preferences;**~~

~~**2. Behavioral and/or mental health stability of the child or youth;**~~

~~**3. The age or developmental appropriateness of the activity; and,**~~

~~**4. Whether the risk of reasonably foreseeable harm involved in the activity is at an acceptable level.**~~

~~**C. The county department of human or social services or licensed child placement agency responsible for the placement of the child/youth into care must complete the same state training in applying the reasonable and prudent parent standard.**~~

~~D. At least one (1) trained staff or administrator in a specialized group facility or Residential Child Care Facility (RCCF) must be designated as authorized to apply the reasonable and prudent parent standard to decisions involving the participation of a child or youth in extracurricular, enrichment, cultural, or social activities.~~

~~E. The rationale used to authorize an activity for a child or youth must be clearly documented in the facility records and provided in a timely manner to the county department of human or social services or DYS using the approved written reporting format.~~

~~1. The facility must consult with and obtain a current copy of the policy from the responsible county department of human or social services or DYS regarding activities that are considered appropriate for the facility to approve.~~

~~The responsible county department of human or social services or DYS may restrict certain activities based upon the documented exceptional needs and circumstances of a child or youth in foster care, which impact his/her unique safety needs.~~

~~2. The wishes of the parents/legal custodian must be considered, including cultural implications, whenever practical.~~

~~3. The facility may consult with the responsible agency for guidance about individual cases.~~

~~F. Providers must not incur liability to the State Department or to the county department of human or social services because of an extracurricular, enrichment, cultural, or social activity approved by the provider if the provider demonstrates compliance with the reasonable and prudent parent standard. In a child welfare investigation arising out of such an activity approved by the provider, the facility must not be founded for institutional neglect if the provider demonstrates compliance with the reasonable and prudent parent standard.~~

~~7.701.300 CULTURAL RESPONSIVENESS FOR RESIDENTIAL CHILD CARE FACILITIES, SPECIALIZED GROUP FACILITIES, HOMELESS YOUTH SHELTERS, CHILD PLACEMENT AGENCIES, DAY TREATMENT CENTERS, FOSTER CARE HOMES, AND SECURE RESIDENTIAL TREATMENT CENTERS.~~

~~A. All policies and procedures must reflect culturally responsive operations and a specific policy must be developed to ensure that the provider will implement and practice culturally responsive programming.~~

~~B. All staff members, interns, and foster parents must complete four (4) hours of initial training in cultural responsiveness and two (2) hours annually thereafter. Volunteers that work directly with youth two (2) or more times in a twelve (12) month period must complete four (4) hours of initial training in cultural responsiveness and two (2) hours annually thereafter. Members of governing body must complete two (2) hours of annual training in cultural responsiveness. Members of the board of directors must be given training in the agency's or facility's cultural responsiveness policies and procedures at the time they are appointed to the board of directors.~~

~~C. Assessments of youth and families must identify cultural factors and services must be responsive to the unique cultural needs of youth and families, as identified in the assessments.~~

~~7.701.400 TRAUMA-INFORMED CARE FOR RESIDENTIAL CHILD CARE FACILITIES, SPECIALIZED GROUP FACILITIES, HOMELESS YOUTH SHELTERS, CHILD PLACEMENT AGENCIES, DAY TREATMENT CENTERS, FOSTER CARE HOMES, AND SECURE RESIDENTIAL TREATMENT CENTERS.~~

A. All policies and procedures must be trauma-informed and a specific policy must be developed to ensure that the provider will implement and practice trauma-informed care and services.

B. All staff members, interns, and foster parents must complete four (4) hours of initial training in trauma-informed care and two (2) hours annually thereafter. Volunteers that work directly with youth two (2) or more times in a twelve (12) month period must complete four (4) hours of initial training in trauma-informed care and two (2) hours annually thereafter. Members of the governing body must complete two (2) hours of annual training in trauma-informed care. Members of the board of directors must be given training in the agency's or facility's trauma-informed care policies and procedures at the time they are appointed to the board of directors.

C. Assessments of youth and families must screen for a history of traumatic experiences and associated needs and services must be responsive to the needs of youth and families, as identified in the assessments.

701.500 TRAILS DATA ENTRY FOR RESIDENTIAL CHILD CARE FACILITIES, HOMELESS YOUTH SHELTERS, CHILD PLACEMENT AGENCIES, DAY TREATMENT CENTERS, AND SECURE RESIDENTIAL TREATMENT CENTERS.

A. Each facility or agency must apply to the State Department for permission to access the Trails system, to complete all functions assigned to their facility type.

1. Each facility or agency must have at least two (2) employees assigned to access the Trails system to enter critical incident reports as listed at 7.701.52.

2. Child placement agencies must have at least two (2) employees assigned to access the Trails system to enter original and renewal foster care certificates

3. Child placement agencies must have one (1) employee assigned to access the Trails system to review any child abuse and neglect history for foster care applicants, adoptive applicants, and other adults residing in the homes

B. The child placement employee who accesses the Trails system to review any child abuse and neglect history cannot also access the Trails system for critical incident reporting or entering foster care certificates

C. Each facility or agency must submit to the State Department the prescribed form to delete access for persons who are no longer employed or for employees whose access to Trails has been restricted by their employer or by the State Department.

7.702 RULES REGULATING CHILD CARE CENTERS THAT PROVIDE LESS THAN 24-HOUR CARE

2.200 AUTHORITY

These rules and regulations are adopted pursuant to the rulemaking authority provided in section 26.5-1-105(1), C.R.S., and are intended to be consistent with the requirements of the State Administrative Procedures Act, sections 24-4-101 *et seq*. (the "APA"), C.R.S., the Anna Jo Garcia Haynes Early Childhood Act, sections 26.5-1-101 *et seq*. (the "Early Childhood Act"), C.R.S., the Child Care Licensing Act, sections 26.5-5-301, *et seq*., C.R.S.; and the Child Care Development and Block Grant Act of 2014, 42 U.S.C. sec. 9858e, and section 26.5-4-110(3), C.R.S.

The specific rulemaking authorities granted for child care centers include sections XXX, C.R.S.

2.201 SCOPE AND PURPOSE

The Colorado Department of Early Childhood, Division of Early Learning, Licensing, and Administration is responsible for the administration of health and safety rules and requirements for licensed child care facilities. These rules and regulations shall govern the processes and procedures to become a licensed child care center program in Colorado. All child care centers must comply with the ~~current~~ "General Rules for Child Care Facilities" in rule section 2.100~~7.701~~; "Rules Regulating Child Care Centers that Provide Less than 24-hour Care" in rule section 2.200~~7.702~~; and "Rules Regulating Special Activities" in rule section 2.600~~7.719.;" 6 CCR 1010-7, "The Health and Sanitation Rules and Regulations Governing the Sanitation of Child Care Facilities in the State of Colorado C.R.S.; and the USDA CACFP Part 266.20(1.5).~~

Drop-in, part day, mobile preschool, teen parent, and other programs operated by public school districts must be in compliance with all rules found in this rule section. Additional rules or substitutions to rules can be found under rule sections 2.238, 2.239, 2.240, 2.241, and 2.242 ~~7.702.100~~.

2.202 APPLICABILITY

The provisions of these rules and regulations shall be applicable to licensed child care centers caring for five (5) or more children with or without compensation.

~~Hardship waivers~~

~~Any applicant or licensee who has applied for or been issued a license to operate a childcare facility has a right to appeal, pursuant to § 26-6-106(3), C.R.S., any rule or standard which, in his or her opinion, poses an undue hardship on the person, facility, or community. An "undue hardship" is defined as a situation where compliance with the rule creates a substantial, unnecessary burden on the applicant or licensee's business operation or the families or community it serves, which reasonable means cannot remedy. An undue hardship does not include the normal cost of operating the business.~~

2.203~~7.702.1~~ DEFINITIONS

A. Child care centers that provide less than 24-hour care (referred to as "centers") provide comprehensive care for children when the parents or guardians are employed or otherwise unavailable to care for the children. Child care centers may operate twenty-four (24) hours a day, but the children are cared for at the center fewer than twenty-four (24) hours a day.

B. Child care centers that provide less than 24-hour programs of care include the following types of facilities:

1. A "large child care center" provides care for sixteen (16) or more children between the ages six (6) weeks and eighteen (18) years.

2. A "small child care center" provides care for up to fifteen (15) children between the ages of two (2) and eighteen (18) years.

3. An "infant program" provides care for children between the ages of six (6) weeks and eighteen (18) months.

4. A "toddler program" provides care for children between the ages of twelve (12) months (when walking independently or with a health care provider's statement indicating developmental appropriateness of placement in a toddler program) and thirty-six (36) months.

5. A "preschool" is a child care program for five (5) or more children between the ages of two and one-half (2 1/2) and seven (7) years.

6. A "mobile part-day preschool program" is a program with a mobile classroom that uses no permanent building on a regular basis, for children three (3) to seven (7) years of age, with no more than (8) eight children at any given time. Each class session must not exceed five (5) hours.

7. A "kindergarten program" provides a program for children the year before they enter the first grade. Only private kindergarten programs not regulated by the Colorado Department of Education are required to be licensed.

8. A "full day program" enrolls children for five (5) or more hours per day.

9. A "part-day program" enrolls children for a maximum of up to five (5) hours per day. Individual children shall not attend more than one (1), five (5) hour sessions per day.

10. A "drop-in child care center" provides occasional care for forty (40) or fewer children between the ages of twelve (12) months and thirteen (13) years of age for short periods of time not to exceed six (6) hours in any 24-hour period of time or fifteen (15) hours in any seven (7) day period of time.

11. A "teen parent program" provides care for children fourteen (14) days old to thirty-six (36) months and is operated by an accredited public school system on school premises. Infants between seven (7) and thirteen (13) days old may be accepted for care with written approval from a health care provider.

12. "Staff" and all references to staff or staff positions include paid staff, equally qualified volunteers, and substitutes under rule section 8.215~~7.702.45~~.

C. Licensed child care centers enrolling children five (5) years of age or younger are required to participate in Colorado Shines, the state quality rating and improvement system.

8.204~~7.702.2~~ ADMINISTRATION

Child care centers shall adhere to the requirements of this rule section and the ~~(See also~~ "Administration" ~~at~~ sections in rule sections 8.117, 8.118, 8.119, 8.120, 8.121, and 8.122~~7.701.5,~~ of the "General Rules for Child Care Facilities."~~)~~

A. The governing body must appoint a director who will be responsible to the governing body and who will be delegated the authority and responsibility for the operation of the center according to its defined purpose and policies.

B. The governing body must formulate the purpose and policies to be followed by the center. It must have a regular planned review of such purpose and policies to determine that the center is in compliance with licensing rules.

C. The governing body is responsible for providing necessary facilities, adequate financing, qualified personnel, services, and program functions for the safety and well-being of children in accordance with these rules.

D. Any center having a director assigned to a classroom must have qualified and adequate staff, allowing the director or qualified staff the ability to attend to the duties of a director as they arise.

E. The director of the center is responsible for administering the center in accordance with licensing rules. The director must plan and supervise the child development program, plan for or participate in selection of staff, plan for orientation and staff development, supervise and coordinate staff activities, evaluate staff performance, and participate in the program activities.

~~7.702.3~~ POLICIES AND PROCEDURES

2.205~~7.702.31~~ STATEMENT OF POLICIES AND PROCEDURES

A. At the time of enrollment, and upon amendments to policies and procedures, the center must give the parent(s)/guardian(s) the center's policies and procedures and provide the opportunity to ask questions. Written copies must be available either electronically or in hard copy. The center must obtain a signed document stating that the parent(s)/guardian(s) have received the policies and procedures, and by signing the policies and procedures document, the parent(s)/guardian(s) agree to follow, accept the conditions of, and give authorization and approval for the activities described in the policies and procedures.

B. The written policies and procedures must be developed, implemented, and followed, and must include at a minimum the following information:

1. The center's purpose and its philosophy on child care;

2. The ages of children accepted;

3. The hours the center is open, specific hours during which special programs are offered, and holidays when the center is closed;

4. The procedure regarding inclement and excessively hot weather;

5. The procedure concerning admission and registration of children including whether non-immunized or under immunized children are enrolled in the program;

6. An itemized fee schedule;

7. The procedure for identifying where children are at all times including times of transition;

8. The center's procedure on positive guidance, behavior expectations, positive instruction, supporting positive behaviors, as well as strategies and techniques for supporting children with challenging behaviors, including how the center will:

   a. Promote responsive and positive child, staff, and family relationships and interactions;

   b. Create and maintain a program-wide culture that promotes children's mental health, social, and emotional well-being;

   c. Implement teaching strategies supporting positive behavior, pro-social peer interaction, and overall social and emotional competence in young children; and,

   d. Provide individualized social and emotional intervention supports for children who need them, including methods for understanding child behavior; and developing, adopting, and implementing a team-based positive behavior support plan with the intent to reduce challenging behavior and prevent suspensions and expulsions.

9. How decisions are made and what steps are taken prior to the suspension, expulsion, or request to parents or guardians to withdraw a child from care due to concerns about the child's behavioral issues. These procedures must be consistent with the center's policy on guidance and positive instruction, and include documentation of the steps taken to understand and respond to challenging behavior including:

a. Identify and consult with an early childhood mental health consultant or other specialist as needed.

10. The procedure, including notification of parent(s)/guardian(s), for handling children's illnesses, accidents, and injuries;

11. The procedures for emergencies and disaster preparedness such as but not limited to lost children, tornadoes, fires, shelter in place, lockdown, active shooter on premises, reunification with families after emergency or disaster, and evacuating children with disabilities as specified in rule section 2.131~~7.701.100~~, of the "General Rules for Child Care Facilities";

12. The procedure for transporting children, if applicable, including transportation arrangements and parental permission for excursions and related activities;

13. The procedure for governing field trips, television and video viewing, and special activities, including staff responsibility for the supervision of children;

14. Media and internet usage policy outlining screen and media use related to their curriculum. The media plan must have information on ongoing communication with children about online safe practices for children over the age of five (5);

15. The procedure on children's safety related to riding in a vehicle, seating, supervision, and emergency procedures on the road;

16. The procedure for releasing children from the center only to persons for whom the center has written authorization and the procedure for picking-up the child during an emergency;

17. The procedures followed when a child is picked up from the center after the center is closed or not picked up at all, and to ensure that all children are picked up before the staff leave for the day;

18. The procedure for caring for children who arrive late to the center and their class/group is away from the center on a field trip or excursion;

19. The procedure for storing and administering children's medication and delegation of medication administration in compliance with section 12-255-101~~§12-38-132~~, *et. seq.*, C.R.S., of the "Nurse and Nurse Aide Practice Act";

20. The procedure concerning children's personal belongings and money;

21. The provision of meals and snacks;

22. The procedure for diapering, toilet training, and toileting;

23. The procedure for allowing visitors to the center;

24. The procedure for conducting parent and staff conferences to partner with the parents(s)/guardian(s) to discuss the child's progress, social, emotional, and physical needs;

25. The procedure for filing a complaint about child care, including the name, address and telephone number of the Colorado Department of Early Childhood (see rule section 2.121~~7.701.55~~ of the General Rules for Child Care Facilities);

26. The procedure for reporting of child abuse, including the name of the county department of social/ human services and phone number of where a child abuse report should be made (see rule section 2.122 7.701.53, of the General Rules for Child Care Facilities);

27. The procedure of the protection of infants from secondhand and thirdhand smoke;

28. The procedure for establishing safe sleep environments for infants including how staff will supervise and physically check on infants who are sleeping;

29. The procedure for dressing children appropriately for the weather; and,

30. Notification when child care service is withdrawn and when parent(s)/guardian(s) withdraw their children from the center.

C. Policies and procedures must be reviewed annually. Any changes must be incorporated and must be communicated to the parent(s)/guardian(s).

2.206 7.702.32 COMMUNICATION, EMERGENCY, AND SECURITY PROCEDURES

A. For security purposes, a sign-in/sign-out sheet or other mechanism for parents/guardians, or staff if children are being transported, must be maintained daily by the center. It must include, for each child in care, the date, the child's name, the time when the child arrived at and left the center, and the parent /guardian or staff member's signature or other unique identifier. For children who are transported, parent(s)/guardian(s) must verify the accuracy of the sign-in/sign-out sheet at least weekly.

B. The center must have a working telephone with the number available to the public. Emergency telephone numbers of the following must be posted near the telephone: a 911 notice, where 911 is available, or rescue unit if 911 isn't available; a hospital or emergency medical clinic; the local fire, police, and health departments; and Rocky Mountain Poison Control. The telephone must be available to staff at all times that the center is in operation.

C. The center must be able to provide emergency transportation to a health care facility at all times.

D. The director of the center, or the director's delegated substitute, must have a means for determining at all times who is present at the center.

E. A written policy regarding visitors to the center must be posted and a record maintained daily by the center that includes at a minimum the date, time, visitor's name, and the purpose of the visit. At least one (1) piece of identification must be inspected for individuals who are unknown to personnel at the center.

F. The center must release the child only to an individual over the age of sixteen (16) for whom written authorization has been given by the parent(s)/guardian(s) and is maintained in the child's record (see rule section 2.208 7.702.34). In an emergency, the child may also be released to an individual for whom the child's parent/guardian has given verbal authorization. If the staff member who releases the child does not know the individual, identification must be required to assure that the individual is authorized to pick up the child.

G. The center must have a procedure for dealing with individuals not authorized by the parent or guardian of a child who attempts to have the child released to them.

H. The center must have a written procedure for closing the center at the end of the day to ensure that all children are picked up.

2.207~~7.702.33~~ ADMINISTRATIVE RECORDS AND REPORTS

A. The following records must be on file at the center:

1. Records of enrollment, daily attendance for each child, and daily record of the time the child arrives at and departs from the center;

2. A list of current staff members, substitutes, and staffing patterns;

3. Copies of menus; and

4. A record of visitors to the center.

B. The center must submit to the Department as soon as possible, but not longer than twenty-four (24) hours, a written report about any child who has been separated from the group outside of the supervision of their assigned staff member or for whom the local authorities have been contacted. Such report must indicate:

1. The name, birth date, address, and telephone number of the child;

2. The names of the parent(s)/guardian(s) and their address and telephone number if different from those of the child;

3. The date when the child was lost;

4. The location, time, and circumstances when the child was separated from the group outside of their assigned child care provider~~last seen~~;

5. All actions taken to locate the child, including whether local authorities were notified; and~~,~~

6. The name of the staff person supervising the child.

C. All programs must register their operational status information in the Department's ~~Office of Early Childhood~~ provider status portal every calendar year ~~in the months of~~between April and October.

1. All programs must update their information any time their operational status changes during a declared state emergency.

D. All prospective and current staff members in the following roles must register with the Colorado Shines Professional Development Information System:

1. Large Center Director;

2. Large Center Assistant Director;

3. Small Center Director;

4. Early Childhood Teacher;

5. Infant Program Supervisor;

6. Infant Early Childhood Teacher;

7. Toddler Early Childhood Teacher;

8. Kindergarten Teacher;

9. Assistant Early Childhood Teacher; and~~,~~

10. Staff Aide.

2.208~~7.702.34~~ CHILDREN'S RECORDS

A. An admission record must be completed for each child prior to or at the time of the child's admission. This record must be updated annually and when changes occur. The admission record must include:

1. The child's full name, birth date, current address, and date of enrollment;

2. Parent(s)/guardian(s) names; home and e-mail addresses; telephone numbers, including home, work, and cell numbers; employer name and work address; and, any special instructions as to how the parent(s)/guardian(s) may be reached during the hours that the child is in care at the center;

3. Names, addresses, and telephone numbers of persons authorized to pick up the child from the center;

4. Names, addresses, and telephone numbers of persons who can assume responsibility for the child in the event of an emergency if the parent(s)/guardian(s) cannot be reached immediately;

5. Name, address, and telephone numbers of the child's health care provider, dentist, and if applicable, their hospital of choice;

6. A health history, including any health care plans, which indicates communicable diseases and chronic illnesses or injuries the individual has had, any known drug reactions and allergies, medications being taken, any necessary health procedures or special diets, and immunization record;

7. A dated, written authorization for emergency medical care signed and updated annually by the parent(s)/guardian(s). The authorization must be notarized if required by the local hospital, clinic, or emergency health care facility;

8. Written authorization, obtained in advance of the event from a parent/guardian, for a child to participate in field trips or special activities, whether scheduled or unscheduled, whether walking or riding in an approved vehicle; and~~,~~

9. Written authorization from a parent/guardian for media release.

B. The center must maintain and update annually and upon changes, a record on each child that includes:

1. A written record of any serious accident, illness, or injury occurring during care must be retained in each child's record, with a copy provided to the parent(s)/guardian(s).

2. Observations of the child's development to document the child's progress and challenges to be discussed at parent conferences;

3. A record of parent conferences, including dates of conferences, and names of center staff and parent(s)/guardian(s) involved; and~~,~~

4. A copy of the child's health statement completed by a health care provider.

2.209~~7.702.35~~ STAFF RECORDS

A. A record must be maintained, either written or electronic, for each staff member that includes the following:

1. Name, address, telephone number, and birth date of the individual;

2. Verification of qualifications and training;

3. Immunization record or statement, and health history;

4. Dates of employment and employment history;

5. Names, addresses, and telephone numbers of persons to be notified in the event of an emergency; and,

6. All information from background checks as required in the "General Rules for Child Care Facilities" ~~at~~ rule sections 2.116 and 2.117~~7.701.32~~.

2.210~~7.702.36~~ CONFIDENTIALITY AND RETENTION

A. The confidentiality of all staff and children's records must be maintained. See rule section 2.124~~7.701.6~~, of the "General Rules for Child Care Facilities."

B. Staff and children's records must be available, upon request, to authorized personnel of the Department.

C. If records for organizations having more than one (1) center are kept in a central file, duplicate identifying and emergency information for both staff and children must also be kept on file at the center attended by the child and where the staff member is assigned.

D. The records of children and staff must be maintained by the center for at least three (3) years after the last date of attendance or employment with the program.

E. The health and mental health consultation records must be maintained by the center for at least three (3) years from the date of consultation.

F. Records of enrollment, daily attendance for each child and daily records of the time the child arrives at and departs from the center for the past twelve (12) months must be on file at the center. The previous two (2) years must be on file at either the center or a central location or storage.

G. Posting of any personal information or photos of children on social media or advertisement without written parental consent is prohibited.

~~7.702.4 STAFF~~

2.211~~7.702.41~~ GENERAL REQUIREMENTS FOR ALL STAFF

A. All staff at the center must demonstrate knowledgeable decision-making, judgment, and concern for the proper care and well-being of children.

B. Staff must not consume or be under the influence of any substance that impairs their ability to care for children.

C. Illegal drugs and drug paraphernalia, must never be present on the premises of the center.

D. Staff must not use marijuana and marijuana infused products, tobacco products of any kind, or alcohol in the presence of children. To prevent exposure to secondhand smoke, child care centers must prohibit the use of tobacco and marijuana products on all center property, both indoors and outdoors. All marijuana and marijuana infused products, vaping and tobacco products, and alcohol must be kept inaccessible to children at all times.

E. When caring for children, staff must refrain from the personal use of electronics including, but not limited to, cell phones and portable electronic devices.

F. Staff members must be current for all immunizations routinely recommended for adults by their health care provider.

G. All staff members must submit to the center a medical statement, signed and dated by a physician or other health care provider, verifying that they are in good mental, physical, and emotional health appropriate for the position for which they have been hired. This statement must be dated no more than six (6) months prior to employment or within thirty (30) calendar days after the first date of employment. Subsequent self-reported health histories must be submitted annually.

H. The duties and responsibilities of each staff position and the lines of authority and responsibility within the center must be in writing.

I. At the time of employment, staff members must be informed of their duties and assigned a supervisor.

J. Prior to working with children, each staff member must read and be instructed about all policies and procedures of the center. Staff members must sign a statement indicating that they have read and understand the center's policies and procedures.

K. Within thirty (30) calendar days of employment at the center, each staff member must read and be instructed about all licensing rules governing child care centers. Staff members must sign a statement indicating that they have read and understand the licensing rules.

L. If volunteers are used by the center, there must be a clearly established policy regarding their function, orientation, and supervision. Also see ~~also~~ rule section 2.215~~7.702.44 A-E~~.

M. Within thirty (30) calendar days of the last day of employment, staff members must be provided a letter verifying their experience at the center. The letter must contain the center’s address, phone number, and license number; the employee’s start date and end date; and the total number of hours worked with children. Hours worked with infants and toddlers must be documented separately from hours worked with other age groups. The letter must be signed by a director, owner, or human resources agent of the center or governing body.

N. Prior to working with children, each staff member must read and be trained on the center’s policies and procedures for the administration of medications. Staff members must sign a statement indicating that they have read and have been trained on the center's administration of medications policies and procedures.

2.212~~7.702.42~~ TRAINING

A. All staff must complete a pre-service building and physical premises safety training prior to working with children. The training must include identification of and protection from hazards that can cause bodily injury such as electrical hazards, bodies of water, vehicular traffic handling and storage of hazardous materials and the appropriate disposal of biological contaminants.

1. This training is developed and facilitated by the program for staff to identify program specific environmental hazards. Staff must be retrained if there are changes to the building and physical premises.

B. All staff must complete a Department-approved standard precautions training that meets current Occupational Safety and Health Administration (OSHA) requirements prior to working with children. This training must be renewed annually and will be counted towards ongoing professional development.

C. Staff working with infants less than twelve (12) months old must complete a Department-approved safe sleep training prior to working with infants less than twelve (12) months old. This training must be renewed annually and will be counted towards ongoing professional development.

D. Staff working with children less than three (3) years of age must complete a Department-approved prevention of shaken baby/abusive head trauma training prior to working with children less than three (3) years of age. This training must be renewed every two (2) years and will be counted towards ongoing professional development.

E. For every thirty (30) or fewer children in attendance, there must be at least one (1) staff member on duty who holds a current Department-approved first aid and safety certificate. ~~(~~including cardiopulmonary resuscitation (CPR) for all ages of children~~,)~~ and is responsible for administering First Aid and CPR to children. Such individuals must be with the children at all times when the center is in operation. If children are at different locations, there must be a First Aid and CPR qualified staff member at each location.

F. Within thirty (30) calendar days of employment, all employees caring for children, not required by rule to be certified in First Aid and CPR, must complete the Department-approved Introduction to First Aid and CPR module. The module must be renewed every two (2) years.

G. Within thirty (30) calendar days of employment, all employees and regular volunteers must be trained using a Department-approved training about child abuse prevention, which includes common symptoms and signs of child abuse, how to report, where to report, and when to report suspected or known child abuse or neglect. This training must be renewed annually.

H. Within ninety (90) calendar days of employment, all staff required to register with the Colorado Shines Professional Development Information System (listed in rule section 2.207(D)~~7.702.33, d~~) must complete the Department-approved training course: Introduction to the Early Intervention and Preschool Special Education Programs. This course is required once and will be counted towards ongoing professional development.

I. Within ninety (90) calendar days of employment, all staff required to register with the Colorado Shines Professional Development Information System (listed in rule section 2.207(D)~~7.702.33, d~~) must complete the Department-approved Recognizing the Impact of Bias on Early Childhood Professionals training or other Department-approved training on implicit bias. This course is required once and will be counted towards ongoing professional development.

J. Within ninety (90) calendar days of employment, all directors and assistant directors must complete the Department-approved training: Working with an Early Childhood Mental Health

Consultant. This course is required once and will be counted towards ongoing professional development.

K. Within ninety (90) calendar days of employment, all directors and assistant directors must complete the Department-approved training: Introduction to Child Care Health Consultation. This course is required once and will be counted towards ongoing professional development.

L. All staff must have at least one (1) hour of child development training within ninety (90) days of employment. This training must include the major domains (cognitive, social, emotional, physical development and approaches to learning). This training is required once and will count toward ongoing training requirements if taken after the date of hire.

M~~L~~. All staff who work with children must complete a minimum of fifteen (15) clock hours of ongoing professional development each year, beginning with the start date of the employee. At least three (3) clock hours per year must be in the focus of social-emotional development.

1. Ongoing professional development courses must demonstrate a direct connection to one (1) or more of the following competency areas:

   a. Child growth and development, and learning

   b. Child observation and assessment;

   c. Family and community partnerships;

   d. Social-emotional health and development promotion;

   e. Health, safety and nutrition;

   f. Professional practice; or

   g. Teaching practices.

2. Each one (1) semester credit hour course with a direct connection to the competency area listed in rule section 2.212(M)~~7.702.42, L, 1, a-h~~, taken at an accredited college or university shall count as fifteen (15) clock hours of ongoing professional development.

3. Training hours completed can only be counted during the year taken and cannot be carried over.

4. To be counted for ongoing professional development, the training certificate must have documentation that includes:

   a. The title of the training;

   b. The competency domain or from a nationally approved vendor list;

   c. The date and clock hours of the training;

   d. The name or signature of the trainer, or other approved method of verifying the identity of trainer or entity;

   e. Expiration of training, if applicable; and~~,~~

   f. Connection to social emotional focus, if applicable.

5. The trainer must have documentation of the qualifications for each topic of training conducted, which must be available for review by the Department.

N~~M~~. Within thirty (30) calendar days of employment and annually, all staff responsible for the collection, review, and maintenance of the child immunizations records must complete the Colorado Department of Public Health and Environment immunization course.

2.213~~7.702.43~~ DIRECTOR QUALIFICATIONS - LARGE CHILD CARE CENTER

A. Large center directors must have a current director qualifications letter issued by the Department or a current early childhood professional credential level III or higher in version 3.0 as determined by the Department prior to working as the director of a large center.

B. The educational requirements for the director of a large center must be met by satisfactory completion of one (1) of the following. (All course hours are given in semester credit hours, but equivalent quarter credit hours are acceptable.) Official college transcripts must be submitted to the Department for evaluation of qualifications.

1. A Bachelor's, Master's, or Doctorate degree from an accredited college or university in one (1) of the following:

   a. Child Development;

   b. Child Psychology;

   c. Early Childhood Education;

   d. Early Childhood Special Education;

   e. Educational Leadership and Administration;

   f. Elementary Education;

   g. Family and Human Development;

   h. Family Studies; ~~or,~~

   i. Special Education; or~~,~~

2. Completion of all of the following three (3) semester credit hour courses from an accredited college or university in each of the following subject or content areas:

   a. Introduction to Early Childhood Professions;

   b. Introduction to Early Childhood Techniques;

   c. Guidance Strategies for Young Children or has been issued the Colorado Pyramid Model Training certificate of completion;

   d. Health, Nutrition, and Safety;

   e. Administration of Early Childhood Care and Education Programs;

   f. Administration: Human Relations for Early Childhood Professions or Introduction to Business;

g. Curriculum Development: Methods and Techniques;

h. Child Growth and Development;

i. The Exceptional Child; and~~,~~

j. Infant/Toddler Theory and Practice or have been issued the Expanding Quality Infant/Toddler Training certificate of completion; or~~,~~

3. Completion of a course of training approved by the Department that includes course content listed at rule section 2.213(B)(1)~~7.702.43, B, 1;~~, and experience listed at rule section 2.213(C)~~7.702.43, C~~.

C. The experience requirements for the director of a large center must include direct work with young children ~~and families~~ within an early care and education setting and is based on the completion of the following amount of verified work experience in the care and supervision of four (4) or more children less than eight (8) years of age who are not related to the individual:

1. Persons with a Bachelor's, Master's, or Doctorate degree with a major emphasis as listed in rule section 2.213(B)(1)~~7.702.43, B, 1~~, or individuals with an early childhood professional credential level III version 3.0 as determined by the Department; no additional experience is required.

2. Persons with an Associate's degree in early childhood education or child development must have three (3) months (455 hours) of verified experience.

3. Persons with a Bachelor's degree and have completed the thirty (30) semester credit hours specified in rule section 2.213(B)(2)~~7.702.43, B, 2~~, must have three (3) months (455 hours) of verified experience.

4. Persons who have no degree but have completed the thirty (30) semester credit hours specified in rule section 2.213(B)(2)~~7.702.43, B, 2~~, must have six (6) months (910 hours) of verified experience.

5. Additional requirements for verified experience include:

a. Verified experience acquired in a school-age child care center may count for up to half of the required experience for director qualifications. The other half of the required experience must be working directly with children in a child development program; and,

b. For family child care home experience to be considered, the applicant must be, or have been, the licensee in the state of Colorado.

D. Renewal of Large Center Director Qualifications Letter

1. All individuals who were previously qualified as a large center director by the Department, who have not completed the required courses in each of the following subject or content areas, must take one (1) course every two (2) years from an accredited college or university, with all courses completed by February 1, 2022, or be in compliance with a current transitory director qualification letter. Official transcripts listing completion of one (1) or more of the five (5) courses shall be submitted to the Department within thirty (30) calendar days of completing each course until all five (5) courses have been completed in:

a. Guidance Strategies for Young Children or has been issued a Colorado Pyramid Model Training certificate of completion;

b. Health, Nutrition and Safety or Child Nutrition;

c. The Exceptional Child;

d. Infant/Toddler Theory and Practice or have been issued the Expanding Quality in Infant and Toddler Care Training certificate of completion; and~~,~~

e. Administration: Human Relations for Early Childhood Professions or Introduction to Business.

2. Except for individuals holding an early childhood professional credential level III version 3.0 as determined by the Department, directors meeting all large center director requirements in rule section 2.213(B)~~7.702.43, B~~, in centers operating more than six (6) hours a day must complete a three (3) semester credit hour course from an accredited college or university every five (5) years in a subject related to the operation of a center and must be able to demonstrate the relationship of the course taken to the operation of the center.

3. The renewal application and the official transcripts must be submitted to the Department. The renewed director letter shall expire five (5) years from approval of the renewal application.

4. Director letters must be renewed prior to the expiration date or the letter becomes invalid and the individual no longer qualifies as a director of a large center.

E. Revocation of Large Center Director Letter

1. Persons may be denied an original or renewal of a director letter; a director letter may be revoked if substantial evidence has been found that the applicant or director is responsible for one or more of the following at any child care facility, including, but not limited to:

a. Committing fraud;

b. Responsible for egregious or repetitive grounds for negative licensing actions;

c. Providing false information;

d. Providing false transcripts for self or staff; or~~,~~

e. Providing false letters of experience for self or staff.

2. Persons who have had a director Letter revoked or denied for the reasons listed in rule section 2.213(E)(1)~~7.702.43, E, 1, a-e~~, may submit a new application for consideration after a period of two (2) years from the date of denial or revocation.

3. A person issued a new director letter after a denial or revocation shall receive a provisional letter for no less than nine (9) months. After the provisional period has been completed, a new application may be submitted for consideration of a five (5) year time limited letter.

4. Persons whose director letter has been denied or revoked for the reasons listed in rule section 2.213(E)(1)~~7.702.43, E, 1, a-e~~, may file an appeal in the same manner as a request for waiver, as specified in rule section 2.114~~7.701.13~~ of the "General Rules for Child Care Facilities.~~,~~"

F. Assistant Director Requirements

1. An assistant director working under the supervision of a director must be at least eighteen (18) years of age, have at least nine (9) months (1,365 hours) of experience as an early childhood teacher, and must meet one (1) of the following qualifications:

a. A Bachelor's, Master's, or Doctorate degree from an accredited college or university; or,

b. Completion of at least half of the required coursework for director qualifications in rule section 2.213(B)(2)~~7.702.43, B, 3~~, including the following two (2) administration courses:

(1) Administration of Early Childhood Care and Education Programs; and~~,~~

(2) Administration: Human Relations for Early Childhood Professions, or Introduction to Business.

G. All course grades used for the large center director or assistant director requirements must be a "C" or better.

2.214~~7.702.44~~ DIRECTOR QUALIFICATIONS - SMALL CHILD CARE CENTER

A. The director or substitute director of a small center must either: meet large center director qualifications or meet at least one (1) of the following qualifications:

1. Possess a current ~~professional~~ teaching license issued by the Colorado Department of Education with an endorsement in the area of elementary education, early childhood education, early childhood special education,~~ or~~ early childhood special education specialist; or principal licensure;~~ or,~~

2. Possess a current early childhood professional credential level II or higher in version 3.0 as determined by the Department;~~ or,~~

3. Current certification as a child development associate (CDA) credential in: center-based, preschool; center-based, infant-toddler; or family child care; or other Department-approved credential;~~ or,~~

4. Two (2) years and nine (9) months (5,005 hours) of satisfactory experience in the care and supervision of four (4) or more children less than eight (8) years of age who are not related to the individual, and at least two (2) three (3)-semester credit hour courses from an accredited college or university in early childhood education, and one (1) of the courses must be either:

a. Introduction to Early Childhood; or~~,~~

b. Early Childhood Guidance Strategies for Children or has been issued Colorado Pyramid Model Training certificate of completion; or~~,~~

5. Nine (9) months (1,365 hours) of satisfactory experience in the care and supervision of four (4) or more children less than eight (8) years of age who are not related to the individual, and an Associate's degree from an accredited college or university, with at least two (2) three (3)-semester credit hour courses in early childhood education, and one (1) of the courses must be either:

   a. Introduction to Early Childhood Professions; or~~,~~

   b. Early Childhood Guidance Strategies for children or has been issued a Colorado Pyramid Model Training certificate of completion.~~; or,~~

6. Three (3) months (455 hours) of satisfactory experience in the care and supervision of four (4) or more children less than eight (8) years of age who are not related to the individual; and an Associate's degree in child development or early childhood education from an accredited college or university, with at least two (2) three (3)-semester credit hour courses in either:

   a. Introduction to Early Childhood Professions or possesses a Child Development Associate (CDA) credential in: Center-Based, Preschool; Center-Based, Infant-Toddler; or Family Child Care; or~~,~~

   b. Early Childhood Guidance Strategies for Children or has been issued a Colorado Pyramid Model Training certificate of completion.

B. Satisfactory experience includes all options listed at rule section 2.213(C)~~7.702.43, B and C~~.

C. All course grades used for the small child care center director requirements must be a "C" or better.

D. Substitute Director Requirements

1. In the absence of the director of a small center, an individual who meets director qualifications for a small center or a large center must substitute for the director.

2.215~~7.702.45~~ QUALIFICATIONS FOR TEACHERS, SUBSTITUTES, STAFF AIDES, AND VOLUNTEERS

A. Early Childhood Teacher

1. An early childhood teacher, assigned responsibility for a single group of children and working under the supervision of a director, must be at least eighteen (18) years of age and meet at least one (1) of the following qualifications:

   a. A Bachelor's, Master's, or Doctorate degree from an accredited college or university with a major area of study in one (1) of the following areas:

      (1) Child Development;

      (2) Child Psychology;

      (3) Early Childhood Education;

      (4) Early Childhood Special Education;

      (5) Educational Leadership and Administration;

(6) Elementary Education;

(7) Family and Human Development;

(8) Family Studies; or~~,~~

(9) Special Education;~~ or,~~

b. A Bachelor's, Master's, or Doctorate degree from an accredited college or university with a major area of study in any area other than those listed at rule section 2.215(A)(1)(a)~~7.702.45, A, 1~~, a, and an additional two (2) three (3)-semester credit hour courses in early child education, with one (1) course as the following:

(1) Introduction to Early Childhood Professions; or~~,~~

(2) Early Childhood Guidance Strategies for Children or has been issued a Colorado Pyramid Model Training certificate of completion;~~ or,~~

c. An Associate's degree (60 semester credit hours) from an accredited college or university in early childhood education or child development, which must include at least two (2), three (3)-semester credit hour courses in either:

(1) Introduction to Early Childhood Professions; or~~,~~

(2) Early Childhood Guidance Strategies for Children or has been issued a Colorado Pyramid Model Training certificate of completion;~~ or,~~

d. A current professional teaching license issued by the Colorado Department of Education with an endorsement in the area of elementary education, early childhood education, early childhood special education, or early childhood special education specialist;~~ or,~~

e. A current early childhood professional credential level II or higher in version 3.0 as determined by the Department;~~ or,~~

f. A current certification as a child development associate (CDA) in: center-based, preschool; center-based, infant-toddler; or family child care; or other Department-approved credential;~~ or,~~

g. Completion of a course of training approved by the Department and published on the Department's approval list; and nine (9) months (1,365 hours) of verified experience in the care and supervision of four (4) or more children less than eight (8) years of age who are not related to the individual;~~ or,~~

h. Three (3) months (455 hours) of verified experience in the care and supervision of four (4) or more children less than eight (8) years of age who are not related to the individual; and the completion of eighteen (18) semester credit hours from an accredited college or university in early childhood education, with one (1) course as:

(1) Introduction to Early Childhood Professions; or~~,~~

(2) Early Childhood Guidance Strategies for Children or has been issued a Colorado Pyramid Model Training certificate of completion;~~ or,~~

i. Twenty-one (21) months (3,185 hours) of verified experience in the care and supervision of four (4) or more children less than eight (8) years of age who are not related to the individual. Satisfactory experience includes being a licensee of a Colorado family child care home, a teacher's aide or teacher in a child care center, preschool, or elementary school. In addition, the individual must either:

(1) Possess a current early childhood professional credential level I or higher in version 3.0 as determined by the Department; or,

(2) Complete two (2) three (3) semester credit hour courses from an accredited college or university in early childhood education with one (1) course as either:

(a) Introduction to early childhood professions or has been issued the Child Development Associate (CDA) credential; or~~,~~

(b) Early childhood guidance strategies for children or has been issued a Colorado Pyramid Model training certificate of completion.

2. All course grades used for the early childhood teacher requirements must be a "C" or better.

B. Infant Program Staff

1. Staff Requirements

a. The infant program must have an infant program supervisor who meets at least one (1) of the following qualifications:

(1) A Registered Nurse, with an active license~~d to practice in Colorado~~ from the State Board of Nursing, with a minimum of three (3) months (455 hours) of verifiable experience in the care and supervision of infants who are not related to the individual; ~~or,~~

(2) A Licensed Practical Nurse, with an active license~~d to practice in Colorado~~from the State Board of Nursing, a minimum of nine (9) months (1,365 hours) of verifiable experience in the care and supervision of infants who are not related to the individual; ~~or,~~

(3) An adult who holds a certificate in infant and toddler care from an accredited college or university with completion of a minimum of thirty (30) semester credit hours in the development and care of infants and toddlers in a group setting; ~~or,~~

(4) An adult who is currently certified as a child development associate (CDA) in: center-based, preschool; center-based, infant-toddler; or family child care; and has completed the infant/toddler theory and practice or has been issued the expanding quality in infant and toddler care training certificate of completion; ~~or,~~

(5) An adult who holds a current early childhood professional credential level II or higher in version 3.0, as determined by the Department, has a minimum of nine (9) months (1,365 hours) of verifiable experience in the care and supervision of infants and/or toddlers, and:

(a) Has completed one (1) three (3) semester credit hour course in infant/toddler development; or~~,~~

(b) Has completed the Department-approved expanding quality in infant and toddler care training course.

(6) An adult who:

(a) Is at least nineteen (19) years of age;

(b) Is qualified as an early childhood teacher (rule section 2.215(A)~~7.702.45, A~~);

(c) Has a minimum of nine (9) months (1,365 hours) of verifiable experience in the group care of infants or toddlers; and~~,~~

(d) Has completed at least two (2) three (3)-semester credit hour courses from an accredited college or university on the development and care of infants and toddlers in a group setting, one (1) of which must be:

(i) Infant/Toddler Development; or~~,~~

(ii) The Department-approved expanding quality in infant and toddler care training course.~~; or,~~

(7) An adult who:

(a) Is at least nineteen (19) years of age;

(b) Is qualified as an early childhood teacher (rule section 2.215(A)~~7.702.45, A~~);

(c) Has a minimum of one (1) year and nine (9) months (3,185 hours) of verifiable experience in the group care and supervision of infants or toddlers; and~~,~~

(d) Will complete, within the first six (6) months of employment, two (2) three (3)-semester credit hour courses from an accredited college or university, one (1) of which must be:

(i) Infant/Toddler development; or~~,~~

(ii) The Department-approved expanding quality in infant and toddler care training course.

b. An infant program early childhood teacher must meet the following requirements:

(1) Meet the qualifications for an early childhood teacher found at rule section 2.215(A)~~7.702.45, A~~, or be qualified as an infant program supervisor; and~~,~~

(2) Has a minimum three (3) months (455 hours) of verifiable experience in the care and supervision of children under three (3) years of age.

c. Prior to being assigned a group of children, the infant program early childhood teacher must complete eight (8) hours of orientation in the infant program under the supervision of the infant program supervisor. The orientation may include, but not limited to, the following topics:

(1) Toys and equipment, appropriate activities for infants and toddlers, appropriate sleep positions for infants and toddlers, and the safe and appropriate diaper change technique.

d. The infant program staff aide must be at least eighteen (18) years of age, must have completed eight (8) hours of orientation as listed above at the infant program, and must work under the direct supervision of an infant early childhood teacher.

e. There must be at least one (1) staff member on duty in each infant room at all times who holds a current Department-approved first aid and safety certificate that includes cardiopulmonary resuscitation (CPR) for all ages of children.

2. Required Staff and Supervision

(See chart in rule section 2.216(A)~~7.702.46~~)

a. In the infant program, there must be a qualified infant program supervisor present sixty percent (60%) of the hours of operation of the infant program who is responsible for the care of the infants. An individual qualified as an infant early childhood teacher must be responsible during the remaining time.

b. The infant program supervisor or an infant early childhood teacher must be assigned to each group of ten (10) or fewer infants in attendance. An infant program staff aide may be assigned to assist the infant program supervisor or the infant early childhood teacher when six (6) through ten (10) infants are in care in the group to maintain the staff ratio of one (1) adult for each five (5) infants.

c. There must be assigned at least one (1) infant program supervisor in the infant program for each twenty (20) or fewer infants in attendance.

C. Toddler Program Staff

1. Staff Requirements

a. The toddler early childhood teacher, a staff member assigned responsibility for a single group and working under the supervision of the director, must meet at least one (1) of the following qualifications:

1~~a~~. A Registered Nurse, licensed to practice in Colorado, with a minimum of three (3) months (455 hours) of verifiable experience in the care and supervision of children less than three (3) years of age who are not related to the individual; ~~or,~~

2~~b~~. A Licensed Practical Nurse, licensed to practice in Colorado, with at least nine (9) months (1,365 hours) of verifiable experience in the care and supervision of children less than three (3) years of age who are not related to the individual; ~~or,~~

3~~c~~. An adult who holds a certificate in infant and toddler care from an accredited college or university with completion of at least thirty (30) semester credit hours

or equivalent in such courses as child growth and development, nutrition, and care practices with children birth to three (3) years of age; ~~or,~~

4~~d~~. An adult who is certified as a child development associate (CDA) in: center-based, preschool; center-based, infant-toddler; or family child care; or is certified as a child care professional (CCP); or holds another Department-approved certificate; ~~or,~~

5~~e~~. An adult who meets the education and experience requirements for an early childhood teacher of a large center (rule section 2.215(A)~~7.702.45, A~~); or~~,~~

6~~f~~. A current early childhood professional credential level II or higher in version 3.0 as determined by the Department.

2. Staff aides must be at least sixteen (16) years of age, must work directly under the supervision of the director or a toddler early childhood teacher, and must have completed eight (8) hours of orientation at the toddler program.

3. For every fifteen (15) or fewer toddlers, there must be at least one (1) staff member in the toddler program at all times who has a current Department-approved first aid and safety certificate that includes cardiopulmonary resuscitation (CPR) for all ages of children.

D. Kindergarten Teacher

A kindergarten teacher, assigned responsibility for a single group of children during times specified in rule section 2.216~~7.702.46~~, must meet one (1) of the following qualifications:

1. Each teacher of a kindergarten class must have the same qualifications as a director for a large center (see rule section 2.213~~7.702.43~~); or must possess a current professional teaching license issued by the Colorado Department of Education in elementary education; or~~,~~

2. A current early childhood professional credential level III or higher in version 3.0 as determined by the Department.

E. Assistant Early Childhood Teacher

An assistant early childhood teacher, assigned responsibility for a single group of children during times specified in rule section 2.216~~7.702.46~~, must meet one (1) of the following qualifications:

1. Completion of one (1) of the early childhood education courses in rule section 2.213(B)(2)~~7.702.43 B, 3~~, with a course grade of “C” or better; and a minimum of nine (9) months (1,365 hours) of verified experience in the care and supervision of four (4) or more children less than eight (8) years of age who are not related to the individual. Assistant early childhood teachers must be enrolled in and attending the second (2nd) early childhood education course, which will be used as the basis for their qualification for the position of early childhood teacher; or~~,~~

2. Completion of two (2) of the early childhood education courses referenced in rule section 2.215(A)(1)(b)~~7.702.43, B, 3~~, with a course grade of “C” or better and no experience; or,

3. A current early childhood professional credential level I or higher in version 3.0 as determined by the Department.

F. Substitute Staff

1. Equally qualified staff must be available to substitute for regularly assigned staff who are sick, on vacation, or otherwise unable to be on duty.

2. For short term unscheduled early childhood teacher vacancies up to ten (10) business days per calendar year, an assistant early childhood teacher can substitute for the early childhood teacher. The date and times of substitution must be recorded and available for review at all times.

G. Staff Aide

1. Staff aides must be at least sixteen (16) years of age and must work directly under the supervision of the director or an early childhood teacher.

2. Infant staff aides must be at least eighteen (18) years of age.

3. Staff aides, without supervision from an early childhood teacher or director, may supervise no more than two (2) preschool age children while assisting the children with diapering or toileting.

H. Volunteers

1. Volunteers who are used to meet staff to child ratio must be equally qualified as an early childhood teacher, assistant early childhood teacher, or staff aide. Equally qualified volunteers must have complete staff records as required in rule section 2.209~~7.702.35~~ and complete training requirements as required in rule section 2.212~~7.702.42~~.

2. Volunteers who are not required to be equally qualified or successfully complete background checks must be supervised and given instruction as to the center's policies and procedures.

3. Volunteers between the ages of twelve (12) and sixteen (16) must have a written purpose developed by the center for volunteering and may not volunteer for more than two (2) hours per day.

2.216~~7.702.46~~ REQUIRED STAFF AND SUPERVISION

A. Staff-Child Ratios

1. For the purposes of this rule subsection (A), in determining staff-child ratios, only staff members and/or volunteers qualified under rule section 2.215(A)~~7.702.45~~, who work directly with children are counted.

2. For full day programs, during times of low attendance and/or during the first and last hour of the day, when only eight (8) or fewer children are present in the facility, there must be at least one (1) early childhood teacher or assistant early childhood teacher working with the children and a second staff member must be on site and immediately available. There must be no more than two (2) children less than the age of two (2) present. When nine (9) or more children are in attendance, at least two (2) staff members must be on duty.

3. The director of the center must be present at the center at least sixty percent (60%) of any day that the center is open.

a. Centers licensed under the same governing body that provide care for preschool-age children only at multiple locations are not required to have a large center director qualified staff member assigned to each program. to qualify, centers

must have an organizational structure that includes employees of the center that provide at least ten (10) administrative support elements from the following:

1. Colorado Preschool Program Coordinator;
2. Parent Educational Specialist;
3. Principal or Executive Director;
4. Health Coordinator;
5. Nurse;
6. Health Technician;
7. Food Service Director;
8. A Registered Dietitian or an individual with a Master's level or higher education in Nutrition;
9. Fire/Health/Safety Inspector;
10. Mental Health Team;
11. Speech Language Pathologist;
12. Occupational/Physical Therapist;
13. School Psychologist;
14. Family Outreach Worker;
15. Human Resource Specialist; or~~,~~
16. Transportation Manager.

b. The program must obtain a director who meets large center director qualifications if substantial evidence has been found leading to an adverse licensing action for any of the following:

1. Lack of supervision;
2. Operating out of the approved staff member to child ratio; or
3. Operating without sufficient qualified staff.

4. If the director of a large center cannot be present sixty percent (60%) of any day, an assistant director must be on site acting in the capacity of the director.

5. When there is a director vacancy or absence, an assistant director may substitute for the director for a maximum of up to twelve (12) weeks per calendar year. The assistant director must be on site at least sixty percent (60%) of any day the center is open. For vacancies exceeding twelve (12) weeks, an individual meeting director qualification must be on site acting as director until a new director is appointed. The dates must be documented and kept on file for review.

6. An assistant director must consult with a qualified director on administering the center in accordance with early childhood principles and practices and licensing rules.

7. There must be assigned at least one (1) qualified early childhood teacher supervising each group of children unless otherwise specified in rules. A director may be the assigned teacher for one (1) group of children.

8. Full day programs may have assistant early childhood teachers supervise preschool-age and older children during the following periods of operation:

   a. Opening hours: an assistant early childhood teacher may be alone with children for the first two (2) hours of a center's daily operating hours;

   b. Nap time: an assistant early childhood teacher may be alone with children for up to one (1) hour during nap time;

   c. Closing hours: an assistant early childhood teacher may be alone with children for up to the two (2) hours prior to the closing time of a center's daily operations;

   d. Taking children to the restroom or diapering; and~~,~~

   e. When substituting for an early childhood teacher in compliance with rule section 2.215(F)(2)~~7.702.45, F, 2~~.

9. At least one (1) staff member with the current Department-approved medication administration training and delegation must be on duty at all times.

10. At nap time, the child to staff ratio may be doubled for children two and one half (2 ½) years of age and older in preschool classrooms when the following conditions have been met:

    a. At least half of the children are sleeping;

    b. Another staff member is onsite in the center and immediately available;

    c. Maximum group size and room capacity are not exceeded; and~~,~~

    d. Staff member supervising children is qualified as an early childhood teacher or assistant early childhood teacher.

11. Formal kindergarten class sessions must have one (1) staff member for each twenty-five (25) or fewer children in attendance. At other parts of the day when children are in attendance, the ratio must be one (1) staff member to each fifteen (15) or fewer children.

12. Children of the director or of staff members who attend the center and other children on the premises for supervision and care must be counted against the licensed capacity in the appropriate age groups.

13. In determining staff-child ratios, children who are in attendance for only part of the day are counted only while at the center.

14. Staff-Child Ratios

AGES OF CHILDREN	NUMBER OF STAFF

6 weeks to 18 months (infants)	1 staff member to 5 infants
12 months to 36 months	1 staff member to 5 toddlers
24 months to 36 months	1 staff member to 7 toddlers
2-1/2 years to 3 years	1 staff member to 8 children
3 years to 4 years	1 staff member to 10 children
4 years to 5 years	1 staff member to 12 children
5 years and older	1 staff member to 15 children
Mixed age group 2-1/2 years to 6 years	1 staff member to 10 children

a. In other preschool age combinations, the staff ratio for the youngest child must be utilized if more than twenty percent (20%) of the group is composed of younger children. This does not apply to infants and toddlers. The ratio for toddler groups is based on the youngest child in the group.

15. Maximum Group Size for Children

AGES OF CHILDREN	**MAXIMUM GROUP SIZE**
6 weeks to 18 months	10 infants
12 months to 36 months	10 toddlers
24 months to 36 months	14 toddlers
2-1/2 years to 3 years	16 children
3 years to 4 years	20 children
4 years to 5 years	24 children
5 years and older	30 children
Mixed age group 2-1/2 to 6 years of age	20 children

a. In other preschool age combinations, the maximum group size for the youngest child must be utilized if more than twenty percent (20%) of the group is composed of younger children. This does not apply to infants and toddlers. The group size for toddler groups is based on the youngest child in the group.

b. Preschool age and school-age groups of children must be separated into developmentally appropriate activities. Groups are not required to be separated from each other by permanent or portable dividers or walls.

c. Group size for children in preschool and school-age classrooms may be exceeded for circle time, meal and snack time, special occasions, and activities.

d. The licensed room capacity must not be exceeded at any time.

e. Toddler-age groups of children must be separated from each other by permanent or portable dividers or other methods as approved by the Department.

f. When combining age groups, not including individual child transitions, children must be cared for in the room licensed for the youngest child in care, including the outdoor play area.

16. Emergency Situations

A. In the case of an emergency situation, including but not limited to illness, death, accident, law enforcement action, road closure, hazardous weather, emergency bodily function, child elopement, or providing emergency attention or care to a child, the child care center may operate under the following guidelines:

(1) The facility may temporarily use a staff member, who has successfully completed criminal background check requirements, to supervise children for no more than two (2) hours until a qualified staff member is secured. The dates and times must be recorded and made available for review at all times.

(2) A large child care center or a child care center that operates on the property of a school district, district charter school, or institute charter school, may permit a staff member, who has successfully completed criminal background check requirements but is not a qualified caregiver, to supervise children for an amount of time that is reasonably necessary to address an emergency circumstance.

(3) During any emergency situation, the facility must be in compliance with the staff-to-child ratio.

B. Service/Housekeeping Personnel

1. Service personnel must be available for housekeeping and food preparation as needed for adequate operation and maintenance of the center.

2. Assignment of housekeeping and maintenance duties to child care staff must not interfere with their supervisory responsibilities and child care duties.

C. Child Care Health Consultant

1. Center staff must have a monthly consultation with a current Department-approved child care health consultant who must meet one (1) of the following qualifications:

a. A licensed registered nurse with knowledge and experience in maternal and child health;

b. A pediatric nurse practitioner;

c. A family nurse practitioner; or~~,~~

d. A physician with knowledge and experience in pediatrics or maternal and child health.

2. The monthly consultation must be specific to the needs of the facility and include some of the following topics: training, delegation and supervision of medication administration and special health procedures, health care plans, hygiene, disease prevention, equipment safety, nutrition, interaction between children and adult caregivers, and child growth and development.

3. The monthly consultation must be conducted on-site at least quarterly or more frequently as required by the child care health consultant. Teleconsultations are allowed for the remaining months.

4. The date and content of each consultation must be recorded and maintained in the center's files for three (3) years.

5. For the Department-approved child care health consultant, the center must maintain documentation from the Colorado Medical Board or State Board of Nursing~~Colorado~~

~~Department of Regulatory Agencies~~ that the physician's or registered nurse's ~~or the medical doctor's~~ licensure is active and in good standing.

6. For the Department-approved child care health consultant, the center must maintain documentation of a brief biography highlighting applicable knowledge, experience, and approximate dates worked as a school nurse or child care health consultant.

7. All Department-approved child care health consultants must complete the Department-approved child care health consultant introductory training course within six (6) months of hire. Child care health consultants must complete Department-approved ongoing professional development training every three (3) years. The center must obtain and maintain proof of training completion.

8. All Department-approved child care health consultants must complete the Department-approved Colorado Department of Public Health and Environment immunization course annually. The center must obtain and maintain proof of course completion.

9. All Department-approved child care health consultants must complete the Department-approved training about child abuse prevention, which includes common symptoms and signs of child abuse or neglect. This training must be completed within thirty (30) days of hire and renewed every three (3) years.

~~7.702.5~~ ADMISSION PROCEDURE

2.217 ADMISSION

A. The center must accept and care only for children of the ages for which it has been licensed. At no time shall the number of children in attendance exceed the number for which the center has been licensed.

B. Admission procedures must be completed prior to the child's attendance at the center and must include:

1. A pre-admission interview with the child's parent(s)/guardian(s) to determine whether the services offered by the center will meet the needs of the child and the parent(s)/ guardian(s);

2. Completion of the registration information required for inclusion in the child's record as required in rule section 2.208~~7.702.34~~; and~~,~~

3. If applicable, a Department-approved health care plan authorized by the child's health care provider and parent(s)/guardian(s) defining the interventions needed to care for a child who has an identified health or developmental condition or concern including, but not limited to seizures, asthma, diabetes, severe allergies, heart or respiratory conditions, and physical disabilities. Any applicable medications, supplies, and/or medical equipment must be available to the staff prior to the child's first day of care. The staff working with a child with a health care plan must be informed, trained, and delegated responsibility for carrying out the health care plan by the Department-approved child care health consultant; supervision of the plan and interventions must be documented.

C. Children with Special Needs

1. The admission of children who have special health care needs, disabilities, or developmental delays which includes children with social emotional and behavioral needs must be in alignment with the training and ability of staff and in compliance with the

Americans with Disabilities Act. Services offered must show that a reasonable effort is made to accommodate the child's needs and to integrate the child with other children. (See rule section 2.115~~7.701.14~~ of the General Rules Regulating~~for~~ Child Care Facilities)

2. The center must inform its Department-approved child care health consultant prior to the first day of care of the enrollment of a child with special health care needs, if known, so staff receive training, delegation and supervision by the Department-approved child care health consultant as indicated by the child's individualized health care plan.

3. For a child with special health care needs requiring intervention and/or medication, the center must obtain written instructions for providing services from the child's parent(s)/guardian(s), and the health care provider. If an existing individualized health care plan is provided for the child, it must be reviewed and followed by the center staff when caring for the child. If the child does not have an existing individualized health care plan, the individualized health care plan must be obtained by the child's first day of care.

4. For an enrolled child with a newly identified special health care need, the center must obtain written instructions for providing services from the child's parent(s)/guardian(s) and the health care provider. If the child with special health care needs does not have an existing individualized health care plan, the individualized health care plan and all associated medication(s) and/or equipment must be provided within thirty (30) calendar days of the child's identified need.

5. The individual health care plan must be updated at least every twelve (12) months from the date of the initial plan and as changes occur. The plan must include all information needed to care for the child, must be signed by the health care provider, parent(s)/guardian(s) and must include, but not be limited to, the following:

   a. Medication and dosing schedule;

   b. Nutrition and feeding instructions;

   c. Medical equipment or adaptive devices, including instructions;

   d. Medical emergency instructions;

   e. Toileting and personal hygiene instructions;

   f. Behavioral interventions; and~~,~~

   g. Medical procedure/intervention orders.

D. If the parent(s)/guardian(s) agree(s) that the center should care for a child in the infant program who is eighteen (18) months or older, the center must have on file a written statement from a health care provider confirming that care for the child is appropriate in the infant program.

E. If the parent(s)/guardian(s) agree(s) that the center should care for a child in the toddler program who is twelve (12) months old but not walking independently, or is over thirty-six (36) months old, the center must have on file a written statement from a health care provider confirming that care for the child is appropriate in the toddler program.

~~7.702.51~~ HEALTH CARE

2.218~~A.~~ STATEMENTS OF HEALTH STATUS

A~~1~~. The center has the right to refuse to admit a child if a statement from a health care provider or documentation of immunization status, or exemption, is not submitted.

B~~2~~. At the time of admission, the parent(s)/guardian(s) must provide for each child entering the center:

1~~a~~. Documentation of school-required immunization status or certificate of medical or nonmedical exemption, is required by the Colorado Board of Health. Up-to-date school-required immunizations must be documented as specified on the Colorado Department of Public Health and Environment certificate of immunization or on an "approved alternate" certificate of immunization. Colorado law requires proof of immunization status or exemption be provided prior to or on the first day of admission.

a. If the parent or legal guardian of a child wishes a nonmedical exemption from the requirement for immunizations due to a religious belief whose teachings are opposed to immunizations or a personal belief that is opposed to immunizations, the child's parent, or legal guardian must:

i. Submit the certificate of nonmedical exemption with a signature from an immunizing provider in Colorado; or

ii. Submit the certificate of nonmedical exemption received upon the completion of Colorado Department of Public Health and Environment online immunization education module.

2~~b~~. Within thirty (30) calendar days of admission, and within thirty (30) calendar days following the expiration date of a previous health statement, the parent(s)/guardian(s) of each child must submit a statement of the child's current health status or written verification of a scheduled appointment with a health care provider. The statement of the child's current health status must be signed and dated by a health care provider who has seen the child within the last twelve (12) months, or within the last six (6) months for children less than two and one-half (2½) years of age. The statement must include when the next visit is required by the health care provider. All health statements must be kept at the center.

3~~c~~. Statements of health status of children less than two (2) years of age must be updated in accordance with the American Academy of Pediatrics recommended schedule for routine health supervision or as required in writing by the health care provider.

4~~d~~. Health statements for children over two (2) years of age to seven (7) years of age must be updated in accordance with the American Academy of Pediatrics recommended schedule for routine well child exams.

5~~e~~. For children seven (7) years of age and older or who have completed the first (1st) grade, subsequent statements of health status must be obtained every three (3) years.

2.219~~B.~~ MEDICATION

A~~1~~. Any unexpired routine medication, prescription or non-prescription (over the counter), must be administered only with a current written order of a health care provider with prescriptive authority and with written parental consent. Home remedies, homeopathic medication, vitamins, and supplements must not be administered to children in child care.

B~~2~~. The written order by the person with prescriptive authority shall include:

1~~a~~. Child's name;

2~~b~~. Licensed prescribing practitioner name, telephone number, and signature;

3~~c~~. Date authorized;

4~~d~~. Name of medication and dosage;

5~~e~~. Time of day medication is to be given;

6~~f~~. Route of medication;

7~~g~~. Length of time the medication is to be given;

8~~h~~. Reason for medication (unless this information needs to remain confidential);

9~~i~~. Side effects or reactions to watch for; and~~,~~

10~~j~~. Special instructions.

C~~3~~. Medications must be kept in the original labeled bottle or container. Prescription medications must contain the original pharmacy label.

D~~4~~. Over-the-counter medication must be kept in the originally labeled container and be labeled with the child's first and last name.

E~~5~~. In the case medication needs to be given on an ongoing, long-term basis, the authorization and consent forms must be reauthorized on an at least annual basis. Any changes in the original medication authorization require a new written order by the prescribing practitioner and a change in the prescription label.

F~~6~~. Staff designated by the director to give medications must complete the Department-approved medication administration training and have current annual delegation or more often as determined by the Department-approved child care health consultant. Delegation must be from the center's current Department-approved child care health consultant who must observe and document the competency of each staff member involved in medication administration. All staff administering medication must have current cardiopulmonary resuscitation (CPR) and first aid training prior to administering medication with the following exceptions:

1~~a~~. Staff determined by the director, in consultation with the Department-approved child care health consultant, to be responsible for providing emergency medications must complete the Department-approved medication administration training: severe allergy or asthma. After completing the training, staff must receive delegation from their Department-approved child care health consultant for those medications only. Staff must then provide those medications to children based on the instructions from the child's individualized health care plan.

2~~b~~. Staff determined by the director, in consultation with the Department-approved child care health consultant, to be responsible for providing medications not covered in the approved medication administration training shall also be permitted to administer medications and/or medical treatments such as emergency seizure medication, insulin, or oxygen with individualized training and delegation from the Department-approved child care health consultant based on instructions from the child's individualized health care plan.

3c. Staff may be trained and delegated in the administration of a single rescue medication or rescue medical intervention by the center's Department-approved child care health consultant. Such training and delegation shall qualify the staff member to provide a rescue medication or treatment for a specific child based on instructions from the child's individualized health care plan.

G7. All medications, except those medications specified in the Department-approved medication administration training as emergency medications, must be locked and inaccessible to children, but available to staff trained in administering medication. Controlled medications must be counted and safely secured, and specific policies regarding their handling require special attention in the center's policies. Access to these medications must be limited.

1a. Emergency medications are not required to be locked but must be stored in an area inaccessible to children, and easily accessible and identifiable to staff. Emergency medications must be stored in accordance with the Department-approved child care health consultant's recommendation.

2b. When away from the classroom, staff assigned to supervise the child must carry the emergency medication.

H8. The center must have a written policy on the storage and access of inhalers and epinephrine carried by school-age children. The policy must include a written contract with the parent(s)/guardian(s) and child acknowledgement assigning levels of responsibility of each individual. This contract includes orders for the medication from a health care provider, along with confirmation from the health care provider and the Department-approved child care health consultant that the student has been instructed and is capable of self-administration of the prescribed medications.

I9. Children are not allowed to bring medications to child care unless accompanied by a responsible adult.

J10. If a medication is out of date or left over, the parent(s)/guardian(s) is responsible for picking up the medication. If the parent(s)/guardian(s) do not respond, the center must dispose of the medications as required by the Colorado Department of Public Health and Environment.

K11. Topical preparations such as petroleum jelly, diaper rash ointments, sunscreen, insect repellent, and other ointments may be administered to children with written authorization from the parent(s)/guardian(s). These preparations may not be applied to open wounds or broken skin unless there is a written order by the prescribing health care provider.

L12. A written medication log must be kept for each child. This log is part of the child's records. The log must contain the following:

1a. Child's name and birthdate;

2b. name of the medication, dosage, and route;

3c. time medication is to be given by written medication authorization;

4d. time medication is administered to child;

5e. Special instructions;

6f. Name and initials of the individuals giving the medication; and,

7g. Notation if the medication was not given and the reason.

2.220C. SUN PROTECTION

A1. The center must obtain written authorization and instructions from the parent(s)/guardian(s) for the application of sunscreen or the use of another form of parent(s)/guardian(s) approved sun protection with a full-spectrum ultraviolet A/ ultraviolet B (UVA/UVB) rating of sun protection factor (SPF) thirty (30) or greater to their children's exposed skin prior to outside play year-round. a doctor's permission is not needed to use sunscreen at the center.

B2. The center must apply sunscreen, have the parent(s)/guardian(s) apply sunscreen, or use another form of parent/guardian approved sun protection for children prior to children going outside. Sunscreen must be reapplied as directed by the product label.

1a. When the parent(s)/guardian(s) applies sunscreen, the center must have a mechanism for documenting application times to ensure sunscreen is reapplied as directed by the product label. If documentation of application time is not available, the center must ensure that sunscreen is applied thirty (30) minutes before going outdoors. If the child will be outside for more than one (1) hour, sunscreen must be reapplied every two (2) hours.

C3. When supplied for an individual child, the sunscreen must be labeled with the child's first and last name.

D4. If sunscreen is provided by the center, parent(s)/guardian(s) must be notified in advance, in writing, of the type of sunscreen the center will use.

E5. Children over four (4) years of age may apply sunscreen to themselves under the direct supervision of a staff member.

F6. Infants under six (6) months must be kept out of direct sunlight while outdoors.

7.702.6 CHILD CARE SERVICES

2.2217.702.61 PERSONAL HYGIENE

A. Diapering

1. All diaper change areas must:

a. Be a minimum of thirty-six (36) by eighteen (18) inches in size and large enough to accommodate the size of the child;

b. Have a place inaccessible to children for storing all diaper change supplies and disinfecting solutions and products;

c. Have a sufficient supply of diapers at all times; and;

d. Be located and arranged to provide privacy for older children in need of diaper changing.

2. Children being diapered must be within arm’s reach of the staff member and actively supervised throughout the diapering process.

3. One (1) diaper change area is required in every infant and toddler classroom.

4. One (1) designated diaper change area is required for every twenty-four (24) preschool age children.

b. Toileting

1. There must be no attempt to toilet train children until they are able to communicate or otherwise indicate need, help manage their own clothing, and be able to access toileting facilities.

2. For each child who is learning to use a toilet, the child's individual developmental abilities and needs must be accommodated as stated in the written policies and procedures for the center.

2.222~~7.702.62~~ PHYSICAL CARE AND SUPERVISION

A. General

1. All children must be under the direct supervision at all times of a qualified adult who has been assigned the responsibility to supervise.

2. The time a child arrives and leaves the center each day must be recorded. Staff members must complete written attendance verification periodically throughout the day, including during transitions.

3. Staff must be awake, alert, and actively supervising all children.

4. Staff must directly supervise children and maintain staff to child ratio during special activities that occur with an outside vendor or provider and where the vendor uses their expert staff to facilitate the activity.

5. The staff must ensure that children are dressed appropriately for the weather before going outside.

B. Infant and Toddler Programs

1. Outside of mealtimes, children who are awake must not be confined for more than fifteen (15) minutes at a time to cribs, playpens, swings, highchairs, infant seats, or other equipment that confines movement. Children must have the opportunity for freedom of gross motor movement.

2. Throughout the day, each child must have frequent, individual, personal contact, and attention from an adult, such as being held, rocked, taken on walks inside and outside the center, talked to, read to, and sung to.

3. Staff must investigate whenever children cry, scream, or appear to withdraw and must try to verbally or physically soothe the child. When putting infants to sleep, staff may allow for a period of no longer than ten (10) minutes without verbally or physically soothing the child to enable the infant to try to self soothe and fall asleep.

4. Children must be allowed to form and observe their own pattern of sleep and waking periods. Special provision must be made so that children requiring a morning nap time have a separate area for their nap apart from space used for play.

a. Children must be allowed to leave their sleeping area immediately upon waking.

C. Safe Sleep Environments for Infants

1. Each infant up to eighteen (18) months of age and enrolled in the infant program must be provided with an individual crib, futon approved for infants, or other approved sleep/rest equipment meeting Consumer Product Safety Commission (CPSC) standards. Individual cribs or futons must provide each infant with sufficient space for the infant's length, size, and movement.

2. In the infant room, soft bedding or materials that could pose a suffocation hazard are not permitted in cribs, futons approved for infants, or other approved sleep/rest equipment. Soft bedding means, but is not limited to, any soft sleep surface like bumper pads, pillows, blankets, quilts, comforters, sleep positioning devices, sheepskins, blankets, flat sheets, cloth diaper bibs, plush toys, pacifiers with stuffed animals attached, and stuffed animals.

    a. Mattresses for cribs and futons must have a properly fitted, clean sheet.

3. Approved sleeping equipment must be firm and mattresses must fit snugly ensuring no more than two fingers are able to be inserted between the mattress and the side of the approved sleeping equipment.

4. Toys, including mobiles and other types of play equipment that are designed to be attached to any part of sleeping equipment, must be kept away from sleeping infants and out of sleep environments, including hanging toys. Blankets and other items must not be hung from or draped over the sides or any part of sleeping equipment.

5. All sleep/rest equipment must be safe, sturdy, and free from hazards including, but not limited to broken or loose slats, torn mattress, chipping paint or loose screws.

6. Drop side and stacking cribs are prohibited.

7. Bassinets and playpens are prohibited in child care centers.

8. Other sleep equipment not manufactured for commercial use is prohibited.

9. An infant must be placed on their~~his/her~~ back for sleeping.

10. Alternative sleep positions for infants must only be allowed with a health care plan completed and signed by the child's physician.

11. Swaddling of infants must only be allowed with a health care plan completed and signed by the child's health care provider.

12. Each infant up to twelve (12) months of age who uses a pacifier must have the pacifier offered when being put down to sleep unless the parent(s)/guardian(s) direct(s) otherwise.

13. Infant sound monitors must be used in separate sleeping rooms for infants unless qualified staff remain in the room with sleeping infants at all times. When monitors are used, the following conditions must be met:

    a. The sound monitoring equipment is able to pick up the sounds of all sleeping infants;

b. The receiver of the sound monitoring equipment is actively monitored by staff at all times;

c. All sleeping infants must be physically observed at least every ten (10) minutes by a staff member;

d. Sound monitoring equipment must be regularly checked to ensure it is working correctly; and~~,~~

e. The monitor must be out of reach of children.

14. Separate sleep rooms are prohibited in new construction, change of governing body, and change of capacity in child care centers.

15. Infants who fall asleep in a piece of equipment not approved for sleep must immediately be moved to their approved sleep area and placed on their back to sleep.

16. Cribs must be used for sleeping, not extended play nor confinement.

17. If music is played in the infant sleep area, the music must not be played at a loud volume that would prevent infants from being heard by staff. Music equipment must not be placed under a crib or within three (3) feet of the sleeping infant.

18. Supervised tummy time must be offered to infants one (1) month of age or older at least four (4) times per day for full day programs for short periods (3-5 minutes) and increase the amount of time as the infant shows they enjoy the activity. If the infant falls asleep during tummy time, immediately place him/her on their back in approved sleeping equipment.

19. When staff place infants in approved sleeping equipment for sleep, they must check to ensure that the temperature in the room is comfortable for a lightly clothed adult, check the infants to ensure that they are comfortably clothed (not overheated or sweaty), and that bibs, necklaces, and garments with ties or hoods are removed.

    a. Clothing sacks or other clothing designed for sleep must be worn in lieu of blankets if needed for additional warmth. Clothing must not restrict the movement of the child's arms or legs.

20. Infants must not be placed to sleep in the same crib or futon as another infant or child at the same time.

D. Rest Time and Equipment

1. Children must not be forced to sleep.

2. In rooms used for napping, the lighting must be dim at nap time to promote an atmosphere conducive to sleep but must be bright enough for supervision of children.

3. When the room provided for rest is used for other program activities, the cots, pads, and linens must be stored in an area that is not included in the required square footage assigned for play space.

4. In the toddler room, a crib, sleeping cot, or two (2) inch mat must be provided for each child, and there must be a minimum of two (2) feet between each crib or cot. Aisles between cots or cribs must be kept free of all obstructions while cribs are occupied. No

child less than the age of two (2) years should use a cot for sleeping without written permission of the parent or guardian.

a. Individual cribs must provide each toddler with sufficient space for the toddler's length, size, and movement, and must meet federal Consumer Product Safety Commission standards. Each crib must be fitted with a firm, comfortable mattress. If individual cribs are used, they must be separated by a sturdy divider from the area used for activities.

b. Sleeping cots and mats must be of firm construction and in good repair.

c. A fitted sheet and a blanket, or suitable covering, must be provided for each child to be used only by that child.

5. If preschool-age children are in care for longer than five (5) hours, the center must provide at least a thirty (30) minute rest period meeting the following:

a. A firm cot or two (2) inch mat with a sheet and blanket, or other suitable covering, must be provided for each child;

1. Cots or pads must be spaced at least two (2) feet apart on all sides during rest time. Children must have a safe area in which to rest that is easily supervised, out of the path of traffic, and free of hazards.

b. Quiet activities must be available for children who do not sleep during the thirty (30) minute period. Older children requiring a rest time must be given one;

c. Children who do not sleep after thirty (30) minutes must be allowed to move to another area and be provided with quiet toys and equipment to play with such as puzzles or books; and~~,~~

d. Children who fall asleep must be allowed to leave their napping area within ten (10) minutes of waking.

2.223~~7.702.63~~ FOOD AND NUTRITION

A. Meals and Snacks provided by the center

1. All meals and snacks provided by the center must meet current United States Department of Agriculture (USDA)~~,~~ Child and Adult Care Food Program (CACFP) meal pattern requirements and be offered at suitable intervals not more than three (3) hours apart. Children who are at the center for more than four (4) hours, day or evening, must be offered a meal. Arrangements must be made for feeding children who are in care before 6 a.m. or after 6 p.m.

2. If 100% fruit juice, which is not a sugar sweetened beverage, is offered as part of meals and/or snacks, it must be limited to no more than two (2) times per week.

3. Centers must not provide sugar sweetened beverages to children. These are beverages that have been sweetened with various forms of sugars that add calories and include, but are not limited to: soda, fruitades, fruit drinks, flavored milks, and sports and energy drinks.

4. The size of servings must be suitable for the child's age and sufficient time must be allowed so that meals are unhurried.

5. Foods offered shall be age appropriate and not pose a choking hazard.

6. In centers that do not regularly provide a meal, if a child brings a meal from home that does not appear to meet current USDA Child and Adult Care Food Program meal pattern requirements, the center must have foods available to offer as a supplement to that meal.

7. Staff members must sit with the children and encourage them to try a variety of food served. During meals, children should be encouraged to engage in conversation and to express their independence.

8. Children must not be given foods that are contrary to the religious beliefs of their families or that are known to cause an allergic reaction or a health hazard.

9. Food and beverages are not to be used as a reward.

10. Meal menus must be planned at least one week in advance, dated, and posted in a place visible to parents. After use, menus must be filed and retained for three (3) months.

11. A table, counter, or shelf, separate from the diaper changing area, must be available for preparing infants' and toddlers' food.

B. Feeding the Infant

1. An individualized diet and feeding schedule must be provided according to a written plan submitted by the parent or by the child's physician with the knowledge and consent of the parent. A change of diet and schedule must be noted on each child's daily activity schedule and posted in an area clearly visible to the staff.

2. All infants less than six (6) months of age must be held for bottle feeding. Bottles must not be propped. Older infants must not be allowed to hold their own bottles when lying flat. Bottles must not be allowed in a crib with the infant.

3. Older infants must be provided with suitable solid foods that encourage freedom in self-feeding and must be fed in safe chairs such as highchairs or baby-feeding tables.

4. When the infant program provides food other than breast milk or formula, food must be varied and include food from cereal, vegetable, fruit, and protein sources. When the center does not provide solid food, it must supply any additional foods and/or monitor the infant's total nutritional intake.

5. A staff member may not mix cereal with breast milk or formula and feed it to an infant from a bottle or infant feeder unless there are written instructions from the child's health care provider.

6. In infant nurseries, an adequate number of highchairs, or other suitable pieces of equipment that meet federal Consumer Product Safety Commission standards, must be provided for infant feeding.

7. Children who are actively eating may be in a highchair or other approved feeding equipment for longer than fifteen (15) minutes. Children must be moved once feeding is complete.

C. Feeding the Toddler

1. Staff members must either feed toddlers or supervise them when they are eating, and children must be encouraged to try a variety of food served.

2. Toddlers must be sitting when eating or drinking.

3. Children who are actively eating may be in a highchair or other approved feeding equipment for longer than fifteen (15) minutes. Children must be moved away from the feeding location once feeding is complete.

2.224~~7.702.64~~ GUIDANCE

A. Guidance used at the center must be appropriate to the development of the child and is used as an opportunity to teach children social-emotional skills, such as self-regulation, problem-solving, and empathy for others.

B. Children must not be subjected to physical or emotional harm, humiliation, or threats.

C. The director must not use, or permit a staff person or child to use, corporal ~~or other harsh~~ punishment as defined in section 22-1-140,C.R.S.

D. Guidance must not be associated with food, rest, or toileting. No child should be punished for toileting accidents. Food must not be denied to or forced upon a child as a disciplinary measure.

E. Physical activity and outdoor time must not be withheld as a disciplinary measure.

F. Separation, when used for guidance, must not exceed five (5) minutes and must be appropriate for the child's development. The child must be in a safe, lighted, well-ventilated area and be within sight and hearing of an adult. The child must not be isolated in a locked, closed room, or closet.

G. Verbal abuse and derogatory remarks about the child are not permitted.

H. Any form of restraint is not permitted.

I. Physical redirection may be used to keep a child from immediate imminent danger. The child must be immediately released once removed from imminent danger.

2.225~~7.702.65~~ ACTIVITIES

A. Activity Schedules

1. The center must carry out a planned program suitable to the needs of the children. This program must be described in writing and be available for review when requested by the Department or by parents or guardians of children in care.

2. Daily physical gross motor activities, with or without equipment or materials, must be provided outdoors, or indoors during inclement weather, to children toddler age and older for no less than sixty (60) minutes total for full day programs. Activities do not have to occur all at once.

   a. Programs who qualify for an outdoor space hardship per rule section 2.231(B)~~7.702.74, B,1~~, must provide daily physical gross motor activities indoors or outdoors.

3. Children's access to outdoor space must be provided daily, except during inclement weather.

4. Infants must be provided access to outdoor play at least three (3) times per week, weather permitting.

5. If the center takes children on routine short excursions, such activities and locations must be posted at the center.

6. Portable first aid kits must be available to staff at all times, including field trips and short excursions, and must be checked and restocked on at least a monthly basis.

7. If a child participates in activities away from the facility, the center must obtain the parent or guardian's written permission for the child to participate in the activity at a specific location and day. Staff ratios found at rule section 2.216~~7.702.46,~~ must be maintained.

B. Screen Time and Media Use

1. Screen time, which includes, television, recorded media, computer, tablet, cell phones, video games, and other media devices, is prohibited for children less than two (2) years of age.

2. Screen time is prohibited during snack or meal times.

3. All media that children are exposed to must not contain explicit language or topics.

4. For children two (2) to five (5) years of age, screen time must be limited to no more than thirty (30) minutes per day.

5. For children two (2) years of age and older, screen time may only exceed sixty (60) minutes for a special occasion and must not occur more than once every two (2) weeks.

6. All children must be provided with a developmentally appropriate alternative activity once the child(ren) loses interest in the media activity.

7. There is no time restriction for children using personal adaptive equipment or assistive technology or participating in mandatory school activities.

C. Field Trips

1. The center must notify the children's parents or guardians in advance of any field trip. The staff-child ratio found at rule section 2.216~~7.702.46,~~ must be maintained at all times.

2. All groups of children must be actively supervised by a qualified early childhood teacher at all times.

3. Children must be actively supervised at all times.

4. An accurate itinerary must remain at the center.

5. When taking children on a field trip, staff must have the following information about each child: name, address, and phone number of the child's physician or other appropriate health care professional and the written authorization from the parent or guardian for emergency medical care.

6. If children attending the field trip require routine medications be administered during the field trip or have special health needs, a staff member with current medication administration training and delegation must attend on the field trip.

7. A list of all children and staff on a field trip must be kept at the center.

2.226~~7.702.66~~ TRANSPORTATION

A. Transportation Provided by the Center

1. The center is responsible for any children it transports.

2. The center must obtain written permission from the parent(s)/guardian(s) for any transportation of their child(ren) while in care.

3. The number of staff members who accompany children when being transported in the vehicle must meet the child care staff ratio found at rule section 2.216~~7.702.46~~. The driver of the vehicle is considered a staff member.

4. Children must not be permitted to ride in the front seat of a vehicle and must remain seated while the vehicle is in motion. All children must be secured in a child restraint system that is appropriate for the age and development of that child. The child restraint must conform to all applicable Federal Motor Vehicle Safety Standards and Colorado child passenger safety laws.

5. Children must be loaded and unloaded out of the path of moving vehicles.

6. Children must not be permitted to stand or sit on the floor of a moving vehicle, and their arms, legs, and heads must remain inside the vehicle at all times.

7. Children must not be left unattended in the vehicle.

8. Transportation arrangements for school-age children must be by agreement between the center and the children's parents, *i.e.*, whether the child can walk, ride a bicycle, or travel in a car. The center must monitor the children to be sure they arrive at the center when expected and follow up on their whereabouts if they are late. Written permission from parents or guardians for their children to attend community functions after school hours must include agreements regarding transportation.

9. Prior to a field trip or other excursion, the center must obtain information on liability insurance from parents and staff who transport children in their own cars and verify that all drivers have valid driver's licenses.

10. Attendance must be verified as children enter and exit the vehicle to ensure all children are accounted for.

B. Requirements for Vehicles

1. Any vehicle used for the transportation of children to and from the center or during center activities must meet the following requirements:

   a. The vehicle must be enclosed and have working door locks;

   b. The seats of the vehicle must be constructed and installed according to the vehicle manufacturer's specifications;

   c. The vehicle must be kept in satisfactory condition to ensure the safety of occupants. Vehicle tires, brakes, and lights must meet safety standards set by the Colorado Department of Revenue, Motor Vehicle Division;

d. Seating must be comfortable with a seat of at least ten (10) inches wide for each child;

e. The provider must not transport more children than any vehicle is able to safely accommodate when child restraint systems and seat belts are properly installed in the vehicle. Two (2) or more children must never be restrained in one (1) seat belt or child restraint system; and~~,~~

f. Modifications to vehicles including, but not limited to, the addition of seats and seat belts must be completed by the manufacturer or an authorized representative of the manufacturer. Documentation of such modifications must be available for review.

2. Any child transported must be properly restrained in a child restraint system that meets the requirements of the Colorado child passenger safety law that requires:

a. Children under the age of one (1) year must ride in the back seat of the vehicle, in a rear-facing child restraint system, according to manufacturer's instructions until they are at least one (1) year old and weigh at least twenty (20) pounds.

b. Children ages one (1) to four (4) years and who weigh twenty (20) to forty (40) pounds must be properly restrained in a rear- facing or forward-facing child restraint system, according to the manufacturer's instructions.

c. Children who are under eight (8) years of age and who are being transported, shall be properly restrained in a child restraint system, according to manufacturer's instructions.

d. Children who are at least eight (8) years of age but less than sixteen (16) years of age who are being transported, shall be properly restrained in a safety belt or child restraint system according to manufacturer's instructions.

i. Children who meet the requirements to be restrained in a safety belt must be instructed and monitored to keep the seat belt properly fastened and adjusted.

e. Two or more children must never be restrained in one (1) seat belt or child restraint system.

~~In passenger vehicles, which include automobiles, station wagons, and vans with a manufacturer's established capacity of sixteen (16) or fewer passengers and less than 10,000 pounds, the following is required:~~

~~a. Each child must be restrained in an individual seat belt;~~

~~b. Two (2) or more children must never be restrained in one (1) seat belt;~~

~~c. Lap belts must be secured low and tight across the upper thighs and under the belly; and,~~

~~d. Children must be instructed and encouraged to keep the seat belt properly fastened and adjusted.~~

3. In vehicles with a manufacturer's established capacity of sixteen (16) or more passengers, seat belts for passengers are not required.

C. Requirements for Drivers of Vehicles

1. All drivers of vehicles transporting children must comply with applicable laws of the Colorado Department of Revenue, Motor Vehicle Division, and ordinances of the municipality in which the center operates.

2. All drivers of vehicles owned or leased by the center in which children are transported must have a current Department-approved first aid and safety certificate that includes cardiopulmonary resuscitation (CPR) for all ages of children.

3. In each vehicle used to transport children, drivers must have access to a First Aid kit.

4. The driver must ensure that all doors are secured at all times when the vehicle is moving.

5. The driver must make a good faith effort to ensure that each child is properly belted throughout the trip.

6. The driver must not eat, smoke, or use a cellular device while driving.

7. The required staff to child ratio must be maintained at all times.

8. All drivers must be at least twenty (20) years of age.

9. Drivers must complete a minimum of four (4) hours of Department-approved driver training. The Department's approval will be based on the review of a training curriculum that includes at a minimum: behind the wheel training; participant transport attendance procedures including taking attendance at the destination; managing behavioral issues; loading and unloading procedures; daily vehicle inspection procedure; proper tire inflation; emergency equipment and how to use it; accident procedures; passenger illness procedures; procedures for backing up; and vehicle evacuation.

D. Transporting Infants and Toddlers

1. Children must be properly fastened into a child restraint system that conforms to all applicable Federal Motor Vehicle Safety Standards pursuant to Colorado law.

2. There must be at least one (1) adult, in addition to the driver, for each five (5) or fewer infants/toddlers being transported. Each adult must have a current Department-approved First Aid and Safety certificate that includes CPR for all ages of children.

3. An adult must accompany each child to and from the vehicle.

4. Infants and toddlers must not be transported in the front seat of a vehicle.

2.227~~7.702.67~~ OVERNIGHT CARE

A. All of the provisions required in rule section 2.200~~7.702~~ of these rules for child care centers apply to centers offering overnight care of children which includes care that extends beyond midnight. In addition, centers must observe the following provisions:

1. A nutritious evening meal must be made available to children. If provided by the center, the meal must meet current USDA Child and Adult Care Food Program meal pattern requirements.

2. Quiet activities must immediately precede the children's bedtime.

3. Children's faces and hands must be washed, children's teeth must be brushed according to the child's age, and children must be changed into comfortable clothing for sleeping.

4. Each child must be provided with a comfortable separate bed, crib, or cot suitable for the child's age or a two (2) inch sleeping mat or mattress. Each child must also be provided with sheets and a clean, washable covering. If mats or mattresses are used, the room temperature at floor level must be sixty-eight (68) to seventy-two (72) degrees. Pads and mattresses must be fitted with a clean, washable, removable covering. Permission of parents/guardians must be obtained for each child who uses a sleeping mat or mattress placed on the floor.

5. Staff must be awake, alert, and actively supervising all children.

6. The staff-child ratio for sleeping children is one (1) adult to every six (6) or fewer children in attendance. Once one (1) child is awake, the staff-child ratio as defined in rule section 2.2167.702.46, must be maintained.

7.702.7 CHILD CARE EQUIPMENT AND MATERIALS

2.2287.702.71 GENERAL REQUIREMENTS

A. Durable furniture such as tables and chairs must be child-sized or appropriately adapted for children's use.

B. Window blind cords must be secured out of children's reach to prevent strangulation.

C. Items labeled "keep out of reach of children" must be inaccessible to children.

D. Staples must be inaccessible to children less than three (3) years of age.

E. Thumb tacks must not be used in areas accessible to children less than three (3) years of age.

F. Glitter must not be used with children under three (3) years of age.

G. Loose plastic bags must be stored in areas inaccessible to children.

H. Sharp tools and instruments must be stored in areas inaccessible to children.

I. For every five (5) infants for which the center is licensed, there must be at least one (1) piece of sturdy mobile equipment that is easily accessible to safely and effectively evacuate infants.

J. If using a crib is not designed for emergency evacuation, the crib must be reinforced with a kit manufactured for this purpose.

K. Evacuation equipment must not block exit routes. Nothing may be stored in or under any evacuation equipment.

Evacuation equipment must:

1. Be located in the room or immediately outside the interior classroom door;

2. Be labeled for easy identification;

3. Be ready for use; and.

4. Fit through doorways.

L. Toys, toy parts, furnishings, equipment, and any materials accessible to children under than three (3) years of age must not be a choke hazard or able to be inhaled. Any area of the facility accessible to children less than three (3) years of age must be free of any choke or inhalation hazards.

M. Toys, toy parts, furnishings, equipment, and materials made of brittle, easily breakable plastic or glass are not permitted for children less than five (5) years of age.

N. The infant program must have an adult rocking chair.

O. In the infant program, some play equipment from the following list must be provided: rubber washable toys, rattles, blocks, balls, and music player.

P. Some sand or equivalent dry material or water play should be offered to children eighteen (18) months of age or older, indoors or outdoors, at least monthly and year-round.

Q. At least three (3) examples of materials must be available to the children that are developmentally appropriate, culturally sensitive, and represent diversity in ethnicity, race, gender, age, and abilities. Variety must exist in toys, books, and pictures.

R. The center must have enough play materials and equipment so that at any one time each child for which the center is licensed for can be individually involved. Separate play rooms or separate interest centers must be provided for each category of equipment required for the program. A variety of material and equipment from the following categories must be available:

1. Art;

2. Blocks and accessories;

3. Books and pictures;

4. Dramatic play;

5. Gross motor;

6. Manipulatives;

7. Music; and~~,~~

8. Science and math.

S. In the toddler program, some play materials and equipment easily accessible to children must be provided from each of the following categories:

1. Books and pictures;

2. Dramatic play;

3. Gross motor;

4. Manipulatives; and~~,~~

5. Music.

T. If the center serves school-age children, it must have some age-appropriate materials and equipment from each of the following categories:

1. Arts and crafts;

2. Games;

3. Sports;

4. Science and math; and,

5. Literature.

U. An appropriate supply of play materials must be readily accessible to children and must be arranged in an orderly manner so that children can select, remove, and replace the play materials either independently or with minimum assistance.

2.2297.702.72 INDOOR/OUTDOOR EQUIPMENT, MATERIALS, AND SURFACES

A. A variety of play equipment and materials appropriate for children's age, size, developmental needs, and activities must be provided for both indoor and outdoor structured and free play.

1. Programs who qualify for an outdoor space hardship per rule section 2.231(B)(1)7.702.74, B, 1 are not required to provide equipment and materials for outdoor play.

B. Indoor and outdoor equipment, materials, and furnishings must be sturdy, safe, and free of hazards.

C. All other indoor or outdoor playground facilities, with permanently installed or portable climbing equipment, without an annually certified playground inspection must meet the following requirements:

1. Resilient Surfacing

a. All climbing equipment eighteen (18) inches or higher must have resilient surfacing of at least six (6) inches in the use zone surrounding the equipment.

b. Department-approved resilient surfacing includes loose fill materials such as wood chips, wood mulch, engineered wood fiber, pea gravel, synthetic pea gravel, shredded rubber tires, and sand. Solid unitary materials include poured in place surfacing, approved rubber mats, playground tiles, and Astroturf with built in resilient pad.

c. Loose fill resilient surface must be raked regularly to retain its resiliency and to retain a depth of at least six (6) inches.

d. Any newly installed solid unitary materials used for resilient materials must have written documentation from manufacturer stating the material meet current federal safety standards. The documentation must be available for review at all times.

2. Maximum Height of Equipment

a. The maximum height for toddler climbing equipment cannot exceed thirty-two (32) inches.

b. The maximum height for preschool and school-age climbing equipment must not exceed six (6) feet in height with six (6) inches of Department-approved resilient surfacing.

3. Use Zone

a. Toddler climbing equipment must have a three (3) foot use zone surrounding the equipment. Toddler slides require a six (6) foot use zone extending out from the base of the slide.

b. The use zone for swings used by toddlers is determined by measuring the distance from the top of the swing to the bottom of the bucket seat. This measured distance must extend from both the front and the back of the swing.

c. Preschool and school-age climbing equipment must have a six (6) foot use zone surrounding the equipment. For slides exceeding six (6) feet in height, the use zone from the base of the slide must be as long as the slide height.

d. The use zone for swings used by children preschool age and older is determined by measuring the distance from the top of the swing to the ground. This measured distance must extend from both the front and the back of the swing.

4. Moving equipment must be located toward the edge or corner of a play area or be designed in such a way as to discourage children from running into the path of the moving equipment.

5. Metal equipment must be placed in the shade.

6. All pieces of playground equipment must be designed to guard against entrapment and strangulation. Any openings in gross motor equipment above ground must be smaller than three and one half (3 ½) inches or greater than nine (9) inches to prevent entrapment.

7. Swings must have seats made of a flexible material and all “S” hooks must be secured.

8. All outdoor play areas used for children’s activities must be checked daily and kept safe and free from hazardous materials or debris by removal of debris, dilapidated structures, and broken or worn play equipment. The staff must identify hazardous, high-risk areas; those areas must be made inaccessible to children to reduce the possibility of injuries and accidents.

D. For purposes of a playground facility inspection, the Department shall accept as satisfactory proof of valid certification of the playground facility, certification, or a copy of certification, from an individual who is licensed or certified to perform playground safety inspections through the National Recreation and Park Association, or other nationally recognized playground facility safety organization. The Department shall not require a duplicate inspection if there is a satisfactory inspection report.

1. All playground facilities who hold a certified playground safety inspection must maintain resilient surfacing in compliance with the certification.

E. Children must wear helmets when riding scooters, bicycling, skateboarding, or rollerblading. The helmet must be removed after the activity. Motorized riding toys are not permitted.

F. Trampolines and inflatable bouncers are prohibited.

2.230~~7.702.73~~ INDOOR LEARNING ENVIRONMENT

A. Indoor Space Requirements

1. There must be open, indoor play space of at least thirty (30) square feet of floor space per child, including space for movable furniture and equipment. For space to be counted in the square footage calculation, the space must be accessible and used by children.

2. Indoor play areas must be uncluttered, safe, and allow for freedom of movement.

3. Adequate storage space must be provided for indoor and outdoor equipment and supplies.

4. Number of Children Allowed in One (1) Room

AGE OF CHILDREN	MAXIMUM NUMBER OF CHILDREN IN A ROOM
6 weeks to 18 months	10 infants
12 months to 18 months	10 infants
12 months to 36 months	20 toddlers
18 months to 24 months	20 toddlers
24 months to 36 months	28 toddlers
30 months to 36 months	28 toddlers

5. Square Footage Requirement per Child

AGE OF CHILD	SEPARATE FREE PLAY AREA	SEPARATE SLEEP AREA	COMBINED SLEEP AND PLAY AREA
6 weeks to 18 months (infants)	35 square feet	Adequate space to accommodate size of cribs and needs of infant and staff	50 square feet
12 months to 36 months (toddlers)	30 square feet	30 square feet	45 square feet
2-1/2 years to 5 years (preschool)	N/A	N/A	30 square feet
5 years and over (school-age)	N/A	N/A	30 square feet

6. In the infant program, the minimum indoor space per infant for sleep and activities is fifty (50) square feet.

    1. In a combination sleep/activity rooms, the sleep area must be separated by a sturdy divider from the area used for activities, and cribs must be arranged so that all infants and cribs are easily accessible to staff members.

2.231~~7.702.74~~ OUTDOOR LEARNING ENVIRONMENT

A. Outdoor Space Requirements

1. Readily accessible gross motor play space and access to outdoor space must be provided.

2. The outdoor learning environment for preschool age and older must provide a minimum of seventy-five (75) square feet of space per child for a group of children using the total play area at any one time. the total play area must accommodate at least thirty-three percent (33%) of the licensed capacity for children preschool age and older or a minimum of 1,500 square feet, whichever is greater.

    a. Programs who qualify for an outdoor space hardship per rule section 2.231(B)(1)~~7.702.74, B, 1,~~ must meet the minimum outdoor learning environment square footage requirements indoors or through a combination of indoor and outdoor space.

3. The play area must be fenced or have natural barriers, such as hedges or stationary walls at least four (4) feet high, to restrict children from unsafe areas.

    a. Centers licensed to provide care for preschool-age children only may use the centers perimeter fencing if they maintain a ratio of one (1) staff member to eight (8) children.

4. The play area must be designed so that it is easily supervised.

5. A minimum of one hundred fifty (150) square feet of shaded area in the fenced play area must be provided to guard children against the hazards of excessive sun and heat. Shaded areas must be provided year-round.

6 In the infant program, the outdoor play area must be a minimum of four hundred (400) square feet.

7. In the infant program, the outdoor area can be used by other age groups at the center, but it must not be used by any other group of children while infants are using it.

8. The total outdoor play area for toddler age groups must be a minimum of seven hundred fifty (750) square feet if licensed for ten (10) toddlers and one thousand fifty (1,050) square feet if licensed for fourteen (14) or more toddlers, or seventy-five (75) square feet per child for the largest group size for which the program is licensed.

9. In the toddler program, the outdoor play area can be shared by infants, but infants and toddlers must not be allowed to use the play area at the same time.

B. Outdoor Space Hardship

1. If an outdoor play space is not directly attached to the facility or accessible via secure access, or the child care facility cannot meet outdoor space requirements due to a hardship based on the location of the facility, the facility must develop a site-specific plan, which will be submitted to the Department for review and approval, that includes the following:

    a. Identification of an accessible (appropriate for the age group of children served) alternate outdoor space including a description and approximate square footage of the space;

    b. A diagram outlining how children will safely travel to and from this location;

    c. A plan for supervision, including any special staffing requirements, to safely access and utilize the alternate outdoor space that includes:

(1) Attendance tracking upon arrival to the outdoor space and return to the facility;

(2) Children's toileting and diapering needs;

(3) Children's routine and emergency medical needs including the use of first aid kits and accessibility of emergency contact information when not on site at the child care facility;

(4) Plans for alternate activities if the outdoor space is unavailable; and~~,~~

(5) If play equipment or climbing structures are present in the outdoor space, a plan for assessing safety of equipment and supervising age-appropriate play~~.~~;

d. An emergency evacuation plan including the location of a secondary site for reunification with parents in the case of an emergency while at the offsite location and plans for accessing shelter in the case of emergency; and,

e. A policy that notifies the parent(s)/guardian(s) of the alternate outdoor space.

2. If the outdoor space becomes unusable or the program cannot maintain what was approved in the plan, the program must submit a new plan to the Department within ten (10) calendar days of a change in the usability of such outdoor space.

3. Child care facilities licensed prior to December 1, 2021, may not reduce or eliminate existing licensed outdoor space to qualify for the outdoor space hardship.

~~7.702.8~~ BUILDINGS AND FACILITIES

2.232~~7.702.81~~ BUILDING SITE

A. General

1. Centers can be located in a private residence only when that portion of the residence to which children have access is used exclusively for the care of children during the hours the center is in operation or is separate from the living quarters of the family.

2. No other business can operate in the rooms used by the center during the hours of child care.

3. Rooms licensed for specific ages of children cannot be used for other ages of children without the prior written approval of the licensing authority.

4. Prior to licensure, if the infant or toddler program is located on a floor above or below the main floor of egress leading directly outside, the child care facility must develop and submit an alternate location plan for approval by the Department that includes following:

a. Fire department and building department approval per the locally adopted fire and building codes;

b. An emergency evacuation plan with identified primary and secondary areas of refuge;

c. Any special equipment necessary to operate in and evacuate safely from the alternate location; and~~,~~

d. Any special staffing and training requirements to ensure the ability to safely evacuate the alternate location.

B. Infant Programs

1. If the infant program is in the same building as a facility caring for children of other ages, the infant program must be physically separated in different rooms by walls no less than eight (8) feet and full doors.

C. Toddler Program

1. If the toddler program is in the same building as a facility caring for children of other ages, the toddler program must be physically separated in different rooms by walls no less than eight (8) feet and full doors.

2. If the toddler program is combined with a large child care center or an infant program, toddler facilities, both indoor and outdoor, must be completely separate from facilities for other age groups, except as allowed by rule sections 2.231(A)(6) and (8)~~7.702.74, A, 6 and 8~~. If the facility wishes to provide opportunities for a toddler to have occasional contact with siblings, plans must be approved by the Department licensing representative.

2.233~~7.702.82~~ BUILDING PLANS AND CONSTRUCTION

A. The center must comply with applicable state and local building and fire codes.

B. Prior to construction, architectural plans for new buildings or for remodeling of existing buildings must be submitted for review and approval by the Department, the local fire department, and the local building department as to appropriateness, adequacy, and suitability for child care functions.

2.234~~7.702.83~~ TOILET FACILITIES

A. Toilet facilities for the staff and other adults must be in separate restrooms or be separated by a partition from children's facilities, except in centers licensed for thirty (30) or fewer children and in centers with programs of four (4) hours or less.

1. In toilet facilities where the adult and children’s facilities are separated by a partition, adults and children must not use the facilities at the same time.

2. After January 1, 2022, staff and children toilet facilities must be separate in new construction.

B. Toilet facilities for children must be separate from rooms used for other purposes and must be located on the same floor as the inside play area.

C. A minimum of one (1) sink and one (1) flush toilet must be provided for each fifteen (15) or fewer children.

D. The same toilet facilities must not be used simultaneously by school-age children of all genders, and toilets for school-age children must be separated by partitions to provide privacy.

1. School-age children must be allowed the use of toilet facilities that correspond with their gender identity.

E Toilet facilities must be provided for children two (2) years of age and older.

F. Toilet facilities for toddlers must be located within their classroom.

2.235~~7.702.84~~ OFFICE FACILITIES

A. Office space separate from areas used by children must be provided for staff to perform administrative duties.

1. If the office space is accessible to children, it must be free of hazards.

B. The office must have sufficient space for maintenance and safe storage of children's and staff records and the center's business records.

~~7.702.9~~ SAFETY REQUIREMENTS

2.236~~7.702.91~~ GENERAL REQUIREMENTS

A. Firearms as defined in section~~§~~ 18-1-901(3)(h), C.R.S., are prohibited on the premises, both indoor and outdoor, and in any vehicle in which children are transported.

B. Buildings must be kept in good repair and maintained in a safe condition.

C. Major cleaning is prohibited in rooms occupied by children.

D. Volatile substances such as gasoline, kerosene, fuel oil, oil-based paints, firearms, explosives, and other hazardous items must not be stored in any area of the building used for child care.

E. Combustibles such as cleaning rags, mops, and cleaning compounds must be stored in well-ventilated areas, separated from flammable materials, and stored in areas inaccessible to children.

F. All heating units, gas or electric, must be installed and maintained per the manufacturer's specifications with safety devices to prevent fire, explosions, and other hazards. No open-flame gas or oil stoves, unscreened fireplaces, hot plates, or unvented heaters can be used for heating purposes. All heating elements, including hot water pipes, must be insulated or installed in such a way that children cannot come in contact with them.

G. Combustible materials must not be stored in hallways, stairways, boiler rooms, mechanical rooms, or electrical equipment rooms.

H. In rooms used by children, all electrical outlets that are accessible to children must have protective covers, or safety outlets must be installed.

I. Permanently located battery-powered lights must be provided in locations readily accessible to staff in the event of electric power failure. Batteries must be checked regularly.

J. Closets, attics, basements, cellars, and furnace rooms must be kept free from accumulation of extraneous materials such as furnishings, newspapers, and magazines.

K. Kitchens, including all hazardous items, must be inaccessible to children at all times.

2.237~~7.702.92~~ FIRE SAFETY

Centers must comply with the locally adopted fire code, including but not limited to the following:

A. Every building and structure must have the minimum required number of exits to permit the prompt escape of occupants in case of fire or other emergency. Additional safeguards must be provided for life safety in case any single safeguard is ineffective due to some human or mechanical failure.

B. Every building or structure must be constructed, arranged, equipped, maintained, and operated as to avoid undue danger to the lives and safety of its occupants from fire, smoke, fumes, or resulting panic during the period of time reasonably necessary for escape from the building or structure in case of fire or other emergency.

C. In every building or structure, exits must be arranged and maintained so as to provide free and unobstructed egress from all parts of the building or structure at all times when it is occupied. No lock or fastening to prevent free escape from the inside of any building can be installed. Only panic hardware or single-action hardware is permitted on a door or on a pair of doors. All door hardware must be within the reach of children.

D. No children younger than school age can be cared for in areas above or below the main floor of exit unless in compliance with all Codes and Standards as adopted by the local jurisdiction and approved by the local fire department, or except as provided in the location exception in rule section 2.232(A)(4)~~7.702.81, A, 4~~.

E. One (1) exit from each room must be directly to the exterior of the building or to a common hallway leading to the exterior. The exit path must not go through an intervening room such as a bathroom, another classroom, storage room, or kitchen.

F. All stairways, interior and exterior, that are used by children must be provided with handrails within reach of the children.

G. Regardless of the number of staff and children, exit doors shall be openable from the inside without the use of a key or any special knowledge or effort. Dead bolts may be installed on the main exit door, but the lock cannot be used during business hours, and there must a sign indicating that “this door must remain unlocked during business hours.”

H. Every exit must be clearly visible, or the route to reach it must be conspicuously indicated. Each path of escape must be clearly marked.

I. Fire alarm and fire sprinklers must be provided in accordance with the locally adopted fire code. If a fire alarm system is installed, it must be used to warn occupants of the existence of fire or to facilitate the orderly conduct of fire exit drills.

~~7.702.100~~ DROP-IN, PART DAY, MOBILE PART-DAY PRESCHOOL, TEEN PARENT PROGRAMS, AND OTHER PROGRAMS OPERATED BY PUBLIC SCHOOL DISTRICTS

2.238~~7.702.101~~ DROP-IN PROGRAMS

A. Director Requirements

1. The director or assistant director of an extended hour drop-in child care center operating at least six (6) calendar days per week must be present at the center or involved in director activities at least fifty percent (50%) of the hours of operation of any day the center is in operation.

a. If the director is not on site at the center for a portion of any day that center is in operation, the director must be available by phone.

b. The director must be present in the center at least thirty (30) hours each week.

2. Whenever the director of a drop-in child care center cannot be present fifty percent (50%) of any day the center is in operation, an assistant director that meets one (1) of the following qualifications must be present:

a. At least one (1) year of experience as a qualified early childhood teacher at the drop-in child care center;

b. Eighteen (18) months of experience as a qualified early childhood teacher with children less than twelve (12) years of age and at least six (6) months experience at the drop-in child care center;

c. A Bachelor's, Master's, or Doctorate degree from an accredited college or university in one (1) of the human services field below:

(1) Child Development;

(2) Child Psychology;

(3) Early Childhood Education;

(4) Early Childhood Special Education;

(5) Educational Leadership and Administration;

(6) Elementary Education;

(7) Family and Human Development;

(8) Family Studies;

(9) Special Education; or~~,~~

d. Qualification as an early childhood teacher and completion of at least half of the required coursework for director qualifications, including one (1) of the following administration classes:

(1) Administration Of Early Childhood Care and Education Programs; or~~,~~

(2) Administration Human Relations for Early Childhood Professions or Introduction to Business.

B. Staff to Child Ratios

1. Drop-in child care centers may follow a ratio of one (1) adult for every eight (8) children for children in a mixed age group of two (2) years of age to twelve (12) years.

2. One (1) to two (2) children, one (1) year of age to two (2) years of age, may join the preschool age group of children for short periods of time for structured activities.

C. Health Care

1. For children attending a drop-in center, the parent(s)/guardian(s) of each child must submit a statement of the child's current health status or written verification of a scheduled appointment with a health care provider within thirty (30) calendar days or by the second visit, whichever is longer. The statement of the child's current health status must be signed and dated by a health care provider who has seen the child within the last twelve (12) months, or within the last six (6) months for children less than two and one-half (2 ½) years of age. Subsequent statements are not required if there have been no health changes in the child and the parent(s)/guardian(s) attest in writing to the health status of the child on an annual basis. Children attending drop-in child care with special medical needs must have the statement from a health care provider as indicated in rule section 2.218(B)~~7.702.51, A, 2, b-e~~.

D. Rest Time Equipment

1. Drop-in child care centers must provide mats or cots for at least fifty percent (50%) of the licensed capacity of the center.

E. Play-Equipment and Materials

1. Drop-in child care centers must provide indoor gross motor equipment, including, but not limited to, an indoor climbing structure, an open area for indoor, and must provide gross activities at least two (2) times during each six (6) hour period of time.

F. Building Site- Toddler Program

1. A toddler program located in a drop-in child care center licensed for five (5) or fewer toddlers may be separated from the rest of the center by a five (5) foot wall.

2. Drop-in child care centers must provide a minimum of one (1) sink and one (1) toilet for each twenty (20) or fewer children.

3. Toilet facilities are not required to be located in the toddler classroom for drop-in child care centers licensed for ten (10) or fewer toddlers.

2.239~~7.702.102~~ PART-DAY PROGRAMS

A. Safe Sleep Environment

1. Supervised tummy time must be offered to infants one (1) month of age or older at least two (2) times per day for part day programs for short periods (3-5 minutes) and increase the amount of time as the infant shows they enjoy the activity. If the infant falls asleep during tummy time, immediately place him/her on their back in approved sleeping equipment.

B. Gross Motor Activities

1. Daily gross motor activities, with or without equipment or materials, must be provided outdoors, or indoors during inclement weather. Activities do not have to occur all at once.

   a. Programs who qualify for an outdoor space hardship per rule section 2.231(B)(1)~~7.702.74, B, 1,~~ must provide daily physical gross motor activities indoors or outdoors.

2. Daily physical gross motor activities must be provided for children toddler age and older based on the program's hours of operation:

a. For programs operating up to three (3) hours per day, fifteen (15) minutes of gross motor activities is required.

b. For programs operating between three (3) and five (5) hours per day, thirty (30) minutes of gross motor activities is required.

2.240~~7.702.103~~ MOBILE PART-DAY PRESCHOOL PROGRAMS

A. Policies

1. Written schedules must be provided to parent(s)/guardian(s) and the Department. Any changes to location must be provided to parent(s)/guardian(s) and the Department in advance.

2. The program must have an emergency evacuation plan and location.

a. The program must develop a plan for transporting children, specific to each mobile unit, in the case of an emergency. The plan must be approved by the Department prior to caring for children.

B. Staff Qualifications

1. There must be a large child care center qualified director available during operating hours. A director can oversee multiple mobile preschool programs under the same governing body.

2. Each mobile preschool program must have a qualified early childhood teacher on site.

C. Supervision

1. Children must be directly supervised when entering and exiting the mobile preschool.

D. Child Care Equipment and Materials

1. A variety of developmentally appropriate materials, equipment, and learning activities from the following categories must be available so that for any one time at least half of the children for which the program is licensed can be individually involved:

a. Art;

b. Blocks and accessories;

c. Books and pictures;

d. Imaginative play;

e. Manipulatives;

f. Music; and

g. Science and math.

E. Facility Requirements

1. The mobile unit must be parked and appropriately secured prior to children arriving for care.

2. The use of handwashing sinks and toilets not located within the facility must be approved by the Colorado Department of Public Health and Environment.

3. If the mobile preschool is approved by the Colorado Department of Public Health and Environment to use a toilet located outside of the facility, there must be one (1) additional staff member, who is an assistant early childhood teacher or an early childhood teacher, to properly supervise and accompany the children to the toilet facilities.

4. If the Colorado Department of Public Health and Environment approves the use of a public restroom, the restroom must not be shared with the public during the hours the preschool is in operation.

5. There must be a minimum of fifteen (15) square feet per child in the mobile classroom.

6. The mobile preschool must be capable of maintaining a draft-free temperature of a minimum of sixty-eight (68) degrees Fahrenheit.

7. The program must have safely accessible access to an outdoor area for daily planned activities, during inclement weather, an indoor space must be available for gross motor activities.

   a. Programs who qualify for an outdoor space hardship per rule section 2.231(B)(1)~~7.702.74, B, 1,~~ must provide daily physical gross motor activities indoors.

F. Safety

1. Space heaters must have screens, a safety overheat protection, a safety trip-over switch, and be inaccessible to children.

2. The mobile preschool must have two (2) means of emergency egress.

2.241~~7.702.104~~ TEEN PARENT PROGRAMS OPERATED BY A PUBLIC SCHOOL DISTRICT

A. Infant programs affiliated with teen parent programs that are operated by accredited public school systems and on school premises may substitute the following age requirements for those at rule section 2.203(B)(3)~~7.702.1, B, 3~~:

1. The minimum age of infants in care is seven (7) days.

2. Infants between the ages of seven (7) and thirteen (13) days may be accepted for care only with written approval from a health care provider and if there are no medical complications for the infant and/or teen mother.

3. Infants fourteen (14) days of age and over may be accepted for care if there are no medical complications for the infant and/or teen mother.

4. The maximum age of infants in care may be extended only in those situations where no teen parent toddler program exists. In this circumstance, an infant may remain in the infant program until the end of the school semester in which the infant becomes eighteen (18) months old.

B. Infant and toddler programs affiliated with teen parent programs that are operated by accredited public school systems on school premises may substitute the following staff requirements for those at rule sections 2.215(B) and (C)7.702.45 B, C:

1. The director must be present in the infant program classroom or adjacent teen parent classroom at least sixty percent (60%) of any day the center is open.

2. If the director cannot be present sixty percent (60%) of any day, an individual who meets assistant director qualifications must substitute for the director.

3. Infant staff aides must be at least fifteen (15) years of age and may be parents-to-be, parents of enrolled infants, or students enrolled in a child care related course with the sponsoring school system.

4. Substitutes for infant program staff must be from the sponsoring school system''s list of approved substitute staff members. Substitutes who do not meet minimum staff qualifications can work no more than ten (10) consecutive business days per assignment. The dates and times must be recorded and made available for review at all times.

5. Substitutes for infant program staff must hold a current Department-approved first aid and safety certificate that includes cardiopulmonary resuscitation (CPR) for all ages of children.

C. Rest Time Equipment

1. Bassinets and playpens are allowed for use in a teen parent program when the teen parent(s) remain(s) on site.

2.2427.702.105 CHILD CARE PROGRAMS AND PRESCHOOLS OPERATED BY A PUBLIC SCHOOL DISTRICT

A. The administration of medical marijuana must comply with policies listed in sections §12-255-120 and, 12-255-127, and 2-30-116. C.R.S.

B. Director Requirements

1. Preschool age classrooms that are operated by public school districts are not required to have a large center director qualified staff member assigned to each program when they have an organizational structure that includes at least ten (10) administrative support elements from the following:

a. Colorado Preschool Program Coordinator;

b. Parent Educational Specialist;

c. Principal;

d. Health Coordinator;

e. Nurse;

f. Health Technician;

g. Food Service Director;

h. A Registered Dietitian or an individual with a Master's level or higher education in Nutrition;

i. Fire/Health/Safety Inspector;

j. Mental Health Team;

k. Speech Language Pathologist;

l. Occupational/Physical Therapist;

m. School Psychologist;

n. Family Outreach Worker;

o. Human Resource Specialist; or~~,~~

p. Transportation Manager.

2. The program must obtain a director who meets large center director qualifications if substantial evidence has been found leading to an adverse licensing action for any of the following:

a. Lack of supervision;

b. Operating out of the approved staff member to child ratio; or

c. Operating without sufficient qualified staff.

3. Programs who have their director privileges revoked may submit a request for consideration after a period of two (2) years from successful completion of the adverse licensing action.

C. Substitutes

1. Substitutes for directors of part-day public school preschools may be from the sponsoring school system's list of approved substitutes. Substitutes who do not meet director qualifications must consult with a qualified director on administering the center in accordance with early childhood principles and practices and licensing rules.

2. In licensed programs operated by public school districts, substitutes may be from the sponsoring school system's list of approved substitutes. Substitutes who do not meet qualifications for the position that they are substituting for can be used up to ten (10) calendar days per year. The dates and times must be recorded and made available for review at all times.

D. Outdoor Space Requirements

1. Licensed preschool programs operated by public school districts who do not meet fencing or barrier requirements in rule section 2.231(A)(3)~~7.702.74, A, 3,~~ may use the school's perimeter fencing if they maintain a ratio of one (1) staff member to eight (8) children.

…

RULES REGULATING CHILDREN'S RESIDENT CAMPS

2.400 AUTHORITY

These rules and regulations are adopted pursuant to the rulemaking authority provided in section 26.5-1-105(1), C.R.S., and are intended to be consistent with the requirements of the State Administrative Procedures Act, sections 24-4-101 et seq. (the "APA"), C.R.S., the Anna Jo Garcia Haynes Early Childhood Act, sections 26.5-1-101 et seq. (the "Early Childhood Act"), C.R.S., and the Child Care Licensing Act, sections 26.5-5-301, et seq., C.R.S.

The specific rulemaking authorities granted for the Resident camps include sections XXX, C.R.S.

2.401 SCOPE AND PURPOSE

The Colorado Department of Early Childhood, Division of Early Learning, Licensing, and Administration is responsible for the administration of health and safety rules and requirements for licensed child care facilities These rules and regulations shall govern the processes and procedures to become a licensed Resident Camp, and the health and safety requirements of Resident Camps in Colorado. In addition to the "General Rules for Child Care Facilities" in rule section 2.100, Children's Resident Camps shall follow the rules specified in this rule section 2.400, and the "Rules Regulating Special Activities" in rule section 2.600.

2.402 APPLICABILITY

The provisions of these rules and regulations shall be applicable to licensed Resident Camp operating for three or more consecutive twenty-four-hour days during one or more seasons of the year for the care of five or more children.

~~7.711 RULES REGULATING CHILDREN'S RESIDENT CAMPS~~

~~In addition to the General Rules for Child Care Facilities, Children's Resident Camps shall follow the rules specified in this section and the "Rules Regulating Special Activities".~~

2.403~~7.711.1~~ DEFINITIONS

A. A "residential camp" means a facility operating for three or more consecutive twenty-four-hour days during one or more seasons of the year for the care of five or more children. The facility shall have as its purpose a group living experience offering education and recreational activities in an outdoor environment. The recreational experiences may occur at the permanent camp premises or on trips off the premises. A children's resident camp shall serve children who have completed kindergarten or are six years of age or older through children younger than nineteen years of age; except that a person nineteen years of age or twenty years of age may attend a children's resident camp if, within six months prior to attending the children's resident camp, he or she has attended or has graduated from high school.

B. A residential camp may have a "primitive camp" which is a portion of the permanent camp premises or another site at which the basic needs for camp operation, such as places of abode, water supply systems, and permanent toilet and/or cooking facilities, are not usually provided.

C. A "travel-trip camp" shall be known as a camp in which there is no permanent camp site and children move from one site to another. The travel-trip camp either originates in Colorado or moves into and/or through Colorado from another state and operates for three or more consecutive 24-hour days during one or more seasons of the year for the care of five or more children who are at least ten (10) years old or have completed the fourth grade. The program shall have as its purpose a group learning experience offering educational and recreational activities utilizing an outdoor environment.

D. The "Department" means the Colorado Department of Early Childhood.

~~7.711.11~~2.404 PURPOSE AND GOALS

Each camp must submit to the Department a statement of goals and objectives. This statement must be kept on file, updated periodically, made known to staff, and available for licensing inspection.

2.405~~7.711.12~~ GOVERNING BODY

The governing body must be identified by its legal name. The names and addresses of individuals who hold primary financial control and officers of the governing body must be disclosed fully to the Colorado Department of Human Services. The governing body is responsible for providing necessary facilities, adequate financing, qualified personnel, services, and program functions for the safety and well-being of children in accordance with these rules. When changes of governing body occur, the new governing body must immediately submit an original application and pay the required fee.

A. If the governing body lets, leases, or rents the licensed facility to any group or organization whose program falls under the definition as found at rule section 2.403(A)~~7.711.1~~, and verifies in writing to the ~~State~~ Department that the lessee meets the licensing standards, an application is not required of the lessee. If the governing body does not verify that the lessee meets the licensing standards, an application is required of the lessee and the license must be issued to the lessee before the camp opens.

B. When the facility is let, leased, or rented, the governing body must report the following in writing at the request of the ~~State~~ Department: name of the group, number and ages of children, length of time for use of the facility, and the purpose of the camp.

2.406~~7.711.13~~ FINANCIAL SUPPORT

The governing body must satisfy the Department upon request that there is sufficient financial support to operate and maintain a camp in accordance with these rules and camp goals and objectives.

2.407~~7.711.14~~ INSURANCES

Every facility must carry public liability insurance. The applicant or licensee must submit the amount of the insurance and the name and the address of the insurance agency providing the insurance to the camp. The camp must maintain information about the insurance at the campsite.

~~7.711.15~~2.408 WRITTEN AGREEMENTS, REPORTS, AND LOGS

A. There must be on file at the campsite an annually-dated a written or electronic agreement with a licensed physician or nearby health care facility to provide the necessary medical services for campers at the camp and medical help as a backup to the camp staff members responsible for health supervision.

B. A travel-trip camp is not required to have a written agreement, but it must have a list of all medical facilities in areas where the travel-trip camp will be traveling.

C. The camp must maintain at the campsite a medical record keeping system, listing name of camper, illness or injury, prescribed treatment and date the treatment was administered, and name of person administering care. This record keeping system must be available to licensing personnel.

D. The camp must submit as soon as possible but not longer than twenty-four (24) hours to the ~~State~~ Department a written report about any camper who has been separated from the group

outside of the supervision of their assigned staff member or for whom a report has been made to the local Sheriff's department for search and rescue. Such report must indicate the name, age, and address of the camper; the name of parents/guardians and their address if different; the date when the child was lost; the location, time, and circumstances when the camper was last seen; and circumstances of locating the camper.

~~7.711.2~~ PERSONNEL

~~7.711.21~~2.409 GENERAL REQUIREMENTS FOR ALL PERSONNEL

A. All paid employees at the camp less than 16 years of age must be employed in compliance with Colorado labor laws.

B. All counselors and staff members having a supervisory role with campers must be at least eighteen (18) years of age, or seventeen (17) years of age and graduated high school or completion of GED, and have interest in, respect for, and ability to work with children.

C. There must be a letter of agreement with each volunteer or employed staff member which includes listing of specific responsibilities/job description and referring to information contained in the hiring packet or staff manual. Days or hours of employment/time off, personal conduct, and health history questionnaire must be provided in writing or electronically and may be provided in the hiring packet or the staff manual. The letter of agreement must be signed by both the employer and the volunteer or staff member. In the case of staff members or volunteers who are younger than eighteen (18) years old, the letter of agreement must also be signed by the parents/guardians.

D. There must be at least three references for each staff member of the camp attesting to the individual's character and suitability to work with children. The written references must be in the personnel file or there must be an indication in the personnel file that a reference has been obtained.

E. Each staff member must complete an annual health history. The health history must be maintained in a secured location at the camp.

F. Each staff member must be trained and given written instructions as to camp policy when emergencies occur including but not limited to: lost campers, medical situations, hazardous wildlife and environmental hazards. In the case of travel trip or primitive camps, these plans must accompany the staff and campers.

~~7.711.22~~2.410 CAMP PERSONNEL

A. Each camp must have an onsite director who must be at least twenty-one (21) years of age. The director must have 12 months (1820 hours) verified leadership experience in an administrative or supervisory position, with groups of children five (5) years of age or older, since he or she attained the age of eighteen (18) years.

B. At each permanent camp there must be one health care worker who is responsible for monitoring the overall health of the campers and staff. A health care worker must be one of the following: a licensed physician, a registered nurse, a licensed practical nurse, a licensed physician's assistant, a certified nursing aide~~assistant~~ or an individual who holds current certification in emergency medical services. All health care workers must work within their scope of practice, including the ability to work independently or with required oversight.

1. At least one health care worker must be at the camp twenty-four (24) hours per day that the camp is in session.

2. If the camp health care worker is not a physician or registered nurse~~RN, a physician or RN currently~~ actively licensed by the Colorado Medical Board or State Board of Nursing~~in Colorado~~, must specifically delegate the camp staff member the authority to administer medications. The delegating physician or registered nurse~~RN~~ must be aware of the specific medical needs of campers, be available for consultation while the camp is in session, and accept responsibility for monitoring the therapeutic effects of medications administered at camp. Respiratory Therapists may administer medication within their scope of practice.

3. In order to administer medications all health care workers, except physicians and registered nurse~~RN~~s, must complete the Department-approved Medication Administration Training, receive delegation and hold current Department-approved First Aid and Cardiopulmonary Resuscitation (CPR) Certification.

C. At any camps less than thirty (30) minutes from emergency medical services by vehicle, in clear weather, there must be at least one staff member with each group of children qualified with Department-approved First Aid, CPR, and Medication Administration Training and delegation.

D. All staff members must complete a Department-approved Standard Precautions training prior to working with children. This training must be renewed annually and may count towards ongoing training requirements.

E. For every thirty (30) or fewer children in attendance, there must be at least one (1) staff member with each group of children who holds current Department-approved First Aid and CPR for all ages of children. At any camp more than thirty (30) minutes away from emergency medical services, there must be at least one (1) staff member with each group of children qualified with a minimum of Wilderness First Aid Training, Department-approved CPR and Medication Administration Training. Staff members with Medication Administration Training must have annual delegation as required ~~at~~in rule section 2.410(B)(3)~~7.711.22.b.3~~.

F. There must be sufficient camp counselors or staff members who have a supervisory role with children at the camp to meet the staff ratio as indicated in rule section 2.411~~7.711.23~~. Children under the age of six (6) years who live at camp or are visiting must be directly supervised by a caregiver, who is not included in the staff to camper ratio, at all times when the children are involved in camp activities. Staff members whose children are under six (6) years of age cannot be supervising campers or leading special activities when they are supervising their own children.

G. If the camp has counselors-in-training who are not fully qualified, they must be directly accountable to a qualified counselor or specialized staff member and must be directly supervised by those individuals in their role when caring for children. The counselors-in-training who are less than eighteen (18) years old must not be counted as staff members in the maintenance of the staff ratio for supervision of children as found in~~at~~ rule section ~~7.711.23~~2.411.

H. There must be specialized staff members who are responsible for specific portions of the camp program. Requirements for those specialized staff members are found among the requirements for the specialized activity areas in~~at~~ the "Rules Regulating Special Activities," in rule section~~s 7.719~~2.600, *et seq*.

CHILD CARE

~~7.711.23~~2.411 SUPERVISION

A. The camp must have an accurate system whereby staff members who are responsible for the supervision of children must know where each child is at all times.

B. At no time may a camper be left without qualified supervision. Sleeping quarters of the counselors must be within sight or hearing distance of the sleeping quarters of the children whom they supervise. Children may sleep alone for specific program functions such as solos or survival experiences and then only when regularly monitored pursuant to the camp's written program. The camp's written program must include an audible mechanism for a camper to alert a staff member who is able to immediately respond.

C. Each special activity must be supervised by a staff member currently qualified in Department-approved First Aid and Cardiopulmonary Resuscitation (CPR) training, and by the experience and training in that special activity as specified in the "Rules Regulating Special Activities," in rule sections ~~7.719~~2.600, *et seq*.

D. In a residential camp, ratio of one (1) staff member having a supervisory role with children per number of campers must be maintained at all times as follows:

Age of Children	Number of Children	Number of Staff Members
5 through 7 yrs. Old	6	1
8 through 10 yrs. Old	8	1
11 through 13 yrs. Old	10	1
14 yrs. And older	12	1

E. In a trip away from the residential camp premises or at the primitive camp, the staff ratio given ~~at~~in rule section 2.411(D)~~7.711.23, D~~, must be maintained, but there must be at least two staff members accompanying each trip, and one staff member must meet the qualifications as defined in rule section 2.410© and ©~~7.711.22.C, E~~. If the trip exceeds two nights, there must be with the group a staff member who is at least twenty-one (21) years of age, exercises good judgment, the ability to assume leadership independently and has been trained in trip leading procedures.

F. In a travel-trip camp, the staff ratio provided in~~given at~~ rule section 2.411(D)~~7.711.23.D~~ must be maintained, but there must be at least two (2) staff members at all times with the campers. One (1) of those staff members must be at least twenty-one (21) years old and one (1) staff member must meet qualifications of the health care worker as defined in rule section 2.410(B)~~7.711.22.B~~.

G. In the case of trips away from the permanent residential camp, including overnights or travel-trip camps, there must be a day-to-day itinerary prepared prior to departure. The resident camp headquarters must keep a copy of the itinerary. The itinerary must be followed as closely as possible. Camp headquarters must be notified of an itinerary change as soon as possible.

~~7.711.3 CHILD CARE~~

~~7.711.31~~2.412 HEALTH CARE

A. The camp health program must be under the supervision of an individual qualified as stated in~~at~~ rule section 2.410(B)~~7.711.22, B~~.

B. At least ten (10) calendar days prior to admission, each camper must furnish a health history which indicates communicable diseases and chronic illnesses or injuries the individual has had,

any known drug reactions and allergies, medications being taken, and any necessary health procedures or special diets.

C. The camp must inform its health care worker prior to the first day of care of the enrollment of a child with special health care needs, if known, to ensure staff receives training, delegation and supervision as indicated by the child's individualized health care plan.

D. The camper must present a statement confirming a physical examination, which has been performed within the preceding twenty-four (24) months from the first day of attendance at camp by a health care provider, which includes any physical problems which would limit the camper's activity, and any special care which the child will need.

E. The camper must submit documentation of immunization status or exemption as required by Colorado Department of Public Health and Environment (CDPHE). Colorado law requires proof of immunization or exemption be provided prior to or on the first day of admission.

F. Upon arrival or within twenty-four (24) hours each camper must be observed, by camp staff trained to do so, to identify noticeable evidence of any illness, communicable disease, or signs of abuse. The camp health care worker must meet with campers that have special medications, health procedures, special diet restrictions, known allergic reactions, chronic health conditions or any known physical limitations.

G. The camp must provide evidence that the exclusion of a child that shows signs of illness or communicable disease is in compliance with the exclusion guidelines of the Colorado Department of Public Health and Environment (CDPHE). If a child needs to be excluded the camp must consult a doctor or medical facility as to the child's treatment.

H. If a camper requires medical attention away from the camp site, the camper's parents/guardians must be notified and necessary medical care must be sought from a health care provider or medical facility. Written authorization for medical care must be in the child's file pursuant to rule section 2.417~~7.711.61.A.9~~.

I. In the case of travel-trip camps, primitive camps, or tr~~am~~ips away from the camp, a copy of the statement which has been signed by the parent or guardian indicating that the camp staff may obtain emergency medical care must be in the possession of staff members accompanying the campers. The original signed statement must be readily accessible.

J. The camp health care worker must be responsible for administering medication to campers. If the health care worker is not a ~~currently~~ Colorado licensed registered nurse~~RN~~ or physician, the health care worker may only administer medication prescribed for individual campers as delegated and supervised by a~~n~~ registered nurse~~RN~~ or physician. Respiratory therapists may administer medication within their scope of practice.

1. Medication prescribed for campers must be from a licensed pharmacy; labeled with the name, address, and phone number of the pharmacy; name of the camper; name and strength of the medicine; directions for use; date filled; prescription number; and the name of the practitioner prescribing the medicine. When no longer needed or expired, the medication must be returned to the parent or disposed of properly.

A. When the camp has an on-site RN or physician, and campers are on excursions away from the camp, the RN or physician is responsible for determining a safe process for the administration of routine and emergency medications. This process should include:

i. The transfer of medications and associated documents from their usual storage place to portable storage for the trip.

ii. Labeling which includes camper''s name, medication, route, dosage, and time the medication should be administered as indicated on the original medication container.

iii. Secure and temperature appropriate storage during the trip.

iv. Hand hygiene during the trip.

v. Appropriate documentation practices during the trip.

vi. The return of medication and associated documents from portable storage for the field trip to their usual on-site storage.

b. If the camp does not have an on-site registered nurse~~RN~~ or physician, medications on trips must be in original labeled pharmacy containers

2. A record of any medications administered must be maintained in a medication administration record pursuant to rule section 2.408(C)~~7.711.15, D~~.

3. All medication at the permanent camp site must be kept in a clean, locked container, except emergency medication such as epinephrine auto injectors or asthma inhalers. On excursions away from the camp, medication must be under the control of an adult and must be stored inaccessible to children.

4. The camp may, with written parental consent and authorization of the prescribing practitioner, permit children who have asthma to carry their own inhalers and use them as directed. All staff must be aware of which children have asthma and which ones may use their own inhalers as needed.

5. Topical preparations such as petroleum jelly and bug sprays may be administered to children with written parental authorization. These preparations may not be applied to open wounds or broken skin unless there is a written order by the prescribing practitioner.

6. Home remedies, including homeopathic medications, must not be administered at camp without written parental consent, authorization of the prescribing practitioner and delegation as required in rule section 2.410(B)~~7.711.22.b.3~~.

K. Standing orders for over the counter medications must be updated annually and are only allowed with parental permission and when administered by a physician or registered nurse~~RN~~.

L. First Aid supplies must be located near food service operations, program areas, maintenance areas, the headquarters of the medical supervisor, and in motor vehicles which are used to transport campers.

M. There must be an identified headquarters of the health care worker at the campsite.

N. Transportation must be available at all times in cases of medical emergency according to the written emergency medical evacuation plan of the camp.

O. To ensure the protection of campers from sun exposure the camp must:

1. Obtain the parent or guardian's written authorization and instructions for applying sunscreen or use of another form of parent or guardian approved sun protection to their children's exposed skin prior to going outside. A doctor's permission is not needed to use sunscreen at the camp;

2. Apply sunscreen, have campers apply sunscreen, or use another form of parent or guardian approved sun protection for campers prior to campers going outside. Sunscreen must be reapplied as directed by the product label;

3. When supplied for an individual camper, the sunscreen must be labeled with the camper's first and last name; and

4. If sunscreen is provided by the camp, parents must be notified in advance, in writing, of the type of sunscreen the camp will use.

~~7.711.32~~2.413 GUIDANCE

A. Guidance must be appropriate and constructive or educational in nature and may include such measures as diversion, separation of the child from the situation, talking with the child about the situation, or praise for appropriate behavior.

B. Children must not be subjected to physical harm, fear, or humiliation.

C. The program director must not use, or permit a staff member to use corporal punishment as defined in 22-1-140, C.R.S~~or other harsh punishment, including but not limited to pinching, shaking, spanking, punching, biting, kicking, rough handling, hair pulling, or any humiliating or frightening method of guidance~~.

D. Guidance must not be associated with food, rest, or toileting. Children should never be punished for toileting accidents. Children must not be denied food or forced to eat as a disciplinary measure.

E. Separation, when used as guidance, must not exceed five (5) minutes and must be appropriate for the child's age. The child must be in a safe, lighted, well-ventilated area and be within sight and hearing of an adult. The child must not be isolated in a locked or closed area.

F. Verbal abuse or derogatory remarks about the child are not permitted.

G. Authority for guidance must not be delegated to other children, and the camp must not sanction one child punishing another child.

~~7.711.33~~2.414 SECURITY PRACTICES

A. The camp must establish a written security procedure and must train staff members and campers regarding this procedure.

B. The camp must report to the local law enforcement office or department the dates of the camp sessions and the location of the camp.

C. When a camper is discharged from camp or when the camp session is over, the child must be returned to the parents/guardians or an adult authorized by the parents/guardians. If the individual is unknown to the staff, identification must be required.

~~7.711.34~~2.415 FOOD AND NUTRITION

A. Each camp must establish a written policy for its nutrition and food service program. This policy must include meal hours, type of food service, staff responsibilities during the time food is served, authorization of special diets, and the administration of the food service program. This policy must be available to all staff members.

B. Foods provided by the camp must be of sufficient quantity and nutritional quality to provide for the dietary needs of each child. Menus must meet the most recently revised recommended daily allowances of the Food and Nutrition Board, National Academy of Sciences, National Research Council, adjusted for age, sex, religion, and activity. The only exception must be by written parental or medical direction.

C. Menus must be planned at least a week in advance and must be dated as to the week in use. The current week's menu must be posted in the food preparation area. Food substitutions must be noted on the menus in writing. After use, the menus must be kept on file for the period of the camping season.

D. In travel-trip camps, all menus must be planned prior to leaving and changes noted in writing. Menus must be maintained in file of camp.

~~7.711.35~~2.416 TRANSPORTATION

A. Transportation provided by the camp must meet the following requirements:

1. The camp is responsible for any children it transports;

2. The camp must obtain written permission from parents or guardians for any transportation of their child during camp hours;

3. The number of staff members who accompany children when being transported in the vehicle must meet the child care staff ratio found in~~at~~ rule section 2.411~~7.711.23~~. The driver of the vehicle is considered a staff member;

4. The camp must not permit children under the age of eight (8) or children under 57" tall to ride in the front seat of a passenger vehicle. Children under 8 must be secured in a child restraint system that is appropriate for the age and development of that child. The child restraint must be safe and free of hazard;

5. Campers must be loaded and unloaded out of the path of moving vehicles;

6. Campers must not be left unattended in the vehicle;

7. For trips away from the camp, a list of individuals on each trip must be readily available either in the vehicle(s) or at the camp office.

B. Requirements for vehicles

1. Any vehicle used for the transportation of children to and from the camp or during camp activities must meet the following requirements:

a. The vehicle must be enclosed and have door locks;

b. The seats of the vehicle must be constructed and installed according to the vehicle manufacturer's specifications;

c. The vehicle must be kept in satisfactory condition to assure the safety of occupants. Vehicle tires, brakes, and lights must be operational, safe and free of hazard;

d. Seating must be comfortable with a seat of at least ten (10) inches wide for each child;

e. Vehicles must be loaded only within the passenger seating limit established by the vehicle manufacturer; and

f. Each vehicle must have a first aid kit.

2. In passenger vehicles, with a manufacturer''s established capacity of sixteen (16) or fewer passengers and less than 10,000 pounds, the following is required:

a. Each camper and staff member must be restrained in an individual seat belt; and

b. Campers and staff must be instructed and required to keep the seat belt properly fastened and adjusted.

3. In vehicles with a manufacturer''s established capacity of sixteen (16) or more passengers, seat belts for passengers are not required.

C. Requirements for drivers of vehicles

1. All drivers of vehicles transporting children must operate the vehicle is a safe and appropriate manner.

2. The camp must verify that all drivers meet minimum requirements, including:

a. Driving records that have been reviewed within the last four months for seasonally hired drivers or within the last twelve months for year-round drivers to determine driver suitability;

b. Drivers have the appropriate license for the vehicles to be driven;

c. Drivers must have current Department-approved first aid and cardiopulmonary resuscitation (CPR) certification;

d. All drivers must be at least twenty (20) years of age;

e. Drivers must complete a minimum of four (4) hours of driver training that includes at a minimum: behind the wheel training; participant transport attendance procedures including taking attendance at the destination; managing behavioral issues; loading and unloading procedures; daily vehicle inspection procedure; proper tire inflation; emergency equipment and how to use it; accident procedures; passenger illness procedures; procedures for backing up; and, if buses are used, evacuation procedures;

3. The driver must ensure that all doors are secured at all times when the vehicle is moving;

4. The driver must make a good faith effort to ensure that each child is properly belted throughout the trip; and

5. The driver must not eat or use a cellular or other mobile device while driving.

~~7.711.4~~ RECORDS FOR CHILDREN AND PERSONNEL

~~7.711.41~~2.417 CHILDREN'S RECORDS

A. Prior to the child's attendance at camp, the following information must be obtained and maintained at the campsite for each camper:

1. Child's name, birth date, and address.

2. Parent's or guardian's names, home and employment addresses, telephone numbers, and email addresses.

3. Name, address and telephone number of emergency contacts.

4. Name, address, and telephone number of individuals authorized to take the child from camp if different from the parent or guardian.

5. Dates of the camp session which the child will attend.

6. Name and telephone number of the child's health care provider.

7. Authorization signed by the parents/guardians, giving authority for the camp to obtain emergency medical care.

8. Authorization signed by the parents/guardians of the child to participate in all special trips or excursions away from the campsite.

9. Indication of any camp activity in which the parents/guardians of the child does not wish the child to participate (see the Rules Regulating Special Activities, in rule sections 2.600~~7.719~~, *et seq*.).

10. Physical examination, health history and immunization as required in rule section 2.412~~7.711.51.C-D~~.

~~7.711.42~~2.418 STAFF RECORDS

There must be maintained at the campsite a record for each staff member, paid or volunteer, which must include the following:

A. Name, address, and birth date of the individual.

B. Training, education, and experience of the staff member.

C. Copies of any required certification or other training confirming qualifications for the responsibilities assigned at the camp.

D. Copy of a health history as required in rule section 2.409(E)~~7.711.21.E~~.

E. Name, address, and telephone number of any person(s) to be notified in the event of an emergency.

F. Copy of the written references or note of phone references pursuant to rule section 2.409(D)~~7.711.21.D~~.

G. Copy of the signed letter of agreement pursuant to rule section 2.409(C)~~7.711.21.C~~.

H. The dates of employment for each staff member.

~~7.711.43~~2.419 GENERAL INFORMATION

A. The camper's file must be retained by the camp for at least three (3) years after the child's last day of attendance at the camp, and must be available without restriction to Department.

B. Personnel and children's records must be maintained by the camp for at least three (3) years. If the record reflects an accident, injury, or other unusual circumstance, it is suggested that the record be maintained for a longer period of time.

~~7.711.5~~ CAMPSITE, PHYSICAL FACILITY, FIRE SAFETY AND SANITATION

~~7.711.51~~2.420 CAMPSITES

A. Travel-trip camps must submit plans for approval by the Colorado Department of Public Health and Environment, thirty (30) days prior to the date the trip camp begins. The travel-trip camp must maintain written evidence of Colorado Department of Public Health and Environment approval.

B. The camp must conform to fire prevention and protection requirements of local fire departments in the locality of the camp. In the case of a travel-trip camp, the fire department approval is not required.

C. The camp must identify hazards and high-risk areas and develop policies they follow to prevent unauthorized access to these hazards and high-risk areas.

D. Each camp must have a telephone or means of communication to contact emergency services.

E. Emergency telephone numbers must be posted the camp health care professional, nearest clinic or hospital, ambulance service, local sheriff's office, national or state forest service office (as appropriate), fire department or lookout station, and poison control center.

F. In the case of a primitive camp or travel-trip camp, sources of emergency care and methods of communication with such facilities as hospitals, police, and forest service must be identified for each campsite on the itinerary.

G. When playground equipment is provided at a residential camp, the equipment and playground area must be free of obstruction and man-made or natural hazards and must be away from natural pathways of traffic.

H. Playground equipment must meet the following requirements:

1. Be in good repair, of solid and safe construction, free of rough edges, protruding bolts, and the possibility of entrapment of extremities.

2. Be securely anchored by suitable footing.

3. Swings must have seats made of a flexible material.

4. Moving equipment must be located toward the edge or corner of a play area or be designed in such a way as to discourage children from running into the path of the moving equipment.

5. Metal equipment must be placed in the shade or a shade structure must be provided.

6. The maximum height of any piece of playground equipment is six (6) feet.

7. All pieces of playground equipment must be designed to guard against entrapment and strangulation.

8. All pieces of permanently installed playground equipment must be surrounded by a resilient surface of a depth of at least six (6) inches. Rubber mats manufactured for such use if safe and free from hazard may be used in place of resilient material.

9. Department-approved resilient surfacing includes loose fill materials such as wood chips, wood mulch, engineered wood fiber, pea gravel, synthetic pea gravel, shredded rubber tires, and fine loose sand. Solid unitary materials include poured in place surfacing, approved rubber mats, playground tiles, and astro turf with built in resilient pad.

10. Any permanently installed outdoor climbing equipment or portable climbing equipment eighteen (18) inches or higher must have Department-approved resilient surfacing underneath and in the use zone surrounding the equipment, and installed according to manufacturer instructions.

11. Playground surfaces must be checked prior to use for the presence of dangerous or other foreign materials. Playground equipment must be checked for safety on a monthly basis and written documentation of the safety check must be maintained.

I. If the residential camp is located on or uses national or state lands, the director must familiarize the staff and campers with rules and ethics governing the use of such property and must be responsible for compliance.

J. An itinerary must be filed or an arrangement must be made with national or state forest service office if such land is to be used by the travel-trip camp. The director must familiarize the staff and campers with rules governing the use of such property. Should the travel-trip camp pass onto private land, an agreement must be made with the individual responsible for that land prior to access.

K. In indoor structures where the program uses any source of coal, wood, charcoal, oil, kerosene, propane, natural gas or any other product that can produce carbon monoxide indoors, an operational carbon monoxide detector must be installed according to the manufacturer's instructions. Carbon monoxide detectors must be tested at least annually with documentation available upon request. Carbon monoxide detectors that are only battery-powered must meet the following requirements:

1. Tested monthly to ensure they are operational; and~~.~~

2. Batteries changed at least yearly.

~~7.711.52~~2.421 PERMANENT AND SEMI-PERMANENT SHELTERS AND SLEEPING FACILITIES

A. All structures used by children must be kept in good repair at all times.

B. At least one-half of the floor area in each living unit, excluding tents, must have a minimum ceiling height of seven (7) feet. No portion of a room having a ceiling height of less than five (5) feet will be considered as usable floor space.

C. If fabric structures are used they must be constructed of a fire- and flame-retardant material.

D. Each camper must be provided with his or her own mat, pad, bed, or cot.

E. The aisles between rows of cots, beds, or bunks must be kept clear for exiting purposes. There must be at least two (2) feet of clear space separating sides of cots, beds or bunks.

F. If bunk beds are in use, no bunks may contain more than two tiers of beds. There must be at least twenty-seven (27) inches of clear space separating the tiers of beds and thirty-six (36) inches of clear space between the top tier and the ceiling. Electric lights which are within reach of the top bunk must be protected.

G. Each permanent sleeping unit, building, or tent must have at least thirty (30) square feet of floor space per person, camper, or counselor for single-tier beds and twenty (20) square feet per person, camper, or counselor for two-tier bunks.

H. In tent structures which have a platform floor, beds or bunks must be arranged in such a fashion that no camper who might fall from a bed or bunk could fall through the sides of the tent to the ground below.

I. No camper shall sleep in the same room or tent with any person of the opposite gender, except for members of his or her immediate family.

J. In a primitive camp or travel-trip camp, adequate shelters such as a tent must be available for each child. The shelter occupancy must be in compliance with manufacturers' recommendations.

~~7.711.53~~2.422 TOILET AND BATHING FACILITIES

A. In a resident camp there must be one approved toilet for every twenty (20) or fewer campers for which the camp is licensed. Urinals may be substituted for no more than one-third of the required toilets.

B. Children must be allowed the use of gender-segregated toilet facilities that are consistent with their gender identity or have individual toilet facilities.

C. Hand washing facilities must be provided throughout the camp. There must be one basin or lavatory for per every twenty (20) campers. In new construction completed after April 1, 2018, change of governing body or extensive remodeling the camp must provide hand washing facilities located adjacent to where the camp serves meals.

D. Showers or bathtubs must be located within buildings used for sleeping, such as cabins or dormitories, or in a centrally located shower or bathing structure.

1. There must be one shower head or bathtub per every twenty (20) campers for which the camp is licensed.

2. Hand washing facilities must be available in the shower or bathing area.

E. Camps must provide evidence that all sewage disposable systems must meet Colorado Department of Public Health and Environment (CDPHE) requirements.

~~7.711.54~~2.423 GENERAL BUILDING SAFETY

A. Every building, structure, tent, cabin, and camp premises must be kept in good repair, and must be maintained in a safe condition.

B. All construction and electrical installations must be safe and free from hazard.

C. In permanent structures, exit signs must be posted at every required exit doorway and wherever otherwise required to clearly indicate the directions of egress.

D. A building with occupancy of more than twelve (12) persons must be provided with at least two independent means of egress separated by no less than fifty (50) percent of the largest dimension of the building from each other.

1. In an existing building, such as a cabin occupied by more than twelve (12) but less than twenty (20) persons, a window may be utilized as an acceptable second exit. The window must be openable and the distance from the window to the ground must not be more than four feet.

2. Each exit door must be hung to swing in the direction of exit travel. Exiting through a food preparation area is not permitted.

E. If buildings with second stories are used by campers, there must be two independent means of egress separated by no less than fifty (50) percent of the building from each other per floor.

F. The camp must provide evidence each fire escape from any upper level of a building is installed in accordance with local fire protection ordinances.

G. In every building or structure, exits must be arranged and maintained so as to provide free and unobstructed egress from all parts of the building or structure at all times when it is occupied. No lock or fastening to prevent free escape from the inside of any building can be installed. Only panic hardware or single-action hardware is permitted on a door or on a pair of doors. All door hardware must be within the reach of children.

H. Exit doors must be equipped only with panic or single-action hardware.

I. There must be fifteen (15) square feet per occupant in any room having an occupant load of more than fifty (50) persons where fixed seats are not installed and which is used for classroom, assembly, or similar purposes. The maximum occupancy must be posted in a conspicuous place near the main exit from the room.

J. Furnaces, fireplaces, heaters, or wood-burning stoves must meet the following regulations:

1. All heating units must be and maintained with safety devices to prevent fire, explosions, and other hazards. No open-flame gas or oil stoves, unscreened fireplaces, hot plates, or unvented heaters can be used for heating purposes. All heating elements, including hot water pipes, must be insulated or installed in such a way that children cannot come in contact with them.

2. A heater or wood-burning stove must be located and/or protected in such a manner as to prevent injuries to occupants of the building.

3. Wood-burning stoves must be regularly cleaned of ashes, which are immediately removed from the building and properly stored.

4. Space around furnaces, heaters, and wood-burning stoves must not be used for storage.

K. All firearms must be locked and inaccessible to children. This includes, but is not limited to air rifles, bb guns, and paintball guns. Ammunition must be locked and stored separately.

L. Power tools, explosives and special equipment involving unusual risk must be stored in a locked place inaccessible to children, and must always be under the custody and direct supervision of authorized personnel when in use.

M. Volatile substances such as gasoline, kerosene, fuel oil, and oil- based paints, firearms, explosives, and other hazardous items must not be stored in any area of the building used for children unless approved by the local fire department.

N. Substances which may be toxic to a child if ingested, inhaled, or handled, including, but not limited to, poisons, drugs, medicines, insecticides, herbicides, rodenticides, bleaches, chemicals, and corrosive agents must be stored in a cabinet or enclosure located in an area not used by children, stored in the original container, and properly labeled.

O. Glass doors, walls, or panels must be clearly marked. Safety glass must be installed when required.

P. Stairways of a height of more than thirty (30) inches must be equipped with handrails on each side of the stairways. A stairway which is larger than eighty-eight (88) inches wide must have an intermediate handrail equal distance between the two handrails.

Q. All window wells and outside stairwells that are hazardous to children must be equipped with screens or guards, which must be attached in such a manner that they may either by removed from the inside or broken in from the outside in case of fire.

R. All areas accessible to children must be maintained in a safe condition by removal of debris, dilapidated structures, and broken or worn equipment or dangerous items.

~~7.711.55~~2.424 FIRE SAFETY PROVISIONS

A. Any fire extinguisher used at the camp must be of a dry chemical type, hung at a level readily available to staff members, and annually inspected by an approved inspector. Indian pump backpack fire extinguishers and fire extinguishers approved for use by the U.S. Forest Services are also acceptable.

1. There must be a fire extinguisher located in the camp kitchen.

2. In each building and/or structure, there must be a fire extinguisher on each floor.

3. In tent areas, there must be a fire extinguisher located within seventy-five (75) feet of each tent or a plan approved by the Department.

B. In each camp there must be a fire alarm(s) must sounds a separate and distinctly recognizable tone from all other signaling devices used by the camp. The alarm(s) must be audible throughout the occupied camp premises. The alarm device, once activated, must continue to sound automatically.

C. Within twenty-four (24) hours after arrival at the campsite, all individuals attending the camp must be made familiar with the methods by which the fire alarm may be activated and with procedures to be followed upon notification of fire.

D. Each separate building used for sleeping campers and each multistory building must be protected by a smoke detector on each floor of the building.

E. Areas used for campfires must be cleared and must be away from overhanging branches.

F. Campfires must never be left unattended and must be thoroughly extinguished. Extinguishing equipment must immediately accessible.

G. Campfires and open flames of any type must be prohibited within ten (10) feet of any tent or fabric structure.

RULES REGULATING SCHOOL AGED CHILD CARE PROGRAMS

2.500 AUTHORITY

These rules and regulations are adopted pursuant to the rulemaking authority provided in section 26.5-1-105(1), C.R.S., and are intended to be consistent with the requirements of the State Administrative Procedures Act, sections 24-4-101 et seq. (the "APA"), C.R.S.; the Anna Jo Garcia Haynes Early Childhood Act, sections 26.5-1-101 et seq. (the "Early Childhood Act"), C.R.S.; the Child Care Licensing Act, sections 26.5-5-301, et seq., C.R.S.; the Child Care Licensing Act, sections 26.5-5-301, et seq., C.R.S.; and the Child Care Development and Block Grant Act of 2014, 42 U.S.C. sec. 9858e, and section 26.5-4-110(3), C.R.S.

The specific rulemaking authorities granted for the School Age Programs include sections XXX, C.R.S.

2.501 SCOPE AND PURPOSE

The Colorado Department of Early Childhood, Division of Early Learning, Licensing, and Administration is responsible for the administration of health and safety rules and requirements for licensed child care facilities These rules and regulations shall govern the health and safety requirements of licensed school-age programs in Colorado. All School-Age Child Care Centers must comply with the "General Rules for Child Care Facilities" in rule section 2.100, "Rules Regulating School-Age Child Care Centers" in rule section 2.500, and the "Rules Regulating Special Activities" in rule section 2.600.

2.502 APPLICABILITY

The provisions of these rules and regulations shall be applicable to Licensed School-Age Programs caring for five (5) or more children with or without compensation.

~~7.712 RULES REGULATING SCHOOL-AGE CHILD CARE CENTERS~~

~~All school-age child care centers must comply with the "General Rules for Child Care Facilities" as well as the "Rules Regulating School-Age Child Care Centers"~~

~~7.712.1 (None)~~

2.503~~7.712.2~~ DEFINITIONS

A. A "school-age child care center" (hereafter referred to as the "center") is a child care center that provides care for five (5) or more children who are between five (5) and eighteen (18) years of age. Children four (4) years of age, who will turn five (5) on or before October 15th of the current calendar year may attend the center as part of a "building-based school-age child care program" or "building-based day camp" summer program prior to their kindergarten year. The center operates for more than one week during the year. The term includes facilities commonly known as "day camps," "summer camps," "summer playground programs," "before and after school programs," and "extended day programs." This includes centers operating with or without compensation for such care, and with or without stated educational purposes.

B. A "building-based school-age child care program" is a child care program that provides care for five (5) or more children who are between five (5) and eighteen (18) years of age. The center is located in a building that is regularly used for the care of children.

C. A "day camp" is a school-age child care program which operates at least four (4) hours a day primarily during one season of the year, and during school vacation periods for children between five (5) and eighteen (18) years of age, which accepts registrations for finite, not necessarily contiguous sessions. Programs may operate daily between 6:00 a.m. and 10:00 p.m. Day camp programs may offer no more than two overnight stays each camp session.

The types of day camps are as follows:

1. A "building based day camp" is a child care program that provides care for five (5) or more children who are between five (5) and eighteen (18) years of age. The day camp is located in a building which, along with the outdoor surroundings, is regularly used by the program.

2. A "mobile day camp" is a child care program that provides programming for five (5) or more children who are at least seven (7) years of age or who have completed the first grade. Children move from one site to another by means of transportation provided by the governing body of the program. The program uses no permanent building on a regular basis. Mobile day camp programs may operate in multiple sites, in a single county, under one license.

3. An "outdoor-based day camp" is a child care program that provides care for five (5) or more children who are at least seven (7) years of age or have completed the first grade. The day camp does not use a permanent building on a regular basis and provides programming in a permanent outdoor or park setting.

~~7.712.3~~ POLICIES AND PROCEDURES

2.504~~7.712.31~~ STATEMENT OF POLICIES AND PROCEDURES

A. At the time of enrollment, and upon amendments to policies and procedures, the center must give the parent(s)/guardian(s) the center's policies and procedures, and provide the opportunity to ask questions. Written copies must be available either electronically or in hard copy. The center must obtain a signed document stating that the parent(s)/guardian(s) have received the policies and procedures, and by signing the policies and procedures document, the parent(s)/guardian(s) agree to follow, accept the conditions of, and give authorization and approval for the activities described in the policies and procedures. Policies must include the following:

1. The center's purpose and its philosophy on child care;

2. The ages of children accepted;

3. Services offered for special needs children in compliance with the Americans with Disabilities Act (see rule section 2.115~~7.701.14,~~ of the General Rules for Child Care Facilities);

4. The hours and dates when the center is in operation, specific hours during which special activities are offered, and holidays when the center is closed;

5. The policy regarding inclement weather;

6. The procedure concerning admission and enrollment of children;

7. An itemized fee schedule;

8. The procedure to ensure the location of children is known at all times, how children are accounted for throughout the day, and that children are supervised at all times by their assigned staff member;

9. The center's procedure on guidance, positive instruction, supporting positive behavior, discipline and consequences, including how the center will:

   a. Cultivate positive child, staff and family relationships;

   b. Create and maintain a socially and emotionally respectful early learning and care environment;

   c. Implement teaching strategies supporting positive behavior, pro-social peer interaction, and overall social and emotional competence in young children;

   d. Provide individualized social and emotional intervention supports for children who need them, including methods for understanding child behavior; and developing, adopting and implementing a team-based positive behavior support plan with the intent to reduce challenging behavior and prevent suspensions and expulsions; and

   e. Access an early childhood mental health consultant or other specialist as needed.

10. The procedure for handling children's illnesses, accidents, and injuries, including when children will be excluded from care and notification of parents/guardians;

11. The procedures followed when it has been identified a child is separated from their group and not under the direct supervision of their assigned staff member.

12. The procedure for transporting children, if applicable, including transportation arrangements and parental permission for excursions and related activities;

13. The written policy and procedure governing field trips, television and video viewing, and special activities, including the staff's role for the supervision of children;

14. The procedure on children's safety related to riding in a vehicle, seating, supervision, and emergency procedures on the road;

15. The procedure for releasing children from the center only to persons for whom the center has written authorization;

16. The procedures followed when a child is picked up from the center after the closing hours of the center or not picked up at all, and the procedure to ensure that all children are picked up before the staff leave for the day;

17. The procedure for caring for children who arrive late to the center and their class/group is away from the center on a field trip or excursion;

18. The procedure for storing and administering children's medicines and delegation of medication administration in compliance with section 12-255-131~~12-38-132~~, C.R.S., of the "Nurse and Nurse Aide Practice Act~~Nurse Practice Act.~~";

19. The procedure concerning children's personal belongings and money;

20. The policy concerning meals and snacks;

21. The policy and procedure regarding visitors;

22. The procedure for filing a complaint about child care including the name, address and telephone number of the Colorado Department of Early Childhood (see rule section 2.121~~7.701.5.~~ of the General Rules for Child Care Facilities);

23. The procedure for~~regarding the~~ reporting ~~of suspected or known~~ child abuse and/or neglect, including the name of the county department of social/ human services and phone number of where a child abuse report should be made (see section ~~7.701.5~~2.120 of the General Rules for Child Care Facilities);

24. The policy for notification when child care service is withdrawn by the program, or when parents or guardians withdraw their child(ren) from the center;

25. The procedure, if applicable, for transitioning children between school or community sponsored activities; and

26. The policy on the steps the center will take prior to the suspension, expulsion or request to parents/guardians to withdraw a child from care due to concerns about the child's behavioral issues. These procedures must be consistent with the center's policy on guidance, positive instruction, discipline and consequences, and include documentation of the steps taken to understand and respond to challenging behavior.

~~7.712.32~~2.505 COMMUNICATION, EMERGENCY, AND SECURITY PROCEDURES

A. The center must notify the parents/guardians in writing of significant changes in its services, policies, or procedures so that they can decide whether the center continues to meet the needs of the child(ren).

B. For security purposes, a daily sign-in/sign-out sheet or other mechanism for parents/guardians must be maintained by the center it must include, for each child in care, the date, the child's name, the time when the child arrived and left the center, and the parent/guardian's signature or other identifier. With a parent/guardian's approval, a child five (5) years of age or older may sign in and out instead of the parent/guardian. Staff must verify attendance periodically throughout the day.

C. During the hours the center is in operation, the center must provide an office and/or monitored telephone number known to the public and available to parents/guardians in order to provide immediate access to the center.

D. If the center has a permanent site, there must be a telephone at the site.

E. Emergency telephone numbers must be posted at each permanent site and taken on all field trips and during mobile school-age child care programs. The emergency numbers must include, at a minimum, 911, or a rescue unit if 911 isn't available; the clinic or hospital nearest to the activity location; ambulance service; fire, police, and health departments; and Rocky Mountain Poison Control.

F. Mobile school-age child care programs must have a way to be contacted while in transit.

G. The center must be able to provide emergency transportation to a health care facility at all times either via program vehicle or the emergency medical services system.

H. The director of the center or the director's delegated substitute must have a means for determining who is present at the center at all times.

I. A written policy regarding visitors to the center must be posted and a record maintained daily by the center that includes, at a minimum, the visitor's name and address and the purpose of the visit. At least one piece of identification must be inspected for individuals who are strangers to personnel at the center.

J. With the exception of children who are allowed to sign themselves in and out, the center must release a child only to the adult(s) for whom written authorization has been given and is maintained in the child's record (see rule section ~~7.712.81~~2.524). In an emergency, the child(ren) may also be released to an adult for whom the child's parent or guardian has given verbal authorization. If the staff member who releases the child does not know the adult, identification must be required to assure that the adult is authorized to pick up the child.

K. The center must have a procedure for dealing with individuals not authorized by the parent/guardian of a child who attempts to have the child released to them.

L. The center must have a written procedure for closing the center at the end of the day to ensure that all children are picked up.

~~7.712.4~~ PERSONNEL

~~7.712.41~~2.506 GENERAL REQUIREMENTS FOR ALL PERSONNEL

A. All personnel and volunteers at the center must demonstrate knowledgeable decision-making, judgment, and concern for the proper care and well-being of children.

B. All personnel and volunteers must not engage in actions that would endanger the health, safety, or well-being of children.

~~C. A criminal record check request for all staff must be submitted to the Colorado Bureau of Investigation. The personnel file of staff members of the center must contain clearance report from the Colorado Bureau of Investigation. The requirement for a criminal record check is found in Section 7.701.33 of the General Rules for Child Care Facilities. Seasonal staff that indicates that they will not be returning to the program for employment must be removed from the CBI list for the program.~~

C~~D~~. Each staff member and regular volunteer as defined in rule section 2.509~~7.712.44.C~~ must complete an annual health history. The health history must be maintained in a secure location.

D~~E~~. The duties and responsibilities of each staff position and the lines of authority and responsibility within the center must be in writing. At the time of employment, staff members must be informed of their duties and assigned a supervisor.

E~~F~~. Prior to working with children, the staff member must read and be instructed on the policies and procedures of the center, including those relating to hygiene, sanitation, food preparation practices, proper supervision of children, and reporting of child abuse. Staff members must sign a statement indicating that they have read and understand the center's policies and procedures.

F~~G~~. Day camp staff must receive a minimum of fifteen (15) hours of pre-camp training, in addition to Department-approved First Aid and Cardiopulmonary Resuscitation (CPR) training. Pre-camp

training must include all training activities that staff members participate in as a whole. Training should include, but not be limited to, familiarizing staff with the camp mission, site emergency policy and procedures, how to supervise and facilitate activities with campers, and health care policies and procedures. Policies and procedures must be in writing. Staff will be supervised and additional training may be provided if needed. Day camps must have a system in place to provide staff the essential training information for late hires.

GH. The center must have a staff development plan that includes a minimum of fifteen (15) clock hours of ongoing training each year for all staff. This requirement does not apply to day camps. At least three (3) clock hours per year must be in the focus of social emotional development. The fifteen (15) clock hours of training does not include recertification in First Aid and CPR. Ongoing training and courses must demonstrate a direct connection to one or more of the following competency areas:

1. Child growth and development, and learning or courses that align with the competency domains of child growth and development;

2. Child observation and assessment;

3. Family and community partnership;

4. Guidance;

5. Health, safety and nutrition;

6. Professional development and leadership;

7. Program planning and development; and

8. Teaching practices:

   a. Each one (1) semester hour course with a direct connection to the competency area listed in rule section 2.507(G)~~7.712.41, j, 1-8~~, taken at a regionally accredited college or university may count as fifteen (15) clock hours of ongoing training.

   b. Training hours completed can only be counted during the year taken and cannot be carried over.

HI. To be counted for ongoing training, the training certificate must have documentation that includes:

1. The title of the training; ~~and,~~

2. The competency domain; ~~and,~~

3. The date and clock hours of the training; ~~and,~~

4. The name or signature, or other approved method of verifying the identity of trainer or entity; ~~and,~~

5. Expiration of training if applicable; and~~,~~

6. Connection to social emotional focus if applicable.

~~I~~J. All staff members must complete a Department-approved standard precautions training prior to working with children. This training must be renewed annually and may count towards ongoing training requirements.

J~~K~~. All staff members must complete a building and physical premises safety training prior to working with children. The training must include:

a. Identification of and protection from hazards that can cause bodily injury such as electrical hazards, bodies of water and vehicular traffic; and

b. Handling and storage of hazardous materials and the appropriate disposal of biological contaminants.

K~~L~~. All staff member responsible for the collection, review and maintenance of the child immunizations records must show evidence they have completed the Colorado Department of Public Health and Environment (CDPHE) immunization course within (30) calendar days of employment. This training must be renewed annually and may count towards ongoing training requirements.

L~~M~~. All staff members and regular volunteers must complete a Department-approved training about child abuse prevention, including common symptoms and signs of child abuse within (30) calendar days of employment. This training must be renewed annually and may count towards ongoing training requirements.

M. All staff must have at least one (1) hour of child development training within ninety (90) days of employment. This training must include the major domains (cognitive, social, emotional, physical development and approaches to learning). This training is required once and will count toward ongoing training requirements if taken after the date of hire.

N. Prior to working with children, each staff member must read and be trained on the Centers Policies and procedures for the administration of medications. Staff members must sign a statement indicating that they have read and have been trained on the center's administration of medications policies and procedures.

2.507~~7.712.42~~ REQUIRED PERSONNEL AND QUALIFICATIONS

A. Program Director

Each center must have an on-site program director who must be at least twenty-one (21) years of age. The program director must have demonstrated to the hiring authority maturity of judgment, administrative ability and the skill to appropriately supervise and direct school-age children in an unstructured setting.

1. The program director must have verifiable education or training in work with school-age children in such areas as recreation, education, scouting or 4-H; and the program director must have completed at least one of the following qualifications:

a. A four (4) year college degree with a major such as recreation, outdoor education, education with a specialty in art, elementary or early childhood education, or a subject in the human service field; ~~or~~

b. Two years of college training and six (6) months (910 hours) of satisfactory and verifiable full-time or equivalent part-time, paid or volunteer, experience, since attaining the age of eighteen (18), in the care and supervision of four (4) or more children; or

c. Three years (5,460 hours) of satisfactory and verifiable full-time or equivalent part-time, paid or volunteer, experience and one of the following qualifications:

1) Complete six semester hours, or nine quarter hours in course work from a regionally accredited college or university; or

2) 40 clock hours of training in course work applicable to school-age children and the Department-approved courses in injury prevention, and playground safety for School-Aged Child Care Centers within the first nine months of employment.

2. Satisfactory experience includes experience in the care and supervision of four or more children from the ages of four (4) to- eighteen (18) years old, unrelated to the individual, since attaining the age of eighteen (18).

3. The program director is responsible for planning and implementing the program and supervising the staff.

B. Program Leaders

Each program leader must be at least 18 years of age, demonstrate ability to work with children, and must meet the following qualifications:

1. Complete the Department-approved course in injury prevention;

2. Complete the Department-approved course in playground safety for School-Aged Child Care Centers. This requirement does not apply to day camps that do not regularly use a playground.; and

3. Must have at least three (3) months (460 hours) of full-time or equivalent part-time satisfactory and verifiable experience with school-age children.

C. Program Aides

1. Program aides must be at least sixteen (16) years of age. Program aides must work directly under the supervision of the program director or program leaders and must never be left alone with children.

2. Program aides can be counted as staff in determining child care staff ratios.

D. Department-approved Child Care Health Consultant

1. As required by these rules, staff must consult with a current Department-approved Colorado Child Care Health Consultant. To be approved the Child Care Health Consultant must be one of the following: a licensed registered nurse with knowledge and experience in maternal and child health, a pediatric nurse practitioner, a family nurse practitioner, or a pediatrician. The consultation must be specific to the needs of the facility and include some of the following topics: training, delegation and supervision of medication administration and special health procedures, health care, hygiene, disease prevention, equipment safety, interaction between children and adult caregivers, and normal growth and development. Consultation must occur as often as the child care health consultant who is delegating medications and/or medical procedures requires.

2. The date and content of each consultation must be recorded and maintained in the center''s files.

3. The center must maintain documentation including the child care health consultant's (CCHC) Department of Regulatory Agencies (DORA) proof of active licensure in good standing, by the Colorado Medical Board or State Board of Nursing as a physician or registered nurse~~RN or MD current licensure in good standing~~, a brief biography highlighting applicable knowledge, experience and approximate dates worked as a school nurse or Child Care health Consultant commenced.

4. Child care health consultants (CCHC) must complete the Department-approved child care health consultant (CCHC) training prior to consulting with the center. The center must obtain and maintain proof of course completion.

5. All Child Care Health Consultants (CCHC) must show evidence they have completed the Colorado Department of Public Health and Environment (CDPHE) immunization course annually.

E. Employment of maintenance staff, including kitchen service, grounds, and housekeeping employees less than sixteen (16) years of age, must be in compliance with Colorado labor laws.

F. At least one staff member with current Department-approved medication administration training and delegation must be on duty at all times.

G. First Aid and Cardiopulmonary Resuscitation (CPR) Certified Staff

1. For every thirty (30) or fewer children in attendance, there must be at least one (1) staff member who holds current Department-approved First Aid and CPR certificate for all ages of children. Such individuals must be with the children at all times when the center is in operation. If children are at different locations, there must be a First Aid and CPR qualified staff member at each location.

2. In a day camp, all staff members who are eighteen (18) years of age and older must have current Department-approved First Aid and CPR certificates. Uncertified staff members must work with another certified staff member.

3. All employees caring for children, not required by rule to be certified in First Aid and CPR, must complete a Department-approved basic First Aid and CPR module within thirty (30) calendar days of employment and the module must be renewed every two (2) years.

~~7.712.432~~.508 REQUIRED STAFF SUPERVISION

A. A program director must be present at the center at least 60 percent of any day the center is in operation. An individual who meets one of the following requirements must be present for the remaining 40 percent of the day:

1. A qualified program leader who is at least twenty-one (21) years of age; ~~OR~~

2. A qualified program leader who is at least eighteen (18) years of age and has at least one (1) year (1820 hours) full-time or equivalent part-time verifiable experience working with children; or

3. Two qualified program leaders who are at least nineteen (19) years of age.

B. If the program director cannot be present 60 percent of any day the center is in operation, an individual who meets program director qualifications must substitute for the director.

C. There must be at least one (1) program leader providing supervision with each group of thirty (30) or fewer children cared for by the center. When four (4) year olds are in attendance, there must be at least one program leader providing supervision with each group of twenty-four (24) or fewer children cared for by the center.

D. The maximum group size for children over the age of five (5) is thirty (30) children. When four (4) year olds are in attendance the maximum group size is twenty-four (24). When the center has the capacity to care for multiple groups of children, they must be separated into developmentally and age appropriate activities. Groups are not required to be separated from each other by permanent or portable dividers or walls.

E. Group size for children in care may be exceeded for attendance time, meal and snack time, special occasions and activities. The room capacity must not be exceeded.

F. There must be one (1) staff member for each fifteen (15) children in attendance. When four (4) year olds are in attendance, there must be at least one staff member for each twelve (12) or fewer children cared for by the center.

Ages of Children	Number of Staff	Maximum Group Size
Mixed age group with 4 year olds	1 staff member to 12 children	24 children
5 years and older	1 staff member to 15 children	30 children

G. At any time when nine (9) or more children are in care at the center, there must be at least one (1) program leader actively supervising children and another responsible person at least sixteen (16) years of age on the premises. When eight (8) or fewer children are present, there must be at least one (1) program leader on duty and a second staff member on call who is immediately available in an emergency.

H. At all times, school-age child care personnel must be directly supervising the children.

I. In a mobile day camp program, an outdoor-based day camp program, or anytime a building based program is away from the facility, the staff ratio given in rule~~at~~ section 2.508~~7.712.43~~ must be maintained, but there must be at least two (2) program leaders at all times with the children.

2.509~~7.712.44~~ VOLUNTEERS

A. If volunteers are used by the center, there must be a clearly established policy in regard to their function, orientation, and supervision.

B. References must be obtained for volunteers who are counted in the staff to child ratio, consistent with rule section 2.116(B)~~7.701.33B~~ of the General Rules for Child Care Facilities.

C. Volunteers that work more than fourteen (14) calendar days (112 hours) per calendar year who are used to meet staff to child ratio must be equally qualified as a program director, program leader or program aide and must have complete staff records as defined in rule section 2.525~~7.712.82~~.

D. Volunteers unless equally qualified must be directly supervised by a program director or program leader.

E. Volunteers must be given instruction as to the centers policies and procedures.

~~7.712.5~~ CHILD CARE SERVICES

~~7.712.51~~2.510 ADMISSION PROCEDURE

A. The center can accept children only of the ages and capacity for which it has been licensed.

B. Admission procedures must be completed prior to the child's first day in care at the center and must include:

1. Completion of the registration information for inclusion in the child's record, as required in rule section 2.524~~7.712.81~~; and

2. Providing the parent(s)/guardian(s) with a copy of the center's policies and procedures.

2.511~~7.712.52~~ HEALTH CARE

A. Statements of Health Status

1. At the time of enrollment, the parent(s)/guardian(s) must provide for each child entering the center:

a. A complete health history for each child, including any communicable diseases, chronic illnesses or injuries, known drug reactions and allergies, current medications and any special diets needed, the name address and phone number for the child's health care provider and dentist.

b. Documentation of school-required immunization status or Certificate of Medical or Nonmedical Exemption, is required by the Colorado Board of Health. Up-to-date school-required immunizations must be documented as specified on the Colorado Department of Public Health and Environment Certificate of Immunization or on an "approved alternate" Certificate of Immunization. Colorado law requires proof of immunization status or exemption be provided prior to or on the first day of admis"ion.

1) If the parent or legal guardian of a child wishes a nonmedical exemption from the requirement for immunizations due to a religious belief whose teachings are opposed to immunizations or a personal belief that is opposed to immunizations, the child's parent, or legal guardian must:

a) Submit the Certificate of nonmedical exemption with a signature from an immunizing provider in Colorado, or

b) Submit the Certificate of Nonmedical Exemption received upon the completion of Colorado Department of Public Health and Environment Online Immunization Education Module.~~b. Documentation of immunization status or exemption as required by Colorado Department of Public Health and Environment (CDPHE). Colorado law requires proof of immunization be provided prior to or on the first day of admission.~~

2.~~1~~) Child care centers as defined in sections 26.5-5-303(10) and 26.5-5-307~~26-6-102 (1.5)~~, C.R.S., located at a ski area, are exempt from obtaining immunization records for students when all of the following conditions are met:

a.~~)~~ Students attend for fifteen (15) days or less in a fifteen-consecutive-day period, no more than twice in a calendar year; and

b.~~)~~ At least sixty (60) calendar days separate the two sessions within the calendar year; and

c.~~)~~ The center notifies parents/guardians that non-immunized children are enrolled on the above short-term basis.

3~~2~~. The center must inform its child care health consultant (CCHC) prior to the first day of care of the enrollment of a child with special health care needs, if known, so staff receives training, delegation and supervision as indicated by the child's individualized health care plan.

A~~3~~. If the center is located at an elementary school and all the children attend that school, the immunization records may be maintained at the school office but, must be accessible to center staff members and licensing specialists during the hours the center is open.

B. Emergency Procedures

1. Written authorization for emergency medical care must be in the child''s file as required in rule section 2.524~~7.712.81~~.

2. When accidents, injuries, or illnesses occur, the program director or responsible adult in charge must notify the child's parent or guardian and, if necessary, seek medical care for the child.

3. A responsible staff member must be directly supervising any ill or injured child.

4. Portable first aid kits must be available to staff at all times, including field trips, and must be located out of reach of children and maintained in a sanitary condition. First aid kits must be checked and restocked on at least a monthly basis.

C. Medication

1. Any un-expired routine medication, prescription and non-prescription (over-the-counter) medications must be administered only with a current written order of a health care provider with prescriptive authority and with written parental consent. Home remedies, including homeopathic medications, must never be given to a child.

2. The written order by the health care provider with prescriptive authority ~~prescribing practitioner~~ must include:

a. Child''s name;

b. Licensed prescribing practitioner name, telephone number, and signature;

c. Date authorized;

d. Name of medication and dosage;

e. Time of day medication is to be given;

f. Route of medication;

g. Length of time the medication is to be given;

h. Reason for medication (unless this information needs to remain confidential);

i. Side effects or reactions to watch for; and

j. Special instructions.

3. Medications must be kept in the original labeled bottle or container. Prescription medications must contain the original pharmacy label.

4. Over-the-counter medication must be kept in the originally labeled container and be labeled with the child's first and last name.

5. In the case medication needs to be given on an ongoing, long-term basis, the authorization and consent forms must be reauthorized on an annual basis. Any changes in the original medication authorization require a new written order by the prescribing practitioner and a change in the prescription label.

6. Staff designated by the program director to give medications must complete the Department-approved medication administration training and have current annual delegation or more often as determined by the Child Care Health Consultant. Delegation must be from the center's Current Child Care Health Consultant who must observe and document the competency of each staff member involved in medication administration. All staff administering medication must have current Department-approved Cardiopulmonary Resuscitation (CPR), first aid training prior to administering medication with the following exceptions:

   a. Staff determined by the program director, in consultation with the Child Care Health Consultant, to be responsible for providing routine emergency medications covered in the approved medication administration training for the treatment of severe allergies or inhaled medications for the treatment of asthma must receive training and delegation from their Child Care Health Consultant for those medications only. Staff must then provide those medications to children based on the instructions from the child's individualized health care plan.

   b. Staff determined by the director, in consultation with the Child Care Health Consultant, to be responsible for providing medications not covered in the approved medication administration training must also be permitted to administer medications and/or medical treatments such as emergency seizure medication, insulin or oxygen with individualized training and delegation from the Child Care Health Consultant based on instructions from the child's individualized health care plan.

   c. Staff may be trained and delegated in the administration of a single rescue medication or rescue medical intervention by the center's Child Care Health Consultant. Such training and delegation must qualify the staff member to provide a rescue medication or treatment for a specific child based on instructions from the child's individualized health care plan.

7. All medications, except those medications specified in the Department's approved medication administration training as emergency medications, must be kept in an area inaccessible to children, but available to staff trained in administering medication. If refrigeration is required, the medication must be stored in either a separate refrigerator or a leak proof container in a designated area of a food storage refrigerator, separate from food and inaccessible to children. Controlled medications must be counted and safely secured, and specific policies regarding their handling require special attention in the

centers policies. Access to these medications must be limited (see section 12-22-318, C.R.S.).

8. Emergency medications must be stored in accordance with the Child Care Health Consultant's recommendation. Emergency medications are not required to be stored in a locked area. Emergency medications may be stored in an area easily accessible and identifiable to staff but out of reach of children. When away from the classroom, staff must carry emergency medications in a bag on their person.

9. A written medication log must be kept for each child. This log is part of the child's records. The log must contain the following:

   a. Child's name;

   b. Name of the medication, dosage, and route;

   c. Time medication is to be given;

   d. Special instructions;

   e. Name and initials of the individuals giving the medication; and

   f. Notation if the medication was not given and the reason.

10. Topical preparations such as petroleum jelly and bug sprays may be administered to children with written parental authorization. These preparations may not be applied to open wounds or broken skin unless there is a written order by the prescribing practitioner.

11. The center must have a written policy on the storage and access of inhalers and epinephrine auto injectors for all children in care. This policy must be reviewed by the Child Care Health Consultant.

12. The center may, with written parental consent and authorization of the prescribing health care provider, permit children who have asthma to carry their own inhalers or children who are at risk of anaphylaxis to carry their own epinephrine, and use them as directed. The center must have a specific written policy on the storage and access of inhalers and epinephrine for children who are permitted to carry or self-administer these medications. The policy must include a contract with the parent(s)/guardian(s), and child acknowledgement, assigning levels of responsibility of each individual. This contract must accompany orders for the medication from the health care provider, along with confirmation from Child Care Health Consultant that the student has been instructed and is capable of self- administration of the prescribed medications.

13. All staff members and Child Care Health Consultants must be aware of which children have asthma and severe allergies, and which of those may administer their own inhaler or auto injectors.

D. Sun Protection

1. The center must obtain the parent/guardian's written authorization and instructions for applying sunscreen or use of another form of parent/guardian approved sun protection. A health care provider's permission is not needed to use sunscreen at the center.

2. When supplied for an individual child, the sunscreen must be labeled with the child's first and last name.

3. If sunscreen is provided by the center, parents must be notified in advance, in writing, of the type of sunscreen the center will use.

4. Children may apply sunscreen to themselves under the direct supervision of a staff member.

5. The center must apply sunscreen, have the child apply sunscreen, have the parent or guardian apply sunscreen, or use another form of parent or guardian approved sun protection for children prior to children going outside. Sunscreen must be reapplied as directed by the product label.

E. Control of Communicable Illness

1. When children show signs of communicable illness, they must be separated from other children, the parent(s) or guardian(s) notified, and a medical physician~~doctor~~ or medical facility consulted as needed regarding treatment.

2. Staff members with a communicable illness must not be permitted to work or have contact with children or other staff members if the illness could be readily transmitted during normal working activities.

2.512~~7.712.53~~ PERSONAL HYGIENE

A. Children with specific toileting needs

The center must have one or more designated change areas for all children in need of changing. The change area must:

1. Meet a child's individual and developmental needs and be large enough to accommodate the size of the child;

2. Have a place inaccessible to children for storing all change supplies and disinfecting solutions and products; and

3. Have sufficient supplies.

2.513~~7.712.54~~ FOOD AND NUTRITION

A. The center must show evidence that all meals and snacks provided by the center must meet current United States Department of Agriculture (USDA) Child and Adult Care Food Program meal pattern requirements and be offered at suitable intervals. Children who are at the center for more than 4 hours, day or evening, must be offered a meal.

B. Centers must not provide sugar sweetened beverages to children. These are liquids that have been sweetened with various forms of sugars that add calories and include, but are not limited to: soda, fruitades, fruit drinks, flavored milks, and sports and energy drinks.

C. If 100% fruit juice, which is not a sugar sweetened beverage, is offered as part of meals and/or snacks, it must be limited to no more than twice per week.

D. In centers that do not regularly provide a meal, if a child brings a meal from home that does not appear to meet current USDA Child and Adult Care Food Program meal pattern requirements, the center must have foods available to offer as a supplement to that meal.

E. Meal menus must be planned at least one week in advance, dated, and available to parents. After use, menus must be filed and retained for three (3) months. Records must be available for periodic review and evaluation.

F. The size of servings must be suitable for the child's age and appetite, and sufficient time must be allowed so that meals are unhurried.

2.514~~7.712.55~~ GUIDANCE

A. Guidance must be appropriate and constructive or educational in nature and may include such measures as diversion, separation of the child from situation, talking with the child about the situation, or praise for appropriate behavior

B. Children must not be subjected to physical or emotional harm or humiliation

C. The director must not use, or permit a staff member or child to use, corporal punishment as defined in section 22-1-140, C.R.S~~or other harsh punishment, including but not limited to pinching, shaking, spanning punching, biting, kicking, rough handling, hair pulling, or any humiliating or frightening method of discipline~~.

D. Guidance must not be associated with food, rest, or toileting Children should never be punished for toileting accidents. Children must not be denied food or forced to eat as a disciplinary measure.

E. Separation, when used as guidance, must not exceed five minutes and must be appropriate for the child's age. The child must be in a safe, lighted, well-ventilated area and be within sight and hearing of an adult. The child must not be isolated in a locked or closed area.

F. Verbal abuse and derogatory remarks about the child are not permitted.

G. Authority for guidance must not be delegated to other children, and the center must not sanction one child punishing another child.

H. Physical exercise must not be used as a form of guidance.

2.515~~7.712.56~~ TRANSPORTATION

A. Transportation Provided by the Center

1. The center is responsible for any children it transports.

2. The center must obtain written permission from parents/guardians for any transportation of their child during child care hours.

3. The number of staff members who accompany children when being transported in the vehicle must meet the child care staff ratio found at rule section 2.508~~7.712.43~~. The driver of the center vehicle is considered a staff member.

4. Children must not be permitted to ride in the front seat of a vehicle unless they are secured in a seat belt that is safe and free from hazard. Children must remain seated while the vehicle is in motion.

5. Children must be loaded and unloaded out of the path of moving vehicles.

6. Children must not be permitted to stand or sit on the floor of a moving vehicle, and their arms, legs, and heads must remain inside the vehicle at all times.

7. Transportation arrangements for school-age children must be by agreement between the center and the children''s parents/guardians, *i.e.*, whether the children can walk, ride a bicycle or travel in a car. The center must monitor the children to ensure they arrive at the center when expected and follow up on their whereabouts if they are late. Written permission from parents or guardians for their children to attend community functions after school hours must include agreements regarding transportation.

8. Prior to a field trip or other excursion, the center must obtain information on liability insurance from parents/guardians and staff who transport children in their own cars and verify that all drivers have valid driver''s licenses.

B. Requirements for Vehicles

1. Any vehicle used for transporting children to and from the center or during program activities must meet the following requirements:

a. The vehicle must be enclosed and have door locks;

b. The seats of the vehicle must be constructed and installed according to the vehicle manufacturer''s specifications;

c. The vehicle must be kept in satisfactory condition to assure the safety of occupants. Vehicle tires, brakes, and lights must be operational, safe and free of hazard; and

d. Modifications to vehicles including, but not limited to, the addition of seats and seat belts must be completed by the manufacturer or an authorized representative of the manufacturer. Documentation of such modifications must be available for review.

2. Any child transported must be properly restrained in a child restraint system that meets the requirements of the Colorado child passenger safety law that requires:

a. Children who are under eight (8) years of age and who are being transported, shall be properly restrained in a child restraint system, according to manufacturer's instructions.

b. Children who are at least eight (8) years of age but less than sixteen (16) years of age who are being transported, shall be properly restrained in a safety belt or child restraint system according to manufacturer's instructions.

1. Children who meet the requirements to be restrained in a safety belt must be instructed and monitored to keep the seat belt properly fastened and adjusted

c. Two or more children must never be restrained in one (1) seat belt or child restraint system.

~~2. In passenger vehicles with a manufacturer''s established capacity of sixteen (16) or fewer passengers and less than 10,000 pounds, the following is required:~~

~~a. Each child must be restrained in an individual seat belt or child restraint system;~~

~~b. The provider must not transport more children than any vehicle is able to safely accommodate when child restraint systems and seat belts are properly installed and used in the vehicle;~~

~~c. Lap belts must be secured low and tight across the upper thighs and under the belly; and~~

~~d. Children must be instructed and required to keep the seat belt properly fastened and adjusted.~~

3. In vehicles with a manufacturer''s established capacity of sixteen (16) or more passengers, seat belts for passengers are not required~~, but must be used if provided~~.

C. Requirements for Drivers of Vehicles

1. All drivers of vehicles transporting children must operate the vehicle in a safe and appropriate manner.

2. All drivers of vehicles owned or leased by the center in which children are transported must have a current Department-approved First Aid and safety certificate that includes Cardiopulmonary Resuscitation (CPR) for all ages of children

3. In each vehicle used to transport children, drivers must have access to a First Aid kit.

4. The driver must ensure that all doors are secured at all times when the vehicle is moving.

5. The driver must make a good faith effort to ensure that each child is properly belted throughout the trip.

6. The driver must not eat or use a cellular or other mobile device while driving.

7. The required staff to child ratio must be maintained at all times.

8. All drivers must be at least 20 years of age.

9. Drivers must complete a minimum of four hours of driver training prior to transporting children. The driver training curriculum may be developed and administered by the center and must include at a minimum: behind the wheel training; participant transport attendance procedures, including taking attendance at the destination; managing behavioral issues; loading and unloading procedures; daily vehicle inspection procedures; proper tire inflation; emergency equipment and how to use it; accident procedures; passenger illness procedures; procedures for backing up; and vehicle evacuation.

~~7.712.6~~ PROGRAM ACTIVITIES

2.516~~7.712.61~~ ACTIVITY SCHEDULES

A. The center must provide parents/guardians with a list of activities it offers.

B. Parents or guardians must be given the opportunity to indicate to the staff of the center if they do not want their child to participate in an activity.

C. Parents/guardians must be notified in advance of all activities that will occur away from the center.

D. Television viewing, including videos, should not be permitted without the approval of a child's parents/guardians, who must be advised of the center's policy regarding television and video viewing.

E. A mobile day camp program must establish a daily itinerary and make available a copy to each child's parent or guardian. A copy must also be or file at the program's headquarters. The itinerary should be followed as closely as possible. In case of an emergency or change in the itinerary, the headquarters of the mobile day camp must be notified immediately. Parents/guardians must be instructed to contact the main headquarters to determine the exact location of their child.

2.5177.712.62 PHYSICAL ACTIVITY

A. Daily physical gross motor activities, with or without equipment or materials, must be provided outdoors, or indoors during inclement weather, for no less than 60 minutes total for programs operating over five hours per day. Activities do not have to occur all at one time.

B. Daily physical gross motor activities, with or without equipment or materials, must be provided outdoors or indoors during inclement weather, for no less than 30 minutes total for programs operating from three to five hours per day. Activities do not have to occur all at one time.

C. Daily physical gross motor activities, with or without equipment or materials, must be provided outdoors or indoors during inclement weather, for no less than 15 minutes total for programs operating less than 3 hours per day. Activities do not have to occur all at one time.

2.5187.712.63 SCREEN TIME AND MEDIA USE

A. All media that children are exposed to must not contain explicit language or topics.

B. All television, recorded media, computer, tablet, cell phones, video games and other media devices are prohibited during snack or meal times except during a planned special occasion.

C. The center must develop a media and internet usage plan outlining screen time and media use related to their curriculum. The media plan must have information on ongoing communication with children about safe online practices. The center must obtain a signed document stating that the parents/guardians have received this plan, and agree to the activities described in the plan.

D. There is no time restriction for children using personal adaptive equipment or assistive technology.

2.5197.712.64 Equipment and Materials

A. In a building based school-age child care center, rest time and rest equipment must be provided for school-age children who require a rest time.

B. Children at the center must have access to age-appropriate materials and equipment from at least the following categories:

1. Activity supplies;

2. Manipulatives and games;

3. Recreation equipment;

4. Library items; and

5. Science equipment and materials.

C. Children must wear helmets when riding scooters, bicycling, skateboarding, or rollerblading.

~~7.712.65~~2.520 FIELD TRIPS

A. On a field trip or during a mobile school-age child care program:

1. The center must notify the children's parents /guardians in advance of any field trip. The staff-child ratios found at rule section 2.508~~7.712.43.C, D, I~~ must be maintained at all times;

2. All groups of children must be directly supervised by a qualified program director or program leader at all times;

3. An accurate itinerary of each field trip must remain at the center;

4. The staff must have the following information about each child: parents/guardians contact information, health care provider's name, address, and phone number, and the written authorization from parent(s)/guardian(s) for emergency medical care.

5. If children attending the field trip require medications to be administered during the field trip or have special health needs, a staff member with current medication administration training and delegation must attend the field trip;

6. A list of all children and staff on a field trip must be kept at the center; and

7. A copy of the emergency disaster plan must accompany staff offsite.

~~7.712.7~~ BUILDING AND FACILITIES

2.521~~7.712.71~~ FACILITY REQUIREMENTS

A. The mobile day camp program and the outdoor-based day camp program may use as a gathering place a public park or playground if the program primarily includes field trips away from the gathering place. Such programs must have a contingency plan for facilities to use during increment weather. The plan must be available to parents/guardians on a daily basis.

B. If a room(s) inside a building are used for indoor care at least thirty (30) square feet of floor space per child is required. Indoor space is exclusive of kitchen, toilet rooms, office, staff rooms, hallways and stairways, closets, laundry rooms, furnace rooms.

C. When a building is being used during the summer months by a center specifically as a gathering place at the beginning and end of the day, the thirty (30) square feet requirement need not apply. The total amount of time during which the number of children present may exceed the thirty (30) square feet requirement must not exceed three (3) hours. This time must be divided evenly between the morning and the evening.

D. The building based school-age child care center must provide access to an outdoor play area. The outdoor play area may be a city park or public school ground. The play area must meet the following requirements:

1. The center must provide a total outside play area of at least seventy-five (75) square feet per child for a minimum of one-third of the licensed capacity of the center or a minimum of 1500 square feet, whichever is greater;

2. Access to a shaded area, sheltered area, or inside building area must be provided at all times to guard children against the hazards of excessive sun and heat; and

3. The outdoor play area must be maintained in a safe condition by removing debris, dilapidated structures, and worn and broken play equipment. The center must identify hazardous, high-risk areas. These areas must be monitored to reduce the possibility of injury and accidents;.

4. Outdoor play areas provided by the center must not have equipment that exceeds six (6) feet in height for any surface area intended for children's play unless equipped with a protective barrier to prevent children from falling; and.

5. All outdoor climbing equipment over eighteen (18) inches provided by the center must have least six (6) inches resilient surface throughout the use zone.

2.5227.712.72 TOILET FACILITIES

A. Children must be allowed the use of gender-segregated toilet facilities that are consistent with their gender identity, with toilets separated by partitions to provide privacy.

B. There must be a minimum of one (1) toilet per thirty (30) or fewer children for which the center is licensed. Hand-washing facilities must be available at the ratio of one (1) sink per thirty (30) or fewer children. After April 1, 2018 all new construction must have a minimum of one (1) toilet and one (1) hand washing sink per every fifteen (15) or fewer children for which the center is licensed.

2.5237.712.73 FIRE AND OTHER SAFETY REQUIREMENTS

A. General Requirements

1. Buildings must be kept in good repair and maintained in a safe condition.

2. Major cleaning is prohibited in rooms occupied by children.

3. Volatile substances, such as gasoline, kerosene, fuel oil, and oil-based paints, firearms, explosives, and other hazardous items, must be stored away from the area used for child care and be inaccessible to children.

4. Combustibles, such as cleaning rags, mops, and cleaning compounds, must be stored in well-ventilated areas separated from flammable materials and stored in areas inaccessible to children.

5. Closets, attics, basements, cellars, furnace rooms, and exit routes must be kept free from accumulation of extraneous materials.

6. All heating units, gas or electric, must be installed and maintained with safety devices to prevent fire, explosions, and other hazards. No open-flame gas or oil stoves, unscreened fireplaces, hot plates, or unvented heaters can be used for heating purposes. All heating elements, including hot water pipes, must be insulated or installed in such a way that children cannot come in contact with them. Nothing flammable or combustible can be stored within three (3) feet of a hot water heater or furnace.

7. Indoor and outdoor equipment, materials, and furnishings must be sturdy, safe and free of hazards.

8. Equipment, materials, and furnishings, including durable furniture such as tables and chairs, must be stored in a manner that is safe for children.

9. Extension cords cannot be used in place of permanent wiring.

10. Corridors, halls, stairs, and porches must be adequately lighted. Operable battery-powered lights must be provided in locations readily accessible to staff in the event of electric power failure.

B. Fire Safety

1. Every building and structure must be constructed, arranged, equipped, maintained, and operated so as to avoid undue danger to the lives and safety of its occupants from fire, smoke, fumes, or resulting panic during the period of time reasonably necessary for escape from the building or structure in case of fire or other emergency.

2. Every building and structure must have at least two (2) approved, alternate means of egress from each floor of the building or to a common hallway leading to the exterior. They must be at different locations.

3. Every exit must be clearly visible, or the route to reach it must be conspicuously indicated. Each path of escape must be clearly marked.

4. In every building or structure, exits must be arranged and maintained so as to provide free and unobstructed egress from all parts of the building or structure at all times when it is occupied. Locks or fastening devices to prevent free escape from the inside of any building must not be installed. Only panic hardware or single-action hardware is permitted on a door or on a pair of doors. All door hardware must be within the reach of children.

5. If the building in which the center operates has a security lock on outside exit doors, the center must obtain written permission from the local fire department; and there must be a written sign attached to the door instructing staff that the security lock is not to be utilized when children are present and the center is in operation.

6. Every building and structure must have an automatic or Department-approved manually operated fire alarm system to warn occupants of the existence of fire or to facilitate the orderly conduct of fire exit drills.

7.712.8 RECORDS AND REPORTS

2.5247.712.81 Children's Records

A. The center must maintain and update annually a record on each child that includes:

1. The child's full name, age, current address, and date of enrollment;

2. Names, home and employment addresses and telephone numbers, which may include cell phone numbers, and e-mail of parents/guardians if available;

3. Any special instructions as to how the parents/guardians can be reached during the hours the child is at the center;

4. Names and telephone numbers of persons other than parents/guardians who are authorized to take the child from the center;

5. Names, addresses, and telephone numbers of persons who can assume responsibility for the child in the event of an emergency if parents/guardians cannot be reached immediately;

6. Name, address, and telephone number of the child's physician, dentist, and hospital of choice;

7. A complete health history including communicable diseases, chronic illnesses or injuries, immunization history, known drug reactions or allergies, medication records, special diet needs, and health care plans as required in rule section 2.511~~7.712.52.A.1~~;

8. A dated written authorization for emergency medical care signed and submitted annually by the parent or guardian. The authorization must be notarized if required by the local health care facility;

9. Written authorization from a parent or guardian for the child to participate in field trips and to participate in program activities, listing all exclusions from authorization;

10. Written authorization from a parent/guardian for the center to transport the child to and from school, whether by walking or driving; and

11. Reports of serious injuries and accidents occurring during care that result in medical attention, admission to the hospital, or death of a child.

2.525~~7.712.82~~ STAFF RECORDS

A. The center office must maintain a record for each staff member, paid or volunteer, which includes the following:

1. Name, address, and birth date of the individual;

2. The date that the staff member was employed by the center;

3. Name, address, and phone number of the person(s) to be notified in the event of an emergency;

4. Verification of the staff member's certifications, qualifications and training requirements;

5. Copies of written references or notes of phone references, as required by rule section 2.507~~7.712.41.D.1~~;

7. Verification that a criminal record check with the Colorado Bureau of Investigation and federal bureau of investigation is in process, or a copy of the results of the staff member's criminal record check; and

8. Verification that a review of the ~~State~~ Department's automated system for reporting child abuse and neglect has occurred or is in process.

B. Each staff member's personnel file must contain all required information within thirty (30) working days of the first day of employment.

2.526~~7.712.83~~ ADMINISTRATIVE RECORDS AND REPORTS

A. The following records must be on file at the center:

1. Records of enrollment, daily attendance for each child, and daily record of time child arrives at and departs from the center;

2. Current health department child care inspection report issued for the assigned license number within the past two (2) years;

3. Current fire department inspection report issued within the past two (2) years; and

4. A list of current staff members, substitutes, and staffing patterns.

B. Each center must submit a report in writing to the Department using the online injury reporting system of any accident or illness occurring at the center that resulted in medical treatment by a physician or other health care professional, hospitalization, or death. This report must be made within twenty-four (24) hours after the accident or illness occurred.

C. A report about a fatality must include:

1. The child's name, birth date, address, and telephone number;

2. The names of the child's parents or guardians and their address and telephone number if different from those of the child;

3. Date of the fatality;

4. Brief description of the incident or illness leading to the fatality;

5. Names and addresses of witnesses or persons who were with the child at the time of death; and

6. Name and address of police department or authority to which the report was made.

D. The center must maintain records of reports of communicable illness made to the Colorado Department of Public Health and Environment or local public health agency.

E. The center must submit to the Department as soon as possible but not longer than twenty-four (24) hours a written report about any child who has been separated from the group outside of the supervision of their assigned staff member or for whom the local authorities have been contacted. Such report must indicate:

1. The name, birth date, address, and telephone number of the child;

2. The names of the parents/guardians and their address and telephone number if different from those of the child;

3. The date when the child was lost;

4. The location, time, and circumstances when the child was last seen;

5. Actions taken to locate the child; and

6. The name of the staff person supervising the child.

~~7.712.84~~2.527 CONFIDENTIALITY AND RETENTION

A. The center must maintain complete records of personnel and children as required in~~at~~ rule sections 2.524, 2.525, and 2.526~~7.712.81, 7.712.82, and 7.712.83~~.

B. The confidentiality of all personnel and children's records must be maintained (see rule section 2.116 and 2.124~~7.701.7~~ of the~~,~~ General Rules for Child Care Facilities).

C. Personnel and children's records must be available, upon request, to authorized personnel of the Department.

D. If records for organizations having more than one center are kept in a central file, duplicate identifying and emergency information for personnel and children must also be kept on file at the center attended by the child.

E. The records of children must be maintained by the school-age child care center for at least three (3) years.

RULES REGULATING SPECIAL ACTIVITIES

2.600 AUTHORITY

These rules and regulations are adopted pursuant to the rulemaking authority provided in section 26.5-1-105(1), C.R.S., and are intended to be consistent with the requirements of the State Administrative Procedures Act, sections 24-4-101 *et seq*. (the "APA"), C.R.S., the Anna Jo Garcia Haynes Early Childhood Act, sections 26.5-1-101 *et seq*. (the "Early Childhood Act"), C.R.S., the Child Care Licensing Act, sections 26.5-5-301, *et seq*., C.R.S.; and the Child Care Development and Block Grant Act of 2014, 42 U.S.C. sec. 9858e, and section 26.5-4-110(3), C.R.S.

The specific rulemaking authorities granted for Special Activities include sections XXX, C.R.S.

2.601 SCOPE AND PURPOSE

These rules and regulations shall govern the processes and procedures to become a licensed child care facility, and the health and safety requirements of licensed child care facilities in Colorado. These rules and regulations shall govern the health and safety requirements for special activities including Swimming, Boating, Rafting, Archery, Riflery, Horseback Riding, Trampoline, Climbing, Hiking, Backpacking, And Biking.

2.602 APPLICABILITY

The provisions of these rules and regulations shall be applicable to licensed child care providers participating in special activities, which include licensed School Age Child Care, Child Care Centers, Neighborhood Youth Organizations, Family Child Care Homes, and Children's Resident Camps.

~~7.719 RULES REGULATING SPECIAL ACTIVITIES [Rev. eff. 6/1/07]~~

~~These rules for Special Activities shall apply to School-Age Child Care Centers, Residential Child Care Facilities, and Children's Resident Camps.~~

2.603~~7.719.1~~ GENERAL PROVISIONS ~~[Rev. eff. 6/1/07]~~

A. There shall be a written program that reflects the purpose of the child care facility, including a list of activities at the child care facility. The written program must be provided to parents.

B. Parents shall be given the opportunity to indicate to child care facility staff whether they do not wish their child to participate in a special activity (see rule sections 2.208(A)(8) of the Rules

Regulating Child Care Centers; 2.319(A)(11) of the Rules Regulating Family Child Care homes; 2.417(A)(9) of the Rules Regulating Children's Resident Camps; and 2.524(A)(9) of the Rules Regulating School Age Child Care.~~7.711.61, A. 10~~).

C. Each phase of the child care facility program shall be under the supervision of a resident qualified staff member who shall be responsible for health and safety precautions. Verification of experience and/or certification shall be in the staff members personnel files at the child care facility.

D. If the child care facility participates in special activities other than those for which rules are found in this rule section, such as ballooning or winter camping, the child care facility shall develop and follow a written plan which includes at least, the following:

1. The qualifications of the supervisor of the activity.

2. The qualifications of any other staff members necessary for proper supervision of the activity.

3. The number of necessary staff members needed to supervise the activity.

4. Conditions under which a child may participate in the activity, such as age or skill level of the child.

5. Any special equipment necessary, its supply and condition.

6. Access to medical treatment.

7. Development of an emergency plan.

E. Paint ball activities where children shoot paint balls at other children are prohibited at a child care facility.

F. The staff member supervising special activities shall possess evidence of appropriate experience, training, and/or certification in the program specialty Said staff member shall be present at the site of the activity whenever the activity is being earned out unless other wise indicated in these rules.

G. The qualified supervising staff member of special activities shall have the following duties:

1. Direct training of other staff members working in the activity.

2. Assign duties to staff members.

3. Assure that all necessary equipment is complete, in good repair, and safe to use.

4. Assure that environmental hazards are not sever enough to cause danger to children.

H. Rules shall be reviewed with children at the beginning of each activity.

I. First Aid supplies shall be available at each special activity site.

J. The staff to child ratio for each type of facility must be followed according to rules for that facility regardless of activity unless the ratio is different for the specified activity, in which case the activity staff to child ratio should apply.

7.719.2 WATER ACTIVITIES

2.6047.719.21 SWIMMING [Rev. eff. 6/1/07]

A. There shall be a swimming supervisor who, as a minimum, holds a current Red Cross life guard training certificate or equivalent, such as a YMCA or Boy Scout aquatics instructor's certificate. If the child care facility is offering swimming instruction, the swimming supervisor must also hold a Red Cross water safety instructor certificate or equivalent.

B. At any time the swimming area is open, there shall be at the swimming area a staff member who holds at least a current life guard training certificate or equivalent for each thirty (30) campers in the water. There shall be present as least one (1) staff member for each ten (10) children in the water. The lifeguard does not count in the staff to child ratio for supervision of children.

C. The swimming area shall be off limits when appropriate numbers of qualified staff members are not present.

D. If the child care facility uses a pool for which the child care facility is not responsible, the child care facility need not provide a lifeguard if there is a qualified lifeguard provided by the pool. If the pool does not provide a qualified lifeguard, staff members meeting qualifications stated at rule section 2.604(B)7.719.2, B. must be provided by the child care facility. There shall be at least one (1) staff lookout counselor at the pool for each ten (10) children in the water.

E. Swimming area rules and emergency procedures shall be posted in a visible location at the swimming area.

F. The swimming pool or swimming area shall meet the standards of the Colorado Department of Public Health and Environment (CDPHE).

G. If children are permitted to swim in a lake or pond, swimming areas shall be clearly designated

H. Before children are permitted to swim in deep water, swimming skills must be tested by property trained staff members.

I. There shall be a system known to child and lookout staff for checking the children when children are in the water.

J. The following equipment must be available for use at the pool side or the take shore in which swimming is permitted:

1. A rescue tube;

2. Reach pole; and,

3. Backboard.

K. Where the size of the body of water makes it impossible to reach victims by reach pole, rescue tube or other rescue device, a rescue boat must be available at all times.

L. If a child care facility has shoreline activities such as wading, fishing, ecology or nature studies, the child care facility shall have a written policy which defines qualifications of persons accompanying the group and safety, factors to be followed. Staff members shall be acquainted with the policy.

M. In the case of a travel-trip camp, there shall be a minimum of one staff member who holds at least current Red Cross life guard training certificate or equivalent who is responsible for all swimming activities.

2.605~~7.719.22~~ BOARDING, CANOEING, SAILING, AND KAYAKING ON FLATWATER ~~[Rev. eff. 6/1/07]~~

A. The boating supervisor shall hold, at a minimum:

1. A current Red Cross life guard training certificate or equivalent; ~~or,~~

2. Boy Scout certificate; ~~or,~~

3. Basic small craft instructor, small craft safety, or paddle safety certificate for the type of craft which is to be supervised; or~~,~~

4. Documentation of experience indicating knowledge and skill in teaching and supervision specific to the watercraft activities to be conducted.

B. The boating supervisor, or staff member equally qualified who has been trained by the boating supervisor, must be on site during the activity.

C. Other staff members shall have appropriate experience and training for the type of craft to be utilized.

D. Whenever children are on the water they shall be wearing a United States Coast Guard approved personal notation device appropriate to the weight of the child.

E. There shall be a minimum of two (2) lookout staff members at the shoreline and/or on the water at any time when children are on the water in boating, canoeing, kayaking or sailing activities. Hazards such as the size of the lake, the skill of the children, the conditions of the water, and the temperature of the water, shall be taken into account by the supervisor of the activity when determining the number and location of lookout staff necessary with the children, but there shall never be fewer staff with the children than those required at rule sections 2.411 of the Rules Regulating Children's Resident Camps; 2.508 of the Rules Regulating School Age Child Care; and 2.216 of the Rules Regulating Child Care Centers ~~7.711.23, D~~.

F. Except for kayaking, there shall be a staff member m any boat which holds one or more children under seven years old.

G. At no time shall the occupancy of the craft exceed the capacity established for the craft by the United States Coast Guard standards.

H. There shall be a warning device, such as a loud whistle, air horn, or other audible signal device, which can readily be heard by persons on the water that indicates the need for children and staff to return to the facility.

I. Where the size and depth of the body of water indicates, there shall be a rescue boat in close proximity to where the activity takes place. This rescue boat shall be in good repair and shall contain appropriate equipment, such as a rescue tube, reach pole, extra oar, or paddle.

J. Water craft shall not enter a swimming area when swimmers are in the water.

2.606~~7.719.23~~ BOATING, CANOEING, TUBING, AND KAYAKING ON CLASS I OR II MOVING WATER ~~[Rev. eff. 6/1/07]~~

A. The boating supervisor shall hold, at a minimum:

1. Current Red Cross life guard training certificate or equivalent; or,

2. Boy Scout certificate; or,

3. Basic small craft instructor certificate for the type of craft which is to be supervised; or,

4. Documentation of experience indicating knowledge and skill in teaching and supervision specific to the watercraft activities to be conducted.

B. The boating supervisor must be on site during the activity.

C. Children shall only canoe, tube, or kayak on Class II or less water.

D. Supervising staff must be experienced and knowledgeable about the river being used, including the height and speed of the river.

E. The child care facility must have a written policy on evaluating the safety of the river. Supervising staff must be trained on the policy.

F. Each child shall wear a Unites States Coast Guard approved personal flotation device whenever they are on the moving water.

G. The supervisor of this activity shall be trained in Red Cross standard First Aid and safety, and Cardiopulmonary Resuscitation (CPR).

H. The supervisor shall be familiar with rescue techniques with canoes, kayaks, and tubes on moving water and shall train children in these techniques.

I. Rescue equipment appropriate to the activity shall be available, such as rope throw bag and rescue tubes.

2.6077.719.24 WHITE WATER RAFTING ON CLASS III AND IV RIVERS (CLASSES OF RIVERS ARE THOSE AS DEFINED BY THE INTERNATIONAL SCALE OF RIVER DIFFICULTY) [Rev. eff. 6/1/07]

A. If the child care facility operates white water rafting, the child care facility must have an active River Outfitter license from be licensed by the Colorado Parks and WildlifeDivision of Parks and Outdoor Recreation as a river outfitter.

B. If a child care facility provides a white water rafting experience by purchase from a river outfitter, the license of the river outfitter must be activevalid.

7.719.3 ARCHERY AND RIFLERY

2.6087.719.31 ARCHERY [Rev. eff. 6/1/07]

A. The archery supervisor shall have certification, documented training or experience from a recognized organization or certifying body for the type of activities offered.

B. The archery range shall be free from hazards and well-marked. There shall be a clear path to the target which is not obstructed by such things as rocks, trees or branches. Traffic, trail, or other camp activities shall not be placed in the direction of the flight of the arrows.

C. Equipment shall be maintained in safe condition. Bows and arrows shall be inspected for fractures, splinters or cracks before each use. Damaged bows and arrows shall not be utilized.

D. Equipment shall be stored under lock and key when not in use. Bows and arrows shall be used only in the specified archery area.

E. If the child care facility has field archery, a procedure shall be established and posted to provide for the safety of the archers, including issuance of arrows at check-in point of the archery trail, check in of archer at the beginning of the archery trail, and check out when archer has completed the trail.

F. The archery supervisor or a staff person trained and authorized by the archery supervisor must be present at all times when children are present at the archery range or field.

G. All archers shall use the same firing line. Arrows shall be issued only at the firing line.

H. Arrows shall be nocked to bow string after shooters are on the firing line and after the signal to shoot has been given.

I. Before arrows are released, shooters shall have a definite target.

J. Movement must be controlled by a supervising staff member. All persons must stay behind the firing line until the signal to retrieve arrows is given. All arrows shall be retrieved at the same time.

2.609~~7.719.32~~ RIFLERY ~~[Rev. eff. 6/1/07]~~

A. The riflery supervisor shall hold a National Rifle Association instructor's or assistance instructor's certification in rifle shooting or equivalent certification from a national organization or shall have verified experience equivalent to that necessary to obtain the National Rifle Association Fire Arm certification.

B. If the riflery supervisor is not present at the rifle range whenever children are firing guns, the staff person(s) trained by the riflery supervisor must be present at all times when children are present.

C. The rifle range shall be free from all hazards, away from other activities and traffic of any type; shall be well marked with danger signs or flags; all blind approaches shall be fenced or blocked off.

D. The range shall be constructed with an appropriately designed bullet-stop so that all bullets will be stopped behind the targets. The bullet-stop shall be free of trees, rocks, boulders, or other objects which may cause a bullet to ricochet away from the bullet-stop.

E. There shall be a well-defined firing line which shall be level with the targets and elevated off the ground. A minimum space of five feet between firing points shall be established or firing points separated by a permanent divider. Targets must be designed to minimize potential for ricochet. Targets cannot depict human form.

F. Only the following types of guns shall be permitted:

1. .22 caliber rimfire, single-shot, bolt-action rifles having no trigger modification other than the factory setting.

2. Pneumatic spring-type and CO_2 air guns may be either .22 caliber or .177 (Ball Bearing (BB) size).

G. Proper condition of the firearms shall be maintained by inspection before and after usage, cleaning as necessary. Firearms that do not function properly shall be repaired and tested before usage.

H. Instruction on the use of firearms shall be presented to the children prior to the use of the rifle range.

I. No more than five cartridges at a time shall be distributed to a child by the responsible supervising staff member and issued only at the firing line.

J. Firing shall be permitted at the firing line only. Observers shall remain behind firing line.

K. Actions of uncased firearms shall be kept open except when on firing line ready to fire.

L. All firearms shall be unloaded immediately upon the command “cease firing” regardless of when this command is given. Actions shall remain open until further commands are given.

M. On ranges where shooters must go down range to change targets and score: movement must be controlled by the supervising staff member.

N. All spent or unspent cartridges must be returned to the supervising staff member.

HORSEBACK RIDING

2.610~~7.719.4~~ HORSEBACK RIDING ACTIVITIES ~~[Rev. eff. 6/1/07]~~

A. The horseback riding supervisor shall have completed at least one of the following:

1. Certificate from nationally recognized organization or riding school; or.

2. Written verification of successful experience in formal horseback riding instruction.

B. The horseback riding supervisor shall train a sufficient number of child care facility riding staff members in the supervision of children in the horseback riding program for the anticipated size of the riding program.

C. Child care facility riding staff shall be trained by the horseback riding supervisor in emergency procedures appropriate to the horseback riding activity.

D. At least two trained riding child care facility staff members, one of whom holds a current American Red Cross standard First Aid and safety certificate or equivalent, shall accompany each trail excursion. If the horseback ride is more than one hour from emergency medical services, at least one staff member shall be trained in wilderness first aid training. If the horseback ride is for seven or more nights and is more than one hour away from emergency medical services, there must be at least one staff member with each group of children with wilderness first responder training, CPR, and medication administration training. If more than twenty children participate in the trail excursion, there shall be a trained riding child care facility staff member assigned for each additional ten (10) or fewer riders.

E. First Aid supplies shall be carried on each trail excursion and available at each horseback riding ring/arena.

F. No person is allowed in the riding area unless the horseback riding supervisor or a trained riding child care facility staff member is present.

G. The riding supervisor shall determine the child's riding experience and level of skill and must take these into account in assigning which horse each child should ride and determining the type of riding activity in which each child should engage. Children shall be given instruction in basic safety, which shall include at least the following: riding rules in the ring and on the trail, how to approach, and mount and dismount.

H. Children shall be appropriately dressed for riding, which shall include shoes or boots and long pants. The riding supervisor must evaluate the footgear of each child and make the stirrups safe for each child's shoe or boot.

I. Protective head gear/helmets are mandatory for children ring riding and on trail rides.

J. Parents must be notified in advance of what type of protective gear is used by the child care facility. If children bring helmets from home, they must be specifically designed for equestrian use, worn correctly, and in good condition.

K. The horseback riding equipment shall be in good condition, properly sized and adjusted for each rider.

L. The horse bam or stable, ring, and commonly used trail(s) shall be in good repair and free of dangerous obstructions.

M. Horses shall be cared for with evidence of an adequate feeding schedule and a means to care for sick horses.

N. Horses shall not be permitted in the other designated activity areas.

TRAMPOLINE

2.6117.719.5 TRAMPOLINE ACTIVITIES [Rev. eff. 6/1/07]

A. The trampoline supervisor shall have documented formal training and experience in use of trampoline and knowledge of safety and spotting techniques.

B. Trampolines shall be equipped with pads along the sides and shall be kept in good repair.

C. No person shall be on the trampoline unless a trampoline supervisor is present and spotters are present on all four (4) sides of the trampoline.

D. Trampolines shall be secured from unauthorized use by any person.

E. The child shall dismount the trampoline by sitting on the edge and sliding off. No child shall jump off the trampoline.

F. Spotters shall be posted on four sides of each trampoline at all times. Spotters shall not stand, sit, or lie on trampoline, but shall stand in a position of readiness, watching the jumper at all times.

7.719.6 CLIMBING ACTIVITIES

2.6127.719.61 ROCK CLIMBING AND ROPES COURSES [Rev. eff. 6/1/07]

A. When a child care facility offers basic/single-pitch rock climbing or advanced/multi-pitched climbing, which includes such topics as the care and use of basic equipment, knots, anchors and belays, verbal signals, safely measures, basic climbing holds and moves, and techniques of rappelling, the following rules must be complied with:

1. The climbing supervisor shall:

   a. Be at least eighteen (18) years old;

   b. Have certification or documented experience in knots, anchors, safety zones, verbal signals, belaying, rappelling, and safe tie-ins, or training or experience from a recognized organization, such as the Association for Challenge Course Technology or certifying body for the type of activities offered; and~~,~~

   c. Have at least six (6) weeks~~'~~ experience in a management or supervisory capacity in similar types of programs.

2. A climbing instructor shall have verified knowledge of technical climbing by completion of a course or climbing school, or a minimum of ten (10) hours of instruction.

3. At least two climbing instructors must be present at the climbing site at all times.

4. There shall be one climbing instructor for each six (6) climbers or two climbing instructors for thirteen (13) children.

5. There shall be a staff member who holds at least a current Red Cross standard First Aid and safety certificate or equivalent at the rock climbing site.

6. First Aid supplies, put together by a person knowledgeable in First Aid supplies needed for climbing activities and possible injuries, shall be present at the climbing site.

7. No child shall be forced to participate in this activity.

8. The climbing supervisor shall be responsible for the proper maintenance of all equipment used. Equipment shall be checked by the supervisor immediately prior to use.

9. All rock climbing equipment shall meet industry standards and shall be maintained, visually and physically inspected, and replaced on a timely basis.

10. Climbers must wear helmets at all times when in designated helmet zones.

11. The child care facility shall not permit an unsupervised climb.

12. The climbing supervisor must have knowledge of where the climb is to occur and must give approval on the day of the climb for the climb to occur.

13. Each rock climber must be visually supervised.

14. Children waiting to climb must be supervised by a staff member.

15. All climbers and rappellers shall be belayed in a top rope manner by a belayer that has been instructed in proper procedures, and directly supervised until competency has been demonstrated.

    a. Have certification or documented experience in knots, anchors, safety zones, verbal signals, belaying, rappelling, and safe tie-ins, or training or experience from a recognized organization, such as the Association for Challenge Course Technology or certifying body for the type of activities offered; and

b. Have at least six (6) weeks experience in a management or supervisory capacity in similar types of programs.

2.613 ADVANCE/ MULTI-PITCHED CLIMBING

A~~B~~. If the child care facility offers advanced/multi-pitched climbing, the following rules shall also be complied with:

1. The climbing supervisor accompanying participants shall:

   a. Hold a current Red Cross standard First Aid and safety certificate or equivalent, and a current certificate for cardiopulmonary resuscitation;

   b. Have been an instructor, under supervision, for two seasons with verifiable experience and a review of any serious accidents;

   c. Have completed a technical climbing school or training in technical climbing with evidence by letter of such completion;

   d. Have led ten additional multi-pitched Class V climbs (the classification of the climbs as defined by the American Alpine Club) within the last two (2) years; and~~,~~

   e. Have knowledge of mountain rescue techniques. If the climb is more than sixty (60) minutes from emergency medical services, the climbing supervisor must hold a current wilderness First Aid training certificate or equivalent.

2. The climbing instructor or the rope leader shall have:

   a. The same training as the climbing supervisor;

   b. Have been an instructor, under supervision, for one season with verifiable experience and a review of any serious accidents;

   c. Completed a technical climbing school or training in technical climbing;

   d. Led five additional multi- pitched climbs; and~~,~~

   e. Knowledge of mountain rescue techniques. No instructor shall take campers on a climb he/she has not completed previously.

3. No child will be the rope leader.

4. A child who is permitted to participate in the climb must be at least thirteen (13) years old. The climbing supervisor shall assess the ability of the child as to the difficulty of the climb.

5. The climbing instructor and climbing site must be approved by the climbing supervisor for each climb.

6. The climbing supervisor, an equally qualified person, or two (2) equally qualified rope leaders shall be present at the climb site.

7. There shall be one rope leader that is at least eighteen (18) years of age to each three climbers in an extended climb.

8. First Aid equipment must be carried with the staff on each climb.

2.614 HIGH AND OR LOW ROPES COURSES OR CLIMBING WALLS

A~~C~~. If the child care facility offers high and/or low ropes courses or a climbing wall, the following rules must be complied with at all times:

1. The rope supervisor must have training and experience on the type of rope course or climbing wall being used and must hold a current standard First Aid and safety certificate or, if the ropes course or climbing wall is more than sixty (60) minutes from definitive care, must hold a wilderness First Aid card.

2. The rope instructor must have training and experience on the type of rope course or climbing wall being used and must be supervised by the rope supervisor and must hold a current standard First Aid and safety certificate or, if the ropes course or climbing wall is more than sixty (60) minutes from definitive care, must hold a wilderness First Aid card.

3. Ropes courses must have written evidence of annual inspection by qualified Association of Challenge Course Technology (ACCT) personnel of course elements for integrity of all hardware, materials, and equipment.

4. Ropes courses must be inspected regularly before use by the rope supervisor or the rope instructor.

5. All equipment and elements of a rope course or climbing wall must be safety checked prior to each use and have written records of regular inspection and maintenance of all equipment and elements utilized.

6. Children must wear safety equipment appropriate to the size of the child and appropriate helmets when using the high ropes course or climbing wall.

7. At all times, there must be a rope supervisor or rope instructor on the ropes course with children.

8. Ropes courses and climbing walls must be off limits to children when a rope supervisor or rope instructor is not present.

9. Access to ropes courses and climbing walls must be controlled by education, signs, and whatever other means are necessary to control unsupervised access.

10. The child care facility must have written safety procedures for use of the ropes course(s) and climbing wall. Staff must be trained on the safety procedures.

~~7.719.7~~ HIKING, BACKPACKING, AND CAMPING

2.615~~7.719.71~~ HIKING ~~[Rev. eff. 6/1/07]~~

If the child care facility offers hiking activities, the following rules shall be complied with:

A. The hiking supervisor must hold a current Red Cross standard First Aid and safety certificate or equivalent; shall have knowledge of outdoor experience and the symptoms and correct treatment procedures for hypothermia and dehydration; and, shall have verifiable experience in hiking and backpacking at the elevation where the hike is to take place.

B. The staff members involved in hiking shall be trained by the supervisor and shall continually observe and monitor campers on the trail for early diagnosis and treatment of injury or illness.

C. When a group takes a hike within 60 minutes of definitive medical care, there must be at least one staff member currently qualified with Red Cross standard First Aid and safety training certificate or equivalent, current Cardiopulmonary Resuscitation (CPR) certificate, and current training in the Department required and approved medication administration training.

D. When a group takes a hiking or backpacking trip where children are either more than sixty (60) minutes away from definitive medical care, there must be at least one staff member with each group of children with current wilderness First Aid training, or equivalent, current CPR training, and current medication administration training.

E. At least two (2) staff members must accompany a group in hikes. From time to time, hiking groups may divide up as long as hikers are always with one staff member and staff members are in visual, verbal or electronic (radio or wireless communication) contact with each other.

F. In selecting the area for hiking, the hiking supervisor shall consider the hiker's age, physical condition and experience, as well as the season, weather trends, methods of evacuation, and communication.

G. Before participation, children must be instructed on:

1. The fundamental safety procedures to follow on the trail;

2. Procedures to follow if lost;

3. Proper health and sanitation procedures on the trail;

4. Rules governing land to be hiked;

5. Potential high-risk areas; and~~,~~

6. Fire precautions.

H. Each hiker shall be equipped with protective clothing against natural elements such as ram, snow, wind, cold, sun, and insects.

I. First Aid supplies, put together by a person knowledgeable in First Aid supplies needed for possible accidents and/or injuries, shall be present on each hike. The contents of each kit shall be adequate for the number of children, the terrain, and the length of the hike.

J. An itinerary of the hiking trip and a list of all people on the hike must be kept at the child care facility.

K. The child care facility must have written safety procedures for hiking, including the written protocol for evacuating a child that becomes sick or injured on a hike. Staff and children must be trained on the safety procedures and protocol.

2.616~~7.719.72~~ BACKPACKING AND CAMPING ~~[Rev. eff. 6/1/07]~~

A. The backpacking and camping supervisor shall have knowledge and verifiable experience in camping and/or backpacking at the elevation where the backpacking or camping will take place.

B. When a group is backpacking or camping within sixty (60) minutes of definitive medical care, there must be at least one staff member currently qualified with Red Cross standard First Aid training certificate or equivalent, current Cardiopulmonary Resuscitation (CPR) training, and current training in the Department required and approved medication administration training.

C. When a group is backpacking or camping where children are more than sixty (60) minutes away from definitive medical care, there must be at least one staff member with each group of children with current wilderness First Aid training or equivalent, current CPR training, and current medication administration training.

D. If a child will require medication administration while away from the child care facility while backpacking or camping, there must be at least one (1) staff member present with current medication administration training who has been delegated by a registered nurse to administer medication.

E. The staff members involved in backpacking or camping shall be trained by the supervisor and shall continually observe and monitor children on the trail for early diagnosis and treatment of injuries or illness.

F. The backpacking or camping supervisor shall consider the hiker's age, physical condition, and experience, as well as the season, weather trends, methods of evacuation and communication, and water quality and quantity in selecting the area for backpacking or camping.

G. Children shall have a safety orientation and be instructed on the applicable precautions, such as:

1. The fundamental safety procedures to follow on the trail;

2. Procedures for a hiker if he/she becomes lost;

3. Proper health procedures, including the need for drinking fluids and eating appropriate foods;

4. Sanitation procedures;

5. Relevant rules and regulations;

6. Potential high-risk areas which may be found on the trail;

7. Fire danger precautions; flash floods; lightening dangers; and~~,~~

8. Procedures when encountering wild animals.

H. Children shall be oriented to minimum impact guidelines and techniques.

I. Each child shall be equipped with protective clothing and equipment against anticipated natural elements such as rain, snow, wind, cold, sun, and insects.

J. Appropriate first aid supplies shall be present on each trip. The contents of each kit shall be adequate for the number of children, the terrain, and the length of the trip.

K. An itinerary of the trip with a list of participants must be available to parents, staff, local police jurisdictions and staff or contractors of the Colorado Department of Human Services.

L. The child care facility must have written safety procedures for backpacking or camping, including the written protocol for evacuating a child that becomes sick or injured.

~~7.719.8~~ BIKING ~~[Rev. eff. 6/1/07]~~

2.617 BICYCLING ON PUBLIC ROADS OR MOUNTAIN TRAILS

If a child care facility has bicycling trips either on a public road or on mountain trails, the following rules shall be complied with:

A. The bicycling supervisor must be familiar with state laws about bicycling; be knowledgeable about the type of bicycling terrain where the bicycle trips will occur be knowledgeable about bicycling in the mountains, if applicable: shall know how to make simple bicycle repairs; and, shall hold at lest a current Red Cross standard First Aid and safety certificate or equivalent.

B. At least two (2) staff members must accompany a group while biking. From time to time, biking groups may divide up as long as bikers are always with one staff member and staff members are in visual, verbal or electronic (radio or wireless communication) contact with each other. A bicycling supervisor or staff member equally qualified and another qualified staff member must accompany each bicycle trip. Correct staff to child ratios must be complied with at all times. There must be one staff member at the beginning and end of each bicycle group.

C. Each bicycler shall wear head protection and the bicycle shall be equipped with brakes in good condition. Bicycles shall be in good condition, properly maintained, inspected prior to each bicycling trip, and adjusted to the size of the child riding the bicycle. Children using their own bicycles will be informed in advance, in writing, that their bicycles must be in good condition, properly maintained, inspected prior to each bicycling trip, and adjusted to the size of the child riding the bicycle.

D. An appropriate bicycle repair kit and First Aid equipment must be taken on each trip. The First Aid supplies must be put together by a person knowledgeable in First Aid supplies needed for bike trips and possible accidents and/or injuries.

E. The bicycling supervisor must instruct children as to emergency procedures, safe riding practices, and road and trail etiquette.

F. The bicycling supervisor shall evaluate each child as to his/her physical capability to participate in the planned bicycling trip, keeping in mind the trip length, terrain, altitude of the trip, and weather conditions.

G. Water/fluids must be taken on each bicycle trip.

H. An itinerary of the biking trip and a list of all people on the biking trip must be kept at the child care facility.

I. The child care facility must have written safety procedures of bike trips, including the written protocol for evacuating a child that becomes sick or injured on a bike trip. Staff and children must be trained on the safety procedures and protocol.

~~7.730~~ RULES REGULATING SUBSTITUTE PLACEMENT AGENCIES

~~All substitute placement agencies must comply with the current "General Rules for Child Care Facilities" 7.701 AND "Rules Regulating Substitute Placement Agencies (less than 24-hour care)"~~

2.800 AUTHORITY

These rules and regulations are adopted pursuant to the rulemaking authority provided in section 26.5-1-105(1), C.R.S., and are intended to be consistent with the requirements of the State Administrative Procedures Act, sections 24-4-101 *et seq*. (the "APA"), C.R.S., the Anna Jo Garcia Haynes Early Childhood Act, sections 26.5-1-101 *et seq*. (the "Early Childhood Act"), C.R.S., the Child Care Licensing Act, sections 26.5-5-301, *et seq*., C.R.S.; and the Child Care Development and Block Grant Act of 2014, 42 U.S.C. sec. 9858e, and section 26.5-4-110(3), C.R.S.

The specific rulemaking authorities granted for substitute placement agencies include sections XXX, C.R.S.

2.801 SCOPE AND PURPOSE

The Colorado Department of Early Childhood, Division of Early Learning, Licensing, and Administration is responsible for the administration of health and safety rules and requirements for licensed child care facilities. These rules and regulations shall govern the processes and procedures to become a licensed substitute placement agency in Colorado. These rules also address the operations of Substitute Placement Agencies that place a substitute child care provider into a licensed child care facility for the purpose of providing substitute child care. All substitute placement agencies must comply with the "General Rules for Child Care Facilities" in rule section 2.100; and these "Rules Regulating Substitute Placement Agencies," rule section 2.800.

2.802 APPLICABILITY

The provisions of these rules and regulations shall be applicable to licensed substitute placement agencies that place or that facilitates or arrange placement of short-term or long-term substitute child care providers in licensed child care facilities.

2.803~~7.730.1~~ DEFINITIONS

A~~B~~. "Arrange for placement" means to act as an intermediary by assisting a child care facility in the placement of a substitute child care provider.

B~~C~~. "Background checks" means a set of required records that are obtained and analyzed to determine whether the history of a prospective substitute child care employee meets legal and safety criteria when considering the placement of the individual in a less than twenty-four (24) hour child care facility.

C~~D~~. "Child care center" means a licensed child care center, preschool or licensed school age child care center.

D~~E~~. "Employee" means any individual who is employed by or contracted through the agency.

E~~F~~. "Emergency child care center substitute" means a substitute who works in place of a regular staff member in a child care facility who is unable to work their normally scheduled work hours due to an unexpected event such as an absence of a staff member or personal emergency event. The purpose of the emergency substitute is to provide coverage for a staff member for no more than three (3) calendar days.

F~~G~~. "Emergency family child care home substitute" means a substitute who works in place of a family child care home provider who is unable to work their normally scheduled work hours due to an unexpected event such as an illness or personal emergency event. The purpose of the emergency substitute is to provide coverage for a family child care home provider until parents are able to pick up the children in care.

G~~H~~. "Equally qualified" means that the employee or substitute provider has the same required training and qualifications as the primary provider as specified in the rules regulating family child care homes; rules regulating child care centers or rules regulating school age child care.

H~~I~~. "Family child care home" means a child care facility located within a residence of a primary provider.

~~I~~J. "Licensing" means the process by which the Colorado Department of Early Childhood~~department of human services~~ approves a facility or agency for the purpose of conducting business as a child care facility and/or substitute placement agency.

~~J~~K. "Long term child care center substitute" means a substitute who works in place of a regular staff member who is unable to work their normally scheduled work hours due to a planned or unplanned event that requires the regular staff member be on leave for more than two (2) calendar weeks.

~~K~~L. "Long term family child care home substitute" means a substitute who works in place of a regular family child care home provider who is unable to work their normally scheduled work hours due to a planned or unplanned event that requires the regular family child care home provider to be on leave for more than two (2) calendar weeks.

~~L~~A. "~~Adverse or n~~Negative licensing action" is defined in section 26.5-5-303(16)(a), C.R.S., also known as adverse action, means a final agency action resulting in the denial of an application, the imposition of fines, or the suspension or revocation of a license issued pursuant to the Child Care Licensing Act, or the demotion of such a license to a probationary license.

M. "Short term child care center substitute" means a substitute who works in place of a regular staff member who is unable to work their normally scheduled work hours due to a planned or unplanned event that requires the regular staff member be on leave for more than three (3) days and less than two (2) calendar weeks.

N. "Short term family child care home substitute" means a substitute who works in place of a regular family child care home who is unable to work their normally scheduled work hours due to a planned or unplanned event that requires the regular family child care home to be on leave for more than three (3) days and less than two (2) calendar weeks.

O. "Substitute child care provider," as defined in~~at~~ section 26.5-5-303(27)~~26-6-102(37)~~, C.R.S., means a person who provides temporary care for a child or children in a licensed child care facility, including a child care center and a family child care home~~an adult over the age of eighteen (18) years who provides temporary care for a child or children in a licensed child care facility, including a child care center, preschool, school age child center or a family child care home~~.

P. "Substitute placement agency," defined in~~at~~ section 26.5-5-303(28)~~26-6-102(37.5)~~, C.R.S., means any corporation, partnership, association, firm, agency, or institution that places or that facilitates or arranges placement of emergency, short-term or long-term substitute child care providers in licensed child care facilities providing less than twenty-four (24) ~~-~~hour care.

Q. "Substitute placement," means to coordinate, arrange, and approve the process of an adult substitute child care provider entering an unrelated family child care home or child care facility to provide substitute child care services on an emergency, temporary/short term or long-term assignment. Substitutes may be employees or contract employees of the agency.

2.804~~7.730.11~~ GOVERNING BODY

The governing body must be identified by its legal name. The names and addresses of individuals who hold primary financial control and officers of the governing body must be disclosed fully to the Colorado ~~department of human services~~Department of Early Childhood. The governing body is responsible for providing adequate financing, qualified personnel, services, and program functions for the safety and well-being of children in accordance with these rules. When changes of governing body occur, the new governing body must immediately submit an original application and pay the required fee before a new license can be issued.

A. A substitute placement agency, herein also referred to as the "the Agency" may not be operated without a license, as required by law, to be issued by the ~~state~~ Department in conformity with all rules and regulations.

B. The substitute placement agency must:

1. Maintain the written purpose and policies for the general operation and management of the agency, including the placement of substitutes. When such purpose and policies are reviewed and revised, the ~~state~~ Department must be advised of such changes. The purpose and policies at a minimum must include:

a. The types of child care facilities in which substitutes will be placed, including the ages of children served at the child care facility where substitutes will be placed and the geographic area(s) the agency expects to serve;

b. The responsibilities for child care facilities utilizing the substitute placement agency;

c. Itemized fee schedule, including client set up fees, if applicable;

d. Refund policy;

e. Cancellation policy;

f. Mileage/travel policy;

g. Minimum scheduled time policy;

h. Services and types of substitutes available to the community; and

i. The responsibilities of the agency and the child care facility for reporting suspected child abuse or neglect.

2. The substitute placement agency must obtain a fully executed and signed contract with the child care facility prior to placing substitutes in the child care facility.

3. The substitute placement agency must develop and implement personnel policies including, but not limited to:

a. Job descriptions for substitutes;

b. Qualifications for the position in accordance with current licensing standards;

c. The duties and responsibilities of substitutes;

d. The responsibilities of the substitute within a child care facility;

e. The proper supervision of children;

f. Proper guidance techniques;

g. Proper name to face attendance and transitions;

h. The identification and symptoms of suspected child abuse or neglect; and

i. The reporting of suspected child abuse, including the statewide child abuse reporting hotline.

4. Substitutes must be informed of their duties at the time of employment or acceptance of a contract with the agency, and before being placed in a child care facility.

5. Inform the Department, in writing, of:

a. A change in the executive director or the main contact of the agency within ten (10) calendar days.

b. The hours of operation the agency office is open and available for inspection of agency records.

6. Notify the Department, in writing, within twenty-four (24) hours, anytime a substitute is the subject of a child protection investigation that resulted while placed at a child care facility; a substitute was the staff member in charge of a classroom and a child received an injury requiring emergency medical treatment; a substitute is responsible for a safe sleep violation or a substitute has been terminated as a result of their~~his/her~~ actions while placed at a child care facility.

7. Document and report within twenty-four (24) hours, in writing, to the Colorado Department of Early Childhood~~department of human services~~ when the substitute from the agency is the staff member responsible for the child(ren~~,~~) in a child care facility and the child receives an injury resulting in medical care or treatment, any accident or illness occurring at a child care facility that resulted in medical care or treatment by a ~~physician or other~~ health care provider~~fessional~~, hospitalization, or death.

8. Carry public liability insurance. The applicant or licensee must submit the amount of the insurance and the name and the address of the insurance agency providing the insurance to the agency. Documentation of current liability insurance must be on file and available for review at all times at the agency.

9. Complete the licensing renewal requirements by:

a. Submitting the license continuation notice and fee prior to the annual due date of the continuation notice;

b. Paying the prescribed application or continuation fee pursuant to rule section 2.111 of the General Rules for Child Care Facilities~~7.701.4~~;

c. Cooperating with on-site monitoring inspections and investigations to assess the agency's compliance with the rules for substitute placement agencies.

~~7.730.2~~ PERSONNEL

2.805~~7.730.21~~ GENERAL REQUIREMENTS FOR ALL SUBSTITUTES

A. There must be a dated letter of agreement with each substitute which includes the specific job responsibilities/job description. The letter of agreement must be executed upon hire by both the agency and the substitute. Prior to being placed at a child care facility, substitutes must sign a statement indicating that they have read and understand the agency policies and procedures. All substitutes must be notified of changes to policies and procedures.

B. All substitutes must be eighteen (18) years or older and qualified for the position which they~~he/she~~ will be providing substitute care.

C. All substitutes must be registered in the professional development information system.~~;~~

D. All substitutes must have completed all the pre-service training courses listed ~~at~~ in rule section 2.806(A)(4)~~7.730.3d1-6j,~~ prior to being placed at a child care facility.~~;~~

E. All substitutes must complete the Department-approved playground safety training prior to working with children and annually.~~;~~

F. All substitutes must complete the Department-approved injury prevention training prior to working with children and annually.~~;~~

G. The personnel file of each substitute must contain clearance or arrest report from the Colorado Bureau of Investigation resulting from the staff member's criminal record check in accordance with rule section 2.117~~7.701.33~~ of the General Rules for Child Care Facilities.

H. The personnel file of each substitute must contain the results of the ~~state~~ Department's automated child abuse and neglect system. In accordance with rule section 2.116~~7.701.32~~ of the General Rules for Child Care Facilities.

I. Substitutes must be current for all immunizations routinely recommended for adults by their health care provider.

J. All staff must have at least one (1) hour of child development training within ninety (90) days of employment. This training must include the major domains (cognitive, social, emotional, physical development and approaches to learning). This training is required once, and will count toward ongoing training requirements if taken after the date of hire.

2.806~~7.730.22~~ PERSONNEL POLICIES, ORIENTATION AND STAFF DEVELOPMENT

A. A written statement of personnel policy shall be provided to each substitute or qualified applicant. This statement shall, at a minimum, contain the following information:

1. A job description which outlines the duties, responsibilities, qualifications; and educational requirements for the position.

2. A procedure for tracking the placement hours, including the name of the facility, the license number, facility address and ages of children where the substitute is placed.

3. Prior to working with children, each substitute must read and be instructed about the policies and procedures of the Agency, including those related to proper supervision of children, identification and symptoms of suspected child abuse or neglect, the reporting of suspected child abuse. Substitutes must sign a statement indicating that they have read and understand the Agency's policies and procedures.

4. A written pre-service training plan for each substitute. Each substitute must complete the following training before being placed in a child care facility:

a. Each substitute working with infants less than twelve (12) months old must complete a Department-approved safe sleep training prior to working with infants less than twelve (12) months old. This training must be renewed annually and may be counted towards ongoing training requirements.

b. Each substitute working with children less than three (3) years of age must complete a Department-approved prevention of shaken baby/abusive head trauma training prior to working with children less than three (3) years of age. This training must be renewed annually and counts towards ongoing training requirements.

c. Each substitute must complete a Department-approved standard precautions training that meets current occupational safety and health administration (OSHA) requirements prior to working with children. This training must be renewed annually and counts towards ongoing training requirements.

d. Prior to working with children and annually each substitute must be trained using Department-approved training about child abuse prevention, including common symptoms and signs of child abuse.

e. Prior to working with children and annually each substitute must be trained using a Department-approved training on how to report, where to report and when to report suspected or known child abuse or neglect.

f. The agency must ensure that each substitute is familiar with the licensing rules governing the specific child care license type in which the substitute will be placed within thirty (30) calendar days of employment at the substitute placement agency.

g. The Agency must ensure that each substitute is familiar with the rules and regulations governing the health and sanitation of child care facilities in the state of Colorado if placed in a facility that these rules apply within thirty (30) calendar days of employment at the substitute placement agency.

h. Each substitute must have current Department-approved First Aid and Cardiopulmonary Resuscitation (CPR) certification before working in a classroom alone.

i. Each substitute must complete a minimum of fifteen (15) clock hours of training each year beginning with the start date of the employee. At least three (3) clock hours per year must be in the focus of social emotional development.

j. Ongoing training and courses shall demonstrate a direct connection to one or more of the following competency areas:

1) Child growth and development, and learning or courses that align with the competency domains of child growth and development;

2) Child observation and assessment;

3) Family and community partnership;

4) Guidance;

5) Health, safety and nutrition;

6) Professional development and leadership;

7) Program planning and development; or~~,~~

8) Teaching practices

k. Each one (1) semester hour course with a direct connection to the competency area listed in rule section 2.806(A)(4)(j)~~7.702.33, L, 1-8~~, taken at a regionally accredited college or university shall count as fifteen (15) clock hours of ongoing training.

l. Training hours completed can only be counted during the year taken and cannot be carried over.

m. To be counted for ongoing training, the training certificate must have documentation that includes:

1) The title of the training;

2) The competency domain;

3) The date and clock hours of the training;

4) The name or signature, or other approved method of verifying the identity of trainer or entity;

5) Expiration of training if applicable; and

6) Connection to social emotional focus if applicable.

5. The substitute must have a complete file maintained at the substitute placement agency and have a portable file available for review at all times to both licensing and the child care facility where the substitute is providing substitute care. Documentation of qualifications for the position includes:

a. Certificate verifying all pre-service training, including name, phone number, and license number of agency;

b. Department issued director letter; or

c. Department issued early childhood teacher letter; or

d. Official college transcript and letters of experience; or

e. Credential 2.0 level 3 or higher; and

f. First aid and CPR certificates; and

g. Complete background check; and

h. Emergency contact name, address and phone number.

6. Substitutes must not consume or be under the influence of any substance that impairs their ability to care for children while caring for children.

7. Illegal drugs, drug paraphernalia, marijuana and marijuana infused products, and alcohol must never be present on the premises of the facility.

8. Substitutes must maintain the confidentiality of the children, families and the child care facility where the substitute is placed.

9. Substitutes are responsible for documenting experience hours with the specific ages of children cared for, while providing substitute child care for the purpose of employment verification with the agency.

10. Substitutes must not take personal photos of children, or make reference to any personal information of children, families or other child care facilities, including staff, on social media, email, text messages or other means of communication, written or verbal.

11. When caring for children, substitutes must refrain from personal use of electronics including, but not limited to, cell phones and portable electronic devices.

12. Substitutes must sign in and out of every facility each time they work at a child care facility.

2.807~~7.730.23~~ CHILD CARE CENTER SUBSTITUTE QUALIFICATIONS

~~A. Substitute for a child care center~~

A~~1~~. Must meet requirements found ~~at~~in rule sections 2.805 and 2.806 ~~7.730.21~~; and

B~~2~~. Must meet the current minimum education and experience requirements for the position in which the substitute is providing child care.

C~~B~~. Large child care center director: the educational requirements for the director or substitute director of a large center must be met by satisfactory completion of one of the following. Official college transcripts must be submitted to the Department for evaluation of qualifications.

   d. A staff member in a licensed child care center.

4~~3~~. Current certification as a Child Development Associate (CDA); ~~or,~~

5~~4~~. Completion prior to licensing of the ~~State~~ Department approved Expanding Quality Infant/Toddler course; and~~,~~

a. A minimum of two (2) years of experience as a licensed child care provider holding a permanent license in Colorado immediately before becoming a licensee of a large child care home; or~~,~~

b. A minimum of two (2) years of full-time experience in a licensed program. The group care shall have been with children who are under the age of six (6) years.

6~~5~~. Substitutes working in place as the Large Family Child Care Home Staff Aides must be at least sixteen (16) years of age and must work directly under the supervision of the primary provider or a substitute who is equally qualified as a Large Family Child Care Home provider. If left alone with children, the staff aide substitute or assistant provider substitute must meet all same age and training requirements as the provider.

2.809~~7.730.25~~ SCHOOL AGE CHILD CARE SUBSTITUTE QUALIFICATIONS

A. Substitute for school age child care:

1. Must meet requirements found ~~at~~in rule sections 2.805 and 2.806 ~~7.730.21~~;

B. Substitute program director

1. Must meet requirements ~~at~~of rule sections 2.805 and 2.806 ~~7.730.24 A 1 AND~~ 2;

2. The Program Director substitute must be at least twenty-one (21) years of age. The substitute program director must have demonstrated to the Agency, prior to placement at a school age child care center, maturity of judgment, administrative ability and the skill to appropriately supervise and direct school-age children in an unstructured setting.

3. The Substitute Program Director must have verifiable education or training in work with school-age children in such areas as Recreation, Education, Scouting or 4-H; and the program director must have completed at least one of the following qualifications:

a. A four (4) year college degree with a major such as Recreation, Outdoor Education, Education with a Specialty in Art, Elementary or Early Childhood Education, or a subject in the Human Service Field; ~~or;~~

b. Two years of college training and six (6) months (910 hours) of satisfactory and verifiable full-time or equivalent part-time, paid or volunteer, experience, since attaining the age of eighteen (18), in the care and supervision of four (4) or more children; or

c. Is qualified as a Large Child Care Center Director.~~; or~~

4. Three years (5,460 hours) of satisfactory and verifiable full-time or equivalent part-time, paid or volunteer, experience and one of the following qualifications:

a. Complete six semester hours, or nine quarter hours in course work from a regionally accredited college or university; ~~or~~

b. Forty (40) clock hours of training in course work applicable to school-age children and the Department-approved courses in Injury Prevention, and Playground Safety for School-Aged Child Care Centers within the first nine (9) months of employment; or~~.~~

c. Satisfactory experience includes experience in the care and supervision of four or more children from the ages of four (4)-eighteen (18) years old, unrelated to the individual, since attaining the age of eighteen (18).

C. Substitute program leaders for school age child care centers

1. Must meet requirements found ~~at~~in rule sections 2.805 and 2.806 ~~7.730.21~~;

2. Each Substitute Program Leader must be at least eighteen (18) years of age, demonstrate ability to work with children, and must meet the following qualifications:

a. Complete the Department-approved course in Injury Prevention;

b. Complete the Department-approved course in Playground Safety for School-Aged Child Care Centers. This requirement does not apply to day camps that do not regularly use a playground; and

c. Must have at least three (3) months (460 hours) of full-time or equivalent part-time satisfactory and verifiable experience with school-age children.

D. Substitute program aides for school age child care centers

1. Must meet requirements found in rule sections 2.805 and 2.806;

2~~1~~. Substitute Program Aides must be at least sixteen (16) years of age. Program Aides must work directly under the supervision of the Program Director or Program Leaders and must never be left alone with children.

3~~2~~. Substitute Program Aides can be counted as staff in determining child care staff ratios.

RECORDS

2.810~~7.730.26~~ STAFF RECORDS~~PERSONNEL FILES~~

A. The center office must maintain a record for each staff member that includes the following:

1. Documentation for any substitute employed by the agency to determine if the individual has ever been convicted of a disqualifying crime as found ~~at~~in rule section 2.117~~7.701.33~~ of the General Rules for Child Care Facilities. The personnel file of each substitute of the center must contain clearance or arrest report from the Colorado Bureau of Investigation;

2. Documentation for any substitute employed by the Agency to determine if the individual has a confirmed report for child abuse or neglect reported to the ~~State~~ Department~~''~~s Automated System as found ~~at~~in rule section 2.116~~7.701.32~~ of the General Rules for Child Care Facilities. The personnel file of each substitute must contain the results of the ~~State~~ Department's Automated System.

3. Substitutes must be current for all immunizations routinely recommended for adults by their health care provider.

4. Prior to being placed in a child care facility, substitutes must submit to the Agency a medical statement, signed and dated by a licensed ~~Physician or other Health Care Professional~~medical health care provider, verifying that they are in good mental, physical, and emotional health appropriate for the position for which they have been hired. This statement must be dated no more than six (6) months prior to employment or within thirty

(30) calendar days after the date of employment. This statement must indicate when subsequent medical statements are required. Subsequent medical statements must be submitted as required in writing by a ~~Physician or other~~ medical health care pro~~fessional~~vider.

5. If, in the opinion of a Physician or Mental Health Professional~~Practitioner~~, an employee~~'~~s examination or test results indicate a physical, emotional, or mental condition that could be hazardous to a child, other staff, or self, or that would prevent satisfactory performance of duties must not be assigned or returned to a position until the condition is cleared to the satisfaction of the examining ~~Physician or other Health Care Professional~~medical health care provider.

6. Name, address, phone number and birthdate of the individual;

7. Verification of education, work experience, employment, training, and completion of first aid and Cardiopulmonary Resuscitation (CPR) courses;

8. Date of employment;

9. Record of placements including dates, number of hours worked, name, address and license number of the child care facility where the substitute was placed.

10. Names, addresses, and telephone numbers of persons to be notified in the event of an emergency.

11. Substitute records must be available, upon request, to authorized personnel of the ~~State~~ Department or Department representatives.

12. The records of the substitute must be maintained by the substitute placement agency for at least three (3) years. The current files must be maintained at the Agency, the previous two (2) years may be stored at either the Agency or a central location. If requested, the records must be provided to the Department or Department representative.

B. The personnel file for each substitute must contain all required information before the substitute can be placed at a child care facility.

~~**7.730.4 ADMINISTRATIVE**~~

2.811~~7.730.41~~ ADMINISTRATIVE RECORDS AND REPORTS

A. The following records must be on file at the Agency:

1. A list of current substitutes, and substitute placements;

2. Reports from contracted child care facilities where any incident reports occur;~~.~~

3. Contracts with both substitutes and child care facilities; and~~.~~

4. Within thirty (30) calendar days of the last day of employment, staff members must be provided a letter verifying their experience at the Agency. The letter must contain the Agency's address, phone number and license number, the employee's start and end date and the total number of hours worked with children. Hours worked with infants and toddlers must be documented separately from hours worked with other age groups. The letter must be signed by a director, owner or human resources agent of the Agency.

~~7.730.3~~ HEALTH AND SAFETY

2.812~~7.730.31~~ CONTROL OF COMMUNICABLE ILLNESSES

A. When a substitute has worked in a child care facility where there has been an increase in or outbreak of communicable illness among staff, or children the substitute must immediately notify the Agency. Individuals' confidentiality must be maintained.

B. The substitute placement agency must have a written agreement with the child care facility which requires the child care facility to:

a. Notify the Agency of an increase of illness or outbreak at the time the placement will occur.

b. Notify the Agency of any substitute exposed to a communicable illness at a child care facility, and, the Agency must be notified within twenty-four (24) hours.

C. When the substitute placement agency has been notified that a substitute has been in a placement where the individual has been exposed to a communicable illness, the Agency and the substitute must consult with and comply with all Health Department requirements before being placed at another facility.

HISTORY

Editor's Notes

Rules in 8 CCR 1402-1 were re-adopted from 12 CCR 2509-8.

New Rules 2.100-2.131, eff. 12/30/2023.

New Rules 2.200-2.242, eff. 12/30/2023.

New Rules 2.400-2.424, eff. 12/30/2023.

New Rules 2.500-2.527, eff. 12/30/2023.

New Rules 2.600-2.617, eff. 12/30/2023.

New Rules 2.800-2.812, eff. 12/30/2023.

COLORADO
Department of Early Childhood

Rule Author/Division Director: Amanda Schoniger - CDEC Carin Rosa	Email(s):Amanda.Schoniger@state.co.us Carin.Rosa@state.co.us
Program/Division: DELLA / General	CDEC Tracking No.: 2023-05-005
CCR Number(s): 8 CCR 1402-1 (CDHS: 12 CCR 2509-8)	SOS Tracking No.:

RULEMAKING PACKET

Reason and Justification of the proposed rule or amendment(s):	Multiple/Other If there are "Multiple/Other" reasons, please explain: This rule package includes renumbering of rules moving from the Colorado Department of Human Services (CDHS) rules to new Colorado Department of Early Childhood (CDEC) rules.
Provide a description of the proposed rule or amendment(s) that is clearly and simply stated, and what CDEC intends to accomplish:	The Department is statutorily required to review rules on a regular basis and is authorized to promulgate rules for child care programs providing less than twenty-four (24) hour care that create standards and regulation for these child care programs.
Statutory Authority: (Include Federal Authority, if applicable)	Sections 24-4-101, 26.5-1-101, 26.5-1-105(1), and 26.5-5-301, C.R.S.
Does the proposed rule or amendment(s) impact other State Agencies or Tribal Communities?	☐ Yes ☑ No If Yes, identify the State Agency and/or Tribal Community and describe collaboration efforts:
Does the proposed rule or amendment(s) have impacts or create mandates on counties or other governmental entities? (e.g., budgetary requirements or administrative burdens)	☐ Yes ☑ No If Yes, provide description:
Effective Date(s) of proposed rule or amendment(s): (Emergency/Permanent)	☐ Mandatory ☑ Discretionary

	(E) Effective Date: (P) Effective Date: 10/15/2023 (E) Termination Date:
Is the proposed rule or amendment(s) included on the Regulatory Agenda?	☑ Yes ☐ No If no, please explain:
Does the proposed rule or amendment(s) conflict, or are there inconsistencies with other provisions of law?	☐ Yes ☑ No If Yes, please explain:
Does the proposed rule or amendment(s) create duplication or overlapping of other rules or regulations?	☐ Yes ☑ No If Yes, explain why:
Does the proposed rule or amendment(s) include material that is incorporated by reference[1]?	☐ Yes ☑ No If Yes, provide source:
Does the proposed rule or amendment(s) align with the department's rulemaking objectives? Choose all that apply.	

☐	Reduce the administrative burden on families and providers accessing, implementing, or providing programs and/or services.
☐	Decrease duplication and conflicts with implementing programs and providing services.
☐	Increase equity in access and outcomes to programs and services for children and families.
☑	Increase administrative efficiencies among programs and services provided by the department.
☑	Ensure that rules are coordinated across programs and services so that programs are implemented and services are provided with improved ease of access, quality of family/provider experience, and ease of implementation by state, local, and tribal agencies.

[1] Incorporation by Reference is all or any part of a code, standard, guideline, or rule that has been adopted by an agency of the United States, this state, or another state, or adopted or published by a nationally recognized organization or association, pursuant to section 24-4-103(12.5), C.R.S.

Rulemaking Proceedings

Type of Rulemaking: Emergency or Permanent[2] [Permanent Tier I or Tier II]	Permanent Tier II
Stakeholder Engagement and Data/Research: Examples: Webinar recordings/transcripts, written stakeholder comments, material from small/large focus groups, written petitions/requests, surveys, data, research, reports, published papers, and documents used to develop the proposed rule or amendment(s).	List of activities and dates: The Department sent an email to all stakeholders with a link requesting written comments on these proposed rules. The request period for public feedback was also posted on our "Public Notices" webpage for seven (7) days, between June 29, 2023, through July 6, 2023. The program responded to all comments received, and incorporated feedback into the proposed rules, where possible. Link to the Public Folder for the DELLA General Licensing rules that contains the proposed rules and written comments.
Assistant Attorney General Review:	07/14/2023 - 08/24/2023
RAC County Subcommittee Review Date (if required):	09/7/2023
Rules Advisory Council (RAC) Review Date:	09/14/2023
Public Rulemaking Hearing Date(s): [Discussion/Adoption]	09/25/2023

Regulatory and Cost Benefit Analysis

1. **Community Impact:** Provide a description of the stakeholders that will be affected by the proposed rule or amendment(s), and identify which stakeholders will bear the costs, and those who will benefit. How will the proposed rule or amendment(s) impact particular populations, such as those experiencing poverty, immigrant/refugee communities, non-English speakers, and rural communities?

   Licensed Family Child Care Homes, Child Care Facilities, School Age Child Care, Substitute Placement Agencies, Neighborhood Youth Organizations, and Children's Resident Camps are governed by these rules. These programs bear the cost and benefit from these rules. These rules were previously

[2] Tier I is used for proposed rule or amendment(s) that have substantive changes, require substantial stakeholder engagement, and will be considered at two Public Rulemaking Hearings (PRH). The first PRH is held for discussion, and the second PRH is held to consider adoption. Tier II is used for proposed rule or amendment(s) that include technical changes, do not require substantial stakeholder engagement, and will be considered at only one Public Rulemaking Hearing (PRH) for adoption.

promulgated through the State Board of Human Services, and licensed child care facilities are currently regulated by these rules.

With the creation of the Department of Early Childhood, The Division of Early Learning Licensing and Administration (DELLA) is required to move child care licensing rules from the Colorado Department of Human Service to the new Department of Early Childhood. These rule revisions update rule numbering and statutory references, and are required to transfer the rules to the new Department.

The Department will translate the adopted rules and regulations into Spanish. The Administrative Guides and resource documents that assist with compliance of these rules will also be translated into Spanish.

2. **Quality and Quantity:** Provide a description of the probable quantitative and qualitative impact on persons affected by the proposed rule or amendment(s), and comparison of the probable costs and benefits of implementation versus inaction. What are the short- and long-term consequences of the proposed rule or amendment(s).

   There are no qualitative or quantitative changes that would result from implementation of these proposed rules. These rule revisions are technical in nature, and are required to transfer the rules to the new Department.

3. **Potential Economic Benefits/Disadvantages:** What are the anticipated economic benefits of the proposed rule or amendment(s), such as: economic growth, creation of new jobs, and/or increased economic competitiveness? Are there any adverse effects on the economy, consumers, private markets, small businesses, job creation, and economic competitiveness?

   There are no economic benefits or disadvantages to implementation of these proposed rules. These rule revisions are technical in nature, and are required to transfer the rules to the new Department.

4. **Fiscal Impacts:** What are the anticipated direct and indirect costs for the state/department to implement, administer, and enforce the proposed rule or amendment(s)? What are the direct and indirect costs to each of the following entities to comply with the proposed rule or amendment(s)? For each, describe the impact or indicate “not applicable.”

Department	Not applicable. There are no costs to the Department for implementing these rules.
Local Governments/ Counties	Not applicable. There is nothing in this rule revision that creates additional costs for county departments.
Providers	Not applicable. There are no additional costs for providers to transfer these rules to the new Department.
Community Partners (e.g., School Districts, Early Childhood Councils, etc.)	Not applicable. There are no additional costs for community partners to transfer these rules to the new Department.

Other State Agencies	Not applicable. There are no associated costs for other state agencies.
Tribal Communities	Not applicable. There are no associated costs for Tribal Communities.

5. **Evaluation:** How will implementation of the proposed rule or amendment(s) be monitored and evaluated? Please include information about measures and indicators that CDEC will utilize, including information on specific populations (identified above).

These rules were previously promulgated by the State Board of Human Services and licensed child care facilities are currently regulated by these rules. The Department will continue to annually monitor programs for compliance with these regulations.

6. **Comparative Analysis:** Provide at least two alternatives to the proposed rule or amendment(s) that can be identified, including the costs and benefits of pursuing each of the alternatives.

a. The Department considered leaving the rules as already promulgated, but is required to transfer/readopted these rules from the Colorado Department of Human Services to the Department of Early Childhood.

b. The Department considered seeking legislative changes to reflect some of the requirements in this proposed rule, but later determined the Executive Director's rulemaking authority supports the recommended changes. In addition it is required that the Department move these rules to the Department of Early Childhood.

7. **Comparative Analysis:** Are there less costly or less intrusive methods for achieving the purpose of the proposed rule or amendment(s)? Explain why those options were rejected.

No, with the creation of the Department of Early Childhood, DELLA is required to move child care licensing rules from the Colorado Department of Human Service rules to the new Department of Early Childhood rules. These rule revisions make updates to the rule numbering and statutory references, which are technical in nature.

Rules Advisory Council (RAC) Review Date:	9/14/2023
Public Rulemaking Hearing Date(s): [Discussion/Adoption]	9/29/2023

Regulatory and Cost Benefit Analysis

1. **Community Impact: Provide a description of the stakeholders that will be affected by the proposed rule or amendment(s), and identify which stakeholders will bear the costs, and those who will benefit. How will the proposed rule or amendment(s) impact particular populations, such as those experiencing poverty, immigrant/refugee communities, non-English speakers, and rural communities?**

   Child Care Facilities bear the cost and benefit from these rules. These rules were previously promulgated through the State Board of Human Services and licensed Substitute Placement Agencies are currently required to follow these rules.

   With the creation of the Department of Early Childhood, The Division of Early Learning Licensing and Administration (DELLA) is required to move child care licensing rules from the Colorado Department of Human Service rules to the new Department of Early Childhood rules. These rule revisions incorporate Department of Early Childhood rule numbering, and make technical corrections only.

   The Department will translate the final version of the rules and regulations into Spanish. The Administrative Guides and resource documents that assist with compliance with these rules will also be translated into Spanish.

2. **Quality and Quantity: Provide a description of the probable quantitative and qualitative impact on persons affected by the proposed rule or amendment(s), and comparison of the probable costs and benefits of implementation versus inaction. What are the short- and long-term consequences of the proposed rule or amendment(s).**

   These rule revisions incorporate Department of Early Childhood rule numbering, align with state and federal statute changes, and make technical corrections only. These changes must be incorporated to renumber rules consistent with the move to the Department of Early Childhood and comply with state and federal statute.

3. **Potential Economic Benefits/Disadvantages: What are the anticipated economic benefits of the proposed rule or amendment(s), such as: economic growth, creation of new jobs, and/or increased economic competitiveness? Are there any adverse effects on the economy, consumers, private markets, small businesses, job creation, and economic competitiveness?**

   There are no economic benefits or disadvantages to implementation of these proposed rules. These rule revisions are technical in nature, and are required to transfer the rules to the new Department, and comply with state and federal statute.

4. **Fiscal Impacts:** What are the anticipated direct and indirect costs for the state/department to implement, administer, and enforce the proposed rule or amendment(s)? What are the direct and indirect costs to each of the following entities to comply with the proposed rule or amendment(s)? For each, describe the impact or indicate "not applicable."

Department	Not applicable. There are no costs to the Department for implementing these rules.

Local Governments/ Counties	Not applicable. There is nothing in this rule revision that creates additional costs for county departments.
Providers	Licensed child care centers are governed by these rules and will both benefit from and bear the burden of these rules. There will be minimal cost to child care providers as the additions to the package are training requirements in compliance with State and Federal Statutes. Training is available for free online in the Professional Development Information System. Programs will only bear the cost of paying individuals for time to complete training if the individuals do not meet the requirement by having previously completed training. Licensed child care centers and child care professionals will benefit from the expanded qualification options proposed in this rule package.
Community Partners (e.g., School Districts, Early Childhood Councils, etc.)	Not applicable. There are no additional costs for community partners to transfer these rules to the new Department.
Other State Agencies	Not applicable. There are no associated costs for other state agencies.
Tribal Communities	Not applicable. There are no associated costs for Tribal Communities.

5. <u>Evaluation</u>: How will implementation of the proposed rule or amendment(s) be monitored and evaluated? Please include information about measures and indicators that CDEC will utilize, including information on specific populations (identified above).

These rules were previously promulgated through the State Board of Human Services and licensed child care centers are currently required to follow these rules. The Department will continue to annually monitor programs for compliance with these regulations.

6. <u>Comparative Analysis</u>: Provide at least two alternatives to the proposed rule or amendment(s) that can be identified, including the costs and benefits of pursuing each of the alternatives.

a. The Department considered leaving the rules as already promulgated, but is required to transfer/readopted these rules from the Colorado Department of Human Services to the Department of Early Childhood.

b. The Department considered seeking legislative changes to reflect some of the requirements in this proposed rule, but later determined the Executive Director's rulemaking authority supports the recommended changes. In addition it is required that the Department move these rules to the Department of Early Childhood.

7. <u>Comparative Analysis</u>: Are there less costly or less intrusive methods for achieving the purpose of the proposed rule or amendment(s)? Explain why those options were rejected.

No, with the creation of the Department of Early Childhood, DELLA is required to move child care licensing rules from the Colorado Department of Human Service rules to the new Department of Early Childhood rules. These rule revisions make updates to the rule numbering and statutory references, which are technical in nature.

Regulatory and Cost Benefit Analysis

1. **Community Impact:** Provide a description of the stakeholders that will be affected by the proposed rule or amendment(s), and identify which stakeholders will bear the costs, and those who will benefit. How will the proposed rule or amendment(s) impact particular populations, such as those experiencing poverty, immigrant/refugee communities, non-English speakers, and rural communities?

[2] Tier I is used for proposed rule or amendment(s) that have substantive changes, require substantial stakeholder engagement, and will be considered at two Public Rulemaking Hearings (PRH). The first PRH is held for discussion, and the second PRH is held to consider adoption. Tier II is used for proposed rule or amendment(s) that include technical changes, do not require substantial stakeholder engagement, and will be considered at only one Public Rulemaking Hearing (PRH) for adoption.

These rules were previously promulgated through the State Board of Human Services and licensed Children's Resident Camps are currently required to follow these rules.

With the creation of the Department of Early Childhood, The Division of Early Learning Licensing and Administration (DELLA) is required to move child care licensing rules from the Colorado Department of Human Service rules to the new Department of Early Childhood rules. These rule revisions incorporate Department of Early Childhood rule numbering, and make technical corrections only.

The Department will translate the final version of the rules and regulations into Spanish. The Administrative Guides and resource documents that assist with compliance with these rules will also be translated into Spanish.

2. **Quality and Quantity:** Provide a description of the probable quantitative and qualitative impact on persons affected by the proposed rule or amendment(s), and comparison of the probable costs and benefits of implementation versus inaction. What are the short- and long-term consequences of the proposed rule or amendment(s).

There are no qualitative or quantitative changes that would result from implementation of these proposed rules. These rule revisions are technical in nature, and are required to transfer the rules to the new Department.

3. **Potential Economic Benefits/Disadvantages:** What are the anticipated economic benefits of the proposed rule or amendment(s), such as: economic growth, creation of new jobs, and/or increased economic competitiveness? Are there any adverse effects on the economy, consumers, private markets, small businesses, job creation, and economic competitiveness?

There are no economic benefits or disadvantages to implementation of these proposed rules. These rule revisions are technical in nature, and are required to transfer the rules to the new Department.

4. **Fiscal Impacts:** What are the anticipated direct and indirect costs for the state/department to implement, administer, and enforce the proposed rule or amendment(s)? What are the direct and indirect costs to each of the following entities to comply with the proposed rule or amendment(s)? For each, describe the impact or indicate "not applicable."

Department	Not applicable. There are no costs to the Department for implementing these rules.
Local Governments/ Counties	Not applicable. There is nothing in this rule revision that creates additional costs for county departments.
Providers	Not applicable. There are no additional costs for providers to transfer these rules to the new Department.
Community Partners	

(e.g., School Districts, Early Childhood Councils, etc.)	Not applicable. There are no additional costs for community partners to transfer these rules to the new Department.
Other State Agencies	Not applicable. There are no associated costs for other state agencies.
Tribal Communities	Not applicable. There are no associated costs for Tribal Communities.

5. **Evaluation:** How will implementation of the proposed rule or amendment(s) be monitored and evaluated? Please include information about measures and indicators that CDEC will utilize, including information on specific populations (identified above).

These rules were previously promulgated through the State Board of Human Services and licensed facilities are currently required to follow these rules. The Department will continue to annually monitor programs for compliance with these regulations.

6. **Comparative Analysis:** Provide at least two alternatives to the proposed rule or amendment(s) that can be identified, including the costs and benefits of pursuing each of the alternatives.

a. The Department considered leaving the rules as already promulgated, but is required to transfer/readopted these rules from the Colorado Department of Human Services to the Department of Early Childhood.

b. The Department considered seeking legislative changes to reflect some of the requirements in this proposed rule, but later determined the Executive Director's rulemaking authority supports the recommended changes. In addition it is required that the Department move these rules to the Department of Early Childhood.

7. **Comparative Analysis:** Are there less costly or less intrusive methods for achieving the purpose of the proposed rule or amendment(s)? Explain why those options were rejected.

No, with the creation of the Department of Early Childhood, DELLA is required to move child care licensing rules from the Colorado Department of Human Service rules to the new Department of Early Childhood rules. These rule revisions make updates to the rule numbering and statutory references, which are technical in nature.

[1] Incorporation by Reference is all or any part of a code, standard, guideline, or rule that has been adopted by an agency of the United States, this state, or another state, or adopted or published by a nationally recognized organization or association, pursuant to section 24-4-103(12.5), C.R.S.

	☑ Ensure that rules are coordinated across programs and services so that programs are implemented and services are provided with improved ease of access, quality of family/provider experience, and ease of implementation by state, local, and tribal agencies.

Rulemaking Proceedings

Type of Rulemaking: Emergency or Permanent[2] [Permanent Tier I or Tier II]	Permanent Tier II
Stakeholder Engagement and Data/Research: Examples: Webinar recordings/transcripts, written stakeholder comments, material from small/large focus groups, written petitions/requests, surveys, data, research, reports, published papers, and documents used to develop the proposed rule or amendment(s).	List of activities and dates: The Department sent an email to all stakeholders with a link requesting written comments on these proposed rules. The request period for public feedback was also posted on our "Public Notices" webpage for seven (7) days, between June 29, 2023, through July 6, 2023. The program responded to all comments received, and incorporated feedback into the proposed rules, where possible. Link to the Public Folder for the DELLA School Aged Program Rules rules that contains the proposed rules and written comments.
Assistant Attorney General Review:	7/21/2023 - 9/6/2023
RAC County Subcommittee Review Date (if required):	Not Applicable
Rules Advisory Council (RAC) Review Date:	9/14/2023
Public Rulemaking Hearing Date(s): [Discussion/Adoption]	

Regulatory and Cost Benefit Analysis

[2] Tier I is used for proposed rule or amendment(s) that have substantive changes, require substantial stakeholder engagement, and will be considered at two Public Rulemaking Hearings (PRH). The first PRH is held for discussion, and the second PRH is held to consider adoption. Tier II is used for proposed rule or amendment(s) that include technical changes, do not require substantial stakeholder engagement, and will be considered at only one Public Rulemaking Hearing (PRH) for adoption.

1. **<u>Community Impact</u>: Provide a description of the stakeholders that will be affected by the proposed rule or amendment(s), and identify which stakeholders will bear the costs, and those who will benefit. How will the proposed rule or amendment(s) impact particular populations, such as those experiencing poverty, immigrant/refugee communities, non-English speakers, and rural communities?**

Licensed School Age Child Care bears the cost and benefit from these rules. These rules were previously promulgated through the State Board of Human Services, and licensed School Aged Programs are currently required to follow these rules.

With the creation of the Department of Early Childhood, The Division of Early Learning Licensing and Administration (DELLA) is required to move child care licensing rules from the Colorado Department of Human Service rules to the new Department of Early Childhood rules. These rule revisions incorporate Department of Early Childhood rule numbering, and make technical corrections only.

The Department will translate the final version of the rules and regulations into Spanish. The Administrative Guides and resource documents that assist with compliance with these rules will also be translated into Spanish.

2. **<u>Quality and Quantity</u>: Provide a description of the probable quantitative and qualitative impact on persons affected by the proposed rule or amendment(s), and comparison of the probable costs and benefits of implementation versus inaction. What are the short- and long-term consequences of the proposed rule or amendment(s).**

There are no qualitative or quantitative changes that would result from implementation of these proposed rules. These rule revisions are technical in nature, and are required to transfer the rules to the new Department.

3. **<u>Potential Economic Benefits/Disadvantages</u>: What are the anticipated economic benefits of the proposed rule or amendment(s), such as: economic growth, creation of new jobs, and/or increased economic competitiveness? Are there any adverse effects on the economy, consumers, private markets, small businesses, job creation, and economic competitiveness?**

There are no economic benefits or disadvantages to implementation of these proposed rules. These rule revisions are technical in nature, and are required to transfer the rules to the new Department.

4. **<u>Fiscal Impacts</u>: What are the anticipated direct and indirect costs for the state/department to implement, administer, and enforce the proposed rule or amendment(s)? What are the direct and indirect costs to each of the following entities to comply with the proposed rule or amendment(s)? For each, describe the impact or indicate "not applicable."**

Department	Not applicable. There are no costs to the Department for implementing these rules.
Local Governments/ Counties	Not applicable. There is nothing in this rule revision that creates additional costs for county departments.
Providers	Licensed school age child care centers are governed by these rules and will both benefit from and bear the burden of these rules. There will be minimal cost to child care providers as the additions to the package are training requirements in compliance with State and Federal Statutes.

	Training is available for free online in the Professional Development Information System. Programs will only bear the cost of paying individuals for time to complete training if the individuals do not meet the requirement by having previously completed training. Licensed child care centers and child care professionals will benefit from the expanded qualification options proposed in this rule package.
Community Partners (e.g., School Districts, Early Childhood Councils, etc.)	Not applicable. There are no additional costs for community partners to transfer these rules to the new Department.
Other State Agencies	Not applicable. There are no associated costs for other state agencies.
Tribal Communities	Not applicable. There are no associated costs for Tribal Communities.

5. Evaluation: How will implementation of the proposed rule or amendment(s) be monitored and evaluated? Please include information about measures and indicators that CDEC will utilize, including information on specific populations (identified above).

These rules were previously promulgated through the State Board of Human Services and licensed facilities are currently required to follow these rules. The Department will continue to annually monitor programs for compliance with these regulations.

6. Comparative Analysis: Provide at least two alternatives to the proposed rule or amendment(s) that can be identified, including the costs and benefits of pursuing each of the alternatives.

a. The Department considered leaving the rules as already promulgated, but is required to transfer/readopted these rules from the Colorado Department of Human Services to the Department of Early Childhood.

b. The Department considered seeking legislative changes to reflect some of the requirements in this proposed rule, but later determined the Executive Director's rulemaking authority supports the recommended changes. In addition it is required that the Department move these rules to the Department of Early Childhood.

7. Comparative Analysis: Are there less costly or less intrusive methods for achieving the purpose of the proposed rule or amendment(s)? Explain why those options were rejected.

No, with the creation of the Department of Early Childhood, DELLA is required to move child care licensing rules from the Colorado Department of Human Service rules to the new Department of Early Childhood rules. These rule revisions make updates to the rule numbering and statutory references, which are technical in nature.

RULEMAKING PACKET

Reason and Justification of the proposed rule or amendment(s):	Multiple/Other If there are "Multiple/Other" reasons, please explain: This rule package includes renumbering of rules moving from the Colorado Department of Human Services (CDHS) rules to new Colorado Department of Early Childhood (CDEC) rules.
Provide a description of the proposed rule or amendment(s) that is clearly and simply stated, and what CDEC intends to accomplish:	The Department is statutorily required to review rules on a regular basis and is authorized to promulgate rules for child care programs providing less than twenty-four (24) hour care that create standards and regulation for these child care programs.
Statutory Authority: (Include Federal Authority, if applicable)	Sections 24-4-101, 26.5-1-101, 26.5-1-105(1), and 26.5-5-301, C.R.S.
Does the proposed rule or amendment(s) impact other State Agencies or Tribal Communities?	☐ Yes ☑ No If Yes, identify the State Agency and/or Tribal Community and describe collaboration efforts:
Does the proposed rule or amendment(s) have impacts or create mandates on counties or other governmental entities? (e.g., budgetary requirements or administrative burdens)	☐ Yes ☑ No If Yes, provide description:
Effective Date(s) of proposed rule or amendment(s):	☐ Mandatory ☑ Discretionary

(Emergency/Permanent)	(E) Effective Date: N/A (P) Effective Date: 10/15/2023 (E) Termination Date: N/A
Is the proposed rule or amendment(s) included on the Regulatory Agenda?	☐ Yes ☑ No If no, please explain:
Does the proposed rule or amendment(s) conflict, or are there inconsistencies with other provisions of law?	☐ Yes ☑ No If Yes, please explain:
Does the proposed rule or amendment(s) create duplication or overlapping of other rules or regulations?	☐ Yes ☑ No If Yes, explain why:
Does the proposed rule or amendment(s) include material that is incorporated by reference[1]?	☐ Yes ☑ No If Yes, provide source:
Does the proposed rule or amendment(s) align with the department's rulemaking objectives? Choose all that apply.	

☐	Reduce the administrative burden on families and providers accessing, implementing, or providing programs and/or services.
☐	Decrease duplication and conflicts with implementing programs and providing services.
☐	Increase equity in access and outcomes to programs and services for children and families.
☑	Increase administrative efficiencies among programs and services provided by the department.
☑	Ensure that rules are coordinated across programs and services so that programs are implemented and services are provided with improved ease of access, quality of family/provider experience, and ease of implementation by state, local, and tribal agencies.

[1] Incorporation by Reference is all or any part of a code, standard, guideline, or rule that has been adopted by an agency of the United States, this state, or another state, or adopted or published by a nationally recognized organization or association, pursuant to section 24-4-103(12.5), C.R.S.

Regulatory and Cost Benefit Analysis

1. **Community Impact: Provide a description of the stakeholders that will be affected by the proposed rule or amendment(s), and identify which stakeholders will bear the costs, and those who will benefit. How will the proposed rule or amendment(s) impact particular populations,**

[2] Tier I is used for proposed rule or amendment(s) that have substantive changes, require substantial stakeholder engagement, and will be considered at two Public Rulemaking Hearings (PRH). The first PRH is held for discussion, and the second PRH is held to consider adoption. Tier II is used for proposed rule or amendment(s) that include technical changes, do not require substantial stakeholder engagement, and will be considered at only one Public Rulemaking Hearing (PRH) for adoption.

such as those experiencing poverty, immigrant/refugee communities, non-English speakers, and rural communities?

Licensed Substitute Placement Agencies bear the cost and benefit from these rules. These rules were previously promulgated through the State Board of Human Services and licensed Substitute Placement Agencies are currently required to follow these rules.

With the creation of the Department of Early Childhood, The Division of Early Learning Licensing and Administration (DELLA) is required to move child care licensing rules from the Colorado Department of Human Service rules to the new Department of Early Childhood rules. These rule revisions incorporate Department of Early Childhood rule numbering, and make technical corrections only.

The Department will translate the final version of the rules and regulations into Spanish. The Administrative Guides and resource documents that assist with compliance with these rules will also be translated into Spanish.

2. Quality and Quantity: **Provide a description of the probable quantitative and qualitative impact on persons affected by the proposed rule or amendment(s), and comparison of the probable costs and benefits of implementation versus inaction. What are the short- and long-term consequences of the proposed rule or amendment(s).**

These rule revisions incorporate Department of Early Childhood rule numbering, align with state and federal statute changes, and make technical corrections only. These changes must be incorporated to renumber rules consistent with the move to the Department of Early Childhood and comply with state and federal statute.

3. **Potential Economic Benefits/Disadvantages:** What are the anticipated economic benefits of the proposed rule or amendment(s), such as: economic growth, creation of new jobs, and/or increased economic competitiveness? Are there any adverse effects on the economy, consumers, private markets, small businesses, job creation, and economic competitiveness?

There are no economic benefits or disadvantages to implementation of these proposed rules. These rule revisions are technical in nature, and are required to transfer the rules to the new Department, and comply with state and federal statute.

4. **Fiscal Impacts:** What are the anticipated direct and indirect costs for the state/department to implement, administer, and enforce the proposed rule or amendment(s)? What are the direct and indirect costs to each of the following entities to comply with the proposed rule or amendment(s)? For each, describe the impact or indicate "not applicable."

Department	Not applicable. There are no costs to the Department for implementing these rules.
Local Governments/ Counties	Not applicable. There is nothing in this rule revision that creates additional costs for county departments.
Providers	Licensed Substitute Placement Agencies are governed by these rules and will both benefit from and bear the burden of these rules. There will be minimal cost to child care providers as the additions to the package are training requirements in compliance with State and Federal Statutes. Training is available for free online in the Professional Development Information System. Programs will only bear the cost of paying individuals

	for time to complete training if the individuals do not meet the requirement by having previously completed training. Licensed child care centers and child care professionals will benefit from the expanded qualification options proposed in this rule package.
Community Partners (e.g., School Districts, Early Childhood Councils, etc.)	Not applicable. There are no additional costs for community partners to transfer these rules to the new Department.
Other State Agencies	Not applicable. There are no associated costs for other state agencies.
Tribal Communities	Not applicable. There are no associated costs for Tribal Communities.

5. Evaluation: **How will implementation of the proposed rule or amendment(s) be monitored and evaluated? Please include information about measures and indicators that CDEC will utilize, including information on specific populations (identified above).**

These rules were previously promulgated through the State Board of Human Services and licensed facilities are currently required to follow these rules. The Department will continue to annually monitor programs for compliance with these regulations.

6. **Comparative Analysis:** Provide at least two alternatives to the proposed rule or amendment(s) that can be identified, including the costs and benefits of pursuing each of the alternatives.

   a. The Department considered leaving the rules as already promulgated, but is required to transfer/readopted these rules from the Colorado Department of Human Services to the Department of Early Childhood.

   b. The Department considered seeking legislative changes to reflect some of the requirements in this proposed rule, but later determined the Executive Director's rulemaking authority supports the recommended changes. In addition it is required that the Department move these rules to the Department of Early Childhood.

7. Comparative Analysis: **Are there less costly or less intrusive methods for achieving the purpose of the proposed rule or amendment(s)? Explain why those options were rejected.**

No, with the creation of the Department of Early Childhood, DELLA is required to move child care licensing rules from the Colorado Department of Human Service rules to the new Department of Early Childhood rules. These rule revisions make updates to the rule numbering and statutory references, which are technical in nature.

Colorado Child Care Assistance Program

COLORADO CHILD CARE ASSISTANCE PROGRAM RULES AND REGULATIONS

8 CCR 1403-1

[Editor's Notes follow the text of the rules at the end of this CCR Document.]

3.100 ~~COLORADO CHILD CARE ASSISTANCE PROGRAM (CCCAP)~~AUTHORITY

These rules and regulations are adopted pursuant to the rulemaking authority provided in section 26.5-1-105(1), C.R.S., and are intended to be consistent with the requirements of the State Administrative Procedures Act, sections 24-4-101 ~~*et seq.*~~through 24-4-204, (the "APA"), C.R.S., the Anna Jo Garcia Haynes Early Childhood Act, Title 26.5 of the C.R.S. ~~sections 26.5-1-101 *et seq.*~~ (the "Early Childhood Act"), C.R.S., and the Colorado Child Care Assistance Program Act, sections 26.5-4-101 through 26.5-4-119, C.R.S.

3.101 ~~CCCAP MISSION AND APPROPRIATIONS~~SCOPE AND PURPOSE

These rules and regulations shall govern the processes and procedures of licensed child care providers participating in the Colorado Child Care Assistance Program (CCCAP).

~~A. Mission~~

The purpose of CCCAP is to provide eligible households with access to high quality, affordable child care that supports healthy child development and school readiness while promoting household self-sufficiency and informed child care choices.

3.102 ~~PROGRAM FUNDING~~APPLICABILITY

The provisions of these rules and regulations shall be applicable to licensed child care providers participating in the Colorado Child Care Assistance Program, which is regulated by the Colorado Department of Early Childhood.~~COLORADO CHILD CARE ASSISTANCE PROGRAM (CCCAP)~~

3.103 DEFINITIONS

A. "Accused individual" means:

1. An adult caretaker, teen parent, or child care provider who is being accused of committing fraud or a fraudulent criminal act; or

2. An adult caretaker or teen parent who is being accused of committing an Intentional Program Violation.

B. "Additional care needs" means a child who has a physical and/or mental disability and needs a higher level of care on an individualized basis than that of his/her peers at the same age; or, who is under court supervision, including a voluntary out-of-home placement prior to or subsequent to a petition review of the need for placement (PRNP), and who has additional care needs identified by an individual health care plan (IHCP), individual education plan (IEP), physician's/professional's statement, child welfare, or individualized family service plan (IFSP).

C. "Adult caretaker" means a person in the home who is financially contributing to the welfare of the child and is the parent, adoptive parent, step-parent, legal guardian, or person who is acting in "loco parentis" and has physical custody of the child during the period of time child care is being requested.

D. "Adverse action" means any action by the counties or their designee which adversely affects the adult caretaker or teen parent's eligibility for services, or the Child Care Provider's right to payment for services provided and authorized under the CCCAP.

E. "Affidavit" means a voluntary written declaration reflecting the personal knowledge of the declarant.

F. "Applicant" means the adult caretaker(s) or teen parent(s) who sign(s) the application form and/or the redetermination form.

G. "Application" is a Department-approved form that may include, but is not limited to:

1~~A~~. An original Department-prescribed low-income child care application, which is the first application for the CCCAP filed by the adult caretaker(s) or teen parent; or

2~~B~~. At the option of the county, any application for another public assistance program.

H. "Application date" means the date that the county receives the signed application.

I. "Application date for pre-eligibility determinations" means the date that the application is received from the Child Care Provider or Applicant by the county. ~~Required supporting documents may be submitted up to thirty (30) days after receipt of the signed application.~~

J. "Application process" means all of the following:

1~~A~~. The Department-prescribed, signed low-income child care application form completed by the adult caretaker or teen parent ~~or their authorized representative~~, which includes appeal rights; or~~,~~ any application from another public assistance program. Counties with Head Start programs may accept the Head Start application in lieu of the Low-Income Child Care application for those children enrolled in the Head Start program;

2~~B~~. The required verification supporting the information declared on the application form; and

3~~C~~. As a county option, an orientation or interview for new applicants may be required. Counties shall ensure that, if the county chooses to incorporate an orientation or interview into their application process, the orientation or interview process is not burdensome to families by allowing a family to complete the process via phone or electronic tools or by offering extended office hours to hold the orientation or interview.

K. "Assets" include but are not limited to the following:

1~~A~~. Liquid resources such as cash on hand, money in checking or savings accounts, saving certificates, stocks or bonds, lump sum payments as specified in rule section 3.111(H)(3). ~~the rule section titled "nonrecurring lump sum payments."~~

2~~B~~. Non-liquid resources such as any tangible property including, but not limited to, licensed and unlicensed automobiles and motorcycles~~,~~ utility trailer~~,~~ seasonal or recreational vehicles (such as any camper, motor home, boat, snowmobile, water skidoo, or airplane); and real property (such as buildings, land, and vacation homes). Primary home and automobile of the primary caretakers are excluded.

L. "Attestation of mental competence" means a signed statement from a Qualified Exempt Child Care Provider declaring that no one in the home where the care is provided has been determined to be insane or mentally incompetent by a court of competent jurisdiction; or specifically that the mental incompetence or insanity is not of such a degree that the individual cannot safely operate as a Qualified Exempt Child Care Provider.

M. "Attendance tracking system (ATS)" means the system used by adult caretakers, teen parents, or another individual delegated by the adult caretaker or teen parent to access benefits and to record child attendance for the purposes of paying for authorized and provided child care.

N. "Authorization" or "Authorized care" means the amount and length of time a child is eligible to receive care by licensed or qualified exempt child care providers to whom social/human services will authorize payment.

O. "Authorization start date" means the date from which payments for child care services are eligible to be paid by the county.

P. "Base reimbursement rate" means the regular daily reimbursement rate paid by the county to the child care provider. This does not include the increase of rates of reimbursement for high-quality early childhood programs. Base reimbursement rates do not include absences, holidays, registration fees, activity fees, and/or transportation fees.

Q. "Basic education" is a Low-Income Child Care eligible activity where an adult caretaker or teen parent is in high school education programs working towards a high school diploma or high school equivalency; Adult Basic Education (ABE); and/or~~,~~ English as a Second Language (ESL).

R. "Cash assistance" means payments, vouchers, and other forms of benefits designed to meet a household's ongoing basic needs such as food, clothing, shelter, utilities, household goods, personal care items, and general incidental expenses. Cash assistance may include supportive services to households based on the assessment completed. All state diversion payments of less than four (4) consecutive months are not cash assistance. For the purpose of child care, county diversion payments are not cash assistance.

S. "Child care authorization notice" means a ~~state~~ Department~~-~~prescribed form which authorizes the purchase of child care and includes the children authorized for care. The authorization notice will be given to the adult caretaker(s) or teen parent(s) and applicable child care provider(s) in order to serve as notice to the adult caretaker(s) or teen parent(s), and child care provider(s) of approval or change of child care services. Colorado's child care authorization notice(s) are vouchers for the purposes of the CCCAP.

T. "CHATS" means the Child Care Automated Tracking System.

U. "Child care provider" means a child care provider licensed pursuant to Part 3 of Article 5 of Title 26.5 that has an agreement or enrollment contract to participate in CCCAP.

V. "Child Care Resource and Referral Agencies" (CCR&R) means agencies or organizations available to assist individuals in the process of choosing child care providers.

W. "Child care staff" or "child care technician" means individuals who are designated by counties or their designees to administer all, or a portion of, the CCCAP and includes, but is not limited to, workers whose responsibilities are to refer children for child care assistance, determine eligibility, authorize care, process billing forms, and issue payment for child care ~~subsidies~~benefits.

X. "Child Welfare Child Care" means a child care component within CCCAP where less than twenty-four (24) hour child care assistance is needed to maintain children in their own homes or in the

least restrictive out-of-home care when there are no other child care options available. See rule manual Volume 7, rule section 7.302, Child Welfare Child Care (12 CCR 2509-4). (June 1Mar. 3, 2023)., The entirety of Volume 7 is herein incorporated by reference. No later editions or amendments are incorporated. These regulations are available at no cost from the Colorado Department of Human Services, 1575 Sherman St., Denver, Colorado 80203, or at https://www.sos.state.co.us. These regulations are also available for inspection and copying at the Colorado Department of Early Childhood, 710 S. Ash Street, Bldg. C, Denver, Colorado 80246, during regular business hours.

Y. "Citizen/legal resident" means a citizen of the United States, current legal resident of the United States, or a person lawfully present in the United States pursuant to Title IV of the Personal Responsibility and Work Opportunity Reconciliation Act (PRWORA) of 1996, Public Law 104-193; and Federal Register notices 62 Fed. Reg. 61344 (Nov. 17, 1997) and 63 Fed. Reg. 41658 (Aug. 4, 1998). Herein incorporated by reference. No later amendments or editions are incorporated. These documents are available at no cost from the Office of the Federal Register at: 7 G Street, NW, Ste. A-734, Washington, D.C. 20401, or at https://www.federalregister.gov/. These documents are also available for inspection and copying at the Colorado Department of Early Childhood (CDEC), 710 S. Ash Street, Bldg. C, Denver, Colorado 80246. Since the child is the beneficiary of child care assistance, the citizen/legal resident requirement only applies to the child who is being considered for assistance.

Z. "Clear and convincing" means proof that is stronger than a preponderance of the evidence and is unmistakable or free from serious or substantial doubt.

AA. "Colorado Child Care Assistance Program" or "CCCAP" means the public assistance program for child care known as the Colorado Child Care Assistance Program established in Part 1 or Article 4 of Title 26.5. CCCAP is administered by the Department and provides child care subsidies benefits to households in the following programs: Low-Income Child Care, Colorado Works Child Care, Protective Services Child Care, and Child Welfare Child Care. The DepartmentCDEC is responsible for the oversight and coordination of all child care funds and services.

BB. "Colorado Works Program" is the program administered by the Colorado Department of Human Services in Part 7 of Article 2 of Title 26. Colorado Works is Colorado's Temporary Assistance for Needy Families (TANF) program that provides public assistance to households in need. The Colorado Works program is designed to assist adult caretaker(s) or teen parent(s) in becoming self-sufficient by strengthening the economic and social stability of households.

CC. "Colorado Works Child Care" means a child care component within CCCAP for Colorado Works households with an adult caretaker or teen parent who have been referred for child care by the county Colorado Works worker and are determined work eligible per Colorado Works Program rules located at 9 CCR 2503-6 (June 1Aug. 30, 20232), herein incorporated by reference. No later editions or amendments are incorporated. These regulations are available at no cost from the Colorado Department of Human Services, 1575 Sherman St., Denver, Colorado 80203, or at https://www.sos.state.co.us/ccr. These regulations are also available for inspection and copying at the Colorado Department of Early Childhood, 710 S. Ash Street, Bldg. C, Denver, Colorado 80246, during regular business hours.

DD. "Colorado Works households" means members of the same Colorado Works household who meet requirements of the Colorado Works program, through receipt of basic cash assistance or state diversion payments while working toward achieving self-sufficiency through eligible work activities and eventual employment where the adult caretaker(s) or teen parent(s) is included in the assistance unit, as defined in The Colorado Works Program Rules (9 CCR 2503-6), incorporated by reference in subsection (BB) of this rule section 3.103.

EE. "Collateral Contact" means a verbal or written confirmation of a household's circumstances by a person outside the household who has first-hand knowledge of the information, made either in person, electronically submitted, or by telephone.

FF. "Confirmed abuse or neglect" means any report of an act or omission that threatens the health or welfare of a child that is found by a court, law enforcement agency, or entity authorized to investigate abuse or neglect to be supported by a preponderance of the evidence.

GG. "Consumer Education" means information provided to adult caretaker(s) or teen parent(s), child care providers, and the general public that will promote informed child care choices; information on access to other programs in which families may be eligible; and, information on developmental screenings.

~~FF. "Cooperation with Child Support Services (county option)" means applying for Child Support Services for all children who are in need of care and have an absent parent, within thirty (30) calendar days of the completion and approval of the CCCAP application and maintaining compliance with Child Support Services case unless a good cause exemption exists. The county IV-D administrator or designee determines cooperation with Child Support Services.~~

HH. "County or Counties" means the county departments of social/human services.

II. "Department" means the Colorado Department of Early Childhood.

JJ. "Disaster" means the occurrence or imminent threat of widespread or severe damage, injury or loss of life or property resulting from any natural cause or cause of human origin, including but not limited to fire, flood, earthquake, wind, storm, wave action, hazardous substance incident, oil spill, or other water contamination requiring emergency action to avert danger or damage, volcanic activity, epidemic, air pollution, blight, drought, infestation, explosion, civil disturbance, hostile military or paramilitary action, or a condition of riot, insurrection, or invasion existing in the state or in any county, city, town, or district in the state.

KK. "Discovery" means that a pertinent fact related to CCCAP eligibility was found by the county to exist.

LL. "Drastic economic change" means an economic impact on the county or state that has a strong or far-~~-~~reaching effect on the CCCAP.

MM. "Drop in day" means a county-determined number of days that will generate an approval and payment for care utilized outside of the standard authorization.

NN. "Early care and education provider" means a school district or child care provider pursuant to section 26.5-4-103(4), C.R.S.

OO. "Eligible activity," for the purpose of Low-Income Child Care, means the activity in which the t~~T~~een parent(s) or adult caretaker(s) are involved. This may include job search; employment; self-employment; training; basic education; or, post-secondary education. For t~~T~~een parents, training and teen parent education are approved activities for all counties.

PP. "Eligible child" means a child, from birth to the age of thirteen (13) years who needs child care services during a portion of the day, but less than twenty four (24) hours, and is physically residing with the eligible adult caretaker(s) or teen parent(s); or a child with additional care needs under the age of nineteen (19) who is physically or mentally incapable of caring for themselves or is under court supervision and is physically residing with the eligible adult caretaker(s) or teen parent(s). Any child served through the Colorado Works program or the Low-Income Child Care program must ~~shall~~ be a citizen/legal resident.

QQ. "Emergency" means an unexpected event that places life or property in danger and requires an immediate response through the use of state and community resources and procedures.

RR. "Employment" is a Low-Income Child Care eligible activity where the adult caretaker or teen parent is holding a part-time or full-time job for which wages, salary, in-kind income or commissions are received.

SS. "Enrollment freeze" or "freeze" means when a county ceases enrollment of individuals due to being overspent or being projected to overspend.

TT. "Entry income eligibility level" means the level set by the Department for each county above which an adult caretaker(s) or teen parent(s) is not eligible at original application.

UU. "Equivalent full-time units" mean all part-time units times a factor of .55 to be converted to full-time units. The full-time equivalent units added to the other full-time units shall be less than thirteen (13) in order to be considered part-time for parent fees.

VV. "Exit income eligibility level" is the income level at the twelve (12) month re-determination of eligibility above which the county may deny continuing eligibility and is eighty-five percent (85%) of the Colorado state median income as outlined in rule section 3.1105.1(H).

WW. "Fair market value" means the median resale market value an item or service.

XX. "Families experiencing homelessness" means families who lack a fixed, regular, and adequate nighttime residence and at least one of the following:

1A. Children who are sharing the housing of other persons due to loss of housing, economic hardship, or a similar reason; are living in motels, hotels, or camping grounds due to the lack of alternative accommodations; are living in emergency or transitional shelters;

2B. Children who have a primary nighttime residence that is a public or private place not designed for or ordinarily used as a regular sleeping accommodation for human beings;

3C. Children who are living in cars, parks, public spaces, abandoned buildings, substandard housing, bus or train stations, or similar settings; or

4D. Migratory children who qualify as experiencing homelessness for the purposes of these rules because the children are living in circumstances described in this definition (1)A through (3)C, of this rule subsection.

YY. "Federal poverty level" (FPL) or "federal poverty guidelines" (FPG) refers to figures set by the Department annually. These figures, based on gross monthly income levels for the corresponding household size, are included in the table in rule section 3.1105.1.(H).(2).

ZZ. "Fingerprint-based criminal background check" means a complete set of fingerprints for the qualified exempt provider and anyone eighteen (18) years of age and older residing in the qualified exempt provider's home; or, for the qualified exempt provider if care is provided in the child's home, taken by a qualified law enforcement agency, and submitted to the Colorado Department of Early Childhood, Division of Early Learning Access and Quality, for subsequent submission to the Colorado Bureau of Investigations (CBI). The individual(s) will also be required to submit a background check with the Federal Bureau of Investigation (FBI). Costs for all investigations are the responsibility of the person whose fingerprints are being submitted unless noted otherwise in the county's plan, which can be found on the Colorado Department of Early Childhood website at https://cdec.colorado.gov/colorado-child-care-assistance-program-for-families, per rule section 3.13015.1.

AAA. "Fiscal ~~A~~agreement" means a Department-approved agreement between counties or their designees and child care provider(s), which defines the maximum rate possible based on county ceiling rates and quality rating tiers, defines provider rights and responsibilities, and defines responsibilities of the counties or their designees to the child care provider(s). The fully executed fiscal agreement includes noticing of county ceiling rates as well as a copy of the provider's CCCAP reimbursement rates. Fiscal agreements must be:

1~~A~~. One (1) year in length for qualified exempt child care providers

2~~B~~. Three (3) years in length for licensed child care providers

BBB. "Fraud/Fraudulent criminal act" means an adult caretaker(s), teen parent(s), or child care provider who has secured, attempted to secure, or aided or abetted another person in securing public assistance to which the adult caretaker(s) or teen parent(s) was not eligible by means of willful misrepresentation/withholding of information or intentional concealment of any essential facts. Fraud is determined as a result of any of the following:

1~~A~~. Obtaining a "waiver of intentional program violation~~;~~";

2~~B~~. An administrative disqualification hearing; or

3~~C~~. Civil or criminal action in an appropriate state or federal court.

CCC. "Funding concerns" means a determination by the Department or a county that actual or projected expenditures indicate a risk of overspending of that county's available CCCAP allocation in a current fiscal year.

DDD. "Head Start" means a program operated by a local public or private nonprofit agency designated by the Federal Department of Health and Human Services to operate a head start program pursuant to the provisions of Title V of the Federal "Economic Opportunity Act of 1964", as amended.

EEE. "High-quality early childhood program" means a program operated by a child care provider with a fiscal agreement through CCCAP~~;~~ and, that is in the top three levels of the ~~Department's~~ state's quality rating and improvement system, is accredited by a Department-approved accrediting body, or is an ~~E~~early ~~H~~head ~~S~~start or ~~H~~head ~~S~~start program that meets federal standards.

FFF. "Hold slots" means a county determined number of days when payment is allowed for unused care that is in addition to absences, holidays, and school breaks. Hold slots are intended to hold a child's slot with a provider due to extended absence from care.

GGG. "Household" includes: all children in the home who are under eighteen (18) years of age; all children under nineteen (19) years of age who are still in high school and the responsibility of the adult caretaker(s); and the adult caretaker(s) or teen parent(s).

HHH. "In loco parentis" means a person who is assuming the parent obligations for a child, including protecting their rights and/or a person who is standing in the role of the parent of a child without having gone through the formal adoption process. Parent obligations include, but are not limited to, attending parent teacher conferences, regularly picking up and dropping children at child care, and regularly taking the child to doctor appointments.

III. "Incapacitated" means a physical or mental impairment which substantially reduces or precludes the adult caretaker or teen parent from providing care for his/her child(ren) and participating in a Low-Income Child Care eligible activity. Such a condition shall be documented by a physician's

statement or other medical verification which establishes a causal relationship between the impairment and the ability to provide child care.

JJJ. "Income eligibility" means that eligibility for child care ~~subsidies~~ benefits is based on and determined by measuring the countable household income and size against eligibility guidelines.

KKK. "Inconsistent" means the information provided is unclear or conflicting or the county has reason to believe the facts presented are contrary to the information provided by the adult caretaker(s) or teen parent(s).

LLL. "Intentional Program Violation (IPV)" means an act committed by an adult caretaker(s) or teen parent(s) who has intentionally made a false or misleading statement or misrepresented, concealed or withheld facts for the purpose of establishing or maintaining a Colorado Child Care Assistance Program household's eligibility to receive benefits for which they were not eligible; or has committed or intended to commit any act that constitutes a violation of the child care assistance program regulations or any state statute related to the use or receipt of CCCAP benefits for the purpose of establishing or maintaining the household's eligibility to receive benefits.

MMM. "Involuntarily out of the home" means when an adult caretaker or teen parent is out of the home due to circumstances beyond his/her immediate control to include, but not be limited to, incarceration, resolution of immigration issues, and/or restraining orders.

NNN. "Job search" is a Low-Income Child Care eligible activity where an adult caretaker or a teen parent is actively seeking employment.

OOO. "Low-Income Program" or "Low-Income Child Care" means a child care component within CCCAP for households with an adult caretaker(s) or teen parent(s) who is/are in a low-income eligible activity, income eligible, and not receiving Colorado Works, Child Welfare, or Protective Services child care.

PPP. "Manual Claim" means the child care provider's process of invoicing the county using the Department-prescribed manual claim form for reimbursements that were not processed automatically through CHATS including but not limited to:

1~~A~~. Care that was authorized and provided;

2~~B~~. Reimbursable registration fees;

3~~C~~. Reimbursable activity fees;

4~~D~~. Reimbursable transportation fees;

5~~E~~. Reimbursable hold slots;

6~~F~~. Reimbursable drop in days; and

7~~G~~. Reimbursable absence payments.

QQQ. "Maternity and/or paternity leave" is a temporary period of absence from the adult caretaker or teen parent's Low-Income Child Care eligible activity that is granted to expectant or new mothers and/or fathers for the birth and care of a newborn child.

RRR. "Medical leave" means a temporary period of absence from the adult caretaker or teen parent's Low-Income Child Care eligible activity that is granted due to a personal illness or injury, or to care for a family member that is not related to maternity/paternity leave.

SSS. "Negative licensing action" means a Final Agency Action resulting in the denial of an application, the imposition of fines, or the suspension~~,~~ or revocation of a license issued pursuant to the Child Care Licensing Act~~;~~ or the demotion of such a license to a probationary license.

TTT. "New employment verification" means verification of employment that has begun within the last sixty (60) days. It is verified by a county form, employer letter, or through collateral contact. Verification ~~which~~ includes a start date, hourly wage or gross salary amount, hours worked per week, pay frequency, work schedule (if nontraditional care hours are requested at application or re-determination), and verifiable employer contact information.

UUU. "Non-traditional care hours" means weekend, evening, or overnight care.

VVV. "Originating county" means the county where child care assistance eligibility was initiated in instances where a family receiving low-income child care moves from one county to another during their eligibility period.

WWW. "Overpayment" means child care assistance received by the adult caretaker(s) or teen parent(s), or monies paid to a child care provider, which they were not eligible to receive.

XXX. "Parent" means a biological, adoptive or stepparent of a child.

YYY. "Parent fee or co-payment" means the household's contribution to the total cost of child care paid directly to the child care provider(s) prior to any state/county child care funds being expended.

ZZZ. "Pay stubs" means a form or statement from the employer indicating the name of the employee, the gross amount of income, mandatory and voluntary deductions from pay (i.e. FICA, insurance, etc.), net pay and pay date, along with year-to-date gross income.

AAAA. "Physical custody" means that a child is living with, or in the legal custody of, the adult caretaker(s) or teen parent(s) on the days/nights they receive child care assistance.

BBBB. "Post eligibility stabilization period" means the time frame in which an adult caretaker or teen parent must complete their job search activity if, at Low-Income Child Care re-determination, they have not utilized their entire minimum thirteen (13) week time limited activity.

CCCC. "Preponderance of evidence" means credible evidence that a claim is more likely true than not.

DDDD. "Primary adult caretaker" means the person listed first on the application and who accepts primary responsibility for completing forms and providing required verification.

EEEE. "Protective Services Child Care" means a child care component within CCCAP for children that have been placed by the county in foster home care, kinship foster home care or non-certified kinship care; have an open child welfare case; and, the county has chosen to provide child care services utilizing the Child Care Development Fund (CCDF) rather than the Child Welfare Block Grant.

FFFF. "Prudent person principle (PPP)" means allowing the child care technician to act in a manner consistent with what a reasonable person of ordinary prudence would or would not do under the same or similar circumstances when executing their responsibilities to determine CCCAP eligibility, enter into a fiscal agreement, and reimburse child care providers for care that was not automatically processed through ~~chats~~CHATS.

GGGG. "Qualified exempt child care facilities" means a facility that is approved, certified, or licensed by any other department or agency, or federal government department or agency, which has standards for operation of the facility and inspects or monitors the facility; and~~,~~ has been declared exempt from the child care licensing act as defined in Colorado Department of Human Services regulations at 12 CCR 2509-8, rule section 7.701.11 (June 1~~April 1~~, 2023). Herein incorporated by reference. No later editions or amendments are incorporated. These regulations are available at no cost from the Colorado Department of Human Services, 1575 Sherman St., Denver, Colorado 80203, or at https://www.sos.state.co.us/ccr. These regulations are also available for inspection and copying at the Colorado Department of Early Childhood, 720 S. Ash Street, Bldg. C, Denver, Colorado 80246, during regular business hours, or at https://www.sos.state.co.us/ccr.

HHHH. "Qualified exempt child care provider" means a family child care home provider who is not licensed but provides care for a child(ren) from the same family; or an individual who is not licensed but provides care for a child(ren) who is related to the individual if the child's care is funded in whole or in part with money received on the child's behalf from the publicly funded CCCAP under Colorado Department of Human Services regulations at rule section 7.701.11, A, 1, b, incorporated by reference in subsection (GGGG), above.

IIII. "Rate notification" means a notification of provider reimbursement rates and applicable registration, activity, or transportation fees that reflect the child care provider's CCCAP reimbursement rate based on the comparison of the county's ceiling rates that are reflected in the current ~~F~~fiscal ~~A~~agreement and the provider's private pay rates, quality level or rate types.

JJJJ. "Receiving county" means the county where child care assistance eligibility is re-determined after a family receiving low-income child care moves from one county to another during their eligibility period.

KKKK. "Recipient" means the individual or family who is receiving or has received benefits from CCCAP pursuant to Part 1 of Article 4 of Title 26.5.

LLLL. "Recovery" means the act of collecting monies when an adult caretaker(s), teen parent(s) or child care provider has received childcare assistance benefits for which they were not eligible, commonly known as an "over payment".

MMMM. "Re-determination (redet) form" is a Department-prescribed form, which includes appeal rights, that is used to determine a household's continued eligibility for Low-Income Child Care at the end of their twelve (12) month minimum eligibility period.

NNNN. "Re-determination (Redet) process" is the process to update eligibility for Low-Income Child Care. This process is completed no earlier than every twelve (12) months and includes:

1~~A~~. The Department-prescribed re-determination form, which must be completed and signed by the adult caretaker or teen parent or their authorized representative; and~~,~~

2~~B~~. The required verification that supports the information declared on the re-determination form that is needed to determine continued eligibility.

OOOO. "Regionally accredited institution of higher education" means a community college, college, or university which is a candidate for accreditation or is accredited by one of the following regional accrediting bodies: Middle States, Association of Colleges and Schools, New England Association of Schools and Colleges, North Central Association of Colleges and Schools, Northwest Commission on Colleges and Universities, Southern Association of Colleges and Schools, Western Association of Schools and Colleges, Accrediting Commission for Community and Junior Colleges.

PPPP. "Relative" means any of the following relationships by blood, marriage, or adoption: parent, grandparent, son, daughter, grandson, granddaughter, brother, sister, stepparent, stepbrother, stepsister, stepson, stepdaughter, uncle, aunt, niece, nephew, or cousin.

QQQQ. "Risk-based audit" means audit selection based on a combination of the likelihood of an event occurring and the impact of its consequences. This may include, but not be limited to, the number, dollar amounts and complexity of transactions; the adequacy of management oversight and monitoring; previous regulatory and audit results; review of the technician's accuracy; and/or reviews for separation of duty.

RRRR. "Self-employment" is a Low-Income Child Care eligible activity where an adult caretaker or teen parent is responsible for all taxes and/or other required deductions from earned income.

SSSS. "Self-sufficiency standard" means the level of income adequate in each county for a given year to meet the cost of basic needs, exclusive of child care costs, based on a verifiable and statistically based third party source.

TTTT. "Slot contracts (county option)" means the purchasing of slots at a licensed child care provider for children enrolled in CCCAP in communities where quality care may not otherwise be available to county-identified target populations and areas or to incentivize or maintain quality. A slot contract is tied to a licensed child care provider and may be filled by any child who is eligible for and receiving CCCAP.

UUUU. "State established age bands" means the breakdown of child age ranges used when determining child care provider base reimbursement rates.

VVVV. "State or local public benefit" means any grant, contract, loan, professional license, or commercial license provided by an agency of a state or local government, or by appropriated funds of a state or local government.

WWWW. "State Median Income" (SMI) refers to figures set by the Department annually. These figures, based on gross monthly income levels for the corresponding household size, are included in the table in rule section 3.11~~1~~05.1.(H).(2).

XXXX. "Substantiated" means that the investigating party has found a preponderance of evidence to support the complaint.

YYYY. "Target population" means a population whose eligibility is determined by criteria different than other child care populations, and has a priority to be served regardless of wait lists or freezes based upon appropriations. Current target populations include:

1~~A~~. Households whose income is at or below 130% of the current federal poverty guidelines;

2~~B~~. Teen parents;

3~~C~~. Children with additional care needs;

4~~D~~. Families experiencing homelessness; and~~,~~

5~~E~~. Segments of population defined by county, based on local needs.

ZZZZ. "Teen parent" means a parent under twenty-one (21) years of age who has physical custody of his/her child(ren) for the period that care is requested and is in an eligible activity such as attending junior high/middle school, high school, GED program, vocational/technical training activity, employment, self-employment, or job search.

AAAAA. "Temporary Absence or Temporary Break" means a period of time when an adult caretaker or teen parent is absent from their employment, self-employment, or education activity due to seasonal work, medical leave, maternity/paternity leave, and holidays or scheduled breaks but still remains employed, self-employed, or enrolled in training or education, while receiving Low-Income Child Care, and will return to the activity after the duration of their leave or break.

BBBBB. "Tiered reimbursement" means a pay structure that reflects increasing rates for high-quality early childhood programs that receive CCCAP reimbursement. These increases are made in addition to the base reimbursement rate.

CCCCC. "Timely written notice" means that any adverse action shall be preceded by a prior notice period of fifteen (15) calendar-days. "Timely" means that written notice is provided to the household and child care provider at least by the business day following the date the action was entered into the eligibility system. The fifteen (15) calendar-day prior notice period constitutes the period during which assistance is continued and no adverse action is to be taken during this time.

DDDDD. "Training and post-secondary education" is a Low-Income Child Care eligible activity where an adult caretaker or teen parent attends educational programs including regionally accredited post-secondary education for a Bachelor's degree or less or a workforce training program such as vocational, technical, or job skills training. Workforce training programs include educational activities after completing basic education.

EEEEE. "Transition families" means households ending their participation in the Colorado Works Program and who are eligible to transition to Low-Income Child Care Assistance.

FFFFF. "Units" or "unit of care" means the period of time authorized care is billed by a child care provider and paid for a household. (These units would be full-time, part-time, full-time/part-time, or full-time/full-time.)

GGGGG. "Up-to-date immunizations" means documentation of immunization status or exemption as required by the Colorado Department of Public Health and Environment (CDPHE). Immunizations required for school entry are set by the board of health and based on recommendations of the Advisory Committee on Immunization Practices (ACIP).

HHHHH. "Voluntarily out of the home" means circumstances where an adult caretaker or teen parent is out of the home due to his/her choice to include, but not be limited to, job search, employment, military service, vacations, and/or family emergencies.

IIIII. "Wait list" means a list maintained by a county that reflects individuals who have submitted a complete application for the CCCAP program for whom the county is not able to immediately enroll.

JJJJJ. "Willful misrepresentation/withholding of information" means an understatement, overstatement, or omission, whether oral or written, made by a household voluntarily or in response to oral or written questions from the Department, and/or a willful failure by a household to report changes in income, if the household's income exceeds eighty-five percent (85%) of the State median income within ten (10) days, or changes to the qualifying eligible activity within four weeks of the change.

3.10~~41~~ CCCAP ~~MISSION AND~~ APPROPRIATIONS

~~B. Appropriations~~

Nothing in these rules shall create a legal entitlement to child care assistance. Counties shall not be required to expend funds exceeding allocated state and federal dollars or exceeding any matching funds expended by the counties as a condition of drawing down federal and state funds.

When a county can demonstrate, through a written justification in its county CCCAP plan, that it has insufficient CCCAP allocations, a county is not required to implement a provision or provisions of rule(s) enacted under statutory provisions that are explicitly "subject to available appropriations." The county is not required to implement that or those rules or statutory provision(s) for which it has demonstrated through its annual CCCAP plan that it has insufficient CCCAP allocations to implement, except for the entry income eligibility floor referenced in rule section 3.111(H).

As part of its demonstration, the county shall include a list of priorities reflecting community circumstance in its county CCCAP plan that prioritizes the implementation of the rules and/or provisions of statute that are "subject to available appropriations."

If the Department determines the county CCCAP plan is not in compliance with these rules and/or provisions of statute, the Department will first work with the county to address the concerns. If a resolution cannot be agreed upon, the Department reserves the right to deny the county CCCAP plan. If the Department denies the county CCCAP plan, the county and the state shall work together to complete a final approved county CCCAP plan that is in compliance with these rules and statute. Approved county CCCAP plans can be found on the Colorado Department of Early Childhood website at https://cdec.colorado.gov/colorado-child-care-assistance-program-for-families

3.10~~5~~2 PROGRAM FUNDING

A. ~~The Colorado Child Care Assistance Program~~ CCCAP will be funded through annual allocations made to the counties. ~~Nothing in these rules shall create a legal entitlement to child care assistance.~~ Counties may use annual allocation for child care services which includes direct services and administration.

B. Each county shall be required to meet a level of county spending for the Colorado Child Care Assistance Program that is equal to the county's proportionate share of the total county funds set forth in the annual general Appropriation Act for the ~~Colorado Child Care Assistance Program~~ CCCAP for that State fiscal year. The level of county spending shall be known as the county's maintenance of effort for the program for that State fiscal year.

C. The CCCAP allocation formula shall be applied uniformly across all counties and must be based on the relative cost of the program. The allocation formula must take into consideration:

1. The eligible population for each county using the federal poverty level (FPL) as outlined in rule section 3.1~~05.~~1.(H); and

2. Reimbursement rates set by the state as informed by the market rates study.

3. If not already taken into consideration in the initial allocation formula as stated in rule sections 3.10~~5~~2.(C).(1) and (2), the following factors must also be included:

   a. A measure of cost of living, which may include market rates; and~~,~~

   b. The cost of high quality child care programs.

4. If not already taken into consideration in the initial allocation formula, the formula may include the following factors:

   a. A statewide adjustment to the allocation formula for geographic differences within counties or regional differences among counties in order to improve access.

   b. A statewide adjustment to the allocation formula for drastic economic changes that may impact the ability of CCCAP to serve low-income families.

c. A statewide adjustment to mitigate significant decreases in county allocation amounts due to changes in the factors considered in the initial allocation formula.

~~3.104~~ APPLICANT RIGHTS

3.10~~64.1~~ ANTI-DISCRIMINATION

Child care programs shall be administered in compliance with Title VI of the Civil Rights Act of 1964 (42 USC 2000(d)) located at http://www.fhwa.dot.gov/environment/title_vi.htm; Title II of the Americans with Disabilities Act (42 USC 12132(b)).

A. Counties or their designee shall not deny a person aid, services, or other benefits or opportunity to participate therein, solely because of age, race, color, religion, gender, national origin, political beliefs, or persons with a physical or mental disability.

B. No otherwise qualified individual with a physical or mental disability shall solely, by reason of his/her disability, be excluded from the participation in, be denied the benefits of, or be subjected to discrimination under any program or activity provided by the counties or their designee(s).

C. The county shall make services available to all eligible adult caretaker(s) and teen parents, subject to appropriations, including those with mental and physical disabilities and non-English speaking individuals, through hiring qualified staff or through purchase of necessary services.

3.10~~74.2~~ CONFIDENTIALITY

The use or disclosure of information by the counties or their designee(s) concerning current or prior applicants and recipients shall be prohibited except for purposes directly connected with the activities listed below:

A. The administration of public assistance programs, Child Welfare, Head Start and Early Head Start programs, and related ~~Department~~ activities.

B. Any investigation, recovery, prosecution, or criminal or civil proceeding in connection with the administration of the program.

C. The adult caretaker(s) or teen parent(s) applying for CCCAP may authorize a licensed child care provider or Head Start provider to assist them with the completion of a Low-Income Child Care application, including collection and organization of supporting documentation and submission of the application and supporting documents to a county. Authorization for application assistance and release of information shall be obtained on a D~~d~~epartment-approved form and included with the Low-Income Child Care application.

3.10~~84.3~~ TIMELY WRITTEN NOTICE OF ADVERSE ACTION

A decision to take adverse action concerning an applicant or a child care provider for assistance payments will result in a written notice mailed to the applicant or child care provider within one (1) business day of the decision. The written notice is considered mailed when it is faxed, emailed, sent via other electronic systems, hand-delivered, or deposited with the postal service. Fifteen (15) calendar ~~-~~days will follow the date of mailing the notice before adverse action is taken with the following exceptions ~~,~~ ~~which~~that require no prior notice:

A. Facts indicate an overpayment because of probable fraudulent behavior or an intentional program violation and such facts have been verified to the extent possible.

B. The proposed adverse action is based on a written or verbal statement from the adult caretaker(s) or teen parent(s) who state(s) that he/she no longer wishes to receive assistance or services.

C. The proposed adverse action is requested by another county or ~~state~~ the ~~d~~Department.

D. The counties or their designee(s) have confirmed the death of a recipient or of a~~A~~dult c~~C~~are ~~T~~taker or ~~T~~teen parent.

E. The county has exercised its right to terminate a fiscal agreement with any child care provider because a child's health or safety is endangered, or the child care provider is under a negative licensing action.

3.10~~94.4~~ ADULT CARETAKER OR TEEN PARENT AND CHILD CARE PROVIDER APPEAL RIGHTS

Counties' or designee(s)' staff shall advise adult caretakers or teen parents in writing of their right to a county dispute resolution conference or state level fair hearing pursuant to Colorado Department of Human Services rule sections 3.840 and 3.850 of Income Maintenance Volume 3 (9 CCR 2503-~~18~~) (July 1, 2020), herein incorporated by reference. No later editions or amendments are incorporated. A copy of these rules are available at no cost from the Colorado Department of Human Services, 1575 Sherman St., Denver, CO 80203 or at https://www.sos.state.co.us/CCR. These rules are also available for public inspection and copying at the Colorado Department of Early Childhood, 710 Ash St., Denver, CO 80246, during regular business hours.

Child care providers shall be given written notice of their right to an informal county conference when they are given their copy of the fiscal agreement.

3.11~~005~~ LOW-INCOME CHILD CARE

Eligible ~~Colorado Child Care Assistance Program~~CCCAP participants ~~shall~~ must: be an adult caretaker(s) or teen parent(s) of a child;~~,~~ meet program guidelines~~,~~; ~~and are~~ be low-income adult caretakers or teen parents ~~who are~~participating in a low-income eligible activity~~,~~; and need child care assistance.

3.11~~05.~~1 LOW-INCOME CHILD CARE ELIGIBILITY

To be eligible for Low-Income Child Care assistance the following criteria shall be met:

A. All adult caretakers and teen parents shall be verified residents of the county from which assistance is sought and received at the time of application and re-determination. Adult caretaker(s) or teen parent(s) shall remain eligible for the duration of the eligibility period if they report that they are no longer residents of the county in which they are actively receiving assistance per rule section 3.12~~512~~ (BB).

B. The adult caretaker(s) or teen parent(s) shall ~~meet the following criteria~~:

1. ~~Is~~ Be actively participating in an eligible activity;

2. Meet~~s~~ the income eligibility guidelines set by the Department; and

3. ~~Shall h~~Have physical custody of the child for the period they are requesting care.

C. The applicant must complete ~~T~~the CCCAP application process ~~shall be completed~~ and the primary adult caretaker or teen parent ~~shall~~ must sign the required application forms. This includes:

1. The State Low-Income Child Care Assistance Program application, which includes appeal rights, signed and completed by the applicant ~~or their authorized representative, which includes appeal rights~~.

    a. Counties may accept applications from another public assistance program in lieu of the Low-Income Child Care application.

    b. Counties with Head Start programs may accept the Head Start application in lieu of the Low-Income Child Care application for those children enrolled in the head start program ~~counties~~ and counties are encouraged to work with local Head Start programs to coordinate this effort.

    c. Families enrolled in a Head Start or Early Head Start program at the time they apply for CCCAP~~,~~ shall have a re-determination date that aligns with the Head Start or Early Head Start program year.

2. The required verification supporting the information declared on the application form~~:~~, including:

    a. Proof of current residence;

    b. Citizenship, age, and identity of the child(ren) for whom care is requested;

        1) A child's citizenship status, age, and identity are considered to be verified if the complete application includes the child's age and citizenship status and is signed attesting to the child's identity unless the county determines that the declaration of citizenship, age, and/or identity is inconsistent.

        2) The county must request additional verification if the adult caretaker or teen parent's declaration is determined to be inconsistent based on the following guidelines:

            a) If the claim of citizenship, age, and/or identity is inconsistent with statements made by the adult caretaker or teen parent, ~~or~~ with other information on the application, or on previous applications;

            b) If the claim of citizenship, age, and/or identity is inconsistent with the documentation provided by the adult caretaker or teen parent; and/or

            c) If the claim of citizenship, age, and/or identity was previously received from another source such as another public assistance program including Colorado Works, the Supplemental Nutrition Assistance Program (SNAP), or Medicaid, and the claim is inconsistent with the information previously received from that source.

    c. Up-to-date immunizations, if applicable;

    d. Statement of ~~L~~low-~~Income~~ income eligible activity;

    e. Work or low-income activity Schedule (if non-traditional care hours are requested at application or redetermination);

f. Income;

g. Incapacitation, if applicable;

h. Custody arrangement and/or parenting schedule, if applicable;

i. Child care provider if one has been chosen at the time of application; and;

j. Other verifications as determined by the Department-approved county plan which can be found on the Colorado Department of Early Childhood website at https://cdec.colorado.gov/colorado-child-care-assistance-program-for-families.

3. An orientation or interview for new applicants as a county option. Counties shall ensure that the orientation or interview process is not burdensome to families by allowing a family to complete the process via phone or electronic tools or by offering extended office hours to hold the orientation or interview.

D. Eligible Households

1. The following household compositions qualify as eligible households:

a. Households with one adult caretaker or teen parent, where the adult caretaker or teen parent is engaged in a low-income eligible activity, meets low-income eligibility guidelines, has physical custody of the child, and needs child care assistance.

b. Households with two adult caretakers or teen parents, when one adult caretaker or teen parent is involuntarily out of the home. Such a household shall be considered a household with one adult caretaker or teen parent.

c. Households with two (2) adult caretakers or teen parents that need child care, where:

1) Both adult caretakers or teen parents are engaged in a low-income eligible activity; ~~or;~~

2) One adult caretaker or teen parent is voluntarily absent from the home, but both adult caretakers or teen parents are in a low-income eligible activity; or;

3) One adult caretaker or teen parent is engaged in a low-income eligible activity and the other adult caretaker or teen parent is incapacitated such that, according to a physician's statement or ~~licensed psychologist~~other medical verification, they are unable to care for the child(ren).

2. Households are considered households with two adult caretakers or teen parents when two adults or teen parents contribute financially to the welfare of the child and/or assume parent rights, duties, and obligations similar to those of a biological parent, even without legal adoption.

3. Two separate adult caretakers or teen parents who share custody but live in separate households may apply for the same child through separate applications, during periods that they have physical custody.

4. All adult caretakers or teen parents~~,~~ who are engaged in a low-income eligible activity~~,~~ must have physical custody of the child and meet low-income eligibility guidelines.

5. Any unrelated individual~~,~~ who is acting as a primary adult caretaker for an eligible child~~,~~ is required to obtain verification from the child's biological or adoptive parent, legal guardian, or a court order which identifies the unrelated individual as the child's adult caretaker.

6. Adult caretakers or teen parents that are not determined work eligible per Colorado Works Program rule (9 CCR 2503-6), incorporated by reference in rule section 3.103(BB) above, who are caring for children receiving Basic Cash Assistance through the Colorado Works Program are not eligible for Colorado Works Child Care but may be eligible for Low-Income Child Care if the adult caretaker or teen parent meets all other Low-Income program criteria.

7. Adoptive parents (including those receiving adoption assistance) are eligible if they meet the Low-Income program requirements.

8. Adult caretaker(s) or teen parent(s) who are participating in a low-income eligible activity and go on temporary verified maternity/paternity leave.

9. Adult caretaker(s) or teen parent(s) with an open and active Low-Income Child Care case who are participating in a low-income eligible activity and go on temporary verified medical leave and are unable to care for their children.

10. A separated primary adult caretaker or teen parent with a validly issued temporary order for parental responsibilities or child custody shall not be determined ineligible based on the other spouse's or parent's financial resources.

E. Ineligible Household Compositions

Incapacitated single adult caretakers or teen parents who are not in a low-income eligible activity are not eligible for the low-income program.

F. Eligible Child

An "eligible child" is a child from birth to the age thirteen (13) years who needs child care services during a portion of the day, but less than twenty four (24) hours, and is physically residing with the eligible adult caretaker(s) or teen parent(s); or a child with verified additional care needs under the age of nineteen (19) who is physically or mentally incapable of caring for themselves or is under court supervision and is physically residing with the eligible adult caretaker(s) or teen parent(s).

1. All children who have had an application made on their behalf or are receiving child care assistance shall verify that they are a citizen/legal resident and provide proof of identity if inconsistent, in accordance with rule section 3.1105.1(C)©(2)(b).

2. Children who are not attending school as defined by the Colorado Department of Education and who are receiving child care outside of the child's home from a qualified exempt child care provider who is unrelated to the child and care is provided outside of the child's home and who are not attending school as defined by the Colorado Department of Education shall must provide a copy of their immunization record to the county, indicating that the children are age-appropriately immunized or have a, unless exempt due to religious or medical reasons exemption (see sections 25-4-902 and 25-4-908, C.R.S., for exemption requirements).

G. Low-Income Eligible Activities

Adult caretakers or teen parents shall meet the criteria of at least one of the following low-income eligible activities:

1. Employment Criteria

   a. Adult caretakers or teen parents may be employed full or part time.

   b. Adult caretaker(s) or teen parent(s) ~~shall~~ must verify that his/her gross income divided by the number of hours worked equals at least the current federal minimum wage.

   c. Owners of Limited Liability Corporation's (LLC)~~'s~~ and S-Corporations are considered employees of the corporation.

2. Self-Employed Criteria

   a. The adult caretaker(s) or teen parent(s) shall submit documentation listing their income and work-related expenses. The county shall obtain verification of all expenses from the adult caretaker(s) or teen parent(s) or they will not be ~~allowed~~considered.

   b. The adult caretaker(s) or teen parent(s) shall submit an expected weekly employment schedule that includes approximate employment hours. This is required upon beginning self-employment, at application, and at redetermination.

   c. The adult caretaker(s) or teen parent(s) shall show that they have maintained an average income that exceeds their business expenses from self-employment.

   d. The adult caretaker(s) or teen parent(s) shall show that their taxable gross income divided by the number of hours worked equals at least the current federal minimum wage.

   e. Adult caretakers or teen parent(s) whose self-employment endeavor is less than twelve (12) months old, may be granted child care for six (6) months or until their next re-determination, whichever is longer, to establish their business. At the end of the launch period, adult caretakers shall provide documentation of income, verification of expenses, and proof that they are making at least federal minimum wage for the number of hours worked. Projected income for the launch period shall be determined based upon the federal minimum wage times the number of declared hours worked.

3. Job Search Criteria

   a. Job search child care is available to eligible adult caretakers or teen parents that met the eligibility criteria on the most recent eligibility determination for no fewer than thirteen (13) weeks of child care for each instance of non-temporary cessation of activity (per rule section 3.11~~05.2~~(C).

   b. If the job search activity is reported within the four (4) week reporting period, the activity shall begin the day that the change in activity was reported. If the job search activity is reported outside of the four (4) week reporting period, the activity shall begin the date that activity cessation occurred.

c. Job search shall continue until the adult caretaker or teen parent gains employment, enters into another low-income eligible activity, or when all of the allotted job search time has been utilized. Any day utilized in a week is considered one (1) week used toward the time limited activity.

d. Regular consistent child care must be provided during the job search period.

e. The amount of care authorized each day shall, at a minimum, be commensurate with the amount needed to complete the job search tasks.

f. Job search child care shall be approved in each instance of non-temporary job loss or when adult caretakers or teen parents end their low-income eligible activity while enrolled in the Low-Income program.

g. An adult caretaker or teen parent shall be determined ineligible once they have utilized their allotted job search time and have not reentered into a low-income eligible activity.

h. If at the time of re-determination, the adult caretaker or teen parent remains in a job search activity, has not utilized the remainder of their allotted job search time, and has provided the required re-determination documentation, the county shall place the case into a post-eligibility stabilization period for the duration of the remaining job search time.

1) If during the post-eligibility stabilization period the adult caretaker or teen parent reports that they have gained employment or reentered into another low-income eligible activity, the county shall process this change, continue care, and assess a parent fee.

2) The adult caretaker or teen parent shall be determined ineligible if they have not reentered into a low-income eligible activity and the post eligibility stabilization period has expired.

4. Training Criteria and Post-Secondary Education

Subject to available appropriations, an adult caretaker(s) who is enrolled in a training or post-secondary education program is eligible for CCCAP for at least one-hundred-four (104) weeks and up to two-hundred-eight (208) weeks per lifetime, provided all other eligibility requirements are met during the adult caretaker's enrollment. These weeks do not have to be used consecutively. A county may give priority for services to a working adult caretaker(s) over an adult caretaker(s) enrolled in post-secondary education or workforce training. When a teen parent becomes enrolled in post-secondary education, they are considered an adult caretaker and the time limited activity timelines apply.

~~Counties'~~ County child care staff may refer adult caretakers and teen parents to community employment and training resources for assistance in making a training and postsecondary education decision.

a. Adult caretaker educational programs include post-secondary education for a first bachelor's degree or less, or workforce/vocational/technical job skills training when offered as secondary education, which result in a diploma or certificate, for at least one-hundred-four (104) weeks and up to two-hundred-eight (208) weeks per lifetime. This is limited to coursework for the degree or certificate.

b. In addition to the weeks of assistance available for post-secondary and vocational or technical training, up to fifty-two (52) weeks of assistance is allowable for basic education.

c. Any week in which at least one (1) day is utilized for child care is considered one (1) week used toward the time limit.

H. Low-Income Eligibility Guidelines

1. Adult caretaker(s) or teen parent(s) gross income must not exceed eighty-five percent (85%) of the state median income.

a. Entry eligibility shall be set by the Department at a level based on the ~~self-sufficiency~~self-sufficiency standard, not to be set below one hundred eighty-five percent (185%) of the federal poverty level.

b. Exit income eligibility must be eighty-five percent (85%) of the state median income.

2. Effective October 1, ~~2022~~2023, monthly gross income levels, for one-hundred percent (100%) of the Federal Poverty Guideline (FPG), as well as eighty-five percent (85%) of State Median Income (SMI) for the corresponding household size are as follows:

Family Size	100% Federal Poverty Guideline (FPG)	85% State Median Income (SMI) (State and Federal Maximum Income Limit)
1	$~~1,132.50~~1,215.00	$~~4,080.62~~4,366.15
2	$~~1,525.83~~1,643.33	$~~5,336.19~~5,709.58
3	$~~1,919.17~~2,071.67	$~~6,591.77~~7,053.01
4	$~~2,312.50~~2,500.00	$~~7,847.34~~8,396.44
5	$~~2,705.83~~2,928.33	$~~9,102.92~~9,739.87
6	$~~3,099.17~~3,356.67	$~~10,358.49~~11,083.30
7	$~~3,492.50~~3,785.00	$~~10,593.91~~11,335.20
8	$~~3,885.83~~4,213.33	$~~10,829.33~~11,587.09
Each Additional person	$~~393.33~~428.33	$~~235.42~~251.89

3. Generally, the expected monthly income amount is based on the income received in the prior thirty (30) day period; except that, when the prior thirty (30) day period does not provide an accurate indication of anticipated income as referenced in the definition of "Income Eligibility" in rule section 3.103(JJJ) or under circumstances as specified below, a different period of time may be applicable:

a. For new or changed income, a period shorter than a month may be used to arrive at a projected monthly amount.

b. For contract employment in cases, such as in some school systems, where the employees derive their annual income in a period shorter than a year, the income shall be prorated over the term of the contract, provided that the income from the contract is not earned on an hourly or piecework basis.

c. For regularly received self-employment income, net earnings will usually be prorated and counted as received in a prior thirty (30) day period, except for farm income. For further information, see rule section 3.1105.1 (I)(3) on self-employment under countable earned income.

d. For all other cases where receipt of income is reasonably certain, but the monthly amount is expected to fluctuate, a period of up to twelve (12) months may be used to arrive at an average monthly amount.

e. For income from rental property to be considered as self-employment income, the adult caretaker(s) or teen parent(s) shall actively manage the property at least an average of twenty (20) hours per week. Income from rental property will be considered as unearned income if the adult caretaker(s) or teen parent(s) are not actively managing the property an average of at least twenty (20) hours per week. Rental income, as self-employment or as unearned income, may be averaged over a twelve (12) month period to determine monthly income. Income from jointly owned property shall be considered as a percentage at least equal to the percentage of ownership or, if receiving more than percentage of ownership, the actual amount received.

f. For cases where a change in the monthly income amount can be anticipated with reasonable certainty, such as with Social Security cost-of-living increases or other similar benefit increases, the expected amount shall be considered in arriving at countable monthly income for the month received.

g. Income inclusions and exclusions (rule sections 3.1105.1, (I) and& (J)) shall be used in income calculations.

h. Irregular child support income, not including lump sum payments, may be averaged over a period of time up to twelve (12) months in order to calculate household income.

i. Non-recurring lump sum payments, including lump sum child support payments, may be included as income in the month received or averaged over a twelve (12) month period, whichever is most beneficial for the clientrecipient.

4. Income Verification at Application and Re-determination

a. Earned Income

1) For ongoing employment, income received during the prior thirty (30) day period shall be used in determining eligibility unless, on a case-by-case basis, the prior thirty (30) day period does not provide an accurate indication of anticipated income, in which case, a county can require verification of up to twelve (12) of the most recent months of income to determine a monthly average. The adult caretaker(s) or teen parent(s) may also provide verification of up to twelve (12) of the most recent months of income if they choose to do so if such verification more accurately reflects a household's current income level.

2) For employment that has begun or changed within the last sixty (60) days, a new employment verification letter may be used.

3) For self-employment income the adult caretaker or teen parent shall submit documentation listing his/her income and work-related expenses

for the prior thirty (30) day period. On a case-by-case basis, if the prior thirty (30) day period does not provide an accurate indication of anticipated income, a county can require verification of up to twelve (12) of the most recent months of income and expenses to determine a monthly average. The adult caretaker(s) or teen parent(s) may also provide verification of up to twelve (12) of the most recent months of income and expenses if they choose to do so if such verification more accurately reflects a household's current income level. The county shall obtain verification of all expenses from the adult caretaker(s) or teen parent(s) or they will not be ~~allowed~~considered. The adult caretaker(s) or teen parent(s) shall submit documentation listing his/her income and work-related expenses to the county.

b. Unearned Income

Unearned income received during the prior thirty (30) day period shall be used in determining eligibility unless, on a case-by-case basis, the prior thirty (30) day period does not provide an accurate indication of anticipated income, in which case, a county can require verification of up to twelve (12) of the most recent months of income to determine a monthly average. The adult caretaker(s) or teen parent(s) may choose to also provide verification of up to twelve (12) of the most recent months of income if such verification more accurately reflects a household's current income level.

c. Adult caretakers or teen parents shall self-declare that their liquid and non-liquid assets do not exceed one million dollars. If assets exceed one million dollars the household is ineligible for CCCAP.

d. If written documentation is not available at time of eligibility determination, verbal verification from the employer or other person issuing the payment may be obtained. Counties shall document the verbal verification in the case file to include the date that the information was received, who provided the information, and a contact phone number.

e. If income is not verified

1) At application

a) If verifications are not returned within the fifteen (15) day noticing period the application will be denied.

b) If all verification has not been submitted within sixty (60) calendar-days of the application date then the county shall require a new application.

2) At re-determination, if all verifications are not received within the fifteen (15) day noticing period, the CCCAP case will be closed.

I. Income Inclusions

Each of ~~T~~the following are considered countable income and are taken into consideration for eligibility for child care.

1. Gross earnings, salary, armed forces pay (including but not limited to basic pay, basic assistance for housing (BAH) and basic assistance for subsistence (BAS), hazard duty

pay, and separation pay), commissions, tips, and cash bonuses are counted before deductions are made for taxes, bonds, pensions, union dues and similar deductions. If child care is provided for an employment activity, then gross wages divided by the number of hours worked shall equal at least the current federal minimum wage.

2. Taxable gross income (declared gross income minus verified business expenses from one's own business, professional enterprise, or partnership) from non-farm self-employment.

   a. These verified business expenses include, but are not limited to:

      1) The rent of business premises;

      2) Wholesale cost of merchandise;

      3) Utilities;

      4) Taxes;

      5) Mileage expense for business purposes only;

      6) Labor; and

      7) Upkeep of necessary equipment.

   b. The following are not allowed as business expenses from self-employment:

      1) Depreciation of equipment;

      2) The cost of and payment on the principal of loans for capital asset or durable goods; and

      3) Personal expenses such as personal income tax payments, lunches, and transportation to and from work.

   c. If child care is provided for a self-employment activity, then taxable gross wages divided by the number of hours worked shall equal at least the current federal minimum wage. To determine a valid monthly income taxable gross income may be averaged for a period of up to twelve (12) months.

3. Taxable gross income (gross receipts minus operating expenses from the operation of a farm by a person on ~~his~~ their own account, as an owner, renter, or tenant farming) from farm self-employment.

   a. Gross receipts include, but are not limited to:

      1) The value of all products sold;

      2) Government crop loans;

      3) Money received from the rental of farm equipment and/or farm land to others; and

      4) Incidental receipts from the sale of wood, sand, gravel, and similar items.

b. Operating expenses include, but are not limited to:

1) Cost of feed, fertilizer, seed, and other farming supplies;

2) Cash wages paid to farmhands;

3) Cash rent;

4) Interest on farm mortgages;

5) Farm building repairs; and

6) Farm taxes (not state and federal income taxes).; and

~~7) Similar expenses.~~

c. The value of fuel, food, or other farm products used for family living is not included as part of net income. If child care is provided for an employment activity, then taxable gross wages divided by the number of hours worked shall equal at least the current federal minimum wage. To determine a valid monthly income, taxable gross income may be averaged for a period of up to twelve (12) months. For all other cases where receipt of income is reasonably certain but the monthly amount is expected to fluctuate, a period of up to twelve (12) months shall be used to arrive at an average monthly amount.

4. An in-kind benefit is any gain or benefit received by the adult caretaker(s) or teen parent(s) as compensation for employment, which is not in the form of money such as meals, clothing, public housing, or produce from a garden. A dollar amount must be established for this benefit, and it must be counted as other income. The dollar amount is based on the cost or fair market value.

5. Vendor payments are money payments that are not payable directly to an adult caretaker or teen parent but are paid to a third party for a household expense and are countable when the person or organization making the payment on behalf of a household is using funds that otherwise would need to be paid to the adult caretaker(s) or teen parent(s) and are part of the compensation for employment.

6. Railroad retirement insurance

7. Veterans Payments

a. Retirement or pension payments paid by defense finance and accounting services (DFAS) to retired members of the Armed Forces;

b. Pension payments paid by the Veteran's Administration to disabled members of the Armed Forces or to survivors of deceased veterans;

c. Subsistence allowances paid to veterans through the GI bill. ~~F~~for education and on-the-job training; and

d. "Refunds" paid to veterans as GI insurance premiums.

8. Pensions and annuities (minus the amount deducted for penalties, if early payouts are received from these accounts)

a. Retirement benefit payments;

b. 401(k) payments;

c. IRA payments;

d. Pension payments; or

e. Any other payment from an account meant to provide for a retired person or their survivors.

9. Dividends

10. Interest on savings or bonds

11. Income from estates or trusts

12. Net rental income

13. Royalties

14. Dividends from stockholders

15. Memberships in association

16. Periodic receipts from estates or trust funds

17. Net income from rental of a house, store, or other property to others

18. Receipts from boarders or lodgers

19. Net royalties

20. Inheritance, gifts, and prizes

21. Proceeds of a life insurance policy, minus the amount expended by the beneficiary for the purpose of the insured individual's last illness and burial, which are not covered by other benefits

22. Proceeds of a health insurance policy or personal injury lawsuit to the extent that they exceed the amount to be expended or shall be expended for medical care

23. Strike benefits

24. Lease bonuses and royalties (e.g., oil and mineral)

25. Social Security pensions, survivor's benefits and permanent disability insurance payments made prior to deductions for medical insurance

26. Unemployment insurance benefits

27. Worker's compensation received for injuries incurred at work

28. Maintenance payments made by an ex-spouse as a result of dissolution of a marriage

29. Child support payments

30. Military allotments

31. Workforce innovation opportunity act (WIOA) wages earned in work experience or on the-job training

32. Earned AmeriCorps income includes government payments from agricultural stabilization and conservation service and wages of AmeriCorps volunteers in service to America (vista) workers. Vista payments are excluded if the client was receiving CCCAP when they joined vista. If the client was not receiving CCCAP when they joined vista, the vista payments shall count as earned income.

33. CARES payments – refugee payments from Refugee Services

J. Income Exclusions

Each of ~~T~~the following are not considered countable income and are not taken into consideration for eligibility for child care.

1. Earnings of a child in the household when not a teen parent

2. Supplemental Security Income (SSI) under Title XVI

3. Any payment made from the Agent Orange Settlement Fund, pursuant to P.L. No. 101201

4. Nutrition related public assistance

   a. The value of Food Assistance benefits (SNAP)

   b. Benefits received under title VII, Nutrition Program for the Elderly, of The Older Americans Act (42 U.S.C. 3030A)

   c. The value of supplemental food assistance received under the Special Food Services Program for Children provided for in the National School Lunch Act and under the Child Nutrition Act

   d. Benefits received from the Special Supplemental Food Program for Women, Infants and Children (WIC)

5. Payments received under Title II of the Uniform Relocation Assistance and Real Property Acquisition Policies Act

6. Experimental Housing Allowance Program (EHAP) payments made by HUD under Section 23 of the U.S. Housing Act

7. Payments made from Indian judgment funds and tribal funds held in trust by the Secretary of the Interior and/or distributed per capita

8. Distributions from a native corporation formed pursuant to the Alaska Native Claims Settlement Act (ANCSA)

9. Major disaster and emergency assistance provided to individuals and families, and comparable disaster assistance provided by states, local governments, and disaster assistance organizations

10. Payments received from the county or state for providing foster care, kinship care, or for an adoption subsidy

11. Payments to volunteers serving as foster grandparents, senior health aides, or senior companions, and to persons serving in the Service Corps of Retired Executives (SCORE) and Active Corps of Executives (ACE) and any other program under Title I (VISTA) when the value of all such payments adjusted to reflect the number of hours such volunteers are serving is not equivalent to or greater than the minimum wage, and Title II and III of the Domestic Volunteer Services Act

12. Low-Income Energy Assistance Program (LEAP) benefits

13. Social security benefit payments and the accrued amount thereof to a recipient when an individual plan for self-care and/or self-support has been developed

14. Earned Income Tax Credit (EIC) payments

15. Monies received pursuant to the "Civil Liberties Act of 1988," P.L. No. 100-383 (by eligible persons of Japanese ancestry or certain specified survivors, and certain eligible Aleuts)

16. Any grant or loan to any undergraduate student for educational purposes made or insured under any programs administered by the Commissioner of Education (Basic Educational Opportunity Grants, Supplementary Educational Opportunity Grants, National Direct Student Loans, and Guaranteed Student Loans); Pell Grant Program, the PLUS Program, the Byrd Honor Scholarship programs, and the College Work Study Program

17. Training allowances granted by Workforce Investment Act (WIA) to enable any individual, whether dependent child or caretaker relative, to participate in a training program are exempt

18. Payments received from the youth incentive entitlement pilot projects, the youth community conservation and improvement projects, and the youth employment and training programs under the Youth Employment and Demonstration Project Act

19. Any portion of educational loans, scholarships, and grants obtained and used under conditions that preclude their use for current living costs and that are earmarked for education

20. Financial assistance received under the Carl D. Perkins Vocational and Applied Technology Education Act that is made available for attendance costs. Attendance costs include: tuition, fees, rental or purchase of equipment, materials, supplies, transportation, dependent care and miscellaneous personal expenses

21. Any money received from the Radiation Exposure Compensation Trust Fund, pursuant to Public Law No. 101-426 as amended by Public Law No. 101-510

22. Resettlement and Placement (R & P) vendor payments for refugees

23. Supportive service payments under the Colorado Works Program

24. Home Care Allowance under adult categories of assistance

25. Loans from private individuals as well as commercial institutions

26. Public cash assistance grants including Old Age Pension (OAP), Aid to the Needy Disabled (AND), and Temporary Assistance to Needy Families (TANF)/Colorado Works

27. Reimbursements for expenses paid related to a settlement or lawsuit

28. Irregular income in the certification period that totals less than ninety dollars ($90) in any calendar quarter, such as slight fluctuations in regular monthly income and/or that which is received too infrequently or irregularly to be reasonably anticipated

29. Income received for participation in grant funded research studies on early childhood development

K. Income Adjustments

1. Verified court-ordered child support payments for children not living in the household shall be deducted prior to applying the monthly gross income to the maximum gross monthly income guidelines and when calculating parent fees. To qualify for the adjustment, the child support shall be:

   a. Court ordered and paid; and

   b. For a current monthly support order (not including arrears).

2. In order to be considered verified:

   a. There shall be verification that payments are court ordered and actually paid;

   b. Court ordered payments deducted shall be for current child support payments; and

   c. Such verification shall be made at the time of initial approval of eligibility for services and at the time of each re-determination of eligibility.

3.1105.2 ADULT CARETAKER OR TEEN PARENT RESPONSIBILITIES

A. Primary adult caretaker(s) or teen parent(s) ~~shall~~ must sign the application/re-determination form along with providing verification of income to determine eligibility.

B. Adult caretaker(s) or teen parent(s) agree~~s~~ to pay the parent fee listed on the child care authorization notice and understand~~s~~ that it is due to the child care provider in the month that care is received.

C. Adult caretaker(s) or teen parent(s) ~~have the responsibility to~~must report and verify changes to income in writing within ten (10) calendar days of the change, only if the household's income exceeds eighty-five percent (85%) of the State median income. Also, if the adult caretaker(s) or teen parent(s) ~~is~~ are no longer in their qualifying low-income eligible activity, this is considered to be a temporary cessation of activity and must be reported in writing within four (4) calendar weeks. This does not include a temporary break in low-income eligible activity such as a temporary job loss from the qualifying eligible activity or temporary change in participation in a training or education activity where the individual remains employed, self-employed, or enrolled in training or education. A temporary break includes but is not limited to:

1. Any interruption in work for a seasonal worker who is not working between regular industry work seasons;

2. Any temporary absence from low-income eligible activities including employment, self-employment, education, and/or training activity due to extended verified medical leave;

3. Any temporary absence from low-income eligible activities including employment, self-employment, education, and/or training activity due to verified maternity/paternity leave; or

4. Any temporary absence from an education or training activity due to holidays or scheduled breaks.

D. Adult caretaker(s) or teen parent(s) ~~shall~~ must provide the county department ~~with shall provide the county department with~~ a copy of their child's immunization record ~~to the county,~~ indicating that the child~~ren are~~ is age-appropriately immunized or have a religious or medical exemption~~,~~ for all children who receive child care from qualified exempt child care providers not related to the children, where care is provided outside of the child's home, and the children are not school age.~~; unless exempt due to religious or medical reasons~~ (see sections 25-4-902 and 25-4-908, C.R.S., for exemption requirements~~). If there child receives child care from a qualified exempt child care provider not related to the child(ren), where care is provided outside of the child's home and the child(ren) are not school age.~~

E. Adult caretaker(s) or teen parent(s) ~~shall~~ must report changes in child care providers prior to the change.

F. All adult caretaker(s) or teen parent(s) ~~shall~~ must provide verification of their schedule related to their low-income eligible activity only at application and/or re-determination when non-traditional care hours are requested.

G. The primary adult caretaker(s) or teen parent(s) must verify citizenship status, age, and identity of the child(ren) for whom care is requested, in accordance with rule section 3.11~~05.1(C)~~(2)(b). If the county determines that the adult caretaker or teen parent's declaration on the application or redetermination form is inconsistent, the adult caretaker or teen parent will be required to provide verification of what has been determined to be inconsistent.

H. When a child care case has closed and not more than thirty (30) days have passed from date of closure; the adult caretaker(s) or teen parent(s) may provide the verification needed to correct the reason for closure. If the household is determined to be eligible, services may resume as of the date the verification was received by the county, despite a gap in services. The adult caretaker(s) or teen parent(s) would be responsible for payment during the gap in service.

I. Adult caretaker(s) or teen parent(s) shall not share their individual attendance credentials with the child care provider at any time or they may be subject to disqualification per rule section 3.133~~15.4~~ (B).

J. Adult caretaker(s) or teen parent(s) ~~are required to~~must use the Attendance Tracking System (ATS) to check children in and out for the days of care authorized and attended unless the child care provider has been granted an exemption by the Department. Non-cooperation with the use of the ATS may result in case closure and/or non-payment of the child care ~~subsidy~~ benefits as defined by county policy.

3.11~~05.~~3 LOW-INCOME CHILD CARE RE-DETERMINATION

A. The re-determination process shall be conducted no earlier than every twelve (12) months. The ~~State~~Department-prescribed re-determination form ~~shall~~ must be mailed to households at least forty-five (45) calendar-days prior to the re-determination due date. Adult caretaker(s) or teen parent(s) ~~shall~~ must complete and return to Child Care staff by the re-determination due date. Adult caretaker(s) or teen parent(s) who do not return eligibility re-determination forms and all required verification may not be eligible for child care ~~subsidies~~benefits.

1. Employed and self-employed adult caretaker(s) or teen parent(s) shall submit documentation of the following:

a. Earned income

1) For ongoing employment, income received during the prior thirty (30) day period shall be used in determining eligibility unless, on a case-by-case basis, the prior thirty (30) day period does not provide an accurate indication of anticipated income, in which case, a county can require verification of up to twelve (12) of the most recent months of income to determine a monthly average. The adult caretaker(s) or teen parent(s) may also provide verification of up to twelve (12) of the most recent months of income if he/she chooses to do so if such verification more accurately reflects a household's current income level.

2) For employment that has begun or changed within the last sixty (60) days, a new employment verification letter may be used.

3) For self-employment income the adult caretaker or teen parent ~~shall~~ must submit documentation listing his/her income and verification of work-related expenses for the prior thirty (30) day period. On a case-by-case basis, if the prior thirty (30) day period does not provide an accurate indication of anticipated income, a county can require verification of up to twelve (12) of the most recent months of income and expenses to determine a monthly average. An adult caretaker or teen parent may also provide verification of up to twelve (12) of the most recent months of income and expenses if he/she chooses to do so if such verification more accurately reflects a household's current income level. All expenses shall be verified or they will not be allowed.

b. Unearned income received during the prior thirty (30) day period ~~shall~~ must be used in determining eligibility unless, on a case-by-case basis, the prior thirty (30) day period does not provide an accurate indication of anticipated income, in which case, a county can require verification of up to twelve (12) of the most recent months of income to determine a monthly average. The adult caretaker(s) or teen parent(s) may also provide verification of up to twelve (12) of the most recent months of income if he/she chooses to do so if such verification more accurately reflects a household's current income level.

c. All adult caretaker(s) or teen parent(s) ~~shall~~ must provide verification of their schedule related to their low-income eligible activity only at application and/or redetermination and only when non-traditional care hours are requested.

d. At application and re-determination, adult caretakers or teen parents ~~shall~~ must self-~~-~~declare that their liquid and non-liquid assets do not exceed one million dollars. If assets exceed one million dollars the household is ineligible for CCCAP.

2. Adult caretaker(s) or teen parent(s) in training ~~shall~~ must submit documentation from the training institution which verifies school schedule (only if reported at application or redetermination and non-traditional care hours are requested), and verifies current student status.

3. Adult caretaker(s) or teen parent(s) ~~shall~~ must provide the county department with up-to-date immunization records indicating age-appropriate immunizations or a religious or medical exemption age (see sections 25-4-902 and 25-4-908, C.R.S., for exemption requirements) for child(ren) who receive child care from qualified exempt child care providers not related to the child(ren), where care is provided outside of the child's home and the child(ren) are not school ~~age., unless exempt due to religious or medical reasons pursuant to sections 25-4-902 and 25-4-908, C.R.S.~~

4. If written documentation is not available at time of eligibility determination, verbal verification from collateral contacts such as the employer or other person issuing the payment may be obtained. Counties shall document the collateral contact verification in the case file to include the date that the information was received, who provided the information, and a contact phone number. Acceptable collateral contacts include but are not limited to:

   a. Employers;

   b. Landlords;

   c. Social/migrant service agencies; and~~,~~

   d. Medical providers who can be expected to provide accurate third party verification.

B. Parent fees shall be reviewed at re-determination. An adjusted parent fee will be based on an average of at least the past thirty (30) days gross income or a best estimate of anticipated income in the event of new employment. Unless, on a case-by-case basis, the prior thirty (30) day period does not provide an accurate indication of anticipated income, in which case a county can require evidence of up to twelve (12) of the most recent months of income. The adult caretaker(s) or teen parent(s) may also provide evidence of up to twelve (12) of the most recent months of income if they choose to do so if such evidence more accurately reflects the adult caretaker or teen parent's current income level. The fee change shall be effective the first full calendar month after the change is reported and verified, and timely written notice is provided.

C. For adult caretaker(s) or teen parent(s) whose children are enrolled in Head Start or Early Head Start, counties ~~shall~~ must extend re-determination of eligibility to annually coincide with the Head Start or Early Head Start program schedule. These households are still responsible for notifying the county of any changes that may impact eligibility.

3.1~~05.~~4 TERMINATION OF LOW-INCOME CHILD CARE SERVICES

A. County departments must terminate ~~C~~child care authorizations and cases ~~shall be terminated~~ during the eligibility period for any of the following eligibility ~~-~~related reasons:

1. Household income exceeds eighty-five percent (85%) of state median income as outlined in rule section 3.1~~05.~~1~~.~~(H)~~.~~(2) during eligibility period;

2. Adult caretaker(s) or teen parent(s) is no longer a resident of the state;

3. Adult caretaker(s) or teen parent(s) is not involved in a low-income eligible activity and their job search period has expired;

4. Adult caretaker(s) or teen parent(s) who are employed or self-employed and do not meet federal minimum wage requirements outlined in rule section 3.1105.1.(G) are not considered to be in a low-income eligible activity;

5. If the child has had twenty-two (22) or more unexplained absences from authorized care within a thirty (30) day period and two (2) failed documented attempts to contact the adult caretaker or teen parent have been made. The thirty (30) day period must account for temporary breaks or reported breaks in care; or

6. The adult caretaker(s) or teen parent(s) has been disqualified due to a founded Intentional Program Violation.

B. Child care authorizations and/or cases must be terminated for the following eligibility--related reasons at re-determination only:

1. Eligible child exceeds age limits;

2. Adult caretaker(s) or teen parent(s) did not pay parent fees, an acceptable payment schedule has not been worked out between the child care provider(s) and adult caretaker(s) or teen parent(s), or the adult caretaker(s) or teen parent(s) has/have not followed through with the payment schedule;

3. Adult caretaker(s) or teen parent(s) exceeds time limited low-income eligible activity time limits;

4. Adult caretaker(s) or teen parent(s) fails to comply with re-determination requirements;

5. Adult caretaker(s) or teen parent(s) is not participating in a low-income eligible activity;

6. Adult caretaker(s) or teen parent(s) has become a participant in Colorado Works;

7. Adult caretaker(s) or teen parent(s) did not submit required immunization records;

8. Adult caretaker(s) or teen parent(s) is/are no longer a resident of the county or state;

9. Adult caretaker(s) or teen parent(s) do not meet federal minimum wage requirement for employment or self-employment and are not considered to be in a low-income eligible activity;

10. Household income exceeds eighty-five percent (85%) of State median income as outlined in rule section 3.1105.1.(H).(1); or

11. If the child has had twenty-two (22) or more unexplained absences from authorized care within thirty (30) days of the re-determination date and two (2) failed documented attempts to contact the adult caretaker or teen parent have been made. The thirty (30) day period must account for temporary breaks or reported breaks in care.

C. Reason for termination must be documented on the ~~state~~ Department-prescribed closure form. A copy of the form must be ~~and~~ mailed via postal service;~~,~~ emailed or delivered by other electronic delivery systems; ~~or,~~ faxed; or hand-delivered to the primary adult caretaker or teen parent and to the child care provider.

D. Upon termination from the child care program, the adult caretaker(s) or teen parent(s) will have thirty (30) days from the effective date of closure to correct or provide the information without having to reapply for benefits. Upon correcting or providing the information, eligibility will continue as of the date the missing information was provided to the county. Parent fees will be based on the previous amount specified until prior notice is provided of changes to future parent fees.

E. Nothing in this rule section shall preclude an adult caretaker(s) or teen parent(s) from voluntarily withdrawing from the Low-Income program.

3.1150~~6~~ COLORADO WORKS CHILD CARE

A. Adult caretakers or teen parents who are approved for Colorado Works and are determined work eligible per Colorado Works rule (9 CCR 2503-6), incorporated by reference in rule section 3.103(BB) are eligible to receive Colorado Works Child Care for at least twelve (12) months unless the adult caretaker or teen parent has been determined eligible for transition to Low-Income Child Care prior to the end of the twelve (12) month period.

B. The ~~state~~Department-prescribed Colorado Works Child Care Referral Form shall be completed by the county Colorado Works worker and provided to the county child care technician to process in CHATS within five (5) business days of receipt and maintained in the child care case file as follows:

1. When a household is determined eligible for Colorado Works Child Care;

2. When there are changes in household composition;

3. To continue care beyond the end of each twelve (12) month period;

4. When a household is no longer eligible for Colorado Works, at which time the household shall be transitioned to Low-Income Child Care per rule section 3.1170~~6.2~~; and/or~~,~~

5. When a household's Colorado Works case is transitioned to another county.

C. Adult caretakers or teen parents that are not determined work eligible per Colorado Works rule (9 CCR 2503-6), incorporated by reference in rule section 3.103(BB), who are caring for children who are receiving basic cash assistance through the Colorado Works Program may be eligible for Low-Income Child Care if the adult caretaker or teen parent is not a part of the Colorado Works assistance unit~~;~~ and~~,~~ theyshe/~~he~~ meets all other low-income program criteria.

3.1160~~6.1~~ ELIGIBILITY FOR COLORADO WORKS CHILD CARE

A. Adult caretakers or teen parents that have been determined eligible for Colorado Works, have entered into a current individualized plan, are participating in allowable work activities as defined in Colorado Works rules (9 CCR 2503-6), incorporated by reference in rule section 3.103(BB), and have been referred for child care by the county Colorado Works worker ~~shall~~ will be considered to be participating in an eligible activity and ~~shall~~ must receive Colorado Works Child Care for at least twelve (12) months unless the adult caretaker or teen parent transitions to Low-Income Child Care prior to the end of the twelve (12) month period.

B. Colorado Works Child Care cases must be authorized for a minimum of twelve (12) months based on the child's need for care.

C. Upon receipt of a referral at the following times, ~~O~~only earned income that is reported and verified by the county Colorado Works worker will be considered countable income for Colorado Works Child Care cases ~~upon receipt of a referral at the following times~~:

1. When a household is initially determined eligible for Colorado Works Child Care; and/or~~,~~

2. When care is continued beyond the end of each twelve (12) month period.

D. The ~~C~~child care schedule shall be determined and shared by the county Colorado Works worker on the ~~state~~Department-prescribed Colorado Works Child Care Referral Form.

E. County residency shall be verified by the county Colorado Works Program.

F. Citizenship, age, and identity of the child(ren) for whom care is requested are verified by the county Colorado Works Program. The Colorado Works Child Care Referral serves as verification of citizenship, age, and identity, for CCCAP eligibility and the referral must be maintained in the child care case file.

G. ~~Immunization verification~~ Verification of immunization or religious or medical exemption (see sections 25-4-902 and 25-4-908, C.R.S., for exemption requirements) must be provided to the child care technician for child(ren) who receive child care from qualified exempt child care providers not related to the child(ren), where care is provided outside of the child's home and the child(ren) are not school age ~~must be provided to the child care technician~~. The immunization verification ~~and shall~~ must be maintained in the child care case file.

H. Counties that provide Colorado Works Child Care for households approved for Colorado Works state diversions require the same eligibility as outlined in this rule section~~above~~.

I. The county Colorado Works worker ~~shall~~ must notify the child care technician in writing of changes to the level of child care services. Decreases in child care services ~~shall~~ must only be acted upon if it is at the request of the adult caretaker or teen parent. If the county Colorado Works worker processes the child care case, written verification is not required but changes must be clearly documented in CHATS.

J. The adult caretaker or teen parent or the county Colorado Works worker must report ~~A~~a change in child care provider ~~shall be reported~~ to the child care technician ~~by the adult caretaker or teen parent or the county Colorado Works worker~~ prior to the change.

K. The county child care technician ~~shall~~ must advise adult caretaker(s) or teen parent(s) who are receiving Colorado Works Child Care of their responsibilities in writing via the Department's Client Responsibilities Agreement at the time of the initial referral.

L. If the adult caretaker or teen parent moves out of the county in which they are actively receiving Colorado Works Child Care during the twelve (12) month period:

1. The originating county child care staff shall notify the receiving county within ten (10) business days of being notified that the adult caretaker or teen parent has moved.

2. Upon receipt of notification from the originating county, the receiving county shall, at a minimum, initiate or maintain the Colorado Works Child Care case for the remainder of the twelve (12) month period ~~at a minimum~~.

3.11706.2 TRANSITION OFF COLORADO WORKS CHILD CARE

Counties shall transition households that are no longer eligible for the Colorado Works Program and are participating in a low-income eligible activity as defined in rule section 3.103(NN) to Low-Income Child Care without requiring the household to complete the low-income child care application. The household's eligibility shall be re-determined no earlier than twelve (12) months after the transition as outlined in rule section 3.1105.3.

A. A household that is no longer eligible for the Colorado Works Program shall not be automatically transitioned to Low-Income Child Care if any of the following conditions apply. ~~:~~If a household is not transitioned to Low-Income Child Care for any of the conditions below, the county shall provide timely written notice to the primary adult caretaker or teen parent.

1. The household is ineligible for the Colorado Works Program due to an Intentional Program Violation (IPV) as determined in Colorado Works rule (9 CCR 2503-6), incorporated by reference in rule section 3.103(BB); ~~or,~~

2. The household is ineligible for the Colorado Works Program and will be at an income level that exceeds eighty-five percent (85%) of the State Median Income (SMI) as outlined in rule section 3.1105.1~~.~~(H)~~.~~(1); or~~,~~

3. If the child has had twenty-two (22) or more unexplained absences from authorized care within the last thirty (30) days prior to the household being determined ineligible for Colorado Works and two (2) failed documented attempts to contact the adult caretaker or teen parent have been made within the thirty (30) day period.

~~4. If a household is not transitioned to Low-Income Child Care for the reasons outlined above, the county shall provide timely written notice.~~

B. Households shall be determined eligible to transition to Low-Income Child Care based on the information and verification that is provided to the child care technician by the county Colorado Works worker upon receipt of the ~~state~~Department-prescribed Colorado Works Child Care Referral Form. No additional verification shall be required until the household's twelve (12) month re-determination for Low-Income Child Care. Child citizenship status, age, and identity must not be re-verified at the time of the Low-Income Child Care re-determination if it was previously verified using the Colorado Works Child Care Referral Form.

C. If a household becomes ineligible for Colorado Works while in a low-income eligible activity other than job search as defined in rule section 3.103(NNN), the adult caretaker or teen parent shall be transitioned to Low-Income Child Care. The household's eligibility shall be re-determined no earlier than twelve (12) months after the transition as outlined in rule section 3.1105.3.

D. If a household becomes ineligible for Colorado Works while participating in a job search activity or is not in a low-income eligible activity as defined in rule section 3.103(OO), the adult caretaker or teen parent shall be transitioned to Low-Income Child Care and entered into the Low-Income Job Search activity ~~provided~~ for a minimum of thirteen (13) weeks ~~of job search~~.

E. If ~~an increase in household income is reported by~~ the county Colorado Works worker reports an increase in household income at the time of transition to Low-Income Child Care, the county child care technician shall document the income increase in case comments but shall not act upon the change until the household's twelve (12) month re-determination for Low-Income Child Care.

F. Parent fees for households that transition from Colorado Works to Low-Income Child Care must not be assessed higher than what was determined at the most recent Colorado Works Child Care referral. Parent fee revisions for child care during the twelve (12) month period may occur as outlined in rule section 3.12411(B).

G. Households that transition from Colorado Works to Low-Income Child Care must be authorized for a minimum of twelve (12) months based on the child's need for care as long as the family remains eligible for the Low-Income Child Care program.

H. Households that transition from Colorado Works to Low-Income Child Care are subject to the Low-Income Child Care ~~rule~~ requirements outlined in rule section 3.1105.

I. County child care staff shall advise adult caretaker(s) or teen parent(s) that are transitioned from Colorado Works to Low-Income Child Care of their responsibilities in writing via the Department's Client Responsibilities Agreement at the time of transition.

~~J. If a household is not transitioned from Colorado Works to Low-Income Child Care, the county shall provide a fifteen (15) day notice.~~

~~K~~J. If at any time after being transitioned onto Low-Income Child Care the household is determined eligible for Colorado Works, re-enters into a current individualized plan, and is participating in an allowable work activity as defined in Colorado Works rule (9 CCR 2503-6), incorporated by reference in rule section 3.103(BB), the household shall be transitioned back onto Colorado Works Child Care upon receipt of the Colorado Works Child Care Referral Form.

3.118~~07~~ PROTECTIVE SERVICES CHILD CARE

A. Protective services households refers to households in which child(ren) have been placed by the county in foster home care, kinship foster home care, or non-certified kinship care, and have an open child welfare case. At the option of the county, the county may provide protective services child care utilizing Child Care Development Funds (CCDF) rather than Child Welfare funds.

B. The county worker must authorize ~~P~~protective services cases ~~must be authorized~~ for a minimum of twelve (12) months ~~by the county worker~~ based on the child's need for care ~~due to~~and the funding source.

C. Protective services child care is not twenty-four (24) hour care.

D. Child care services for school-age children during regular school hours shall be different from, and cannot be substituted for, educational services that school districts are required to provide under the Colorado Exceptional Children's Educational Act.

~~D~~E. The ~~state~~Department-approved Protective Services Child Care Referral Form shall be completed by the county Child Welfare worker and provided to the county child care technician to process in CHATS within five (5) business days of receipt and maintained in the child care case file when any of the following occur:

1. A household is determined eligible for Protective Services Child Care;

2. There are changes in household composition that affect eligibility or the need for Protective Services Child Care;

3. There are changes in the child care schedule;

4. To continue care; or~~,~~

5. A household is no longer eligible for or in need of Protective Services Child Care.

3.119~~07.1~~ ELIGIBILITY FOR PROTECTIVE SERVICES HOUSEHOLDS (COUNTY OPTION)

A. Protective services households are considered ~~to be~~ a household of one for purposes of determining income eligibility. The only countable income for a protective services household is the income that is received by the child(ren) that have been placed in kinship or foster care. Child support income shall not be included as income. Child support income is intercepted by the county child welfare department.

B. Protective services households shall be allowed up to sixty (60) days to provide verification of the child(ren)'s income.

C. As determined by the Child Welfare worker, the income requirement for protective services households may be waived on a case-~~-~~by-~~-~~case basis. If the income requirement is waived, it must be documented in the child care case file.

D. Protective services households are not subject to low-income eligible activity requirements.

E. Protective services households are not subject to residency verification requirements. The county with the open child welfare case shall be considered the county of residency.

F. Citizenship, age, and identity shall be verified by the Child Welfare worker. The signed Protective Services Child Care Referral serves as verification of citizenship, age, and identity and must be maintained in the child care case file. If the Child Welfare worker is unable to attest to having verified the child's citizenship status, age, and/or identity at the time of referral:

1. Protective services households must be allowed up to six (6) months to provide verification of the child(ren)'s U.S. citizenship status and age;

2. Protective services households must be allowed up to six (6) months to provide verification of the child(ren)'s identity; and,

3. If the Child Welfare worker cannot verify and attest to the child's citizenship status, age, or identity within six (6) months of the referral, the county must not provide child care services for the child(ren) through the use of Protective Services Child Care.

G. Protective services households must be allowed up to sixty (60) days to provide verification of immunization or religious or medical exemption (see sections 25-4-902 and 25-4-908, C.R.S., for exemption requirements) if child care is provided by a qualified exempt child care provider not related to the child where care is provided outside of the home.

H. If the child(ren) on the Protective Services Child Care case receives care from a licensed child care provider, the county may reimburse the child care provider for additional absences and/or holidays beyond what would be paid for a Low-Income, Colorado Works, or Child Welfare Child Care case. The number of additional absences shall be paid in accordance with the Protective Services Child Care policy set by the county and approved by the ~~State~~ Department.

3.12~~008~~ CHILD WELFARE CHILD CARE

A. Child Welfare Child Care is used as a temporary service to maintain children in their own homes or in the least restrictive out-of-home care setting when there are no other child care options available. This may include parents, non-certified kinship care, kinship foster care homes, and foster care homes.

B. Child Welfare Child Care is not twenty-four (24) hour care.

C. Child care services for school-age children during regular school hours shall be different from, and cannot be substituted for, educational services that school districts are required to provide under the Colorado Exceptional Children's Educational Act.

~~C~~D. Eligibility for Child Welfare Child Care is determined on a case-by-case basis by the Child Welfare division using the criteria outlined in Colorado Department of Human Services rules at 12 CCR 2509-4, rule section~~s~~ 7.302 (July 31, 2023), herein incorporated by reference. No later editions or amendments are incorporated. These regulations are available at no cost from the

Colorado Department of Human Services, 1575 Sherman St., Denver, Colorado 80203, or at https://www.sos.state.co.us/ccr. These regulations are also available for inspection and copying at the Colorado Department of Early Childhood, 710 S. Ash Street, Bldg. C, Denver, Colorado 80246, during regular business hours.

~~D~~E. Child Welfare Child Care households are not subject to residency verification requirements. The county with the open child welfare case shall be considered the county of residency.

~~E~~F. The county shall not provide Child Welfare Child Care utilizing the Child Care Development Fund ~~CCDF~~.

3.12~~09~~10 ELIGIBILITY FOR FAMILIES EXPERIENCING HOMELESSNESS

A. Households shall meet the definition of families experiencing homelessness in rule section 3.103(XX), above.

B. Households that meet the definition of "families experiencing homelessness" ~~shall~~ must be provided a child care authorization during a stabilization period of at least sixty (60) consecutive calendar days, within a twelve (12) month period, to allow the household the opportunity to submit verification for ongoing child care ~~subsidies~~benefits.

1. If verifications necessary to determine ongoing eligibility are received by the county within the stabilization period, the household will continue to receive subsidized child care. If verifications necessary to determine ongoing eligibility are not received by the county within the stabilization period, the household will be determined ineligible and given timely written notice of ~~proper~~ adverse action ~~notice~~.

2. Subsidized care provided during the stabilization period is considered non-recoverable by the county unless fraud has been established.

3. Eligible activity

   a. The adult caretaker(s) or teen parent(s) is not required to participate in a low-income eligible activity during the stabilization period.

   b. If the adult caretaker(s) or teen parent(s) is participating in a low-income eligible activity, they will have at least sixty (60) days to provide necessary verification.

4. Residency

   a. The adult caretaker(s) or teen parent(s) shall self-declare residency during the stabilization period by providing the location they are temporarily residing. Counties shall identify the zip code of this location in CHATS.

   b. The adult caretaker(s) or teen parent(s) may provide a mailing address or the county shall use general delivery or the county office address for client correspondence.

5. The adult caretaker(s) or teen parent(s) may self-declare citizenship, age, and identity of the child(ren) during the stabilization period.

   a. A child's citizenship status, age, and identity are considered ~~to be~~ verified at the end of the stabilization period if the complete application includes the child's age and citizenship status and is signed attesting to the child's identity unless the

county determines that the declaration of citizenship, age, and/or identity is inconsistent.

b. The county must request additional verification at the end of the stabilization period if the adult caretaker or teen parent's declaration is determined to be inconsistent based on the following guidelines:

1) ~~i~~If the claim of citizenship, age, and/or identity is inconsistent with statements made by the adult caretaker or teen parent, or with other information on the application, or on previous applications;

2) ~~i~~If the claim of citizenship, age, and/or identity is inconsistent with the documentation provided by the adult caretaker or teen parent; and/or,

3) ~~i~~If the claim of citizenship, age, and/or identity was previously received from another source such as another public assistance program including Colorado Works, the Supplemental Nutrition Assistance Program (SNAP), or Medicaid, and the claim is inconsistent with the information previously received from that source.

6. If child care is provided by a qualified exempt child care provider not related to the child where care is provided outside of the home, the requirement to provide the county with verification of immunization status shall not be required during the stabilization period.

~~3.110~~ CHILD CARE ASSISTANCE PROGRAM WAIT LISTS AND ENROLLMENT FREEZES

3.122~~10.1~~ WAIT LISTS

A. A county may apply to the ~~state~~ Department to implement a wait list when:

1. ~~State~~Department-generated projections indicate that a county's allocation will be at least eighty-five percent (85%) expended by the end of the fiscal year; or~~,~~

2. A county is able to demonstrate a fiscal need that includes factors that are not accounted for in the ~~state~~Department-generated projections for county CCAP expenditures, such as, but not limited to, drastic economic changes.

B. Once approved, counties shall maintain a current and accurate wait list in CHATS of adult caretakers and teen parents who have applied for the CCCAP program.

1. Counties shall require families to complete a Low-Income Child Care application in its entirety and enroll eligible adult caretakers and teen parents from wait lists according to the following ~~state~~ Department-defined target populations:

a. Households whose income is at or below 130% of the current federal poverty ~~guidelines~~level;

b. Children with additional care needs; and~~,~~

c. Families experiencing homelessness.

2. Counties may prioritize enrollment for teen parents or other segments of populations that are defined by the county based on local needs.

3.123~~10.2~~ ENROLLMENT FREEZES

A. A county may apply to the ~~state~~ Department to implement a freeze when:

1. ~~State~~Department-generated projections indicate that a county's allocation will be at least ninety-five percent (95%) expended by the end of the fiscal year; or~~,~~

2. A county is able to demonstrate a fiscal need that includes factors that are not accounted for in the ~~state~~Department-generated projections for county CCCAP expenditures, such as, but not limited to, drastic economic changes.

B. Counties that have been approved to implement a freeze shall add adult caretakers and teen parents into CHATS if they are likely to be found eligible based on self-reported income and job, education, job search, or workforce training activity. Counties shall require an applicant to restate ~~his or her~~their intention to be kept on the freeze every six (6) months in order to maintain ~~his or her~~their place on the list.

1. Counties shall enroll eligible adult caretakers and teen parents once a freeze is lifted according to the following ~~state~~ Department-defined target populations:

a. Households whose income is at or below 130% of the current federal poverty ~~guidelines~~level;

b. Children with additional care needs; and~~,~~

c. Families experiencing homelessness.

2. Once a freeze is lifted, counties may prioritize enrollment for teen parents or other segments of populations that are defined by the county based on local needs.

3.12~~4~~11 PARENT FEES

A. Parent fees are based on gross countable income for the child care household compared to the household size, taking ~~and in consideration of~~ the number of children in care into account. Parent fees ~~are to~~must be calculated in whole dollars by dropping the cents. Counties must provide ~~Notice~~ provide ~~families of~~ with written notice of their parent fee at the time of Colorado Works Child Care referral; low-income application or re-determination; or when a reduction/increase of household parent fee occurs.

B. Parent fee revisions for Low-Income and Colorado Works Child Care during the twelve (12) month eligibility period may occur ~~when~~under the below circumstances. Increases in parent fees beyond what is outlined in rule subsections (1)-(4) below shall only go into effect at Low-Income Child Care re-determination or at the end of the twelve (12) month Colorado Works Child Care period.~~:~~

1. The adult caretaker or teen parent, who was initially determined eligible with countable income, regains income after a temporary loss of income;

2. A change has been reported that results in a decrease in ~~household~~ the parent fee for the household;

3. There is an increase or decrease in the amount of care that is authorized and the increase in authorization is not due to the addition of a household member;

4. The household begins or ceases utilization of care at a high-quality child care provider; or

5. ~~Increases in parent fees beyond what is outlined in numbers (1) (4) of this rule subsection shall only go into effect at Low-Income Child Care re-determination or at the end of the twelve (12) month Colorado Works Child Care period~~.

C. During the twelve (12) month eligibility period the household parent fee ~~may~~ cannot be assessed higher than ~~what was~~the parent fee determined at the most recent Colorado Works Child Care referral or low-income application or re-determination.

D. Parent fees for Low-Income Child Care cases ~~shall~~ must be reviewed at re-determination. An adjusted parent fee will be based on an average of at least the past thirty (30) days gross income or a best estimate of anticipated income in the event of new employment or a change in the adult caretaker(s)' or teen parent(s)' regular monthly income. Unless, on a case-by-case basis, the prior thirty (30) day period does not provide an accurate indication of anticipated income, in which case a county can require evidence of up to twelve (12) of the most recent months of income. The adult caretaker(s) or teen parent(s) may also provide evidence of up to twelve (12) of the most recent months of income if they choose to do so if such evidence more accurately reflects the adult caretaker's current income level. Income may be divided by a weekly amount then multiplied by 4.33 to arrive at a monthly average for parent fee calculations.

E. Colorado Works households in a paid employment activity shall pay parent fees based on gross countable income as verified and shared by the local Colorado Works program.

F. Parent fees for Colorado Works Child Care cases shall be reviewed at the end of the household's twelve (12) month eligibility period. An adjusted parent fee shall be based on gross countable income as verified and shared by the local Colorado Works Program.

G. ~~As defined by county policy, a~~A county may waive the parent fee for a Low-Income or Colorado Works Child Care household that has a child that is dually enrolled in a Head Start or Early Head Start Program.

H. For a Low-Income or Colorado Works Child Care household utilizing a child care provider in the top three levels of the Department's quality rating system, the parent fee shall be reduced by twenty percent (20%) of the regularly calculated parent fee. For households utilizing multiple child care providers, only one child care provider is required to be in the top three quality levels for the reduced parent fee to apply.

I. All adult caretaker~~(s)~~ and teen parents are required to pay the parent fee as determined by the formula listed in rule section 3.12~~4~~11 (P), except in the following cases:

1. When ~~O~~one or two teen parent households who are in middle/junior high, high school, GED, or vocational/technical training activity and ~~for whom~~ payment of a fee produces a hardship, the parent fee may be waived entirely and documented in the case file. The parent fee waiver shall be reviewed during each re-determination.

2. The Low-Income or Colorado Works Child Care household is eligible for a reduced parent fee based on the quality level of the child care provider.

3. Colorado Works households where the adult caretaker or teen parent has entered into a current individualized plan and is participating in an allowable work activity as defined in Colorado Works rule (9 CCR 2503-6), incorporated by reference in rule section 3.103(BB), above, other than paid employment, shall not have a parent fee.

4. Child Welfare Child Care households as defined in the Social Services rule manual, rule section ~~7.000.5~~7.302 (12 CCR 2509-~~4~~1), incorporated by reference in rule section 3.103 (X), above, shall not have a parent fee.

5. Families Experiencing Homelessness as defined in rule section 3.12109 shall not have a parent fee during the stabilization period.

6. Protective service households as defined in rule section 3.11807 shall not have a parent fee unless the child(ren) has countable income.

7. Families that have no income shall have no parent fee.

8. Effective April 1, 2020, parent fees, as assessed by the parent fee formula, may be waived in the event of a declared state or local disaster or emergency for up to twelve (12) months for households impacted by such disaster or emergency. The county shall document the decision to waive the parent fee and the amount of time the parent fee will be waived in the case record in the Child Care Automated Tracking System (CHATS).

J. The initial or revised parent fee shall be effective the first full calendar month after the end of the timely written notice period unless the revision results in a decrease to the parent fee. A parent fee shall not be assessed or changed retroactively unless in the event of an emergency or disaster as outlined in rule section 3.12411 (H)(8), and, under those circumstances a county may only retroactively waive the parent fee to the beginning of the current month.

K. The fee must be paid in the month that care is received and shall be paid by the parent directly to the child care provider(s). Parent fees are used as the first dollars paid for care. The counties or their designee shall not be liable for the fee payment.

L. When more than one child care provider is being used by the same household, child care staff shall designate to whom the adult caretaker(s) or teen parent(s) pays a fee or in what proportion the fee shall be split between child care providers. The full parent fee shall be paid each month, but parent fees shall not exceed the reimbursement rate by CCCAP. The adult caretaker(s) or teen parent(s) shall determine if it is most beneficial to close their CCCAP case if the parent fee exceeds the cost of care.

M. Adult caretakers or teen parents will be informed of their responsibilities related to fee payment on their signed application form or via the Client Responsibilities Agreement that is provided to them at the initial Colorado Works referral or at the time of transition from Colorado Works to Low-Income Child Care.

N. Loss of eligibility for child care subsidies benefits may occur at re-determination or at the end of the twelve (12) month Colorado Works Child Care Period if the adult caretaker(s) or teen parents do not pay their parent fees; do not make acceptable payment arrangements with the child care providers; or, do not follow through with the arrangements during the twelve (12) month eligibility period. Notice of termination for such loss of eligibility shall be given in accordance with rule section 3.1105.4. Child care providers shall report nonpayment of parent fees no later than sixty (60) calendar-days after the end of the month following the month the parent fees are due unless county policy requires it earlier. If a household's benefits are terminated at re-determination for non-payment of parent fees, that household will remain ineligible until:

1. Delinquent parent fees are paid in full;

2. Adequate payment arrangements are made with the child care provider to whom the fees are owed and an agreement is signed by both parties; or

3. County determination of verified good faith efforts to make payment to the child care provider(s), when the client was unable to locate the child care provider(s).

O. The adult caretaker(s) or teen parent(s) and child care provider(s) shall be given timely written notice of the parent fee amount, on the child care notice of authorization, at least fifteen (15) calendar-days prior to the first of the month the parent fee is effective.

P. Beginning July 1, 2021, through September 30, 2024, the county must assess parent fees based upon a marginal rate increase of fourteen percent (14%) for every dollar of gross countable household income above one hundred percent (100%) of the federal poverty guidelines (FPG) outlined in rule section 3.1105.1 (H)(2).

1. The county must assess a parent fee of one percent (1%) of gross income to eligible households with gross income that is at or below one hundred percent (100%) of the FPG.

2. For eligible households with gross income that is above one hundred percent (100%) of the FPG, the county must assess a parent fee at one percent (1%) of their income plus a marginal rate increase of fourteen percent (14%) for every dollar of gross countable household income above one hundred percent (100%) of the FPG.

3. An additional fifteen dollar ($15) fee shall be added to the parent fee for each additional child when households are requesting care for more than one (1) child and have income above one hundred percent (100%) of the FPG. If care is only requested for one (1) child, the additional fifteen dollar ($15) fee does not apply.

Q. Counties shall use the FPG and state median income limit as defined in rule section 3.1105.1 (H) (2). Counties shall update parent fees at the next scheduled re-determination according to the parent fee formula table outlined in rule section 3.12411 (P), in effect on the date of redetermination.

R. Parent fees, as assessed by the parent fee formula, may be reduced to five dollars ($5) for hardship reasons for up to six (6) months per hardship award. The county director or his/her designee shall approve fee reductions and a written justification placed in the case file and noted in the case record in the Child Care Automated Tracking System (CHATS). Any hardship award may be extended so long as justification for extending the hardship award exists.

S. The Department shall notify counties at the beginning of each federal fiscal year of the current FPG and State Median Income limit as outlined in rule section 3.1105.1 (H) (2). Counties shall update parent fees at the next scheduled re-determination or at the end of the twelve (12) month Colorado Works Child Care Period.

T. When all children in a household are in part-time care, the parent fee shall be assessed at fifty-five percent (55%) of the above-calculated fee. Part-time care is defined as an average of less than thirteen (13) full-time equivalent units of care per month.

U. When parent fees fluctuate between part-time and full-time, due to the authorized care schedule, the parent fee should be assessed at the lower rate if the majority of the months in the twelve (12) month eligibility period calculate to part-time care.

V. Children enrolled in grades one (1) through twelve (12) that are authorized for part-time care during the school year must have a part-time parent fee.

W. One or two teen parent households for whom payment of a parent fee produces a hardship may have their fee waived entirely. The parent fee waiver shall be documented in the case file and reviewed during each subsequent re-determination.

3.12512 COUNTY RESPONSIBILITIES

A. Counties shall administer CCCAP in compliance with Department fiscal and program regulations and in accordance with the terms associated with their allocation. Counties will be allocated child care funds annually.

B. Counties or their designee shall establish administrative controls to ensure appropriate internal controls and separation of duties (this means that the same employee shall not authorize and process payment for child care services). If these administrative controls create a hardship for the county, the county shall submit a waiver request and an internal county policy to the Department for approval. In no event will the Department approve a waiver of controls specified in federal or state statute or regulation/rule.

C. Counties must use the forms required by the Department. Counties may add additional language to ~~state~~ Department forms but shall not remove language. This does not include the Low-Income Child Care application or re-determination. All changes to Department forms shall be submitted to and approved by the Department prior to use.

D. Counties shall respond to requests from the Department within two (2) business days.

E. Counties shall make reasonable efforts to advise county residents of services available to target groups through press releases, presentations, pamphlets, and other mass media.

F. Counties must use CHATS to administer CCCAP. Counties who do not use CHATS as prescribed by the Department may not be reimbursed.

G. Counties shall establish controls over which county staff have the authority to override eligibility in CHATS. All overrides of eligibility shall be accompanied by documentation in CHATS.

H. Counties must document in CHATS actions and contacts made under the appropriate comment screen, within two (2) business days of case action or contact.

I. Counties must code child care expenditures to the appropriate program, as prescribed by the Department. Failure to do so may result in non-reimbursement or other actions as deemed appropriate by the Department.

J. Counties shall monitor expenditures of Child Care funds and may suspend enrollments, as necessary, to prevent over-expenditures in child care. “Reimbursable expenditures” are supported in whole or in part by the State General Fund, Federal (pass through) money, or a combination of State and Federal money.

K. Counties shall be responsible for the provision of a safe place for storage of case records and other confidential material to prevent disclosure by accident or as a result of unauthorized persons other than those involved in the administration of the CCCAP program. Data of any form shall be retained for the current year, plus the three (3) ~~previous~~ immediately preceding years, unless:

1. A statute, rule or regulation, or generally applicable policy issued by a county, state or federal agency that requires a longer retention period; or~~,~~

2. There has been a recovery, audit, negotiation, litigation or other action started before the expiration of the three (3) ~~-~~year period.

3. If a county shares building space with other county offices, it shall use locked files to store case material and instruct facility and other maintenance personnel concerning the confidential nature of information.

L. Counties shall post eligibility, authorization, and administration policies and procedures so they are easily accessible and readable to the layperson. The policies shall be sent to the Department for compilation.

M. Counties shall provide consumer education to adult caretakers, teen parents, child care providers and the general public as required by the Department including but not limited to:

1. Information on all available types of child care providers in the community: centers, family child care homes, qualified exempt child care providers and in-home child care.

2. Information regarding voter registration.

3. Information on family support services including but not limited to:

a. Colorado Works;

b. Head Start and Early Head Start;

c. Low-Income Energy Assistance Program (LEAP);

d. Food Assistance program (SNAP);

e. Women, Infants and Children (WIC) program;

f. Child and Adult Care Food program (CACFP);

g. Medicaid And State Children's Health Insurance Program;

h. Housing Information;

i. Individuals with Disabilities Education Act (IDEA) programs and services; and

j. Child Support Services.

4. Counties shall also provide information and referrals to services under early and periodic screening, diagnosis, and treatment (EPSDT) under Medicaid and Part C of IDEA 34 CFR Part 300 (April 2023). Herein incorporated by reference. No later editions or amendments are incorporated. These regulations are available at no cost from the U.S. Department of Education, 400 Maryland Avenue, SW, Washington, D.C. 20202, or at https://www.ecfr.gov. These regulations are also available for inspection and copying at the Colorado Department of Early Childhood, 710 S. Ash Street, Bldg. C, Denver, Colorado 80246, during regular business hours.

5. Counties shall collect information on adult caretaker(s) or teen parent(s) receiving programs services listed in rule section 3.1~~25~~12, (M), (3)-(4) via the Low-Income Child Care application and shall enter the information into CHATS for reporting purposes.

N. Once determined eligible for Low-Income Child Care, households should remain eligible for a minimum of twelve (12) months. Counties shall not discontinue child care services prior to a household's next eligibility re-determination unless:

1. The household's income exceeds eighty-five percent (85%) of the State Median Income;

2. The adult caretaker(s) or teen parent(s) is no longer in a qualifying low-income eligible activity for the reasons that do not constitute a temporary break as defined in rule section 3.1105.2.(C);

3. The adult caretaker(s) or teen parent(s) no longer reside(s) in the state;

4. The adult caretaker(s) or teen parent(s) who are employed or self-employed and do not meet federal minimum wage requirements outlined in rule section 3.1105.1.(G) are not considered to be in a low-income eligible activity;

5. If the child has had twenty-two (22) or more unexplained absences from authorized care within a thirty (30) day period and two (2) failed documented attempts to contact the adult caretaker or teen parent have been made. The thirty (30) day period must account for temporary breaks or reported breaks in care; or

6. The adult caretaker(s) or teen parent(s) has been disqualified due to a founded Intentional Program Violation.

O. Counties shall provide written wait list and freeze policies to the Department for review and approval at the time of county plan submission. Approved county CCCAP plans can be found on the Colorado Department of Early Childhood website at https://cdec.colorado.gov/colorado-child-care-assistance-program-for-families

P. Counties shall maintain a current and accurate wait list in CHATS of adult caretakers and teen parents who have applied for the CCCAP program.

Q. Counties shall review current applications for completeness, approve or deny the application, and provide timely written notice to the adult caretaker(s) or teen parent(s) of approval, or of missing verifications, no more than fifteen (15) calendar-days from the date the application was received by the county. Applications are valid for a period of sixty (60) calendar-days from the application date.

1. If verifications are not received within the fifteen (15) day noticing period the application will be denied.

2. If verification is received within sixty (60) calendar-days of the application date, counties will determine eligibility from the date the current verification was received if the eligibility criteria ~~is~~ are met.

3. If verification has not been completely submitted within sixty (60) calendar-days of the application date then the county shall require a new application.

R. Upon review of an application that was directed to the wrong county of residence, the receiving county shall forward the application and any verification within one (1) business day to the correct county. The county shall provide notification to the adult caretaker(s) or teen parent(s) that their application has been forwarded to the correct county.

S. Counties may access information already available on file or through system interfaces from other assistance programs within their county to use in child care eligibility determination at application and/or re-determination. Counties shall place a copy of this verification in the case file and/or make a notation in CHATS regarding the verification as appropriate.

T. Counties shall obtain verification immunization record to the county, indicating that the children are age-appropriately immunized or have a religious or medical exemption (see sections 25-4-902 and 25-4-908, C.R.S., for exemption requirements)~~immunization records~~ for children who

receive child care from qualified exempt child care providers not related to the child(ren), where care is provided outside of the child's home, and the child(ren) are not school age at application and re-determination.

U. Counties are encouraged to use collateral contact whenever possible to verify information needed to determine eligibility, not including citizenship, age, and identity.

V. Counties must use preponderance of evidence when verifying a child's citizenship status, age, and identity at application and/or re-determination, only requiring additional verification if the adult caretaker or teen parent's declaration is inconsistent according to the following guidelines:

1. If the claim of citizenship, age, and/or identity is inconsistent with statements made by the adult caretaker or teen parent, or with other information on the application/redetermination, or on previous applications/re-determinations;

2. If the claim of citizenship, age, and/or identity is inconsistent with the documentation provided by the adult caretaker or teen parent; and/or

3. If the claim of citizenship, age, and/or identity was previously received from another source such as another public assistance program including Colorado Works, the Supplemental Nutrition Assistance Program (SNAP), or Medicaid, and the claim is inconsistent with the information previously received from that source.

W. Counties shall not require Social Security Numbers or cards for household members who apply for child care assistance.

X. Counties must use the prudent person principle (PPP) to benefit families and child care providers when determining eligibility, authorizing care, entering into a fiscal agreement, and reimbursing child care providers for care that was not automatically processed through ~~chats~~CHATS. An explanation of why and how the county used PPP must be documented in the appropriate notes section(s) of CHATS.

Y. Counties or their designee shall verify the residence of any adult caretaker(s) or teen parent(s) receiving or applying for Low-Income Child Care assistance to ensure that they live in the county where they are applying for assistance at the time of application or re-determination. For families experiencing homelessness, refer to rule section 3.12109.

1. Verification of address may include but is not limited to:

a. Rent receipt/lease;

b. Mortgage statement;

c. Utility or other bill mailed no more than two (2) months previously;

d. Voter registration;

e. Automobile registration;

f. A statement from the person who leases/owns the property;

g. Documentation from schools such as verification of enrollment, report card, or official transcript mailed no more than two (2) months previously;

h. Official correspondence from any other government agency (e.g., IRS) mailed within the past two (2) months;

i. A statement from another department in your agency if they have verified the residence (e.g., Child Welfare, collateral contact); or

j. Paycheck stub received within the past two months.

2. If the county of residence is questionable, a secondary means of verification may be requested such as but not limited to:

a. Records from the local county clerk and recorder's office; or

b. Records from the local county assessor's office.

Z. County child care staff shall advise low-income adult caretaker(s) or teen parent(s) of their responsibilities in writing at application and re-determination. Information that adult caretaker(s) or teen parent(s) must report during the twelve (12) month eligibility period as follows:

1. Changes to income, if the household's income exceeds eighty-five percent (85%) of the State median income shall be reported within ten (10) calendar-days of the change.

2. Changes to an adult caretaker(s) or teen parent's qualifying low-income eligible activity, which does not qualify as a temporary break as defined in rule section 3.1105.2.(C), must be reported within four (4) calendar weeks.

AA. Counties shall process any reported change and/or required verification within ten (10) calendar days of receiving the information using the following guidelines:

1. Changes reported during the twelve (12) month low-income eligibility period requiring immediate action:

a. Changes to income, if the household's income exceeds eighty-five percent (85%) of the state median income;

b. Changes to an adult caretaker or teen parent's qualifying low-income eligibility activity, which does not qualify as a temporary break as defined in rule section 3.1105.2.(C);

c. Changes in parent fee per rule section 3.12111

d. Changes in state residency; and

e. Changes that are beneficial to the household such as, but not limited to:

1) An increase in authorized care;

2) A change of child care provider;

3) Change in household composition due to an additional child requesting care; and

4) Change in mailing address.

2. Changes outside of the above guidelines should be documented in CHATS but shall not be acted upon until the adult caretaker or teen parent's re-determination.

BB. If the adult caretaker(s) or teen parent(s) moves out of the county in which they are actively receiving Low-Income Child Care assistance benefits during the twelve (12) month eligibility period; remains below eighty-five percent (85%) of the state median income; and, remains in a low-income eligible activity as defined in the originating county's county plan, which can be found on the Colorado Department of Early Childhood website at https://cdec.colorado.gov/colorado-child-care-assistance-program-for-families ,the originating county shall maintain the case, authorization(s), and fiscal responsibility until the re-determination date that was previously determined;

1. The originating county shall be responsible for initiating and/or maintaining the fiscal agreement for the child care provider that the family utilizes for care in accordance with rule section 3.134~~15.5~~ for the remainder of the twelve (12) month eligibility period. If the originating county does not have an active fiscal agreement with the chosen child care provider at the time of exit, the child care provider's fiscal agreement shall be entered using the county ceiling rates of the county in which the provider is located.

2. At the time of re-determination, the receiving county shall re-determine the household's eligibility per rule section 3.11~~05.~~3 without requiring the household to re-apply.at the time of re-determination the originating county shall issue the eligibility re-determination form to the household per rule section 3.11~~05.~~3 and direct the family to return the completed form to the receiving county. To mitigate service interruptions, the originating county shall notify the receiving county of the re-determination and their responsibilities of redetermining eligibility.

3. The child care case may be closed if at the time of re-determination the family does not meet the eligible activity requirements of the receiving county.

4. If the receiving county has a wait list at the time of re-determination, a family may be placed onto that county's wait list provided they are not a part of the county defined target populations.

CC. Counties shall respond to requests for information or assistance from other agencies within five (5) business days.

DD. Counties must review and take action on current re-determinations by reviewing for completeness~~,~~; approving~~e~~ or denying~~y~~ the re-determination~~,~~; and ~~provide~~ providing timely written notice to the adult caretaker(s) or teen parent(s) of approval, or of missing verifications, no more than fifteen (15) calendar days from the date the re-determination was received by the county. The county must notify the adult caretaker(s) or teen parent(s) in writing that they have fifteen (15) calendar days from the date the notice is mailed to provide the required missing verifications. If verifications are not received within the fifteen (15) day noticing period, the re-determination will be denied.

EE. Whenever possible in processing re-determinations of eligibility for adult caretaker(s) or teen parent(s) currently receiving Low-Income Child Care, counties shall use information that is already available in other sources to document any verification including citizenship, age, and identity if the adult caretaker or teen parent's declaration is inconsistent in accordance with rule section 3.125~~12~~(V).

FF. Counties shall reduce parent fees by twenty percent (20%) of the regularly calculated parent fee when a household utilizes a quality child care provider rated in the top three levels of the Department's quality rating system. For households utilizing multiple child care providers, only

one child care provider is required to be in the top three quality levels for the reduced parent fee to apply.

GG. Reports of unpaid parent fees shall be documented on the case and the county shall not take action on a report of unpaid parent fees until re-determination. If the unpaid parent fee is reported outside of the required reporting period outlined in rule section 3.1281~~4.2~~ (Q), the county shall not take any action. If at the time of re-determination, the parent fee remains unpaid and acceptable payment arrangements have not been made with the child care provider, the household shall remain ineligible until:

1. Delinquent parent fees are paid in full;

2. Adequate payment arrangements are made with the child care provider to whom the fees are owed and an agreement is signed by both parties; or

3. County determination of verified good faith efforts to make payment to the child care provider(s), when the client was unable to locate the child care provider(s).

HH. Counties shall authorize care based on verified need, by establishing an authorization to cover the maximum amount of units needed to ensure care is available based on the adult caretaker or teen parent's participation in an eligible activity, and shall not be linked directly to the adult caretaker or teen parent's activity schedule and should be based on the child's need for care.

II. Counties are encouraged to blend Head Start, Early Head Start and CCDF funding streams by authorizing care based on the child's need for care, regardless of the child's Head Start or early Head Start enrollment status, in order to provide seamless services to children dually enrolled in these programs.

JJ. Counties shall align the Low-Income Child Care re-determination date with the Head Start or Early Head Start program year upon notification that a child is enrolled in a Head Start or Early Head Start program. The re-determination date shall not occur any earlier than twelve (12) months from the application date.

KK. With regard to services to students enrolled in grades one (1) through twelve (12), no funds may be used for services provided during the regular school day, for any services for which the students received academic credit toward graduation, or for any instructional services, which supplant or duplicate the academic program of any public or private school. Exceptions to this may include but are not limited to:

1. When a child is temporarily prohibited from attending their regular classes due to a suspension or expulsion;

2. When a child is temporarily out of school due to scheduled breaks; or

3. When a child is temporarily out of school due to unexpected school closures.

LL. The authorization start date shall be the date a Low-Income Child Care case is determined eligible, except in the case of a pre-eligibility application. If the child will receive care from a qualified exempt child care provider, the authorization start date shall not be prior to the date the criminal background check has been completed and cleared.

MM. For pre-eligibility care reimbursable after eligibility has been determined and the county can provide ~~subsidy~~ benefits for the potential program participant, authorization shall be dated to the date the pre-eligibility application was received by the county.

NN. The county shall generate a Department-approved notice regarding changes to child care ~~subsidies~~ benefits within one (1) business day and provide to the primary adult caretaker, teen parent and child care provider via postal service, e-mail or other electronic systems, fax, or hand-delivery.

OO. If verification that is needed to correct the reason for closure of a child care case is received within thirty (30) calendar-days after the effective date of closure, eligibility shall be determined as of the date the verification was received regardless of any break in service period.

PP. The county shall generate Attendance Tracking System registration for the household upon case approval or initial authorization.

QQ. The county shall generate Attendance Tracking System registration for child care providers when a fiscal agreement with a provider is opened.

RR. The county shall make available the following child care provider information, including protective services information, to all staff whose responsibilities include child care ~~subsidy~~ benefit services:

1. Information known to licensing staff.

2. Information from previous agency contacts.

3. Information obtained from the ~~F~~ffiscal ~~A~~aagreement renewals.

4. Information obtained from adult caretaker(s) or teen parent(s), caseworker visits, and other sources.

5. Information about corrective action intervention by the counties, their designee(s), or the Department.

SS. The counties or their designee will complete an annual review of the state-administered system for child abuse and neglect on the qualified exempt child care provider(s) and any individual(s) in the qualified exempt child care provider's household who is eighteen (18) years and over not including the adult caretaker(s) or teen parent(s) if care is provided in the qualified exempt provider's home.

TT. Counties shall maintain a copy of the non-relative qualified exempt provider's health and safety report of inspection in the provider file. The report of inspection shall be made available to the client upon request to the county or the Department.

UU. Upon notification to counties by the Department that the relevant systems are capable of accommodating this review, the counties or their designee shall screen the qualified exempt child care provider(s) and any other adult eighteen (18) years of age and older, not including the adult caretaker(s) or teen parent(s), for current or previous adverse county contact, including but not limited to, allegations of fraud or IPV.

VV. The county shall reimburse licensed child care providers based on the state established base payment and tiered reimbursement rates.

WW. The state-established licensed child care provider reimbursement rates shall include a system of tiered reimbursement based on quality levels for licensed child care providers that enroll children participating in CCCAP.

XXZZ. For renewals, the county shall send fiscal agreements at least sixty (60) calendar-days prior to the end date of the previous fiscal agreement via postal service, fax, hand-delivery, or e-mail or other electronic systems.

YY. Counties shall make fiscal agreements effective the date that the county receives the completed and signed fiscal agreement from the provider. Fiscal agreements shall be:

1. One (1) year in length for qualified exempt child care providers

2. Three (3) years in length for licensed child care providers

ZZ. Counties shall reimburse providers at the rate set by the Department.

AAA. Prior to approving a fiscal agreement with any child care provider, the county shall compare the child care provider's private pay rates to the county's reimbursement rates set by the Department. The CCCAP reimbursement rate paid to the provider by the county must be the lesser of the two.

BBB. Counties shall:

1. Have fiscal agreements signed by the child care provider and county staff prior to opening them in CHATS;

2. Enter a completed fiscal agreement into CHATS within five (5) business days of receipt; and;

3. Provide a copy of the fully executed fiscal agreement to the child care provider within seven (7) calendar days of the CHATS entry.

CCC. Counties shall not make changes to their county ceiling rates more than every twelve (12) months unless instructed to do so by the Department.

DDD. Counties shall update CHATS and notify a provider via rate notification within fifteen (15) business days after a child care technician has received a system generated quality rating change notification indicating that a provider has had a change in their quality rating.

EEE. Counties shall verify that child care providers are not excluded from receiving payments prior to signing a fiscal agreement. The county shall make this verification check through the Excluded Parties List System (EPLS) established by the General Services Division on the website at: www.sam.gov.

FFF. Counties shall process complete manual claim forms in CHATS within twenty-one (21) calendar days of receipt for payments that were not automatically processed through CHATS. If processing of the complete manual claim form is delayed for any reason, the county shall notify the child care provider(s) in a timely manner and document the circumstances in CHATS.

GGG. In any cases where payments to licensed child care providers or qualified exempt child care providers are delayed more than three (3) calendar months past the end of the month care was provided, county-only money that was not allocated by the Department shall be used to pay for this care.

HHH. Counties shall ensure that child care providers are not charging the county more than the child care provider's established private pay rates.

III. County offices shall complete a random monthly review of attendance data for at least one percent (1%) or one provider, whichever is greater. The county or its designee shall take necessary action as defined in the county fraud referral process if the review indicates:

1. That the child care provider(s) may have submitted an inaccurate report of attendance for a manual claim, the county or its designee shall contact the child care provider(s) and adult caretaker(s) or teen parent(s) to resolve the inaccuracy.

2. That either the adult caretaker(s) or teen parent(s) or the child care provider has attempted to defraud the program or receive benefits to which they were not eligible. The county or its designee shall report that information to the appropriate legal authority.

JJJ. Counties shall refer, within fifteen (15) calendar-days of establishing recovery, to the appropriate investigatory agency and/or the district attorney, any alleged discrepancy which may be a suspected fraudulent act by a household or child care provider ~~of services~~.

KKK. In collecting evidence of fraudulent activities, the counties or their designee shall not violate the legal rights of the individual. When the county has questions about whether an action it contemplates might violate the legal rights of the individual, it ~~shall~~should seek the advice of its legal advisor.

~~KKK~~LLL. Counties shall establish recoveries within twelve (12) months of discovery of the facts resulting in recovery.

~~LLL~~MMM. Counties shall take whatever action is necessary to recover payments when households and/or child care providers owe money to the Department because of overpayments, ineligibility and/or failure to comply with applicable state laws, rules, or procedures.

~~MMM~~NNN. Counties shall report established recoveries that are the result of legally designated or determined fraud or recoveries of five-thousand dollars ($5,000) or more to the Department.

3.12~~6~~13 PRE-ELIGIBILITY DETERMINATIONS

An Early Care and Education provider may provide services to the household prior to the final determination of eligibility and shall be reimbursed for such services only if the county determines the household is eligible for Low-Income Child Care services and there is no need to place the household on the wait list. The start date of eligibility is defined in rule section 3.12~~5~~12 (Q). If the household is found ineligible for services, the Early Care and Education provider shall not be reimbursed for any services provided during the period between their pre-eligibility determination and the county's final determination of eligibility.

The Early Care and Education provider or county may conduct a pre-eligibility determination for child care assistance for a potential program participant to facilitate the determination process.

A. The Early Care and Education provider may submit the prospective program participant's State-prescribed Low-Income Child Care application, release of information, and documentation to the county for final determination of eligibility for child care assistance. The Early Care and Education provider shall signify on the first page of the application in the space provided that a pre-eligibility determination has been made.

B. The Early Care and Education provider or county may provide services to the household prior to final determination of eligibility, and the county shall reimburse an Early Care and Education p~~P~~rovider:

1. As of the date the county receives the application from the Early Care And Education provider for such services only if the county determines the prospective program participant is eligible for services; and~~,~~

2. There is no need to place the prospective program participant on a wait list.

C. All supporting documentation for a pre-eligibility application submitted by an Early Care and Education p~~P~~rovider shall be received in thirty (30) calendar-days of the date the application was received or the application may be determined ineligible by the county. If all verifications are received between the thirty-first (31st) and sixtieth (60th) day, counties shall determine eligibility from the date the verification was received.

D. If the prospective program participant is found ineligible for services, the county shall not reimburse the Early Care and Education provider for any services provided during the period between its pre-eligibility determination and the county's final determination of eligibility.

E. If an Early Care and Education provider or county has conducted a pre-eligibility determination, they shall include documentation of the information on which the pre-eligibility determination has been made in or with the application. The documentation shall include household income, household composition, and low-income eligible activity.

F. When a county conducts a pre-eligibility determination, the county shall notify the prospective child care provider with the referral for pre-eligibility authorization that payment for care provided prior to full eligibility may not occur if the adult caretaker(s) or teen parent(s) is ultimately deemed ineligible for the CCCAP program.

G. A child care provider may refuse to serve a county pre-eligibility authorized program participant.

~~3.114~~ CHILD CARE PROVIDERS

3.1~~27~~14.1 ELIGIBLE FACILITIES

A. Licensed Facilities

The following facilities are required to be licensed and comply with licensing rules as defined in the Social Services rule manual, rule sections 7.701 through 7.712 of 12 CCR 2509-8~~)~~, incorporated by reference in rule section 3.103(X), above:

1. Family child care homes as defined in section 26.5-5-303(7), C.R.S.

2. Child care centers which are less than 24-hour programs of care, as defined in section 26.5-5-303(3), C.R.S.

B. Qualified Exempt Child Care Providers

1. Qualified exempt child care provider: A non-licensed family child care home in which less than twenty-four (24) hour care is given at any one time that meets one of the following:

   a. For a relative qualified exempt provider, any number of children directly related to the provider; or

   b. For a qualified exempt provider that is not a relative of the children in care, no more than four (4) children in care, with no more than two (2) children under the age of two (2) years at any one time.

1) if the provider's own children are in the provider's care, the provider's children count towards the maximum capacity of four (4).

c. The relationships for care outlined in (A)-(B) of this rule section include:

1) "Relative in-home care" means care provided by a relative in the child's own home by a person who is eighteen (18) years of age or older

2) "Relative out-of-home care" means care provided by a relative in another location by a person who is eighteen (18) years of age or older

3) "Non-relative in-home care" means care provided by a person, who is not a relative to the children in care, in the child's own home.

4) "Non-relative out-of-home care" means care provided by a person, who is not a relative to the children in care, outside of the child's home.

2. The counties or their designee shall register qualified exempt child care providers and include the following information: name, address (not a P.O. Box #), phone number, date of birth, and social security number or individual taxpayer identification number (ITIN). Any contract provided by an agency of a state or local government is considered a public benefit.

3. Qualified Exempt Child Care Provider Requirements

a. Qualified exempt child care provider(s) must be at least eighteen (18) years of age.

b. A qualified exempt child care provider shall not be the adult caretaker or teen parent of the child that is receiving care.

c. A qualified exempt child care provider shall not be a sibling of the child that is receiving care if living in the same residence.

d. As a prerequisite to signing a fiscal agreement with a county or its designee, a qualified exempt child care provider shall sign an attestation of mental competence. The attestation affirms that they, and any adult residing in the qualified exempt child care provider home where care is provided, has not been adjudged by a court of competent jurisdiction to be insane or mentally incompetent to such a degree that the individual cannot safely care for children.

e. A qualified exempt child care provider shall complete and sign the provider information form and the self-attestation form agreeing to participate in additional training as identified. As a part of this agreement, the provider shall not have had any of their own children removed from the home or placed in a residential treatment facility. The self-attestation form must include the signature of the adult caretaker(s) or teen parent(s) acknowledging monitoring responsibilities. A provider information form must be provided to the county and Department any time there is a new member of the provider's household.

4. Background Checks

a. A qualified exempt child care provider and any adult eighteen years of age or older who resides in the exempt child care provider's home, not including the adult caretaker(s) or teen parent(s), must be subject to a county level

background check. The information from the background check must serve only as the basis for further investigation.

b. A qualified exempt child care provider and any adult eighteen years of age or older who resides in the exempt child care provider's home, not including the adult caretaker(s) or teen parent(s), must also be subject to and pass a criminal background review as follows:

1) A review of the Federal Bureau of Investigations (FBI) fingerprint-based criminal history records pursuant for section 26.5-5-326, C.R.S.;

2) A review of the Colorado Bureau of Investigations (CBI) fingerprint-based criminal history records at application;

3) An annual review of the state administered database for child abuse and neglect;

4) An annual review of the CBI sex offender registry; and

5) The national sex offender registry public website (upon notification to counties by the Department that the relevant state and federal systems are capable of accommodating this review).

c. Information submitted to the CBI sex offender registry and the national sex offender registry public website shall include:

1) Known names and addresses of each adult residing in the home, not including the adult caretaker(s) or teen parents; and~~,~~

2) Addresses.

d. At the time of submission of the completed background check packet, as determined by state procedures, a qualified exempt child care provider shall submit certified funds (i.e., money order or cashier's check) to cover all fees indicated below.

1) A fee for the administrative costs referred to in rule section ~~2.111~~7.701.4, (F) (12 CCR 2509-8), are incorporated by reference in rule section 3.103(X), above.

A fee for each set of submitted fingerprints for any adult who resides in the home where the care is provided, eighteen (18) years of age or older, not including the adult caretaker(s) or teen parent(s), will be required. Payment of the fee for the criminal record check is the responsibility of the individual being checked unless the county chooses to cover the cost associated with the criminal record check. Counties that choose to exercise this option shall document the policy within their county plan, which can be found on the Colorado Department of Early Childhood website at https://cdec.colorado.gov/colorado-child-care-assistance-program-for-families.

2) Counties will be notified of the date the background check has cleared and shall use that date as the effective date of reimbursement for the fiscal agreement. Child care authorizations must not begin until the background check has cleared.

e. The qualified exempt child care provider(s) may continue to receive payment as long as the qualified exempt child care provider(s) or other adult is not ineligible due to the following circumstances:

1) Conviction of child abuse, as described in section 18-6-401, C.R.S.;

2) Conviction of a crime of violence, as defined in section 18-1.3-406, C.R.S.;

3) Conviction of any felony offense involving unlawful sexual behavior, as defined in section 16-22-102 (9), C.R.S.;

4) Conviction of any felony that on the record includes an act of domestic violence, as defined in section 18-6-800.3, C.R.S.;

5) Conviction of any felony involving physical assault, battery or a drug related/alcohol offense within the five years preceding the date of the fingerprint-based criminal background check;

6) Conviction of any offense in another state substantially similar to the elements described in Items 1 through 5, above;

7) Has shown a pattern of misdemeanor convictions within the ten (10) years immediately preceding submission of the application. “Pattern of misdemeanor” shall include consideration of section 26.5-5-317, C.R.S., regarding suspension, revocation, and denial of a license, and shall be defined as:

a) Three (3) or more convictions of ~~3rd~~ third degree assault as described in section 18-3-204, C.R.S., and/or any misdemeanor, the underlying factual basis of which has been found by any court on the record to include an act of domestic violence as defined in section 18-6-800.3, C.R.S.;

b) Five (5) misdemeanor convictions of any type, with at least two (2) convictions of ~~3rd~~ third degree assault as described in section 18-3-204, C.R.S., and/or any misdemeanor, the underlying factual basis of which has been found by any court on the record to include an act of domestic violence as defined in section 18-6-800.3, C.R.S.; or,

c) Seven (7) misdemeanor convictions of any type.~~; or~~

~~d) Has been determined to be responsible in a confirmed report of child abuse or neglect.~~

8) Conviction has the same meaning as that in section 26.5-5-309(4)(A)(II), C.R.S.

~~9) Five (5) misdemeanor convictions of any type, with at least two (2) convictions of 3rd degree assault as described in section 18-3-204, C.R.S., and/or any misdemeanor, the underlying factual basis of which has been found by any court on the record to include an act of domestic violence as defined in section 18-6-800.3, C.R.S.; or,~~

~~10) Seven (7) misdemeanor convictions of any type.~~

~~11) Has been determined to be responsible in a confirmed report of child abuse or neglect.~~

5. A qualified exempt child care provider shall notify the county with whom he or she has contracted pursuant to a publicly funded state Child Care Assistance Program, within ten (10) calendar-days of any circumstances that result in the presence of any new adult in the residence.

6. If required documents are not returned within thirty (30) days, the qualified exempt child care provider shall be denied a fiscal agreement.

7. Additional requirements for non-relative qualified exempt child care providers:

   a. Completion of all pre-service health and safety trainings approved by the Department, within three months of providing services as a qualified exempt child care provider under the Colorado Child Care Assistance Program.

   b. An annual on-site health and safety inspection conducted by the Department or its designee. Non-relative qualified exempt providers shall correct any health and safety inspection standards within thirty (30) days after the inspection unless the results identify standards that must be corrected immediately.

   c. Qualified exempt non-relative child care providers shall meet the mandatory child abuse and neglect reporting requirements annually.

   d. If the non-relative qualified exempt child care provider fails to comply with any of the requirements in rule subsections (a)-(d) above, the county shall deny or terminate a fiscal agreement.

8. Qualified exempt child care providers who are denied a ~~F~~fiscal ~~A~~agreement or whose ~~F~~fiscal ~~A~~agreement is terminated may request an informal conference with county staff responsible for the action, the supervisor for that staff, and the county director or director's designee to discuss the basis for this decision and to afford the qualified exempt child care provider(s) with the opportunity to present information as to why the qualified exempt child care provider(s) feels the county should approve or continue the ~~F~~fiscal ~~A~~agreement. Any request for a conference shall be submitted in writing within fifteen (15) calendar-days of the date the qualified exempt child care provider is notified of the action. The county shall hold that conference within two (2) weeks of the date of the request. The county shall provide written notice of its final decision to the qualified exempt child care provider(s) within fifteen (15) business days after the conference.

9. Non-relative qualified exempt child care providers who are denied a fiscal agreement or whose fiscal agreement is terminated due to the Department's decision regarding adherence to health and safety standards may appeal the decision to the executive director of the Department or the executive director's designee in writing within fifteen (15) days of the county's decision. The executive director's decision is a final agency decision subject to judicial review by the state district court under section~~§~~ 24-4-106, C.R.S.

10. If a qualified exempt child care provider has not had an open authorization for ninety (90) calendar days, the provider's fiscal agreement shall be closed in CHATS.

C. For renewals, the county shall send fiscal agreements at least sixty (60) calendar-days prior to the end date of the previous fiscal agreement via postal service, fax, hand-delivery, or e-mail or other electronic systems.

D. Payment Methods

1. Payment for purchased child care shall be made to the child care provider(s) through ~~an automated system~~CHATS if it is a qualified exempt child care provider(s) or licensed facility.

2. When a manual claim is needed to reimburse providers for payments that were not automatically processed through CHATS, the ~~state~~Department-prescribed child care manual claim form must be prepared and signed by the child care provider for increments of one month or less. The county shall utilize the ~~state~~ Department-prescribed manual claim form to verify that the billing is for:

a. Care that was authorized and provided;

b. Reimbursable registration fees;

c. Reimbursable activity fees;

d. Reimbursable transportation fees;

e. Reimbursable hold slots;

f. Reimbursable drop in days; and/or~~,~~

g. Reimbursable absence payments.

E. Child care providers shall be provided with a written notice of the process of termination of the fiscal agreement on the Department's fiscal agreement form.

3.128~~14.2~~ CHILD CARE PROVIDER RESPONSIBILITIES

A. Child care p~~P~~roviders shall maintain a valid child care license as required by Colorado statute unless exempt from the Child Care Licensing Act.

B. Child care p~~P~~roviders shall report to the county if their license has been revoked, suspended, or denied within three (3) calendar-days of receiving notification or a recovery will be established of all payments made as of the effective date of closure.

C. Child care providers shall report to the county and state licensing any changes in address no less than thirty (30) calendar-days prior to the change.

D. Child care providers shall report to the county and state licensing any changes in phone number within ten (10) calendar-days of the change.

E. Child care providers shall allow parents, adult caretakers, or teen parents immediate access to the child(ren) in care at all times.

F. Child care providers shall accept referrals for child care without discrimination with regard to race, color, national origin, age, sex, religion, marital status, sexual orientation, or physical or mental handicap.

G. Child care providers shall provide children with adequate food, shelter, and rest as defined in licensing rule (12 CCR 2509-8, incorporated by reference in rule section 3.103(X), above).

H. Child care providers shall ~~maintain~~ keep ~~as strictly confidential~~ all records regarding children ~~information~~ and all facts learned about ~~concerning~~ children and their relativ~~famili~~es confidential pursuant to section 26.5-5-316(4), C.R.S.

I. Child care providers shall protect children from abuse/neglect and immediately report any suspected child abuse and neglect to the county, local law enforcement agency, or the Colorado Child Abuse and Neglect Hotline ~~immediately~~.

J. Child care providers shall provide child care at the facility address listed on the fiscal agreement and ensure care is provided by the person or business listed on the fiscal agreement. Exceptions are defined in licensing rules (12 CCR 2509-8, incorporated by reference in rule section 3.103(X), above).

K. Child care providers will not be reimbursed for any care provided before the fiscal agreement start date and after the fiscal agreement end date.

L. Child care providers shall sign the fiscal agreement and all other county or state required forms. Payment shall not begin prior to the first of the month in which the fiscal agreement has been signed and received by the county.

M. Child care providers shall comply with Attendance Tracking System (ATS) requirements as defined in rule section 3.133~~15.4~~.

N. Child care providers shall develop an individualized care plan (ICP) for children with additional care needs based upon the Individual Education Plan (IEP), or Individual Health Care Plan (IHCP), and provide a copy to the county eligibility worker on an annual basis or other alternate period of time determined in the plan.

O. Licensed child care providers shall maintain proof of up-to-date immunizations for the children in their care in accordance with rule section 7.712.52~~2.200~~7.702, ~~*et seq.*~~ (12 CCR 2509-8, incorporated by reference in rule section 3.103(X), above). This rule does not apply to the following:

1. Qualified exempt child care Providers caring for children in the child's own home; or~~,~~

2. Qualified exempt child care Providers caring only for children related to the child care provider such as grandchildren, great-grandchildren, siblings, nieces, or nephews, etc.~~;~~

P. Child care Providers shall maintain paper or electronic sign in/out sheets that the person authorized to drop off/pick up the children has signed with the date, names of the children, and~~,~~ the time the children arrive and leave each day ~~they~~ the children attend care. These records shall be available for county review upon request and maintained for the current year plus the three (3) immediately preceding years.

Q. Child care providers shall report non-payment of parent fees no later than sixty (60) calendar days after the end of the month the parent fees are due unless county policy requires it earlier. The unpaid parent fees can be reported by fax, e-mail or other electronic systems, in writing, or on the billing form.

R. Child care providers shall notify the county of unexplained, frequent and/or consistent absences within ten (10) calendar-days of establishing a pattern.

S. Child care providers shall not charge counties more than their established private pay rates.

T. Child care providers shall not charge adult caretakers or teen parents rates in excess of daily reimbursement rates agreed upon in the ~~F~~fiscal ~~A~~agreement (this includes the agreed upon registration, mandatory activity, and transportation fees if the county pays these fees).

U. If a licensed child care provider chooses to charge families for absences for which the county does not provide reimbursement, they shall use the CCCAP daily reimbursement rate agreed upon in the ~~F~~fiscal ~~A~~agreement.

V. Child care providers shall offer free, age~~-~~-appropriate alternatives to voluntary activities. Child care providers shall only bill for:

1. Care that was authorized and provided;

2. Reimbursable registration fees;

3. Reimbursable activity fees;

4. Reimbursable transportation fees;

5. Reimbursable hold slots;

6. Reimbursable drop in days; and/or~~,~~

7. Reimbursable absence payments.

W. Child care providers shall bill counties monthly for payments that were not automatically processed through CHATS including but not limited to:

1. Care that was authorized and provided;

2. Reimbursable registration fees;

3. Reimbursable activity fees;

4. Reimbursable transportation fees;

5. Reimbursable hold slots;

6. Reimbursable drop in days; and/or~~,~~

7. Reimbursable absence payments

X. Payment for services shall be forfeited if the original ~~state~~Department-prescribed manual claim form is not submitted within sixty (60) calendar-days following the month of service.

Y. Reimbursable activity~~,~~ and/or transportation fees shall be billed for in accordance to the timeframe ~~in~~ which is outlined in the current fiscal agreement.

Z. Child care providers shall not hold, transfer, or use an adult caretaker or teen parent's individual attendance credentials. If intentional misuse is founded by any county or state agency, the child care provider will be subject to fiscal agreement termination as outlined in rule section 3.13~~4~~15.

3.12~~9~~14.3 COMPLAINTS ABOUT CHILD CARE PROVIDERS

Counties and the public may access substantiated complaint files regarding complaints about ~~procedures~~ matters other than child abuse at the Department, Division of Early Learning, Licensing, and~~&~~ Administration, or on the Department's website at https://cdec.colorado.gov/find-child-care.

A. Complaints about qualified exempt child care providers

Complaints shall be referred to the Department, Division of Early Learning, Licensing, and~~&~~ Administration staff or appropriate contracted agencies the same day as it is received by the county when:

1. The complaint is about a qualified exempt child care provider~~,~~ who is alleged to be providing illegal care.

2. The complaint is related to issues ~~with a qualified exempt child care provider~~ such as violation of non-~~-~~discrimination laws or denial of parent access to children in care (does not include investigation of illegal care).

B. Complaints about licensed child care providers

The following guidelines shall apply to complaints received by counties about licensed child care providers:

1. If the complaint concerns child abuse or neglect, the county shall immediately refer the complaint to the appropriate county protective services unit.

2. If the complaint concerns a difference of opinion between a child care provider and an adult caretaker(s) or teen parent(s), the counties shall encourage the child care provider and adult caretaker or teen parent to resolve their differences.

3. Complaints shall be referred to the Department, Division of Early Learning, Licensing, and~~&~~ Administration staff the same day the county receives it when the complaint is about a family child care home or child care center and is related to noncompliance with child care licensing ~~issues~~ statutes or regulations.

~~3.115~~ PURCHASE OF SERVICES

3.1~~30~~15.1 CHILD CARE PROVIDER REIMBURSEMENT RATES

The counties shall implement the state-established licensed child care provider base payment rates for each county on July first every year. In addition to establishing licensed child care provider base payment rates, the ~~state d~~Department will establish tiered reimbursement rates based on quality levels for licensed child care providers that enroll children participating in CCCAP.

A. Payment rates shall be defined utilizing the ~~state~~ Department established, system supported age bands.

B. Rate types are selected by child care provider type (licensed family child care home, licensed child care center, and qualified exempt child care providers). The Department has established rate type definitions to be used by all counties and deviation from the rate definitions shall not be permitted.

C. Payments shall be made in part time/full time daily rates.

1. Part-time is defined as zero (0) hours, zero (0) minutes, and one (1) second through five (5) hours, zero (0) minutes, and zero (0) seconds per day. Part time is paid at fifty-five percent (55%) of the full time rate.

2. Full time is defined as five (5) hours, zero (0) minutes, and one (1) second through twelve (12) hours, zero (0) minutes, and zero (0) seconds.

3. Full-time/part time is defined as twelve (12) hours, zero (0) minutes, one (1) second through seventeen (17) hours, zero (0) minutes, zero (0) seconds of care.

4. Full time/full time is defined as seventeen (17) hours, zero (0) minutes, one (1) second through twenty-four (24) hours, zero (0) minutes, zero (0) seconds of care.

5. Counties may set rates for alternative care as defined by the county and reported in the county plan, which can be found on the Colorado Department of Early Childhood website at https://cdec.colorado.gov/colorado-child-care-assistance-program-for-families.

D. Counties must not set qualified exempt child care provider rates such that they inhibit or deter providers from becoming licensed.

E. Absences and Holidays.

1. Effective August 1, 2021, until June 30, 2022, counties shall reimburse licensed child care providers for absences based on the following schedule:

   a. No fewer than six (6) absences per month if they are in levels one (1) or two (2) of the Department's quality rating and improvement system.

   b. No fewer than seven (7) absences per month if they are in levels three (3), four (4), or five (5) of the Department's quality rating and improvement system.

   c. No fewer than six (6) absences per month if they are a school age child care program that does not have a quality rating through the Department's quality rating and improvement system.

2. Effective July 1, 2022, counties shall reimburse licensed child care providers for absences based on the following schedule:

   a. No fewer than three (3) absences per month if they are in levels one (1) or two (2) of the Department's quality rating and improvement system.

   b. No fewer than four (4) absences per month if they are in levels three (3), four (4), or five (5) of the Department's quality rating and improvement system.

   c. No fewer than three (3) absences per month if they are a school age child care program that does not have a quality rating through the Department's quality rating and improvement system.

3. Counties may pay licensed child care providers for holidays in accordance with the policy set by the county and approved by the Department.

4. Counties may adopt a policy allowing the use of hold slots ~~in order~~ to address payments for unattended authorized care that is in addition to absences, holidays, and school breaks to hold a child's space with a provider when the child is not in care.

F. Counties may adopt a policy to pay for drop in days in addition to regularly authorized care.

G. Bonus Payments

Counties shall not at any time use federal Child Care Development Block Grant Funds (CCDBG), or state General Funds, for the payment of bonuses to child care providers serving children in the CCCAP program. A county shall not use CCDBG or state General Funds to retroactively increase the daily rate paid to child care providers and issue a payment to child care providers based on that retroactive calculation.

H. Child care providers who contend that the county has not made payment for care provided under CCCAP in compliance with these rules may request an informal conference with staff, the appropriate supervisor, the county director or the director's designee, and, if requested by the child care provider(s), state program staff. Any request for a conference shall be submitted in writing within fifteen (15) calendar-days of the date of the action. The county shall hold that conference within two (2) weeks of the date of the request. The county shall provide written notice of its final decision within fifteen (15) business days of the conference. The purpose of the conference shall be limited to discussion of the payments in dispute and the relevant rules regarding payment.

3.131~~15.2~~ SLOT CONTRACTS (COUNTY OPTION)

Slot contracts are used as a method to increase the supply and improve the quality of child care for county ~~-~~identified target populations and areas through collaborative partnerships that meet family and community needs. Slot contracts should also support continuity of care for households, funding stability for licensed child care providers, and expenditure predictability for counties.

A. Counties may choose to enter into a slot contract with a licensed child care provider not to exceed twelve (12) months or the length of the fiscal agreement in place (if it expires in less than twelve (12) months) ~~per contract with a licensed child care provider~~ to purchase a specified number of slots for children enrolled in CCCAP.

B. When a county chooses the option to use slot contracts with a licensed child care provider, the following steps must be completed a minimum of sixty (60) days prior to the commencement of the slot contract:

1. The county must submit a new county plan in CHATS and include selection of the slot contract option.

2. At the time the county plan is submitted, a slot contract policy based on the ~~state~~ Department ~~-~~developed policy template must be submitted to the ~~state d~~Department for approval. The policy must include but not limited to the following:

a. The county identified target populations and areas.

b. How the county will determine the length of the slot contract.

c. How the county will identify the need for the slot contract at a specific licensed child care provider.

d. How the county will ensure a fair and equitable review and selection process when selecting a licensed child care provider in the case of multiple child care programs expressing interest in entering into slot contracts. This must include an overview of the evaluation process used to identify licensed child care providers that are aligned with the county-determined criteria.

e. How the county will determine the number of slots they contract for with a licensed child care provider.

f. How the county will collaborate with the licensed child care provider to identify children to fill the vacant slots

g. How the county will continuously monitor the success of a slot contract during the contract period to include but not limited to:

1) What the measure of success is for the slot contract and how it is determined.

2) Frequency of monitoring the success of the slot contract, which must be at least twice per year but no more often than quarterly.

3) Cumulative attendance expectations and the ~~time~~ period over which attendance expectations must be defined. Cumulative attendance expectations must not be set higher than the following:

a) Seventy five percent (75%) for infants;

b) Eighty percent (80%) for toddlers; and~~,~~

c) Eighty five percent (85%) for preschoolers.

d) The ~~period of~~ time over which cumulative attendance must be met must be no less than quarterly and no more than six (6) months.

e) A plan for how the county will coordinate with the licensed child care provider to take intermediate steps or interventions if progress monitoring shows that attendance or other expectations are not being met.

f) Contract renegotiation for not reaching the set measure of success for the slot contract including under-utilization of paid slots during the designated monitoring period.

h. How the county will determine the need for a slot contract renewal.

C. Licensed child care providers that are fiscally managed by a county may not enter into a slot contract with the county that fiscally manages them.

D. Counties must submit the state developed monitoring tool in accordance with the county's monitoring schedule as specified in the county policy, within thirty-one (31) days of the end of the monitoring period.

E. Target population and areas may include but are not limited to:

1. Infants and toddlers;

2. Children with additional care needs;

3. Children needing care during nontraditional hours (i.e., evening, overnight and weekend care);

4. Children in underserved areas due to inadequate child care services and/or resources;

5. Areas where quality rated programs are in short supply for children enrolled in CCCAP; or~~,~~

6. Any other county~~-~~-identified target population or areas.

F. Criteria for assessing the need for slot contracts may include but is not limited to:

1. Counties must demonstrate the rationale for identifying specific CCCAP populations or underserved areas in their county;

2. The demographic data source(s) for all CCCAP households ~~must be identified which~~that supports the need to expand quality programs for specific CCCAP target populations and/or justifies needs based on underserved areas ~~for all CCCAP households~~ (demographic data may be based on zip codes or other geographic areas as determined by the county) must be identified;

3. Counties are strongly encouraged to work with Early Childhood Councils, resource and referral agencies, and other community-based organizations to identify the need for contracts with specific populations or in specific areas of the county.

G. Licensed child care programs who enter into slot contract agreements with counties must agree to be engaged in quality building at a minimum of a level two (2) quality rating through the Department's quality rating and improvement ~~S~~system~~Colorado Shines QRIS program~~.

H. The ~~state d~~Department will maintain a slot contract template that meets the requirements of this rule and all state and federal contracting requirements.

1. Counties must utilize the state-developed slot contract template in CHATS which must include any county-specific target populations and areas.

2. The ~~state d~~Department will assess and approve within thirty (30) days of receipt:

a. The updated county plan; and~~,~~

b. The county submitted slot contract policy.

3. The ~~state d~~Department will review the monitoring conducted by the county based on the county monitoring schedule.

3.1321~~5.3~~ ARRANGEMENT FOR CHILD CARE SERVICES

A. Counties shall use the ~~state~~ Department-prescribed child care authorization notice form to purchase care on a child-by-child basis and identify the amount of care and length of authorized care. Payment for care will be authorized for child care providers who have a license or who are qualified exempt child care providers and have a current, signed ~~state~~ Department-prescribed fiscal agreement form(s) with the county.

B. Child ~~C~~care is typically authorized for twelve (12) consecutive months except:

1. When an eligible child is or will be enrolled in a program that does not intend to operate for the entire eligibility period;

2. When an eligible child's adult caretaker(s) or teen parent(s) does not intend to keep the child enrolled with their initial child care provider(s) during the entire eligibility period; or,

3. When the adult caretaker(s) or teen parent(s) are participating in time limited activities such as job search or education/training.

C. When payment will be made to the child care provider(s), the county shall forward the child care authorization notice form to the child care provider(s) within seven (7) working days of determined eligibility. This time limit applies to original, changed, and terminated actions. The ~~state~~ Department may not reimburse counties if the seven (7) working day requirement is not met.

D. Child care will be paid for children from birth to thirteen (13) years for a portion of a day, but less than twenty-four (24) hours. Child care for eligible activities will include reasonable transportation time from the child care location to eligible activity and from eligible activity to child care location.

E. Children over the age of thirteen (13) but up to age nineteen (19), who are physically or mentally incapable of caring for ~~himself or herself~~themselves or who are under court supervision, may be eligible for child care due to having additional care needs for a portion of a day but less than twenty-four (24) hours. Counties may pay more for children who have additional care needs based upon verified individual child needs and if documented in county policy, but rates cannot exceed the child care provider's published private pay rates.

F. Counties may pay for activity fees if the child care provider charges such fees, and if the fiscal agreement contains the child care provider's policy on activity fee costs. Counties shall set their own limit on activity fees in accordance with the County Rate Plan in CHATS, which can be found on the Colorado Department of Early Childhood website at https://cdec.colorado.gov/colorado-child-care-assistance-program-for-families, and county policy ~~that is set by the county and~~ that is approved by the ~~State~~ Department.

G. Counties may pay for transportation costs if the child care provider charges such costs, and if the fiscal agreement contains the child care provider's policy on transportation costs. Allowable costs include the child care provider's charges for transportation from the child care provider's facility to another child care or school facility. Transportation costs do not include travel between an adult caretaker's or teen parent's home and the child care provider's facility. Counties shall set their own limit on transportation fees in accordance with the County Rate Plan in CHATS, which can be found on the Colorado Department of Early Childhood website at https://cdec.colorado.gov/colorado-child-care-assistance-program-for-families and county policy that is ~~set by the county and~~ approved by the ~~State~~ Department.

H. Counties may pay for registration fees if the child care provider is licensed, and if the fiscal agreement contains the child care provider's policy on registration costs. Counties shall set their own limit on registration fees in accordance with the County Rate Plan in CHATS, which can be found on the Colorado Department of Early Childhood website at https://cdec.colorado.gov/colorado-child-care-assistance-program-for-families and county policy that is ~~set by the county and~~ approved by the ~~State~~ Department.

I. Any money paid or payable to child care providers shall be subject to execution, levy, attachment, garnishment, or other legal process.

~~J. All Eexpenditures shall must be necessary and reasonable for proper and efficient performance and administration. A cost is reasonable if, in its nature and amount, it meets all the following criteria:~~

~~1. Expenditures shall must be compared to market prices for reasonableness.~~

2. ~~Expenditures shall~~ must ~~be compared to the market prices for comparable goods or services as a test for reasonableness.~~

3. ~~Expenditures shall~~ must ~~be ordinary and necessary.~~

4. ~~Expenditures shall~~ must ~~be of a type generally recognized as ordinary and necessary for the operation of the governmental unit or the performance of the federal award.~~

5. ~~Expenditures shall~~ must ~~meet standards such as sound business practices and arms-length bargaining.~~

6. ~~Expenditures shall~~ must ~~have restraints or requirements imposed by such factors as: sound business practices; arms-length bargaining; Federal, State and other laws and regulations; and, terms and conditions of the State and/or Federal award. "Arms-length bargaining" means both parties to a contract have relatively equal powers of negotiation upon entering the contract. Neither party has a disproportionate amount of power to strong-arm the other party. Less-than-arms-length transactions are prohibited and these include, but are not limited to, those where; one party is able to control or substantially influence the actions of the other.~~

7. ~~Expenditures shall~~ must ~~be the same as would be incurred by a prudent person.~~

8. ~~Expenditures shall~~ must ~~not exceed that which would be incurred by a prudent person under the circumstances prevailing at the time the decision was made to incur the cost. For this subsection, A~~a ~~prudent person is one who considers their responsibilities to the governmental unit, its employees, the public at large, and the federal government.~~

3.133~~15.4~~ ATTENDANCE TRACKING SYSTEM (ATS)

A. The adult caretaker(s) or teen parent(s) shall utilize the ~~Attendance Tracking System~~ATS as follows:

1. To record child's authorized and utilized daily attendance at the designated child care provider's location.

2. In the event that the child care provider has recorded a missed check-in or check-out, the adult caretaker or teen parent shall confirm the record in the ~~Attendance Tracking System~~ATS for the prior nine (9) day period.

3. Adult caretakers or teen parents shall not leave ~~his/her~~their individual attendance credentials in the child care provider's possession at any time or ~~he/she~~the child care provider may be subject to disqualification.

4. Non-cooperation with the use of the ~~Attendance Tracking System~~ATS may result in case closure and/or non-payment of the child care ~~subsidy~~ benefits as defined by a ~~state~~ Department approved county policy.

B. The child care provider will receive registration information for the ~~Attendance Tracking System~~ATS upon entering into a fiscal agreement with the county and shall utilize the ~~Attendance Tracking System~~ATS as follows:

1. To ensure that CCCAP adult caretakers or teen parents record child's authorized and utilized daily attendance at the designated child care provider's location.

2. ~~To ensure that in the event that~~If ~~the~~ adult caretaker(s) or teen parent(s) miss~~es~~ one or more check-ins/outs to record daily attendance, the child care provider may record the missed check-in/out in the ~~Attendance Tracking System~~ATS. If the child care provider records the missed check-in/out in ATS, ~~and~~ the adult caretaker or teen parent ~~shall~~ must confirm the record in the ~~attendance tracking system~~ATS for the prior nine (9) day period for automatic payment.

3. The child care provider shall not hold, transfer, or use any adult caretaker or teen parents' Individual attendance credentials at any time, or the child care provider may be subject to disqualification.

4. ~~Non-cooperation with the use of~~Failure to use the ~~Attendance Tracking System~~ATS may result in nonpayment of the child care ~~subsidy~~ benefit as defined by a ~~state~~ Department approved county policy, unless non-use of the ~~Attendance Tracking System~~ATS is approved by the ~~state d~~Department.

3.13~~415.5~~ COUNTY FISCAL AGREEMENT AUTHORITY

A. Counties have the authority to enter into a fiscal agreement with Qualified Exempt Child Care Providers and licensed child care providers, including those providers in a probationary status.

B. Counties have the authority to refuse to enter into a fiscal agreement with a child care provider.

C. Counties have the authority to terminate a fiscal agreement after providing at least fifteen (15) calendar-days' notice by postal service mail, fax, hand-delivery, or email or other electronic systems.

D. The counties have the authority to terminate a fiscal agreement without advance notice if a child's health or safety is endangered or if the child care provider is under a negative licensing action as defined in rule sections ~~2.104(R)~~7.701.2, ~~J 11~~ and ~~section~~ 7.701.~~2233., K~~ F (12 CCR 2509-8, incorporated by reference in rule section 3.103(X), above). Counties may not enter into or continue a fiscal agreement with any child care provider whose license has ~~a~~ been denied, suspended, or revoked ~~child care license~~through negative licensing action.

E. Counties may notify a child care provider of an immediate termination verbally, but written notice of that action must also be forwarded to the child care provider within one (1) business day. Any notice regarding denial or termination of a ~~F~~fiscal ~~A~~agreement shall include information regarding the child care provider's right to an informal conference.

~~3.116~~ PROGRAM INTEGRITY

3.13~~516.1~~ INTENTIONAL PROGRAM VIOLATION (IPV)

~~All adult caretakers or teen parents that apply for CCCAP shall must be provided with a written notice of the penalties for an Intentional Program Violation (IPV) on the child care application and statement of responsibility.~~

~~A. An IPV is an intentional act committed by an adult caretaker(s) or teen parent(s), for the purpose of establishing or maintaining the CCCAP household's eligibility to receive benefits for which they were not eligible. An adult caretaker or teen parent commits an IPV when he or she makes a false or misleading statement or omission in any application or communication, with knowledge of its false or misleading nature, for the purpose of establishing or maintaining the household's eligibility to receive benefits.~~

AB. A county shall ~~be required to~~ conduct an investigation of any adult caretaker(s) or teen parent(s) who has applied for or received CCCAP whenever there is an allegation or reason to believe that an individual has committed an IPV as described below.

1. Following investigation, action ~~shall~~ must be taken on cases where documented evidence exists to show an individual has committed one or more acts of IPV. Action ~~shall~~ must be taken through:

a. Obtaining a "Waiver of Intentional Program Violation Hearing~~,~~"~~; or,~~

b. Conducting an administrative disqualification hearing; or~~,~~

c. Referring the case for civil or criminal action in an appropriate court of jurisdiction.

2. Overpayment collection activities ~~shall~~ must be initiated immediately in all cases even if administrative disqualification procedures or referral for prosecution is not initiated.

3.13616.2 CRITERIA FOR DETERMINING INTENTIONAL PROGRAM VIOLATION (IPV)

A. The determination of IPV ~~shall~~ must be based on clear and convincing evidence that demonstrates intent to commit IPV. "Intent" is ~~defined as~~ a false representation of a material fact with knowledge of that falsity or omission of a material fact with knowledge of that omission.

B. "Clear and convincing" ~~evidence~~ is proof that is stronger than "a preponderance of evidence" and is unmistakable ~~and~~ or free from serious or substantial doubt.

3.13716.3 INTENTIONAL PROGRAM VIOLATION/ADMINISTRATIVE DISQUALIFICATION HEARINGS (IPV/ADH)

An IPV/ADH shall be requested whenever facts of the case do not warrant civil or criminal prosecution, where documentary evidence exists to show an individual has committed one or more acts of IPV, and the individual has failed to sign and return the Waiver of IPV form.

A. A county may conduct an IPV/ADH or may use the Colorado Department of Personnel and Administration's Office of Administrative Courts (OAC) to conduct the IPV/ADH. A ~~state~~ Department-prescribed form to request the administrative disqualification hearing for ~~intentional program violation~~IPV ~~shall~~ must be used for this purpose.

The ~~adult caretaker(s) or teen parent(s)~~accused individual may request that the ~~Department of Personnel and Administration~~OAC conduct the ADH/IPV in lieu of a county level hearing. Such a ~~hearing~~ request ~~shall~~ must be ~~requested~~ submitted at least ten (10) calendar-days before the scheduled date of the county hearing.

B. Notice of the date of the administrative disqualification hearing must be on ~~a~~ the form prescribed by the Department. The notice form ~~shall~~ must be mailed at least thirty (30) calendar-days prior to the hearing date to the last known address on record ~~to~~ for the individual alleged to have committed an IPV ~~at least thirty (30) calendar-days prior to the hearing date~~. The notice form ~~shall~~ must include a statement that the accused individual may waive the right to appear at the administrative disqualification hearing~~,~~ and attach the ~~along with the~~ hearing procedure form and statement of client rights.

C. The Administrative Law Judge (ALJ) or county hearing officer shall not enter a default against the ~~participant or applicant~~individual accused of having committed an IPV for failure to file a written

answer to the notice of IPV hearing form, but shall base the initial decision upon the evidence introduced at the hearing.

D. At the accused individual's request and ~~U~~upon good cause shown, the administrative hearing shall be rescheduled not more than once ~~at the accused individual's request~~. The request for continuance ~~shall~~ must be received by the ~~appropriate~~ county hearing officer or ALJ prior to the administrative disqualification hearing. The hearing shall not be continued for more than a total of thirty (30) calendar-days from the original hearing date. One additional continuance is permitted at the hearing officer or ALJ's discretion.

E. An IPV/ADH ~~shall~~ must not be requested against an accused ~~adult caretaker(s) or teen parent(s)~~individual whose case is currently being referred for prosecution on a civil or criminal action in an appropriate state or federal court.

3.138~~16.4~~ WAIVER OF ADMINISTRATIVE DISQUALIFICATION HEARING

A. Supporting evidence warranting the scheduling of an administrative disqualification hearing for an alleged IPV ~~shall~~ must be documented with a county supervisory review. If the county determines there is evidence to substantiate that ~~person~~ an individual has committed an IPV, the county shall allow that ~~person~~ individual the opportunity to waive the right to an administrative disqualification hearing.

B. A ~~State~~Department-approved Notice of Alleged Intentional Program Violation form including the client's rights, the ~~state~~Department-approved Waiver of Intentional Program Violation Hearing form, and the ~~state~~ Department approved request for a state level Administrative Disqualification Hearing for Intentional Program Violation form ~~shall~~ must be mailed to the individual suspected of an IPV. An investigator in the process of completing an investigation ~~shall~~ must offer the waiver to the individual if the investigator is not intending to pursue criminal or civil action. The individual ~~shall~~ must have fifteen (15) calendar-days from the date these forms are mailed by the county to return the completed Waiver of IPV hearing form.

C. When ~~an adult caretaker(s) or teen parent(s)~~the accused individual waives ~~his/her~~their right to an administrative disqualification hearing, a written notice of the disqualification penalty ~~shall~~ must be mailed to the individual. This notice shall be on the ~~State~~ Department-prescribed notice form.

D. The completion of the waiver is voluntary. ~~and t~~The county ~~may~~ must not require an individual to complete it ~~its completion nor~~or by its actions appear to require the individual to ~~the completion~~ complete ~~of~~ the ~~request of~~ waiver.

3.139~~16.5~~ DISQUALIFICATION FOR INTENTIONAL PROGRAM VIOLATION (IPV)

A. If the ~~adult caretaker(s) or teen parent(s)~~accused individual signs and returns the request for waiver of IPV hearing form within the fifteen (15) day deadline or ~~an~~ the individual is found to have committed an ~~intentional program violation~~IPV through the hearing process, the ~~primary adult caretaker or teen parent~~individual shall be provided with a notice of the period of disqualification for CCCAP benefits. The disqualification shall begin the first day of the month following the disqualification determination, allowing for authorization noticing, unless the household in which a disqualified person is living is ineligible for other reasons.

B. Once the disqualification has been imposed, the period shall run without interruption even if the participant becomes ineligible for CCCAP.

C. The penalty shall be in effect for:

1. Twelve (12) months upon the first occasion of any such offense;

2. Twenty-four (24) months upon the second occasion of any such offense; and~~,~~

3. Permanently upon the third such offense.

D. The disqualification penalties affect any household to which the adult caretaker(s) or teen parent(s) is a member.

E. The penalty period shall remain in effect unless and until the finding is reversed by the ~~State~~ Department or a court of appropriate jurisdiction.

F. A penalty imposed by one county shall be used when determining the appropriate level of disqualification and penalty for that individual in another county.

G. The disqualification penalties may be in addition to any other penalties which may be imposed by a court of law for the same offenses.

3.14~~016.6~~ NOTIFICATION OF HEARING DECISION

A. If the ~~local level~~county hearing officer finds the ~~adult caretaker(s) or teen parent(s)~~accused individual has committed an IPV as a result of a county hearing, a written notice shall be provided to notify the primary adult caretaker or teen parent of the decision. The local level hearing decision notice shall be a ~~state~~ Department-prescribed form, which includes a statement that a state level hearing may be requested with the request form attached.

B. In a hearing before an Administrative Law Judge (ALJ), the determination of IPV shall be an initial decision, which shall not be implemented while pending ~~State~~ Department review and ~~F~~final a~~A~~gency ~~A~~action. Pursuant to section 24-4-105(14)(c), C.R.S., ~~T~~the initial decision shall advise the adult caretaker(s) or teen parent(s) that failure to file exceptions to provisions of the initial decision will waive the right to seek judicial review of a final agency ~~decision~~ action affirming those provisions.

C. When a final ~~decision~~ agency action is made, a written notice of the disqualification penalty shall be mailed to the adult caretaker(s) or teen parent(s). This notice shall be on a ~~state~~ Department-prescribed notice form.

3.14~~116.7~~ REFERRAL TO DISTRICT ATTORNEY

When the counties or their designee(s) determine that they have paid or are about to pay for child care as a result of a suspected criminal act, the facts used in the determination shall be reviewed with the counties' legal advisor, investigatory unit and/or a representative from the District Attorney's office. If the available evidence supports suspected criminal acts, the case shall be referred to the District Attorney. All referrals to the District Attorney shall be made in writing and shall include the amount of assistance fraudulently received by the adult caretaker, teen parent, or child care provider.

The following actions may be taken:

A. If the District Attorney prosecutes, the amount of overpayment due will be taken into consideration and may be included in the court decision and order.

B. Interest may be charged from the month in which the amount of overpayment due was received by the collection entity until the date it is recovered. Interest shall be calculated at the legal rate.

C. If the District Attorney decides not to prosecute, the amount of overpayment due will continue to be recovered by all legal means. The county retains the option to pursue IPV/ADH or other administrative measures.

D. A county referral for prosecution is not a violation of the safeguards and restrictions provided by confidentiality rules and regulations.

3.142~~16.8~~ CRIMINAL VERDICT DISQUALIFICATION

Upon determination of fraudulent acts, adult caretaker(s) or teen parent(s) who have signed the application or re-determination will be disqualified from participation in CCCAP for the following periods, pursuant to sections 26-1-127(1) and 26.5-4-116(1), C.R.S. Such disqualification is mandatory and in addition to any other penalty imposed by law. Disqualification levels are:

A. Twelve months (12) for the first offense; ~~or,~~

B. Twenty-four months (24) for a second offense; or~~,~~

C. Permanently for a third offense.

~~**3.143316.9 DISQUALIFICATION PERIOD**~~

~~**A. Upon determination of fraudulent criminal acts, the adult caretaker(s) or teen parent(s) shall be notified of the period of disqualification. The disqualification shall begin the first day of the month that follows the disqualification determination, allowing for authorization noticing and shall run uninterrupted from that date.**~~

~~**B. In collecting evidence of fraudulent activities the counties or their designee shall not violate the legal rights of the individual. When the county questions whether an action it contemplates might violate the legal rights of the individual, it shall seek the advice of its legal advisor.**~~

3.143~~16.91~~ DISQUALIFICATION PENALTIES

A. In addition to any criminal penalty imposed, the disqualification penalties affect the adult caretaker(s) or teen parent(s) the penalty period shall remain in effect unless the finding is reversed by the ~~state d~~Department or a court of appropriate jurisdiction. The disqualification period shall follow the adult caretaker(s) and teen parent(s) regardless of the county of residence in Colorado. Penalties imposed are progressive regardless of the county of residence for each subsequent penalty level.

B. Child care providers shall be subject to the fiscal agreement termination process outlined in rule section 3.132~~15.3~~.

3.144~~16.92~~ HEARING AND DISPUTE RESOLUTION RIGHTS

A. Adult caretaker(s) or teen parent(s) have the right to a county dispute resolution conference or state level fair hearing pursuant to Colorado Department of Human Services rule sections 3.840 and 3.850 of Income Maintenance Volume 3, incorporated by reference in rule section 3.109.

B. Child care providers shall be informed of their right to a county dispute resolution conference on the reverse side of their copy of the child care authorization notice pursuant to Colorado Department of Human Services rule section 3.840, "C~~c~~ounty D~~d~~ispute R~~r~~esolution ~~p~~Process.~~"~~

3.145~~16.93~~ CHILD CARE RECOVERY

When the counties or their designee have determined that an adult caretaker(s) or teen parent(s) has received public assistance for which he or she was not eligible due to an increase in household income~~,~~ that causes the household's income exceeds eighty-five percent (85%) of the State median income~~;~~ or a

change in the qualifying eligible activity that was not reported within four (4) weeks of its occurrence; or a child care provider has received child care payments they were not eligible for:

A. The county, or its designee(s), must determines if the overpayment is to be recovered. Exception from recovery includes:

1. The household ~~who~~ is without fault in the creation of the overpayment; and,

2. The household ~~who~~ has reported any increase in income or change in resources or other circumstances affecting the household's eligibility within the timely reporting requirements for the program.

B. The county or its designee must determines whether there was willful misrepresentation and/or withholding of information and considers or rules out possible fraud;

C. The county or its designee must determines the amount of overpayment;

D. The county or its designee must ~~notifies~~ notify the household or child care provider(s) of the amount due and the reason for the recovery using the ~~prior~~ timely written notice rules; and

E. The county or its designee must enters the amount of the overpayment and other specific factors of the situation in the case record, including the calculation used to determine the recovery amount.

3.14~~616.94~~ TIMELINESS AND AMOUNT

A. A recovery for overpayment of public assistance is established when the overpayment occurred during the twelve (12) months preceding discovery and the facts to establish recovery have been received. However, when a single overpayment or several overpayments have been made within the prior twelve (12) months and the overpayments total less than fifty dollars ($50), a recovery for repayment is not made.

B. If an overpayment occurs due to willful misrepresentation or withholding of information and the county is unable to determine income and activity eligibility criteria for child care previously provided, either through verification from the ~~client~~ household or child care provider(s) or access to other verification sources, the county shall recover the entire benefit for the affected months.

1. For willful misrepresentation and/or withholding of information, all overpayments will be pursued regardless of how long ago they occurred.

3.14~~716.95~~ RECOVERY PROCESS

A. When ~~it is~~is the county ~~determined~~ determines that an overpayment has occurred, the counties or their designee shall:

1. Document the facts and situation that produced the overpayment and retain this documentation until the overpayment is paid in full or for three (3) years plus the current year, whichever is longer.

2. Determine what benefits the household was eligible for and recover benefits for which the household was found to be ineligible, except in the case of willful misrepresentation or withholding of information.

3. Determine the payments for which the child care provider was not eligible and recover those payments.

4. Initiate timely written notice allowing for the fifteen (15) calendar day noticing period. Such notice shall include a complete explanation, including applicable rules, concerning the overpayment, recovery sought and appeal rights.

5. Take action to recover following the right of appeal and fair hearing process.

6. Pursue all legal remedies available to the county in order to recover the overpayment. Legal remedies include, but are not limited to:

   a. Judgments;

   b. Garnishments;

   c. Claims on estates; and~~,~~

   d. The state income tax refund intercepts process.

7. In accordance with sections 26.5-4-119~~26-2-133~~ and 39-21-108, C.R.S., the state and counties or their designees may recover overpayments of public assistance benefits through the offset (intercept) of a taxpayer's State Income Tax Refund.

   a. This method may be used to recover overpayments that have been:

      1) Determined by final agency action;~~ or,~~

      2) Ordered by a court as restitution; or~~,~~

      3) Reduced to judgment.

   b. This offset (intercept) may include the current legal rate of interest on the total when fraud or intentional program violation has been determined. Offsets (intercepts) are applied to recoveries through use of a hierarchy. The hierarchy is:

      1) Fraud recoveries, oldest to newest;

      2) Court ordered recoveries, oldest to newest; and~~,~~

      3) Client error recoveries, oldest to newest.

B. Prior to certifying the taxpayer's name and other information to the Colorado Department of Revenue, the Department shall notify the taxpayer, in writing at ~~his/her~~their last-known address, that the ~~state~~ Department intends to use the tax refund offset (intercept) to recover the overpayment. In addition to the requirements of section 26.5-4-119(2)~~26-2-133(2)~~, C.R.S., the pre-offset (intercept) notice shall include the name of the counties claiming the overpayment, a reference to child care as the source of the overpayment, and the current balance owed. The taxpayer is entitled to object to the offset (intercept) by filing a request for a county dispute resolution conference or state hearing within thirty (30) calendar-days from the date that the pre-offset notice is mailed, faxed, emailed, sent via other electronic systems, or hand-delivered to the taxpayer. In all other respects, the procedures applicable to such hearings shall be those stated elsewhere in Colorado Department of Human Services rule sections 3.840 and ~~section~~ 3.850, and incorporated by reference in rule section 3.109, above. At the hearing on the offset (intercept), the counties or their designee, or an Administrative Law Judge (ALJ), shall not consider whether an overpayment has occurred, but may consider the following issues if raised by the taxpayer in ~~his/her~~their request for a hearing. ~~w~~Whether:

1. The taxpayer was properly notified of the overpayment;

2. The taxpayer is the person who owes the overpayment;

3. The amount of the overpayment has been paid or is incorrect; or

4. The debt created by the overpayment has been discharged through bankruptcy.

RULEMAKING PACKET

Reason and Justification of the proposed rule or amendment(s):	Compliance with Federal and/or State laws, mandates, or guidelines If there are "Multiple/Other" reasons, please explain:
Provide a description of the proposed rule or amendment(s) that is clearly and simply stated, and what CDEC intends to accomplish:	Annually, the Department updates the Federal Poverty Levels and the State Median Income levels in Rule and in CHATS, the automated system used by counties to administer Colorado Child Care Assistance Program (CCCAP), to align with each federal fiscal year updates. These guidelines are used to determine eligibility for families applying to the CCCAP program. These updated figures must be in rule in accordance with the Administrative Procedure Act, section 24-4-103, C.R.S., which requires the state to address in rule any general standard that is applied to the public (such as income eligibility for child care assistance). Lastly, technical changes have been made to this proposed rule to ensure compliance with statute, correct statutory references, and the consistent use of "Department" to provide clarity for readers of the rules.
Statutory Authority: (Include Federal Authority, if applicable)	45 CFR 98.16 (h), (k): Lead Agencies must establish income eligibility thresholds that do not exceed 85% of the State Median Income but that allows for gradual increases in income, and describe the sliding fee scale for cost-sharing by families. 26.5-1-105(1): The Executive Director is authorized to promulgate rules for the administration of the Department and for all programs and services specified in Title 26.5, which includes the Child Care Assistance Program outlined in part 1 of Article 4 of Title 26.5. 26.5-4-111(1), C.R.S. (2022): Pursuant to Department rules, counties shall provide child care assistance to a participant or any person or family whose income is not more than one hundred eighty-five percent of the federal poverty level pursuant to Department rules. The Executive Director by rule may adjust the percentage of the federal poverty level used to determine child care assistance eligibility by promulgating a rule and shall revise income and verification requirements that promote alignment and simplification.

Does the proposed rule or amendment(s) impact other State Agencies or Tribal Communities?	☐ Yes ☑ No If Yes, identify the State Agency and/or Tribal Community and describe collaboration efforts:
Does the proposed rule or amendment(s) have impacts or create mandates on counties or other governmental entities? (e.g., budgetary requirements or administrative burdens)	☐ Yes ☑ No If Yes, provide description:
Effective Date(s) of proposed rule or amendment(s): (**E**mergency/**P**ermanent)	☑ Mandatory ☐ Discretionary (E) Effective Date: 10/1/2023 (P) Effective Date: 12/30/2023 (E) Termination Date: 1/27/2024
Is the proposed rule or amendment(s) included on the Regulatory Agenda?	☑ Yes ☐ No If no, please explain:
Does the proposed rule or amendment(s) conflict, or are there inconsistencies with other provisions of law?	☐ Yes ☑ No If Yes, please explain:
Does the proposed rule or amendment(s) create duplication or overlapping of other rules or regulations?	☑ Yes ☐ No If Yes, explain why: Old Colorado Child Care Assistance Program rules are still available through the Secretary of State under CDHS Volume 3. Current and effective CCCAP rules are now available under CDEC 8 CCR 1403-1.
Does the proposed rule or amendment(s) include	☑ Yes ☐ No

material that is incorporated by reference[1]?	If Yes, provide source: There are several definitions and rules that incorporate Colorado Department of Human Services regulations, Colorado Revised Statutes, or federal materials for additional information and clarity.
Does the proposed rule or amendment(s) align with the department's rulemaking objectives? Choose all that apply.	☐ Reduce the administrative burden on families and providers accessing, implementing, or providing programs and/or services. ☐ Decrease duplication and conflicts with implementing programs and providing services. ☑ Increase equity in access and outcomes to programs and services for children and families. ☐ Increase administrative efficiencies among programs and services provided by the department. ☐ Ensure that rules are coordinated across programs and services so that programs are implemented and services are provided with improved ease of access, quality of family/provider experience, and ease of implementation by state, local, and tribal agencies.

Rulemaking Proceedings

Type of Rulemaking: Emergency or Permanent[2] [Permanent Tier I or Tier II]	Emergency and Permanent Tier II
Stakeholder Engagement and Data/Research: Examples: Webinar recordings/transcripts, written stakeholder comments, material from small/large focus groups, written petitions/requests, surveys, data, research, reports, published papers, and documents used to develop the proposed rule or amendment(s).	List of activities and dates: Counties will be made aware of the proposed rules during monthly, statewide meetings that are held by CCCAP between July 27, 2023, and October 26, 2023, after the rules go into effect. Counties will be formally notified of the rule via Operation Memo. Because we are mandated to make these revisions, the Department will not be requesting stakeholder feedback. Monthly Meeting Presentation Folder: https://drive.google.com/drive/folders/1t6ZfavsMF0G5tu1BLWMx0lwpuQjO2rh4?usp=sharing The Public Folder for the proposed draft rules and written comments.

[1] Incorporation by Reference is all or any part of a code, standard, guideline, or rule that has been adopted by an agency of the United States, this state, or another state, or adopted or published by a nationally recognized organization or association, pursuant to section 24-4-103(12.5), C.R.S.

[2] Tier I is used for proposed rule or amendment(s) that have substantive changes, require substantial stakeholder engagement, and will be considered at two Public Rulemaking Hearings (PRH). The first PRH is held for discussion, and the second PRH is held to consider adoption. Tier II is used for proposed rule or amendment(s) that include technical changes, do not require substantial stakeholder engagement, and will be considered at only one Public Rulemaking Hearing (PRH) for adoption.

Assistant Attorney General Review:	7/14/2023 - 8/30/2023
RAC County Subcommittee Review Date (if required):	9/7/2023
Rules Advisory Council (RAC) Review Date:	9/14/2023
Public Rulemaking Hearing Date(s): [Discussion/Adoption]	Emergency: 9/29/2023 Permanent: 10/27/2023

Regulatory and Cost Benefit Analysis

1. **Community Impact:** Provide a description of the stakeholders that will be affected by the proposed rule or amendment(s), and identify which stakeholders will bear the costs, and those who will benefit. How will the proposed rule or amendment(s) impact particular populations, such as those experiencing poverty, immigrant/refugee communities, non-English speakers, and rural communities?

   Counties that administer Colorado Child Care Assistance Program (CCCAP) will benefit from the rule, ensuring that eligibility is correctly determined across the state. Households receiving CCCAP will have their eligibility correctly determined under the new income amounts.

2. **Quality and Quantity:** Provide a description of the probable quantitative and qualitative impact on persons affected by the proposed rule or amendment(s), and comparison of the probable costs and benefits of implementation versus inaction. What are the short- and long-term consequences of the proposed rule or amendment(s).

   If income levels are not updated, the Department will not be in compliance with federal requirements. Additionally, families applying for services will not be determined eligible under the correct income guidelines if the income levels are not put into effect by October 1, 2023. Non-compliance could result in a loss of CCDF funds and would result in families being incorrectly denied for services.

3. **Potential Economic Benefits/Disadvantages:** What are the anticipated economic benefits of the proposed rule or amendment(s), such as: economic growth, creation of new jobs, and/or increased economic competitiveness? Are there any adverse effects on the economy, consumers, private markets, small businesses, job creation, and economic competitiveness?

   Making these required revisions ensures that families are correctly determined income eligible for CCCAP. Because the income figures have increased since October 2022, more families may be eligible for services based on these revisions.

4. **Fiscal Impacts:** What are the anticipated direct and indirect costs for the state/department to implement, administer, and enforce the proposed rule or amendment(s)? What are the direct and indirect costs to each of the following entities to comply with the proposed rule or amendment(s)? For each, describe the impact or indicate “not applicable.”

Department	No fiscal impact to the Department as the changes in CHATS are covered under standard operations.
Local Governments/ Counties	Counties may see a fiscal impact if we do *not* promulgate this rule package immediately as families that have lost benefits may be able to appeal their denial under the new income guidelines that the Department is required to implement.
Providers	The Federal Poverty Guideline and State Median Income figures do not apply to Child Care Providers for the purposes of CCCAP. Therefore, there is no direct impact on Child Care Providers.
Community Partners (e.g., School Districts, Early Childhood Councils, etc.)	The Federal Poverty Guideline and State Median Income figures do not apply to Community Partners. Therefore, there is no direct impact on this stakeholder group.
Other State Agencies	The changes to Federal Poverty Guideline and State Median Income figures do not impact other State Agencies.
Tribal Communities	Tribes have separate Child Care Development Fund (CCDF) requirements outlined in 45 CFR. As a result, there is no impact on Tribal Communities.

5. **Evaluation:** How will implementation of the proposed rule or amendment(s) be monitored and evaluated? Please include information about measures and indicators that CDEC will utilize, including information on specific populations (identified above).

Counties utilize the Child Care Automated Tracking System (CHATS) to determine eligibility for the Colorado Child Care Assistance Program (CCCAP). The revised figures are updated in CHATS and the new Federal Poverty Guidelines (FPG) and State Median Income (SMI) figures are automatically applied upon eligibility determination in the system. Compliance with the use of CHATS is monitored through the CCCAP County Monitoring Process, Quality Assurance Process, and other audits including those conducted by the Office of the State Auditor and the federal Office of Child Care, part of the U.S. Department of Health and Human Services.

6. **Comparative Analysis:** Provide at least two alternatives to the proposed rule or amendment(s) that can be identified, including the costs and benefits of pursuing each of the alternatives.

There are no alternatives to this rulemaking because the APA requires that these standards be promulgated in the rule and the numbers in regulation must be consistent with the federal guidelines.

7. **Comparative Analysis:** Are there less costly or less intrusive methods for achieving the purpose of the proposed rule or amendment(s)? Explain why those options were rejected.

There are no alternatives to this rulemaking because the APA requires that these standards be promulgated in the rule and the numbers in regulation must be consistent with the federal guidelines.

Subjects and issues involved

The Colorado Department of State is considering amendments to the campaign and political finance rules to ensure uniform and proper administration, implementation, and enforcement of Colorado campaign finance laws. Specifically, the Department is considering additional rule amendments to Rule 1.5 clarifying that a committee, in part, refers to a political party committee and Rule 10.17.1 updating the contribution limit that political parties must adhere to for contributions to candidates for Governor, Secretary of State, State Treasurer, Attorney General, State Senate, State House of Representatives, State Board of Education, Regent of the University of Colorado, and District Attorney. The Department may consider additional rule amendments. Please see attached Notice of Permanent Rulemaking including a Draft Statement of Basis.

Preliminary Draft of Proposed Rules

Colorado Department of State
Rules Concerning Campaign and Political Finance
8 CCR 1505-6

September 15, 2023

Disclaimer:
In accordance with the State Administrative Procedure Act, this draft is filed with the Department of State and submitted to the Department of Regulatory Agencies.[1]

This is a preliminary draft of the proposed rules that may be revised before the October 17, 2023, rulemaking hearing. If changes are made, a revised copy of the proposed rules will be available to the public and a copy will be posted on the Department of State's website no later than **October 12, 2023**.[2]

Please note the following formatting key:

Font effect	Meaning
Sentence case	Retained/modified current rule language
SMALL CAPS	New language
~~Strikethrough~~	Deletions
Italic blue font text	Annotations

Amendments to 8 CCR 1505-6 follow:

Amendment to Rule 1.5 to clarify that a committee refers to a political party committee, not the entire political party:

1.5 "Committee" as used generally in these rules includes candidate committee, political committee, small donor committee, issue committee, small-scale issue committee, independent expenditure committee, political party COMMITTEE, and political organization.

Amendments to Rule 10.17 concerning a grammatical error in section (a) and updating a numerical miscalculation from 2015 within section (i)'s table:

10.17 Current adjusted limits

10.17.1 Adjusted limits made in the first quarter of 2023 and effective until the next adjustment is made in 2027:

---

[1] Sections 24-4-103(2.5) and (3)(a), C.R.S. (2022). A draft must be submitted to the Department at the time that a notice of proposed rulemaking is filed with the Secretary of State.
[2] Section 24-4-103(4)(a), C.R.S. (2022). "[A]ny proposed rule or revised proposed rule by an agency which is to be considered at the public hearing…shall be made available to any person at least five days prior to said hearing."

(a) There is no adjustment to the contribution limits on individual donations to small donor committees outlined in COLO. CONST. Article XXVIII, Section 2(14).

[No changes to sections (b) through (h).]

(i) This table contains the contribution limits listed in subsections (a)-(h).

Recipient:	Contributor:				
	Natural Person	Person, other than a natural person	Political committee	Small donor committee	Political party
Political committee	$725 per election cycle	$725 per election cycle	$725 per election cycle	$725 per election cycle	$725 per election cycle

School district director	$2,500 per election cycle	$2,500 per election cycle	$2,500 per election cycle	$25,000 per election cycle	$2,500 per election cycle

* A candidate may accept the contribution limit for both the primary election and the general election.

STATE OF COLORADO
Department of State
1700 Broadway, Suite 550
Denver, CO 80290

Jena M. Griswold
Secretary of State
Christopher P. Beall
Deputy Secretary of State

Notice of Proposed Rulemaking

Colorado Department of State
Rules Concerning Campaign and Political Finance
8 CCR 1505-6

Date of notice: September 15, 2023
Date and time of public hearing: October 17, 2023, at 1:00 p.m.

I. Hearing Notice

As required by the State Administrative Procedure Act,[1] the Colorado Department of State gives notice of proposed rulemaking. The hearing is scheduled for October 17, 2023, at 1:00 p.m. in the Red Rocks Conference Room on the 5th floor of the Department of State's office at 1700 Broadway, Denver, CO 80290. **This meeting will be conducted in person and via webinar.** Details regarding how to join the webinar and testify online during the hearing are outlined in section VI of this notice.

II. Subject

The Department is considering amendments to the rules concerning campaign and political finance[2] to improve the administration and enforcement of Colorado campaign finance law.[3]

Specifically, the Department is considering additional rule amendments to Rule 1.5 clarifying that a committee, in part, refers to a political party committee and Rule 10.17 updating the contribution limit that political parties must adhere to for contributions to candidates for Governor, Secretary of State, State Treasurer, Attorney General, State Senate, State House of Representatives, State Board of Education, Regent of the University of Colorado, and District Attorney.

A detailed Statement of Basis, Purpose, and Specific Statutory Authority follows this notice and is incorporated by reference.

III. Statutory and constitutional authority

The Department proposes the rule revisions and amendments in accordance with the following statutory and constitutional provisions:

[1] Section 24-4-103(3)(a), C.R.S. (2022).
[2] 8 CCR 1505-CCR 6.
[3] Article 45 of Title 1, C.R.S. (2022).

- Article XXVIII, Section 3(13) of the Colorado Constitution, which requires the Secretary of State to "calculate . . . and specify [contribution] limits in rules promulgated in accordance with article 4 of title 24, C.R.S., or any successor section."

- Article XXVIII, Section 8 of the Colorado Constitution, which requires the Secretary of State to "promulgate rules related to filing in accordance with article 4 of title 24, C.R.S."

- Article XXVIII, Section 9(1)(b) of the Colorado Constitution, which requires the Secretary of State to "[p]romulgate such rules, in accordance with article 4 of title 24, C.R.S., or any successor section, as may be necessary to administer and enforce any provision of [Article XVIII of the Colorado State Constitution]."

- Section 1-1-107(2)(a), C.R.S., (2022), which authorizes the Secretary of State "[t]o promulgate, publish and distribute…such rules as the secretary of state finds necessary for the proper administration and enforcement of the election laws."

- Section 1-45-111.5(1), C.R.S., (2022), which requires the Secretary of State to promulgate such rules "as may be necessary to enforce and administer any provision of" Article 45 of Title 1, C.R.S.

IV. Copies of draft rules

A preliminary draft of the proposed rules is posted on the Department of State's rules and notices of rulemaking website at:
https://www.coloradosos.gov/pubs/rule_making/hearings/2023/CPFRulesHearing20231017.html
.

You may also contact our office to request an editable electronic copy of the draft rules.

As required by the State Administrative Procedures Act,[4] if changes are made before the hearing, revised proposed draft rules will be available to the public and posted on the website by **October 12, 2023**.

V. Opportunity to testify and submit written comments

The Department values your feedback in our rulemaking process, and we would very much like to hear your thoughts on the proposed amendments. Please review and consider the attached proposed draft rules.

Everyone will have the opportunity to testify and provide written comments concerning the rule amendments. You may submit written comments to SoS.Rulemaking@coloradosos.gov any time before and during the hearing. If you attend the hearing in person, you may submit written comments to the hearing panel as well. An additional opportunity to comment in writing will be

[4] Section 24-4-103(3)(a), C.R.S. (2022). "Any proposed rule or revised proposed rule by an agency which is to be considered at the public hearing…shall be made available to any person at least five days prior to said hearing."

announced at the conclusion of the hearing. Information regarding how to testify via webinar during the hearing is provided in section VI of this notice.

All written comments will be posted online on the Department of State's website: https://www.coloradosos.gov/pubs/rule_making/hearings/2023/CPFRulesHearing20231017.html .

We will redact apparent personal contact information, including home address, email address, and telephone number(s), from submissions before posting the information online, unless otherwise directed by the contributor. All written comments will be added to the official rulemaking record.

VI. Webinar and audio recording of hearing

Register to attend online
To join and listen to the hearing, you must register for the webinar: https://attendee.gotowebinar.com/register/1119092164225954396.

When you register, you must provide your full name and email address. Please provide additional contact information, including your address and telephone number. You may also provide your job title and organization. Lastly, indicate whether you plan to testify during the hearing. When you submit your registration, you should receive a confirmation email including details about how to join the webinar.

Hybrid hearing procedures
After the introduction and a brief summary of the rulemaking, we will open the hearing to testimony as follows:

- For the sake of efficiency, in-person attendees will be called upon first to provide their public comment. We will reference the sign-in sheet provided and individually call upon attendees who wish to provide their testimony. Once we have exhausted the in-person sign-in sheet, we will move forward with the testimony of online attendees.

- Referencing webinar registration records, we will identify and individually unmute online attendees who indicated their intent to testify during the hearing.

- Once we have exhausted that list, we will ask whether any additional attendees wish to testify. In-person attendees may raise their hands to indicate their intention to testify, and online attendees may raise/lower their hand by clicking the icon in their control panel.

- To ensure that the hearing is prompt and efficient, oral testimony may be time limited.

Before the hearing concludes, we will announce an additional opportunity to submit written comments and the associated deadline.

Webinar audio requirements
Please be advised: we strongly encourage attendees to join the webinar through their computer or the GoToWebinar app, even if they use their telephone to dial in for audio. To testify during the

hearing, you must use a computer or the GoToWebinar app to be unmuted and to utilize the "raise hand" feature within the webinar. If you access the webinar only by telephone, you may not appear in our webinar attendee list, meaning we will not be able to unmute you. Moreover, the raise your hand feature is only available to attendees who access the webinar by computer or by app. For the best audio, it is best to use your computer microphone and speakers or a headset or headphones, if you choose to testify. As outlined above, we will first receive online testimony from attendees whose registration indicates that they plan to provide testimony and then we will offer attendees the option to raise their hand.

Audio recording
After the hearing concludes, a recording will be available on our audio broadcasts page here: https://www.coloradosos.gov/pubs/info_center/audioBroadcasts.html.

Office contact

If you have any questions or would like to submit written comments, please contact the Rulemaking and Legislative Policy Analyst at SoS.Rulemaking@coloradosos.gov or (303) 894-2200 ext. 6124.

Draft Statement of Basis, Purpose, and Specific Statutory Authority

Colorado Department of State
Rules Concerning Campaign and Political Finance
8 CCR 1505-6

September 15, 2023

I. Basis and Purpose

This statement explains proposed amendments to the Colorado Department of State rules concerning campaign and political finance.[1] The amendments are intended to ensure uniform and proper administration, implementation, and enforcement of Colorado campaign finance law[2] as follows:

- Amendments to Rule 1.5 clarify that a committee, in part, refers to a political party committee.

- Amendments to Rule 10.17.1 update incorrect contributions limits from political parties to the following elected offices: Governor, Secretary of State, State Treasurer, Attorney General, State Senate, State House of Representatives, State Board of Education, Regent of the University of Colorado, and District Attorney.

Other changes to rules not specifically listed are non-substantive and necessary for consistency with Department rulemaking format and style. Cross-references in rules are also corrected or updated.

II. Rulemaking Authority

The constitutional and statutory authority is as follows:

- Article XXVIII, Section 3(13) of the Colorado Constitution, which requires the Secretary of State to "calculate . . . and specify [contribution] limits in rules promulgated in accordance with article 4 of title 24, C.R.S., or any successor section."

- Article XXVIII, Section 8 of the Colorado Constitution, which requires the Secretary of State to "promulgate rules related to filing in accordance with article 4 of title 24, C.R.S."

[1] 8 CCR 1505-6.
[2] Article 45 of Title 1, C.R.S. (2022).

- Article XXVIII, Section 9(1)(b) of the Colorado Constitution, which requires the Secretary of State to "[p]romulgate such rules, in accordance with article 4 of title 24, C.R.S., or any successor section, as may be necessary to administer and enforce any provision of [Article XVIII of the Colorado State Constitution]."

- Section 1-1-107(2)(a), C.R.S., (2022), which authorizes the Secretary of State "[t]o promulgate, publish and distribute…such rules as the secretary of state finds necessary for the proper administration and enforcement of the election laws."

- Section 1-45-111.5(1), C.R.S., (2022), which requires the Secretary of State to promulgate such rules "as may be necessary to enforce and administer any provision of" Article 45 of Title 1, C.R.S.

Preliminary Draft of Proposed Rules

Colorado Department of State
Rules Concerning Campaign and Political Finance
8 CCR 1505-6

September 15, 2023

Disclaimer:
In accordance with the State Administrative Procedure Act, this draft is filed with the Department of State and submitted to the Department of Regulatory Agencies.[1]

This is a preliminary draft of the proposed rules that may be revised before the October 17, 2023, rulemaking hearing. If changes are made, a revised copy of the proposed rules will be available to the public and a copy will be posted on the Department of State's website no later than **October 12, 2023**.[2]

Please note the following formatting key:

Font effect	Meaning
Sentence case	Retained/modified current rule language
SMALL CAPS	New language
~~Strikethrough~~	Deletions
Italic blue font text	Annotations

Amendments to 8 CCR 1505-6 follow:

Amendment to Rule 1.5 to clarify that a committee refers to a political party committee, not the entire political party:

1.5 "Committee" as used generally in these rules includes candidate committee, political committee, small donor committee, issue committee, small-scale issue committee, independent expenditure committee, political party COMMITTEE, and political organization.

Amendments to Rule 10.17 concerning a grammatical error in section (a) and updating a numerical miscalculation from 2015 within section (i)'s table:

10.17 Current adjusted limits

10.17.1 Adjusted limits made in the first quarter of 2023 and effective until the next adjustment is made in 2027:

---

[1] Sections 24-4-103(2.5) and (3)(a), C.R.S. (2022). A draft must be submitted to the Department at the time that a notice of proposed rulemaking is filed with the Secretary of State.
[2] Section 24-4-103(4)(a), C.R.S. (2022). "[A]ny proposed rule or revised proposed rule by an agency which is to be considered at the public hearing…shall be made available to any person at least five days prior to said hearing."

(a) There is no adjustment to the contribution limits on individual donations to small donor committees outlined in COLO. CONST. Article XXVIII, Section 2(14).

[No changes to sections (b) through (h).]

(i) This table contains the contribution limits listed in subsections (a)-(h).

Recipient:	Contributor:				
	Natural Person	Person, other than a natural person	Political committee	Small donor committee	Political party
Political committee	$725 per election cycle	$725 per election cycle	$725 per election cycle	$725 per election cycle	$725 per election cycle
Small donor committee	$50 per year	Prohibited	Prohibited	Prohibited	Prohibited
Governor (governor & lt. governor)	$725 per election cycle*	$725 per election cycle*	$725 per election cycle*	$7,825 per election cycle*	~~$789,025~~789,060 per election cycle
Secretary of state, state treasurer, attorney general	$725 per election cycle*	$725 per election cycle*	$725 per election cycle*	$7,825 per election cycle*	~~$157,750~~157,805 per election cycle
State senate	$225 per election cycle*	$225 per election cycle*	$225 per election cycle*	$3,100 per election cycle*	~~$28,375~~28,395 per election cycle
State house of representatives, state board of education, regent of the University of Colorado, district attorney	$225 per election cycle*	$225 per election cycle*	$225 per election cycle*	$3,100 per election cycle*	~~$20,475~~20,500 per election cycle
Political party	$4,675 ($3,875 at the state level) per year	$4,675 ($3,875 at the state level) per year	$4,675 ($3,875 at the state level) per year	$23,600 ($19,650 at the state level) per year	Transfers within a party may be made without limitation.
County candidate	$1,425 per election cycle*	$1,425 per election cycle*	$1,425 per election cycle*	$14,400 per election cycle*	$25,475 per election cycle
School district director	$2,500 per election cycle	$2,500 per election cycle	$2,500 per election cycle	$25,000 per election cycle	$2,500 per election cycle

* A candidate may accept the contribution limit for both the primary election and the general election.

Regulation 47-004. Fermented Malt Beverages On or On/Off - Possession of Alcohol Liquors.

Basis and Purpose. The statutory authority for this regulation is located at subsections 44-3-202(1)(b), 44-3-202(2)(a)(I)(A), 44-4-104(1)(c)(I)(A), and 44-4-107(1), C.R.S. The purpose of this regulation is to prohibit possession and consumption of vinous or spirituous liquors on a fermented malt beverage on or on/off licensee's licensed premises.

A. Except as provided by subsection 44-3-107(2), C.R.S., no Fermented Malt Beverage On or On/Off retailer licensed pursuant to article 4 of title 44, C.R.S., shall allow the sale, possession, or consumption of vinous or spirituous liquor on its licensed premises.

B. Except as provided in subsection 44-3-107(2), C.R.S., no person shall possess or consume vinous or spirituous liquor on the licensed premises of a Fermented Malt Beverage On or On/Off retailer licensed pursuant to article 4 of title 44, C.R.S.

C. Except as provided by subsection 44-3-107(2), C.R.S. no Fermented Malt Beverage and Wine Retailer licensed pursuant to article 4 of Title 44, C.R.S., shall allow the sale, possession, or consumption of spirituous liquor on its licensed premises.

D. Except as provided in subsection 44-3-107(2), C.R.S., no person shall possess or consume spirituous liquor on the licensed premises of a Fermented Malt Beverage and Wine Retailer licensed pursuant to article 4 of title 44, C.R.S.

Regulation 47-008. Fermented Malt Beverages - Limitations of License.

Basis and Purpose. The statutory authority for this regulation includes, but is not limited to, subsections 44-3-202(1)(b), 44-3-202(2)(a)(I)(A), 44-3-202(2)(a)(I)(RA), 44-4-107(1), 44-3-901(6)(k), and 44-3-911(6)(a)(I), C.R.S. The purpose of this regulation is to differentiate fermented malt beverage on-premises retailers, fermented malt beverage and wine retailers, and fermented malt beverage on- and off-premises retailers and clarify what activities are permitted under each license type.

A. Fermented Malt Beverage retailers licensed for on-premise consumption under 44-4-107(1)(b), C.R.S. shall not sell or permit the removal from the licensed premises of any fermented malt beverages in sealed containers unless:

   1. A special event is being conducted pursuant to subsection 44-3-107(2), C.R.S.; or

   2. A licensee is selling fermented malt beverages in sealed containers for take-out pursuant to 44-3-911(6)(a)(I), C.R.S.

B. Fermented Malt Beverage and Wine Retailers licensed for off-premises consumption under 44-4-107(1)(a)(1), C.R.S., shall not allow open containers of fermented malt beverage or wine on their licensed premises unless:

   1. A sampling for the fermented malt beverage and wine retailer is being provided pursuant to subsection 44-3-901(6)(k)(II)(B), C.R.S.;

2. A tasting is being conducted by the fermented malt beverage and wine retailer pursuant to 44-3-901(6)(k)(IV), C.R.S.; or

3. A damaged or defective product is present in order to be returned and is stored outside the sales area of the licensed premises until such time that the product can be returned to the wholesaler.

C. Fermented Malt Beverages retailers licensed for both on- and off-premises consumption under 44-7-107(1)(c)(I), C.R.S., when using the privileges for on-premises consumption shall not allow removal of fermented malt beverages from its licensed premises, unless:

1. The fermented malt beverage retailer licensed for both on- and off-premises consumption is providing the fermented malt beverage for take-out pursuant to section 44-3-911(6)(a)(I), C.R.S.

Regulation 47-009. Fermented Malt Beverage and Wine Retailer Licenses Distance Requirement.

Basis and Purpose. The statutory authority for this regulation is found at subsections 44-3-202(1)(b), 44-3-202(2)(a)(I)(A), 44-3-202(2)(a)(I)(D), 44-3-202(2)(a)(I)(R), 44-3-202(2)(a)(I)(O), and 44-3-301(12), C.R.S. The purpose of this regulation is to clarify the distance restrictions for new fermented malt beverage and wine retailer applicants as well as the availability of the exception to the statutory distance requirement.

A. The exceptions to the five hundred (500) foot distance restriction set forth in subsection 44-3-301(12)(a.5)(II)(A) and (B), C.R.S., shall apply only if, prior to January 1, 2019, the structure for which a building permit or certificate of occupancy has been timely applied for or received was intended for use as a fermented malt beverage retailer licensed premises at the time of submitting the application for the building permit or certificate of occupancy.

Regulation 47-010. Items Approved for Sale in Fermented Malt Beverage and Wine Retailer Licenses.

Basis and Purpose. The statutory authority for this regulation includes, but is not limited to, subsections 44-4-107(3)(c), 44-3-202(1)(b), 44-3-202(2)(a)(I)(A), 44-3-202(2)(a)(I)(D), 44-3-202(2)(a)(I)(R), and 44-3-202(2)(a)(I)(O), C.R.S. The purpose of this regulation is to define how applicable licensees must report and demonstrate compliance concerning this specific statutory requirement.

A. To demonstrate compliance with subsection 44-4-107(3), C.R.S., if applicable, the applicant or licensee must affirm on its new and annual renewal application that the license derives or will derive at least twenty (20) percent of its gross annual revenues from total sales from the sale of food items for consumption off the premises. The exceptions to the foregoing requirement, set forth in subsections 44-4-107(3)(d)(I) and (II), C.R.S., shall apply only if, prior to January 1, 2019, the structure for which a building permit or certificate of occupancy has been applied for or received was intended for use as a fermented malt beverage retailer licensed premises at the time of submitting the application for a building permit or certificate of occupancy.

B. Nothing within this regulation shall limit the authority of the state licensing authority to inspect books and records pursuant to Regulation 47-700, 1 C.C.R. 203-2, to verify this affirmation or compliance with this statutory requirement.

Regulation 47-100. Definitions.

Basis and Purpose. The statutory authority for this regulation includes, but is not limited to, subsections 44-3-202(1)(b), ~~and~~ 44-3-202(2)(a)(I)(A), and 44-3-202(2)(a)(I)(R), C.R.S. The purpose of this regulation is to ensure consistent application and interpretation of common terms within the relevant articles.

A. "Licensed, licensee, and licensed premises" mean persons or premises issued a license or permit under Articles 3, Articles 4 and Article 5 of Title 44.

B. "Manufacturer" means a Colorado licensed brewery, winery, limited winery, distillery, vintner's restaurant, distillery pub or brew pub as defined by section 44-3-103, C.R.S.

C. "Nonresident manufacturer" means a Colorado licensee that manufactures malt liquor or fermented malt beverages outside the state of Colorado and has been issued a Brewer's Notice by the Alcohol and Tobacco Tax and Trade Bureau.

D. "On-site product sales promotion" means a sales promotion, featuring a particular brand of alcohol beverage, that is conducted on a retailer's licensed premises by an alcohol beverage supplier. On-site product sales promotion may include drink specials, product sampling and the giveaway of consumer goods.

E. "Sponsored event" means an event supported in whole or in part by a licensed supplier that is conducted at a retail licensed establishment.

F. "Supplier" means a Colorado licensed brewery, winery, distillery, brew pub, distillery pub, vintner's restaurant, limited winery, nonresident manufacturer, wholesaler or importer of alcohol beverages.

G. "Retailer" or an entity "licensed to sell at retail" means those persons licensed pursuant to sections 44-3-401(1)(h) – (t) and (v – w), C.R.S., and section 44-4-104(1)(c), C.R.S. to sell alcohol beverages to the end consumer.

H. "Unreasonable noise" means a level of noise that violates local noise ordinance standards, or where no local noise ordinance standard exists, a level of noise that would violate section 25-12-103, C.R.S.

I. "Wholesaler" means those entities authorized to sell alcohol beverages at wholesale to licensed retailers, including wholesalers of fermented malt beverages, malt liquors, vinous and spirituous liquors, limited wineries, brew pubs, distillery pubs, and vintner's restaurants.

J. "Sandwiches" as used in articles 3 and 5 of Title 44, C.R.S. are defined as single-serving items such as hamburgers, hot dogs, frozen pizzas, burritos, chicken wings, or items of a similar nature. "Light snacks" as used in articles 3 and 5 of Title 44, C.R.S. are defined as popcorn, pretzels, nuts, chips, or items of a similar nature.

K. "Colorado Liquor Code" or "Liquor Code" means article 3 of title 44, C.R.S.

L. "Colorado Beer and Wine Code" or "Beer and Wine Code" means article 4 of title 44, C.R.S.

M. "Special Event Code" means article 5 of title 44, C.R.S.

N. "Colorado Liquor Rules" means this regulatory article, 1 C.C.R. 203-2.

O. "Division" means the State of Colorado Department of Revenue's Liquor Enforcement Division, except as provided otherwise.

P. "Communal Outdoor Dining Area" means an outdoor space that is used for food and alcohol beverage service by two or more licensees licensed under article 3 or article 4 of title 44, C.R.S. as a:

1. Tavern;

2. Hotel and Restaurant;

3. Brew Pub;

4. Distillery Pub;

5. Vintner's Restaurant;

6. Beer and Wine Licensee;

7. Manufacturer that operates a sales room authorized under section 44-3-402(2) or (7), C.R.S.;

8. Beer wholesaler that operates a sales room under section 44-3-407(1)(b)(I), C.R.S.;

9. Limited Winery;

10. Lodging and Entertainment Facility;

11. Optional Premises; or

12. Fermented Malt Beverage Retailer licensed for consumption on the premises.

Regulation 47-200. Petitions for Statements of Position and Declaratory Orders Concerning the Colorado Liquor Code, Colorado Beer and Wine Code, Special Event Code, or Colorado Liquor Rules.

Basis and Purpose. The statutory authority for this regulation includes, but is not limited to, subsections 44-3-202(1)(b), 44-3-202(2)(a)(I)(R), and 24-4-105(11), C.R.S. The purpose of this regulation is to establish clear and comprehensive procedures and considerations required for a statement of position and/or a declaratory order.

A. Statements of Position. Any person may petition the Division for a statement of position concerning the applicability to the petitioner of any provision of the Liquor Code, Beer and Wine Code, Special Event Code, or Colorado Liquor Rules. The petition must include the information set forth in paragraph (E)(1)-(E)(6) of this regulation.

B. Service of Petition for Statement of Position. A letter for petition for a statement of position shall be served on the Division by mailing or emailing such petition to the Division with a copy sent on the same date to the local licensing authority in the county or municipality where the petitioner's licensed premises or proposed licensed premises are located, if applicable. Each petition for a statement of position shall contain a certification that the service requirements of this paragraph have been met.

C. Time to Respond. The Division shall respond to a petition for statement of position in writing within forty-five (45) days of receiving such petition and set forth its position and the reasons therefore, or the grounds on which the division declines to provide a statement of position, pursuant to section 24-4-105(11), C.R.S., and/or paragraph (G) of this regulation.

D. Declaratory Orders. Any person who has petitioned the Division for a statement of position and who is dissatisfied with the statement of position may petition the state licensing authority within forty-five (45) days of the issuance of the statement of position for a declaratory order pursuant to section 24-4-105(11), C.R.S. Furthermore, any person who has not received a response within forty-five (45) days, may petition the state licensing authority for a declaratory order pursuant to section 24-4-105(11), C.R.S. The parties to any petition for a declaratory order pursuant to this regulation shall be the petitioner and the Division.

E. Requirements for a Petition for a Statement of Position or a Petition for Declaratory Order. Each petition for a statement of position or petition for a declaratory order shall set forth the following:

1. The name and address of the petitioner; whether the petitioner is licensed pursuant to the Liquor Code, Beer and Wine Code, or Special Events Code and if so, the type of license or permit and address of the licensed premises.

2. The statute, rule, or order to which the petition relates.

3. A concise statement of all of the facts necessary to show the nature of the controversy or the uncertainty as to the applicability to the petitioner of the statute, rule or order to which the petition relates.

4. A concise statement of the legal authorities if any, and such other reasons upon which petitioner relies.

5. A concise statement of the statement of position or declaratory order sought by the petitioner.

6. The Statement of Position previously issued if the petitioner is filing a Petition for a Declaratory Order.

F. Service of Petition for Declaratory Order. A petition for a declaratory order shall be served on the state licensing authority by mailing such petition to the state licensing authority with a copy of the petition sent on the same date to the Division, the local licensing authority in the county or municipality where the petitioner's licensed premises or proposed licensed premises are located, and to the Revenue & Utilities Section of the Colorado Department of Law. Each petition for a declaratory order shall contain a certification that the service requirements of this paragraph have been met.

G. Acceptance. The Division will determine whether to entertain any petition for statement of position. The state licensing authority will determine whether to entertain any petition for declaratory order. If either the Division or the state licensing authority decides it will not entertain a petition, it shall promptly notify the petitioner in writing of its decision and the reasons for that decision. Any of the following grounds may be sufficient reason to refuse to entertain a petition:

1. For a petition for declaratory order, the petitioner has failed to petition the Division for a statement of position, or if a statement of position has been issued, the petition for declaratory order was filed with the state licensing authority more than forty-five (45) days after issuance of the statement of position.

2. A ruling on the petition will not terminate the controversy nor remove uncertainties concerning the applicability to petitioner of the statute, rule or order in question.

3. The petition involves a subject, question or issue which is currently involved in a court action, an administrative action before the state or any local licensing authority, ongoing investigation conducted by the Division or a written complaint filed with the state licensing authority or Division.

4. The petition seeks a ruling on a moot or hypothetical question, having no applicability to the petitioner.

5. Petitioner has some other adequate legal remedy, other than an action for declaratory relief pursuant to Colo.R.Civ.P. 57, which will terminate the controversy or remove any uncertainty concerning applicability of the statute, rule or order.

6. The petitioner failed to properly serve the petition pursuant to this regulation.

7. The petitioner failed to include information required in paragraph (E) of this regulation.

H. Determination. If the state licensing authority determines that it will entertain the petition for declaratory order, it shall promptly so notify all parties involved, and the following procedures shall apply:

1. The state licensing authority may expedite the hearing, where the interests of the petitioner will not be substantially prejudiced thereby, by ruling on the basis of the facts and legal authority presented in the petition, or by requesting the petitioner or the Division to submit additional evidence and legal argument in writing. Any such request for additional information shall be served on all parties.

2. If the state licensing authority determines that an evidentiary hearing or legal argument is necessary to a ruling on the petition, the state licensing authority shall issue a Notice to Set to all parties and on the date so set, a hearing shall be conducted in conformance with section 24-4-105, C.R.S.

3. In ruling on a petition for declaratory order, the state licensing authority may take administrative notice of general, technical or scientific facts within its knowledge, so long as the fact is specified in the record or is brought to the attention of the parties before final decision and every party is afforded an opportunity to controvert the fact so noticed.

4. Every declaratory order shall be promptly decided and issued in writing, specifying the basis in fact and law for the order.

5. Any other interested person may seek leave of the state licensing authority to intervene in the proceeding and such leave may be granted if the licensing authority determines that such intervention will make unnecessary a separate petition for declaratory order by the interested person.

6. A declaratory order shall constitute final agency action subject to judicial review pursuant to section 24-4-106, C.R.S.

I. Record Retention and Reliability. Files of all requests, statements of position, and declaratory orders will be maintained and relied upon by the Division for a period of five (5) years, unless the statement of position or declaratory order is superseded by a statutory or regulatory change, amended by the Division, or amended or reversed by the state licensing authority. Except with respect to any material required by law to be kept confidential, such files shall be available for public inspection.

Regulation 47-302. Changing, Altering, or Modifying Licensed Premises.

Basis and Purpose. The statutory authority for this regulation includes, but is not limited to, subsections 44-3-202(1)(b), 44-3-202(2)(a)(I)(A), 44-3-202(2)(a)(I)(D), and 44-3-202(2)(a)(I)(R), C.R.S. The purpose of this regulation is to establish procedures for a licensee seeking to make material or substantial alterations to the licensed premises, and provide factors the licensing authority must consider when evaluating such alterations for approval or rejection.

A. After issuance of a license, the licensee shall make no physical change, alteration or modification of the licensed premises that materially or substantially alters the licensed premises or the usage of the licensed premises from the latest approved plans and specifications on file with the state and local licensing authorities without application to, and the approval of, the respective licensing authorities.

For purposes of this regulation, physical changes, alterations or modifications of the licensed premises, or in the usage of the premises requiring prior approval, shall include, but not be limited to, the following:

1. Any increase or decrease in the total size or capacity of the licensed premises.

2. The sealing off, creation of or relocation of a common entryway, doorway, passage or other such means of public ingress and/or egress, when such common entryway, doorway or passage alters or changes the sale or distribution of alcohol beverages within the licensed premises.

3. Any substantial or material enlargement of a bar, relocation of a bar, or addition of a separate bar. However, the temporary addition of bars or service areas to accommodate seasonal operations shall not require prior approval unless the additional service areas are accompanied by an enlargement of the licensed premises.

4. An outside service area located on a property owned by a municipality, a city and county, or the unincorporated area of a county, and that the licensee possesses in accordance with subsection (B)(2) of this regulation, may be approved by the state and local licensing authorities upon the annual filing of a modification of premises application, due at the time of initial application or at the time of renewal, on a form approved by the State Licensing Authority, and payment of the associated modification of licensed premises fee as set forth in Regulation 47-506, provided that:

   a. The proposed outside service area located on property owned by the municipality, city and county, or unincorporated areas of a county, is immediately adjacent to the licensed premises;

   b. The licensed premises, as temporarily modified, will comprise a definite contiguous area;

   c. Plans and specifications identifying the outside service area, including dates of seasonal operation (if applicable), accompany the form and fee;

   d. Licensees shall maintain records of the dates alcohol service occurs on the outside service area if such space is used seasonally or sporadically, and must provide records to the Division upon request; and

e. All outside service areas are closed to motor vehicle traffic by physical barriers during all times that alcohol service occurs.

5. Any material change in the interior of the premises that would affect the basic character of the premises or the physical structure detailed in the latest approved plans and specifications on file with the state and local licensing authorities. However, the following types of modifications will not require prior approval, even if a local building permit is required: painting and redecorating of premises; the installation or replacement of electric fixtures or equipment, plumbing, refrigeration, air conditioning or heating fixtures and equipment; the lowering of ceilings; the installation and replacement of floor coverings; the replacement of furniture and equipment; and any non-structural remodeling where the remodel does not expand or reduce the existing area designed for the display or sale of alcohol beverage products.

6. The destruction or demolition, and subsequent reconstruction, of a building that contained the retailer's licensed premises shall require the filing of new building plans with the local licensing authority, or in the case of manufacturers and wholesalers, with the state licensing authority. However, reconstruction shall not require an application to modify the premises unless the proposed plan for the newly-constructed premises materially or substantially alters the licensed premises or the usage of the licensed premises from the plans and specifications detailed in the latest approved plans and specifications on file with the state and local licensing authorities.

7. Nothing herein shall prohibit a licensee from modifying its licensed premises to include in the licensed premises a public thoroughfare, if the following conditions are met:

   a. The licensee has been granted an easement for the public thoroughfare for the purpose of transporting alcohol beverages;

   b. The public thoroughfare is authorized solely for pedestrian and non-motorized traffic;

   c. The inclusion of the public thoroughfare is solely for the purpose of transporting alcohol beverages between licensed areas, and no sale or consumption will occur on or within the public thoroughfare; and

   d. Any other conditions as established by the local licensing authority.

8. The addition of a noncontiguous location to the licensed premises of a winery licensed pursuant to sections 44-3-402 or 44-3-403, C.R.S.

9. Modification of the licensed premises to include a communal outdoor dining area, subject to the requirements of section 44-3-912, C.R.S., and Regulation 47-1103.

B. In making its decision with respect to any proposed changes, alterations or modifications, the licensing authority must consider whether the premises, as changed, altered or modified, will meet all of the pertinent requirements of the Liquor or Beer and Wine Codes and related regulations. Factors to be taken into account by the licensing authority shall include, but not be limited to, the following:

1. The reasonable requirements of the neighborhood and the desires of the adult inhabitants.

2. The possession, by the licensee, of the changed premises by ownership, lease, rental or other arrangement.

3. Compliance with the applicable zoning laws of the municipality, city and county or county.

4. Compliance with the distance prohibition in regard to any public or parochial school or the principal campus of any college, university, or seminary.

5. The legislative declaration that the Liquor and Beer and Wine Codes are an exercise of the police powers of the state for the protection of the economic and social welfare and the health, peace, and morals of the people of this state.

C. If permission to change, alter or modify the licensed premises is denied, the licensing authority shall give notice in writing and shall state grounds upon which the application was denied. The licensee shall be entitled to a hearing on the denial if a request in writing is made to the licensing authority within fifteen (15) days after the date of notice.

D. This regulation shall be applicable to the holder of a manufacturer's license as specifically defined in Section 44-3-402, C.R.S., or a limited winery defined in section 44-3-403, C.R.S., only if the physical change, alteration, or modification involves any increase or decrease in the total size of the licensed premises, including the addition of a noncontiguous location to the licensed premises of a winery licensed pursuant to sections 44-3-402 or 44-3-403, C.R.S. Except, any change, alteration, or modification of a sales room, shall be reported in accordance with subsection (A).

E. The state licensing authority shall not impose any additional fees for the processing or review of an application for a modification of premises for the holder of a manufacturer's license, except for applications to modify the premises through the addition of a noncontiguous location to the licensed premises of a winery licensed pursuant to sections 44-3-402 or 44-3-403, C.R.S.

Regulation 47-304. Transfer of Ownership and Changes in Licensed Entities.

Basis and Purpose. The statutory authority for this regulation includes, but is not limited to, subsections 44-3-103, 44-3-107(1), 44-3-202(2)(a)(I)(A), 44-3-202(1)(b), 44-3-202(2)(a)(I)(J), 44-3-202(2)(a)(I)(R), 44-3-301(7), 44-3-303(3)(b), and 44-3-308, C.R.S. The purpose of this regulation is to establish reporting and disclosure requirements for the identification of applicants, licensees, and their relevant financial interests to promote transparency and prevent the occurrence of statutorily prohibited financial interests between the manufacturing, wholesale, and retail tiers.

A. Corporations and Limited Liability Companies

1. If the applicant for any license under Articles 3 or Article 4 of Title 44 is a corporation or limited liability company, it shall submit with the application, the names, addresses, and individual history records of all of its principal officers, directors, or managers, and a copy of its articles of incorporation or articles of organization; and if a foreign entity, evidence of its qualification to do business within this state. In addition, each applicant shall submit the names, addresses, and individual history records of all persons owning 10% or more of the outstanding or issued capital stock, or persons holding a 10% or more membership interest.

2. Any transfer of capital stock or any change in principal officers or directors of any corporation holding a license under the provisions of the Liquor or Beer and Wine Codes and which is not subject to the reporting requirements of the Securities and Exchange Act of 1934, as amended, shall be reported to the respective licensing authorities within thirty (30) days after such transfer or change. With the report, the licensee shall submit the names, addresses, and individual history records for any new

officer, director, or stockholder acquiring 10% or more outstanding capital stock, as well as the corporate minutes verifying the transactions. Licensees that are subject to the Securities and Exchange Act of 1934, as amended, shall be required to do the same, except that they shall not be required to report any single transfer of outstanding capital stock of less than 10%.

3. Any transfer of membership interest or any change in managers of any limited liability company holding a license shall be reported to the respective licensing authorities within thirty (30) days after such transfer or change. With the report, the licensee shall submit the names, addresses, and individual history records for any new manager, or member acquiring 10% or more membership interest.

B. Partnerships

1. If the applicant for any license under articles 3 or 4 of title 44 is a general partnership, limited partnership, limited liability partnership, or limited liability limited partnership it shall submit with the application, the names, addresses, and individual history records of all of its general or managing partners, and a copy of its partnership agreement; and, if a foreign entity, evidence of its qualification to do business within this state. In addition, each applicant shall submit the names, addresses, and individual history records of any other partner holding a 10% or more partnership interest.

2. Any transfer of partnership interest or any change in general or managing partners of any partnership holding a license shall be reported to the respective licensing authorities within thirty (30) days after such transfer or change. With the report, the licensee shall submit the names, addresses, and individual history records for any new general or managing partner, or any other partner acquiring 10% or more partnership interest.

C. Municipalities and Other Governmental Entities

1. If the applicant for any license under articles 3 or 4 of Title 44 is a municipality or other governmental entity, it shall submit with the application, the name, address and individual history record of at least one member of its governing body, or at least one person hired or appointed by its governing body, to serve as an officer or director; except that, pursuant to section 44-3-107(1), C.R.S., a person who has an interest in a liquor license may not be listed as an officer or director on a license owned, or to be owned, by a municipality or other governmental entity if that person individually manages or receives any direct financial benefit from the operation of such license. If the governing body of a municipality or other governmental entity hires or appoints more than one officer or director, the name, address and individual history record of each such officer or director shall be submitted with the application.

2. Any change in the officers or directors of a license held by a municipality or other governmental entity shall be reported to the respective licensing authorities within thirty (30) days after such change. With the report, the licensee shall submit the names, addresses, and individual history records for any new officers or directors.

D. Entity Conversions

1. Any licensee that qualifies for an entity conversion pursuant to section 7-90-201, C.R.S., et. seq., or similar law enacted by other states, shall not be required to file a transfer of ownership application pursuant to section 44-3-303, C.R.S. upon statutory conversion, but shall submit a report containing suitable evidence of conversion within thirty (30) days of such conversion. Such evidence shall include, but not be limited to,

recognition of conversion by the Colorado Secretary of State. In addition, within thirty (30) days of the conversion, the licensee shall submit the names, addresses, and individual history records of any new officers, directors, managers, general or managing partners, and all persons having an ownership interest of 10% or more.

E. All reports required by this regulation shall be made on forms supplied by the Division.

F. For all applicants for the issuance of a license by reason of a transfer of possession of the licensed premises by methods to include operation of law, a petition in bankruptcy pursuant to federal bankruptcy law, the appointment of a receiver, a foreclosure action by a secured party, or a court order dispossessing the prior licensee of all rights of possession pursuant to article 40 of title 13, C.R.S., the licensing authorities shall consider only the requirements of section 44-3-307, C.R.S. The loss of possession of the licensed premises by the licensee does not in itself automatically invalidate, cancel or terminate the underlying license. An applicant who otherwise comes into possession of the licensed premises by operation of law, may apply for a transfer of the underlying license as provided by law pursuant to section 44-3-303, C.R.S. This provision does not prohibit a licensing authority from initiating any action as provided by law to suspend or revoke a license for loss of possession of the licensed premises.

G. No application for a transfer of ownership may be received or acted upon by either the state or local licensing authority if the previous licensee has surrendered its license and had it canceled by either authority prior to submission of the transfer application. In cases where cancellation has occurred prior to the submission of a transfer of ownership application, the license applicant shall follow the procedures for a new license application pursuant to section 44-3-311, C.R.S.

Regulation 47-312. Change of Location.

Basis and Purpose. The statutory authority for this regulation includes, but is not limited to, subsections 44-3-103, 44-3-202(1)(b), 44-3-202(2)(a)(I)(A), 44-3-202(2)(a)(I)(D), 44-3-202(2)(a)(I)(R), 44-3-301(9), 44-3-309, and 44-3-410, C.R.S. The purpose of this regulation is to establish procedures for a licensee requesting to change the location of the licensed premises, and provide factors the licensing authority must consider when evaluating a change for approval or rejection.

A. When a licensee desires to change the location of its licensed premises from the location named in an existing license, it shall make application to the applicable licensing authorities for permission to change location of its licensed premises, except that an application for change of location shall not be required for the demolition and reconstruction of the building in which the original licensed premises was located.

B. Applications to change location shall be made upon forms prepared by the state licensing authority and shall be complete in every detail. Each such application shall state the reason for such change, and in case of a retail license, shall be supported by evidence that the proposed change will not conflict with the desires of the adult inhabitants and the reasonable requirements of the neighborhood in the vicinity of the new location.

1. An application to change the location of a retail license shall contain a report of the local licensing authority of the town, city, county, or city and county in which the license is to be exercised. Such report shall describe the findings of the local licensing authority concerning the reasonable requirements of the neighborhood and the desires of the adult inhabitants with respect to the new location, except that pursuant to section 44-3-312(2)(a), C.R.S., the needs of the neighborhood shall not be considered for a change of location for a club license.

2. When a licensee is required by lease, lease renewal, condemnation, or reconstruction to move its licensed premises to a new address that is located within the same

shopping center, campus, fairground, or similar retail center, the local or state licensing authority may, at its discretion, waive the neighborhood needs and desires assessment requirements should it determine that the new location remains within the same neighborhood as the old location.

C. For retail licenses, no change of location shall be permitted until the state licensing authority has, after approval of the local licensing authority, considered the application and such additional information as it may require, and approved of such change. The licensee shall, within sixty (60) days of approval, change the location of its licensed premises to the place specified therein. Once at the new location, the licensee shall no longer conduct the manufacture or sale of alcohol beverages at the former location. A local licensing authority may, at its discretion, extend the time to change the location of the licensed premises, for good cause shown. However, no extension that is beyond twelve (12) months from the original date of approval shall be granted.

D. For those licensees not subject to approval by the local licensing authority, no change of location shall be permitted until the state licensing authority has considered the application and such additional information as it may require, and approved of such change. The licensee shall, within sixty (60) days of approval, change the location of its licensed premises to the place specified therein. Once at the new location, the licensee shall no longer conduct the manufacture or sale of alcohol beverages at the former location. The state licensing authority may, at its discretion, extend the time to change the location, for good cause shown. However, no extension that is beyond twelve months from the original date of approval shall be granted.

E. Once the licensee has changed the location of its licensed premises, the permit to change location shall be conspicuously displayed at the new location, immediately adjacent to the license to which it pertains until the license is renewed.

F. For retail licenses no change of location shall be allowed except to another location within the same city, town, county, or city and county in which the license was originally issued. Except, a retail liquor store licensed on or before January 1, 2016, may apply to move its permanent location to another place within or outside the municipality or county in which the license was originally granted. Once approved, the retail liquor store licensee shall change the location of its premises within three (3) years after such approval.

1. A change of location for a fermented malt beverage and wine retailer or retail liquor store will be approved only if the new location satisfies the distance requirements in section 44-3-301(9)(a)(I)(B)-(C), C.R.S.

2. It is unlawful for a licensee to sell any alcohol beverage at a new location until permission is granted by the state licensing and local licensing authorities.

G. Upon application for change of location, public notice shall be required by the local licensing authority in accordance with Section 44-3-311, C.R.S.

H. A licensee located within 500 feet from any public or parochial school or principal campus of any college, university or seminary may apply for a change of location within the same prohibited area in accordance with the requirements of section 44-3-301(9), C.R.S., but may not apply for a change of location within any other prohibited area as defined within section 44-3-313, C.R.S.

I. A licensee that is in lawful possession of its alcohol beverage inventory at the time it receives approval from the local and state licensing authorities to change the location of its licensed premises, may continue to possess its alcohol beverage inventory for sale at the new location.

Regulation 47-313. Tastings.

Basis and Purpose. The statutory authority for this regulation includes, but is not limited to, subsections 44-3-103, 44-3-202(1)(b), 44-3-202(2)(a)(I)(A), 44-3-202(2)(a)(I)(R), 44-3-301(10), 44-3-409(1)(c)(III), and 44-3-410(1)(a)(II)(B), and 44-4-104(1)(c)(I)(A), C.R.S. The purpose of this regulation is to clarify who may conduct tastings and how open and unconsumed samples must be appropriately treated after a tasting. This regulation applies only to tastings conducted on the licensed premises of retail liquor stores, liquor-licensed drugstores, and fermented malt beverage and wine retailers pursuant to section 44-3-301(10), 44-3-409(1)(c)(III), 44-3-410(1)(a)(II)(B), and 44-4-104(1)(c)(I)(A), C.R.S.

A. Tastings.

1. A tasting shall be conducted only by a person who has completed seller-server training that meets the standards established by the Division, and is:

a. A retail liquor store, liquor-licensed drugstore, or fermented malt beverage and wine retailer licensee or employee; or

b. A representative, employee, or agent of one of the following suppliers licensed by the state licensing authority:

i. Wholesaler;

ii. Brew pub;

iii. Distillery pub;

iv. Manufacturer;

v. Limited winery;

vi. Importer; or

vii. Vintner's restaurant.

B. Following a tasting, the licensee shall promptly remove all open and unconsumed alcohol beverage samples from the licensed premises, destroy the samples immediately following the completion of the tasting, or store any open containers of unconsumed alcohol beverages in a secure area outside the sales area of the licensed premises for use only at a tasting conducted at a later time or date. A secure area means:

1. A designated area, including, but not limited to, a closet, cabinet, or safe;

2. That is upon the licensed premises and not accessible to consumers; and

3. Is secured by a locking mechanism at all times while any open containers of unconsumed alcohol beverages are stored for use at a future tasting.

C. To ensure alcohol samples are provided to a patron free of charge, as required by section 44-3-301(10)(c)(X), C.R.S., the licensee shall not charge or accept any money for a tasting, directly or indirectly, including for any education provided in connection with a tasting, or to reserve a spot at a tasting event, regardless of whether the money charged is donated to a charity or is refunded. Education shall not be considered to be provided in connection with a tasting if the tasting occurs after the education event has concluded and is available to any adult patron of

the licensee, free of charge.

D. To comply with the obligation not to serve more than four individual samples to a patron during a tasting, as required by section 44-3-301(10)(c)(IX), C.R.S., the licensee shall implement a means of tracking how many samples each patron is provided, which may include the use of a wristband, or other means of accurately tracking individual patron consumption.

E. To comply with the obligation not to serve samples to a patron over the maximum allowed volume per alcohol type, as required by section 44-3-301(10)(c)(I)(B)(III), C.R.S., a licensee serving alcohol beverages mixed with non-alcohol beverage product shall either:

1. Serve no more than the maximum allowed volume per alcohol type, per sample, of a pre-mixed beverage, if the mixing of the alcohol is not done in public view during the tasting event; or

2. Mix the alcohol beverage with the non-alcohol beverage in public view during the tasting event, wherein only the maximum allowable amount of alcohol beverage is incorporated into each mixed drink, per sample.

Regulation 47-318. Owner-Manager.

Basis and Purpose. The statutory authority for this regulation includes, but is not limited to, subsections 44-3-103, 44-3-202(1)(b), 44-3-202(2)(a)(I)(A), 44-3-202(2)(a)(I)(B), 44-3-202(2)(a)(I)(J), and 44-3-202(a)(I)(R), C.R.S. The purpose of this regulation is to define the difference between a licensee/owner and a manager, and to clarify the allowable method of payment to the manager.

A. Each license under the Liquor Code or the Beer and Wine Code must be held by the owner of the establishment. “Owner” means the person or persons whose proprietary interest is such that they bear risk of loss other than as an insurer, and have opportunity to gain profit from operation or sale of the establishment.

In determining who is the “owner”, elements considered other than risk of loss and opportunity for profit will include, but are not limited to: who has the right of possession of the licensed premises, who controls the licensee, who guarantees its debts, who is beneficiary under its insurance policies, who acknowledges liability for federal, state or local taxes.

B. Owners may hire managers, and managers may be compensated on the basis of profits made, gross or net. In such cases, (except through an I.R.S. qualified retirement account), the financial interests of the manager(s) must be reported on the forms prescribed by the Division. The manager may be required to complete an individual history report and be subject to a background check. A license may not be held in the name of the manager.

C. A spouse of a licensee may hold a license in their own right if they are the owner of the licensed establishment, regardless of whether they file separate or joint income tax returns.

D. A partnership interest, limited or general, a joint venture interest, or ownership of a share or shares in a corporation which is licensed, constitutes ownership.

Regulation 47-322. Unfair Trade Practices and Competition.

Basis and Purpose. The statutory authority for this regulation includes, but is not limited to, subsections 44-3-102, 44-3-103, 44-3-201(1), 44-3-202(1)(b), 44-3-202(2)(a), 44-3-202(2)(a)(I)(A), 44-3-202(2)(a)(I)(C), 44-3-202(2)(a)(I)(G), 44-3-202(2)(a)(I)(R), 44-3-308, and 44-4-102, C.R.S. The purpose of this regulation is to establish certain permitted and prohibited trade practices between

suppliers and retailers in order to clarify and prevent statutorily prohibited financial assistance between tiers.

Suppliers and their agents or employees may not attempt to control a retail licensee's product purchase selection by engaging in unfair trade practices or competition.

Nothing in this regulation shall apply to non-profit, charitable, or other qualifying organizations, when such organization conducts licensed events pursuant to the requirements contained in article 5 of title 44 and related regulations, and such organization does not otherwise hold a retail license pursuant to article 3 or 4 of title 44. However, nothing herein shall authorize any financial assistance for the purpose of altering or influencing an organization's product selection for said events.

Retailers may not accept any prohibited financial assistance as described herein, and suppliers are prohibited from directly or indirectly engaging in the following unfair practices:

A. Sales of alcohol beverages.

1. No vinous or spirituous liquor may be sold by a vinous or spirituous liquor manufacturer or wholesaler to a retail licensee below the laid-in cost of said vinous and spirituous liquor products.

2. No malt liquors or fermented malt beverages may be sold by a malt liquor/beverage manufacturer or wholesaler to a retail licensee below the laid-in cost of said malt liquor/beverage products.

3. Product cost per case will be determined utilizing a “Last In/First Out” basis unless a supplier has adequate records to verify that the actual cost of said products was less than the most recent shipment received.

4. A wholesaler's laid-in cost is defined as the actual proportionate invoice price and freight charge to that wholesaler or distributor, plus applicable state and federal taxes of any given product. An in-state manufacturer's laid-in cost is defined as the actual costs of the manufacturer, plus applicable state and federal taxes.

5. Certain sales of alcohol beverages below cost are not designed or intended to influence or control a retailer's product selection. The following exceptions to below cost product sales are therefore permitted:

    a. Product lines that will be discontinued by a supplier for a minimum of at least one year may be sold below cost at market value.

    b. A wholesaler's aged inventory of vinous and spirituous liquors for which the current market value has fallen substantially below the wholesaler's original purchase cost, after a period of twelve (12) months, and for which a recovery of the original cost through an increase in market value is unlikely. For aged inventories sold to retailers below their cost due to market-below-cost conditions, wholesalers shall maintain the following records for a minimum of three years:

        i. Original purchase invoice.

        ii. Aged inventory schedule verifying slow sales and drop in market value.

        iii. Other factors that had an effect on a decrease in market value (e.g. overproduction, poor media critique).

c. Products for use, but not for resale by the drink, by a non-profit organization or similar group, as defined in section 44-5-102, C.R.S., on a retailer's licensed premises, may be invoiced to a retailer at no cost. The invoice for said products must detail the products provided and the group for whose benefit it is provided. At the conclusion of the organization's event any unused product must be returned to the wholesaler, brew pub, distillery pub, or vintner's restaurant, or invoiced at a minimum of laid-in cost to the retailer.

6. Suppliers authorized to sell alcohol beverages to licensed retailers pursuant to articles 3 or 4 of title 44, may offer product discounts to licensed retailers that meet the requirements of paragraph A, and the following additional conditions:

   a. “Product Discount” shall mean a price reduction negotiated between supplier and retailer before the sale and delivery of alcohol beverage products, and where a description of the products subject to discount, and the dollar amount of the discount, is finalized and recorded in the supplier's sales records.

   b. Discount programs are not subject to time limitations, and any discount program that will affect more than a single sales transaction and sales invoice are permitted, provided that no invoice, by itself, reflects a zero cost or below-cost sale.

   c. Product discounts that are conditioned upon a retailer's commitment to prominently display the supplier's products are prohibited.

7. Any rebate, whereby a monetary value is returned by a supplier to a retailer, in cash, account credit, or free goods, as a reward or compensation for meeting a pre-specified purchase goal, is prohibited.

8. Suppliers authorized to sell alcohol beverages to licensed retailers pursuant to articles 3 or 4 of title 44, may offer account credits to licensed retailers under the following conditions:

   a. Any account credit offered on previously issued sales invoices must be in direct relation to previous product purchases, lawful returns pursuant to this regulation or other legitimate commercial transactions as authorized under articles 3 or 4 of title 44, C.R.S. and related regulations.

   b. Credits that cannot be connected with authorized business transactions, as described herein, will be considered unlawful financial assistance, and are therefore prohibited.

   c. Both the seller and retail licensee shall maintain copies of sales invoices and evidence of payment related to the transactions described in this section, in accordance with 44-3-701, C.R.S., and for the time frame specified in Regulation 47-700.

9. Wholesaler invoices provided to retail liquor store, fermented malt beverage and wine retailer, and liquor licensed drugstore licensees must clearly designate a price paid for each product, which shall not be less than the wholesaler’s laid-in cost of each product. At no point may a retail liquor store, fermented malt beverage and wine retailer, or liquor licensed drugstore licensee receive any products from a wholesaler at less than laid-in cost.

B. On-site sales promotions

1. Suppliers may conduct an on-site product sales promotion at a retailer's licensed premises subject to the following conditions:

   a. Free goods of any value may be provided to the public, provided that a supplier's representative or authorized agent, who is not the retailer or a retail employee/agent, is physically present to award free goods to the public. Suppliers shall not require a customer purchase in order for the customer to receive the free goods.

   b. If only consumer advertising specialties, as described in Regulation 47-316(A), are to be provided at the promotion, neither suppliers or their agents need be present for their distribution.

   c. Suppliers are prohibited from providing anything other than the items specified in Regulation 47-316(A) to retailers or their employees at on-site product sales promotions.

   d. Suppliers may provide or pay for any media announcement of an on-site product sales promotion that primarily advertises the product, the location, and the date and time of the promotion. The name of the retail outlet may also be mentioned.

   e. Retailers may at their own cost advertise in advance a supplier's product sales promotion.

   f. No supplier may require that a retailer change its product selection as a condition of conducting a product sales promotion. Retailers may at their option change their product selection in support of a product sales promotion.

   g. Competitors' products may not be excluded during a product sales promotion.

2. On-Premises Sampling. A supplier-sponsored consumer sampling of alcohol beverages may be held at a retailer’s premises licensed for on-premises consumption for the purpose of product sales promotion under the following conditions:

   a. A supplier-sponsored consumer sampling held at the licensed premises of a retailer licensed for on-premises consumption shall include only the alcohol beverages the retailer is licensed to sell.

   b. The supplier shall only offer its alcohol beverage product to consumers during a supplier-sponsored consumer sampling.

   c. A retailer or supplier shall not impose any charge to the consumer to enter or participate in the sampling.

   d. Product used for sampling must be invoiced by the supplier, who is authorized to sell the alcohol beverages to licensed retailers pursuant to article 3 or 4 of title 44, as if sold to the retailer.

   e. If all product listed in the sales invoice is consumed as permitted herein, the supplier may issue the retailer a credit against the entire amount of the original invoice.

f. Any remaining product must be returned to the wholesaler, or sold to the retailer at a minimum of the wholesaler's cost.

g. The supplier must be present and shall be the person who provides the sample to a consumer who is twenty-one (21) years of age or older.

h. Suppliers may provide or pay for any media announcement of a supplier-sponsored consumer sampling that primarily advertises the product, the location, and the date and time of the sampling. The name of the retail outlet may also be mentioned.

3. Off-Premises Giveaway. A supplier-sponsored consumer giveaway of sealed malt liquor or fermented malt beverages may be held at a retailer's premises licensed for off-premises consumption for the purpose of product sales promotion under the following conditions:

a. A supplier-sponsored consumer giveaway held at the licensed premises of a retailer licensed for off-premises consumption is limited to either sealed malt liquor or fermented malt beverages, whichever the retailer is licensed to sell.

b. The supplier shall only offer its malt liquor or fermented malt beverages product to consumers during a supplier-sponsored consumer giveaway.

c. A retailer or supplier shall not impose any charge to the consumer to enter or participate in the giveaway.

d. Product used for the giveaway must be invoiced by a supplier, who is authorized to sell malt liquor or fermented malt beverage to licensed retailers pursuant to article 3 or 4 of title 44, as if sold to the retailer.

e. If all product listed in the sales invoice is given away as permitted herein, the supplier may issue the retailer a credit against the entire amount of the original invoice.

f. Any remaining product must be returned to the wholesaler, or sold to the retailer at a minimum of the wholesaler's cost.

g. The supplier must be present and shall be the person who gives the sealed container to consumers. The supplier must verify that each consumer is of lawful age prior to giving away the sealed container.

h. Suppliers may provide or pay for any media announcement of a supplier-sponsored consumer giveaway that primarily advertises the product, the location, and the date and time of the giveaway. The name of the retail outlet may also be mentioned.

i. The maximum amount of malt liquor or fermented malt beverages given to each consumer shall not exceed twenty-six (26) ounces.

C. Sponsored events: Lawful Advertising

1. Suppliers may provide sponsorship fees to advertise at charitable or civic events that are temporary in nature, where the supplier's sponsorship fee affords the supplier exclusive signage rights at the retail premises, and where sponsorship proceeds are received directly by the charity or civic endeavor, and not by a licensed retailer.

2. Suppliers may provide a sponsorship fee to advertise in ballparks, resorts, racetracks, stadiums, concert venues or entertainment districts as long as such sponsorship fee is not paid to a person or entity holding a retail license at such venue, directly or indirectly, and is not intended to influence the product selection of such retailer. The retailer's product selection for the event may not change as a condition of the event sponsorship and the products of the supplier's competitors may not be excluded.

3. Suppliers may provide or pay for any media announcement of a sponsored event that primarily advertises the product, the location, and the date and time of the event. The name of the retail outlet may also be mentioned.

4. Suppliers providing sponsorship fees to advertise at the aforementioned venues may also provide those items and services authorized under regulations 47-316, 47-320, and 47-322 to the licensed retailers at, or in conjunction with, the sponsored event.

D. Retailer entertainment

Suppliers may provide food, beverages, entertainment, recreation, or the costs associated with the same, to a retailer and its employees at meetings, social events, conferences, trainings, or other similar events, subject to the following:

1. Food, beverages, entertainment, or recreation are provided when, and where, suppliers or supplier representatives are participating or present.

2. Entertainment may include tickets or admission fees for athletic or sporting events, concerts, artistic performances, festivals, and similar forms of entertainment.

3. Recreation may include fees associated with participation in athletic or sports-related activities.

4. For any supplier-provided retailer entertainment, the supplier is prohibited from providing the costs associated with lodging and travel, other than nominal ground transportation.

5. Suppliers must maintain records sufficient to verify those entertainment expenses associated with retailers and their employees. Failure to maintain such records shall not be a per se violation of this regulation, but could constitute a violation of section 44-3-701, C.R.S. or Regulation 47-700.

E. Alcohol Beverage Samples for Retailers

1. Wholesalers, or those licensed to sell at wholesale pursuant to article 3 and 4 of title 44, may furnish or give a limited amount of alcohol beverage samples to retailers licensed solely for on-premises under the following conditions:

   a. The retailer's class of liquor license permits the sale of the type of beverage offered as a sample.

   b. The providing of samples is not conditioned upon future purchases of alcohol beverages, or as compensation for any previous alcohol beverage purchase.

   c. The retailer has not purchased the product SKU of the alcohol beverage

offered as a sample within the previous six (6) months.

d. The wholesaler provides not more than 3.0 liters per brand of spirituous liquor, not more than 3.0 liters per brand of vinous liquor, and not more than one six-pack, or 72-ounce equivalent, per brand of malt liquor or fermented malt beverage so packaged. If a particular brand is not available in a size meeting the quantity limitations stated herein, a wholesaler may furnish the next available larger size.

e. Only the retailer and its employees are authorized to taste or test those alcohol beverages given as samples, as provided herein. Nothing shall authorize a retailer to sell any samples provided or to use such the same for consumer tastings.

2. Wholesalers, or those licensed to sell at wholesale pursuant to article 3 and 4 of title 44, may furnish or give a limited amount of alcohol beverage samples to retailers licensed solely for off-premises under the following conditions:

a. The retailer's class of liquor license permits the sale of the type of beverage offered as a sample.

b. The providing of samples is not conditioned upon future purchases of alcohol beverages, or as compensation for any previous alcohol beverage purchase.

c. The wholesaler provides not more than 3.0 liters per brand of spirituous liquor, not more than 3.0 liters per brand of vinous liquor, and not more than one six-pack per brand of malt liquor or fermented malt beverage so packaged. If a particular brand is not available in a size meeting the quantity limitations stated herein, a wholesaler may furnish the next available larger size.

d. The wholesaler is present at the time of consumption and maintains sole possession of the container after sampling. Samples, in the quantities described herein, may be left in the retailer's possession if the container seal is left intact, but must be removed from the licensed premises at the end of the day.

F. Wholesaler Trade Shows and Trade Events

1. For purposes of this Regulation 47-322(F):

a. “Trade show” means an event to which more than fourteen (14) authorized attendees are invited and which is organized and conducted by or on behalf of one or more wholesalers, as defined in Regulation 47-100(I), for the purpose of exhibiting and providing information regarding alcohol beverage products and services offered by the participating wholesaler(s), to retailers licensed to buy such alcohol beverage products from the wholesaler(s), and to provide samples of such alcohol beverage products for consumption during the event.

b. “Trade event” means an event to which fourteen (14) or fewer authorized attendees are invited and which is organized and conducted by or on behalf of one or more wholesalers, as defined in Regulation 47-100(I), for the purpose of exhibiting and providing information regarding alcohol beverage products and services offered by the participating wholesaler(s), to retailers licensed to

buy such alcohol beverage products from the wholesaler(s), and to provide samples of such alcohol beverage products for consumption during the event.

c. "Hosting on-premises retailer" means a retailer licensed for on-premises consumption on whose licensed premises a trade show or trade event is held.

d. "Authorized attendees" means, and shall be limited to:

i. Officers, directors, and employees of a retail licensee that is licensed to sell the type of alcohol beverages to be exhibited and sampled during the trade show or trade event;

ii. Other individuals affiliated with one or more retail licensees as independent consultants or experts; and

iii. No more than one adult guest of each individual authorized to attend the trade show or trade event under subparagraphs (d)(i)-(ii).

2. Trade shows or trade events are subject to the following requirements and limitations:

a. A trade show or trade event shall take place only with the permission of, and on the licensed premises of, a hosting on-premises retailer that is licensed to sell the type of alcohol beverages to be exhibited and sampled during the trade show or trade event.

b. A trade show or trade event shall not be open to the general public, and shall be limited to authorized attendees registered (either in advance or at the door). The wholesaler(s) participating in the trade show or trade event shall maintain registration records containing, at a minimum, the date of the trade show or trade event, the name of the hosting on-premises retailer, the name of each authorized attendee who attended the trade show or trade event, and the name of the licensed retailer(s) with which each authorized attendee is associated. The registration records from the trade show or trade event shall be available for inspection by the Division during the trade show or trade event and shall be provided to the Division within ten (10) days of the conclusion of the trade show or trade event.

c. By agreement, the participating wholesaler(s), the hosting on-premises retailer or both (including such entities' agents and employees) may serve samples of alcohol beverage product(s) to authorized attendees during a trade show or trade event. Such samples shall be provided to authorized attendees free of charge.

i. The entity or entities responsible for the serving of the alcohol beverage products during a trade show or trade event shall be responsible for any violations of the Liquor Code, Beer and Wine Code, or Special Event Code, and/or any regulation promulgated pursuant thereto, related to the serving of alcohol beverage products during a trade show or trade event, including, but not limited to, violations related to service of alcohol beverages to a visibly intoxicated person or to a person under twenty-one years of age.

d. Alcohol beverage products used for a trade show or trade event must comply with all applicable product registration and labeling requirements, including

those set forth in Regulation 47-904(F) and (G).

e. All taxes, fees and surcharges required by section 44-3-503, C.R.S., must be paid for all alcohol beverage products used in a trade show or trade event.

f. Invoices for alcohol beverage products used for a trade show or trade event must be clearly labeled as a "No-Cost Trade Show/Event Inventory Record" and shall be subject to the following requirements:

i. Any wholesaler participating in a trade show or trade event must invoice any alcohol beverage products to be used in the trade show or trade event to the hosting on-premises retailer. Notwithstanding any other rule or regulation to the contrary contained in 1 CCR 203-2, the wholesaler shall invoice the hosting on-premises retailer for alcohol beverage products to be used in a trade show or trade event at no cost.

ii. The hosting on-premises retailer must receive all wholesalers' invoice(s) for alcohol beverage products to be used in the trade show or trade event prior to the commencement of the trade show or trade event, and shall retain such invoice(s) for their records.

iii. Any wholesaler(s) participating in a trade show or trade event shall provide the Division with copies of all invoice(s) to be issued in accordance with this paragraph (F)(2)(f) as an accounting for all the alcohol beverage products intended to be used during the trade show, and the anticipated drop-off and pick-up dates for such alcohol product, at least three (3) days prior to the commencement of the trade show.

iv. In order to account for unanticipated changes in the alcohol beverage products to be used during a trade show or trade event, any Wholesaler(s) participating in a trade show or trade event may provide the Division with an "Amended No-cost Trade Show/Event Inventory Record" before the commencement of the scheduled trade show or trade event, provided the wholesaler(s) complied with the provisions of paragraph (F)(2)(f)(iii) of this regulation in the first instance.

v. At the conclusion of the trade show or trade event, any alcohol beverage product(s) invoiced for use during the trade show or trade event (whether opened or unopened) shall be removed from the hosting on-premises retailer's licensed premises by the wholesaler(s), or destroyed.

A. Any alcohol beverage product(s) invoiced for use during the trade show or trade event remaining on the hosting on-premises retailer's licensed premises at the conclusion of the trade show or trade event, and awaiting wholesaler pick-up, must be held in a secure area of the hosting on-premises retailer's licensed premises, kept separate from, and clearly labeled to distinguish such alcohol beverage product(s) from, the host on-premises retailer's stock, by affixing a copy of the most current invoice issued pursuant to paragraph (F)(2)(f)(iii), or (F)(2)(f)(iv) of this regulation, and marking such invoice with

the anticipated pick-up date of the alcohol beverage product(s), which shall be no more than thirty (30) days after the conclusion of the Trade Show or Trade Event.

B. Allowing any alcohol beverage product(s) invoiced for use during the trade show or trade event (whether opened or unopened) to remain on the hosting on-premises retailer's licensed premises after the conclusion of the thirty (30) day pick-up window allowed for in paragraph (F)(2)(f)(v)(A) above, shall be deemed a violation of this Regulation, for which both the wholesaler(s), and hosting on-premises retail licensee shall be responsible.

g. No delivery or exchange of alcohol beverage product(s) between a participating wholesaler and authorized buyer of same shall take place during the trade show or trade event.

h. A hosting on-premises retailer shall not be deemed to be receiving unlawful financial assistance from the wholesaler(s) participating in the trade show or trade event, so long as the hosting on-premises retailer does not directly benefit from the sale of any alcohol beverage product exhibited to or sampled by authorized attendees during the trade show or trade event.

i. All documents and information required to be provided to the Division pursuant to paragraphs (F)(2)(b) and (F)(2)(F) of this regulation, shall be provided using a method authorized by the Division (which, at the Division's discretion, may be through uploading the records to an online location specified by the Division or through electronic mail).

3. This Regulation 47-322(F) shall not apply to:

a. Events similar to those addressed in this Regulation that are organized and conducted as special events pursuant to, and in compliance with article 5 of title 44, the exemption set forth in section 44-5-108, C.R.S., provisions of article 3 of title 44 applicable to special events, and Regulations 47-1000 through 47-1022, 1 CCR 203-2.

b. Tastings conducted by a licensed winery pursuant to section 44-3-402(2), C.R.S.; by a limited winery, pursuant to section 44-3-403(2)(e), C.R.S.; by a distillery, pursuant to section 44-3-402(7), C.R.S.; by a beer wholesaler, pursuant to section 44-3-407(1)(b), C.R.S.; or as part of a festival permit, pursuant to section 44-3-404, C.R.S.

G. Consignment Sales and Lawful Product Returns

1. Wholesalers are prohibited from making consignment sales to retailers.

2. A consignment sale is an arrangement whereby a wholesaler invoices and delivers alcohol beverages to a retailer who is under no obligation to pay for such beverages until they are resold. Consignment sales also afford the retailer the right to return product to the wholesaler for any reason.

3. Wholesalers are permitted to accept a return of alcohol beverages previously sold to retailers for ordinary and usual commercial reasons and to provide account credit or product exchange. Such commercial reasons for return shall be limited to the

following:

a. Defective products: Products qualifying under this exception are those that are upon delivery, or later become, unmarketable due to contamination or deterioration of product ingredients, leaking containers, damaged labels, or missing, damaged or compromised container seals.

b. Broken containers or short-filled containers/cases: Nothing shall prevent a retailer from making a claim for the replacement of alcohol beverages that were delivered by a wholesaler in a damaged or incomplete condition, and nothing shall prevent a wholesaler from granting credible claims.

c. Error in products delivered: Any discrepancy between a retailer's product order and the products delivered may be corrected by the wholesaler within a reasonable period after delivery.

d. Discontinued products: When a manufacturer or importer discontinues the production, importation, or market availability of a product, a retailer may return any remaining product to the original wholesaler. A retailer's decision to discontinue a product does not qualify.

e. Manufacturer's product change: When a manufacturer has changed the formula, proof, label or container of an alcohol beverage, wholesalers may withdraw the product from the retailer's inventory and replace it with the newly-manufactured product.

f. Manufacturer's quality standards: To ensure freshness standards for malt liquor and fermented malt beverages, wholesalers, with retailer consent, may withdraw product from the retailer's inventory and replace it with new product, without additional charge, under the following conditions:

    i. Out of freshness standard is defined as: a product that has a pre-printed freshness date on the alcohol beverage container that is no more than thirty (30) days away from the current date.

    ii. The product to be withdrawn is undamaged and in its original packaging.

    iii. The retailer purchased the original product from the wholesaler providing the replacement, or the current wholesaler is acting as an authorized successor wholesaler.

    iv. The wholesaler replaces the product with the identical product SKU, the identical quantity, and the identical package, or with a product from the same manufacturer’s portfolio that is equal to or lesser in value to the original purchase.

    v. A wholesaler may sell a product to another retailer that was picked up because it was within thirty (30) days prior to the freshness date. The sale of this replaced product to another retailer can only be done once.

g. Retailer's seasonal operation: For those retailers who are only open for business a portion of the year due solely to seasonal influences, or for venues that operate only during scheduled events, a wholesaler may remove and grant credit for those products that are likely to spoil or violate a manufacturer's freshness standards.

h. Wholesalers that have lawfully exercised their claim to a retailer's inventory as secured creditors.

i. Products in a retailer's inventory that may no longer be sold due to statutory or regulatory changes or disciplinary actions over which the wholesaler and retailer had no control.

j. Within thirty days of evidence of an expiration or a lawful surrender and cancellation of a retail liquor license by the state licensing authority.

k. Holders of special events permits that have unsold alcohol beverages after the licensed event.

4. A return of product for the following reasons does not qualify as a return for ordinary and usual commercial reasons:

a. A retailer's overstocked inventory or slow-moving products.

b. Products for which there is only a limited-time or seasonal demand, such as holiday decanters or seasonal brands.

H. Warehousing of products for a retailer

Wholesalers shall not furnish free warehousing to retailers by delaying delivery of alcohol beverages beyond the time that payment for the product is received or, if a retailer is purchasing on credit, delaying final delivery of products beyond the close of the period of time for which credit is lawfully extended pursuant to 44-3-202(2)(b), C.R.S.

I. Product resets

Resets by a supplier are permitted, but a competitor's alcohol beverage products may not be disturbed during the reset process, unless the in-state seller of the competing products has been given 72 hours written notice, during normal and customary business hours, and is not present at the time designated for the reset activity. Suppliers may furnish a retailer with a recommended shelf plan or shelf schematic.

J. Equipment rentals

All equipment rentals by a supplier to a retailer must be at fair market value.

K. Other goods

Suppliers may not provide a retailer with any other goods below fair market value except those items expressly permitted by articles 3, 4, or 5 of title 44, C.R.S, and related regulations.

When a supplier also deals in items of commerce that are not regulated by articles 3, 4, or 5 of title 44, only the following restrictions shall apply:

1. The unregulated item(s) may not be provided as an inducement, or require purchase of alcohol beverages.

2. Any equipment or other goods provided free of charge (e.g. energy drink refrigerated coolers) shall not be provided in conjunction with alcohol sales or promotions.

L. Indirect financial assistance through third party arrangements

1. A supplier's furnishing of any equipment, supplies, services, money, or other things of value to a third party that is not licensed pursuant to article 3 or 4 of title 44, C.R.S. where the benefits resulting from such things of value flow to individual licensed retailers through written agreements or otherwise, is prohibited.

2. A supplier will not be in violation of this regulation when the unlicensed third party provides the prohibited item or service to a retailer without the supplier's knowledge, and the supplier could not have reasonably foreseen that the item or service would flow to a retailer.

3. Retailers that collude with unlicensed third parties to obtain prohibited financial assistance through a third-party arrangement between a third party and a licensed supplier shall be in violation of this regulation.

4. It shall not be a violation for a supplier to furnish items or services to a retailer that are otherwise specifically authorized by regulation or any provision within articles 3 or 4 of title 44, C.R.S.

M. Value of Labor

1. Definitions for purposes of this subsection (L):

a. “Deliver” or “delivering” is the act of a supplier bringing and unloading its alcohol beverage product from its delivery vehicle onto the retailer’s licensed premises or permitted retail warehouse storage location. “Deliver” or “delivering” does not include a supplier bringing and unloading its alcohol beverage product from a permitted retail warehouse storage location to a retailer’s licensed premises.

b. “Merchandise” or “merchandising” is the act of organizing, constructing, maintaining, or stocking a display of alcohol beverage product or alcohol beverage product promotional materials, including alcohol beverage product signs, consumer advertising specialties, or point-of-sale advertising, within the retailer’s licensed premises.

c. “Price stamp” or “price stamping” is the act of affixing the retail price of alcohol beverage product to its respective shelf, refrigerator, or any other similar location within the retailer’s licensed premises.

d. “Rotate” or “rotating” is the act of moving alcohol beverage product from the rear to the front of any shelf, refrigerator, or similar location within the retailer’s licensed premises.

e. “Service” or “servicing” is the act of replacing, staging, and/or tapping kegs within a retail premises. “Service” or “servicing” also includes performing necessary cleaning of alcohol beverage dispensing equipment, to the extent necessary for the maintenance of reasonable standards of purity, cleanliness, and health.

f. “Stock” or “stocking” is the act of placing or replenishing alcohol beverage product on any shelf, refrigerator, or similar location within the retailer’s licensed premises.

2. In a supplier's sole discretion, and if allowed by the retailer, a supplier may deliver, merchandise, price stamp, rotate, service, and stock its alcohol beverage product on the retailer's licensed premises at no cost to the retailer.

   a. A supplier is prohibited from materially disturbing another supplier's alcohol beverage product while delivering, merchandising, price stamping, rotating, servicing, or stocking its own alcohol beverage product.

   b. A supplier may only service the portion of the retailer's alcohol beverage dispensing equipment used for dispensing its alcohol beverage product.

3. A retailer is prohibited from requiring a supplier to provide any labor to the retailer, including, but not limited to, merchandising, price stamping, rotating, servicing, or stocking activities, as an express or implied condition of the delivery, purchase, or future purchases between the supplier and retailer.

4. Unless otherwise permitted under this Regulation, the Liquor Code, or the Beer and Wine Code, or unless the retailer pays the supplier at the normal hourly rate of the employee performing the labor, a supplier is prohibited from providing to a retailer, and a retailer is prohibited from accepting from a supplier, any labor other than the kinds of labor described in subsection (L)(2) of this Regulation, including, but not limited to:

   a. Cleaning, repairing, or otherwise maintaining the interior or exterior of a retailer's premises;

   b. Operating the retailer's powered mechanical equipment, other than pallet jacks; or

   c. Performing inventory for the retailer's records.

N. Prohibition.

1. Except as otherwise provided by the Liquor Code, Beer and Wine Code, or Colorado Liquor Rules, a supplier is prohibited from disturbing another supplier's alcohol beverage product.

Regulation 47-405. Festival Permit.

Basis and Purpose. The statutory authority for this regulation includes, but is not limited to, subsections 44- 3-202(1)(b), 44-3-202(2)(a)(I)(A), 44-3-202(2)(a)(I)(R), 44-3-404(10), and 44-3-601(9), C.R.S. The purpose of this regulation is to address eligibility, requirements, and restrictions for festival permits under section 44-3-404, C.R.S.

A. Festival Permits.

1. The following license types are eligible to obtain a festival permit or participate in a festival for which a permit has been obtained:

   a. A manufacturer license under section 44-3-402, C.R.S.;

   b. A limited winery license under section 44-3-403, C.R.S.;

c. A wholesaler's license under section 44-3-407, C.R.S.;

d. A beer and wine license under section 44-3-411, C.R.S.;

e. A hotel and restaurant license under section 44-3-413, C.R.S.;

f. A tavern license under 44-3-414, C.R.S;

g. A brew pub license under 44-3-417, C.R.S.;

h. A vintner's restaurant license under 44-3-422, C.R.S.; and

i. A distillery pub license under 44-3-426, C.R.S.

2. For purposes of this regulation, the term "permittee" means a licensee under Regulation 47- 405(A)(1) that has received a festival permit under this Regulation 47-405.

B. Initial Festival Permit Application

1. Only licensees listed in Regulation 47-405(A) may file a festival permit application with the state licensing authority. The initial festival permit application must be filed with the state licensing authority, and, if applicable the local licensing authority, at least thirty (30) calendar days before the date the first festival is to be held, and must include:

a. The eligible license type and license number of the festival permit applicant;

b. A description of the licensed premises for the first festival;

c. The date of the first festival;

d. Duration of the festival, which cannot exceed seventy-two (72) hours;

e. A processing fee of fifty dollars ($50 USD);

f. Contact information of a primary contact for each participating licensee including name, title, phone number and email address;

g. Any special event permit application that has been or will be filed in connection with the festival;

h. Confirmation that the applicant has provided notification to the local licensing authority of the location and date of the initial festival;

i. A security and control plan, which must be provided to and agreed to by each participating licensee, which specifies:

i. Hours of service of alcohol beverages;

ii. Entries and exits;

iii. How and where alcohol will be secured and stored when setting up for the festival, during the festival, and after conclusion of the festival;

iv. How visibly intoxicated parties will be handled; and

v. How the licensee plans to prevent persons under twenty-one (21) years of age from consuming or purchasing alcohol beverages.

j. Active Colorado liquor license numbers not under suspension for the applicant and each participating licensee;

k. Identification of any violations at a festival committed by the applicant or any participating licensee during the preceding three years; and

l. Such other information as required on form approved by the state licensing authority.

2. The applicant must apply with the state licensing authority and, if applicable, the local licensing authority, at least thirty (30) calendar days before holding the initial festival under the festival permit. If the applicant does not provide the application to one or both of the applicable licensing authorities at least thirty (30) calendar days before holding the initial festival, the application will be denied by the state licensing authority.

3. A festival permit must be approved by the state licensing authority before the first festival can be held.

C. Local festival permit from the Local Licensing Authority.

1. If required by the local licensing authority, the festival permit applicant must also obtain a local festival permit. The licensee must file the festival permit application with the Division at the same time they file with any local licensing authority.

2. If the licensee filing the festival permit application holds a limited winery license, or a winery license, then a festival permit from the local licensing authority is not required.

3. A festival permit from a local licensing authority is not required if the festival permit applicant also applies for a special event liquor permit issued under article 5 of title 44.

D. Subsequent Festival Permit Application(s).

1. Festival Participation Limits

a. Each permittee may hold up to but no more than a total of nine (9) festivals in a twelve (12) month period. This Paragraph 1(a) will expire on December 31, 2023.

b. A licensee may participate in up to fifty-two festivals each calendar year, including up to nine festivals held under a festival permit issued to the licensee under subsection 44-3-404(1)(c), C.R.S.

c. Each permittee may hold up to but no more than a total of nine (9) festivals in a calendar year. This Paragraph 1(c) will take effect on January 1, 2024.

2. The permittee must notify the state licensing authority, and the local licensing authority if required under Section C above, at least thirty (30) calendar days before holding any subsequent festivals under the festival permit, by filing a subsequent festival permit application. If the applicant does not provide the application to the applicable licensing authorities at least thirty (30) calendar days prior to the subsequent festival, the application will be denied by the state licensing authority. Each subsequent festival permit application must include:

a. The festival permit number;

b. The festival permit expiration date;

c. The festival permittee license name;

d. A description of the licensed premises where the festival will be held;

e. The date of the festival;

f. Duration of the festival, which cannot exceed seventy-two (72) hours;

g. The dates of all prior festivals occurring under the festival permit;

h. The number of prior festivals that have previously occurred under the festival permit;

i. A processing fee of fifty dollars ($50 USD);

j. Contact information of a primary contact for each participating licensee including name, title, phone number and email address;

k. Any special event permit application that has been or will be filed in connection with the festival;

l. Confirmation that the applicant has provided notification to the local licensing authority of the location and dates of each festival;

m. A security and control plan, which must be provided to and agreed to by each participating licensee, which specifies:

i. Hours of service of alcohol beverages;

ii. Entries and exits;

iii. How and where alcohol will be secured and stored when setting up for the festival, during the festival, and after conclusion of the festival;

iv. How visibly intoxicated parties will be handled; and

v. How the licensee plans to prevent persons under twenty-one (21) years of age from consuming or purchasing alcohol beverages.

n. Active Colorado liquor license numbers not under suspension for the applicant and each participating licensee;

o. Identification of any violations at a festival committed by the applicant or any participating licensee during the preceding three years; and

p. Such other information as required on form approved by the state licensing authority.

3. If the subsequent festival permit application is being filed in a different jurisdiction than the initial festival permit application, the permittee must ensure that an original festival

permit application is filed with the subsequent festival jurisdiction's local licensing authority, if applicable.

4. A subsequent festival permit application is deemed approved if held in the same jurisdiction as the initial festival unless the state and, if applicable, the local licensing authority provides the permittee with a notice of denial at least seventy-two hours prior to the date of the subsequent festival.

5. The permittee must file the subsequent festival permit application, but other eligible licensees may jointly participate under the festival permit issued to the permittee, unless timely denied by the state or local licensing authority.

E. Festival Tastings and Sales.

1. For purposes of this regulation 47-405, "festival tastings" is defined as consumption on the premises of a festival permit.

2. The permittee and licensees participating in the festival may conduct festival tastings and sales of their respective alcohol beverages during the festival which the permittee or licensee could conduct at their respective licensed premises.

a. Manufacturers of vinous and spirituous liquors may conduct festival tastings and sales of their products at a festival pursuant to the abilities granted to them under 44-3-402(2)(a) and/or 44-3-402(7)(a), C.R.S.

b. Manufacturers of malt liquors may conduct festival tastings and sales of their products at a festival as long as they possess a valid sales room license pursuant to 44-3-407(1)(b)(II)(A), C.R.S.

3. Regulation 47-313 on tastings applies to Retail Liquor Store, Liquor Licensed Drugstore, and fermented malt beverage and wine retailer licensees and does not apply to festival tastings.

F. Denials.

1. The state licensing authority may deny a festival permit or subsequent festival permit application if:

a. A documented history of violations under article 3 of title 44 of these regulations by the permittee or any participating licensee;

b. The permittee or any participating licensee is ineligible for a festival permit;

c. An application is incomplete or late; or

d. There is a finding that the application, if granted, would result in violations of article 3 of title 44, these regulations, or ordinances or regulations of a local licensing authority.

G. Violations.

1. Violating Licensee Identified

a. If a violation occurs during a festival permitted under this regulation and the permittee or the jointly participating licensee(s) responsible for the violation can

be identified, the state and local licensing authorities may impose appropriate penalties pursuant to section 44-3-601, C.R.S., Regulation 47-602, and Regulation 47-603 on the identified permittee or the jointly participating licensee(s) per violation.

b. Pursuant to section 44-3-601(9), C.R.S., when a permittee or participating licensee violates provisions of the Liquor Code that prohibit the service of an alcohol beverage to a minor or a visibly intoxicated person, the state and local licensing authorities shall consider it a mitigating factor if the permittee or the jointly participating licensee(s) responsible for a violation is a responsible alcohol beverage vendor as defined in section 44-3-1002, C.R.S., and pursuant to the requirements of Regulation 47-605.

2. Violating Licensee Cannot be Identified

a. If a violation occurs during a festival permitted under this regulation and the permittee or the jointly participating licensee(s) responsible for the violation cannot be identified, the state licensing authority may send a written notice to every licensee identified on the festival permit application or subsequent permit application, respectively, and may fine each the same dollar amount, which cannot exceed twenty-five (25) dollars per licensee or two hundred dollars in the aggregate per violation.

b. A joint fine levied pursuant to this subsection does not apply to the revocation or suspension of the licensee's license under section 44-3-601, C.R.S., or Regulation 47-603.

c. A joint fine levied pursuant to this section need not be reported as a substantive violation on the underlying liquor license renewal application for any permittee or jointly participating licensee assessed such a fine.

3. If a violation occurs during a special event festival as defined in Regulation 47-1014(B), a single penalty shall be imposed for a violation under this regulation and Regulation 47-1014(B) to avoid a double penalty for the same conduct.

Regulation 47-408. Purchases by Retailers.

Basis and Purpose. The statutory authority for this regulation includes, but is not limited to, subsections 44-3-202(1)(b), 44-3-202(2)(a)(I)(A), 44-3-202(2)(a)(I)(O), 44-3-202(2)(a)(I)(R), 44-3-411, 44-3-413, 44-3-414, 44-3-416, 44-3-417, 44-3-418, 44-3-419, 44-3-420, 44-3-422, 44-3-426, and 44-3-428, C.R.S. The purpose of this regulation is to establish purchase requirements for retailers.

A. Every person or entity licensed under the Liquor or Beer and Wine Codes to sell at retail shall purchase all alcohol beverage inventory, for the operation of its business, from a person or entity licensed to sell at wholesale pursuant to article 3 or 4 of title 44, C.R.S., except that:

1. A retailer licensed for on-premises consumption only may purchase not more than two thousand dollars' worth of such alcohol beverages during a calendar year from a retail liquor store or a liquor-licensed drugstore.

B. All alcohol beverages possessed or maintained on the retail-licensed premises shall be only such alcohol beverages acquired as set forth in this regulation, or as may have come into possession upon the issuance of a license or temporary permit pursuant to section 44-3-303, C.R.S.

C. Nothing herein shall authorize a retailer to purchase alcohol beverage inventory for its licensed operations from any public or private auction.

D. Records maintained by the licensee in compliance with section 44-3-701, C.R.S. and regulation 47-700, 1 C.C.R. 203-2 shall include all records of purchases of alcohol beverages.

E. Purchases of malt liquor and fermented malt beverages by retailers including a retailer’s purchase at the wholesaler’s licensed location(s) must be from the wholesaler designated within the territory rights pursuant to section 44-3-407(1)(b)(I), C.R.S.

Regulation 47-426. Delivery Sales by Off-Premises Licensees.

Basis and Purpose. The statutory authority for this regulation includes, but is not limited to, subsections 44-4-107(1)(c), 44-3-202(1)(b), 44-3-202(2)(a)(I)(A), 44-3-202(2)(a)(I)(O), 44-3-202(2)(a)(I)(R), 44-3-409(3), 44-3-410(3), and 44-3-601, 44-3-701, C.R.S. The purpose of this regulation is to permit fermented malt beverage and wine retailer licensees, retail liquor stores, and liquor licensed drug stores to deliver alcohol beverage products to consumers within the requirements, restrictions, and limitations outlined in the regulation in accordance with the statutory provisions under which limited retail delivery activities are authorized.

A. Delivery Permitted.

A retailer licensed pursuant to section 44-3-409 or 44-3-410, or subsection 44-4-107(1)(a), C.R.S., may deliver such alcohol beverages authorized by its license to any location off the licensed premises, pursuant to the following restrictions:

1. Order.

a. The order for the alcohol beverages which are to be delivered, must be taken by the licensee or an ordering service acting as an agent of the licensee pursuant to a written agreement entered into with the licensee. Licensee shall provide a copy of said agreement to the Division prior to any orders being accepted by licensee's agent.

b. The order may be taken by written order, by telephone, in person, or via internet communication with the licensee or its agent.

c. The person placing the order must provide the licensee with their name, date of birth, and delivery address. Under no circumstances shall a person under twenty-one (21) years of age be permitted to place an order for alcohol beverages.

2. Delivery.

a. Delivery of alcohol beverages shall only be made to a person twenty-one (21) years of age or older at the address specified in the order.

b. Delivery must be made by the licensee or the licensee's employee who is at least twenty-one (21) years of age and is using a vehicle owned or leased by the licensee to make the delivery.

c. The licensee or the licensee's employee who delivers the alcohol beverages shall note and log at the time of delivery the name and identification number of the person the alcohol beverages are delivered to. Under no circumstances shall a person under twenty-one (21) years of age be permitted to receive a delivery of alcohol beverages.

d. A licensee must derive no more than fifty (50) percent of its gross annual revenues from total sales of alcohol beverages that the licensee delivers.

3. Licensees who deliver alcohol beverages shall maintain as a part of their required records, pursuant to 44-3-701, C.R.S., all records of delivery including delivery orders, receipt logs and journals. These records shall be maintained by the licensee for sixty (60) days. Failure to maintain accurate or complete records shall be a violation of this regulation.

4. Have a licensed premises with the following conditions:

a. Open to the public a minimum of three (3) days a week; and

b. Open to the public a minimum of five (5) hours each day the business is open; and

c. Have signage viewable from a public road.

5. Permit required.

a. Effective July 1, 2019, the state licensing authority will accept complete delivery permit applications from any applicant of or retailer licensed pursuant to section 44-3-409 or 44-3-410, or subsection 44-4-107(1)(a), C.R.S.

b. Effective July 1, 2020, any retailer licensed pursuant to section 44-3-409 or 44-3-410, or subsection 44-4-107(1)(a), C.R.S., must hold a valid delivery permit issued by the state licensing authority to deliver alcohol beverages pursuant to the Liquor Code, the Beer and Wine Code, and this regulation.

c. The applicant must affirm on its delivery permit application that the applicant

derives or will derive no more than fifty (50) percent of its gross annual revenues from total sales of alcohol beverages that the applicant delivers. However, nothing within this subsection (A)(5)(c) shall limit the authority of the state licensing authority to inspect books and records pursuant to Regulation 47-700, 1 C.C.R. 203-2, to verify this affirmation or compliance with this statutory requirement.

d. A delivery permittee shall display its delivery permit at all times in a prominent place on its licensed premises. A delivery permittee shall not be required to hold or carry a copy of its delivery permit in the delivery vehicle.

e. A delivery permit shall not be required for a retailer to deliver alcohol beverages within its customary parking area.

B. Suspension or Revocation.

Any delivery made in violation of Title 44, Articles 3 and Article 4, or in violation of this regulation may be grounds for suspension or revocation of the licensee's license and/or delivery permit by the state licensing authority as provided for in section 44-3-601, C.R.S.

Regulation 47-505. Methods of payment of fees, fines or other payments made to the State Licensing Authority.

Basis and Purpose. The statutory authority for this regulation includes, but is not limited to, subsections 44-3-202(1)(b), 44-3-202(2)(a)(I)(A), 44-3-202(2)(a)(I)(B), 44-3-202(2)(a)(I)(C), 44-3-202(2)(a)(I)(D), 44-3-202(2)(a)(I)(R), 44-3-601, 44-4-104, 44-4-105 and 44-5-104, C.R.S. The purpose this regulation is to establish acceptable methods of payment for fees, fines (including fines in lieu of suspension) and other payments to the state licensing authority under the Liquor Code, the Beer and Wine Code, the Special Event Code, or the Colorado Liquor Rules, other than excise taxes, surcharges and fees pursuant to section 44-3-503, C.R.S.

A. This regulation sets forth acceptable methods of payment to the state licensing authority, as applicable, of the following:

1. Any license, permit, application or other fee required under 44-3-501, 44-4-104, 44-4-105 and 44-5-104, C.R.S., and regulation 47-506;

2. Any fine imposed by the state licensing authority, including any fine in lieu of suspension, under section 44-3-601 and Regulations 47-600 and 47-603.

3. Any voluntary payment of the costs of an investigation pursuant to an assurance of voluntary compliance under Regulation 47-601.

B. This regulation shall not apply to payment of any excise tax, surcharge or fee required under section 44-3-503, C.R.S.

C. The method of payment for any of the fees, fines or other payments set forth in paragraph (A) of this Regulation shall be in the form of:

1. An online payment using the Division's online payment portal accessible through a link posted on the Division's website;

2. A check, including a certified or cashier's check, or money order, made payable to "DOR Liquor Enforcement Division" and mailed or delivered to the Division's main

office location; or

3. Cash, provided that:

   a. any cash payment must be hand delivered to an employee of the Division at the Division's main office location during normal business hours.

Regulation 47-506. Fees.

Basis and Purpose. The statutory authority for this regulation includes, but is not limited to, subsections 44-3-202(1)(b), 44-3-301(2)(c), 44-3-501(3)-(4), and 44-3-911(4)(a)(III),C.R.S. The purpose of this regulation is to establish fees for certain applications, notices, reports, and services.

Below are the fees set by the State Licensing Authority pursuant to sections 44-3-501(3) and 44-3-501(4), C.R.S.

Alternating Proprietor Licensed Premises …….. $150.00
Application for New License ……. $1,100.00
Application for Renewal of a License ……..$125.00
(This fee will be effective from July 1, 2023, to June 30, 2024)

Minimum of four (4) hours of appearance or on-call or travel time to court and mileage, meals, and lodging at state employee per-diem rate. Actual hourly rate for all hours in excess of four (4) hours.

Regulation 47-600. Complaints against Licensees – Suspension, Revocation, and

Fining of Licenses.

Basis and Purpose. The statutory authority for this regulation includes, but is not limited to, subsections 44-3-202(1)(b), 44-3-202(2)(a)(I)(A), 44-3-202(2)(a)(I)(E), 44-3-202(2)(a)(I)(R), and 44-3-601, C.R.S. The purpose of this regulation is to establish general processes and procedures required for the licensing authority to suspend, revoke, or fine a license for violations of any law, rule, or regulation of the state licensing authority.

A. Whenever a written complaint shall be filed with a licensing authority, alleging a violation by any licensee for the manufacture or sale of alcohol beverages with a violation of any law or of any of the rules or regulations adopted by the state licensing authority, the licensing authority shall investigate, as deemed appropriate, the allegations.

B. If it shall appear therefrom or shall otherwise come to the attention of the licensing authority appears from an investigation that there is reasonable cause to believe that a licensee has violated any such law, rule or regulation, the licensing authority may issue and cause to be served upon such licensee a notice of hearing and order to show cause why its license should not be suspended, revoked, or fined. Notice of discipline by the state licensing authority shall be issued pursuant to the procedures set forth in Regulation 47-606.

C. A hearing shall be held at a place and time designated by the licensing authority on the day stated in the notice, or upon such other day as may be set for good cause shown. Hearings for the state licensing authority shall be conducted in accordance with the procedures set forth in Regulation 47-606. Evidence in support of the charges shall be given first, followed by cross-examination of those testifying thereto. The licensee, in person or by counsel, shall then be permitted to give evidence in defense and in explanation, and shall be allowed to give evidence and statements in mitigation of the charges. In the event the licensee is found to have committed the violation charged, evidence and statements in mitigation and/or aggravation of the offense shall also be permitted.

D. In the event the licensee is found not to have violated any law, rule, or regulation, the charges against the licensee will be dismissed. If the licensee is found to have violated some law, rule or regulation, the licensee's license may be suspended, revoked, or fined. When making a determination to suspend, revoke, or fine a license—including the amount of fine to impose—a licensing authority shall consider the severity of the violation(s) based on the provisions established in Regulation 47-603.

E. Every licensee whose license has been suspended by any licensing authority shall, if ordered by the licensing authority, post two notices in conspicuous places, one on the exterior and one on the interior of its premises, for the duration of the suspension. The notices shall be two feet in length and fourteen inches in width containing lettering not less than ½ " in height, and shall be in the following form:

NOTICE OF SUSPENSION
ALCOHOL BEVERAGE LICENSES ISSUED
FOR THESE PREMISES HAVE BEEN
SUSPENDED BY ORDER OF THE STATE-LOCAL LICENSING
AUTHORITY FOR VIOLATION OF THE COLORADO LIQUOR/BEER AND
WINE CODE

Advertising or posting signs to the effect that the premises have been closed or business suspended for any reason other than by order of the Department suspending alcohol beverage license, shall be deemed a violation of this rule.

F. During any period of active license suspension, when such suspension has not otherwise been

stayed by a licensing authority through the payment of a fine pursuant to section 44-3-601(3) through (8), C.R.S., the licensee shall not permit the selling, serving, giving away, or consumption of alcohol beverages on the licensed premises.

G. For purposes of calculating a fine to be paid, including in lieu of an active suspension, "between", as used in subsections 44-3-601(1)(c) and 44-3-601(3)(b), C.R.S., shall include the minimum and maximum fine amounts permitted by statute.

Regulation 47-605. Responsible Alcohol Beverage Vendor.

Basis and Purpose. The statutory authority for this regulation includes, but is not limited to, subsections 44-3-202(1)(b), 44-3-202(2)(a)(I)(A), and 44-3-1002(2), C.R.S. The purpose of this regulation is to establish curricula required to be considered a responsible alcohol beverage vendor.

To be considered a responsible alcohol beverage vendor at any licensed premises, or to serve beverage alcohol at tastings held in retail liquor stores, fermented malt beverage and wine retailers, or liquor licensed drugstores, the following standards must be complied with.

A. Initial Certification Training Program Standards

1. To be designated as a responsible alcohol beverage vendor, all employees of a licensee selling/serving alcohol beverages, and any owner or manager who directly supervises such employees, must attend a training program approved by the Division.

2. Once a licensee is designated a responsible alcohol beverage vendor, all new employees involved in the sale, handling and service of alcoholic beverages must complete the training described in this regulation within 90 days of date of hire.

3. The program must include at least two (2) hours of instruction time.

4. The program must provide written documentation of attendance and successful passage of a test on the knowledge of the required curriculum for each attendee.

   a. Attendees that can speak and write English must successfully pass a written test with a score of 70% or better.

   b. Attendees that cannot speak or write English may be offered a verbal test, provided the same questions are given as are on the written test and the results of the verbal test are documented with a passing score of 70% or better.

5. Program providers may, at their discretion, conduct class surveys or discussions to help determine a program's effectiveness. This time shall not be counted as part of the program's instruction time.

6. Program providers may, at their discretion, omit curriculum not applicable to the licensee being trained so long as the provider provides the Division with written notice of the reason for omission in advance.

B. Initial certification training class core curriculum

1. Discussion concerning alcohol's effects on the human body

   a. Alcohol's physical effects

b. Visible signs of intoxication

c. Recognizing the signs

d. Poly-substance interactions, including but not limited to, interaction with marijuana, prescriptions and over-the-counter medication, and other substances.

2. Liquor Liability

a. Civil liability

b. Criminal liability

c. Administrative liability (License Sanctions)

d. Liability for licensee and/or managers for the actions of employees

3. Sales to visibly Intoxicated persons

a. Colorado law provisions

b. Recognition and prevention, including identifying signs of visible alcohol and drug impairment.

c. Intervention techniques

d. Related laws or issues

i. DUI/DWAI

ii. Reg. 47-900

4. Sales to minors

a. Colorado law provisions

b. Sale and service

c. Permitting consumption

5. Acceptable forms of Identification (Reg. 47-912)

a. How to check identification - protocol

b. Spotting false identification

c. Mistakes made in verification

6. Other key state laws and rules affecting owners, managers, sellers, and servers

a. Age requirements for servers and sellers

b. Provisions for confiscating fraudulent identifications

c. Removal of liquor from on-premises licensed establishment

d. Patrons prohibited from bringing liquor onto licensed premises

e. Permitted hours of sale and service

f. Conduct of establishment

g. Nudity and prohibited entertainment

h. Permitting inspections by state and local licensing and enforcement authorities

i. Reporting changes in ownership and management

j. Licensee responsible for activities occurring within licensed premises

k. Tastings in retail liquor stores, liquor licensed drugstores, and fermented malt beverage and wine retailers

l. Prohibited purchases

m. On-premises and off-premises delivery and takeout rules

n. Commonly arising issues with delivery and takeout sales

C. Information for Owners and Managers

1. Local Licensing and Enforcement

a. Encourage to become familiar with local law provisions

b. Encourage to develop a relationship with local agencies

2. State Licensing and Enforcement

a. Contact Information for the Division

b. Become familiar with state laws and regulations

c. Encourage to develop a relationship with area investigator

3. Recommendations for Licensees

a. Establish policies and procedures.

b. Establish a record keeping system to document activities and events

c. Contact local authority on incident reporting expectations

D. Training programs based on type of licensed establishment and portability of training

1. Training program curriculum may be tailored by Division-certified training program providers to on-premises only licensed establishments, to off-premises only licensed establishments, or to both on-premises and off-premises combined.

Except as noted below, all approved training programs shall include the curriculum contained in paragraphs B and C of this regulation.

2. Combined training programs must include all of the curriculum contained in paragraphs B and C of this regulation. Persons certified in a combined training program may use the certification in both on- and off-premises licensed establishments.

3. On-premises only training programs may exclude from their curriculum subparagraph B(6)(k) of this regulation relating to tastings at retail liquor stores, liquor licensed drugstores, and fermented malt beverage and wine retailers. Persons certified in an on-premises only training program may use their certification only in an on-premises licensed establishment.

4. Off-premises only training programs may exclude from their curriculum subparagraphs B(6)(c), (d), (f), and (g) relating to activities at on-premises businesses. Persons certified in an off-premises only training program may use their certification only in an off-premises licensed establishment.

5. Responsible alcohol beverage vendor trainers may request approval from the Division in writing to omit curriculum that is not detailed in paragraphs (D)(3) and/or (D)(4), and is not applicable to the licensee being trained. Once approved by the Division, the responsible alcohol beverage vendor trainer can provide the modified training to other licensees where the reason for omission is the same.

E. Recertification requirements for responsible alcohol beverage vendor certified sellers/servers

1. Recertification must occur every two (2) years, inclusive of a grace period of thirty (30) days for the licensee to retain the responsible alcohol beverage vendor designation.

2. Recertification shall be accomplished in any of the following manners:

a. Documented successful passage of a written or verbal test with a score of 70% or better administered by a Division-approved program trainer in person, including virtually through a live program, which demonstrates knowledge of new and existing alcohol beverage laws

i. Completion of a course is not required before the test is administered

ii. Failure to pass the first administration of the test shall require attendance at either a recertification course or an initial certification training program

b. Documented attendance and completion of a recertification course

c. Documented attendance and completion of an initial certification training program

3. Recertification course

a. The curriculum must cover any and all changes in the law or regulations that affect the curriculum contained in the initial certification program

b. The course must provide a refresher on the following topics:

i. Sales to intoxicated persons

ii. Sales to minors

iii. Legal sales hours

iv. Civil and criminal liabilities for law violations

c. No minimum instruction time or testing requirements shall apply

d. Records Retention The certified seller – server training program providers for the Responsible Alcohol Beverage Vendor Program must keep proof of attendance and records of successful completion of the training for a minimum of three (3) years and make the records available to the Division upon request.

F. Certification and renewal of certification as a responsible alcohol beverage vendor trainer

1. To seek Division approval as a responsible alcohol beverage vendor trainer, an individual or business entity must submit the following information:

a. A Responsible Vendor Trainer Application; and

b. A copy of the responsible alcohol beverage vendor training course curriculum, to include any written or electronic materials to be shown to attendees, and an outline of the planned presentation.

2. Within thirty (30) days of providing the first training, the trainer shall provide a video or audio recording of the training material or lecture.

3. Approved training providers must renew approval with the Division every two (2) years beginning with a certification cycle of January 1, 2023 and closing January 1, 2025 to ensure continued compliance with statutory and regulatory standards.

G. Denials, Revocations, and Suspensions of Training Providers

1. The Division may deny, revoke, or suspend a training provider's approval if the Division finds any of the following:

a. The approved training provider does not comply with the minimum standards found in this regulation;

b. The approved training provider is teaching from a responsible alcohol beverage vendor training program that is materially different than the version submitted to the Division for approval; or

c. A training provider made misstatements, omissions, misrepresentations, or untruths in connection with seeking certification or renewal of certification.

Regulation 47-606. Disciplinary and Denial Process for State Licensing Authority

Basis and Purpose. The statutory authority for this regulation includes, but is not limited to sections 44-3-202(1)(b), 44-3-202(1)(c), 44-3-202(1)(d), 44-3-202(2)(a)(I)(A), 44-3-202(2)(a)(I)(E), 44-3-202(2)(a)(I)(R), 44-3-601, 44-3-901, 24-4-104, 24-4-105, and 24-5-101 C.R.S The purpose of this regulation is to establish what entity conducts the administrative hearings for the state licensing authority, the procedures governing administrative hearings, and other general hearings issues.

A. Initiation of Disciplinary Actions.

1. If the state licensing authority, on its own initiative or based on a complaint, has reasonable cause to believe that a licensee has violated the Liquor Code, the Beer and Wine Code, the Special Event Code, the Colorado Liquor Rules, or any of the state licensing authority's orders, the state licensing authority shall issue and serve upon the licensee an order to show cause as to why its license should not be suspended, revoked, restricted, fined, or subject to other disciplinary sanction.

2. The order to show cause shall identify the statute, rule, regulation, or order allegedly violated, and the facts alleged to constitute the violation. The order shall also provide an advisement that the license could be suspended, revoked, restricted, fined, or subject to other disciplinary sanction should the charges contained in the notice be sustained upon final hearing.

3. A respondent that has been served with an order to show cause shall be entitled to a hearing regarding the matters addressed therein.

B. License Denials.

1. If the state licensing authority denies an application, the state licensing authority shall inform the applicant in writing of the reasons for the denial in a notice of denial, mailed to the denied applicant at the last-known address as shown by the records of the Division and to the local licensing authority if a local license has been granted. A notice of denial shall be deemed to have been received three days after the date of mailing, if sent by mail.

2. If the denial of the application is based on a criminal conviction, the state licensing authority shall consider the factors set forth in section 24-5-101, C.R.S., and shall provide the written notice required in subsections 24-5-101(7) and (8), C.R.S.

3. A denied applicant that has been served with a notice of denial may request a hearing within the time set forth in the notice of denial by making a written request for a hearing to the Division. The request must be submitted by United States mail, by hand delivery, or by email at dor_led@state.co.us. The request must be sent to the mailing address of the Division's headquarters, as listed on the Division's website. Include "Attn: Hearing Request" in the mailing address. The written request for a hearing must be received by the Division within the time stated in the notice of denial. An untimely request for hearing will not be considered.

4. A denied applicant that timely requests a hearing following issuance of a notice of denial shall be served with a Notice of Grounds for Denial and shall be entitled to a hearing regarding the matters addressed therein.

C. General Procedures – Administrative Hearings.

1. Hearing Location. Hearings will generally be conducted by the Department of Revenue's Hearings Division. Hearings will be held virtually, unless otherwise ordered by the hearing officer for good cause. If the hearing officer orders an in-person hearing, the hearing will be conducted at a location in the greater Denver metropolitan area to be determined by the hearing officer. Good cause for in-person hearings includes unusual circumstances where justice, judicial economy, and convenience of the parties would be served by holding a hearing in person.

2. Scope of Hearing Regulations. This Regulation shall be construed to promote the

just and efficient determination of all matters presented.

3. Right to Legal Counsel. Any denied applicant or respondent has a right to legal counsel throughout all processes described in regulations associated with the denial of an application and disciplinary action. Such counsel shall be provided solely at the denied applicant's or respondent's expense. Unless a denied applicant or respondent is an entity that satisfies the exception in section 13-1-127(2), C.R.S., the denied applicant or respondent must be represented by an attorney admitted to practice law in the state of Colorado.

D. When a Responsive Pleading is Required.

1. A respondent shall file a written answer with the hearings division and the Division within 30 days after the date of mailing of any order to show cause. The written answer shall comply with the requirements of Rule 8 of the Colorado Rules of Civil Procedure. If a respondent fails to file a required answer, the Hearing Officer, upon motion, may enter a default against that person pursuant to section 24-4-105(2)(b), C.R.S. For good cause, as described in this Regulation, shown, the hearing officer may set aside the entry of default within ten days after the date of such entry.

2. A denied applicant shall file a written answer with the Hearings Division and the Division within 30 days after the date of mailing of any Notice of Grounds for Denial. The written answer shall comply with the requirements of Rule 8 of the Colorado Rules of Civil Procedure. If a denied applicant fails to file a required answer, the hearing officer, upon motion, may enter a default against that person pursuant to section 24-4-105(2)(b), C.R.S. For good cause shown, as described in this Regulation, the hearing officer may set aside the entry of default within ten days after the date of such entry.

E. Hearing Notices.

1. Notice to Set. The Division shall send a notice to set a hearing to the denied applicant or Respondent in writing by electronic mail or, if an electronic mail address is unknown, by first-class mail to the last mailing address of record.

2. Notice of Hearing. The Hearings Division shall notify the Division and denied applicant or Respondent of the date, place, time, and nature of the hearing regarding denial of the license application or whether discipline should be imposed against the Respondent's license at least 30 days prior to the date of such hearing, unless otherwise agreed to by both parties. This notice shall be sent to the Denied applicant or Respondent in writing by first-class mail to the last mailing address of record. Hearings shall be scheduled and held as soon as is practicable.

a. If an order of summary suspension has been issued pursuant to Regulation 47-602, the hearing on the order to show cause will be scheduled and held promptly.

b. Continuances may be granted for good cause, as described in this Regulation, shown. A motion for a continuance must be timely.

c. Good Cause for Continuance. Good cause for a continuance may include but is not limited to: death or incapacitation of a party or an attorney for a party; a court order staying proceedings or otherwise necessitating a continuance; entry or substitution of an attorney for a party a reasonable time prior to the hearing, if the entry or substitution reasonably requires a postponement of the hearing; a change in the parties or pleadings sufficiently significant to require a

postponement; a showing that more time is clearly necessary to complete authorized discovery or other mandatory preparation for the hearing; or agreement of the parties to a settlement of the case which has been or will likely be approved by the final decision maker. Good cause for a continuance normally will not include the following: unavailability of counsel because of engagement in another judicial or administrative proceeding, unless the other proceeding was involuntarily set subsequent to the setting in the present case; unavailability of a necessary witness, if the witness' testimony can be taken by telephone or by deposition; or failure of an attorney or a party timely to prepare for the hearing.

F. Prehearing Matters Generally.

1. Prehearing Conferences Once a Hearing is Set. Prehearing conferences may be held at the discretion of the hearing officer upon request of any party, or upon the hearing officer's own motion. If a prehearing conference is held and a prehearing order is issued by the hearing officer, the prehearing order will control the course of the proceedings. Such prehearing conferences will be held virtually or by telephone, unless otherwise ordered by the hearing officer.

2. Depositions. Depositions are generally not allowed; however, a hearing officer has discretion to allow a deposition if a party files a written motion and can show why such deposition is necessary to prove its case. When a hearing officer grants a motion for a deposition, Colorado Rules of Civil Procedure 30 controls. Hearings will not be continued because a deposition is allowed unless (a) both parties stipulate to a continuance and the hearing officer grants the continuance, or (b) the hearing officer grants a continuance over the objection of any party in accordance with paragraphs (E)(2)(b) and (c) of this Regulation.

3. Prehearing Statements Once a Hearing is Set. Prehearing Statements are required and unless otherwise ordered by the hearing officer, each party shall file with the hearing officer and serve on each party a prehearing statement no later than seven calendar days prior to the hearing. Parties shall also exchange exhibits at that time. Parties shall not file exhibits with the hearing officer. Parties shall exchange exhibits by the date on which prehearing statements are to be filed. Prehearing statements shall include the following information:

   a. Witnesses. The name, mailing address, and telephone number of any witness whom the party may call at hearing, together with a detailed statement of the expected testimony.

   b. Experts. The name, mailing address, and brief summary of the qualifications of any expert witness a party may call at hearing, together with a statement that details the opinions to which each expert is expected to testify. These requirements may be satisfied by the incorporation of an expert's resume or report containing the required information.

   c. Exhibits. A description of any physical or documentary evidence to be offered into evidence at the hearing. Exhibits should be identified as follows: Division using numbers and denied applicant or respondent using letters.

   d. Stipulations. A list of all stipulations of fact or law reached.

4. Prehearing Statements Binding. The information provided in a party's prehearing statement shall be binding on that party throughout the course of the hearing unless

modified to prevent manifest injustice. New witnesses or exhibits may be added only if: (1) the need to do so was not reasonably foreseeable at the time of filing of the prehearing statement; (2) it would not prejudice other parties; and (3) it would not necessitate a delay of the hearing.

5. Consequence of Not Filing a Prehearing Statement Once a Hearing is Set. If a party does not timely file a prehearing statement, the hearing officer may impose appropriate sanctions including, but not limited to, striking proposed witnesses and exhibits.

G. Conduct of Hearings.

1. The hearing officer shall cause all hearings to be electronically recorded.

2. The hearing officer may allow a hearing, or any portion of the hearing, to be conducted in real time by telephone or other electronic means. If a party is appearing by telephone, the party must provide actual copies of the exhibits to be offered into evidence at the hearing to the hearing officer when the prehearing statement is filed. Electronic filings will be accepted at: dor_regulatoryhearings@state.co.us.

3. The hearing officer shall administer oaths to all witnesses at hearing. The hearing officer may question any witness.

4. The hearing, including testimony and exhibits, shall be open to the public unless otherwise ordered by the hearing officer in accordance with a specific provision of law.

   a. Reports and other information that would otherwise be confidential pursuant to subsection 44-3-202(1)(d), C.R.S., may be introduced as exhibits at hearing.

   b. Any party may move the hearing officer to seal an exhibit or order other appropriate relief if necessary to safeguard the confidentiality of evidence.

5. Court Rules.

   a. To the extent practicable, the Colorado Rules of Evidence apply. Unless the context requires otherwise, whenever the word “court,” “judge,” or “jury” appears in the Colorado Rules of Evidence, such word shall be construed to mean a hearing officer. A hearing officer has discretion to consider evidence not admissible under such rules, including but not limited to hearsay evidence, pursuant to section 24-4-105(7), C.R.S.

   b. To the extent practicable, the Colorado Rules of Civil Procedure apply. However, Colorado Rules of Civil Procedure 16 and 26-37 do not apply, although parties are encouraged to voluntarily work together to resolve the case, simplify issues, and exchange information relevant to the case prior to a hearing. Unless the context otherwise requires, whenever the word “court” appears in a rule of civil procedure, that word shall be construed to mean a hearing officer.

6. Exhibits.

   a. All documentary exhibits must be paginated by the party offering the exhibit

into evidence.

b. The Division shall use numbers to mark its exhibits.

c. The denied applicant or respondent shall use letters to mark its exhibits.

7. The hearing officer may proceed with the hearing or enter a default judgment if any party fails to appear at hearing after proper notice.

H. Post Hearing. After considering all the evidence, the hearing officer shall determine whether the proponent of the order has proven its case by a preponderance of the evidence, and shall make written findings of evidentiary fact, ultimate conclusions of fact, conclusions of law, and a recommendation. These written findings shall constitute an initial decision subject to review by the state licensing authority pursuant to the Colorado Administrative Procedure Act and this paragraph H.

1. Exception(s) Process. Any party may appeal an initial decision to the State licensing authority pursuant to the Colorado Administrative Procedure Act by filing written exception(s) within 30 days after the date of mailing of the initial decision to the denied applicant or respondent and the Division. The written exception(s) shall include a statement giving the basis and grounds for the exception(s). Any party who fails to properly file written exception(s) within the time provided in these regulations shall be deemed to have waived the right to an appeal. A copy of the exception(s) shall be served on all parties. The address of the state licensing authority is: state licensing authority, 1707 Cole Boulevard, Suite 350, Lakewood CO 80401.

2. Designation of Record. Any party that seeks to reverse or modify the Initial Decision of the hearing officer shall file with the state licensing authority, within 20 days from the mailing of the Initial Decision, a designation of the relevant parts of the record and of the parts of the hearing transcript which shall be prepared, and advance the costs therefore. A copy of this designation shall be served on all parties. Within ten days thereafter, any other party may also file a designation of additional parts of the transcript of the proceedings which is to be included and advance the cost therefore. No transcript is required if the review is limited to a pure question of law. A copy of this designation of record shall be served on all parties.

3. Deadline Modifications. The state licensing authority may modify deadlines and procedures related to the filing of exceptions to the initial decision upon motion by either party for good cause shown.

4. No Oral Argument Allowed. Requests for oral argument will not be considered.

I. No Ex Parte Communication. Ex parte communication shall not be allowed at any point following the formal initiation of the hearing process. A party or counsel for a party shall not initiate any communication with a hearing officer or the state licensing authority, or with conflicts counsel representing the hearing officer or state licensing authority, pertaining to any pending matter unless all other parties participate in the communication or unless prior consent of all other parties (and any pro se parties) has been obtained. Parties shall provide all other parties with copies of any pleading or other paper submitted to the hearing officer or the state licensing authority in connection with a hearing or with the exceptions process.

J. Liquor Enforcement Division representation. The Division shall be represented by the Colorado Department of Law.

Regulation 47-912. Identification.

Basis and Purpose. The statutory authority for this regulation includes, but is not limited to, subsections 44-3-103, 44-3-202(1)(b), 44-3-202(2)(a)(I)(A), 44-3-202(a)(I)(R), 44-3-410(2)(a)(IV), and 44-3-901(11)(a), C.R.S. The purpose of this regulation is to define adequate identification criteria for purposes of demonstrating age, and establish the factors of an affirmative defense available to a licensee for an alleged sale to a minor.

A. Except as otherwise provided in section 44-3-901(11), C.R.S., licensees may refuse to sell alcohol beverages to any person if unable to verify the person is at least twenty-one years of age. Verification of age can be done by either:

1. Producing adequate identification of age, including any verified digital identification, that is valid and unexpired. Identification of age is adequate if it contains a picture and date of birth and is one of the following:

a. Any type of driver's license, or identification card issued by any state within the United States, the District of Columbia, any U.S. Territory, or any foreign country, including Canada or Mexico;

b. A United States military identification card or any other identification card issued by the United States government including, but not limited to, a permanent resident card, alien registration card, or consular card;

c. A passport, or passport identification card;

d. A valid consular identification card from any foreign country; or

2. Using a biometric identity verification device. For purpose of this regulation, “biometric identity verification device” means a device that instantly verifies the identity and age of a person by an electronic scan of a biometric characteristic of the person, such as a fingerprint, iris, face, or other biometric characteristic, or any combination of these characteristics; references the person’s identity and age against any record of identification described in paragraph (A)(1) of this regulation; and contemporaneously provides the licensee with identity and age verification for the person utilizing the device. Prior to using a biometric identity verification device to verify the identity and age of a person for purposes of this paragraph (A)(2), the licensee shall ensure the device provider has systems in place to:

a. Verify the authenticity of any identification records by an electronic authentication process;

b. Verify the identity of, and relevant identifying information about, the person through a secondary, electronic authentication process or set of processes utilizing commercially available data, such as a public records query or a knowledge-based authentication quiz; and

c. Securely link the authenticated record to biometric characteristics contemporaneously collected from the person and store the authenticated record in a centralized, highly secured, encrypted biometric database.

B. It shall be an affirmative defense to any administrative action brought against a licensee for alleged sale to a minor if the licensee meets its burden of proof to establish, by a preponderance of the evidence, that:

1. The minor presented fraudulent identification of the type established in paragraph (A)(1) of this regulation, and the licensee possessed an identification book issued within the past two (2) years, which contained a sample of the specific kind of identification presented for compliance purposes, or;

2. The licensee used and relied upon a biometric identity verification device that indicated the minor was twenty-one years of age or older, in accordance with paragraph (A)(2) of this regulation.

3. A licensee asserting the affirmative defense, as described in Paragraph (B)(2) of this regulation, shall be responsible for obtaining, and providing to the Division, all records necessary to establish that a biometric identity verification device was used as age verification for the transaction in question.

C. If a liquor-licensed drugstore or fermented malt beverage and wine retailer elects to use a biometric identity verification device at a self checkout machine or other mechanism described in section 44-3-410(2)(a)(III) or 44-4-107(4)(b), C.R.S., respectively, it shall not allow a consumer to complete the alcohol beverage purchase without assistance from and completion of the entire transaction by an employee of the liquor-licensed drugstore or fermented malt beverage and wine retailer.

Regulation 47-913. Age of Employees.

Basis and Purpose. The statutory authority for this regulation includes, but is not limited to, subsections 44-3-202(1)(b), 44-3-202(2)(a)(I)(A), 44-3-202(2)(a)(I)(R), 44-3-901(6)(p), and 44-4-106(1), C.R.S. The purpose of this regulation is to define permitted and prohibited roles for a liquor licensee's employees based upon the employee's age.

A. Nothing within this regulation shall authorize a licensee to permit a person under the age of eighteen (18) to sell, dispense, serve, or participate in the sale, dispensing, or service of alcohol beverages.

B. Except as otherwise provided by this regulation, a licensee shall not permit a person who is at least eighteen (18) years of age but less than twenty-one (21) years of age to sell, dispense, or serve alcohol beverages unless the employee is supervised by another person who is on the licensed premises and is at least twenty-one (21) years of age.

C. Tavern and lodging and entertainment licensees that do not regularly serve meals.

1. Employees or agents of the licensee must be at least twenty-one (21) years of age to handle and otherwise act with respect to malt, vinous, and spirituous liquors in the same manner as that person does with other items sold at retail and to sell such alcohol beverages or check identification of the customers of the retail outlet.

D. Retail liquor store and liquor-licensed drugstore licensees.

1. Retail liquor store and liquor-licensed drugstore licensees may permit a person who is at least eighteen (18) years of age to sell, serve, or participate in the sale or service of malt, vinous, and spirituous liquor without the need for supervision contained in subsection (B) of this Regulation.

2. Retail liquor store and liquor-licensed drugstore licensees shall not permit a person who is less than twenty-one (21) years of age to deliver malt, vinous, and spirituous liquor pursuant to Regulation 47-426, 1 C.C.R. 203-2.

E. Fermented malt beverage licensees.

1. Fermented Malt Beverage On or On/Off Retail Licenses: Subsections (A) and (B) of this regulation apply for fermented malt beverage retailers licensed for on premises and on/off premises consumption.

2. Fermented Malt Beverage and Wine Retailer Licensees.

a. Fermented malt beverage and wine retailer licensees may permit a person under eighteen (18) years of age who is supervised by a person on the premises eighteen (18) years of age or older to be employed on the licensed premises and handle fermented malt beverages or wine in the same respect as other items sold at retail, except a person under the age of eighteen (18) years of age shall not:

i. sell or dispense fermented malt beverages or wine;

ii. check age identification; or

iii. make deliveries beyond the customary parking area of the licensed premises

b. Fermented malt beverage and wine retailer licensees may permit a person who is at least eighteen (18) years of age, to sell, serve, or participate in the sale or service of fermented malt beverages or vinous liquor.

c. Fermented malt beverage and wine retailer licensees shall not permit a person who is less than twenty-one (21) years of age to deliver fermented malt beverages or vinous liquor pursuant to Regulation 47-426, 1 C.C.R. 203-2.

F. Special event permit holders:

1. No person under eighteen (18) years of age may sell, serve, dispense or handle alcohol beverages.

2. Malt, vinous, and spirituous liquors special event permittees, and fermented malt beverage special event permittees, may permit a person who is at least eighteen (18) years of age but less than twenty-one (21) years of age to sell, serve, dispense, or handle alcohol beverages when said person is under the direct supervision of a person who is at least twenty-one (21) years of age.

G. Wholesalers and Manufacturers licensed pursuant to article 3, of title 44, C.R.S.

1. Employees or agents of the licensee who are at least eighteen (18) years of age may handle and otherwise act with respect to alcohol beverages in the same manner as such person would with other items sold at wholesale, as long as they are under the direct supervision of a person who is at least twenty-one (21) years of age. However, persons under the age of twenty-one (21) shall not sell malt, vinous, or spirituous liquors or check identification of the customers of the permitted sales room.

Regulation 47-1000. Qualifications for Special Event Permit.

Basis and Purpose. The statutory authority for this regulation includes but is not limited to subsections 44-3-202(1)(b), 44-3-202(2)(a)(I)(A), 44-3-202(2)(a)(I)(R), and 44-5-102, C.R.S. The purpose of this regulation is to define the types of organizations that qualify for a special event permit.

A special event permit under the Special Event Code may be issued to:

A. An organization, whether or not presently licensed under the Liquor Code or Beer and Wine Code, that:

1. Has been incorporated under the laws of this state for social, fraternal, patriotic, political, educational, or athletic purposes, and not for pecuniary gain

2. Is a regularly chartered branch, lodge, or chapter of a national organization or society organized for social, fraternal, patriotic, political, educational, or athletic purposes and is nonprofit in nature.

3. Is a regularly established religious or philanthropic institution.

4. Is a state institution of higher education, to include each principal campus of such institution.

B. Any municipality, county, or special district.

C. Any political candidate who has filed the necessary reports and statements with the secretary of state pursuant to article 45 of title 1, C.R.S. As used in this regulation:

1. “Political” as used in article 5 of title 44, shall mean any political organization or political party;

2. “Political organization” means any group of registered electors who, by petition for nomination of an unaffiliated candidate as provided in section 1-4-802, C.R.S., places upon the official general election ballot nominees for public office pursuant to section 1-1-104(24), C.R.S.as defined in section 1-1-104, C.R.S.; and

3. “Political party” means either a major political party or a minor political party pursuant to 1-1-104(25), C.R.S. However, no permit shall be required for those individuals or candidates campaigning or running for public office and who sponsor fund raising activities when such activities are held in a private residence and there is no cash bar in operation.

D. An entity that is either a state agency, the Colorado Wine Industry Development Board created in section 35-29.5-103, C.R.S., or an instrumentality of a municipality or county, provided that the entity promotes:

1. Alcohol beverages manufactured in the state; or

2. Tourism in an area of the state where alcohol beverages are manufactured.

Re: Statement of Adoption

Pursuant to the state Administrative Procedure Act, Title 24, Article 4, C.R.S., I, Heidi Humphreys, Interim Executive Director of the Colorado Department of Revenue and State Licensing Authority, promulgate the following additions and amendments to rules:

1 CCR 203-2, Colorado Liquor Rules

Regulation 47-004.	Fermented Malt Beverages On or On/Off – Possession of Alcohol Liquors.
Regulation 47-008.	Fermented Malt Beverages – Limitations of License.
Regulation 47-009.	Fermented Malt Beverage and Wine Retailer Licenses Distance Requirement.
Regulation 47-010.	Items Approved for Sale in Fermented Malt Beverage and Wine Retailer Licenses.
Regulation 47-100.	Definitions.
Regulation 47-200.	Petitions for Statements of Position and Declaratory Orders Concerning the Colorado Liquor Code, Colorado Beer and Wine Code, Special Event Code, or Colorado Liquor Rules.
Regulation 47-302.	Changing, Altering or Modifying Licensed Premises.
Regulation 47-304.	Transfer of Ownership and Changes in Licensed Entities.
Regulation 47-312.	Change of location.
Regulation 47-313.	Tastings.
Regulation 47-318.	Owner-Manager.
Regulation 47-322.	Unfair Trade Practices and Competition.
Regulation 47-405.	Festival Permit.
Regulation 47-408.	Purchases by Retailers.
Regulation 47-426.	Delivery Sales by Off-Premises Licensees.
Regulation 47-505.	Methods of payment of fees, fines or other payments made to the State Licensing Authority.
Regulation 47-506.	Fees.
Regulation 47-600.	Complaints against Licensees – Suspension, Revocation, and Fining of Licenses.
Regulation 47-605.	Responsible Alcohol Beverage Vendor.
Regulation 47-606.	Disciplinary and Denial Process for State Licensing Authority.
Regulation 47-912.	Identification.
Regulation 47-913.	Age of Employees.

Regulation 47-1000. Qualifications for Special Event Permit.

The amended rules are adopted as dated in the electronic signature below.

1.15 RULES AND REGULATIONS REGARDING THE LICENSURE OF AND PRACTICE BY PHYSICIAN ASSISTANTS

…

C. EXTENT AND MANNER IN WHICH A PHYSICIAN ASSISTANT MAY PERFORM ACTS CONSTITUTING THE PRACTICE OF MEDICINE WITH A COLLABORATIVE AGREEMENT IN PLACE

1. The requirements for a Collaborative Agreement applies to all collaborating physicians and physician assistants as of August 7, 2023.

2. Responsibilities of the Physician Assistant

   a. Compliance with these Rules. A physician assistant is responsible for implementing and complying with statutory requirements and the provisions of these Rules.

   b. License. A physician assistant shall ensure that the individual's license to practice as a physician assistant is active and current prior to performing any acts requiring a license.

   c. Collaborative Agreement. A physician assistant must keep on file their Collaborative Agreement at their primary location of practice and make it available to the Board upon request.

   d. Identification As A Physician Assistant. While performing acts defined as the practice of medicine, a physician assistant shall clearly identify both visually (e.g. by nameplate or embroidery on a lab coat) and verbally as a physician assistant.

   e. Chart Note. A physician assistant shall make a chart note for every patient for whom the physician assistant performs any act defined as the practice of medicine in section 12-240-107(1), C.R.S. When a physician assistant consults with any physician about a patient, the physician assistant shall document in the chart note the names of any physician consulted and the date of the consultation.

   f. Documentation. A physician assistant shall keep such documentation as necessary to assist a collaborating or other physician in performing an adequate performance assessment as set forth below in Section (C)(3)(b) of this Rule.

   g. Emergency DepartmentSettings

(1) Collaborative Agreements entered into by physician assistants in emergency departments in hospitals with Level I or II trauma center settings shall take the form of a supervisory agreement as identified in section 12-240-114.5(2)(b)(IV)(A), C.R.S.

(2) For Collaborative Agreements entered into by physician assistants in emergency departments in hospitals other than with Level I or II trauma center settings, a supervising physician or physician group may increase the number of hours for which the Collaborative Agreement is a supervisory agreement, pursuant to section 12-240-114.5(2)(b)(IV)(B), C.R.S.

3. Requirements for Physicians and Physician Groups Entering into Collaborating Agreements

a. Physicians must be actively practicing medicine in Colorado by means of a regular and reliable physical presence in Colorado. For purposes of this Rule, to practice medicine based primarily on telecommunication devices or other telehealth technologies does not constitute “actively practicing medicine in Colorado.”

b. Performance Evaluation

(1) A physician or physician group who has entered into a Collaborating Agreement with a physician assistant shall develop and carry out a periodic Performance Evaluation as required by these Rules and section 12-240-114.5(1)(c), C.R.S. The Performance Evaluation should include domains of competency relevant to the particular practice and utilize more than one modality of assessment to evaluate those domains of competency. The Performance Evaluation should take into account the education, training, experience, competency, and knowledge of the individual physician assistant for whatever practice area in which the physician assistant is engaged.

(2) The statutory relationship between the physician or physician group and physician assistant is by its nature a team relationship. The purpose of the Performance Evaluation is to enhance the collaborative nature of the team relationship, promote public safety, clarify expectations, and facilitate the professional development of an individual physician assistant.

(3) The domains of competency may be dependent upon the type of practice the physician assistant is engaged in and may include but are not limited to:

(a) Medical knowledge;

(b) Ability to perform an appropriate history and physical examination;

(c) Ability to manage, integrate and understand objective data, such as laboratory studies, radiographic studies, and consultations;

(d) Clinical judgment, decision-making and assessment of patients;

(e) Accurate and appropriate patient management;

(f) Communication skills (patient communication and communication with other care providers);

(g) Documentation and record keeping;

(h) Collaborative practice and professionalism;

(i) Procedural and technical skills appropriate to the practice.

(4) The modalities of assessment to evaluate domains of competency may include but are not limited to:

(a) Co-management of patients;

(b) Direct observation;

(c) Chart review with identification of charts reviewed;

(d) Feedback from patients and other identified providers.

(5) Performance evaluations must occur with at least the minimum frequency required in section 12-240-114.5(2)(b)(I)(C), C.R.S.

(6) A physician or physician group must maintain accurate records and documentation of the Performance Evaluations, including the initial Performance Evaluation and periodic Performance Evaluations for each physician assistant with whom they have entered into a Collaborative Agreement.

(7) The Board may audit a physician's or physician group's performance assessment records. Upon request, the physician or physician group shall produce records of the performance assessments as required by the Board.

4. Waiver of Provisions of these Rules

a. Criteria for Obtaining Waivers.

(1) Upon a showing of good cause, the Board may permit waivers of any provision of these Rules.

(2) Factors to be considered in granting such waivers include, but are not limited to: whether the physician assistant is located in an underserved or rural area; the quality of protocols setting out the responsibilities of a physician assistant in the particular practice; any disciplinary history on the part of the physician assistant or the physician entering into a Collaborating Agreement; and whether the physician assistant in question works less than a full schedule.

(3) All such waivers shall be in the sole discretion of the Board. All waivers shall be strictly limited to the terms provided by the Board. No waivers shall be granted if in conflict with state law.

b. Procedure for Obtaining Waivers.

(1) Applicants for waivers must submit a written application on forms approved by the Board detailing the basis for the waiver request.

(2) The written request should address the pertinent factors listed in Section (C)(4)(a)(2) of this Rule and include a copy of any written protocols in place for the supervision of physician assistants.

(3) Upon receipt of the waiver request and documentation, the matter will be considered at the next available Board meeting.

D. PRESCRIPTION AND DISPENSING OF DRUGS.

1. Prescribing Provisions:

a. A physician assistant may issue a prescription order for any drug or controlled substance provided that:

(1) Each prescription and refill order is entered on the patient's chart.

(2) For each written prescription issued by a physician assistant, the prescription shall contain, in legible form imprinted on the prescription, the physician assistant's name and the address of the health facility where the physician assistant is practicing.

(a) If the health facility is a multi-specialty organization, the name and address of the specialty clinic within the health facility where the physician assistant is practicing must be imprinted on the prescription.

(3) A physician assistant may not issue a prescription order for any controlled substance unless the physician assistant has received a registration from the United States Drug Enforcement Administration.

(4) For the purpose of this Rule electronic prescriptions are considered written prescription orders.

(5) The dispensing of prescription medication by a physician assistant is subject to section 12-280-120(6)(a), C.R.S.

2. Obtaining Prescription Drugs or Devices to Prescribe, Dispense, Administer or Deliver

a. No drug that a physician assistant is authorized to prescribe, dispense, administer, or deliver shall be obtained by said physician assistant from a source other than a collaborating physician, pharmacist, or pharmaceutical representative.

b. No device that a physician assistant is authorized to prescribe, dispense, administer, or deliver shall be obtained by said physician assistant from a source

other than a collaborating physician, pharmacist, or pharmaceutical representative.

E. REPORTING REQUIREMENTS

1. Collaborative Agreements.

a. A Collaborative Agreement must be in writing and maintained at the main practice location for the physician assistant.

b. The Collaborative Agreement must include the requirements set forth in section 12-240-114.5(2)(a), C.R.S.

c. The form shall be signed by the physician and the physician assistant.

d. Collaborative Agreements for physician assistants with fewer than five thousand practice hours, or for physician assistants changing practice areas with fewer than three thousand hours in the new practice area shall be a supervisory agreement and include the additional requirements set forth in section 12-240-114.5(2)(b), C.R.S.

Effective 12/30/83; Revised 05/30/85; Revised 12/30/85; Revised 8/30/92; Revised 11/30/94; Revised 12/1/95; Revised 12/14/95; Revised 3/30/96; Revised 3/30/97; Revised 9/30/97; Revised 3/30/98; Revised 9/30/98; Revised 06/30/00; Revised 12/30/01; Revised 9/30/04; Revised 2/9/06, Effective 3/31/06; Emergency Rule Revised and Effective 7/01/10; Revised 08/19/10, Effective 10/15/10; Revised 11/15/12, Effective 01/14/2013; Revised 5/22/14, Effective 7/15/14; Revised 8/20/15, Effective 10/15/15; Emergency Rule Revised And Effective 8/18/16; Permanent Rule Revised 8/18/16; Effective 10/15/16; Permanent Rule Revised 2/15/18; Emergency Rule Revised 8/17/23 and Effective 8/17/23; Permanent Rule Revised 8/17/23 and Effective 10/15/23;

1.32 RULES AND REGULATIONS REGARDING GENERALLY ACCEPTED STANDARDS OF MEDICAL PRACTICE REGARDING PREGNANCY-RELATED SERVICES

A. Basis: The authority for promulgation of Rule 1.32 (“these Rules”) by the Colorado Medical Board (“Board”) is set forth in sections 24-4-103, 12-240-106(1)(a), and 12-30-120(2), C.R.S.

B. Purpose: The purpose of these rules and regulations is to implement the requirements of section 12-30-120(2), C.R.S.

C. Definitions

1. “Abortion” has the meaning set forth in section 25-6-402(1), C.R.S.

2. “Medication abortion” has the meaning set forth in section 12-30-120(1)(b), C.R.S.

3. “Medication abortion reversal” has the meaning set forth in section 12-30-120(1)(c), C.R.S.

D. Standard of Care Considerations

1. Compliance with generally accepted standards of medical practice requires a licensee to exercise the same degree of knowledge, skill, and care as exercised by licensees in the same field of medicine at the time care is rendered. Substandard care cannot be excused

on the grounds that other licensees also provided care which deviates from generally accepted medical standards. Ascertaining the objectively reasonable standard of care is more than just a factual finding of what all, most, or even a "respectable minority" of licensees do. Rather, licensees will be judged according to the tenets of the school of practice to which the licensee professes to follow.

2. The Board evaluates generally accepted standards of medical practice on a case-by-case basis. Each instance of medical care will involve its own unique set of facts that the Board must evaluate against the backdrop of evidence-based practice standards when available.

3. In evaluating whether a licensee's provision of medication abortion reversal meets generally accepted standards of medical practice, the Board will evaluate the scope and nature of information exchanged between the licensee and patient prior to services being provided. The Board anticipates that a fully informed consent will include, at a minimum, information about the risks, benefits, likelihood of intended outcome of the proposed treatment, and likelihood of achieving the intended outcome without the proposed treatment in order for the patient to make an informed decision about whether to undertake the treatment. The Board anticipates that the licensee will document the substance of all informed consent discussions and will place a copy of all written informed consent disclosures within the patient's chart.

4. Although the Board will not treat medication abortion reversal as a *per se* act of unprofessional conduct, the Board does not consider administering, dispensing, distributing, or delivering progesterone with the intent to interfere with, reverse, or halt a medication abortion undertaken through the use of mifepristone and/or misoprostol to meet generally accepted standards of medical practice under section 12-240-121(1)(j), C.R.S. For other conduct that could meet the definition of medication abortion reversal, the Board will investigate such deviation on a case-by-case basis. Licensees are expected to practice evidence-based medicine, and any licensee who provides unscientific treatments that fall below the generally accepted standard of care may be subject to discipline.

REGULATION NUMBER 28

Building Benchmarking and Performance Standards

5 CCR 1001-32

[Editor's Notes follow the text of the rules at the end of this CCR Document.]

Outline of Regulation

Pursuant to Colorado Revised Statutes § 24-4-103 (12.5), materials incorporated by reference are available for public inspection during normal business hours, or copies may be obtained at a reasonable cost from the Air Quality Control Commission (the Commission), 4300 Cherry Creek Drive South, Denver, Colorado 80246-1530. Some material incorporated by reference is also available through the United States Government Printing Office, online at www.govinfo.gov. Materials incorporated by reference are those editions in existence as of the date indicated and do not include any later amendments.

PART A Applicability and General Provisions

I. Purpose

I.A. This regulation establishes energy-use benchmarking data reporting and building performance requirements for owners of existing and new covered buildings in order to meet greenhouse-gas emission reductions goals for such buildings under 25-7-142(8)(a)(II)(A)-(B), C.R.S. (2022).

II. Applicability

II.A. This regulation applies to owners of covered buildings, as defined in Section III.O.

II.B. The owner of a public building must only comply with the building performance standards in Part C for that covered building upon completion of any construction or renovation project that has an estimated cost of at least $500,000 and impacts at least twenty-five percent (25%) of the covered building's square footage, excluding upgrades such as painting, flooring, or tenant finishes that do not impact energy use.

III. Definitions

III.A. "Affordable housing" means (I) for a household residing in housing on a rental basis, annual income of the household is at or below eighty percent of the area median income of households of that size in the county in which the housing is located; (II) for a household residing in housing on a home ownership basis, annual income of the household is at or below one hundred forty percent of the area median income of households of that size in the county in which the housing is located; or (III) housing that incorporates mixed-income development.

III.B. "Aggregated data" means electric or gas utility customer data, alone or in combination with non-customer data, resulting from processing (e.g., average of a group of customers) and/or the compilation of customer data of one or more customers from which all unique identifiers and personal information has been removed.

III.C. "Aggregation threshold" means, for each qualifying utility, the minimum number of customer accounts associated with a covered building for which the qualifying utility may provide the owner of the covered building with aggregated data upon request without requiring each customer's consent to have the customer's energy-use data accessed or shared.

III.D. "Agricultural purpose" means a building or structure used to house farm implements, hay, unprocessed grain, poultry, livestock, or other agricultural products. For the purpose of this definition, this building or structure must not contain habitable space or a place of employment where agricultural products are processed or treated or packaged; nor is it a place used by the public. The gross floor area of a building or structure used for an agricultural purpose must include all space within the building or structure to determine if the building or structure meets the covered building exemption Section III.O.2.

III.E. "Agricultural product" means any agricultural, horticultural, viticultural, or vegetable products or poultry or poultry products grown or produced in Colorado. Agricultural products do not include "regulated marijuana" as defined by Colorado's Marijuana Enforcement Division in 1 CCR 212-3 (2022).

III.F. "Benchmarking" means to input benchmarking data into a benchmarking tool to measure and assess the energy performance and greenhouse gas pollution for a covered building for the reporting year.

III.G. "Benchmarking data" means the information related to a covered building that is input into or calculated by a benchmarking tool.

III.H. "Benchmarking tool" means the ENERGY STAR® Portfolio Manager or a successor online resource used to track and assess the performance of certain properties relative to similar properties.

III.I. "Beneficial electrification" means converting the energy source of a customer's end use from a nonelectric fuel source to a high-efficiency electric source, or avoiding the use of nonelectric fuel sources in new construction or industrial applications, if the result of the conversion or avoidance is to

III.I.1. Reduce net greenhouse gas emissions over the lifetime of the conversion or avoidance; and

III.I.2. Reduce societal costs or provide for more efficient utilization of grid resources.

III.I.3. Beneficial electrification does not include

III.I.3.a. Retail distributed generation; or

III.I.3.b. A renewable energy storage system.

III.J. "Biomedical research laboratory" means a scientific laboratory used to conduct research relating to both biology and medicine.

III.K. "Building owner" means a person possessing title to a building or property or the person's designated agent.

III.L. "Building performance standards" (BPS) means standards a covered building must meet to achieve the greenhouse gas reduction requirements under 25-7-142(8)(a)(II), C.R.S. (2022).

III.M. "Campus" means a collection of two or more buildings that are owned and operated by the same person and that have a shared purpose and function as a single property. Campus includes two or more of the buildings that comprise the capitol complex.

III.N. "CEO" means the Colorado Energy Office.

III.O. "Covered building" means a building comprising a gross floor area of fifty thousand (50,000) square feet or more that is occupied by a single occupant or a group of tenants. Covered building does not include

III.O.1. Covered buildings that are a storage facility, stand-alone parking garage, or an airplane hangar that lacks heating and cooling;

III.O.2. A building in which more than half of the gross floor area is used for manufacturing, industrial, or agricultural purposes as defined in Section III.; or

III.O.3. A single-family home, duplex, or triplex.

III.P. "Customer-owned retail distributed generation system" means retail distributed generation or a renewable energy storage system owned or controlled by a covered building owner.

III.Q. "Data center" means buildings specifically designed and equipped to meet the needs of high density computing equipment, such as server racks, used for data storage and processing. Gross floor area of data centers should include all space within the building(s) including raised floor computing space, server rack aisles, storage silos, control console areas, battery rooms, mechanical rooms for cooling equipment, administrative office areas, elevator shafts, stairways, break rooms and restrooms. When a data center is located within a larger building, the gross floor area of the data center should include only the spaces that are uniquely associated with the data center (e.g., not include spaces shared by the data center and other tenants, such as break rooms or hallways) in the building.

III.R. "Demand flexibility" means the use of communication and control technology to shift electricity use across hours of the day while delivering end-use services (e.g., air conditioning, domestic hot water, electric vehicle charging) at the same or better quality but lower cost. It does this by applying automatic control to reshape a customer's demand profile continuously in ways that either are invisible to or minimally affect the customer, and by leveraging more-granular rate structures that monetize demand flexibility's capability to reduce costs for both customers and the grid.

III.S. "Duplex" means a multi-family dwelling that has two separate residential units within one standalone building with the two units sharing a common wall or ceiling/floor and each having its own entrance.

III.T. "ENERGY STAR" means the federal program authorized by 42 U.S.C. § 6294a (2007), as amended, to help customers, businesses, and industry save money and protect the environment through the adoption of energy-efficient products and practices.

III.U. "ENERGY STAR score" means the one-to-one-hundred numeric rating generated by the ENERGY STAR Portfolio Manager as a measurement of a building's energy efficiency.

III.V. "ENERGY STAR Portfolio Manager" means the resource management tool that enables building owners to track and benchmark energy in a building, or across multiple buildings, through an online platform used to measure their performance.

III.W. "Energy-use intensity" (EUI) means a building's energy use, expressed as total site energy use per square foot per year.

III.X. "Financial hardship" means a property is experiencing at least one of the following conditions.

III.X.1. The property has been included on a city's, county's, or city and county's annual tax lien sale list within the previous two years.

III.X.2. The property is an asset subject to a court-appointed receiver that controls the asset due to financial stress.

III.X.3. The property is owned by a financial institution as a result of a default by a borrower.

III.X.4. The property has been acquired by a deed in lieu of foreclosure.

III.X.5. The property is the subject of a senior mortgage subject to a notice of default.

III.X.6. Due to the governor declaring a disaster emergency pursuant to §24-33.5-704 (4), C.R.S. (2022), the property, in at least two of the previous five years, generated annual rental income or revenue that totals sixty percent or less of the five-year average immediately preceding the disaster.

III.Y. "Greenhouse gas" (GHG) means carbon dioxide (CO2), methane (CH4), nitrous oxide (N2O), hydrofluorocarbons (HFCs), perfluorocarbons (PFCs), sulfur hexafluoride (SF6), and nitrogen trifluoride (NF3).

III.Z. "Gross floor area" (GFA) means the total building area, as measured from the outside surface of each exterior wall of the building, including above-grade and below-grade space.

III.AA. "High-efficiency electric equipment" means electrical equipment that is, for example, certified according to ENERGY STAR, or meets the minimum efficiency requirements of the current version of American Society of Heating, Refrigerating and Air-Conditioning Engineers' (ASHRAE) Standard 90.1, 2021 International Energy Conservation Code (IECC), the Federal Energy Management Program (FEMP) efficiency requirements, or newer requirements where applicable.

III.BB. "Industrial purpose" means a building or structure used for industrial operations including, but not limited to, factories, mills, shops, processing plants, assembly plants, fabricating plants, research or development facilities, operations by energy producers, electric generation unit, refineries, meat packing plants, dairies, steel mills, cement plants, mining operations, airline operations, wastewater treatment plants, landfills, and abandoned coal mines. The gross floor area of a building or structure used for industrial operations must include all space within the building(s) at the building or structure including production or industrial operation areas, offices, conference rooms, employee break rooms, storage areas, mechanical rooms, stairways, and elevator shafts to determine if the building or structure meets the covered building exemption Section III.O.2.

III.CC. "Manufacturing purpose" means a building or structure that includes a main production area containing machinery and equipment used for producing products. The gross floor area of a building or structure used for producing products must include all space within the building(s) at the building or structure, including production areas, offices, conference rooms, employee break rooms, storage areas, mechanical rooms, stairways, and elevator shafts to determine if the building or structure meets the covered building exemption Section III.O.2. For purposes of the exemption in Section III.O.2., manufacturing purposes does not include marijuana cultivation facilities, as defined by Colorado's Marijuana Enforcement Division in 1 CCR 212-3 (2022).

III.DD. "Mixed use building" means a building that contains multiple property types where there is not one single use type that represents 50% or more of the building or property's gross floor area, including parking gross floor area.

III.EE. "Multifamily housing" means any property used or intended to be used as a residence and that contains four or more dwelling units. Multifamily housing includes a condominium or cooperative.

III.FF. "Parking" means buildings and lots used for parking vehicles. This includes open parking lots, partially enclosed parking structures, and completely enclosed (or underground) parking structures. Parking garages may be free standing or physically connected to the property.

III.GG. “Power purchase agreement” (PPA) means an agreement executed between a covered building owner and the owner of a renewable energy resource or renewable energy storage system where the energy or share of energy produced from the renewable energy resource or renewable energy storage system is dedicated to serving the covered building. For purposes of this rule, a utility cannot be the owner of the renewable energy resource or renewable energy storage system.

III.HH. “Power usage effectiveness” (PUE) means a measure of how much energy is consumed by the power supply and cooling systems in a Data Center relative to the amount of energy delivered directly to the IT equipment. PUE is equal to the total energy consumption of a Data Center (for all fuels) divided by the energy consumption used for the IT equipment.

III.II. “Property type” means the primary use of a building. Each property type will have a different set of property use details, which refer to the business activity at the property, such as weekly operating hours, number of workers, and number of computers. If a building or property has multiple uses, for purposes of benchmarking the property type is based on the use that accounts for more than 50% of a building’s or property’s gross floor area. As referenced in the definition of mixed use building in Part A, Section III.DD., if there is not one single use type that represents 50% or more of the building or property’s gross floor area, the property type will be classified as "mixed use."

III.JJ. “Public building” means a covered building owned by: the state; a local government; a district or special district regulated under title 32; a state institution of higher education; a private institution of higher education as defined in § 23-18-102 (9), C.R.S. (2022); a school district created pursuant to article 30 of title 22; and a charter school authorized pursuant to Part 1 of Article 30.5 of Title 22 of the C.R.S. (2022).

III.KK. “Qualifying utility” means an electric or gas utility with five thousand or more active commercial and industrial service connections, accounts, or customers in Colorado, including: an investor-owned electric or gas utility; a cooperative electric association; or a municipally owned electric or gas utility. Qualifying utility also means a natural gas supplier with five or more active commercial or industrial connections, accounts, or customers in Colorado.

III.LL. “Renewable energy credit” (REC) means a contractual right to the full set of non-energy attributes, including any and all credits, benefits, emissions reductions, offsets, and allowances, howsoever entitled, directly attributable to a specific amount of electric energy generated from a renewable energy resource. One REC results from one megawatt hour (MWh) of electric energy generated from a renewable energy resource.

III.MM. “Renewable energy” means useful electrical, thermal, or mechanical energy converted directly or indirectly from resources of continuous energy flow or that are perpetually replenished and whose utilization is sustainable indefinitely. The term includes, without limitation, sunlight, the wind, geothermal energy, hydrodynamic forces, and organic matter available on a renewable basis such as forest residues, agricultural crops and wastes, wood and wood wastes, animal wastes, livestock operation residue, aquatic plants, and municipal wastes.

III.NN. "Renewable energy resource" means solar, wind, geothermal, biomass that is greenhouse gas neutral, new hydroelectricity with a nameplate rating of ten megawatts or less, and hydroelectricity in existence on January 1, 2005, with a nameplate rating of thirty megawatts or less and that does not require the construction of any new dams or reservoirs. A biomass electric generation facility that was in existence on or before January 1, 2021, or that has a nameplate rating of ten megawatts or less, is a renewable energy resource.

III.OO. "Renewable energy storage system" means any commercially available system, including batteries and batteries paired with on-site generation, that is capable of retaining, storing, and delivering energy by chemical, thermal, mechanical, or other means.

III.PP. "Renovation" means the repair, remodeling, restoration, and preservation of a covered building and any associated fixtures or improvements.

III.QQ. "Retail distributed generation" means a renewable energy resource or renewable energy storage that is located on any property owned or leased by any customer within the service territory of the qualifying retail utility and is interconnected on the customer's side of the utility meter. Retail distributed generation must provide electric energy primarily to serve the applicable covered building's loads and must be sized to supply no more than two hundred percent of the reasonably expected average annual total consumption of electricity at all properties owned or leased by the customer within the utility's service territory. Retail distributed generation also includes retail distributed generation resources provided to a covered building owner through a power purchase agreement or a community solar garden subscription. Retail distributed generation does not include utility-owned renewable electric generation.

III.RR. "Single-family home" means a standalone residential building designed to be used as a single-dwelling unit with one owner and no shared walls with another residence.

III.SS. "Site energy-use intensity" or "Site EUI" means the annual amount of all the energy the building consumes on-site, regardless of the source. A building's site EUI is calculated by dividing the total energy consumed by the building in one year (measured in kBtu) by the total gross floor area of the building.

III.TT. "Source energy-use intensity" or "Source EUI" means EUI calculations that consider the total amount of energy required for the building, including the energy used to produce and transmit any energy that comes from offsite.

III.UU. "State institution of higher education" means an institution as defined in § 23-1-108(7)(g)(II), CRS, (2022) and the Auraria Higher Education Center, governed pursuant to Article 70 of Title 23 of C.R.S. (2022). State institution of higher education does not include biomedical research laboratories.

III.VV. "Triplex" means a multi-family dwelling that has three separate residential units within one standalone building with the units sharing one or two common walls or ceiling/floors and each having its own entrance.

III.WW. "Under-resourced building" means a building with limited access to resources, including revenues, funding, grants, or gifts that can help with building operations or to comply with the requirements of this rule, than other buildings within the same building type in the same utility service territory. Under-resourced buildings include, but are not limited to

III.WW.1. Buildings owned by organizations that qualify at tax exempt under Section 501(c) of the Internal Review Code.

III.WW.2. Affordable housing.

III.WW.3. Buildings that are owned by an organization that provides human services that are regulated by the Colorado Department of Human Services, if those services are also provided in the building.

III.WW.4. Restricted income providers.

III.XX. "Unoccupied" means a building without occupants or tenants other than security, maintenance staff, or construction workers during a construction or renovation project.

III.YY. "Weather-normalized" means a method for modifying the measured building energy use in a specific weather year to energy use under normal weather conditions.

IV. Annual fee

IV.A. Except as provided in Section IV.B., covered building owners must pay an annual fee, by June 1 of every reporting year, to the CEO of $100 per covered building.

IV.B. Owners of public covered buildings are exempt from the payment of the annual fee.

V. Severability

If any section, clause, phrase, or standard contained in these regulations is for any reason held to be inoperative, unconstitutional, void, or invalid, the validity of the remaining portions thereof will not be affected and the Commission declares that it severally passed and adopted these provisions separately and apart.

PART B Benchmarking and Reporting Requirements

I. By June 1, 2024, and by June 1 of each year thereafter, covered building owners must report benchmarking data for the previous calendar year and additional information as specified below to the CEO on a CEO approved form. Owners of newly constructed buildings (i.e., buildings that were not built or occupied such that they had 2021 benchmarking data to submit by the initial reporting deadline of December 1, 2022) must start collecting benchmarking data once the owner has received a certificate of occupancy for the building and submit their first annual benchmarking data report the subsequent year (e.g., for a building with a certificate of occupancy starting March 1, 2023, submit by June 1, 2024, the building data from March 1, 2023, through December 31, 2023). Before submitting a benchmarking report, the covered building owner must run any automated data-checking function of the benchmarking tool and correct any errors discovered. The benchmarking data reported to the CEO must include the following.

I.A. Compliance pathway selection.

I.A.1. In the June 1, 2024, report, covered building owners, except for owners of public buildings subject to Section I.A.6., must specify which compliance pathway in Part C, Section I. the covered building owner will follow to reduce the building greenhouse gas emissions in order to achieve the 2026 targets. If a covered building owner does not specify their chosen compliance pathway, the covered building owner must reduce building greenhouse gas emissions in accordance with the energy efficiency pathway in Part C, Section I.A.1.

I.A.2. In the June 1, 2028, report, covered building owners, except for owners of public buildings subject to Section I.A.6., must specify which compliance pathway in Part C, Section I. the covered building owner will follow to reduce the building's greenhouse gas emissions in order to achieve the 2030 targets. If a covered building owner does not specify their chosen compliance pathway, the covered building owner must reduce building greenhouse gas emissions in accordance with the energy efficiency compliance pathway in Part C, Section I.A.1.

I.A.3. Covered building owners who specify the standard percent reduction compliance pathway in Part C, Sections I.A.3. or I.B.2. must submit each year of benchmarking data from 2021 up to the notification year (e.g., for a June 1, 2024, notification submit 2021-2023 data). New covered buildings for which a 2021 baseline does not exist must provide each year of benchmarking data starting with and following the year the owner receives a certificate of occupancy for the building up to the notification year.

I.A.4. Covered building owners, except for covered buildings described in Part C, Section I.D., who did not submit a compliance pathway selection in accordance with Sections I.A.1. or I.A.2. must comply by default with the energy efficiency compliance pathway in Part C, Section I.A.1. until a compliance pathway selection is submitted. Covered buildings described in Part C, Section I.D. must comply by default with a standard percent reduction compliance pathway.

I.A.5. Covered building owners who are assigned the energy efficiency compliance pathway in Part C, Section I.A.1. pursuant to Part B, Section I.A.4. may still select a percent reduction compliance pathway in either Part C, Sections I.A.3. or I.B.2. if the covered building owner submits their benchmarking data for each year from 2021 up to the current reporting year (e.g., for a June 1, 2024, report submit 2021-2023 data). New covered buildings for which a 2021 baseline does not exist must provide each year of benchmarking data starting with and following the year the owner receives a certificate of occupancy for the building.

I.A.6. Owners of public buildings

I.A.6.a. That become subject to performance standards under Part C between January 1, 2024, and December 31, 2026, must notify the CEO no later than sixty (60) days or in its next benchmarking report following completion of a construction or renovation project as described in Part A, Section II.B., whichever is sooner, of their chosen compliance pathway in Part C, Section I.

I.A.6.b. That become subject to performance standards under Part C on or after January 1, 2027, must notify the CEO in its next benchmarking report following completion of a construction or renovation project as described in Part A, Section II.B. of their chosen compliance pathway in Part C, Section I.

I.A.6.c. That specify the standard percent reduction compliance pathway in Part C, Sections I.A.3. or I.B.2. must submit each year of benchmarking data from 2021 up to the notification year (e.g., for a June 1, 2024, notification submit 2021-2023 data). Owners of public buildings for which a 2021 baseline does not exist must provide each year of benchmarking data starting with and following the year the owner receives a certificate of occupancy for the building up to the notification year.

I.A.6.d. That do not specify their chosen compliance pathway must comply by default with the energy efficiency compliance pathway in Part C, Section I.A.1. until a compliance pathway selection is submitted.

I.B. A physical description of the covered building and descriptions of its operational characteristics, including

I.B.1. The name of the covered building, if any.

I.B.2. The physical street address of the covered building, or, if no street address is assigned, then the latitude and longitude of the building or buildings.

I.B.3. The primary use(s) of the covered building.

I.B.4. The covered building's gross floor area.

I.B.5. The years in which the covered building has been certified by ENERGY STAR and the most recent date of certification, if applicable.

I.B.6. The data generated by the benchmarking tool for the covered building, including

I.B.6.a. The ENERGY STAR score, if applicable.

I.B.6.b. Monthly energy use by fuel type.

I.B.6.c. Annual electricity use by the covered building associated with the customer-owned retail distributed generation system or electricity purchased from retail distributed generation, if applicable, subject to the requirements of Part C, Sections I.B.1.b. or I.B.1.c.

I.B.6.d. Annual electricity produced by the customer-owned retail distribution generation system in kilowatt-hours (kWh) that is exported to the grid and not associated with the covered building's electricity use, if applicable.

I.B.6.e. Site energy-use intensity and source energy-use intensity.

I.B.6.f. Weather-normalized site energy-use intensity and source energy-use intensity.

I.B.6.g. Confirmation from the benchmarking tool that data quality has been checked and no errors were identified by the benchmarking tool.

I.B.6.h. Annual total electricity consumption, in kilowatt-hours (kWh), if applicable.

I.B.6.i. Annual total gas consumption, in British Thermal Units (Btu), if applicable.

I.B.6.j. Monthly peak electricity demand, if available for reporting through the benchmarking tool, if applicable.

I.B.7. Greenhouse gas emissions, including total, indirect, and direct emissions.

I.B.8. The name of the gas and/or electric utility provider(s) for the covered building.

I.B.9. The type and number of electric vehicle (EV) charging stations associated with the building and all relevant meter information.

I.B.10. Covered buildings that are marijuana cultivation facilities must report their property type as "manufacturing" in the benchmarking tool.

I.C. In addition to the data generated by the benchmarking tool, covered building owners must report to the CEO the following information, if applicable.

I.C.1. A change in property type for a covered building, if applicable, including the prior property type(s) and the new property type(s), as well as supporting documentation for the new property type(s) designation since the previous benchmarking report.

I.C.2. Any AIRS IDs associated with the covered building or covered buildings reported as a campus.

I.D. A demonstration of progress towards meeting the building performance standards in Part C. Such demonstration may include, but is not limited to, documentation of completed or planned energy efficiency measures or replacements of fossil fuel equipment with high-efficiency electric equipment, including dates completed and/or the timeframe for any planned measures or replacements, as well as results from the ENERGY STAR Portfolio Manager Building Emissions Calculator in a spreadsheet (.xlsx) file downloaded from the calculator.

I.E. Covered building owners who utilize their customer-owned retail distributed generation system or renewable energy resource as specified in Part C, Section I.B. must submit documentation of the ownership and retirement of their renewable energy credits to demonstrate compliance.

I.F. The following covered building owners may report benchmarking data at the campus-wide level.

I.F.1. The owner of multiple covered buildings that are part of a master metered group of buildings without sub-metering.

I.F.2. The owner of a correctional facility, local jail, or private-contract prison, as defined in 17-1-102, CRS (2022); 31-15-401(1)(j), CRS (2022); municipal jail, as authorized in 31-15401(1)(j), CRS (2022); or juvenile detention facility governed by Part 15 of Article 2.5 of Title 19 of Colorado Revised Statutes (2022).

I.F.3. The owner of a public building that is a covered building.

I.G. Covered building owners reporting benchmarking data at the campus-wide level must also submit documentation of the number of covered buildings that are part of the campus; the property type of each of the covered buildings; the meter information for each building; and the gross floor area, including parking, of each of the covered buildings.

I.H. Covered building owners must include in the 2027 through 2030 benchmarking data report a demonstration that the covered building met the 2026 site EUI, greenhouse gas emission reduction target, data center target, or building specific target as provided in Part C.

I.H.1. Building owners demonstrating compliance under Part C, Section I.A., must include the 2026, or subsequent year through 2029 (e.g., in the 2028 report include the data reflecting 2027) results from the ENERGY STAR Portfolio Manager, specifically the weather-normalized site EUI. In meeting the site EUI targets in Part C, Section I.A., individual building site EUIs must be normalized for weather and, if and when available in ENERGY STAR Portfolio Manager, normalized for occupancy.

I.H.2. Building owners demonstrating compliance under Part C, Section I.B., must include the 2026, or subsequent year through 2029 (e.g., in the 2028 report include the data reflecting 2027) results from the ENERGY STAR Portfolio Manager Building Emissions Calculator in a spreadsheet (.xlsx) file downloaded from the calculator. Building owners must also include, if applicable, documentation of the building's high-efficiency electric equipment, including, but not limited to, the equipment's ENERGY STAR certification, compliance with FEMP efficiency requirements, compliance with ASHRAE Standard 90.1 or IECC 2021, or newer requirements if applicable.

I.H.3. Building owners demonstrating compliance under Part C, Sections I.C. or I.D., must demonstrate that the covered building has met its applicable building specific target for 2026, or subsequent year through 2029 (e.g., in the 2028 report include the data reflecting 2027).

I.H.4. Building owners demonstrating compliance through an adjustment under Part C, Section II. must include the specific adjusted timeline or target as approved by the CEO and documentation demonstrating the building owner's progress on the submitted plan to achieve an adjusted timeline, if applicable.

I.I. Covered building owners must include in the 2031 benchmarking data report, and each year thereafter, a demonstration that the covered building met the 2030 site EUI, greenhouse gas emission reduction target, data center target, or building specific target as provided in Part C.

I.I.1. Building owners demonstrating compliance under Part C, Section I.A., must include the 2030, or subsequent year (e.g., in the 2032 report include the data reflecting 2031) results from the ENERGY STAR Portfolio Manager, specifically the weather normalized site EUI. In meeting the site EUI targets in Part C, Section I.A., individual building site EUIs must be normalized for weather and, if and when available in ENERGY STAR Portfolio Manager, normalized for occupancy.

I.I.2. Building owners demonstrating compliance under Part C, Section I.B., must include the 2030, or subsequent year (e.g., in the 2032 report include the data reflecting 2031) results from the ENERGY STAR Portfolio Manager Building Emissions Calculator in a spreadsheet (.xlsx) file downloaded from the calculator. Building owners must also include, if applicable, documentation of the building's high-efficiency electric equipment, including, but not limited to, the equipment's ENERGY STAR certification, compliance with FEMP efficiency requirements, compliance with ASHRAE Standard 90.1 or IECC 2021, or newer requirements if applicable.

I.I.3. Building owners demonstrating compliance under Part C, Sections I.C. or I.D., must demonstrate that the covered building has met its applicable building specific target for 2030, or subsequent year (e.g., in the 2032 report include the data reflecting 2031).

I.I.4. Building owners demonstrating compliance through an adjustment under Part C, Section II. must include the specific adjusted timeline or target as approved by the CEO and documentation demonstrating the building owner's progress on the submitted plan to achieve an adjusted timeline, if applicable.

II. Waivers, extensions, and exemptions

II.A. Waivers

II.A.1. A covered building owner may seek a waiver from the annual requirement to report benchmarking data in Part B, Section I. The waiver request must be submitted on a CEO approved form. To seek a waiver, the covered building owner must submit waiver documentation to and receive approval from the CEO. The covered building owner must submit a new waiver request for each year the owner is seeking a waiver. Covered building owners applying for a report waiver for the calendar year to be benchmarked must submit a waiver application to the CEO any time after June 1 of the calendar year to be benchmarked and on or before May 1 of the reporting year (e.g., for calendar year 2023 data, the waiver request must be submitted between June 1, 2023, and May 1, 2024). The CEO may approve an alternate timeline for submitting a waiver request on a case by case basis. A benchmarking waiver request must establish that the covered building has met one or more of the following conditions for the calendar year to be benchmarked.

II.A.1.a. The covered building was unoccupied for at least thirty consecutive days of the year.

II.A.1.b. A demolition permit was issued for the entire covered building. Submission of a copy of the demolition permit is required.

II.A.1.c. The covered building met one or more of the conditions for financial hardship.

II.A.1.d. The covered building does not meet a qualifying utility's aggregation threshold and one or more of the utility customers refused to provide the owner with permission to access the utility customer's relevant energy-use data. The covered building owner must provide proof to the CEO that it requested permission from the utility customer or utility customers withholding consent at least thirty days before the benchmarking report was due, and the owner must submit a plan to the CEO to include an energy-use data sharing permission provision in the next lease renewal for the building's tenants.

II.A.1.e. The covered building has four or more utility customers, is not located within a qualifying utility's service territory, and the owner is unable to obtain aggregated data from the utility that serves the covered building.

II.A.2. A covered building owner who is not listed in Part B, Section I.F., may seek a waiver from the annual requirements to report benchmarking data on a per building basis and request to instead submit benchmarking data as a campus if there is a compelling state or national security interest for the covered building owner to do so. The covered building owner must provide information to the CEO documenting why they are requesting to submit benchmarking data as a campus. The CEO may work with the covered building owner to permit the owner to submit benchmarking data in a format other than through the benchmarking tool in order to address state or national security interests related to data reporting.

II.B. Extensions

II.B.1. A covered building owner may request a time extension from the CEO to submit a benchmarking report if the owner submits documentation to the CEO demonstrating that, despite the owner's good-faith effort, the owner was unable to complete the benchmarking report for the calendar year to be benchmarked in a timely manner because of the failure or refusal of a qualifying utility or a utility customer to provide the necessary information or permission, as applicable.

II.B.2. Covered building owners that request a benchmarking report time extension must submit the extension application to the CEO by May 15 of the reporting year (e.g., by May 15, 2024, for calendar year 2023 data) on a CEO-approved form.

II.C. Exemptions

II.C.1. The owner of a building with a gross floor area of 50,000 square feet or more that is occupied by a single occupant or group of tenants may, in the interest of regulatory certainty, request from the CEO an affirmative exemption from the annual requirement to report benchmarking data in Part B, Section I. if their building does not meet the definition of a covered building in Part A, Section III.O.

II.C.1.a. Any exemption request must be submitted on a CEO approved form and include all required information to be considered.

II.C.1.b. Building owners may apply for an exemption that will be in place until June 1, 2026. After June 1, 2026, building owners that have been approved for an exemption must reapply.

II.C.1.c. After June 1, 2026, building owners applying for an exemption for the calendar year to be benchmarked must submit an exemption application to the CEO any time after June 1 of the calendar year to be benchmarked and on or before May 1 of the reporting year (e.g., for calendar year 2027 data, the exemption request must be submitted between June 1, 2027, and May 1, 2028). The CEO may approve an alternate timeline for submitting an exemption request on a case by case basis.

II.C.2. Owners of single-family homes, duplexes, or triplexes are not required to file an annual exemption request but must report their benchmarking data annually if the property type changes such that the building meets the definition of and applicability for a covered building.

II.D. If a covered building owner’s waiver or exemption request is denied by the CEO, the building owner may request the CEO executive director (or their designee) to review the

determination. The building owner must request the review within sixty (60) days of the initial denial and before the June 1 reporting deadline for the calendar year in which the waiver was applied for. The executive director (or their designee) will make a recommendation on the waiver or exemption request within ninety (90) days of the review request.

PART C Building Performance Standards and Compliance Pathways

I. Compliance pathways

Owners of covered buildings must reduce building greenhouse gas emissions through one of the following building performance standards compliance pathways. Owners of covered buildings must comply with the performance standard in the selected compliance pathway on an annual basis beginning in 2026. Owners of covered buildings must meet and maintain the 2026 standard for the calendar years 2026 through 2029 and the 2030 standard for calendar years 2030 through 2050, unless otherwise extended by subsequent rules of the Commission.

I.A. Energy efficiency

I.A.1. The covered building owner must reduce the energy consumption of the building through the implementation of energy efficiency measures and/or technologies to meet the applicable property type weather-normalized site EUI target in Table 1.

I.A.2. Building owners who received a waiver for the 2021 benchmarking requirement or building owners who did not submit benchmarking data will automatically be assigned a weather-normalized site EUI target based on the data submitted for the other buildings of the same property type.

I.A.3. Standard percent reduction

I.A.3.a. A covered building owner unable to achieve the site EUI target in Table 1 may comply by achieving and maintaining a standard percent reduction in their covered building's weather-normalized site EUI as compared to the covered building's 2021, or first reporting year, benchmarked baseline weather-normalized site EUI. Under this compliance pathway, the covered building must

I.A.3.a.(i) In 2026, achieve and maintain a standard percent reduction of 13% in comparison to the covered building's 2021 benchmarked baseline weather-normalized site EUI.

I.A.3.a.(ii) In 2030, achieve and maintain a standard percent reduction of 29% in comparison to the covered building's 2021 benchmarked baseline weather-normalized site EUI.

I.B. Greenhouse gas intensity reductions

I.B.1. A covered building owner unable to achieve the building performance standards in Part C, Section I.A. may demonstrate compliance through reduction of greenhouse gas emissions attributable to the building's energy use through energy efficiency or replacing fossil fuel equipment with high-efficiency electric equipment. A building owner unable to fully comply with the greenhouse gas compliance pathway target may use customer-owned retail distributed generation systems or retail distributed generation or utility subscription services in accordance with the requirements of Sections I.B.1.b. or I.B.1.c. or I.B.1.d., or may achieve greenhouse gas reductions through alternative measures approved by the CEO in accordance with Section I.B.1.e. In order to use customer-owned retail distributed generation systems or retail distributed generation, the covered building owner must demonstrate that the covered building owner has submitted an energy audit to the CEO and demonstrated that a building owner has exhausted cost-effective energy efficiency and electrification measures for the covered building. In using renewable energy generated by a customer-owned retail distributed generation system or retail distributed generation, a covered building owner.

I.B.1.a. Must demonstrate that the covered building has not met the applicable greenhouse gas emissions intensity target in Table 1 using the ENERGY STAR Portfolio Manager Building Emissions Calculator. A covered building owner must demonstrate this by doing the following

I.B.1.a.(i) Import or upload the data for the covered building from ENERGY STAR Portfolio Manager to the ENERGY STAR Portfolio Manager Building Emissions Calculator;

I.B.1.a.(ii) Apply the applicable Colorado locality-specified emission factor for grid-supplied electricity to the results to obtain total greenhouse gas emissions; and

I.B.1.a.(iii) Divide the covered building's total greenhouse gas emissions from the ENERGY STAR Portfolio Manager Building Emissions Calculator by the square footage of the building to determine the building's greenhouse gas intensity value for comparison to the targets in Table 1.

I.B.1.b. May use renewable energy demonstrated through retention of RECs from the covered building owner's customer-owned retail distributed generation system that represent no more than the amount of electricity consumed by the building on an annual basis for each compliance year in Table 1 to demonstrate compliance with the performance target.

I.B.1.c. The owner of a covered building who does not own the RECs from their customer-owned retail distributed generation system or from retail distributed generation where the interconnection request was filed with the utility company prior to December 31, 2023, may purchase RECs associated with other renewable energy resources located in Colorado to demonstrate compliance with Section I.B. if the following conditions are met.

I.B.1.c.(i) The covered building owner owns the RECs and retires them in the year generated;

I.B.1.c.(ii) The customer-owned retail distributed generation system or retail distributed generation is located in Colorado, either onsite or offsite of the covered building; and

I.B.1.c.(iii) The covered building owner submits to the CEO an energy audit for the building completed by an approved energy auditor as specified in Sections II.C.1. through II.C.4. The CEO may request that the covered building owner provide additional information demonstrating that the building owner has analyzed energy efficiency and electrification options, will employ those to the extent feasible, and renewable electric generation is the only way to make up any remaining gap to comply with the greenhouse gas intensity reduction target.

I.B.1.c.(iv) Once the covered building owner has submitted the energy audit and demonstrates that a building owner has exhausted cost-effective energy efficiency and electrification measures for the covered building, the building owner may use renewable energy that represents no more than the amount of electricity produced by the customer-owned retail distributed generation system or retail distributed generation and consumed by the covered building on an annual basis for each compliance year in Table 1.

I.B.1.d. Owners of under-resourced buildings may utilize utility subscription services as a compliance mechanism subject to the following limitations.

I.B.1.d.(i) The under-resourced building owner submits to the CEO an energy audit for the building completed by an approved energy auditor as specified in Part B. Sections II.C.1. through II.C.5. The CEO may request that the building owner provide additional information demonstrating that the building owner has analyzed energy efficiency and electrification options, will employ those to the extent feasible, and renewable electric generation is the only way to make up any remaining gap to comply with the GHG intensity reduction target.

I.B.1.d.(ii) Once the under-resourced building owner has submitted the energy audit and demonstrates that the under-resourced building owner has exhausted cost-effective energy efficiency and electrification measures for the covered building, the under-resourced building owner may use may use renewable energy demonstrated through retention of RECs associated with subscription services for no more than the amount needed to achieve compliance for under this section after the results and recommendations of the energy audit for the building are taken into account.

I.B.1.d.(iii) Any renewable energy resources and associated RECs retired for purposes of demonstrating compliance with this section and utilized as part of a utility subscription service are not also used for any other utility emission reduction requirement, including but not limited to Clean Energy Plan compliance.

I.B.1.e. The owner of a covered building may use alternative measures, including utility-offered programs, not identified in this subsection to demonstrate compliance with Section I.B. if the owner obtains written approval from the CEO. The owner of a covered building shall submit an application to the CEO at least six months prior to implementation of the measure. The measure can be used for compliance only if the following conditions are met.

I.B.1.e.(i) The measure achieves reduction of greenhouse gas emission in Colorado.

I.B.1.e.(ii) The greenhouse gas emission reductions are not the result of decarbonization of the electrical or natural gas utility grids.

I.B.1.e.(iii) The CEO, in consultation with the Division, approves the calculation methodology to quantify the greenhouse gas emission reductions.

I.B.2. Standard percent reduction

I.B.2.a. A covered building owner unable to achieve the site GHG-intensity target in Table 1 may comply by achieving and maintaining a standard percent reduction in their covered building's greenhouse gas intensity as compared to the covered building's 2021, or first reporting year, benchmarked baseline greenhouse gas intensity by using the ENERGY STAR Portfolio Manager Building Emissions Calculator and applying the applicable Colorado-specific emission factor for electricity to both the baseline emissions calculation and the target year emissions calculation and converting the results to greenhouse gas intensity values in kg CO2e/SF to determine the percent reduction achieved. Under this compliance pathway, the covered building must

I.B.2.a.(i) In 2026, achieve and maintain a standard percent reduction of 13% in comparison to the covered building's 2021 benchmarked baseline that has been converted to a greenhouse gas intensity value.

I.B.2.a.(ii) In 2030, achieve and maintain a standard percent reduction of 29% in comparison to the covered building's 2021 benchmarked baseline that has been converted to a greenhouse gas intensity value.

I.B.2.a.(iii) Comply with the requirements of Sections I.B.1.b. or I.B.1.c., if applicable.

I.B.2.a.(iv) Demonstrate that the covered building has met the applicable standard percent reduction using the ENERGY STAR Portfolio Manager Building Emissions Calculator as specified in Sections I.B.1.a.(i) through I.B.1.a.(iii).

I.C. Upon a complete submission of the information described in Section I.C.3., the CEO will assign data centers a power usage effectiveness (PUE) target based on

I.C.1. The data center's total facility energy usage, including all data center hardware, power delivery components, cooling systems, and lighting systems;

I.C.2. Information technology (IT) equipment energy usage for the data center, including the energy used to power the storage and networking equipment and control equipment such as monitors and workstations; and

I.C.3. An energy audit of the data center conducted by a qualified energy auditor demonstrating feasible options to reduce the data center's PUE including, but not limited to, improving cooling systems, replacing inefficient hardware, using energy efficient lighting, optimizing redundant power supplies, using virtualization techniques (e.g., virtual servers), and installing battery storage instead of emergency generators for short term power outages.

I.C.3.a. The energy audit may be created using the U.S. Department of Energy's Audit Template Tool or a similar CEO-approved program equivalent to an ASHRAE Level 2 energy audit and must include a report describing the results and recommendations of the audit.

I.C.3.b. Energy auditors must have an in-depth knowledge of data center operations and energy efficiency measures and may be certified by the Association of Energy Engineers (AEE), ASHRAE, the Energy Management Association, the Building Performance Institute, or similar CEO-approved certifying entity.

I.C.3.c. Energy auditors must certify that the results of the energy audit are accurate and complete.

I.C.4. To request a building specific target, the owner of the covered building must submit the information in Section I.C.3. to the CEO on a CEO-approved form by December 31, 2025, for the 2026 target and December 31, 2029, for the 2030 target.

I.D. Mixed use buildings, marijuana cultivation facilities, and covered buildings with installed electric vehicle (EV) charging stations that are not able to be sub-metered will default to the standard percent reduction compliance pathway in Part C, Sections I.A.3. or I.B.2. If these buildings do not choose to comply with the standard percent reduction compliance pathway in Part C, Sections I.A.3. or I.B.2., they may request an individualized target.

I.D.1. Mixed use buildings will be assigned an individualized blended target based on building specific criteria including, but not limited to, the gross floor area for each property type for that building; total energy consumption; sub-metered energy consumption; and data center or server closet size, if applicable.

I.D.2. Covered buildings with installed electric vehicle (EV) charging stations that are not able to be sub-metered will be assigned an individualized target based on the energy usage of the covered building excluding the installed EV charging station(s) energy usage.

I.D.3. Marijuana cultivation facilities will be assigned a target based on the facility's total gross floor area and energy usage, including climate control, lighting, and irrigation systems.

I.D.4. To request an individualized target, the owner of the covered building must submit the following to the CEO on a CEO-approved form by December 31, 2025, for the 2026 target and December 31, 2029, for the 2030 target.

I.D.4.a. The covered building's 2021 and each subsequent year of benchmarking data. New covered buildings for which a 2021 baseline does not exist must provide the benchmarking data submitted for the first full calendar year of building data.

I.D.4.b. Mixed use buildings must submit documentation of the gross floor area for each property type for that building; total energy consumption; sub-metered energy consumption; data center or server closet size, if applicable; and other criteria listed on the CEO-approved form.

I.D.4.c. Covered buildings with EV charging stations that are not sub-metered must submit documentation of the specific energy usage of the EV charging stations.

I.D.4.d. Marijuana cultivation facilities must submit documentation of the facility's total gross floor area and energy usage, including climate control, lighting, and irrigation systems; and other criteria listed on the CEO-approved form.

I.E. Owners of covered buildings that seek to challenge an individualized target assigned by the CEO pursuant to Sections I.C. or I.D. must apply for a target adjustment pursuant to Sections II.B. and II.C. Data centers applying for a building specific target adjustment need not perform a second energy audit as required in Part C, Section II.C.

II. Compliance pathway adjustments

II.A. Adjusted Timeline

Covered building owners may request an adjustment to the timeline to achieve the 2026 and/or 2030 building performance standards pursuant to Part C, Section I. The request must be submitted on a CEO approved form. To apply for a timeline adjustment a covered building owner must

II.A.1. Submit an application to the CEO requesting an adjusted timeline, including

II.A.1.a. The specific adjusted timeline needed.

II.A.1.b. Documentation of the need for the adjusted timeline.

II.A.1.c. The covered building owner's plan to achieve the performance targets within the adjusted timeline.

II.A.1.d. An inventory of the natural gas equipment in the building including the age of the equipment and the energy savings associated with electrification of the equipment, if applicable.

II.A.1.e. Purchase orders for necessary equipment demonstrating purchase and delivery dates, and any additional documentation demonstrating supply chain delays specific to that equipment, if applicable.

II.A.1.f. Documentation demonstrating collaboration with the building's utility(ies) related to updating the electrical distribution infrastructure, if applicable.

II.A.2. Covered building owners applying for an adjusted timeline must submit their application to the CEO by December 31, 2025, for the 2026 target and by December 31, 2029, for the 2030 target.

II.A.3. Covered building owners that may apply for this type of adjustment include, but are not limited to

II.A.3.a. Affordable housing and under-resourced buildings.

II.A.3.a.(i) Owners of covered buildings that do not fall into one of the categories in the definition of under-resourced buildings in Part A, Section III.WW. may petition the CEO for status as an under-resourced building by submitting on a CEO-approved form a description of the building; an explanation of why the building should be considered under-resourced; and evidence that the building has less access to resources than other similarly situated buildings in the relevant utility service territory.

II.A.3.b. Buildings undergoing a major renovation that does not align with the target dates but that will achieve the site EUI or greenhouse gas target.

II.A.3.c. Building owners experiencing significant supply chain or workforce delays.

II.A.3.d. Building owners who can demonstrate a plan to replace building heating and cooling systems at end of life where the system end of life occurs after the compliance period.

II.A.3.e. Building owners experiencing financial hardship, as defined in Part A, Section III.X.

II.A.3.f. Inherent and unique characteristics of the physical building that prohibit them from reaching the timeline.

II.A.3.g. Buildings that require updates to the electrical distribution infrastructure that cannot be timely completed to meet the performance standard deadline.

II.A.3.h. Building owners that purchase a covered building within the 12 month period before a required building performance standard deadline. Building performance standard deadline is December 31, 2026, for the 2026 target and December 31, 2030, for the 2030 target.

II.B. Standard Performance Target Adjustments

Covered building owners who have selected the EUI or GHG compliance pathway may request a standard adjusted 2026 and/or 2030 performance target. The request must be submitted on a CEO approved form.

II.B.1. As part of the standard performance target adjustment, buildings with multiple property types will be assigned a standard blended target based on the percentage of gross floor area assigned to each property type for that building. The CEO will also consider other standard adjustments as suggested by EPA, Department of Energy, or other nationally recognized entities.

II.B.2. The request must be submitted on a CEO approved form. To apply for an adjusted target a covered building owner must submit

II.B.2.a. Each year of the benchmarking data from 2021 up to the request year (e.g., for a January 1, 2025, request submit 2021-2024 data). New covered buildings for which a 2021 baseline does not exist must provide each year of benchmarking data starting with and following the year the owner receives a certificate of occupancy for the building. The covered building must also submit a third-party data verification checklist for each year of benchmarking data.

II.B.2.b. A list of property types at the covered building and the associated square footage for each property type.

II.B.2.c. Third-party data verification.

II.B.3. The CEO may request other information from the covered building owner in order to generate a standard performance adjustment target.

II.C. Adjusted Performance Target for Under-Resourced Buildings

Owners of under-resourced buildings may request an adjusted 2026 and/or 2030 performance target. The request must be submitted on a CEO approved form. To apply for an adjusted target the owner of an under-resourced building must

II.C.1. Submit an application to the CEO requesting an adjusted target, including

II.C.1.a. Each year of the benchmarking data from 2021 up to the request year (e.g., for a January 1, 2025, request submit 2021-2024 data). New covered buildings for which a 2021 baseline does not exist must provide each year of benchmarking data starting with and following the year the owner receives a certificate of occupancy for the building. The covered building must also submit a third-party data verification checklist for each year of benchmarking data.

II.C.1.b. Narrative detailing the building characteristics (e.g., year of construction, state or federal historical status, etc.) or functional variations that qualify for an adjustment.

II.C.1.c. An inventory of the natural gas equipment in the building including the age of the equipment and the electrification feasibility of the equipment.

II.C.1.d. Documentation of operation and maintenance improvements including how the building owner will implement long-term payback measures in the building.

II.C.1.e. Documentation demonstrating collaboration with the building's utility or utilities to determine the feasibility of gas and electric beneficial electrification and/or gas or electric demand side management programs.

II.C.2. Covered building owners applying for an adjusted target must submit their application to the CEO by December 31, 2025, for the 2026 target and by December 31, 2029, for the 2030 target.

II.C.3. Covered building owners that may apply for this type of adjustment include, but are not limited to

II.C.3.a. Covered buildings with inherent and unique characteristics of the physical building that make the weather normalized site EUI target unachievable or cost prohibitive.

II.C.3.b. Affordable housing and under-resourced buildings.

II.C.3.b.(i) Owners of covered buildings that do not fall into one of the categories in the definition of under-resourced buildings in Part A, Section III.WW. may petition the CEO for status as an under-resourced building by submitting on a CEO-approved form a description of the building; an explanation of why the building should be considered under-resourced; and evidence that the building has less access to resources than other similarly situated buildings in the relevant utility service territory.

II.D. Owners of covered buildings applying for a compliance adjustment to a building's target or timeline pursuant to Part C, Section II.A. must also submit to the CEO an energy audit for the building completed by an approved energy auditor.

II.D.1. The building owner must submit an energy audit created using the U.S. Department of Energy's Audit Template Tool or similar CEO-approved program, equivalent to an ASHRAE Level 2 energy audit, and a report describing the results and recommendations of the audit.

II.D.2. The audit report must include the achievable weather-normalized site EUI for the building, based on the results and recommendations of the audit.

II.D.3. Energy auditors must be certified by the Association of Energy Engineers (AEE), ASHRAE, the Energy Management Association, the Building Performance Institute, or similar CEO-approved certifying entity.

II.D.4. Energy auditors must certify that the results of the energy audit are accurate and complete.

II.D.5. The energy audit may be in the form of a strategic energy management plan for covered buildings that are part of a campus.

II.E. In addition to target adjustment application materials submitted by an owner of a covered building, the CEO will also consider the appropriateness of a standard adjustment as suggested by EPA.

II.F. Owners of covered buildings that will demonstrate compliance with the building performance standards through a compliance pathway other than the selected compliance pathway, as specified pursuant to Part B, Section I.A., may request an adjustment from the CEO. The covered building owner must provide the materials required in Part B, Sections II.B. and II.C. and demonstrate that the building owner has achieved compliance through the other compliance pathway. The request must be submitted to the CEO on a CEO-approved form by January 31, 2027 (for the 2026 target) and January 31, 2031 (for the 2030 target).

II.G. If a covered building owner's adjustment request is denied by the CEO, the building owner may request the CEO executive director (or their designee) to review the determination. The building owner must request the review within ninety (90) days of the initial denial. The executive director (or their designee) will make a recommendation on the adjustment request within 120 days of the review request.

III. A covered building owner that fails to meet the building performance standards through one of the compliance pathways in Section I. in the timeframe(s) specified or under an approved adjustment pursuant to Section II. must meet the building performance standards as expeditiously as practicable.

III.A. Failure to timely comply with a performance standard under Part C will constitute a violation of these rules.

III.B. Until compliance is achieved, on the last day of every month after a covered building owner fails to meet the building performance standards by the date(s) specified in Section I., the building owner must either demonstrate compliance with the building performance standards or demonstrate progress towards meeting the building performance standards.

III.B.1. Initial reporting under Section III.A. must include documentation demonstrating the building owner's retrofit plan including an outline of proposed improvements, the timeframe in which improvements will be made, and how the improvements will result in the building reaching the applicable target of the chosen compliance pathway. The retrofit plan must include at least two contractor project cost estimates.

III.B.2. Subsequent monthly reports must include a description of any work completed under the retrofit plan and documentation that plan milestones have been met.

III.B.3. This demonstration must be provided to the CEO until the covered building owner demonstrates compliance with the building performance standards or until a new building performance standard becomes applicable, at which time the covered building owner must meet the new building performance standard.

III.C. Each month that a covered building owner fails to demonstrate compliance with the building performance standards or demonstrate progress towards meeting the building performance standards, as set forth in Section III.A., constitutes an independent violation and may subject the covered building owner to additional civil penalties under 25-7-122, C.R.S. (2022), beyond the penalties specified in Part E. and, in addition to civil penalties, a requirement to perform one or more projects to mitigate violations related to excess emissions of greenhouse gas emissions. Covered building owners in violation of this Section III. may also be subject to injunctive relief under § 25-7-121, C.R.S. (2022).

PART D Recordkeeping

I. Covered building owners must maintain the following records for a period of seven (7) years and make records available to the Division or CEO upon request.

I.A. ENERGY STAR Portfolio Manager account data in Part B, Section I.

I.B. Evidence of requests the covered building owner has made to obtain tenant energy use data from any separately metered spaces in Part B, Section II.

I.C. Any additional information pertaining to the building's energy data and space use entered into ENERGY STAR Portfolio Manager in Part B, Section I.

I.D. Demonstration of compliance with the chosen compliance pathway(s) in Part C, Section I. for a covered building, including results from the ENERGY STAR Portfolio Manager Building Emissions Calculator in spreadsheet (.xlsx) files downloaded from the calculator, if applicable.

I.E. Any waiver or adjustment submissions in regard to compliance or non-compliance in Part B, Section II. and Part C, Section II.

I.F. Records of any upgrades made to comply with the building performance standards requirements (e.g., receipts, invoices).

I.G. Any other information included in the building performance standards requirements.

II. Change of ownership

II.A. The owner of a covered building must disclose to a prospective buyer prior to the sale of the building the covered building's compliance status, including compliance with performance targets; any approved waivers, exemptions, extensions, or adjustments; and any penalties assessed.

II.B. The owner of a covered building must provide all records specified in Part D, Section I. to the new building owner upon closing.

PART E Penalties

I. Beginning January 1, 2024, a covered building owner who does not submit a benchmarking report in accordance with Part B, Section I. or meet the building sale or lease requirements in 25-7-142(6), C.R.S. (2022), is subject to a civil penalty of up to $500 for a first violation and up to $2,000 for each subsequent violation.

II. Beginning January 1, 2024, a covered building owner whose building fails to meet the building performance standards in Part C is subject to a civil penalty of up to $2,000 for a first violation and up to $5,000 for each subsequent violation.

III. Public building owners are not subject to civil penalties under this Part E or under 25-7-122.

PART F Statements of Basis, Specific Statutory Authority and Purpose

I. Adopted: August 17, 2023

This Statement of Basis, Specific Statutory Authority, and Purpose complies with the requirements of the Colorado Administrative Procedure Act § 24-4-103, the Colorado Air Pollution Prevention and Control Act §§ 25-7-110 and 25-7-110.5, and the Air Quality Control Commission's (Commission) Procedural Rules.

Basis

The Commission adopted a new Regulation Number 28, Building Benchmarking and Performance Standards, to satisfy the requirements the General Assembly in House Bill 21-1286 (Concerning Measures to Improve Energy Efficiency) (HB 21-1286), set forth in § 25-7-142, C.R.S., directing the Commission's adoption of building benchmarking and performance standards for covered buildings by September 1, 2023.

Specific Statutory Authority

The Colorado Air Pollution Prevention and Control Act § 25-7-142(7) authorizes the Commission to promulgate rules to implement the benchmarking program established in HB 21-1286. § 25-7-142(8)(c) directs the Commission to adopt rules to establish building performance standards on or before September 1, 2023, "that will achieve a reduction in greenhouse gas emissions of [7%] by 2026 as compared to 2021 levels" and "a reduction in greenhouse gas emissions of [20%] by 2030 as compared to 2021 levels," as set forth in § 25-7-142(8). § 25-7-105(1)(e) authorizes the Commission to promulgate implementing rules and regulations to abate greenhouse gas (GHG) emissions consistent with the statewide GHG pollution reduction goals in § 25-7-102(2)(g). In adopting GHG abatement strategies and implementing rules, the Commission is authorized to take into account other relevant laws and rules to enhance efficiency and cost-effectiveness and solicit input from other state agencies and stakeholders on the advantages of different statewide GHG pollution mitigation measures, see §§ 25-7-105(1)(e)(II) and (IV). Implementing rules may include regulatory strategies that incentivize development of renewable resources and "enhance cost-effectiveness, compliance flexibility, and transparency around compliance costs," see § 25-7-105(1)(e)(V). Further, in promulgating such implementing rules, the Commission is to consider many factors, including, but not limited to, health, environmental, and air quality benefits and costs; the relative contribution of each source or source category to statewide GHG pollution; equitable distribution of the benefits of compliance; issues related to the beneficial use of electricity to reduce GHG emissions; and whether greater or more cost-effective emission reductions are available through program design, see § 25-7-105(1)(e)(VI).

§ 25-7-109(1) authorizes the Commission to adopt and promulgate emission control regulations that require the use of effective practical air pollution controls for each type of facility, process, or activity which produces or might produce significant emissions of air pollutants. An "emission control regulation" may include "any regulation which by its terms is applicable to a specified type of facility, process, or activity for the purpose of controlling the extent, degree, or nature of pollution emitted from such type of facility, process, or activity. . . .", see § 25-7-103(11). Emission control regulations may pertain to any chemical compound including GHG pollution, see § 25-7-109(2)(c).

§§ 24-38.5-112(1) and 24-38.5-112(1)(a) require the Colorado Energy Office (CEO) to implement a building performance program and to use “county assessor records and other available sources of information” to administer the building performance program. § 24-38.5-112(1)(a)(I)-(IV) requires CEO to create a database of covered buildings and of owners required to comply with the building performance program; track compliance with the building performance program; maintain a list of noncompliant owners; and provide the Division a list of noncompliant owners for the Division's enforcement of the building performance program pursuant to § 25-7-122(1)(i). The building benchmarking and performance standards rule was collaboratively drafted by the Division and CEO before it was brought before the Commission. CEO is responsible for the implementation and continuation of the building benchmarking and performance standards requirements while the Division is responsible for enforcement of the rule.

Purpose

The Commission established building benchmarking and building performance standards (BPS) as one means to track and reduce greenhouse gas (GHG) emissions in the built environment from a 2021 baseline. Buildings constructed after 2021 that would be considered covered buildings under this regulation will also be required to meet the building benchmarking and performance standards. To demonstrate compliance with the BPS, the Commission adopted a flexible, compliance pathway based approach to reducing emissions through improvements in energy efficiency, high-efficiency electrification of space heating and cooling and water heating, or a combined approach that may also include the installation of customer-owned retail distributed generation systems. In adopting the BPS, the Commission considered the recommendations of the Building Energy Performance Task Force (BPS Task Force) convened by the Colorado Energy Office (CEO), as directed by HB 21-1286. Pursuant to § 25-7-142(8)(c)(II), the Commission is, by rule, adopting performance standards that meet the requisite GHG emission reductions.

Applicability

New Buildings

Buildings constructed after 2021 that would be considered covered buildings under this regulation will also be required to meet the building benchmarking and performance standards. Buildings constructed after 2021 must start collecting benchmarking data once the owner has received a certificate of occupancy for the building. A new building must comply with its applicable building performance target by the specified target date.

Public Buildings

Public buildings become subject to the building performance standards of this regulation only after undertaking a construction or renovation project that has an estimated cost of at least $500,000 and impacts at least twenty-five percent of the covered building’s square footage. A construction or renovation project that will trigger compliance with the building performance standards either (1) impacts a square footage of twenty-five percent or greater or (2) impacts an area of that size or greater through changes to heating and cooling systems, insulative measures, changes to the building envelope, or other such measures. For purposes of this rule, the “project” shall be the aggregation of any construction or renovation work on a public building that is part of the same bidding process, happens contemporaneously or sequentially within an eighteen month period, or that would otherwise be reasonably considered to be part of or substantially related to the same project.

Public buildings constructed after 2021 that would be considered covered buildings under this regulation will also be required to meet the building benchmarking and performance standards. Public buildings constructed after 2021 must start collecting benchmarking data once the owner has received a certificate of occupancy for the building. Public buildings constructed after 2021 must comply with the building performance standards requirements if the construction has an estimated cost of at least $500,000.

In situations where a public entity shares its building space with other non-public entities, the owner of the covered building, whether the public entity or not, is still required to report benchmarking data. In multi-owner situations, the party responsible for compliance will be the owner listed in the tax assessor's records for that building and must comply with building performance standards if the covered building has a shared, centralized heating and/or cooling system. If a public entity leases a covered building or a portion of a covered building, the building owner is responsible for compliance with the benchmarking and building performance standards. Whether the public entity may also have some responsibility related to compliance will depend on the lease arrangement between the public entity and the building owner, as with any other owner-tenant situation.

Condominiums and Townhomes

§ 25-7-142(2)(j)(II)(C) states that "a single-family home, duplex, or triplex" is not a covered building under the building benchmarking and performance standards. Properties such as townhomes and condominiums are similar to single-family homes, duplexes, or triplexes in that the condominium or townhome units within the envelope of a building are individually owned units and may have their own heating and cooling systems. However, condominium or townhome buildings differ from a single-family home in both the energy usage and, thus, the potential opportunity to reduce energy use and associated building greenhouse gas emissions when the condominiums or townhomes share a centralized heating and/or cooling system. Therefore, the Commission determined that condominiums or townhomes that share a building or together comprise a building, are covered under the building benchmarking and performance standards if they have shared centralized heating and cooling systems for water or air conditioning throughout the units of the building. The party responsible for compliance for covered buildings composed of condominiums or townhomes, or any covered building with split ownership, will be the owner listed in the tax assessor's records for that building whether it be a person, group, organization, or business. Where tax records do not clearly identify a single owner, the person holding themselves out to be the owner or responsible party may be identified through other means.

Federal Buildings

The Commission has determined that federal buildings are subject to and must comply with the Benchmarking and Reporting Requirements in Part B of this rule.

The Commission recognizes that there is currently a Federal Building Performance Standard that establishes 2030 and 2045 goals for reducing emissions from federal buildings. As long as the Federal Building Performance Standard is in effect, federal buildings that would be covered by the Colorado Building Performance should instead comply with the requirements of the Federal Performance Standard. However, the Commission reserves the right to regulate federal buildings in the event that the Federal Building Performance Standard is modified or eliminated."

Benchmarking

In Part B, the Commission adopted requirements for owners of covered buildings to submit energy-use benchmarking data. Using benchmarking data to create baseline energy usage allows building owners to track and measure their energy usage in relation to prior years and progress towards performance standard targets established in Part C.

Annual Reporting

§ 25-7-142(3) requires owners of covered buildings to annually submit, starting June 1, 2024, and by June 1 of each year thereafter, benchmarking data for the previous calendar year to CEO. Buildings constructed after 2021 will be required to submit benchmarking reports starting with the first full year of data after the building has started operating. This data must include all of the applicable building data required by the rule and data quality checks to ensure that the data is correct and accurate. Building owners must also include any change in building information in the annual reporting such as changes to property type or building ownership. Certain building owners may be allowed to benchmark their buildings as a campus if they meet the requirements for campus reporting in Part B. Covered building owners must include in the 2027 benchmarking data report a demonstration that the covered building met the 2026 building performance standard requirements as provided in Part C; the same applies to 2031 reporting with respect to the 2030 building performance standard requirements.

Currently, there is no option in the ENERGY STAR® Portfolio Manager for a building to select “marijuana cultivation facility” in the building type field when reporting benchmarking data. CEO has never exempted marijuana cultivation facilities from any reporting requirements. Denver has recently made changes to its program and directed marijuana cultivation facilities to select “manufacturing” in ENERGY STAR® Portfolio Manager when reporting benchmarking data. Consistent with Denver’s program, Regulation Number 28 specifies that marijuana cultivation facilities must report their property type as “manufacturing” in ENERGY STAR® Portfolio Manager and that marijuana cultivation facilities that are covered buildings will be assigned an individualized target for purposes of complying with the building performance standards should the facility owner choose not to comply with the standard percent reduction compliance pathway. To avoid confusion, the definition of “manufacturing purpose” explicitly excludes these facilities for the purpose of the exemption from the definition of “covered building” in Section III.O.2.

Waivers, Extensions, and Exemptions

§ 25-7-142(5) allows covered building owners to seek a waiver or time extension from the annual benchmarking requirement for a given year if the owner submits waiver documentation to, and receives approval from, CEO. Building owners eligible for the 2021 benchmarking waiver will automatically be assigned an energy-use intensity (EUI) target. A covered building owner may also request a benchmarking time extension from CEO if the owner submits documentation to CEO demonstrating that, despite the owner's good-faith efforts, the owner was unable to complete the benchmarking report for the relevant year. This allows the building owner more time to aggregate their building’s benchmarking data so they can submit at a later date. Covered building owners must submit a waiver application to CEO any time after June 1 of the calendar year to be benchmarked and on or before May 1 of the reporting year, unless CEO adopts an alternate timeline for submitting a waiver application.

The Commission also adopted provisions for building owners to seek an exemption from CEO if the building does not meet the definition in § 25-7-142(2)(j) of a covered building (i.e., storage facilities, stand-alone parking garages, or airplane hangars that lack heating and cooling; buildings with more than half of the gross floor area used for manufacturing, industrial, or agricultural purposes). The adoption of these exemption provisions recognize that building uses may change over time and that building owners may want documented clarity of whether or not the building is subject to the benchmarking requirements.

<u>Building Performance Standards (BPS)</u>

Building performance standards create energy performance targets, such as a specific level of energy usage or reduction for buildings to meet after a set amount of time. These standards help drive energy efficiency improvements and reduce energy use and resulting GHG emissions over the course of implementation.

BPS Task Force Recommendations

Pursuant to § 25-7-142(8)(a), CEO convened the BPS Task Force to develop recommendations for the Commission to consider when adopting rules for building performance. CEO timely delivered the BPS Task Force recommendations to the Governor's Office, General Assembly, and Colorado Department of Public Health and Environment by October 1, 2022, consistent with § 25-7-142(8). The recommendations made by the BPS Task Force, and included in the report, were approved by two-thirds of the BPS Task Force members. These recommendations are available on the Colorado Energy Office's (CEO) Building Performance Standards website under the Task Force Recommendations.

In developing the recommendations, the BPS Task Force was comprised of members with experience from a broad range of industries and building owners; examined building types of unique energy needs including aviation facilities, nursing homes, and hospitals; and considered how the performance standards and the greenhouse gas reductions would not include savings from statewide decarbonization of electricity or natural gas utility grids but include savings from utilities' or local governments' energy efficiency programs.

The BPS Task Force also made recommendations related to workforce availability and development related to building energy performance; financial and nonfinancial costs and benefits of upgraded building energy performance; availability of programs, technical assistance, and incentives to support building owners, utilities, and local governments; opportunities to improve commercial building energy use in Colorado; how regulations and agency support could help ensure building owners avoid fines through compliance with performance standards.

Rule Design and GHG Emissions Reductions

Enacting a building performance regulation to reduce GHG emissions ensures that large building owners participate in the reduction of emissions from the built environment. Building energy usage and GHG emissions are correlative, which allows for building performance standards to influence consumer decisions and therefore induce reductions of statewide building emissions. The Commission adopted building performance standards that will require covered buildings to implement measures that, taken together, are expected to achieve GHG emission reductions from this segment of covered buildings in the building sector of 7% by 2026 and 20% by 2030, as compared to 2021 levels. Based on benchmarking data reporting 2021 data in 2022, covered buildings subject to these rules were responsible for approximately 8,878,000 metric tons of carbon dioxide equivalent emissions resulting from the energy consumption of those buildings.

Pursuant to § 25-7-142(8)(c)(II), the Commission adopted performance standards to meet the requisite GHG emission reductions. In calculating the statewide GHG emission reductions anticipated to result from these regulations, the changes in emissions are not separate from those realized by the utilities as part of the statewide GHG inventory. This overlap in emissions impacts is recognized in § 25-7-142(8)(a)(IV), which directs that "[i]n calculating greenhouse gas reductions pursuant to § 25-7-42(8), the calculation must not include savings from statewide decarbonization of electricity or natural gas utility grids, but may include savings from utilities' or local governments' energy efficiency programs." Thus, while these rules are anticipated to drive GHG emission reductions to meet the targets, it is important to note that these reductions will not be independently reflected in the statewide GHG inventory but rather as one means of reducing emissions attributable to energy consumption by driving down demand and consumption of carbon-intense energy sources. It is also important to note that the greenhouse gas targets from § 25-7-142(8)(a)(II)(A) and § 25-7-142(8)(a)(II)(B) must be adjusted to account for the addition of future building stock. Factoring the increase of new building stock into the greenhouse gas emissions targets means that the initial targets would need to be increased from 7% by 2026 and 20% by 2030 to 9.6% by 2026 and 23% by 2030.

Accordingly, the compliance pathways provided for in Part C are designed to provide owners of covered buildings flexibility in compliance based on the unique characteristics of each individual building while also ensuring that overall compliance will accomplish the GHG emissions reduction targets in § 25-7-142(8)(a)(II)(A) and § 25-7-142(8)(a)(II)(B). The building performance standard requirements adopted by the Commission allow for different metrics to be measured against a 2021 baseline so that progress can be tracked and compared to the GHG emission reduction targets. Owners of covered buildings must meet and maintain compliance with the 2026 targets each year from 2026 through 2029 until the covered buildings must meet and maintain the 2030 targets. Owners of covered buildings must meet and maintain compliance with the 2030 targets each year from 2030 on until future targets are established for beyond 2030.

Compliance Pathways

In Part C, Sections I.A. and I.B., the Commission adopted two compliance pathways for covered building owners to comply with performance standards: energy efficiency and greenhouse gas reductions. Improving energy efficiency is the preferred compliance pathway. This compliance pathway requires building owners to implement energy efficient changes or upgrades to their buildings to reduce the building's EUI to meet the building's assigned weather normalized site EUI target. Improving site EUI reduces GHG emissions by reducing demand for gas and electric service and, therefore, reducing the emissions from the generation or consumption of that energy. In Part C, Table 1, the Commission established weather normalized site EUI by property type that covered buildings are to achieve by 2026 as an interim performance standard, pursuant to § 25-7-142(8)(a)(II). The 2026 weather normalized site EUI targets in Table 1 were determined to represent a 7% reduction in GHG emissions across covered buildings as compared to the baseline, after accounting for growth of new construction, established through the 2021 benchmarking data collected and analyzed by CEO. The 2030 weather normalized site EUI targets in Table 1 were determined to represent a 20% reduction in GHG emissions across covered buildings as compared to the baseline, after accounting for growth, established through the 2021 benchmarking data collected and analyzed by CEO.

In Part C, Section I.A.3., the Commission adopted a standard percent reduction compliance pathway option to the energy efficiency compliance pathway that allows covered buildings to meet and maintain fixed EUI reductions by the 2026 and 2030 compliance periods. Buildings complying with the energy efficiency standard percent reduction compliance pathway must reduce their EUI by 13% in 2026 and by 29% by 2030 from their 2021, or first reporting year, benchmarked baseline weather-normalized EUI.

For existing buildings that did not submit a 2021 benchmarking report, the building will be subject to the weather normalized EUI target for the property type as identified in tax records that was established as the average of the data submitted by the similar building types. In calculating site EUI targets, where sufficient data for a particular building type was lacking in the 2021 benchmarking baseline, other national and local building energy data sets, such as ENERGY STAR and the Commercial Buildings Energy Consumption Survey (CBECS), were used to determine the EUI target for that property type. Under this compliance pathway, buildings constructed after 2021 must also comply with their property type EUI target. If a new building is unable to provide benchmarking data, the building will be assigned a EUI target for the property type as identified in tax records based on similar property types that benchmarked their data or from the Commercial Buildings Energy Consumption Survey (CBECS).

The demonstration of compliance with the energy efficiency compliance pathway will be completed through the ENERGY STAR® Portfolio Manager tool that will provide a building owner with a covered building's weather-normalized site EUI.

Under Part C, Section I.B., a covered building unable to achieve the required GHG emission reductions through the compliance pathway of energy efficiency may achieve the required GHG emission reductions and demonstrate compliance individually or through a combination of energy efficiency, electrification, and/or the use of customer-owned retail distributed generation systems to offset grid-based electricity. Electrification requires covered building owners to replace or avoid fossil fuel-based space heating, water heating, or cooking equipment by using high efficiency electric equipment. High efficiency electric equipment means using electrical equipment with less required energy to perform the same function by eliminating energy waste. For example, high-efficiency electric equipment may be certified according to ENERGY STAR, meet Federal Energy Management Program (FEMP) efficiency requirements, meet the current version of American Society of Heating, Refrigerating and Air-Conditioning Engineers' (ASHRAE) Standard 90.1 or IECC 2021 International Energy Conservation Code (IECC), or meet newer such requirements. Electrification also reduces emissions by shifting fossil fuel-based building end-uses to the electrical grid, which is a lower-emitting energy supply source that will achieve deeper emissions reduction as the grid is progressively supplied by greater amounts of renewable energy. The Commission encourages the building owner to coordinate and communicate with their utility provider if the building is planning on implementing full or significant electrification of the building.

In Part C, Section I.B.2., the Commission adopted a standard percent reduction compliance pathway option to the GHG intensity reduction compliance pathway that allows covered buildings to meet and maintain fixed GHG intensity reductions by the 2026 and 2030 compliance periods. Buildings complying with the GHG intensity standard percent reduction compliance pathway must reduce their GHG intensity by 13% in 2026 and by 29% by 2030 from their 2021, or first reporting year, benchmarked baseline that has been converted to a GHG intensity value. Building owner's choosing to use the GHG intensity standard percent reduction compliance pathway will calculate their building's baseline year emissions and their 2026 and/or 2030 emissions using the ENERGY STAR® Portfolio Manager's Building Emissions Calculator and apply a Colorado-specific emission factor for electricity use in the calculator for the baseline year and years 2023 to 2026 and a separate Colorado-specific emission factor for the baseline year and years 2027 and beyond, and compare the difference between the baseline year calculation and the target year calculation to determine the percent reduction. Both of these emission factors reflect the statewide decarbonization of the electricity utility grid and ensures that the building's 2021 baseline and 2026 and/or 2030 reductions reflect the same status in grid decarbonization.

Customer-owned retail distributed generation allows a building to develop renewable resources to reduce use of grid-based energy and therefore reduce some portion of the building's emissions; however, the use of renewable resources may only be used as a compliance mechanism after the covered building owner has exhausted other options. A covered building owner using distributed generation must demonstrate ownership or long-term control of the resource for covered building owners that choose the GHG intensity compliance pathway. The following forms of retail distributed generation recognized under 40-2-124(1)(a)(VIII) are eligible for compliance after demonstrating in an energy audit that a building owner has maximized the economic use of energy efficiency and electrification and exhausted cost-effective compliance measures for the covered building.

- On-site renewable energy.
- Off-site renewable energy that is located on non-contiguous property owned or leased by the covered building owner consistent with the off-site net metering program authorized by 40-2-124(1)(e)(I)(C).
- A community solar garden subscription consistent with 40-2-127(2), so long as the covered building owner has a subscription term of at least five years. A covered building owner must maintain the subscription in order to maintain compliance.

- On-site aggregated net metering distributed generation installations recognized under 40-2-124(1)(j), including master metered net metering installations and individually metered multi-unit net metering installations.

Customer-owned retail distributed generation systems, retail distributed generation, and energy procured through a power purchase agreement may be counted toward compliance if the covered building owner retains the renewable energy credits (RECs) associated with the project, or if the RECs associated with the project are retired on the covered building owner's behalf for no more than the amount of electricity produced by the customer-owned retail distributed generation system or retail distributed generation, or procured through a power purchase agreement that is consumed by the building. Legacy projects where RECs were transferred to the utility as a term of the project to decrease upfront costs may also be used for compliance if the covered building owner procures and retires RECs from another renewable energy resource located within Colorado that do not exceed the amount of energy produced by the covered building owner's legacy system and consumed by the covered building.

The Commission recognized the need for additional flexibility for under-resourced buildings and allowed the owners of under-resourced buildings to use utility subscription services as a compliance measure after the owner has exhausted cost-effective energy efficiency and electrification measures as demonstrated in an energy audit. Under-resourced building owners are the only covered building owners that may use utility subscription services as a compliance measure within the GHG intensity compliance pathway in this regulatory program.

Other forms of renewable energy may be considered in the compliance pathway in consultation with CEO. For example, using wastewater thermal energy recovery systems may result in a reduced energy usage for the building that would be reflected in the building's benchmarking data and GHG emissions but not as a REC. Similarly, a demand response or demand flexibility program may be considered as a means to reduce a covered building's overall EUI, so long as there is adequate information to demonstrate the reduction in GHG emissions. The building benchmarking and performance standards overall goal is to lower a building's greenhouse gas emissions and other forms of renewable generation or recovery can allow a building to do that by reducing reliance on other forms of emissions-generating sources for a building even if the renewable generation or recovery is not directly accounted for in the benchmarking tool. CEO will work with the Division and stakeholders when considering other programs and emerging technologies that can be used to reduce the EUI and/or greenhouse gas emissions of buildings in the future.

In order to demonstrate compliance with the GHG emissions reduction compliance pathway, building owners must use the ENERGY STAR® Portfolio Manager's Building Emissions Calculator and report the results for a covered building from the calculator. The reporting must be accomplished by downloading the results from the calculator in a spreadsheet (.xlsx) file that is submitted to CEO. If utilizing electrification to demonstrate compliance through this compliance pathway, the applicable 2023 through 2026 or 2027 and beyond Colorado-specific emission factor for electricity must be used and will be specified in the calculator. The U.S. Environmental Protection Agency (EPA) operates both ENERGY STAR® Portfolio Manager and the Building Emissions Calculator, which are currently separate tools, but these tools are able to work together. However, EPA is planning to integrate the functionality of the Building Emissions Calculator directly into ENERGY STAR® Portfolio Manager at which point calculations of a covered building's GHG emissions for demonstrating compliance with the GHG emissions reduction compliance pathway may be completed using the calculator functionality in ENERGY STAR® Portfolio Manager and its associated reporting function.

In Part C, Table 1, the Commission established greenhouse gas emission targets by property type for this compliance pathway that covered buildings must achieve by 2026 and 2030, pursuant to § 25-7-142(8)(c)(II). The 2026 greenhouse gas emission targets in Table 1 were determined to represent a 7% reduction in GHG emissions as compared to the baseline, accounting for growth, established through the 2021 benchmarking data collected and analyzed by CEO. The 2030 greenhouse gas emission targets in Table 1 were determined to represent a 20% reduction in GHG emissions as compared to the baseline, accounting for growth, established through the 2021 benchmarking data collected and analyzed by CEO.

In Part C, Sections I.C. and I.D., the Commission adopted processes for the establishment of individual targets for certain categories of covered buildings, specifically mixed use buildings as defined in Part A, Section III.DD., data centers, buildings with installed electric vehicle (EV) charging stations that are not able to be sub-metered, and marijuana cultivation facilities. At the time of rule adoption, the Commission did not have data available to establish property type targets for these buildings in Table 1 that would enable compliance with energy efficiency of greenhouse gas intensity reduction pathways. Mixed use buildings may identify a primary property type in ENERGY STAR® Portfolio Manager where one property type accounts for more than 50% of the building's gross floor area. However, due to the variety of potential energy needs of the different property types represented in the building, CEO will assign an individualized target to every mixed use building as defined in Part A, Section III.DD. that does not use the standard percent reduction compliance pathway. The individualized target will be based on the percentage of gross floor area assigned to each property type in the building and other factors detailed in Part C, Section I.D. CEO will use each building's ENERGY STAR® Portfolio Manager benchmarking report to track compliance with these individualized targets.

Data centers will be assigned a power usage effectiveness (PUE) target, due to the unique energy needs of such buildings. CEO will only assign stand-alone data centers a PUE target, as outlined in Part C, Section I.C. Mixed use buildings that include a data center will be assigned an individualized target pursuant to Part C, Section I.D. Buildings with EV charging stations that are not able to be sub-metered will be assigned a target representative of the building's energy use minus the EV charging station energy use. EPA is planning to add functionality to ENERGY STAR® Portfolio Manager for building owners to exclude the energy use of EV charging stations, which would allow both a recalculation of the building's 2021 baseline and future reporting to exclude EV charging station energy use via reporting rather than through the individualized target process. Electricity used for EV charging, regardless of whether it is sub-metered, is intended to be excluded from energy use by covered buildings under this program. Lastly, as discussed above, marijuana cultivation facilities will select the property type of manufacturing in ENERGY STAR® Portfolio Manager. However, because a manufacturing property type target may not be appropriate for such facilities, CEO will assign an individualized target at the facility owners' request for each marijuana cultivation facility based on the facility's gross floor area and energy usage. As with mixed use buildings, data centers, marijuana cultivation facilities, and covered buildings with EV charging are also not limited from complying the compliance pathways in Part C, Sections I.A. or I.B.

The BPS Task Force recommendations suggested consideration of the possibility of demand response/flexibility as an additional compliance pathway to help achieve the GHG emission reductions because the technologies shift the building's energy demand to non-peak times. Grid-interactive efficient buildings are energy efficient buildings that use smart technologies, batteries, and on-site distributed energy resources to provide demand flexibility while co-optimizing for energy cost, grid services, and occupant needs and preferences in a continuous and integrated way. At the time these rules were adopted, there was insufficient infrastructure and no standardized industry methodology for measuring a building's demand response/flexibility capabilities to support demand response/flexibility as a compliance pathway. However, the Commission recognizes the value in demand response/flexibility integration in buildings to better control building energy use and encourages the continued investigation into potentially crediting covered buildings for the use of these programs in the future.

Compliance Adjustments

Under Part C, Section II., when a covered building cannot achieve compliance with the building performance standards through the compliance pathways, the Commission adopted a process by which the covered building owner may request timeline and/or performance target adjustments. Section II. provides examples of circumstances under which a covered building owner may apply for a compliance adjustment. The following provides some demonstrative context for those requirements.

- "Cost prohibitive" refers to the steps that a building owner would need to take to demonstrate the cost of compliance is higher than the benefit.

  If the equipment has a resale/salvage value, the cost of that equipment is the upfront cost minus the salvage value. If the buyer has obtained incentives (utility, local, state, or federal) for buying the equipment, then the cost of the equipment is further reduced by the amount of the incentive received. The cost of installing the equipment and the cost of its upkeep during its useful life are then added to that cost figure to determine the overall cost of the equipment.

  The benefits of installing the equipment include reduced energy use and reduced emissions. The dollar amount of that energy savings is determined by multiplying the amount of energy saved by the price of energy of the applicable fuel as forecasted by the U.S. Energy Information Administration for the target year of compliance plus anticipated demand response savings.

  The social cost of greenhouse gases are the most recent assessment of the social cost for those greenhouse gases for which the federal government has determined the cost. However, it cannot be below the figure set in 2016 using a two and one-half percent discount rate as established by the federal interagency working group on the social cost of carbon. The dollar value of emission reduction is determined by multiplying the amount of emission reduction in metric ton of carbon dioxide equivalent by the social cost of greenhouse gases. The total benefit associated with installing equipment is, thus, determined by adding the dollar amounts of energy savings and of emission reduction using the social cost of greenhouse gases.

  Whereas some of the costs and benefits are obtained in the year the equipment is installed, the rest occur over the useful life span of that equipment. Because benefits/costs that occur in the future are not valued the same way as benefits/costs that occur in the year of investment, those figures have to be discounted so that their present value equivalents can be determined. If the equipment has a two-year useful life, any benefit/cost that is incurred in the second year is discounted using the following formula:

  $$\text{Present Value} = \frac{\text{Future Value}}{(1+r)^2}$$

  In calculating present value, "r" is the discount rate (e.g., when using a 2.5% discount rate, use 0.025) and "2" is used in this example because the benefit/cost is occurring in the second year. This calculation provides the second year's benefits/costs in the present year's terms. Adding the first year's value and the present value version of the benefit/cost that occurred in the second year provides the equipment's benefit/cost over its useful lifetime of 2 years. For benefits/costs that are incurred/obtained in the third, fourth, and other years in the equipment's useful life, use 3, and 4, and others as applicable. Applying this procedure to each benefit and cost item results in the total net present value of cost and benefits associated with that equipment. If the total present value of the benefit is higher than the present value of cost, then this equipment is not cost prohibitive. If the present value of the cost is higher than the present value of benefit, then the equipment is cost prohibitive.

- "Inherent and unique characteristics" refer to qualities specific to an individual building that limits the building from complying with the building performance standards (e.g., age, design, distinct features, physical characteristics). These traits are not generalized between building types, are unique to the applicable building, and must be approved by CEO before receiving a compliance adjustment.

- "Significant variations in operations from a standard building in that building type category" refers to a building that belongs to a certain building type category that may not have the same building function, design, or construction as other buildings in the same category.

- "Under-resourced building" refers to a building with less access to resources, including revenues, funding, grants, or gifts that can help with building operations or to comply with the requirements of this rule, than other buildings within the same building type in the same utility service territory.

In addition, a covered building utilizing a novel alternative emissions reduction technology, such as carbon capture, could qualify under the compliance adjustment provisions as its operations would have a significant variation from other buildings through use of such a technology. Part C, Section II. provides an avenue for consideration of other alternative reduction technologies such as carbon capture through the adjusted performance target provisions. Specifically, Section II.B.3.b. allows "covered buildings with significant variations in operations from a standard building in that building type category" to apply for an adjusted target.

Buildings seeking a compliance adjustment under Part C, Section II., must have an energy audit performed on the building to demonstrate why the building was unable to reach compliance. The energy audit must follow the requirements in the United States Department of Energy's Building Energy Audit Template, ASHRAE's standard 211-2018 or more current level 2 audit, or an energy audit of similar requirements approved by CEO. All energy audits submitted for compliance adjustments must be performed by an accredited third-party auditor. Examples of acceptable energy auditor certifications are Certified Energy Auditor (Association of Energy Engineers), Certified Energy Manager (Association of Energy Engineers), Building Energy Assessment Professional (ASHRAE), Energy Management Professional (Energy Management Association), Multifamily Building Analyst (Building Performance Institute), or other energy auditor accreditations or certification recognized or deemed equivalent by the United States Department of Energy. The EUI target adjustment request must also include an inventory of all existing air and water heating and cooling equipment and an inventory of all required equipment needed to meet the building's assigned EUI or emission target. In approving adjustments, CEO may consider standard target adjustments based on the Environmental Protection Agency (EPA) suggested methods in addition to the other factors outlined in the target adjustment process in Part C, Sections II.B. and II.C.

Certain covered buildings in Denver receive steam from the Denver District Steam System for a variety of purposes, including space heating, use in steam radiators, and heating domestic hot water. At the time of this rulemaking, the Denver District Steam System was subject to a proceeding before the Colorado Public Utilities Commission (Proceeding Number 22A-0382ST) regarding the operations of the system through 2030 and consideration of alternate technologies to replace the system. Acknowledging this uncertainty and its potential impact on large capital investments, the Commission recognizes that covered buildings on the Denver District Steam System may qualify to apply for either a timeline or performance target adjustment. However, any such adjustment would need to be substantiated in accordance with Part C, Section II. and would be at the discretion of CEO.

Penalties

Pursuant to § 25-7-122(1), the Commission adopted civil penalty provisions related to a covered building owner's failure to comply with the benchmarking and building performance standards requirements. § 25-7-122(1) specifies values of $2,000 for a first violation of the performance standards and $5,000 for a second violation. In addition to these provisions, the Commission adopted additional reporting and compliance demonstration requirements for building owners that fail to comply with the building performance standards, clarifying that building owners must demonstrate progress until coming into compliance and that failure to do so may result in a finding of additional violations. The Commission expects that the potential for these additional penalty assessments will further incentivize covered building owner compliance.

Utility Data Reporting

§ 25-7-142(4) contains statutory requirements incumbent upon qualifying utilities concerning the collection and provision of energy-use data for its customers, including covered building owners and tenants. Both the definition of "qualifying utility" at § 25-7-142(2)(u) and the duties created under § 25-7-142(4) are explicit and clear. These provisions are enforceable as a provision of part 1 of the Act by the Commission and Division under § 25-7-115. Furthermore, qualifying utilities providing electric service are subject to extensive data gathering and provision requirements in the Colorado Public Utilities Commission's (PUC) Rules Regulating Electric Utilities at 4 CCR 723-3, Sections 3025 - 3035 concerning "Customer Data Access and Privacy." Under these PUC rules, customers may request the release of this information through the Consent to Disclose Utility Customer Data form. Given these preexisting statutory and regulatory duties governing this conduct, the Commission did not adopt any additional rules in this regard.

Sale and Lease of Covered Buildings

§ 25-7-142(6) contains statutory requirements dependent on the sale or lease of buildings covered under the building performance standards. If a covered building or a portion of a covered building is for sale or lease, the covered building owner must provide an electronic copy of the building's reported benchmarking data to all prospective buyers or lessees, any brokers as defined in § 12-10-201(6) C.R.S., any person making an inquiry about the property, or any major commercial real estate listing services on which the property is listed. The benchmarking data should be of the building's previous calendar year or from the most recent twelve-month period of continuous occupancy. If a covered building changes ownership, the former owner must make available to the new owner the energy-use data, utility customer consent documentation, and any other information about the property that is necessary to benchmark the covered building. The former owner must transfer to the new owner both the record representing the covered building's information in the benchmarking tool and the request to a qualified utility for aggregated data. The new owner may request and receive from a qualifying utility the aggregated data necessary to fulfill benchmarking reporting requirements. Given these preexisting statutory and regulatory duties governing this conduct, the Commission did not adopt any additional rules in this regard.

Future Year Standards

§ 25-7-142(8)(a)(II)(C) granted the BPS Task Force the opportunity to provide recommendations for "advising, soliciting public input on, and making recommendations to the commission on performance standards for 2030 to 2050" that will align with the State's 2050 GHG reduction targets. The Commission understands that CEO will continue to evaluate submitted benchmarking data as well as compliance demonstrations to evaluate implementation and performance under this regulation and encourages CEO to consider convening a new task force to evaluate potential future revisions to these standards as well as to evaluate additional building performance standards beyond 2030.

The CEO will report to the Commission on the implementation of Regulation Number 28 on a regular basis. The report may include information on benchmarking reporting statistics, benchmarking waivers

and exemptions, the number of requests for adjustments received and the number of adjustments granted, and other information regarding program implementation. The Division will also report to the Commission on the implementation of Regulation Number 28 on a regular basis to provide updates on progress towards meeting the 2026 and 2030 targets, penalties, and any other information regarding program implementation.

The Colorado Department of Public Health and Environment will undertake future rulemakings as needed after evaluating implementation of the rule and its effectiveness in achieving statutory greenhouse gas emission reduction targets, and make needed improvements, including in 2027 or early 2028 as informed by the compliance data for the 2026 targets.

Finally, the Commission recognizes that Regulation Number 28 is a new program and will apply to many entities that have not previously been subject to rules promulgated by the Commission. Throughout this rule, language has been developed to ensure that this rule provides reasonable flexibilities and is cost-effective for owners of covered buildings, including approving, where appropriate, adjustments to performance targets and timelines which may extend beyond 2030, while simultaneously ensuring that the state will meet the targets established in § 25-7- 142(8)(c).

Federal vs. State-Only Conditions (if applicable)

The revisions to Regulation Number 28 do not exceed or differ from the requirements of the federal act or rules, therefore, 25-7-110.5(5)(a) does not apply.

Findings of Fact

(I) These rules are based upon reasonably available, validated, reviewed, and sound scientific methodologies, and the Commission has considered all information submitted by interested parties.

(II) Evidence in the record supports the finding that the rules shall result in a demonstrable reduction of greenhouse gasses related to building performance.

(III) Evidence in the record supports the finding that the rules shall bring about reductions in risks to human health and the environment that justify the costs to implement and comply with the rules.

(IV) The rules are the most cost-effective to achieve the necessary and desired results, provide the regulated community flexibility, and achieve the necessary reduction in air pollution.

(V) The rule will maximize the air quality benefits of regulation in the most cost-effective manner.

5 CCR 1002-11

Rule title

5 CCR 1002-11 REGULATION NO. 11 - COLORADO PRIMARY DRINKING WATER REGULATIONS 1 - eff 10/15/2023

Effective date

10/15/2023

DEPARTMENT OF PUBLIC HEALTH AND ENVIRONMENT

Water Quality Control Commission

REGULATION NO. 11 - COLORADO PRIMARY DRINKING WATER REGULATIONS

5 CCR 1002-11

[Editor's Notes follow the text of the rules at the end of this CCR Document.]

11.1 AUTHORITY AND PURPOSE

11.1(1) Authority

The Water Quality Control Commission has promulgated the *Colorado Primary Drinking Water Regulations* pursuant to sections 24-4-104, 24-4-105, 25-1.5-101, 25-1.5 Part 2, 25-1-109, 25-1-114, 25-1-114.1, and 25-8-202, Colorado Revised Statutes.

******

11.17 LEAD AND COPPER RULE REVISIONS

11.17(1) Applicability and Definitions

(a) For all community and non-transient, non-community water systems, the supplier must comply with the requirements specified in this rule beginning October 16, 2024 unless otherwise specified.

(i) The requirements in this rule and the deadline by which the supplier must begin to comply are based on Subpart I of the National Primary Drinking Water Regulations, 40 CFR 141, as originally published in the Federal Register on January 15, 2021, 86 Fed. Reg. 4198 (Jan. 15, 2021), and made effective on December 16, 2021, 86 Fed. Reg. 71,574 (Dec. 17, 2021). In the event EPA stays or extends the provisions in 40 CFR 141, Subpart I through future rulemaking, the provisions in 11.17 which correspond to the requirements in 40 CFR 141, Subpart I, shall also be stayed or extended, in part or in whole, and the requirements of 11.26 shall remain in effect until the applicable compliance date of the new rules found at 40 CFR 141.

(b) Failure to comply with the applicable requirements of this section, 11.17, is a violation of the *Colorado Primary Drinking Water Regulations* unless otherwise determined by the Department.

(c) For the purposes of this rule, systems are categorized as follows:

(i) “SMALL SYSTEM” means a system that supplies less than or equal to (≤) 10,000 people.

(ii) “MEDIUM SYSTEM” means a system that supplies greater than (>) 10,000 and less than or equal to (≤) 50,000 people.

(iii) “LARGE SYSTEM” means a system that supplies greater than (>) 50,000 people.

(d) “ACTION LEVEL” means the concentration of lead and copper at which the supplier is required to comply with additional requirements, which may include public education, corrosion control treatment, source water treatment and/or lead service line replacement.

(e) "AERATOR" means the device embedded in the water faucet to enhance air ploy with the water stream and prevent splashing.

(f) "CHILD CARE FACILITY" means a location that houses a state-licensed provider of childcare, day care, or early learning services to children.

(g) "ELEMENTARY SCHOOL" means a school classified as elementary by the state that generally serves children in kindergarten through grade 5, but may include preschools and extend as far as grade 8.

(h) "FIFTH LITER SAMPLE" means a one-liter sample of tap water collected in accordance with 11.17(3).

(i) "FIND-AND-FIX" means the requirements that a supplier must perform at every tap sampling site that yielded a lead result above 0.015 mg/L.

(j) "FIRST-DRAW SAMPLE" means the first one-liter sample of water collected in accordance with 11.17(3).

(k) "FULL LEAD SERVICE LINE REPLACEMENT" means the replacement of a lead service line (as well as galvanized service lines requiring replacement) that results in the entire length of the service line, regardless of service line ownership, meeting the Safe Drinking Water Act (SDWA) Section 1417 definition of lead free applicable at the time of the replacement. A full lead service line replacement includes a replacement where only one portion of the service line is lead, such as where a partial lead service line was previously conducted, as long as, upon completion of the replacement, the entire service line meets the SDWA Section 1417 definition of lead-free applicable at the time of the replacement. Galvanized service lines that are or were downstream of a lead service line must also be replaced for a service line to be a full lead service line replacement. A lead service line that is left in place in the ground but remains out-of-service may be full lead service line replacement where a new non-lead service line is installed for use instead of the out-of-service lead service line.

(l) "GALVANIZED SERVICE LINE" means iron or steel piping that has been dipped in zinc to prevent corrosion and rusting.

(m) "GOOSENECK, PIGTAIL, OR CONNECTOR" means a short section of piping, typically not exceeding two feet, which can be bent and used for connections between rigid service piping. Lead goosenecks, pigtails, and connectors are not considered to be part of the lead service line but may be required to be replaced pursuant to 11.17(7).

(n) "LEAD SERVICE LINE" means a portion of pipe that is made of lead, which connects the water main to the building inlet. A lead service line may be owned by the supplier, owned by the property owner, or both. A galvanized service line is considered a lead service line if it ever was or is currently downstream of any lead service line or service line of unknown material. If the only lead piping serving the home or building is a lead gooseneck, pigtail, or connector, and it is not a galvanized service line that is considered a lead service line, the service line is not a lead service line. For purposes of 11.17(3)(a) only, a galvanized service line is not considered a lead service line.

(o) "LEAD STATUS UNKNOWN" means a service line that has not been demonstrated to meet or not meet the SDWA Section 1417 definition of lead free. It is not necessary to physically verify the material composition (for example, copper or plastic) of a service line for its lead status to be identified (e.g., records demonstrating the service line was installed after a municipal, State, or Federal lead ban).

(p) "LEAD TRIGGER LEVEL" means a particular concentration of lead in water that requires additional activities, including corrosion control treatment, and lead service line replacement. The trigger level for lead is a concentration of 0.010 mg/L.

(q) "METHOD DETECTION LIMIT (MDL)" means the minimum concentration of a substance that can be measured and reported with 99 percent confidence that the analyte concentration is greater than zero and is determined from analysis of a sample in a given matrix containing the analyte.

(r) "OPTIMAL CORROSION CONTROL TREATMENT" means the corrosion control treatment that minimizes the lead and copper concentrations at users' taps while ensuring that the treatment does not cause the supplier to violate any provision of the Colorado Primary Drinking Water Regulations.

(s) "PARTIAL LEAD SERVICE LINE REPLACEMENT" means replacement of any portion of a lead service line or galvanized service line requiring replacement that leaves in service any length of lead service line or galvanized service line requiring replacement upon completion of the work. Partial lead service line replacements are permitted under limited circumstances but do not count towards the mandatory or goal-based lead service line replacement rate.

(t) "PITCHER FILTER" means a non-plumbed water filtration device which consists of a gravity fed water filtration cartridge and a filtered drinking water reservoir that is certified by an American National Standards Institute accredited certifier to reduce lead in drinking water.

(u) "POINT-OF-USE TREATMENT DEVICE OR POINT OF USE DEVICE (POU)" means a water treatment device physically installed or connected to a single fixture, outlet, or tap to reduce or remove contaminants in drinking water that is certified by an American National Standards Institute accredited certifier to reduce lead in drinking water.

(v) "PRACTICAL QUANTITATION LIMIT (PQL)" means the minimum concentration of an analyte (substance) that can be measured with a high degree of confidence that the analyte is present at or above that concentration.

(w) "PRE-STAGNATION FLUSHING" means the opening of tap(s) to flush standing water from plumbing prior to the minimum six-hour stagnation period in anticipation of lead and copper tap sampling under 11.17(3). Pre-stagnation flushing is prohibited in sampling under 11.17(3).

(x) "SCHOOL" means any building(s) associated with public, private, or charter institutions registered with the Colorado Department of Education that primarily provides teaching and learning for elementary or secondary students.

(y) "SECONDARY SCHOOL" means a school defined by the state as a middle school (or junior high) or high school that generally serves children in grades 6 through 12.

(z) "SYSTEM WITHOUT CORROSION CONTROL TREATMENT" means a public water system that does not have, or purchases all of its water from a system that does not have, an optimal corrosion control treatment approved by the State; or any pH adjustment, alkalinity adjustment, and/or corrosion inhibitor addition resulting from other water quality adjustments as part of its treatment train infrastructure.

(aa) "TAP SAMPLING MONITORING PERIOD", for the purposes of this section, means the period of time during which each supplier must conduct tap sampling for lead and copper analysis. A tap sampling monitoring period is determined by lead and copper concentrations in tap samples and the frequency can range from every six months (i.e., semi-annual) up to once every nine years. The start of each new tap sampling monitoring period, with the exception of semi-annual monitoring, must begin on January 1.

(bb) "TAP SAMPLING PERIOD", for the purpose of this section, means the time period, within a tap sampling monitoring period, during which the supplier is required to collect samples for lead and copper analysis. For suppliers monitoring at a reduced frequency, the tap sampling period must be between the months of June and September, unless a different four-month period of time is approved in writing to be more appropriate by the Department.

(cc) "TAP SAMPLING PROTOCOL" means the instructions given to residents or those sampling on behalf of the water system to conduct tap sampling for lead and copper.

(dd) "WIDE-MOUTH BOTTLES" means bottles configured with a mouth that is at least 55 mm wide that are one liter in size.

11.17(2) Requirements for Lead Service Line Inventory

(a) Development of Lead Service Line Inventory

(i) The supplier must develop a lead service line inventory to identify the materials of all service lines connected to the distribution system regardless of ownership status (e.g., where service line ownership is shared, the inventory must include both the system-owned and customer-owned portion of the service line).

(ii) The lead service line inventory must meet all of the following requirements:

(A) The supplier must use any information on lead and galvanized iron or steel that the supplier has identified pursuant to 11.2(2) and review the following sources of information to identify service line materials for the initial inventory:

(I) All construction and plumbing codes, permits, and existing records or other documentation which indicates the service line materials used to connect structures to the distribution system.

(II) All system records, including distribution system maps and drawings, historical records on each service connection, meter installation records, historical capital improvement or master plans, and standard operating procedures.

(III) All inspections and records of the distribution system that indicate the material composition of the service connections that connect a structure to the distribution system.

(IV) Any resource, information, or identification method provided or required by the Department to assess service line materials.

(V) Other sources of information not listed in 11.17(2)(a)(ii)(A)(I-IV), if approved by the Department.

(B) Each service line, or portion of the service line where ownership is split, must be categorized in the following manner:

(I) "Lead" where the service line is made of lead.

(II) "Galvanized Requiring Replacement" where a galvanized service line is or was at any time downstream of a lead service line or is currently downstream of a "Lead Status Unknown" service line. If the supplier is unable to demonstrate that the galvanized service line was never

downstream of a lead service line, the supplier must presume there was an upstream lead service line.

(III) "Non-lead" where the service line is determined through an evidence-based record, method, or technique not to be lead or galvanized requiring replacement. The supplier may classify the actual material of the service line (i.e., plastic or copper) as an alternative to classifying it as "Non-lead."

(IV) "Lead Status Unknown" where the service line material is not known to be lead, galvanized requiring replacement, or a non-lead service line, such as where there is no documented evidence supporting material classification.

(C) The supplier must identify and track service line materials in the inventory as they are encountered in the course of its normal operations (e.g., checking service line materials when reading water meters or performing maintenance activities).

(D) The supplier must update the inventory based on all applicable sources described in 11.17(2)(a)(ii)(A)(I-V) and 11.17(2)(a)(ii)(C) and any lead service line replacements or service line material inspections that may have been conducted.

(I) The supplier may use other sources of information if approved by the Department and must use other sources of information provided or required by the Department to update the inventory.

(b) Public Availability of the Lead Service Line Inventory

(i) The supplier must make the lead service line inventory publicly accessible.

(A) The inventory must include a location identifier, such as a street address, block, intersection, or landmark, associated with each lead service line and galvanized requiring replacement service line. The supplier may list the exact address of each service line.

(B) If the system serves greater than (>) 50,000 people, the supplier must make the lead service line inventory publicly available online.

(C) When the system has no lead, galvanized requiring replacement, or lead status unknown service lines (regardless of ownership) in its inventory, the supplier may comply with the requirements as specified in 11.17(2)(b)(i)(A-B) using a written statement, in lieu of the inventory, stating that the distribution system has no lead service lines or galvanized requiring replacement service lines.

(I) The statement must include a general description of all applicable sources of information, identification methods, and resources described in 11.17(2)(a) used to make this determination.

(ii) The supplier must update its publicly accessible lead service line inventory no less frequently than when required to submit the updated inventory to the Department.

(iii) For community water systems, the supplier must include instructions on how to access the service line inventory, including inventories consisting only of a statement in accordance with 11.17(2)(b)(i)(C), in their Consumer Confidence Report as specified in 11.34.

(c) Consumer Notification of Service Line Materials

(i) The supplier must provide notification to all consumers supplied by a lead, galvanized requiring replacement, or lead status unknown service line. Notification is not required to be provided to consumers supplied by service lines that are all non-lead. The notification must contain all of the following:

(A) A statement indicating the material type of the consumer's service line, either lead, galvanized requiring replacement, or unknown material that may be lead.

(B) An explanation of the health effects of lead that meets the requirements of 11.17(8)(b)(i)(B).

(C) A list of steps the consumer can take to reduce exposure to lead in drinking water.

(D) For consumers with lead status unknown service lines, information about opportunities to verify the material of the service line.

(E) For consumers with lead and/or galvanized requiring replacement service lines, information about opportunities for replacement of the service line.

(F) For consumers with lead service lines, information on financing solutions to assist the property owner with replacement of their portion of the lead service line.

(G) For consumers with lead service lines where service line ownership is shared, a statement that the supplier is required to replace their portion of the lead service line when the property owner notifies them that they are replacing their portion of the lead service line.

(ii) The supplier must distribute the notification to consumers supplied by the system at the service connection with a lead, galvanized requiring replacement, or lead status unknown service line by mail or by another Department-approved method.

(A) The supplier must distribute the initial notification to consumers no later than 30 days after completion of the lead service line inventory.

(B) The supplier must continue to distribute the notification to affected consumers on an annual basis until the entire service line contains no portion that is lead, galvanized requiring replacement, or lead status unknown.

(C) For new customers, the supplier must also distribute the notification at the time of service initiation.

(d) Reporting Requirements for Lead Service Line Inventory and Notices

(i) The supplier must submit an initial lead service line inventory to the Department no later than October 16, 2024. The supplier must make the inventory publicly available at the time of submittal.

(A) For new systems and reclassified systems subject to this rule after October 16, 2024, the supplier must submit an initial lead service line inventory to the Department no later than 30 days after the end of the first lead and copper tap sampling monitoring period.

(ii) The supplier must submit an updated lead service line inventory no later than 30 days after each lead and copper tap sampling monitoring period, but no more frequently than annually.

(iii) If the supplier has demonstrated that it has no lead, galvanized requiring replacement, or lead status unknown service lines in its inventory, the supplier is no longer required to submit lead service line inventory updates as specified in 11.17(2)(d)(ii) to the Department.

(A) If the supplier subsequently discovers any lead or galvanized requirement replacement service lines in its distribution system, the supplier must notify the Department within 30 days of identifying the service line(s) and prepare an updated inventory in accordance with 11.17(2)(a) on a Department-specified schedule.

(iv) For systems with one or more lead, galvanized requiring replacement, or lead status unknown service lines, by no later than July 1 of each calendar year, the supplier must submit a sample copy of the service line material notification along with a certification that the notification was distributed, as specified in 11.17(2)(c), during the previous calendar year.

(e) Treatment Technique Violations and Response for Lead Service Line Inventory

(i) If the supplier fails to develop a lead service line inventory as specified in 11.17(2)(a)(i), a treatment technique violation occurs.

(ii) In the event of a lead service line inventory treatment technique violation, the supplier must:

(A) Notify the Department no later than 48 hours after the violation occurs; and

(B) Distribute Tier 2 public notice as specified in 11.33.

11.17(3) Requirements for Lead and Copper Tap Sampling

(a) Sample Site Selection for Lead and Copper Tap Samples

(i) The supplier must use the information on lead, copper, and galvanized iron or steel that is required to be identified under 11.2(2) when conducting a materials evaluation, and the information on lead service lines that is required to be collected under 11.17(2) to identify a sample pool of targeted sampling sites and categorize each sample site as specified in Table 11.17-I.

(A) For systems with lead, galvanized requiring replacement, or lead status unknown service lines in the lead service line inventory conducted under 11.17(2), the supplier must re-evaluate the tap sampling locations used in their sampling pool no later than October 16, 2024.

(B) Based on changes to the service line inventory conducted in 11.17(2), the supplier must re-evaluate the tap sampling locations used in their sample pool prior to each subsequent round of tap sampling conducted by the system, or annually, whichever is more frequent.

TABLE 11.17-I LEAD AND COPPER TAP SAMPLE TIER CATEGORIES

Tier category	For community water systems	For non-transient, non-community water systems
Tier 1	Single-family structures that are supplied by a lead service line.	Sites that are supplied by a lead service line.
Tier 2	Buildings, including multiple-family residences, that are supplied by a lead service line.	Not applicable.
Tier 3	Single-family structures that contain galvanized lines identified as being downstream of a lead service line (LSL) currently or in the past, or known to be downstream of a lead gooseneck, pigtail or connector.[1]	Sites that contain galvanized lines identified as being downstream of an LSL currently or in the past, or known to be downstream of a lead gooseneck, pigtail, or connector.[1]
Tier 4	Single-family structures that contain copper pipes with lead solder installed before the State's January 31, 1988 lead ban.	Not applicable.
Tier 5	Single-family structures or buildings, including multiple family residences, that are representative of sites throughout the distribution system.	Sites that are representative of sites throughout the distribution system.

1 Galvanized lines that are unknown to be downstream of a lead service line currently or in the past are "Galvanized Requiring Replacement" under the Lead Service Line Inventory section in 11.17(2) but do not qualify as Tier 3 sites

(ii) The supplier must complete a sampling pool with at least the number of sample sites specified in Table 11.17-II to ensure that the supplier can collect the number of lead and copper samples required in 11.17(3)(d).

TABLE 11.17-II LEAD AND COPPER SAMPLING POOL

Population Supplied	Minimum number of sites for sampling pool
Greater than (>) 100,000	100
10,001 to 100,000	60
3,301 to 10,000	40
501 to 3,300	20
101 to 500	10
Less than or equal to (≤) 100	5

(iii) The sampling sites for a community water system's sampling pool shall be completed as follows:

(A) The supplier's sampling pool must consist of Tier 1 sampling sites.

(I) When multiple-family residences comprise at least 20 percent of the structures supplied by the system, the supplier may include these types of structures in its Tier 1 sampling pool, if supplied by a lead service line.

(B) If the system has an insufficient number of Tier 1 sampling sites, the supplier must complete its sampling pool with Tier 2 sampling sites.

(C) If the system has an insufficient number of Tier 1 and Tier 2 sampling sites, the supplier must complete its sampling pool with Tier 3 sampling sites.

(D) If the system has an insufficient number of Tier 1, Tier 2, and Tier 3 sampling sites, the supplier must complete its sampling pool with Tier 4 sampling sites.

(E) If the system has an insufficient number of Tier 1, Tier 2, Tier 3, and Tier 4 sampling sites, the supplier must complete its sampling pool with Tier 5 sampling sites.

(I) The supplier must use single family or multiple family residential sites when there is a sufficient number of sites available. The supplier may use non-residential buildings that are representative of sites throughout the distribution system if and only if there are an insufficient number of single-family or multiple family residential Tier 5 sites available.

(F) The supplier must not use sites with lead status unknown service lines as Tier 1, Tier 2, Tier 3, or Tier 4 sampling sites.

(G) For systems with lead service lines, the supplier must collect all samples for monitoring under 11.17(3)(d) from sites supplied by a lead service line. If the supplier cannot identify a sufficient number of sampling sites supplied by a lead service line, the supplier must still collect samples from every site supplied by a lead service line and collect the remaining samples in accordance with the tiering requirements under 11.17(3)(a)(iii)(C-F).

(iv) The sampling sites for a non-transient, non-community water system's sampling pool shall be completed as follows:

(A) The supplier's sampling pool must consist of Tier 1 sampling sites.

(B) If the system has an insufficient number of Tier 1 sampling sites, the supplier must complete its sampling pool with Tier 3 sampling sites.

(C) If the system has an insufficient number of Tier 1 and Tier 3 sampling sites, the supplier must complete its sampling pool with Tier 5 sampling sites.

(D) The supplier must not use sites with lead status unknown service lines as Tier 1 or Tier 3 sampling sites.

(E) For systems with lead service lines, the supplier must collect all samples for monitoring under 11.17(3)(d) from sites supplied by a lead service line. If the supplier cannot identify a sufficient number of sampling sites supplied by a lead service line, the supplier must still collect samples from every site supplied by a lead service line and collect the remaining samples in accordance with the tiering requirements under 11.17(3)(a)(iv)(B-D).

(v) Sampling sites must not include sites with installed point-of-entry (POE) treatment devices and taps used at sampling sites may not have point-of-use (POU) devices designed to remove inorganic contaminants, unless one of the following conditions apply:

(A) The supplier is using the POE or POU devices and monitoring under 11.17(4)(i)(vi)(C).

(I) Lead and copper tap samples collected under 11.17(4)(i)(vi)(C)(VI) may not be used for the purposes of meeting the criteria for reduced monitoring specified in 11.17(3)(d)(v).

(B) The supplier is using POE or POU devices for the primary drinking water tap to meet other primary and secondary drinking water standards and all service connections have POE or POU devices to provide localized treatment for compliance with the other drinking water standards.

(b) Lead and Copper Action Levels and Trigger Level

(i) The lead trigger level and lead and copper action levels are as follows:

TABLE 11.17-III LEAD AND COPPER ACTION LEVELS AND LEAD TRIGGER LEVEL

Contaminant	Trigger Level (mg/L)	Action Level (mg/L)
Lead	0.010	0.015
Copper	N/A	1.3

(ii) The trigger level and action levels must be determined based on tap water samples collected in accordance with the tap sampling monitoring requirements of 11.17(3) for the purpose of calculating the 90th percentile and tested using the analytical methods specified in 11.46(9).

(iii) The trigger level and action levels as specified in 11.17(3)(b) are applicable to 11.17 where referenced.

(iv) The 90th percentile concentration shall be computed as follows:

(A) The results of lead or copper samples taken during a tap sampling period shall be placed in ascending order from the sample with the lowest concentration to the sample with the highest concentration. To determine the total number of samples for use in the 90th percentile calculation, the following conditions apply:

(I) For systems that do not have lead service line sites and only have sites identified as Tier 3, 4, or 5, the supplier must use all sample results.

(II) For systems with lead service lines with sites identified as Tier 1 or 2 with enough Tier 1 or 2 sites to meet the minimum number of sites specified in 11.17(3)(d), the supplier must use all sample results from only Tier 1 and 2 sites.

(III) For systems with lead service lines with sites identified as Tier 1 or 2 with an insufficient number of Tier 1 or 2 sites to meet the minimum number of sites specified in 11.17(3)(d), the supplier must use all sample results from Tier 1 and 2 sites and only the number of Tier 3, 4, or 5 sites with the highest concentration to meet the minimum number of sites specified in 11.17(3)(d).

(B) Each sampling result shall be assigned a number, ascending by single integers beginning with the number 1 for the sample with the lowest contaminant level. The number assigned to the sample with the highest contaminant level must be equal to the total number of samples as determined in 11.17(3)(b)(iv)(A).

(C) The total number of samples for use in the 90th percentile calculation as determined in 11.17(3)(b)(iv)(A) shall be multiplied by 0.9.

(D) The contaminant concentration in the numbered sample yielded by the calculation in 11.17(3)(b)(iv)(C) is the 90th percentile concentration.

(I) The 90th percentile concentration is calculated using an interpolation between the ranked contaminant concentrations when the total number of samples multiplied by 0.9 does not result in a whole number.

(E) If the supplier collects five samples per tap sampling period under 11.17(3)(d), the 90th percentile concentration is the average of the highest and second highest concentration.

(F) For a supplier that has failed to collect five samples, the sample result with the highest concentration is considered the 90th percentile value.

(c) Sample Collection Methods for Lead and Copper Tap Samples

(i) The supplier must collect lead and copper tap samples as follows:

(A) For sites without a lead service line, the supplier must collect a first-draw sample. The first-draw sample must be analyzed for lead and copper in tap sampling periods where both contaminants are required to be monitored.

(I) In tap sampling periods where only lead is required to be monitored, the first-draw sample may be analyzed for lead only.

(B) For sites with a lead service line, the supplier must collect a first-draw sample and a fifth-liter sample.

(I) The first-draw sample must be analyzed for copper in tap sampling periods where both contaminants are required to be monitored.

(II) The fifth-liter sample must be analyzed for lead.

(C) All samples collected under 11.17(3)(d) must be collected using wide-mouth bottles. Each sample collected must be one liter in volume.

(D) Samples from residential housing must be collected from the cold-water kitchen or bathroom sink tap.

(E) Samples from a nonresidential building must be collected at a tap from which water is typically drawn for consumption.

(F) For first-draw samples, the sample must be collected where water has stood motionless in the plumbing system of each sampling site for at least six hours without flushing the tap prior to sample collection (i.e., pre-stagnation flushing).

(G) For fifth-liter samples, the supplier must collect tap water in five consecutively numbered one-liter sample bottles with each subsequently numbered bottle being filled until the final bottle is filled with the water running constantly during sample collection. The fifth-liter sample is the final sample collected in this sequence.

(I) Unless the Department has allowed substitution for non-first-draw samples under 11.17(3)(c)(i)(I), the samples must be collected after the

water has stood motionless in the plumbing of each sampling site for at least six hours without flushing the tap prior to sample collection.

(H) The supplier may allow residents to collect first-draw or fifth-liter samples after instructing residents of the proper sampling procedures with the following conditions:

(I) The procedures may not include instructions for aerator removal and cleaning or flushing of taps prior to the start of the minimum six-hour stagnation period (i.e., pre-stagnation flushing).

(II) To avoid problems of residents handling nitric acid, acidification of first-draw samples may be done up to 14 days after the sample is collected. After acidification to resolubilize the metals, the sample must stand in the original container for the time specified in the approved EPA method before the sample can be analyzed.

(III) If a supplier allows residents to perform sampling, the supplier may not challenge, based on alleged errors in sample collection, the accuracy of sampling results.

(I) A non-transient, non-community water system, or a community water system that meets the criteria specified in 11.17(8)(c)(v)(A-B), that does not have enough taps that can supply first-draw samples or fifth-liter samples meeting the six-hour minimum stagnation time may apply to the Department in writing to substitute non-first-draw, first-draw, or fifth-liter samples that do not meet the six-hour minimum stagnation time.

(I) For a supplier collecting samples not meeting the six-hour stagnation time with Department approval, the supplier must collect as many first-draw or fifth-liter samples from interior taps typically used for consumption as possible and must identify sampling times and locations that would likely result in the longest standing time for the remaining sites.

(ii) The supplier must collect each first-draw tap and/or fifth-liter sample from the same sampling site from which it collected the previous sample in the prior tap sampling period.

(A) If, for reasons beyond the control of the system, the supplier cannot gain entry to a sampling site to collect a tap sample during a tap sampling period, the supplier must collect a tap sample from another sampling site in its sampling pool as long as the new site meets the same tier category, and is within reasonable proximity of the original site.

(d) Sampling Frequency for Lead and Copper Tap Samples

(i) The supplier must collect the following number of lead and copper tap samples per monitoring period:

(A) The supplier must collect at least one sample during each monitoring period from the number of sites listed in the first column (“standard monitoring”) of Table 11.17-IV unless the supplier meets the eligibility requirements for reduced monitoring as specified in 11.17(3)(d)(v).

(B) If the supplier is conducting reduced monitoring, the supplier must collect at least one sample from the number of sites specified in the second column ("reduced monitoring") of Table 11.17-IV.

(I) Reduced monitoring sites must be representative of the sites required for standard monitoring.

(C) If the distribution system has fewer than five taps that can be used for human consumption, the supplier must:

(I) Collect at least one sample from each tap; and

(II) Collect additional samples from those taps on different days during the monitoring period until the required number of samples have been collected.

TABLE 11.17-IV LEAD AND COPPER TAP SAMPLING SITES

Population supplied	Number of sites (standard monitoring)	Number of sites (reduced monitoring)
Greater than (>) 100,000	100	50
10,001 to 100,000	60	30
3,301 to 10,000	40	20
501 to 3,300	20	10
101 to 500	10	5
Less than or equal to (≤) 100	5	5

(ii) Standard monitoring. Standard monitoring is a six-month tap sampling monitoring period that begins on January 1 or July 1 of the year in which the supplier is monitoring at the standard number of sites in accordance with 11.17(3)(d)(i). Suppliers on standard monitoring must monitor as follows:

(A) For systems with lead service lines, including those deemed optimized under 11.17(4)(b), and suppliers that did not conduct monitoring that meets all requirements of 11.17(3)(a) and 11.17(3)(c) between January 15, 2021 and October 16, 2024, the supplier must begin the first standard monitoring period on January 1 or July 1 in the year following October 16, 2024, whichever is sooner.

(I) Upon completion of this monitoring, the supplier must monitor in accordance with 11.17(3)(d)(ii)(B).

(B) For suppliers that conducted monitoring that meets all requirements as specified in 11.17(3)(a) and 11.17(3)(c) between January 15, 2021 and October 16, 2024, and for suppliers that have completed monitoring under 11.17(3)(d)(ii)(A), the supplier must continue monitoring as follows:

(I) Suppliers that do not meet the criteria under 11.17(3)(d)(v) must conduct standard six-month monitoring.

(II) Suppliers that meet the criteria under 11.17(3)(d)(v) must continue to monitor in accordance with the criteria specified in 11.17(3)(d)(v).

(III) Suppliers monitoring at a reduced frequency in accordance with 11.17(3)(d)(v) that exceed an action level must resume standard six-month monitoring beginning January 1 of the calendar year following the tap sampling monitoring period in which the system exceeded the action level. The supplier must also monitor in accordance with 11.17(5), as applicable.

(IV) Suppliers monitoring at a reduced frequency in accordance with 11.17(3)(d)(v) that exceed the lead trigger level but meet the copper action level must not monitor any less frequently than annually and must collect samples from the standard number of sites in Table 11.17-IV. Monitoring must begin the calendar year following the tap sampling monitoring period in which the system exceeded the lead trigger level. The supplier must also monitor in accordance with 11.17(5), as applicable.

(V) Suppliers that fail to operate at or above the minimum value or within the range of values for the water quality parameters specified by the Department under 11.17(4) for more than nine days in any monitoring period specified in 11.17(5) must conduct standard six-month tap water monitoring and must resume sampling for water quality parameters in accordance with 11.17(5). This standard monitoring must begin no later than the six-month period beginning January 1 of the calendar year following the water quality parameter excursion.

(VI) For systems that become a large water system without corrosion control treatment or any large water system without corrosion control treatment whose lead 90th percentile exceeds the lead practical quantitation level of 0.005 mg/L, the supplier must conduct standard monitoring for at least two consecutive six-month tap sampling monitoring periods and then must continue monitoring in accordance with 11.17(3)(d)(ii)(B).

(iii) Monitoring after installation of initial or re-optimized corrosion control treatment, installation of source water treatment and addition of new source or change in treatment.

(A) For suppliers that install or re-optimize corrosion control treatment as a result of exceeding the lead or copper action level, the supplier must monitor for lead and copper every six months and comply with previously designated water quality parameter values, where applicable, until the Department specifies new water quality parameter values for optimal corrosion control.

(B) For suppliers that re-optimize corrosion control treatment as a result of exceeding the lead trigger level but not the lead or copper action levels, the supplier must monitor annually for lead at the standard number of sites listed in Table 11.17-IV. The supplier must monitor for copper once every three years at the reduced number of sites listed in Table 11.17-IV.

(I) Small and medium systems that do not exceed the lead trigger level in three annual monitoring periods may reduce lead monitoring in accordance with 11.17(3)(d)(v).

(C) Suppliers that install source water treatment pursuant to 11.17(6) must monitor for lead and copper every six months until the supplier is at or below lead and copper action levels for two consecutive six-month monitoring periods.

(I) Suppliers that do not exceed the lead or copper action level for two consecutive six-month monitoring periods may reduce monitoring in accordance with 11.17(3)(d)(v).

(D) If the supplier has notified the Department in writing of an upcoming addition of a new source or long-term change in treatment in accordance with 11.17(4)(j), the supplier must monitor for lead and copper every six months at the standard number of sites listed in Table 11.17-IV until the supplier is at or below the lead and copper action levels for two consecutive six-month monitoring periods.

(I) The Department may allow the supplier to sample at a reduced frequency if the addition of the new source or long-term treatment change do not have a significant impact to corrosivity.

(II) For suppliers that do not exceed the lead and copper action levels, and/or the lead trigger level for two consecutive six-month monitoring periods, the supplier may reduce monitoring in accordance with 11.17(3)(d)(v).

(iv) Monitoring after the Department specifies water quality parameter values for optimal corrosion control treatment.

(A) After the Department specifies the values for water quality parameters under 11.17(4)(c), the supplier must conduct standard six-month monitoring for two consecutive six-month tap sampling monitoring periods.

(I) The supplier may then reduce monitoring in accordance with 11.17(3)(d)(v), as applicable, following a Department determination that reduced monitoring is approved.

(B) Suppliers that are required to complete the re-optimization steps as specified in 11.17(4)(d) due to an exceedance of the lead trigger level that do not exceed the lead and copper action levels must monitor for two consecutive six-month tap sampling monitoring periods.

(I) The supplier may then reduce monitoring in accordance with 11.17(3)(d)(v), as applicable, following a Department determination that reduced monitoring is approved.

(v) Reduced monitoring based on 90th percentile levels. The Department may allow the supplier to collect lead and copper tap samples at a reduced frequency based on the supplier's 90th percentile lead and copper levels. Reduced monitoring refers to an annual or three-year tap sampling monitoring period.

(A) The supplier may reduce the monitoring frequency from six-month monitoring to annual monitoring and must sample at the standard number of sites for lead and the reduced number of sites for copper as specified in Table 11.17-IV, if the following conditions are met:

(I) The supplier meets the lead trigger level and the copper action level during two consecutive six-month tap sampling monitoring periods.

(II) For systems operating corrosion control treatment, the supplier must have maintained the range of optimal water quality parameters set by the Department in accordance with 11.17(4) for the same period and receive

a written determination from the Department approving annual monitoring based on the Department's review of monitoring, treatment, and other relevant information submitted by the supplier as required by 11.17(5); and

(III) Sampling must begin no later than the calendar year immediately following the last calendar year in which the supplier sampled.

(B) The supplier may reduce the monitoring frequency from six-month monitoring to annual monitoring and must sample at the standard number of sites for lead and copper as specified in Table 11.17-IV, if the following conditions are met:

(I) The supplier exceeds the lead trigger level but not the lead and copper action levels during two consecutive six-month tap sampling monitoring periods.

(II) For systems operating optimal corrosion control treatment, the supplier must have maintained the range of optimal water quality parameters set by the Department in accordance with 11.17(4) for the same period and receive a written determination from the Department approving annual monitoring based on the Department's review of monitoring, treatment, and other relevant information submitted by the supplier as required by 11.17(5); and

(III) Sampling must begin no later than the calendar year immediately following the last calendar year in which the supplier sampled.

(C) The supplier may reduce tap sampling for copper from annual to once every three years if the following conditions are met:

(I) The supplier exceeds the lead trigger level but not the lead and copper action levels during three consecutive years of monitoring.

(II) For systems operating optimal corrosion control treatment, the supplier must have maintained the range of optimal water quality parameters set by the Department in accordance with 11.17(4) for the same period and receive a written determination from the Department approving a three-year sampling frequency for copper based on the Department's review of monitoring, treatment, and other relevant information submitted by the supplier as required by 11.17(5).

(III) Lead sampling must remain on an annual frequency at a standard number of sites as specified in Table 11.17-IV; and

(IV) Sampling must begin no later than the third calendar year immediately following the last calendar year in which the supplier sampled.

(D) For small and medium systems, the supplier may reduce tap sampling for lead and copper from annual to once every three years at a reduced number of sites as specified in Table 11.17-IV if the following conditions are met:

(I) The supplier does not exceed the lead trigger level and the copper action level during three consecutive years of monitoring.

(a) Standard six-month monitoring prior to annual monitoring that is completed during both six-month periods of a calendar year is considered one year of monitoring.

(II) For systems operating optimal corrosion control treatment, the supplier must have maintained the range of optimal water quality parameters set by the Department in accordance with 11.17(4) for the same period and receive a written determination from the Department approving three-year monitoring based on the Department's review of monitoring, treatment, and other relevant information submitted by the supplier as required by 11.17(5); and

(III) Sampling must begin no later than the third calendar year immediately following the last calendar year in which the supplier sampled.

(E) The supplier may immediately reduce tap sampling for lead and copper from six-month monitoring to once every three years at a reduced number of sites in Table 11.17-IV if the following conditions are met:

(I) The 90th percentile in two consecutive six-month monitoring periods as calculated in 11.17(3)(b) is less than or equal to (≤) 0.005 mg/L for lead and less than or equal to (≤) 0.65 mg/L for copper; and

(II) For systems operating optimal corrosion control treatment, the system must maintain the range of values for the water quality parameters reflecting optimal corrosion control treatment specified by the Department under 11.17(4) for the same period and receive a written determination from the Department approving three-year monitoring based on the Department's review of monitoring, treatment, and other relevant information submitted by the supplier as required by 11.17(5).

(F) If the supplier is on a three-year sampling frequency, the supplier must collect samples no later than every third calendar year.

(vi) If the supplier is on a reduced sampling frequency:

(A) The supplier must collect samples from the sampling sites identified in 11.17(3)(a).

(B) The supplier must collect lead and copper tap samples during the monitoring period of June through September of the same calendar year.

(C) The Department may approve a monitoring period other than the months of June through September for collecting lead and copper tap samples under the following conditions:

(I) The supplier must collect lead and copper tap samples:

(a) During a monitoring period that is no longer than four consecutive months, within one calendar year; and

(b) During a period representing normal operation where the highest levels of lead are most likely to occur.

(II) For non-transient, non-community water systems that do not operate during the months of June to September and where the supplier does not know when, during the period of normal operation, the highest levels of lead are most likely to occur, the Department will determine a monitoring period that represents normal operation for the system. The supplier must begin sampling in the designated monitoring period:

(a) If the supplier is on annual sampling, in the calendar year immediately following the end of the second six-month monitoring period.

(b) If the supplier is on three-year sampling, during the three-year compliance period following the end of the third consecutive year of annual monitoring.

(III) For suppliers monitoring annually that have been collecting samples during the months of June through September and that receive Department approval to alter their tap sampling monitoring period under 11.17(3)(d)(vi)(C), the supplier must collect their next round of samples during a time period that ends no later than 21 months after the previous round of sampling.

(IV) For suppliers on a three-year sampling frequency that have been collecting samples during the month of June through September and receive Department approval to alter their sampling collection period under 11.17(3)(d)(vi)(C), the supplier must collect their next round of samples during a time period that ends no later than 45 months after the previous tap sampling period.

(a) Subsequent monitoring must be conducted annually or every third calendar year, as required by 11.17(3)(d)(v).

(V) For small systems, if the supplier is granted a waiver as specified in 11.17(3)(f), the supplier must collect lead and copper tap samples before the end of the nine-year compliance cycle.

TABLE 11.17-V MONITORING FREQUENCY BASED ON EVENTS

Monitoring frequency and number of sites	Situation or criteria
At least two six-month tap monitoring periods at standard number of sites	New community or non-transient, non-community water systems after October 16, 2024.
	Systems with lead service lines or galvanized requiring replacement service lines, or have made changes to their sample pool due to requirements in 11.17(3)(a) or sample collection in 11.17(3)(c) on or before October 16, 2024.
	Systems without corrosion control treatment that become a large system serving greater than 50,000 people.
	Large systems without corrosion control treatment whose lead 90th percentile exceeds 0.005 mg/L.
	Lead or copper action level exceedance.
	New source or long-term treatment change.

	Installation or re-optimization of Department-designated corrosion control treatment after lead trigger level or copper action level exceedance.
	Treatment technique violation for failure to maintain water quality parameters within Department-designated minimums and/or ranges for more than nine days within a monitoring period.
Reduced annual monitoring at standard number of sites for lead and reduced number of sites for copper	Systems with two consecutive six-month tap monitoring periods that do not exceed the lead trigger level and copper action level. Department approval may be needed in some situations.
Reduced three-year monitoring at reduced number of sites for lead and copper	Systems with two consecutive six-month tap monitoring periods less than or equal to 0.005 mg/L for lead and 0.65 mg/L for copper. Department approval is needed.
	Small or medium systems with three annual tap monitoring periods that do not exceed the lead trigger level and copper action level. Department approval is needed.
Reduced annual monitoring at standard number of sites for lead and reduced three-year monitoring at reduced number of sites for copper	Systems on reduced three-year monitoring that exceed the lead trigger level but not the lead and copper action levels.
	Systems with three annual tap monitoring periods that do not exceed the lead and copper action levels but have exceeded the lead trigger level.

*** Table is for illustrative purposes only. Please refer to 11.17(3) for specific requirements.

(e) Additional Lead and Copper Tap Samples

(i) The results of any monitoring conducted in addition to the minimum requirements of 11.17(3)(d) (such as customer-requested sampling) shall be considered by the supplier and the Department in making any determinations (i.e., calculating the 90th percentile lead or copper level) specified in 11.17.

(ii) If a supplier with lead service lines is unable to collect the minimum number of samples from Tier 1 or Tier 2 sites, the supplier must calculate the 90th percentile using data from all the lead service lines sites and the highest lead and copper values from lower tier sites to meet the specified minimum number of samples.

(A) The supplier must submit data from additional Tier 3, 4, or 5 sites to the Department but may not use these results in the 90th percentile calculation.

(iii) The supplier must include customer-requested samples from known lead service line sites in the 90th percentile calculation if the samples meet the requirements specified in 11.17(3).

(f) Tap Sampling Waiver Requirements for Systems Serving Less than or Equal to (≤) 3,300 People

(i) For systems serving less than or equal to (≤) 3,300 people, the supplier may apply to the Department for a lead and/or copper tap sampling waiver. The Department may grant a waiver if the supplier demonstrates that all of the materials criteria specified in 11.17(3)(f)(i)(B) and sampling criteria specified in 11.17(3)(f)(i)(C) have been met. The supplier may apply for a full waiver from sampling for both lead and copper, or a partial waiver from sampling for either lead or copper.

(A) By the start of the first applicable tap sampling monitoring period specified in 11.17(3)(d), the supplier must submit the required documentation to the Department to demonstrate that the supplier meets the waiver criteria as specified in 11.17(3)(f)(i)(B-C).

(B) The materials criteria for a waiver are as follows:

(I) The supplier must demonstrate that the distribution system, service lines, all drinking water supply plumbing, and plumbing conveying drinking water within all residences and buildings connected to the system are free of lead-containing materials and/or copper-containing materials.

(II) For a lead tap sampling waiver, the supplier must submit certification and supporting documentation that the system is free of all lead-containing materials. To be free of all lead-containing materials means the system meets both of the following criteria:

(a) The system contains no plastic pipes which contain lead plasticizers, or plastic service lines which contain lead plasticizers.

(b) The system contains no lead service lines, lead pipes, lead soldered pipe joints, and leaded brass or bronze alloy fittings and fixtures, unless such fittings and fixtures meet the specifications of any standard established pursuant to 42 United States Code (U.S.C.) 300g-6(e) (Plumbing fittings and fixtures) (Safe Drinking Water Act section 1417(e)).

(III) For a copper tap sampling waiver, the supplier must submit certification and supporting documentation that the system contains no copper pipes or copper service lines.

(C) The sampling criteria for a waiver are as follows:

(I) The supplier must have completed at least one six-month compliance period of tap sampling for lead and copper at Department-approved sites and at the number of sites specified in Table 11.17-IV.

(II) For all samples collected since the system became free of all lead-containing and/or copper-containing materials, the sample results must demonstrate that:

(a) The 90th percentile lead level is less than or equal to (≤) 0.005 mg/L; and/or

(b) The 90th percentile copper level is less than or equal to (≤) 0.65 mg/L.

(ii) The supplier must continue collecting lead and copper tap samples as specified in 11.17(3)(d) until the supplier receives written notification from the Department that the waiver has been approved.

(iii) The Department will notify the supplier in writing of the waiver determination and include the basis for the decision and any conditions of the waiver.

(A) As a condition of the waiver, the Department may require the supplier to perform specific activities (e.g., periodic outreach to customers to remind them to avoid installation of materials that might void the waiver) to avoid the risk of lead and copper levels of concern at the taps.

(iv) If the Department grants a full or partial waiver, the supplier must:

(A) Collect lead and/or copper tap samples for the waived contaminant(s) at least once every nine years at the reduced number of sample sites specified in Table 11.17-IV.

(I) The supplier must collect tap samples no later than every ninth calendar year.

(II) The supplier must collect tap samples during the months of June through September or during an alternative Department-approved monitoring period as specified in 11.17(3)(d)(vi)(C).

(III) If the supplier is granted a partial waiver, the supplier must collect tap samples for the non-waived contaminant as specified in 11.17(3)(d).

(B) Submit the applicable materials certification as specified in 11.17(3)(f)(i)(B)(II-III) each time the supplier submits sample results.

(C) Submit to the Department for approval of any upcoming long-term change in treatment or the addition of a new source as specified in 11.17(4)(j).

(I) The Department may require the supplier to add or modify waiver conditions (e.g., require recertification that the system is free of lead-containing and/or copper-containing materials or require additional round(s) of monitoring) if it determines that such additions and modifications are necessary to address treatment or source water changes at the system.

(D) Notify the Department, in writing, no later than 60 days after the supplier becomes aware that the system is no longer free of lead-containing or copper-containing materials (e.g., as a result of new construction or repairs).

(I) The supplier must include information regarding the circumstances that resulted in the lead-containing and/or copper-containing materials being introduced into the system.

(II) The supplier must specify what corrective action, if any, will be taken for the removal of these materials.

(v) If the supplier continues to comply with the materials and sampling criteria as specified in 11.17(3)(f)(i)(B-C), the waiver will be renewed automatically.

(A) No later than nine years after the previous round of sampling is completed, the supplier must submit documentation to demonstrate that the criteria specified in 11.17(3)(f)(i)(B-C) have been met.

(vi) If the supplier fails to meet the materials and sampling criteria as specified in 11.17(3)(f)(i)(B-C), the waiver will be revoked.

(A) The Department will notify the supplier in writing that the waiver has been revoked and the basis for the decision.

(B) If the waiver is revoked, the supplier must comply with the lead and copper tap sampling requirements specified in 11.17(3)(d).

(C) If the waiver is revoked and both the lead and copper action levels have been met, the supplier must collect lead and copper tap samples no less frequently than once every three years at the reduced number of sample sites specified in Table 11.17-IV.

(vii) The supplier may re-apply for a waiver when the materials and sampling criteria specified in 11.17(3)(f)(i)(B-C) have been met.

(g) Invalidation of Lead and Copper Tap Samples

(i) The Department may invalidate a lead or copper tap sample based on one or more of the following conditions:

(A) The laboratory determines that improper sample analysis caused erroneous results.

(B) The sample container was damaged in transit.

(C) There is substantial reason to believe that the sample was subject to tampering.

(D) The Department determines that the sample was collected from a site that did not meet the site selection criteria specified in 11.17(3)(a).

(ii) No later than the 10th of the month following the end of each monitoring period, the supplier must report all lead and copper tap sample results along with all supporting documentation for the sample(s) that the supplier is requesting the Department to invalidate.

(A) If the supplier allows residents to collect the lead and copper tap samples, the supplier may not challenge, based on alleged errors in sample collection, the accuracy of the sample results.

(iii) The Department shall document in writing whether the sample was invalidated and the rationale for the decision.

(A) The Department shall not invalidate a sample based solely on the grounds that another sample collected at the same site has a result that is higher or lower than the original sample.

(iv) If the Department invalidates a sample, the result does not count toward determining the lead or copper 90th percentile or toward meeting the minimum number of samples required as specified in 11.17(3)(d).

(v) If the Department invalidates a sample and there are too few samples remaining to meet the minimum sampling requirement, the supplier must collect replacement samples.

(A) The supplier must collect replacement samples as soon as possible but no later than 20 days after the date the Department invalidates the sample or by the end of the applicable monitoring period, whichever is later.

(I) If the supplier collects replacement samples after the end of the applicable monitoring period, the samples will only satisfy the sampling requirements of that monitoring period and must not be used to satisfy the sampling requirements of any other monitoring period.

(B) The supplier must collect replacement samples at the same site(s) as the invalidated sample(s) or, if that is not possible, at sites that were not being used for sampling during the applicable monitoring period.

(h) Consumer Notification of Lead Tap Sample Results

(i) The supplier must provide a notice of the individual tap results from lead tap water monitoring carried out under the requirements of 11.17(3) to the people supplied by the system at the specific sampling site from which the sample was taken (e.g., the occupants of the building where the tap was sampled).

(ii) The supplier must distribute the consumer notice as soon as possible but no later than the following timeframes:

(A) For individual samples that are less than or equal to (≤) 0.015 mg/L of lead, no later than 30 days after the supplier learns of the tap sample results.

(B) For individual samples that are greater than (>) 0.015 mg/L of lead, as soon as possible but no later than three calendar days after the supplier learns of the tap sample results.

(iii) The supplier must include all of the following information in the consumer notice:

(A) The lead tap sample result(s) for the tap that was tested.

(B) The action level, MCLG, and the definitions for these terms.

(C) An explanation of the health effects of lead.

(D) A list of steps that the consumer can take to reduce exposure to lead in their drinking water.

(E) System contact information.

(iv) The supplier must distribute the consumer notice in the following manner:

(A) For individual samples that are greater than (>) 0.015 mg/L of lead, the supplier must deliver the notice either electronically or by phone, hand delivery, mail, or another Department-approved method.

(I) If the supplier is mailing the notification, the supplier must ensure the letters containing the consumer notice are postmarked within three days after the supplier learns of the tap sample result.

(B) For individual samples that are less than or equal to (≤) 0.015 mg/L, the supplier must deliver the notice by mail, hand delivery, or another Department-approved method.

(I) For non-transient, non-community water systems, the Department may allow the supplier to post the results on a bulletin board in the facility to allow users to review the information.

(v) No later than three months after the end of each monitoring period, the supplier must submit a sample copy of the consumer notice along with a certification that the notice has been distributed as specified in this section, 11.17(3)(h).

(i) Find-and-Fix Assessment for Results Above the Lead Action Level

(i) When a sample result is greater than (>) the lead action level at a sample site during tap sampling under 11.17(3)(d), the supplier must conduct the following "find-and-fix" steps:

(A) No later than five days after receiving a sample result above the lead action level, the supplier must collect samples from a new water quality parameter site that is on the same size water main in the same pressure zone and located within a half mile of the tap sample site that exceeds the action level.

(I) For systems without corrosion control treatment serving less than (<) 10,000 people, the supplier can collect samples up to 14 days after receiving a result above the lead action level.

(II) The supplier may conduct monitoring at an existing water quality parameter location if the location requirements specified in 11.17(3)(i)(i)(A) are met.

(III) If the supplier is required to meet optimal water quality parameters and does not have an existing water quality parameter location that meets the location requirements specified in 11.17(3)(i)(i)(A), the supplier must add the new site to the minimum number of sites specified in 11.17(5)(b).

(a) Sites must be added until a system has twice the minimum number of sites listed in Table 11.17-VI.

(b) When a system exceeds the upper threshold for the number of sites, the Department has discretion to determine if the newer site can better assess the effectiveness of the corrosion control treatment and to remove existing sites during sanitary survey evaluation of optimal corrosion control treatment.

(IV) The supplier must collect samples at the identified site for the following parameters:

(a) pH.

(b) Alkalinity.

(c) Orthophosphate (as PO4), when an inhibitor containing an orthophosphate compound is used.

(d) Silica, when an inhibitor containing a silicate compound is used.

(B) No later than 30 days after receiving a sample result above the lead action level, the supplier must collect a follow-up lead sample from the sample site.

(I) The supplier may use different sample volumes or different sample collection procedures to assess the source of elevated lead levels.

(II) Follow-up lead sample results are not included in the 90th percentile calculation.

(III) If the supplier is unable to collect a follow-up sample at a site, the supplier must provide documentation to the Department, explaining why it was unable to collect a follow-up sample.

(C) No later than six months after the end of the tap sampling period in which the site(s) exceeded the lead action level, the supplier must evaluate the results of the monitoring and submit a recommendation to the Department.

(I) The recommendation must determine if either localized or centralized adjustment of the optimal corrosion control treatment, including modification of corrosion control treatment, or other distribution system actions are necessary, such as flushing to reduce water age.

(II) The recommendation must include the cause of the elevated lead level, if known from the site assessment, if the supplier is not recommending any adjustment of corrosion control treatment or other distribution system actions.

(III) The supplier is not required to submit a treatment recommendation for find-and-fix if the supplier is optimizing or re-optimizing optimal corrosion control under 11.17(4).

(D) The Department must approve the treatment recommendation or specify an alternative approach within six months of completion of 11.17(3)(i)(i)(C).

(E) If the Department-approved treatment recommendation requires the supplier to adjust the optimal corrosion control treatment process, the supplier must complete modifications to its corrosion control treatment within 12 months after completion of 11.17(3)(i)(i)(D). Systems without corrosion control treatment required to install optimal corrosion control treatment must follow the schedule specified in 11.17(4)(c).

(F) If the supplier is adjusting its optimal corrosion control treatment, the supplier must complete follow-up sampling as specified in 11.17(3)(d)(iii) and 11.17(5)(f) within 12 months after completion of 11.17(3)(i)(i)(E).

(G) If the supplier is adjusting its optimal corrosion control treatment, the Department must review the supplier's modification of corrosion control treatment and designate optimal water quality parameters under 11.17(4)(d)(v) within six months of completion of 11.17(3)(i)(F).

(H) If the supplier is adjusting its optimal corrosion control treatment, the supplier must operate in compliance with the Department-designated optimal water quality parameters and continue to conduct tap sampling as specified in 11.17(3)(d) and water quality parameter monitoring as specified in 11.17(5)(g) or 11.17(5)(h).

(ii) By no later than July 1 of each calendar year, the supplier must provide the following find-and-fix information for actions conducted in the previous calendar year to the Department and local public health agencies by mail or another Department-approved method:

(A) The location of the tap sample site that exceeded 0.015 mg/L.

(B) The result of the initial tap sample.

(C) The result of the follow-up tap sample.

(D) The result of water quality parameter monitoring; and

(E) A description of any distribution system management actions or corrosion control treatment adjustments made.

(iii) The supplier must submit certification to the Department no later than July 1 of each year that the required find-and-fix information specified in 11.17(3)(i)(ii) was delivered to the appropriate local public health agencies for the previous calendar year.

(j) Public Availability of Tap Monitoring Results Used in the 90th Percentile Calculation

(i) The supplier must make available to the public the results of compliance tap sampling data, including data used in the 90th percentile calculation under 11.17(3)(b), within 60 days of the end of the applicable tap sampling period.

(A) Large systems must make the monitoring results available in a digital format.

(B) Small and medium systems must make the monitoring results available in either a written or digital format.

(C) The supplier must retain tap sampling monitoring data for no less than 12 years.

(D) The supplier is not required to make addresses of the sites where tap samples were collected publicly available.

(k) Response to an Action Level Exceedance for Lead

(i) In the event of a lead action level exceedance based on the 90th percentile calculation for sampling conducted under 11.17(3)(d), the supplier must:

(A) Notify the Department of the exceedance and initiate consultation as soon as possible but no later than 24 hours after the exceedance occurs.

(B) Distribute Tier 1 public notice as specified in 11.33.

(l) Reporting Requirements for Lead and Copper Tap Sampling

(i) By the start of the first applicable tap sampling monitoring period as specified in 11.17(3)(d), the supplier must submit the following:

(A) A sample site plan in accordance with 11.17(3)(a), including a list of tap sample site locations identified from the inventory as specified in 11.17(2)(a), and a list a tap sampling water quality parameter sites selected under 11.17(5)(b), if applicable.

(I) The sample site plan must be updated and submitted to the Department prior to any changes to sample site locations.

(II) The Department may require modifications to the sample site plan as necessary.

(III) For systems with lead service lines with insufficient lead service line sites to complete its sampling pool, the supplier must submit documentation in support of the conclusion that there are an insufficient number of lead service line sites meeting the criteria specified in Table 11.17-I.

(B) For suppliers that allow residents to collect first-draw or fifth-liter tap samples, a copy of the tap sampling protocol provided to individuals who are sampling.

(I) If the supplier intends to modify its tap sampling protocol, the supplier must submit the updated version of the protocol to the Department for review and approval no later than 60 days prior to use.

(II) The Department shall verify that wide-mouth collection bottles are used and recommendations for pre-stagnation flushing and aerator cleaning or removal prior to sample collection are not included pursuant to 11.17(3)(c)(i).

(ii) No later than the 10th of the month following the end of each monitoring period, the supplier must submit all of the following:

(A) Lead and copper tap sample results collected under 11.17(3)(d), including the location of each site and the criteria for which the site was selected.

(I) If a site was sampled during the current monitoring period that was not sampled during previous monitoring periods, the supplier must submit an explanation for the change in sample site(s).

(B) Additional lead and copper tap samples collected under 11.17(3)(e), including service line and plumbing material information.

(C) Follow-up lead and copper tap samples and water quality parameter samples collected as part of the find-and-fix steps under 11.17(3)(i), including the location of each site.

(I) The supplier must include information on the number of customer refusals or non-responses for follow-up sampling under 11.17(3)(i), if applicable, and provide information on the accuracy of the refusals or non-responses.

(D) The 90th percentile calculations for the lead and copper tap sample results.

(iii) The supplier is not required to report the 90th percentile lead and copper levels if all of the following conditions are met:

(A) The Department has notified the supplier that the Department will calculate the 90th percentile lead and copper levels based on the lead and copper tap sample results submitted.

(B) By no later than the 10th of the month following the end of each applicable tap sampling monitoring period, the supplier submits all of the following information:

(I) The results of all lead and copper tap samples.

(II) The location of each site.

(III) The tier level and criteria used to select the site.

(IV) A list of the sites that were sampled during the current monitoring period that were not sampled during previous monitoring periods, and an explanation for the change in sample sites.

(C) The Department has submitted the results of the 90th percentile lead and copper calculations, in writing, to the supplier within 15 days of the end of the tap sampling period.

(iv) For a non-transient, non-community water system, or a community water system meeting the criteria specified in 11.17(3)(c)(i)(I), that does not have enough taps that can provide first-draw or fifth-liter samples, the supplier must:

(A) By no later than the start of the first applicable monitoring period, submit to the Department the standing times and tap locations for the non-first-draw tap samples used to complete the sampling pool.

11.17(4) Corrosion Control Requirements

(a) General Requirements

(i) The supplier must install and operate corrosion control treatment in accordance with this section, 11.17(4), and that meets the definition of optimal corrosion control treatment specified in 11.17(1)(r).

(A) If the system is deemed to have optimal corrosion control under 11.17(4)(b), the supplier is not required to install and operate corrosion control treatment.

(ii) For systems that comply with the applicable corrosion control treatment requirements specified by the Department under 11.17(4), the supplier is deemed in compliance with the treatment requirement specified in 11.17(4)(a)(i).

(iii) For small community or non-transient, non-community water systems that comply with the applicable small system compliance flexibility requirements specified by the Department under 11.17(4)(c), 11.17(4)(d), and 11.17(4)(i), the supplier is deemed to be in compliance with the treatment requirement specified in 11.17(4)(a)(i).

(iv) The supplier must notify the Department in writing pursuant to 11.17(4)(j) of any upcoming long-term change in treatment or addition of a new source as described in 11.17(4)(j).

(v) The Department must evaluate, review, designate, and/or approve the supplier's corrosion control treatment in accordance with procedures set forth in 11.17(4) and 40 CFR 141, Subpart I, and 40 CFR 142.

(b) Criteria for Being Deemed to Have Optimal Corrosion Control

(i) The supplier is deemed to have optimal corrosion control if one of the following criteria are met:

(A) A small or medium system without corrosion control treatment is deemed to have optimal corrosion control if the supplier does not exceed the lead action level and copper action level during two consecutive six-month tap sampling monitoring periods and thereafter remains at or below the lead trigger level and copper action level in all tap sampling periods conducted in accordance with 11.17(3)(d).

(B) For small or medium systems with corrosion control treatment, the supplier is deemed to have optimal corrosion control treatment if the supplier does not exceed the lead trigger level and copper action level during two consecutive six-month tap sampling monitoring periods and thereafter remains at or below the lead trigger level and copper action level in all tap sampling periods conducted in accordance with 11.17(3)(d).

(I) For small or medium systems with corrosion control treatment that exceed the lead trigger level but do not exceed the lead and copper action levels during two consecutive six-month tap sampling monitoring periods and thereafter remain at or below the lead and copper action levels in all tap sampling periods conducted in accordance with 11.17(3)(d), the supplier is deemed to have re-optimized optimal corrosion control treatment if the supplier meets the requirements of 11.17(4).

(II) Where the Department has set optimal water quality parameters under 11.17(4)(c) or 11.17(4)(d), the supplier is not eligible to be deemed to have optimized or re-optimized optimal corrosion control treatment.

(C) For all systems, the supplier is deemed to have optimized or re-optimized corrosion control if the supplier submits results of tap water monitoring in accordance with 11.17(3)(d) demonstrating that the 90th percentile tap water lead level is less than or equal to (≤) the lead practical quantitation level of 0.005 mg/L and does not exceed the copper action level for two consecutive six-month tap sampling monitoring periods.

(I) Where the Department has set optimal water quality parameters under 11.17(4)(c) or 11.17(4)(d), the supplier is not eligible to be deemed to have optimized or re-optimized optimal corrosion control treatment.

(II) If the supplier's 90th percentile tap sample results ever exceed the lead practical quantitation level of 0.005 mg/L or the copper action level during any tap sampling period, the supplier is no longer eligible to be deemed to have optimized corrosion control without first completing the treatment steps specified in 11.17(4)(c), or for systems subject to 11.17(4)(i)(vi)(A)(II), the treatment steps specified in 11.17(4)(d).

(III) If the supplier is deemed to have optimized corrosion control in accordance with 11.17(4)(b)(i)(C), the supplier must continue collecting lead and copper tap samples no less frequently than once every three calendar years at the reduced number of sites specified in Table 11.17-IV and collecting samples at the times and locations specified in 11.17(3)(d).

(ii) If the supplier is deemed to have optimal corrosion control treatment, as defined in 11.17(1)(r) and as specified in 11.17(4)(b)(i)(A-C), and has corrosion control treatment in

place without having optimal water quality parameters set by the Department, the supplier must continue to operate and maintain that treatment and meet any additional requirements that the Department determines to be appropriate to ensure optimal corrosion control treatment is maintained.

(c) Treatment Steps and Deadlines for Systems Without Corrosion Control Treatment

A supplier without corrosion control treatment (i.e., does not have Department-designated optimal water quality parameters) is required to complete the corrosion control steps for optimized corrosion control treatment according to the steps and deadlines specified in 11.17(4)(c) if no longer deemed to have optimal corrosion control under 11.17(4)(b), unless the Department has approved an alternative compliance option under 11.17(4)(i).

(i) The supplier must recommend optimal corrosion control treatment in the following manner and by the specified deadlines:

(A) For large systems without corrosion control treatment with 90th percentile results as calculated in accordance with 11.17(3)(b) that exceed either the lead practical quantitation level of 0.005 mg/L or the copper action level, the supplier must complete one of the following by the specified deadlines:

(I) For systems with lead service lines, the supplier must harvest lead pipes from the distribution system and construct flow-through pipe loops and operate the loops with finished water within 12 months after the end of the tap sampling period and then complete the corrosion control studies specified in 11.17(4)(e) within 18 months.

(a) The supplier must complete harvesting of lead pipes and the corrosion control studies within 30 months after the end of the tap sampling period that exceeds either the lead practical quantitation level of 0.005 mg/L or the copper action level.

(II) For systems without lead service lines, the supplier must complete the corrosion control studies as specified in 11.17(4)(e) within 18 months after the end of the tap sampling period that exceeds either the lead practical quantitation level of 0.005 mg/L or the copper action level.

(B) For small and medium systems with lead service lines that exceed the lead action level, the supplier must harvest lead pipes from the distribution system and construct flow-through pipe loops and operate the loops with finished water within 12 months after the end of the tap sampling period and then complete the corrosion control studies as specified in 11.17(4)(e) within 18 months.

(I) The supplier must complete harvesting of lead pipes and the corrosion control studies within 30 months after the end of the tap sampling period that exceeds the lead action level.

(C) For small and medium systems without corrosion control treatment that exceed the copper action level and for medium systems without corrosion control treatment that exceed the lead trigger level, the supplier must recommend, based on the results of lead and copper tap sampling and water quality parameter monitoring, one or more corrosion control treatments specified in 11.17(4)(e)(i)(A) that will most likely provide optimal corrosion control for the system no later than six months after the end of the tap sampling period that exceeds the lead trigger level or copper action level.

(I) No later than 12 months after the end of the tap sampling period that exceeds the lead trigger level or copper action level, the Department may notify the supplier in writing of the requirement to perform corrosion control studies as specified in 11.17(4)(e).

(a) If required to perform corrosion control studies, the supplier must complete the corrosion control studies no later than 18 months after the Department makes this determination.

(D) For small community water systems and non-transient, non-community water systems without corrosion control treatment that exceed the lead trigger level but not the copper action level that choose to pursue a small water system compliance flexibility option, the supplier must recommend an option in accordance with 11.17(4)(i) based on the results of lead tap sampling and water quality parameter monitoring, including recommending one or more corrosion control treatments specified in 11.17(4)(e)(i)(A) that will most likely provide optimal corrosion control for the system.

(I) The supplier must submit the recommendation(s) no later than six months after the end of the tap sampling period that exceeds the lead trigger level.

(II) If the Department approves corrosion control treatment as a compliance option under 11.17(4)(i), the supplier must complete the corrosion control treatment steps specified in 11.17(4)(c).

(ii) The Department must designate optimal corrosion control treatment under the following conditions:

(A) When designating optimal corrosion control treatment, the Department must consider the effects that additional corrosion control treatment will have on water quality parameters and on other drinking water quality treatment processes.

(B) If the Department requests additional information, including additional monitoring, to aid its review, the supplier must provide the information within the timeframes specified by the Department.

(C) Based upon considerations of available information including, where applicable, studies conducted under 11.17(4)(e)(i) and/or the supplier's recommended corrosion control treatment option, the Department must either approve the corrosion control treatment option recommended by the supplier or designate alternative corrosion control treatment(s) from among those listed in 11.17(4)(e)(i)(A)(I-IV).

(D) The Department must notify the supplier of its designation of optimal corrosion control treatment in writing and explain the basis for this determination. The Department must designate optimal corrosion control treatment by the following deadlines:

(I) For systems required to perform corrosion control studies as specified in 11.17(4)(e), the Department must designate optimal corrosion control treatment within six months after completion of the corrosion control studies.

(II) For medium systems required to recommend treatment as specified in 11.17(4)(c)(i)(C) and not required to perform corrosion control studies under 11.17(4)(c)(i)(C)(I), the Department must designate treatment within 18 months after the end of the tap sampling period during which the supplier exceeds the lead trigger level or copper action level.

(III) For small systems required to recommend treatment as specified in 11.17(4)(c)(i)(C) or 11.17(4)(c)(i)(D) and not required to perform corrosion control studies under 11.17(4)(c)(i)(C)(I), the Department must designate treatment within 24 months after the end of the tap sampling period during which the supplier exceeds the lead trigger level or copper action level.

(iii) No later than 24 months after the Department approves optimal corrosion control treatment, the supplier must:

(A) Properly install and operate the designated treatment; and

(B) Submit certification that the Department-approved optimal corrosion control treatment was installed.

(iv) Discontinuation of corrosion control treatment steps. For small and medium systems, the supplier may discontinue the corrosion control treatment steps beginning with 11.17(4)(c)(iii), if one of the following conditions are met:

(A) The supplier has exceeded the lead trigger level, but has not exceeded the lead or copper action level.

(I) If the supplier subsequently exceeds the lead or copper action level, the supplier must install Department-designated corrosion control treatment as specified in 11.17(4)(c)(iii).

(B) The supplier has exceeded the lead or copper action level, but prior to the deadline to install treatment, the supplier does not exceed the lead or copper action levels during each of two consecutive six-month tap sample monitoring periods conducted in accordance with 11.17(3)(d).

(I) If the supplier installs optimal corrosion control treatment, the supplier must complete the activities specified in 11.17(4)(c)(v-vii).

(II) If the supplier does not complete 11.17(4)(c)(iii) upon meeting the condition specified in 11.17(4)(c)(iv)(B) and thereafter exceeds either the lead or copper action level, the supplier is not permitted to discontinue the steps a second time and must complete the applicable treatment steps beginning with 11.17(4)(c)(iii).

(a) The Department may require the supplier to repeat treatment steps previously completed by the supplier when the Department determines that it is necessary in order for the supplier to implement the treatment requirements specified in 11.17(4). The Department must notify the supplier in writing of such a determination and explain the basis for its decision.

(v) No later than 12 months after installation of corrosion control treatment as specified in 11.17(4)(c)(iii), the supplier must complete follow-up sampling consisting of:

(A) Water quality parameter monitoring as specified in 11.17(5)(f); and

(B) Standard lead and copper tap sample monitoring as specified in 11.17(3)(d).

(vi) No later than six months after the supplier completes water quality parameter monitoring and collects the lead and copper tap samples as specified in 11.17(4)(c)(v), the Department shall evaluate the results of all lead and copper tap sampling and water quality parameter monitoring submitted by the supplier and determine if the supplier has properly installed and operated optimal corrosion control treatment designated by the Department.

(A) Upon reviewing the results of tap sampling and water quality parameter monitoring conducted by the supplier, both before and after the supplier installs optimal corrosion control treatment, the Department must designate:

(I) A minimum value or a range of values for pH measured at each entry point.

(II) A minimum pH value measured in all tap samples. Such a value must be greater than or equal to (≥) 7.0, unless the Department determines that meeting a pH level of 7.0 is not technologically feasible or is not necessary for the system to optimize corrosion control.

(III) If a corrosion inhibitor is used, a minimum concentration or a range of concentrations for orthophosphate (as PO_4) or silicate, measured at each entry point.

(IV) If a corrosion inhibitor is used, a minimum orthophosphate or silicate concentration measured in all tap samples that the Department determines is necessary to form a passivating film on the interior walls of the pipes of the distribution system.

(a) When orthophosphate is used, such an orthophosphate concentration must be greater than or equal to (≥) 0.5 mg/L (as PO_4) unless the Department determines that meeting the applicable minimum orthophosphate residual is not technologically feasible or is not necessary for optimal corrosion control treatment.

(V) If alkalinity is adjusted as part of optimal corrosion control treatment, a minimum concentration or a range of concentrations for alkalinity, measured at each entry point and in all tap samples.

(VI) The values for the applicable water quality control parameters as specified in 11.17(4)(c)(vi)(A)(I-V) must be those that the Department determines to reflect optimal corrosion control treatment for the system. The Department may designate values for additional water quality control parameters determined by the Department to reflect optimal corrosion control treatment for the system.

(B) The Department must notify the supplier in writing of these determinations and explain the basis for its decisions.

(vii) The supplier must continue to operate and maintain optimal corrosion control treatment as specified in 11.17(4)(h).

(d) Treatment Requirements for Systems Re-Optimizing Corrosion Control Treatment

A supplier with corrosion control treatment (i.e., has Department-designated optimal water quality parameters) is required to complete the corrosion control steps for re-optimized corrosion control treatment according to the steps and deadlines specified in 11.17(4)(d) when the supplier exceeds the lead trigger level or copper action level or is otherwise required by the Department, unless the Department has approved an alternative compliance option under 11.17(4)(i).

(i) The supplier must recommend re-optimized corrosion control treatment in the following manner and by the specified deadlines:

(A) For systems with corrosion control treatment, the supplier must recommend re-optimized corrosion control treatment from the treatment options specified in 11.17(4)(e)(i)(A) within six months after the end of the tap sampling period, if any of the following occurs:

(I) The supplier exceeds the lead trigger level or copper action level and is not covered under 11.17(4)(d)(i)(B).

(II) The Department notifies the supplier in writing of the requirement to re-optimize corrosion control treatment on the condition the supplier is a large system with 90^{th} percentile results as calculated in accordance with 11.17(3)(b) that exceed the lead practical quantitation level but do not exceed the lead trigger level or the copper action level.

(B) For systems with lead service lines that exceed the lead action level, the supplier must harvest lead pipes from the distribution system and construct flow-through pipe loops and operate the loops with finished water within 12 months after the end of the tap sampling period and then complete the corrosion control studies as specified in 11.17(4)(e) within 18 months.

(I) The supplier must complete harvesting of lead pipes and corrosion control studies within 30 months after the end of the tap sampling period that exceeded the lead action level.

(C) For systems that exceed the lead trigger level, but not the lead or copper action level, the Department may approve modifications of the existing corrosion control treatment without a study.

(I) The Department must specify re-optimized corrosion control treatment within six months of receiving the supplier's treatment recommendation under 11.17(4)(d)(A).

(II) The supplier must complete modifications to corrosion control treatment to have re-optimized corrosion control treatment within six months of the Department specifying re-optimized corrosion control under 11.17(4)(d)(i)(C)(I).

(D) For large systems, the supplier must conduct the corrosion control studies as specified in 11.17(4)(e) for re-optimization within 18 months after the tap sampling period in which the supplier exceeded the lead trigger level or copper action level, unless the Department has approved modifications under 11.17(4)(d)(i)(C).

(E) For small and medium systems with corrosion control treatment that exceed the lead trigger level or the copper action level, the Department may require the supplier to perform corrosion control studies as specified in 11.17(4)(e).

(I) The Department must notify the supplier in writing of the requirement to complete the corrosion control studies as specified in 11.17(4)(e) within 12 months after the end of the tap sampling period in which the supplier exceeded the lead trigger level or copper action level.

(a) If required to perform corrosion control studies, the supplier must complete the corrosion control studies no later than 18 months after the Department makes this determination.

(ii) The Department must designate re-optimized corrosion control treatment under the following conditions:

(A) When designating re-optimized corrosion control treatment, the Department must consider the effects that additional corrosion control treatment will have on water quality parameters and on other drinking water quality treatment processes.

(B) If the Department requests additional information to aid its review, the supplier must provide the requested information within the timeframes specified by the Department.

(C) Based upon considerations of available information including, where applicable, studies conducted under 11.17(4)(e) and/or the supplier's recommended corrosion control treatment option, the Department must either approve the corrosion control treatment option recommended by the supplier or designate alternative corrosion control treatment(s) from among those listed in 11.17(4)(e)(i)(A)(I-IV).

(D) The Department must notify the supplier of its designation of optimal corrosion control treatment in writing and explain the basis for this determination. The Department must designate optimal corrosion control treatment within the following timeframes:

(I) For systems required to perform corrosion control studies as specified in 11.17(4)(e), the Department must designate optimal corrosion control treatment within six months after completion of the corrosion control studies.

(II) For medium systems required to recommend treatment as specified in 11.17(4)(d)(i)(A) and not required to perform corrosion control studies under 11.17(4)(d)(i)(E), the Department must designate treatment within 12 months after the end of the tap sampling period during which the supplier exceeds the lead trigger level or copper action level.

(III) For small systems required to recommend treatment as specified in 11.17(4)(d)(i)(A) and not required to perform corrosion control studies under 11.17(4)(d)(i)(E), the Department must designate treatment within 18 months after the end of the tap sampling period during which the supplier exceeds the lead trigger level or copper action level.

(iii) No later than 12 months after the Department approves re-optimized corrosion control treatment, the supplier must:

(A) Properly install and operate the approved treatment.

(B) Submit certification to the Department that the Department-approved re-optimized corrosion control treatment was installed.

(iv) No later than 12 months after installation of corrosion control treatment in 11.17(4)(d)(iii), the supplier must complete follow-up sampling consisting of:

(A) Water quality parameter monitoring as specified in 11.17(5)(f); and

(B) Standard lead and copper tap sample monitoring as specified in 11.17(3)(d).

(v) No later than six months after the supplier completes water quality parameter monitoring and collects the lead and copper tap samples as specified in 11.17(4)(d)(iv), the Department shall evaluate the results of all lead and copper tap sampling and water quality parameter sampling submitted by the supplier and determine if the supplier has properly installed and operated optimal corrosion control treatment designated by the Department.

(A) Upon reviewing the results of tap sampling and water quality parameter monitoring conducted by the supplier, both before and after the supplier installs optimal corrosion control treatment, the Department must designate:

(I) A minimum value or a range of values for pH measured at each entry point.

(II) A minimum pH value measured in all tap samples. Such a value must be greater than or equal to (≥) 7.0, unless the Department determines that meeting a pH level of 7.0 is not technologically feasible or is not necessary for the system to optimize corrosion control.

(III) If a corrosion inhibitor is used, a minimum concentration or a range of concentrations for orthophosphate (as PO_4) or silicate, measured at each entry point.

(IV) If a corrosion inhibitor is used, a minimum orthophosphate or silicate concentration measured in all tap samples that the Department determines is necessary to form a passivating film on the interior walls of the pipes of the distribution system.

(a) When orthophosphate is used, such an orthophosphate concentration shall be greater than or equal to (≥) 1.0 mg/L (as PO_4), unless the Department determines that meeting the applicable minimum orthophosphate residual is not technologically feasible or is not necessary for optimal corrosion control treatment.

(V) If alkalinity is adjusted as part of optimal corrosion control treatment, a minimum concentration or a range of concentrations for alkalinity, measured at each entry point and in all tap samples.

(VI) The values for the applicable water quality parameters, specified in 11.17(4)(d)(v)(A)(I-V), must be those that the Department determines to reflect optimal corrosion control treatment for the water system. The Department may designate values for additional water quality parameters

determined by the Department to reflect optimal corrosion control treatment for the system.

(B) The Department must notify the supplier in writing of these determinations and explain the basis for its decisions.

(vi) The supplier must continue to operate and maintain re-optimized optimal corrosion control treatment as specified in 11.17(4)(h).

(e) Corrosion Control Treatment Studies Requirements

(i) Corrosion control treatment studies must include all of the following:

(A) An evaluation of the effectiveness of each of the following treatments, and if appropriate, combinations of the following treatments to identify the optimal corrosion control treatment for the system:

(I) Alkalinity and pH adjustment.

(II) The addition of an orthophosphate- or silicate-based corrosion inhibitor at a concentration sufficient to maintain an effective corrosion inhibitor residual concentration in all test samples.

(III) The addition of an orthophosphate-based corrosion inhibitor at a concentration sufficient to maintain an orthophosphate residual concentration of 1 mg/L (as PO_4) in all test samples; and

(IV) The addition of an orthophosphate-based corrosion inhibitor at a concentration sufficient to maintain an orthophosphate residual concentration of 3 mg/L (as PO_4) in all test samples.

(B) An evaluation of each of the corrosion control treatments using either:

(I) Pipe rig/loop tests.

(II) Metal coupon tests.

(III) Partial-system tests; or

(IV) Analyses based on documented analogous treatments with other systems of similar size, water chemistry, and distribution system configurations.

(C) For systems with lead service lines, the supplier must complete pipe rig/loop studies using harvested lead service lines from their distribution system to assess the effectiveness of corrosion control treatment options on the existing pipe scale.

(I) The supplier may use metal coupon tests as a screen to reduce the number of options that are evaluated using pipe rig/loops to the current conditions and two options.

(a) The supplier must not exclude treatment strategies from the studies based on constraints identified in 11.17(4)(e)(i)(E) or effects identified in 11.17(4)(e)(i)(F).

(D) Monitoring of the following water quality parameters before and after any test conducted under 11.17(4)(e)(i)(B)(I-III) to evaluate the effectiveness of the corrosion control treatments:

(I) Lead.

(II) Copper.

(III) pH.

(IV) Alkalinity.

(V) Orthophosphate as PO_4 (when an orthophosphate-based inhibitor is used).

(VI) Silicate (when a silicate-based inhibitor is used).

(E) An identification of all chemical or physical constraints that limit or prohibit the use of a particular corrosion control treatment and documentation of such constraints with one of the following:

(I) Data and documentation showing that a particular corrosion control treatment has adversely affected other drinking water treatment processes when used by another water system with comparable water quality characteristics.

(a) Suppliers using coupon studies to screen and/or pipe loop/rig studies to evaluate treatment options must not exclude treatment strategies from the studies based on the constraints identified in this section.

(II) Data and documentation demonstrating that the supplier has previously attempted to evaluate a particular corrosion control treatment and has found that the treatment is ineffective or adversely affects other drinking water quality treatment processes.

(a) Suppliers using coupon studies to screen and/or pipe loop/rig studies to evaluate treatment options must not exclude treatment strategies from the studies based on the constraints identified in this section unless the treatment was found to be ineffective in a previous pipe loop/rig study.

(F) An evaluation of the effect of the chemicals used for corrosion control treatment on other drinking water quality treatment processes.

(G) A recommendation, in writing, based on an analysis of the data generated during each evaluation, of the treatment option that the corrosion control studies indicate constitutes optimal corrosion control treatment for the system.

(I) The supplier must provide a rationale for its recommendation along with all supporting documentation specified in 11.17(4)(e)(i)(A-F).

(f) Modification of Department Treatment Decisions for Optimal Corrosion Control and Re-Optimized Corrosion Control

(i) To ensure optimal corrosion control, the Department may modify its determination of optimal corrosion control treatment or optimal water quality parameters specified in 11.17(4)(c) or 11.17(4)(d) where it concludes that such change is necessary to ensure that the supplier continues to optimize corrosion control treatment.

(A) The supplier, or other interested party, may request in writing that the Department modify optimal corrosion control treatment or optimal water quality parameters. The request must explain why the modification is appropriate and include supporting documentation.

(B) If the Department modifies the determination, the Department shall notify the supplier in writing of the modified treatment requirements and/or water quality parameters and include all of the following information:

(I) The basis for the decision; and

(II) An implementation schedule for the supplier to complete the modifications for re-optimized corrosion control treatment.

(g) Treatment Decisions by EPA in Lieu of the Department on Optimal Corrosion Control Treatment and Re-Optimized Corrosion Control Treatment

(i) Pursuant to the procedures in 40 CFR 142.19, the EPA Regional Administrator may review optimal corrosion control treatment determinations made by the Department in section 11.17(4) or under 40 CFR 141.82(d)(1), (2), (f), or (h) and issue Federal treatment determinations consistent with the requirements of 11.17(4) or 40 CFR 141.82(d)(1), (2), (f), or (h) where the Regional Administrator finds that:

(A) The Department has failed to issue a treatment determination by the applicable deadlines specified in 11.17(4)(c), 11.17(4)(d), or 11.17(4)(i).

(B) The Department has abused its discretion in a substantial number of cases or in cases affecting a substantial population; or

(C) The technical aspects of the Department's determination would be indefensible in a Federal enforcement action taken against the supplier.

(h) Requirements for the Continued Operation and Maintenance of Optimal Corrosion Control Treatment

(i) All suppliers optimizing or re-optimizing corrosion control must continue to operate and maintain optimal corrosion control treatment, including maintaining water quality parameters at or above minimum values or within ranges designated by the Department.

(ii) The supplier must operate in compliance with the Department-designated optimal water quality parameters and continue to conduct tap sampling as specified in 11.17(3)(d) and water quality parameter monitoring under 11.17(5).

(iii) The supplier must continue to operate and/or maintain optimal corrosion control treatment, including consecutive systems that distribute water that has been treated to control corrosion by another supplier, and any supplier with corrosion control treatment, optimal corrosion control treatment, or re-optimized corrosion control treatment that is not required to monitor water quality parameters under 11.17(5).

(iv) To demonstrate the continued operation and maintenance of optimal corrosion control treatment, the supplier must comply with the treatment technique requirements for water quality parameters as specified in 11.17(5)(k) and collect lead and copper tap samples as specified in 11.17(3)(d).

(A) The supplier must begin maintaining water quality parameters on the date that the Department notifies the supplier of the Department-specified optimal values for corrosion control.

(i) Small Water System Compliance Flexibility

(i) For small community water systems and non-transient, non-community water systems that exceed the lead trigger level but do not exceed the copper action level, the supplier must complete and submit to the Department the following no later than six months after the end of the tap sampling period in which the exceedance occurred:

(A) A recommendation for one or more corrosion control treatment options specified in 11.17(4)(e)(i)(A) that will most likely provide optimal corrosion control for the system.

(I) For systems with existing corrosion control treatment in place, the supplier must continue to operate and maintain optimal corrosion control treatment until the Department determines in writing that it is no longer necessary, and meet any requirements that the Department determines to be appropriate before implementing a Department-approved compliance option as described in 11.17(4)(i)(iv).

(B) A recommendation of the compliance option, based on an evaluation of the compliance options specified in 11.17(4)(i)(i)(B)(I-IV), the supplier will implement if a subsequent lead action level exceedance occurs.

(I) Corrosion control treatment recommended in 11.17(4)(i)(i)(A) and described in 11.17(4)(i)(vi)(A).

(II) Lead service line replacement described in 11.17(4)(i)(vi)(B).

(III) POU devices described in 11.17(4)(i)(vi)(C).

(IV) Replacement of lead-bearing plumbing described in 11.17(4)(i)(vi)(D).

(ii) The Department must approve the compliance option recommendation or designate an alternative from the compliance options specified in 11.17(4)(i)(i)(B)(I-IV) within six months of the recommendation by the supplier.

(iii) If the supplier subsequently exceeds the lead action level, the supplier must implement the compliance option approved by the Department in 11.17(4)(i)(ii).

(iv) If the supplier exceeds the lead action level, but has not previously exceeded the lead trigger level, and does not exceed the copper action level, the supplier must complete the actions specified in 11.17(4)(i)(i) and must implement the compliance option approved by the Department under 11.17(4)(i)(ii).

(v) If the supplier exceeds the lead trigger level after it has implemented a compliance option specified in 11.17(4)(i)(i)(B)(I-IV) and approved by the Department under 11.17(4)(i)(ii), the supplier must complete the steps specified in 11.17(4)(i)(i), and if it thereafter

exceeds the lead action level, it must implement the compliance option approved by the Department under 11.17(4)(i)(ii).

(vi) Description of small system compliance flexibility options.

(A) Corrosion control treatment. The supplier must install and maintain optimal corrosion control treatment in accordance with 11.17(4)(c-h).

(I) The supplier must install and maintain optimal corrosion control treatment even if the supplier's 90th percentile lead level is at or below the action level in future tap sampling monitoring periods.

(II) If the supplier has corrosion control treatment installed, the supplier must re-optimize its corrosion control treatment in accordance with 11.17(4)(d).

(III) Suppliers required by the Department to optimize or re-optimize corrosion control treatment must follow the schedules specified in 11.17(4)(c) or 11.17(4)(d), beginning with 11.17(4)(c)(iii) or 11.17(4)(d)(iii), unless the Department specifies optimal corrosion control treatment pursuant to either 11.17(4)(c)(ii)(D)(III) or 11.17(4)(d)(ii)(D)(III), as applicable.

(B) Lead service line replacement. For systems with lead service lines, the supplier must implement a full lead service line replacement program on a schedule approved by the Department but not to exceed 15 years.

(I) The supplier must begin lead service line replacement within one year after the Department's approval or designation of the compliance option.

(II) The supplier may not cease lead service line replacement even if the supplier's 90th percentile lead level is at or below the action level in future tap sampling monitoring periods.

(III) Lead service line replacement must be conducted in accordance with the requirements specified in 11.17(7)(f), 11.17(7)(h)(i)(D), 11.17(7)(h)(i)(F) and 11.17(7)(h)(i)(G).

(IV) The supplier must have no lead service lines, galvanized requiring replacement service lines, or "lead status unknown" service lines in its inventory by the end of its lead service line replacement program.

(C) Point-of-use devices. The supplier must install, maintain, and monitor POU devices in each household or building.

(I) For community water systems, the supplier must install POU devices as follows:

(a) At each household in the distribution system, install a minimum of one POU device (at one tap).

(b) At each non-residential building in the distribution system, install one POU device at every tap that is used for cooking and/or drinking.

(c) Installation must be completed according to a Department-specified schedule, but no later than one year after the Department's approval or designation of the compliance option.

(II) For non-transient, non-community water systems, the supplier must provide a POU device at every tap that is used for cooking and/or drinking.

(a) Installation must be completed according to a Department-specified schedule, but no later than three months after the Department's approval or designation of the compliance option.

(III) The supplier must continue with installation, maintenance, and monitoring of POU devices in each household or building even if the lead 90th percentile is at or below the action level in future tap sampling monitoring periods.

(IV) The POU device must be independently certified by a third party to meet the American National Standards Institute standard applicable to the specific type of POU unit to reduce lead in drinking water.

(V) The POU device must be maintained by the supplier according to manufacturer's recommendations to ensure continued effective filtration, including but not limited to changing filter cartridges and resolving any operational issues.

(a) POU devices must be equipped with mechanical warnings to ensure that customers are automatically notified of operational problems.

(b) The supplier must provide documentation to the Department to certify maintenance of the POU devices on an annual basis.

(VI) The supplier must monitor one-third of the POU devices each year and all POU devices must be monitored within a three-year cycle.

(a) First-draw tap samples collected under 11.17(4)(i)(vi)(C)(VI) must be taken after water passes through the POU device to assess its performance.

(b) Samples must be one-liter in volume and have had a minimum six-hour stagnation time.

(c) All samples must be less than or equal to (≤) the lead trigger level.

(d) No later than the 10th of the month following the end of each tap sampling monitoring period, the supplier must report the results from the tap sampling from POU devices to the Department.

(e) At any site where the sample result exceeds the lead trigger level, the supplier must document the problem and complete corrective action within 30 days. If the corrective action is not completed within 30 days, the supplier must provide

documentation to the Department within 30 days explaining why the supplier was unable to correct the issue.

(f) For any site where the sample result exceeds the lead trigger level, the supplier must reach out to the homeowner and/or building management no later than 24 hours after receiving the tap sample results.

(VII) The supplier must provide public education to consumers to inform them on proper use of POU devices to maximize the units' effectiveness in reducing lead levels in drinking water.

(a) The supplier must provide public education material at the time of POU device delivery.

(b) The supplier must distribute the public education materials in person, by mail, or by another Department-approved method to people at all locations where the supplier has delivered POU devices.

(VIII) The supplier must operate and maintain the POU devices until the supplier receives Department approval to select one of the other compliance flexibility options and implements it.

(D) Replacement of lead-bearing plumbing. If the supplier has control over all plumbing in its buildings, and has no unknown, galvanized, or lead service lines, the supplier must replace all plumbing that is not lead free in accordance with Section 1417 of the Safe Drinking Water Act, as amended by the Reduction of Lead in Drinking Water Act, and any future amendments applicable at the time of replacement.

(I) Replacement of all lead-bearing plumbing must be completed according to a Department-specified schedule, but no later than one year after the Department’s approval or designation of the compliance option.

(II) The supplier must provide certification to the Department that all lead-bearing material has been replaced within one year of the Department’s approval or designation of the compliance option.

(j) Reporting Requirements for a New Source or Long-Term Change in Water Treatment

(i) The Department must review and approve the addition of a new source or long-term change in water treatment before it is implemented by the supplier.

(A) At a date specified by the Department, or if no specific date is specified by the Department, as soon as possible but no later than six months prior to the addition of a new source or any long-term treatment change, the supplier must submit written documentation to the Department describing the addition or change.

(B) The Department may require the supplier to take actions before or after the addition of a new source or long-term treatment change to ensure the supplier will operate and maintain optimal corrosion control treatment (e.g., additional water quality parameter monitoring, additional lead or copper tap sampling, and re-evaluation of corrosion control treatment).

(C) Examples of long-term treatment changes include but are not limited to:

(I) The addition of a new treatment process or modification of an existing treatment process including:

(a) Switching secondary disinfectants.

(b) Switching coagulants (e.g., alum to ferric chloride).

(c) Switching corrosion inhibitor products (e.g., orthophosphate to blended phosphate).

(II) Dose changes to existing chemicals if the water system is planning long-term changes to its finished water pH or residual inhibitor concentration.

(D) Long-term treatment changes would not include chemical dose fluctuations associated with daily raw water quality changes where a new source has not been added.

(k) Treatment Technique Violations and Response for Optimal Corrosion Control

(i) If the supplier fails to meet the corrosion control treatment requirements by the deadlines specified in 11.17(4), a treatment technique violation occurs.

(ii) In the event of an optimal corrosion control treatment technique violation, the supplier must:

(A) Notify the Department no later than 48 hours after the violation occurs; and

(B) Distribute Tier 2 public notice as specified in 11.33.

11.17(5) Monitoring Requirements for Water Quality Parameters

(a) Applicability

(i) For all large water systems, the supplier must comply with the water quality parameter requirements specified in this section, 11.17(5).

(ii) For small and medium water systems that exceed the lead or copper action level, the supplier must comply with the water quality parameter requirements specified in this section, 11.17(5).

(iii) For small and medium water systems with corrosion control treatment that exceed the lead trigger level, the supplier must comply with the water quality parameter requirements specified in this section, 11.17(5).

(b) General Monitoring Requirements for Water Quality Parameters

(i) The supplier must monitor for water quality parameters at taps and at each entry point.

(A) The supplier must collect tap samples that are representative of water quality throughout the distribution system, taking into account the number of individuals supplied, the different sources of water, the different treatment methods used by the system, and seasonal variability.

(I) Tap sampling for water quality parameters is not required to be conducted at lead and copper tap sampling sites specified in 11.17(3)(a).

(II) The supplier must include tap sampling sites for water quality parameters in the supplier's sampling pool specified in 11.17(3)(a)(i). The supplier's sampling pool must be updated prior to changes to the sampling locations.

(B) The supplier must collect tap samples for the applicable water quality parameters from the minimum number of sites specified in Table 11.17-VI.

(C) For systems that add sites as a result of the "find-and-fix" requirements specified in 11.17(3)(i), the supplier must collect tap samples for applicable water quality parameters each monitoring period as specified in 11.17(5)(c-i) and must sample from the adjusted minimum number of sites.

(I) If the supplier is conducting water quality parameter monitoring at additional sites through "find-and-fix", the supplier must add those sites to the minimum number of sites specified in Table 11.17-VI unless they are monitoring at least twice the minimum number of sites.

TABLE 11.17-VI ROUTINE NUMBER OF WATER QUALITY PARAMETER TAP SAMPLE SITES

Population supplied	Minimum number of sites for water quality parameters	Find-and-Fix threshold for water quality parameters
Greater than (>) 100,000	25	50
10,001 to 100,000	10	20
3,301 to 10,000	3	6
501 to 3,300	2	4
101 to 500	1	2
Less than or equal to (≤) 100	1	2

(c) For Large Systems without Corrosion Control Treatment - Initial Monitoring Requirements for Water Quality Parameters

(i) For systems that become a large system, the supplier must monitor water quality parameters during two consecutive six-month compliance periods beginning no later than January 1 of the calendar year after the system becomes a large system.

(ii) For large systems that fail to maintain a 90th percentile lead level less than or equal to (≤) 0.005 mg/L, the supplier must monitor water quality parameters during two consecutive six-month compliance periods beginning no later than January 1 of the calendar year following the compliance period during which the 90th percentile lead level is greater than (>) 0.005 mg/L.

(iii) In each six-month compliance period, the supplier must monitor the following water quality parameters:

(A) At the routine number of tap sample sites specified in Table 11.17-VI, collect two samples for:

(I) pH.

(II) Alkalinity.

(B) At each entry point, collect two samples for:

(I) pH.

(II) Alkalinity.

(d) For Small and Medium Systems - Monitoring Requirements for Water Quality Parameters After an Action Level Exceedance

(i) The supplier must monitor for water quality parameters during two consecutive six-month compliance periods immediately following the end of the tap sampling period during which the lead or copper action level is exceeded.

(A) At the routine number of tap sample sites specified in Table 11.17-VI, collect two samples for:

(I) pH.

(II) Alkalinity.

(B) At each entry point, collect two samples for:

(I) pH.

(II) Alkalinity.

(e) For Systems without Designated Water Quality Parameters for Optimal Corrosion Control - Initial Monitoring Requirements for Water Quality Parameters After a Trigger Level Exceedance

(i) For systems that have corrosion control treatment installed for which the Department has not specified values for water quality parameters that reflect optimal corrosion control treatment, the supplier must monitor for water quality parameters during two consecutive six-month compliance periods immediately following the end of the tap sampling period during which the lead trigger level is exceeded.

(A) At the routine number of tap sample sites specified in Table 11.17-VI, collect two samples for:

(I) pH.

(II) Alkalinity.

(B) At each entry point, collect two samples for:

(I) pH.

(II) Alkalinity.

(f) Monitoring Requirements for Water Quality Parameters After Installation or Re-Optimization of Corrosion Control Treatment

(i) The supplier must monitor water quality parameters during two consecutive six-month compliance periods immediately following the installation or re-optimization of corrosion control treatment. In each six-month compliance period, the supplier must:

(A) Collect samples evenly throughout each six-month compliance period to reflect seasonal variability.

(B) At the routine number of tap sample sites specified in Table 11.17-VI, collect two samples for each of the following:

(I) pH.

(II) Alkalinity.

(III) Orthophosphate, when an inhibitor containing an orthophosphate compound is used.

(IV) Silica, when an inhibitor containing a silicate compound is used.

(C) At each entry point, collect at least one sample every two weeks (biweekly) for each of the following:

(I) pH.

(II) If alkalinity is adjusted as part of optimal corrosion control, a reading of the dosage rate of the chemical used to adjust alkalinity, and the alkalinity concentration.

(III) If a corrosion inhibitor is used as part of optimal corrosion control, a reading of the dosage rate of the inhibitor used, and the concentration of orthophosphate or silica (whichever is applicable).

(D) For groundwater systems, the supplier may reduce entry point sampling to entry points that are representative of water quality and treatment conditions throughout the system.

(I) If water from groundwater sources without corrosion control treatment mixes with water from groundwater sources with corrosion control treatment, the supplier must monitor for water quality parameters both at representative entry points receiving treatment and representative entry points receiving no treatment.

(II) Before starting reduced entry point monitoring, the supplier must submit written documentation identifying the selected representative entry points and information sufficient to demonstrate that the sites are representative of water quality and treatment conditions throughout the system, including information on seasonal variability.

(ii) For small and medium water systems with corrosion control treatment for which the Department has not specified water quality parameters for optimal corrosion control that exceed the lead trigger level but not the lead or copper action levels, the Department may allow an alternative water quality parameter structure.

(g) <u>For Large Systems - Routine Monitoring After the Department Specifies Water Quality Parameters for Optimal Corrosion Control</u>

(i) After the Department specifies the values for the applicable water quality parameters that reflect optimal corrosion control treatment as specified in 11.17(4)(c)(vi) and 11.17(4)(d)(v), the supplier must monitor for the required water quality parameters every six months as specified in 11.17(5)(f)(i)(A-D).

(A) After the Department specifies the values reflecting optimal corrosion control, the supplier must begin monitoring in the first six-month compliance period, beginning either January 1 or July 1, whichever comes first.

(h) For Small and Medium Systems - Routine Monitoring after the Department Specifies Water Quality Parameters for Optimal Corrosion Control

(i) After the Department specifies values for the applicable water quality parameters that reflect optimal corrosion control as specified in 11.17(4)(c)(vi) and 11.17(4)(d)(v), the supplier must monitor water quality parameters every six months immediately following any tap sampling period during which the lead or copper action level is exceeded.

(A) The supplier must monitor the water quality parameters as specified in 11.17(5)(f)(i)(A-D).

(B) The supplier must continue to monitor water quality parameters until the lead and copper action levels and Department-specified values for water quality parameters reflecting optimal corrosion control are met in two consecutive six-month compliance periods.

(C) If the supplier is collecting lead and copper tap samples on a reduced monitoring frequency at the time of the action level exceedance, the supplier must begin monitoring for water quality parameters no later than the six-month compliance period beginning January 1 of the calendar year following the action level exceedance.

(ii) If the supplier exceeds the lead trigger level, but not the lead and copper action levels, the supplier must monitor the water quality parameters as specified in 11.17(5)(f)(i)(A-D) every six months until the lead trigger level is met for two consecutive six-month compliance periods.

(A) The Department may require the supplier to routinely monitor water quality parameters to demonstrate the continued operation and maintenance of optimal corrosion control.

(i) Reduced Monitoring Requirements for Water Quality Parameters at Taps

(i) For large systems, if the supplier has maintained Department-specified values for water quality parameters reflecting optimal corrosion control treatment as specified in 11.17(4)(c)(vi) and 11.17(4)(d)(v) and has met the lead trigger level during two consecutive six-month compliance periods, the supplier may collect two tap samples for each applicable water quality parameter from the reduced number of sites specified in Table 11.17-VII during each six-month compliance period.

TABLE 11.17-VII REDUCED NUMBER OF WATER QUALITY PARAMETER TAP SAMPLE SITES

Population supplied	Reduced number of sites for water quality parameters
Greater than (>) 100,000	10

10,001 to 100,000	7
3,301 to 10,000	3
501 to 3,300	2
101 to 500	1
Less than or equal to (≤) 100	1

(ii) For large systems, and for small and medium water systems for which the Department has required routine water quality parameter monitoring as specified in 11.17(5)(h)(ii)(A), the supplier may be eligible for reduced tap monitoring frequency.

(A) The supplier may, at the reduced number of sites specified in Table 11.17-VII, collect two samples for each applicable water quality parameter annually if, during three consecutive years of monitoring, all of the following criteria are met:

(I) The 90th percentile does not exceed the lead trigger level.

(II) The 90th percentile does not exceed the copper action level.

(III) The Department-specified values for water quality parameters reflecting optimal corrosion control treatment have been maintained.

(IV) The supplier must begin annual monitoring in the calendar year immediately following the end of the third consecutive year of six-month monitoring.

(B) The supplier may, at the reduced number of sites specified in Table 11.17-VII, collect two samples for each applicable water quality parameter annually if, during two consecutive monitoring periods all of the following criteria are met:

(I) The 90th percentile lead level is less than or equal to (≤) 0.005 mg/L.

(II) The 90th percentile copper level is less than or equal to (≤) 0.65 mg/L.

(III) The Department-specified values for water quality parameters reflecting optimal corrosion control treatment have been maintained.

(iii) The supplier must collect tap samples evenly throughout the compliance period to reflect seasonal variability.

(j) Increased Monitoring Requirements for Water Quality Parameters

(i) If the supplier is monitoring water quality parameters at a reduced frequency, the supplier must increase the water quality parameter tap monitoring frequency and the number of sites as specified in 11.17(5)(g) or 11.17(5)(h) if one or more of the following occur:

(A) A lead trigger level exceedance occurs.

(B) A copper action level exceedance occurs.

(C) An excursion occurs as specified in 11.17(5)(l).

(ii) The supplier may return to a reduced water quality parameter tap monitoring frequency and reduced number of sites if the conditions specified in 11.17(5)(i) are satisfied.

(k) Treatment Technique Compliance Determination for Optimal Corrosion Control Treatment

(i) The supplier must maintain the Department-specified values for water quality parameters to demonstrate the continued operation and maintenance of optimal corrosion control treatment.

(ii) Compliance with monitoring requirements and Department-specified values for water quality parameters is determined for each six-month compliance period.

(iii) The results of all water quality parameter monitoring samples collected in addition to the minimum requirements of this section, 11.17(5), must be considered by the supplier and the Department in making any determinations (e.g., determining concentrations of water quality parameters) under 11.17(4) and 11.17(5).

(iv) The supplier must calculate the daily value for each water quality parameter at each sampling location as follows:

(A) On days when more than one sample for a water quality parameter is collected at a sampling location, the daily value is the average of all results collected on that day through continuous monitoring and/or grab sampling.

(B) On days when only one sample for a water quality parameter is collected at a sampling location, the daily value is that sample result.

(C) On days when no sample is collected for a water quality parameter at a sampling location, the daily value is the daily value calculated on the most recent day on which the water quality parameter was sampled at the sampling location.

(D) The Department may exclude sample results from this calculation due to obvious sampling errors when appropriate.

(l) Treatment Technique Violations for Water Quality Parameters

(i) If an excursion occurs for any Department-specified water quality parameter, or combination of water quality parameters, at any sampling location, or combination of sampling locations, on more than nine days total during any six-month compliance period, a treatment technique violation occurs.

(A) “EXCURSION” means the daily value for one or more water quality parameters at a sampling location is less than (<) the minimum value or outside the Department-specified range of values.

(m) Response to a Treatment Technique Violation for Water Quality Parameters

(i) In the event of a water quality parameters treatment technique violation, the supplier must:

(A) Notify the Department no later than 48 hours after the violation occurs.

(B) Distribute Tier 2 public notice as specified in 11.33.

(C) Begin lead and copper tap sampling every six months at the number of sites specified in Table 11.17-IV no later than the six-month compliance period beginning January 1 of the calendar year following the violation.

(D) Monitor water quality parameters as specified in 11.17(5)(g) or 11.17(5)(h).

11.17(6) Sampling and Treatment Requirements for Lead and Copper in Source Water

(a) Applicability

If the lead or copper action level is exceeded, the supplier must comply with the requirements for lead and copper entry point sampling and if necessary, the installation of additional treatment as specified in this section, 11.17(6).

(b) Sampling and Treatment Requirements After Exceeding the Lead or Copper Action Level

(i) No later than six months after the end of the tap sampling period during which the lead or copper action level was exceeded either for the first time or for the first time after the addition of a new source or installation of source water treatment required under 11.17(6)(b)(iii), the supplier must:

(A) Collect one lead and copper sample from each entry point.

(B) Submit a written recommendation for the installation and operation of one of the source water treatments specified in 11.17(6)(b)(iii)(B)(II)(a-d).

(I) The supplier may recommend that treatment is not necessary based on the demonstration that source water treatment will not minimize lead and copper levels at the taps.

(C) The Department may waive the source water monitoring requirement if all of the following criteria are met:

(I) The supplier has already conducted source water monitoring following a previous action level exceedance.

(II) The Department has determined that source water treatment is not required.

(III) The supplier has not added any new water sources.

(ii) For the purposes of this section, if the supplier is required to conduct lead and copper tap monitoring annually or less frequently, the end of the tap sampling period is September 30 of the calendar year in which the sampling occurs, or, if the Department has established an alternate tap sampling period, the last day of that period.

(iii) No later than six months after the supplier submits the lead and copper entry point sample results, the Department shall evaluate the results to determine whether source water treatment is necessary to minimize lead and copper levels at the taps.

(A) If the Department requests additional information to make the determination, the supplier must submit that information no later than the date specified in the request.

(B) If the Department determines that additional treatment is necessary for lead and copper in the source water, the Department shall require the supplier to either:

(I) Install and operate the supplier-recommended treatment; or

(II) Install and operate one of the following treatments:

(a) Ion exchange.

(b) Reverse osmosis.

(c) Lime softening.

(d) Coagulation and filtration.

(C) The Department shall notify the supplier in writing of the determination and basis for the decision.

(c) Installation of Additional Treatment for Lead and Copper in the Source Water

(i) No later than 24 months after the Department determines that additional treatment is necessary for lead and copper in the source water, the supplier must:

(A) Properly install and operate the Department-approved treatment.

(B) Submit certification that the Department-approved treatment was installed.

(ii) No later than 12 months after the installation of additional treatment for lead and copper in the source water, the supplier must collect samples during two consecutive six-month compliance periods as follows:

(A) One lead and copper sample at each entry point.

(B) Lead and copper tap samples at the routine number of sites specified in Table 11.17-IV.

(iii) For the addition of a new source after installation of additional treatment for lead and copper in the source water, the supplier must collect one lead and copper sample from each entry point until the supplier demonstrates that lead and copper entry point sample results have been less than (<) the maximum permissible lead and copper concentrations specified by the Department in 11.17(6)(d) or the Department determines that source water treatment is not needed.

(d) Treatment Technique Requirements After the Department Specifies Maximum Permissible Levels for Lead and Copper at the Entry Point

(i) The Department must review the sample results that were collected before and after the installation of treatment and determine if the treatment was properly installed and operated.

(A) No later than six months after the supplier collects follow-up tap water samples and lead and copper entry point samples, the Department must specify maximum permissible levels that the supplier must comply with for lead and copper at each entry point that reflect the contaminant removal capability of the treatment when it is properly operated and maintained.

(B) The Department must notify the supplier, in writing, and explain the basis for the decision.

(ii) Upon its own initiative or in response to a request, the Department may modify the treatment requirements or maximum permissible levels if it determines that the change is necessary to ensure that the lead and copper levels at the entry point are minimized.

(A) The supplier, or other interested party, may request in writing that the Department modify treatment or maximum permissible levels. The request must explain why the modification is appropriate and must include supporting documentation.

(B) The Department shall notify the supplier, in writing, of the modified treatment requirements or maximum permissible levels and include all of the following information:

(I) The basis for the decision.

(II) An implementation schedule for the supplier to complete the modifications.

(e) Treatment Decisions by EPA in Lieu of the Department on Source Water Treatment

(i) Pursuant to the procedures in 40 CFR 142.19, the EPA Regional Administrator may review treatment determinations made by the Department under 11.17(6)(b) and 11.17(6)(d) or under 40 CFR 141.83(b)(2), (4), or (6) and issue Federal treatment determinations consistent with the requirements of 11.17(6)(b) and 11.17(6)(d) or 40 CFR 141.83(b)(2), (4), or (6) where the Administrator finds that:

(A) The Department has failed to issue a treatment determination by the applicable deadlines specified in 11.17(6)(b-d).

(B) The Department has abused its discretion in a substantial number of cases or in cases affecting a substantial population; or

(C) The technical aspects of the Department's determination would be indefensible in an expected Federal enforcement action taken against a system.

(f) Routine Sampling Frequency for Lead and Copper at the Entry Point

(i) If the Department specifies maximum permissible levels, the supplier must operate in compliance with the Department-specified maximum permissible lead and copper source water levels and collect lead and copper samples at each entry point as follows:

(A) For groundwater systems, once every three calendar years.

(I) The supplier must collect samples no later than every third calendar year.

(B) For surface water systems, annually.

(I) The first sample must be collected in the same calendar year that the Department specifies the maximum permissible levels.

(C) If the lead and copper tap sample results are less than or equal to (≤) the action level during any lead and copper entry point monitoring period, the supplier is not required to collect lead and copper entry point samples.

(ii) If a sample was collected at an entry point during the current monitoring period that was not sampled during previous monitoring periods, the supplier must submit an explanation for the change in entry point(s).

(g) Reduced Sampling Frequency for Lead and Copper at the Entry Point

(i) The supplier may reduce the sampling frequency for lead and copper entry point samples to once during each nine-year compliance cycle if:

(A) For groundwater systems, the supplier demonstrates that lead and copper entry point sample results have been less than (<) the maximum permissible levels specified by the Department for at least three consecutive three-year compliance periods.

(B) For surface water systems, the supplier demonstrates that lead and copper entry point sample results have been less than (<) the maximum permissible levels specified by the Department for at least three consecutive years.

(ii) If the supplier is on a nine-year sampling frequency, the supplier must collect samples no later than every ninth calendar year.

(iii) For new sources, the supplier is not eligible for a reduced sampling frequency for lead and copper at the entry point until the results collected from the new source during three consecutive monitoring periods are less than (<) the Department-specified maximum permissible levels.

(iv) If a sample was collected at an entry point during the current monitoring period that was not sampled during previous monitoring periods, the supplier must submit an explanation for the change in entry point(s).

(h) Response to an Exceedance of Maximum Permissible Levels

If the maximum permissible lead or copper concentration is exceeded at an entry point, the Department may require the supplier to collect a confirmation lead and copper entry point sample as soon as possible but no later than two weeks after the initial entry point sample was collected.

(i) Compliance Determination for Lead and Copper in Source Water

(i) If a confirmation sample is collected, the supplier must average the results of the initial and confirmation samples to determine compliance with the maximum permissible level(s).

(ii) If a confirmation sample is not collected, compliance is determined based on the individual sample result.

(iii) If a sample result is less than (<) the method detection limit, the sample result will be given a value of zero when calculating compliance.

(iv) If a sample result is greater than (>) the method detection limit but less than (<) 0.005 mg/L for lead or 0.050 mg/L for copper, when calculating compliance, the supplier must use:

(A) For lead, the measured result or 0.0025 mg/L.

(B) For copper, the measured result or 0.025 mg/L.

(j) Treatment Technique Violations for Lead and Copper in Source Water

(i) The following constitute lead and copper in source water treatment technique violations:

(A) A confirmation sample is collected and the average of the initial sample result and its confirmation sample result is greater than (>) the maximum permissible level(s) for lead and/or copper.

(B) A confirmation sample is not collected and the individual sample result is greater than (>) the maximum permissible level(s) for lead and/or copper.

(C) The supplier fails to install Department-approved treatment.

(k) Response to Treatment Technique Violations for Lead and Copper in Source Water

(i) In the event of a lead and copper in source water treatment technique violation, the supplier must:

(A) Notify the Department no later than 48 hours after the violation occurs.

(B) Distribute Tier 2 public notice as specified in 11.33.

(C) In the event of a treatment technique violation for exceeding the maximum permissible level(s), the Department may require the supplier to make changes to the treatment.

11.17(7) Lead Service Line Replacement Requirements

(a) Applicability

(i) For all community and non-transient, non-community water systems that have one or more lead, galvanized requiring replacement, or lead status unknown service lines in their distribution system, the supplier must comply with the requirements in this section 11.17(7).

(ii) For all community and non-transient, non-community water systems that have one or more lead goosenecks, pigtails, or connectors in their distribution system, the supplier must comply with the requirements specified in 11.17(7)(d) and 11.17(7)(l)(i)(B).

(b) Lead Service Line Replacement Plan

(i) The supplier must develop a lead service line replacement plan sufficiently detailed to ensure the supplier is able to comply with the lead service line replacement requirements specified in this section, 11.17(7). The plan must include a description of all of the following:

(A) A strategy for determining the composition of lead status unknown service lines in its inventory.

(B) A procedure for conducting full lead service line replacement.

(C) A strategy for informing customers before a full or partial lead service line replacement.

(D) For systems that serve greater than (>) 10,000 people, a lead service line replacement goal rate recommended by the supplier in the event of a lead trigger level exceedance.

(E) A procedure for customers to flush service lines and premise plumbing of particulate lead.

(F) A lead service line replacement prioritization strategy based on factors including but not limited to the targeting of known lead service lines, lead service line replacement for disadvantaged consumers, and populations most sensitive to the effects of lead.

(G) A funding strategy for conducting lead service line replacements which considers ways to accommodate customers that are unable to pay to replace the portion they own.

(c) Determining Number of Goal-Based and Mandatory Service Line Replacements

(i) To calculate the number of service line replacements applicable to 11.17(7)(g) and 11.17(7)(h), the replacement rate must be applied to the sum of known lead and galvanized requiring replacement service lines when the supplier first exceeds the trigger or action level plus the number of lead status unknown service lines in the beginning of each year of an annual goal or mandatory lead service line replacement program.

(ii) Each service line shall count only once for purposes of calculating the required number of service line replacements, even where the ownership of the service line is split and both the customer-owned and system-owned portions require replacement.

(iii) The number of service lines requiring replacement must be updated annually to subtract the number of lead status unknown service lines that were discovered to be non-lead and to add the number of non-lead service lines that were discovered to be a lead or galvanized requiring replacement service lines.

(iv) Verification of a lead status unknown service line as non-lead in the inventory does not count as a service line replacement.

(d) Operating Procedures for Replacing Lead Goosenecks, Pigtails, or Connectors

(i) The supplier must replace any lead gooseneck, pigtail, or connector it owns when encountered during planned or unplanned water system infrastructure work.

(ii) The supplier must offer to replace a customer-owned lead gooseneck, pigtail, or connector.

(A) The supplier is not required to bear the cost to replace the customer-owned parts.

(iii) The supplier is not required to replace a customer-owned lead gooseneck, pigtail, or connector if the customer objects to its replacement.

(iv) The replacement of a lead gooseneck, pigtail, or connector does not count towards the requirements for goal-based or mandatory lead service line replacements specified in 11.17(7)(g) and 11.17(7)(h), respectively.

(v) Upon replacement of any gooseneck, pigtail, or connector that is attached to a lead service line, the water system must follow risk mitigation procedures specified in 11.17(7)(i)(ii).

(e) Requirements for Conducting Lead Service Line Replacement that May Result in Partial Replacement

(i) If the supplier plans to partially replace a lead service line (e.g., replace only the portion of a lead service line that it owns) in coordination with planned infrastructure work, the supplier must:

(A) Provide notice to the owner of the affected service line, or the owner's authorized agent, as well as non-owner resident(s) supplied by the affected service line at least 45 days prior to the replacement.

(I) The notice must explain that the supplier will replace the portion of the line it owns and offer to replace the portion of the service line not owned by the supplier.

(a) The supplier is not required to bear the cost to replace the portion of the affected service line owned by the customer.

(B) Before the affected service line is returned to service, provide notification meeting the following requirements:

(I) The content requirements of 11.17(8)(b), explaining that consumers may experience a temporary increase of lead levels in their drinking water due to the replacement.

(II) Information about the health effects of lead.

(III) Actions consumers can take to minimize their exposure to lead in drinking water.

(C) Provide information about service line flushing in accordance with the procedure developed in 11.17(7)(b)(i)(E) before the affected service line is returned to service.

(D) Provide the consumer with a pitcher filter or POU device certified by an American National Standards Institute accredited certifier to reduce lead before the affected service line is returned to service.

(I) The supplier must also provide the consumer with six months of replacement cartridges and instructions for use.

(II) If the affected service line serves more than one residence or non-residential unit (e.g., a multi-unit building), the supplier must provide a filter, six months of replacement cartridges and use instructions to every residence in the building.

(E) For single family residences supplied by a lead service line, distribute notification and informational material by mail or another Department-approved method.

(F) For multi-family residences supplied by a lead service line, distribute notification and informational material by mail or another Department-approved method, or post the information in a conspicuous location.

(G) Offer to collect a follow-up tap sample between three and six months after completion of a partial lead service line replacement or full lead service line replacement.

(I) The supplier must provide the results of the sample in accordance with 11.17(3)(h).

(ii) For suppliers that replace the portion of the lead service line it owns due to an emergency repair, the supplier must provide notice and risk mitigation measures to the people supplied by the affected service line in accordance with 11.17(7)(e)(i)(B-F) before the affected service line is returned to service.

(iii) When the supplier is notified by the customer that the customer's portion of the lead service line will be replaced, the supplier must:

(A) Make a good faith effort to coordinate simultaneous replacement of its portion of the service line.

(B) If simultaneous replacement cannot be conducted, replace its portion as soon as possible but no later than 45 days after the customer replaces its portion of the lead service line.

(C) Provide notification and risk mitigation measures in accordance with 11.17(7)(e)(i)(B-F).

(D) If the supplier fails to replace its portion of the lead service line within 45 days after the customer replaces their portion of the lead service line, notify the Department within 30 days of failing to meet the deadline in accordance with 11.17(7)(l)(i)(D).

(I) The supplier must complete the replacement no later than 180 days after the customer replaces its portion.

(iv) When the supplier is notified or otherwise learns that replacement of a customer-owned lead service line has occurred within the previous six months and left in place a system-owned lead service line, the supplier must:

(A) Replace its portion no later than 45 days after becoming aware of the customer replacement.

(B) Provide notification and risk mitigation measures in accordance with 11.17(7)(e)(i)(B-F) within 24 hours of becoming aware of the customer replacement.

(C) If the supplier fails to replace its portion of the affected service line within 45 days of becoming aware of the customer replacement, notify the Department within 30 days of failing to meet the deadline in accordance with 11.17(7)(l)(i)(D).

(I) The supplier must complete the replacement no later than 180 days after the date the customer replaces its portion.

(v) When the supplier is notified or otherwise learns of a replacement of a customer-owned lead service line which occurred more than six months ago, the supplier is not required to complete the lead service line replacement of the system-owned portion.

(A) The system-owned portion of the service line must still be included in the calculation of a lead service line replacement rate under 11.17(7)(c).

(f) Requirements for Conducting Full Lead Service Line Replacement

(i) If the supplier conducts a full lead service line replacement, the supplier must:

(A) Provide notice to the owner of the affected service line, or the owner's authorized agent, as well as non-owner resident(s) supplied by the affected service line that meets the content requirements of 11.17(7)(e)(i)(B)(I-III) within 24 hours of completion of the replacement.

(B) Provide risk mitigation measures to the persons supplied by the affected service line in accordance with 11.17(7)(e)(i)(C-G).

(ii) The supplier is not required to bear the cost of replacement of the portion of the lead service line not owned by the system.

(g) Goal-Based Full Lead Service Line Replacement for Water Systems Whose 90th Percentile Lead Level is Above the Trigger Level but at or Below the Lead Action Level

(i) For systems serving greater than (>) 10,000 people whose 90th percentile of lead tap sample results is greater than (>) the lead trigger level but less than or equal to (≤) the lead action level, the supplier must conduct goal-based full lead service line replacement at a rate approved by the Department.

(A) The supplier must calculate the number of full lead service line replacements it must conduct annually in accordance with 11.17(7)(c).

(B) Replacement of lead service lines must be conducted in accordance with the requirements specified in 11.17(7)(e) and 11.17(7)(f).

(C) Only full lead service line replacements count towards the supplier’s annual replacement goal. Partial lead service line replacements do not count towards the goal.

(D) The supplier must provide information to customers with lead, galvanized requiring replacement, or lead status unknown service lines as required in 11.17(7)(j).

(E) If the supplier fails to meet its lead service line replacement goal, the supplier must:

(I) Conduct public outreach activities specified in 11.17(7)(k) until either:

(a) The supplier meets its replacement goal; or

(b) Tap sampling shows the lead 90th percentile is less than or equal to (≤) the lead trigger level for two consecutive annual monitoring periods.

(II) Resume its goal-based lead service line replacement program if at any time the 90th percentile lead level is greater than (>) the lead trigger level but less than or equal to (≤) the lead action level.

(F) The first year of lead service line replacement must begin on the first day following the end of the tap sampling period in which the lead trigger level was exceeded.

(I) If sampling is required annually or less frequently, the end of the tap sampling monitoring period is September 30 of the calendar year in which the sampling occurs.

(II) If the Department has established an alternate monitoring period, then the end of the monitoring period will be the last day of that period.

(h) Mandatory Full Lead Service Line Replacement for Water Systems whose 90th Percentile Lead Level Exceeds the Lead Action Level

(i) For systems serving greater than (>) 10,000 people whose 90th percentile of lead tap sample results collected under 11.17(3) exceeds the lead action level, the supplier must conduct mandatory full lead service line replacement at an average annual rate of at least three percent, calculated on a two-year rolling basis.

(A) The average annual number of full lead service line replacements must be calculated in accordance with 11.17(7)(c).

(B) Lead service line replacement must be conducted in accordance with the requirements specified in 11.17(7)(e) and 11.17(7)(f).

(C) Only full lead service line replacement counts towards the supplier's mandatory replacement rate of at least three percent annually. Partial lead service line replacements do not count towards the mandatory replacement rate.

(D) The supplier must provide information to customers with lead, galvanized requiring replacement, or lead status unknown service lines consistent with the requirements specified in 11.17(7)(j).

(E) For community water systems serving less than or equal to (≤) 10,000 people and for non-transient non-community water systems for which the Department has approved or designated lead service line replacement as a compliance option, the supplier must complete lead service line replacement as described in 11.17(4)(i)(vi)(B).

(I) Replacement of lead service lines must be conducted in accordance with the requirements specified in 11.17(7)(e) and 11.17(7)(f).

(F) The first year of lead service line replacement shall begin on the first day following the end of the tap sampling period in which the lead action level was exceeded.

(G) When the Department determines a shorter lead service line replacement schedule is feasible, taking into account the number of lead service lines in the system, the Department shall notify the supplier of the alternative replacement schedule in writing within six months after the supplier is required to begin lead service line replacement according to 11.17(7)(h)(i)(F).

(ii) The supplier may cease mandatory lead service line replacement if either of the following criteria are met:

(A) The supplier has conducted a cumulative percentage of replacements greater than or equal to (≥) three percent, or other percentage specified in 11.17(7)(h)(i)(G), of the service lines specified in 11.17(7)(c) multiplied by the number of years between when the supplier most recently began mandatory lead service line replacement and the date when the supplier's 90th percentile lead level, in accordance with 11.17(3), is less than or equal to (≤) the lead action level for four consecutive six-month monitoring periods.

(I) If the lead action level is subsequently exceeded, the supplier must resume mandatory lead service line replacement at the same two-year rolling average rate, unless the Department has designated an alternate replacement rate under 11.17(7)(h)(i)(G).

(B) The supplier demonstrates all of the following:

(I) The system has no remaining lead status unknown service lines in its inventory; and

(II) The supplier has obtained refusals to conduct full lead service line replacement or non-responses from every remaining customer supplied by a full or partial lead service line, or a galvanized requiring replacement service line.

(a) For refusals and non-responses, the supplier must provide documentation to the Department of customer refusals including a refusal signed by the customer, documentation of a verbal statement made by the customer refusing replacement, or documentation of no response from the customer after the supplier made a minimum of two good faith attempts to reach the customer regarding full lead service line replacement.

(b) If the lead action level is subsequently exceeded, the supplier must contact all customers supplied by a full or partial lead service line or a galvanized requiring replacement service line with an offer to replace the customer-owned portion. The supplier is not required to bear the cost for the replacement of the customer-owned lead service line.

(i) <u>Notification Due to a Disturbance to a Known or Potential Service Line Containing Lead</u>

(i) If the supplier causes a disturbance to a lead, galvanized requiring replacement, or lead status unknown service line that results in the water to an individual service line being shut off or bypassed, such as operating a valve on a service line or meter setter, and without conducting a partial or full lead service line replacement, the supplier must provide the people supplied at that service connection with the following before the affected service line is returned to service:

(A) Information about the potential for elevated lead levels in drinking water as a result of the disturbance.

(B) Instructions for a flushing procedure to remove particulate lead.

(ii) If the supplier causes a disturbance of a lead, galvanized requiring replacement, or lead status unknown service line resulting from the replacement of an inline water meter, a water meter setter, or gooseneck, pigtail, or connector, the supplier must provide the people supplied at that service connection with the following before the affected service line is returned to service:

(A) Information about the potential for elevated lead levels in drinking water as a result of the disturbance.

(B) Public education materials that meet the content requirements specified in 11.17(8)(b).

(C) A pitcher filter or POU device certified by an American National Standards Institute accredited certifier to reduce lead, instructions to use the filter, and six months of filter replacement cartridges.

(iii) If the supplier conducts a partial or full lead service line replacement, the supplier must follow procedures in accordance with the requirements specified in 11.17(7)(e)(i)(B-G) and 11.17(7)(f)(i)(A-B), respectively.

(j) Information for Persons Supplied by Known or Potential Service Lines Containing Lead After a Lead Trigger Level Exceedance

(i) For systems with lead service lines that exceed the lead trigger level, the supplier must provide notice to all consumers supplied by a lead, galvanized requiring replacement, or lead status unknown service line, including all of the following:

(A) Information regarding the water system's lead service line replacement program; and

(B) Opportunities for replacement of the lead service line.

(ii) The supplier must distribute notification by mail or by another Department-approved method no later than 30 days after the end of the tap sampling period in which the trigger level exceedance occurred.

(A) The supplier must repeat the distribution of the notification annually until the results of sampling conducted under 11.17(3) are less than or equal to (≤) the lead trigger level.

(k) Outreach Activities for Failure to Meet the Lead Service Line Replacement Goal

(i) For community water systems that serve greater than (>) 10,000 people, if the supplier in the first year does not meet its annual lead service line replacement goal as required under 11.17(7)(g), the supplier must conduct one outreach activity from the following list in the following year until the system meets its replacement goal or until tap sampling shows that the 90^{th} percentile for lead is less than or equal to (≤) the lead trigger level for two consecutive tap sampling monitoring periods:

(A) Send certified mail to customers with a lead or galvanized requiring replacement service line to inform them about the water system's goal-based lead service line replacement program and opportunities for replacement of the service line.

(B) Conduct a townhall meeting.

(C) Participate in a community event to provide information about its lead service line replacement program and distribute public education materials that meet the content requirements specified in 11.17(8)(b).

(D) Contact customers by phone, text message, email, or door hanger.

(E) Use another method approved by the Department to discuss the lead service line replacement program and opportunities for lead service line replacement.

(ii) After the first year following a trigger level exceedance, for any system that thereafter continues to fail to meet its lead service line replacement goal, the supplier must conduct one activity specified in 11.17(7)(k)(i)(A-E) and two additional outreach activities per year from the following list:

(A) Conduct a social media campaign.

(B) Conduct outreach via newspaper, television, or radio.

(C) Contact organizations representing plumbers and contractors by mail to provide information about lead in drinking water including health effects, sources of lead, and the importance of using lead-free plumbing materials.

(D) Visit targeted customers to discuss the lead service line replacement program and opportunities for replacement.

(iii) The supplier may cease outreach activities when tap sampling shows that the 90th percentile for lead is less than or equal to (≤) the lead trigger level for two consecutive tap sampling monitoring periods or when all customer-side lead or galvanized requiring replacement service line owners refuse to participate in the lead service line replacement program.

(A) For refusals, the supplier must obtain a signed statement by the customer refusing lead service line replacement, or maintain documentation by the supplier of a verbal refusal or of no response after two good faith attempts to reach the customer.

(l) Reporting Requirements Related to Lead Service Line Replacements

(i) The supplier must report the following information to the Department to demonstrate compliance with the requirements of this section, 11.17(7):

(A) By October 16, 2024, the supplier must submit a lead service line replacement plan as specified in 11.17(7)(b).

(B) No later than 30 days after the end of each tap sampling monitoring period, the supplier must certify that it conducted replacement of any encountered lead goosenecks, pigtails, and connectors in accordance with 11.17(7)(d).

(C) No later than 30 days after the end of each tap sampling monitoring period, the supplier must certify that any partial or full lead service line replacements were conducted in accordance with 11.17(7)(e) and 11.17(7)(f), respectively.

(D) If the supplier fails to meet the 45-day deadline to complete a customer initiated lead service line replacement pursuant to 11.17(7)(e)(iv), the supplier must notify the Department within 30 days of the replacement deadline to request an

extension of the deadline for up to 180 days of the customer-initiated lead service line replacement.

(I) The supplier must certify annually that it has completed all customer-initiated lead service line replacements in accordance with 11.17(7)(e)(iv).

(E) No later than 30 days after the end of the supplier's annual lead service line replacement requirements under 11.17(7)(g) or 11.17(7)(h), the supplier must submit the following information to the Department, and continue to submit it each year the supplier conducts lead service line replacement under 11.17(7)(g) or 11.17(7)(h):

(I) The number of lead service lines in the initial inventory.

(II) The number of galvanized requiring replacement service lines in the initial inventory.

(III) The number of lead status unknown service lines in the inventory at the onset of the supplier's annual lead service line replacement program.

(IV) The number of full lead service lines that have been replaced and the address associated with each replaced service line.

(V) The number of galvanized requiring replacement service lines that have been replaced and the address associated with each replaced service line.

(VI) The number of lead status unknown service lines remaining in the inventory.

(VII) The total number of lead status unknown service lines determined to be non-lead; and

(VIII) The total number of service lines initially inventoried as "non-lead" later discovered to be a lead service line or a galvanized requiring replacement service line.

(F) No later than 30 days after the end of each tap sampling period, if the supplier has received customer refusals about lead service line replacements or customer non-responses after a minimum of two good faith efforts by the supplier to contact customers regarding full lead service line replacements in accordance with 11.17(7)(h)(ii)(B)(II), the supplier must certify to the Department the number of customer refusals or non-responses it received from customers supplied by a lead service line or galvanized requiring replacement service line, and maintain such documentation.

(G) No later than 12 months after the end of a tap sampling period in which the supplier exceeds the lead action level in sampling conducted pursuant to 11.17(3)(d), the supplier must provide the Department a schedule for annually replacing an average annual rate, calculated on a two year rolling basis, of at least three percent, or otherwise specified in 11.17(7)(h)(i)(G), of the number of known lead service lines and galvanized lines requiring replacement service lines when the lead trigger or action level was first exceeded and lead status unknown

service lines at the beginning of each year that required replacement occurs in its distribution system.

(H) No later than 12 months after the end of a tap sampling period in which the supplier exceeds the lead trigger level in sampling conducted pursuant to 11.17(3)(d), and every 12 months thereafter, the supplier must certify to the Department in writing that the supplier has:

(I) Conducted consumer notification as specified in 11.17(7)(j).

(II) Delivered public education materials to the affected consumers as specified in 11.17(8)(b).

(III) If the supplier does not meet its annual service line replacement goal as required under 11.17(7)(g), the supplier must submit certification to the Department that the supplier has conducted public outreach as specified in 11.17(7)(k) and submit a copy of the outreach materials used.

(IV) Provided the results of samples collected between three and six months after the date of a full or partial lead service line replacement to the residents in accordance with the timeframes specified in 11.17(3)(h)(ii). Mailed notices postmarked within three business days of receiving the results shall be considered "on time."

(I) If the supplier collects samples following a partial lead service line replacement required under 11.17(7)(e)(i)(G), the supplier must report the results to the Department by no later than the 10th of the month following the month in which the supplier receives the laboratory results, or as specified by the Department.

(I) The supplier must report any additional information as specified by the Department, in a time and manner specified by the Department, to verify that all partial lead service line replacement activities have taken place.

(J) No later than July 1 of each calendar year, the supplier must submit the following to the Department:

(I) Certification that the supplier conducted an outreach activity as specified in 11.17(7)(k) when failing to meet the lead service line replacement goal as specified in 11.17(7)(g) for the previous calendar year along with a copy of the outreach provided.

(II) Certification that the supplier delivered notification to affected customers after any lead service line disturbance in accordance with 11.17(7)(i) for the previous calendar year along with a copy of the notification.

(m) Treatment Technique Violations for Lead Service Line Replacement

(i) The following constitute lead service line replacement treatment technique violations:

(A) Failure to develop a lead service line replacement plan as specified in 11.17(7)(b).

(B) Failure to replace the required percentage of lead service lines each year as specified in 11.17(7)(h).

(C) Failure to comply with the reporting requirements specified in 11.17(7)(l) to demonstrate that the replacement requirements have been met.

(D) Failure to distribute notification to the residents of all buildings supplied by the lead service line at least 45 days before beginning a partial lead service line replacement as specified in 11.17(7)(e)(i)(A).

(E) Failure to provide risk mitigation measures to the persons supplied by the affected service line in accordance with 11.17(7)(e)(i)(C-G) after a partial or full lead service line replacement.

(F) Failure to comply with the outreach activity requirements for failure to meet the lead service replacement goal as specified in 11.17(7)(k) and 11.17(7)(l)(i)(H).

(n) Response to Treatment Technique Violations for Lead Service Line Replacement

(i) In the event of a treatment technique violation for lead service line replacement, the supplier must:

(A) Notify the Department no later than 48 hours after the violation occurs; and

(B) Distribute Tier 2 public notice as specified in 11.33.

11.17(8) Public Education Requirements

(a) Applicability

(i) If the lead action level is exceeded based on tap water sampling collected in accordance with 11.17(3), the supplier must comply with the public education requirements as specified in this section, 11.17(8).

(A) For the purposes of this section, if the supplier is required to conduct lead and copper tap monitoring annually or less frequently, the end of the tap sampling period is September 30 of the calendar year in which the sampling occurs, or, if the Department has established an alternate tap sampling period, the last day of that period.

(b) Content of Public Education Materials

(i) The supplier must include the following elements in printed materials (e.g., brochures and pamphlets) in the same order as follows:

(A) IMPORTANT INFORMATION ABOUT LEAD IN YOUR DRINKING WATER. [NAME OF WATER SYSTEM] found elevated levels of lead in drinking water in some homes/buildings. Lead can cause serious health problems, especially for pregnant women and young children. Please read this information closely to see what you can do to reduce lead in your drinking water.

(B) Health effects of lead: Exposure to lead in drinking water can cause serious health effects in all age groups. Infants and children can have decreases in IQ and attention span. Lead exposure can lead to new learning and behavior problems or exacerbate existing learning and behavior problems. The children of women who are exposed to lead before or during pregnancy can have increased risk of these adverse health effects. Adults can have increased risks of heart disease, high blood pressure, kidney or nervous system problems.

(C) Information on sources of lead:

(I) Explain what lead is.

(II) Explain possible sources of lead in drinking water and how lead enters drinking water. Include information on home/building plumbing materials and service lines that may contain lead.

(III) Discuss other important sources of lead exposure in addition to drinking water (e.g., paint).

(D) Discuss the steps the consumer can take to reduce their exposure to lead in drinking water.

(I) Encourage running the water to flush out the lead.

(II) Explain concerns with using hot water from the tap and specifically caution against the use of hot water for preparing baby formula.

(III) Explain that boiling water does not reduce lead levels.

(IV) Discuss other options consumers can take to reduce exposure to lead in drinking water, such as alternative sources or treatment of water.

(V) Suggest that parents consult a medical professional for advice about whether to have their child's blood tested for lead.

(E) Explain why there are elevated levels of lead in the system's drinking water, if known, and what the supplier is doing to reduce the levels in homes or buildings in this area.

(F) For more information call us at [THE WATER SYSTEM'S NUMBER] [(IF APPLICABLE), or visit our website at [THE WATER SYSTEM'S WEBSITE HERE]]. For more information on reducing lead exposure around your home/building and the health effects of lead, visit EPA's website at http://www.epa.gov/lead or contact your health care provider.

(G) For systems with lead service lines, information on lead service lines including all of the following:

(I) Opportunities to replace lead service lines.

(II) An explanation of how to access the service line inventory so the consumer can find out if they have a lead service line.

(III) Information on programs that provide financing solutions to assist property owners with replacement of their portion of a lead service line.

(IV) A statement that the water system is required to replace its portion of a lead service line when the property owner notifies them they are replacing their portion of the lead service line.

(ii) In the printed materials, the supplier must:

(A) Include the language exactly as written and provide the specific information for the text in brackets for 11.17(8)(b)(i)(A), 11.17(8)(b)(i)(B), and 11.17(8)(b)(i)(F).

(B) Provide the information for the requirements specified in 11.17(8)(b)(i)(C-E) and 11.17(8)(b)(i)(G), if applicable.

(iii) For community water systems, the supplier must also include all of the following information:

(A) How consumers can get their water tested.

(B) A discussion of lead in plumbing components and the difference between low lead and lead free.

(iv) If the supplier includes additional information, it must be consistent with the information specified in 11.17(8)(b)(i) and be in plain language that can be understood by the general public.

(v) For systems supplying a large proportion of non-English speaking consumers, as determined by the Department, the supplier must include either:

(A) Information in the appropriate language(s) regarding the importance of the notice; or

(B) A telephone number or address where the consumer may contact the supplier to obtain a translated copy of the public education materials or request assistance in the appropriate language.

(vi) If the supplier exceeds the lead action level based on tap monitoring results collected under 11.17(3)(d), the supplier must offer to sample the tap water of any customer who requests it.

(A) The supplier is not required to pay for collecting or analyzing the sample, nor is the supplier required to collect and analyze the sample.

(c) Distribution of Public Education Materials for Community Water Systems

(i) For community water systems, the supplier must distribute public education materials as specified in this section, 11.17(8)(c). The public education materials distributed must meet the content requirements specified in 11.17(8)(b).

(ii) No later than 60 days after the end of the tap sampling period in which the lead action level exceedance occurred, the supplier must:

(A) Distribute public education materials to all bill paying customers.

(B) Distribute public education materials to local public health agencies even if they are not located in the system's service area.

(I) The supplier must also contact the local public health agencies directly by phone or in person. The local public health agencies may provide a specific list of additional community based organizations serving target populations, which may include organizations outside the service area of the system.

(a) If such a list is provided, the supplier must distribute public education materials to all organizations on the provided list.

(C) Distribute public education materials to all of the following organizations located in the system's service area:

(I) Schools, child care facilities, and school boards.

(II) Women, Infants and Children (WIC) and Head Start programs.

(III) Public and private hospitals and medical clinics.

(IV) Pediatricians.

(V) Family planning clinics.

(VI) Local welfare agencies.

(VII) Obstetricians-Gynecologists and Midwives.

(D) Include an informational notice in the materials distributed to the organizations specified in 11.17(8)(c)(ii)(B-C) that encourages the distribution of the public education materials to all of the organization’s potentially affected customers or community water system’s users.

(E) In addition to distributing public education materials as specified in 11.17(8)(c)(ii)(A-D), complete at least three activities from one or more of the following categories. The content and selection of these methods must be determined in consultation with the Department.

(I) Public service announcements.

(II) Paid advertisements.

(III) Public area informational displays.

(IV) E-mails to customers.

(V) Public meetings.

(VI) Household deliveries.

(VII) Targeted individual customer contact.

(VIII) Direct material distribution to all multi-family homes and institutions.

(IX) Other Department-approved methods.

(F) Begin including a statement on or in each water bill no less frequently than quarterly.

(I) The water bill must include the following statement exactly as written and provide the specific information for the text in brackets:

[INSERT NAME OF WATER SYSTEM] found high levels of lead in drinking water in some homes. Lead can cause serious health problems. For more information, please call [INSERT NAME OF WATER SYSTEM] or visit [INSERT YOUR WEBSITE HERE].

(II) The statement or distribution method may be modified in consultation with the Department. The Department may allow a separate mailing of public education materials to customers if the supplier cannot place the information on water bills.

(G) Submit a press release to newspaper, television, and radio stations.

(H) For systems supplying greater than (>) 100,000 people, post public education materials that meet the content requirements specified in 11.17(8)(b) on the system's public website.

(iii) If needed for implementation purposes, the Department may extend the 60-day deadline for the requirements specified in 11.17(8)(c)(ii) on a case-by-case basis, only if the extension is approved in writing before the deadline.

(iv) For as long as the system exceeds the lead action level, the supplier must continue to distribute public education materials as follows:

(A) The supplier must repeat the tasks as specified in 11.17(8)(c)(ii)(A-E) every 12 months.

(B) The supplier must repeat the tasks as specified in 11.17(8)(c)(ii)(F) with each water bill, but no less frequently than quarterly, for as long as the system exceeds the lead action level.

(C) For systems supplying greater than (>) 100,000 people, the supplier must post and retain public education materials as specified in 11.17(8)(c)(ii)(H) on the system's public website.

(D) The supplier must submit a press release to newspaper, television, and radio stations twice every 12 months or on a Department-approved schedule.

(v) The supplier may apply to the Department in writing to omit the information specified in 11.17(8)(b)(iii) and complete only the tasks specified in sections 11.17(8)(d)(ii-iv) if:

(A) The system is a facility, such as a prison or a hospital, where the population supplied is unable to make improvements to plumbing or install point-of-use treatment devices; and

(B) The supplier supplies water as part of the cost of services provided and does not separately charge for water consumption.

(vi) For community water systems serving less than or equal to (≤) 3,300 people, the supplier may modify the requirements for the distribution of the public education materials as follows:

(A) The supplier must complete at least one activity from the categories specified in 11.17(8)(c)(ii)(E).

(B) The supplier may limit the distribution of the public education materials specified in 11.17(8)(c)(ii)(B-E) to facilities and organizations supplied by the system that are most likely to be visited regularly by pregnant women and children.

(C) If the supplier distributes public education materials to every household supplied by the system, the Department may waive the requirement to submit a press release to newspaper, television, and radio stations as specified in 11.17(8)(c)(ii)(G).

(vii) The supplier may discontinue the distribution of public education materials if the supplier has met the lead action level in the most recent six-month tap sampling monitoring period.

(A) If the lead action level is subsequently exceeded during any monitoring period, the supplier must resume distribution of public education materials meeting the content and distribution requirements specified in 11.17(8)(b) and 11.17(8)(c), respectively.

(viii) For community water systems, the supplier must send copies of the public education materials meeting the content requirements specified in under 11.17(8)(b) of this section to local health agencies on an annual basis for actions conducted in the previous calendar year.

(A) By no later than July 1 of the following calendar year, the supplier must provide the public education materials information to local health agencies by mail or by another Department-approved method.

(d) Distribution of Public Education Materials for Non-Transient, Non-Community Water Systems

(i) For non-transient, non-community water systems, the supplier must distribute public education materials as specified in this section, 11.17(8)(d). The public education materials distributed must meet the content requirements specified in 11.17(8)(b).

(ii) No later than 60 days after the end of the tap sampling period in which the lead action level exceedance occurred, the supplier must:

(A) Post informational posters about lead in drinking water in a public place or common area in each of the buildings supplied by the system; and

(B) Distribute informational pamphlets and/or brochures about lead in drinking water to each individual supplied by the system. The Department may allow the supplier to use electronic transmission and/or printed materials as long as the same coverage is achieved.

(iii) If needed for implementation purposes, the Department may extend the 60-day deadline for the requirements specified in 11.17(8)(d)(ii) on a case-by-case basis, only if the extension is approved in writing before the deadline.

(iv) The supplier must repeat the tasks as specified in 11.17(8)(d)(ii) at least once during each calendar year that the lead action level is exceeded.

(v) The supplier may discontinue the distribution of public education materials if the supplier has met the lead action level in the most recent six-month tap sampling monitoring period.

(A) If the lead action level is subsequently exceeded during any tap sampling period, the supplier must resume the distribution of public education materials as specified in this section, 11.17(8)(d).

(e) Reporting Requirements for Public Education Materials

(i) The supplier must submit all written public education materials to the Department before distribution.

(A) If the Department requires the supplier to obtain approval for the content of written public education materials before distribution, the Department shall notify the supplier of this requirement no later than 15 days after receiving the lead and copper tap sample results.

(ii) No later than the 10th of the month following the end of each period that the supplier was required to complete public education tasks, the supplier must submit documentation to the Department that includes all of the following information:

(A) A copy of the public education materials that meet the content requirements specified in 11.17(8)(b).

(B) Certification that the applicable distribution requirements, specified in 11.17(8)(c) or 11.17(8)(d), were met.

(C) A list of all the newspapers, radio stations, television stations, and facilities and organizations to which the supplier distributed public education materials.

(I) If this list was previously submitted to the Department and there have been no changes, the supplier is not required to resubmit this information unless required by the Department. The supplier must certify that the public education materials were distributed to the same list previously submitted.

(f) Treatment Technique Violations and Response for Public Education Requirements

(i) If the supplier fails to comply with any of the content or distribution requirements as specified in 11.17(8)(b-d) for public education materials, a treatment technique violation occurs.

(ii) In the event of a treatment technique violation, the supplier must:

(A) Notify the Department no later than 48 hours after the violation occurs; and

(B) Distribute Tier 2 public notice as specified in 11.33.

11.17(9) Monitoring for Lead in Schools and Child Care Facilities

(a) For all community water systems, the supplier must provide public education and lead monitoring as specified in this section, 11.17(9), at schools and child care facilities they serve which were constructed prior to January 1, 2014 and which are not regulated as a public water system.

(i) By October 16, 2024, the supplier must compile a list of schools and child care facilities supplied by the system and submit it to the Department.

(ii) If the system does not serve any schools or child care facilities that meet the criteria specified in 11.17(9)(a), the supplier must certify to the Department by October 16, 2024 that they do not serve any schools or child care facilities.

(b) Public Education to Schools and Child Care Facilities

(i) The supplier must provide all of the following to elementary schools and child care facilities identified in 11.17(9)(a)(i):

(A) At least annually, information about health risks from lead in drinking water that meets the requirements specified in 11.17(8)(b)(B,C,D,F) and (G) if applicable.

(B) Notification that the supplier is required to sample for lead at elementary schools and child care facilities, including all of the following:

(I) A proposed schedule for sampling at the facility.

(II) Information about sampling for lead in schools and child care facilities (EPA's 3Ts for Reducing Lead in Drinking Water Toolkit, EPA-815-B-18-007 or subsequent EPA guidance).

(III) At least 30 days prior to the sampling event, instructions for identifying taps for sampling and preparing for a sampling event.

(ii) The supplier must include documentation in accordance with 11.17(9)(h)(ii)(C) if an elementary school or child care facility is non-responsive or otherwise declines to participate in the monitoring or education requirements.

(A) A school or child care facility is considered non-responsive after the supplier makes at least two separate good faith attempts to contact the facility to schedule sampling with no response.

(iii) The supplier must contact all secondary schools identified in 11.17(9)(a)(i) at least annually to provide information on health risks from lead in drinking water and how to request lead sampling as specified in 11.17(9)(g).

(c) Lead Sampling in Schools and Child Care Facilities

(i) The supplier must collect lead tap samples at schools and child care facilities from taps typically used for consumption as follows:

(A) Five samples per school at the following locations:

(I) Two drinking water fountains.

(II) One kitchen faucet used for food or drink preparation.

(III) One classroom faucet or other tap used for drinking.

(IV) One nurse's office faucet, as available.

(B) Two samples per child care facility at the following locations:

(I) One drinking water fountain; and

(II) One of either a kitchen faucet used for preparation of food or drink or one classroom faucet or other tap used for drinking.

(C) If any facility has fewer than the required number of taps, the supplier must sample all taps used for consumption.

(D) The supplier may sample at taps with POU devices if the facility has POU devices installed on all taps typically used for consumption.

(E) If any facility does not contain the type of faucets listed above, the supplier must collect a sample from another tap typically used for consumption as identified by the facility.

(F) The supplier must collect first-draw tap samples for lead as follows:

(I) Samples collected from a tap other than a drinking water fountain must be from a cold water tap, if available.

(II) Samples must be 250 ml in volume.

(III) The water must have stood motionless in the plumbing system of the sampling site (building) for at least 8 hours but no more than 18 hours.

(IV) Samples must be analyzed using acidification and the corresponding analytical methods as specified in 11.46(9).

(ii) The supplier may allow the school or child care facility or other appropriately trained individual to collect first-draw tap samples after instructing them on the proper sampling procedures.

(d) Frequency of Sampling at Schools and Child Care Facilities

(i) The supplier must collect samples from at least 20 percent of elementary schools supplied by the system and 20 percent of child care facilities supplied by the system per year, or according to a Department-approved schedule, until all elementary schools and child care facilities identified under 11.17(9)(a)(i) have been sampled or have declined to participate.

(A) The supplier may count a refusal or non-response from an elementary school or child care facility as part of the minimum 20 percent per year.

(ii) The supplier must collect at least one round of lead samples from each elementary school and child care facility between October 16, 2024 and October 16, 2029, unless there are refusals or non-responses from the elementary school or child care facility.

(iii) After the supplier has completed one required cycle of sampling at all elementary schools and child care facilities, the supplier must sample upon request of an elementary school or child care facility as specified in 11.17(9)(g).

(iv) The supplier must sample upon request of a secondary school as specified in 11.17(9)(g). If the supplier receives requests from more than 20 percent of secondary schools identified in 11.17(9)(a)(i) in any of the five years following the October 16, 2024 compliance date, the supplier may schedule the requests that exceed 20 percent for the following year.

(A) The supplier is not required to sample an individual secondary school more than once in the five-year period.

(e) Alternative School and Child Care Lead Sampling Programs

(i) The Department may grant a waiver from the requirements of this section, 11.17(9), if mandatory sampling for lead in drinking water is conducted at schools and child care facilities supplied by a community water system due to a State or local law or program and the following criteria are met:

(A) The sampling is consistent with the requirements specified in 11.17(9)(c-d); or

(B) The sampling is consistent with the requirements specified in 11.17(9)(c)(i) and 11.17(9)(d) and it is combined with one or more of the following remediation actions:

(I) Disconnection of affected fixtures.

(II) Replacement of affected fixtures with fixtures certified as lead free.

(III) Installation of POU devices; or

(C) The sampling is conducted in schools and child care facilities supplied by the system less frequently than once every five years and it is combined with any of the remediation actions specified in 11.17(9)(e)(i)(B)(I-III); or

(D) The sampling is conducted under a grant awarded under Section 1464(d) of the SDWA, consistent with the requirements of the grant.

(ii) If the supplier is granted a waiver, the duration of the waiver may not exceed the time period covered by the mandatory or voluntary sampling and will automatically expire at the end of any 12-month period during which sampling is not conducted at the required number of schools or child care facilities.

(iii) The Department may issue a partial waiver to the supplier if the sampling covers only a portion of the schools or child care facilities supplied by the system identified in 11.17(9)(a)(i).

(iv) The Department may issue a written waiver applicable to more than one supplier (e.g., one waiver for all suppliers subject to a statewide sampling program that meets the requirements of this section, 11.17(9)(e)).

(v) The Department may not issue a waiver to the supplier for sampling that was conducted in schools or child care facilities prior to October 16, 2024.

(f) Notification of Results from Schools and Child Care Facilities

(i) The supplier must provide lead tap sample results as soon as possible but no later than 30 days after receipt of the results to the school or child care facility, along with information about remediation options.

(ii) The supplier must provide lead tap sample results annually to:

(A) The appropriate local and State public health authorities; and

(B) The Department, as specified in 11.17(9)(h).

(g) Lead Sampling in Schools and Child Care Facilities upon Request

(i) The supplier must contact schools and child care facilities identified in 11.17(9)(a)(i) at least annually to provide all of the following information:

(A) An explanation of the health risks from lead in drinking water.

(B) How to request sampling for lead at the facility; and

(C) Information about sampling for lead in schools and child care facilities (EPA's 3Ts for Reducing Lead in Drinking Water Toolkit, EPA-815-B-18-007, or subsequent EPA guidance).

(ii) The supplier must conduct sampling as specified in 11.17(9)(c) when requested by the facility and provide all of the following:

(A) At least 30 days prior to the sampling event, instructions for identifying taps for sampling and preparing for a sampling event; and

(B) Lead tap sample results as specified in 11.17(9)(f).

(iii) If the supplier receives requests from more than 20 percent of the schools and child care facilities, including secondary schools, identified in 11.17(9)(a)(i) in a given year, the supplier may schedule sampling for those that exceed 20 percent for the following year.

(A) The supplier is not required to sample an individual school or child care facility more than once every five years.

(iv) If voluntary sampling for lead in drinking water is conducted for schools and child care facilities supplied by a community water system that meets the requirements of this section, 11.17(9), the Department may exempt the supplier from the requirements of this section by issuing a written waiver in accordance with 11.17(9)(e).

(h) Reporting Requirements for Public Education and Sampling in Schools and Childcare Facilities

(i) The supplier must either certify that there have been no changes to the list of schools and child care facilities supplied by the system and developed pursuant to 11.17(9)(a)(i), or submit a revised list at least once every five years.

(ii) No later than July 1 of each calendar year, the supplier must submit a report to the Department documenting the public education and sampling activities conducted during the previous calendar year. The report must include all of the following:

(A) Certification that the supplier made a good faith effort to identify schools and child care facilities in accordance with 11.17(9)(h)(i). The good faith effort may include reviewing customer records and requesting lists of schools and child care facilities from the primacy agency or other licensing agency.

(I) If the supplier certifies that no schools or child care facilities are supplied by the water system, the supplier is not required to submit information required in 11.17(9)(h)(ii)(B-D) in the report.

(B) Certification that the supplier has distributed information about health risks from lead in drinking water to the schools and child care facilities that they serve in accordance with 11.17(9)(b)(i) and 11.17(9)(g)(i).

(C) Certification that the supplier has completed the notification and sampling requirements of 11.17(9) at a minimum of 20 percent of elementary schools and 20 percent of child care facilities, including all of the following information:

(I) The number of schools and child care facilities supplied by the water system.

(II) The number of schools and child care facilities sampled in the calendar year.

(III) The number of schools and child care facilities that have refused sampling.

(IV) Information pertaining to outreach attempts for sampling that were declined by the school or child care facility.

(V) The sample results for all schools and child care facilities sampled by the supplier in the calendar year.

(D) For secondary schools that requested sampling under 11.17(9)(g) and elementary schools and child care facilities that have successfully completed one cycle of required sampling, the supplier must submit the following information:

(I) The number of schools and child care facilities supplied by the water system.

(II) The number of schools and child care facilities sampled in the calendar year.

(III) The sample results for all schools and child care facilities sampled by the supplier in the calendar year.

(E) Certification that sample results were provided to schools, child care facilities, and local and State health departments.

11.26 LEAD AND COPPER RULE

11.26(1) Applicability and Definitions

(a) For all community and non-transient, non-community water systems, the supplier must comply with the requirements specified in this rule until October 16, 2024, unless otherwise specified.

(i) The supplier must comply with the lead and copper tap sampling requirements as specified in 11.26(2) and water quality parameter monitoring requirements as specified in 11.26(4) until December 31, 2024.

(ii) Any actions and deadlines under 11.26 due after October 16, 2024 based on monitoring conducted under 11.26(2) shall remain in effect unless the Department notifies the supplier in writing of new requirements and deadlines under 11.17.

(iii) In the event EPA stays or extends the requirements in 40 CFR 141, Subpart I referenced in 11.17, the applicable requirements of 11.26 shall remain in effect until the compliance date in 40 CFR 141.

******

11.27 COMPOSITING SAMPLES RULE

******

11.27(4) Compositing Samples for Lead and Copper Entry Point Samples

(a) To composite lead and copper entry point samples collected under 11.17 or 11.26, the supplier must comply with the requirements specified in this section 11.27(4).

(b) The supplier may composite samples from no more than five entry points.

(c) Compositing of samples must be performed by certified laboratory personnel.

(d) If the lead concentration in the composite sample is greater than or equal to (≥) 0.001 mg/L or the copper concentration in the composite sample is greater than or equal to (≥) 0.160 mg/L, the supplier must collect confirmation samples no later than 14 days after receiving notification of the composite result.

(i) Instead of collecting confirmation samples, the supplier may use one of the following:

(A) Duplicates of each original sample used in the composite sample.

(B) The original samples used in the composite sample, if a sufficient volume is available.

******

11.33 PUBLIC NOTIFICATION RULE

11.33(1) Applicability and Definitions

(a) For all public water systems, the supplier must comply with the public notice requirements specified in this rule for the violations or situations specified in Table 11.33-I.

TABLE 11.33-I VIOLATION CATEGORIES AND OTHER SITUATIONS REQUIRING A PUBLIC NOTICE	
CPDWR violations	Failure to comply with an MCL or MRDL
	Failure to comply with a treatment technique requirement
	Failure to perform required water quality monitoring
	Failure to comply with required testing procedures
Variance or exemption under 11.43	Operation under a variance or an exemption
	Failure to comply with the terms and schedule of any variance or exemption
Other situations requiring public notice	Occurrence of a waterborne disease outbreak or other waterborne emergency
	Exceedance of the elevated nitrate MCL by non-community water systems, when granted Department approval as specified in 11.18(2)(d)
	Exceedance of the secondary maximum contaminant level for fluoride
	Availability of unregulated contaminant monitoring data
	Repeated failure to sample the source water for *Cryptosporidium*

	Failure to determine bin classification
	Groundwater systems with a waiver from disinfection requirements under 11.13
	Significant deficiencies identified at non-community groundwater systems
	Exceedance of the lead action level
	Other violations and situations determined by the Department to require a public notice

(b) Public notice requirements are divided into three tiers based on the seriousness of the violation or situation and any potential public health effects. Each tier has different requirements. The tiers are as follows:

(i) "TIER 1 PUBLIC NOTICE" means the public notice required for violations and situations with significant potential to have serious adverse effects on public health as a result of short-term exposure.

(ii) "TIER 2 PUBLIC NOTICE" means the public notice required for violations and situations with potential to have serious adverse effects on public health.

(iii) "TIER 3 PUBLIC NOTICE" means the public notice required for all other violations and situations not included in Tier 1 or Tier 2.

11.33(2) Tier 1 Public Notice Form, Manner, and Frequency of Notice

(a) The supplier must distribute Tier 1 public notice for the following violations or situations specified in Table 11.33-II:

TABLE 11.33-II VIOLATION CATEGORIES AND OTHER SITUATIONS REQUIRING TIER 1 PUBLIC NOTICE

Violation or Situation Description	As specified in
Failure to test for fecal coliforms or *E. coli* following a total coliform-positive repeat sample	11.16(4)(e)
Violation of the *E. coli* MCL	11.16(11)(a)
Violation of the nitrate, nitrite, or total nitrate and nitrite MCL	11.18(5)(a)
Failure to collect a confirmation sample no later than 24 hours after a nitrate or nitrite sample result greater than (>) the MCL	11.18(3)(b)(vii) and 11.18(3)(c)(v)
Exceedance of the elevated nitrate MCL by non-community water systems, permitted to exceed the MCL by the Department	11.18(2)(d)
Acute violation of the chlorine dioxide MRDL	11.23(2)(e)(i)(A)
Failure to collect the required chlorine dioxide samples in the distribution system	11.23(2)(e)(i)(B)
Violation of the maximum turbidity limit treatment technique requirement, as required by the Department after consultation	11.8(2)(d)(i)(B)
Occurrence of a waterborne disease outbreak or other waterborne emergency (e.g. failure or significant interruption in key water treatment processes, a natural disaster that disrupts the water supply or distribution system, or a chemical spill or unexpected loading of possible pathogens into the source water that significantly increases the potential for drinking water contamination)	.
For groundwater systems, presence of *E. coli*, enterococci, or coliphage in a source water sample	11.11(4)(d)(i) and 11.11(5)(c)(i)
Exceedance of the lead action level	11.17(3)(b)
Other violations or situations with significant potential to have serious adverse effects on public health as a result of short-term exposure, as determined by the Department either in *Colorado Primary Drinking Water Regulations* or on a case-by-case basis	.

******

11.33(7) Public Notice Reporting Requirements

No later than 10 calendar days after completing initial or repeat public notice requirements, the supplier must submit a certification that states that the supplier has fully complied with the public notice requirements.

(a) The supplier must include a representative copy of each public notice distributed, published, posted, and/or made available to consumers and the media.

TABLE 11.33-V TABLE OF CPDWR VIOLATIONS AND OTHER SITUATIONS REQUIRING PUBLIC NOTICE[1]				
Contaminant	MCL/MRDL/TT violations		Monitoring & testing procedure violations	
	Tier of public notice required	Citation	Tier of public notice required	Citation
Violations of *Colorado Primary Drinking Water Regulations*[2]				
Microbiological Contaminants				
Total coliform (TT violations resulting from failure to conduct assessments or corrective actions, and violations resulting from failure to monitor or report)	2	11.16(11)(b)	3	11.16(11)(c-d) 11.16(12)(b)
Seasonal system failure to follow Department-approved start-up procedures before supplying water to the public or failure to submit certification of completed start-up procedures	2	11.16(11)(b)(ii)	3	11.16(11)(d)(iii)
E. coli (MCL violation, monitoring violations, and reporting violations)	1	11.16(11)(a)	3	11.16(11)(c) 11.16(11)(d) 11.16(12)(a) 11.16(12)(c)
E. coli (TT violations resulting from failure to conduct Level 2 assessments or corrective action)	2	11.16(11)(b)(i)	N/A	N/A
Turbidity MCL	2	11.8(2)(d)	3	11.8(2)(c)
Turbidity (for TT violations resulting from a single exceedance of maximum allowable turbidity level)	2, 1[3]	11.8(2)(d)	3	11.8(2)(c), 11.8(2)(g), 11.46(7)
Surface Water Treatment Rule violations, other than violations resulting from single exceedance of maximum allowable turbidity level (TT)	2	11.8(2)(b)	3	11.8(2)(c), 11.46(7)
Surface Water Treatment Rule: Filter Backwash Recycle Rule	2	11.9(2)	3	11.9(3)
Surface Water Treatment Rule: Enhanced Treatment for *Cryptosporidium* Rule	2	11.10(3)(c), 11.10(4)(b)	2, 3[4]	11.10(2)
Groundwater Rule	2	11.11(2)(d), 11.11(6)(c), 11.11(3)(e)(i), 11.38(4)	3	11.11(2)(c), 11.11(3), 11.11(4), 11.11(5), 11.11(6), 11.38(4)

TABLE 11.33-V TABLE OF CPDWR VIOLATIONS AND OTHER SITUATIONS REQUIRING PUBLIC NOTICE[1]

TABLE 11.33-V TABLE OF CPDWR VIOLATIONS AND OTHER SITUATIONS REQUIRING PUBLIC NOTICE[1]				
Contaminant	MCL/MRDL/TT violations		Monitoring & testing procedure violations	
	Tier of public notice required	Citation	Tier of public notice required	Citation
Other situations as determined by the Department	1, 2, 3[12]	N/A	N/A	N/A

1 Violations and other situations not listed in this table (e.g., failure to prepare Consumer Confidence Reports) do not require notice, unless otherwise determined by the Department. The Department may, at its discretion, also require a more stringent public notice tier (e.g., Tier 1 instead of Tier 2 or Tier 2 instead of Tier 3) for specific violations and situations specified in Table 11.33-V, as authorized under 11.33(2)(a) and 11.33(3)(a).

2 The term "Violations of Colorado Primary Drinking Water Regulations" is used here to include violations of MCL, MRDL, treatment technique, monitoring, and testing procedure requirements.

3 Systems with treatment technique violations involving a single exceedance of a maximum turbidity limit under 11.8(2)(b) are required to consult with the Department no later than 24 hours after learning of the violation. Based on this consultation, the Department may elevate the violation to Tier 1. If the supplier is unable to make contact with the Department in the 24-hour period, the violation is automatically elevated to Tier 1.

4 Failure to collect three or more samples for Cryptosporidium analysis requires a special Tier 2 public notice as specified in 11.10(2)(e). All other monitoring and testing procedure violations require Tier 3 public notice.

5 Failure to collect a confirmation sample no later than 24 hours for nitrate or nitrite after an initial sample exceeds the MCL requires Tier 1 public notice. Other monitoring violations for nitrate require Tier 3 public notice.

6 Failure to monitor for chlorine dioxide at the entry point the day after exceeding the MRDL at the entrance to the distribution system requires Tier 2 public notice.

7 If any daily sample collected at the entry point exceeds the MRDL for chlorine dioxide and one or more samples collected in the distribution system the next day exceed the MRDL, Tier 1 public notice is required. Failure to collect the required samples in the distribution system after the MRDL is exceeded at the entry point also triggers Tier 1 public notice.

8 Some water systems must monitor for certain unregulated contaminants under 11.47.

9 This citation refers to §§1415 and 1416 of the Safe Drinking Water Act. §§1415 and 1416 require that "a schedule prescribed . . . for a public water system granted a variance shall require compliance by the system . . ."

10 In addition to §§1415 and 1416 of the Safe Drinking Water Act, 11.43(3) of the Colorado Primary Drinking Water Regulations specifies the items and schedule milestones that must be included in a variance for small systems.

11 Other waterborne emergencies require a Tier 1 public notice under 33.2(a) for situations that do not meet the definition of a waterborne disease outbreak specified in 11.3, but that still have the potential to have serious adverse effects on health as a result of short-term exposure. These could include outbreaks not related to treatment deficiencies, as well as situations that have the potential to cause outbreaks, such as failures or significant interruption in water treatment processes, natural disasters that disrupt the water supply or distribution system, chemical spills, or unexpected loading of possible pathogens into the source water.

12 The Department may place other situations in any tier believed appropriate, based on threat to public health.

TABLE 11.33-VI TABLE OF STANDARD HEALTH EFFECTS LANGUAGE FOR PUBLIC NOTIFICATION			
Contaminant	MCLG mg/L	MCL mg/L	Standard health effects language for public notification
Colorado Primary Drinking Water Regulations			
Microbiological Contaminants			
Fecal Indicators (GWR) 1. *E. coli* 2. Enterococci 3. Coliphage)	None	TT	Fecal indicators are microbes whose presence indicates that the water may be contaminated with human or animal wastes. Microbes in these wastes can cause short- term health effects, such as diarrhea, cramps, nausea, headaches, or other symptoms. They may pose a special health risk for infants, young children, some of the elderly, and people with severely compromised immune systems.
Groundwater Rule (GWR) TT violations	None	TT	Inadequately treated or inadequately protected water may contain disease-causing organisms. These organisms can cause symptoms such as diarrhea, nausea, cramps, and associated headaches.
A violation that occurred for failure to conduct an assessment not triggered by the presence of *E. coli* and/or violations for corrective action		TT	Coliforms are bacteria that are naturally present in the environment and are used as an indicator that other, potentially harmful, waterborne pathogens may be present or that a potential pathway exists through which contamination may enter the drinking water distribution system. We found coliforms indicating the need to look for potential problems in water treatment or distribution. When this occurs, we are required to conduct assessments to identify problems and to correct any problems that are found. [THE SUPPLIER MUST ALSO INCLUDE THE FOLLOWING APPLICABLE SENTENCES.] We failed to conduct the required assessment. We failed to correct all identified sanitary defects that were found during the assessment(s).

TABLE 11.33-VI TABLE OF STANDARD HEALTH EFFECTS LANGUAGE FOR PUBLIC NOTIFICATION			
Contaminant	MCLG mg/L	MCL mg/L	Standard health effects language for public notification
A violation that occurred for failure to conduct an assessment triggered by the presence of *E. coli* and/or violations for corrective action[3]		TT	*E. coli* are bacteria whose presence indicates that the water may be contaminated with human or animal wastes. Human pathogens in these wastes can cause short-term effects, such as diarrhea, cramps, nausea, headaches, or other symptoms. They may pose a greater health risk for infants, young children, the elderly, and people with severely compromised immune systems. We violated the standard for *E. coli,* indicating the need to look for potential problems in water treatment or distribution. When this occurs, we are required to conduct a detailed assessment to identify problems and to correct any problems that are found. [THE SUPPLIER MUST ALSO INCLUDE THE FOLLOWING APPLICABLE SENTENCES.] We failed to conduct the required assessment. We failed to correct all identified sanitary defects that were found during the assessment that we conducted.
E. coli MCL violations	Zero	See footnote 2	*E. coli* are bacteria whose presence indicates that the water may be contaminated with human or animal wastes. Human pathogens in these wastes can cause short-term effects, such as diarrhea, cramps, nausea, headaches, or other symptoms. They may pose a greater health risk for infants, young children, the elderly, and people with severely compromised immune systems.
A violation occurred for failure to conduct seasonal start-up procedures	None	TT	Failure to perform the required start-up procedures prior to serving water to the public has the potential to distribute contaminated water. When our system shuts down operation, the lack of pressure in our pipes can allow the entry of bacteria and other disease-causing microorganisms into the drinking water. By performing start-up procedures such as flushing the pipes, disinfecting the water, and collecting a coliform bacteria sample before we open, we can be sure that we are providing you with safe water.
Turbidity	None	TT	Turbidity has no health effects. However, turbidity can interfere with disinfection and provide a medium for microbial growth. Turbidity may indicate the presence of disease-causing organisms. These organisms include bacteria, viruses, and parasites that can cause symptoms such as nausea, cramps, diarrhea and associated headaches.
Disinfectant residual	N/A	TT (in the distribution system)	Disinfectant residual serves as one of the final barriers to protect public health. Lack of an adequate disinfectant residual may increase the likelihood that disease-causing organisms are present.
Surface Water Treatment Rule, Surface Water Treatment Rule: Filter Backwash Recycle Rule, and Surface Water Treatment Rule: Enhanced Treatment for Cryptosporidium Rule violations			
Giardia lamblia	Zero	TT[3]	Inadequately treated water may contain disease-causing organisms. These organisms include bacteria, viruses, and parasites, which can cause symptoms such as nausea, cramps, diarrhea, and associated headaches.
Viruses			
Heterotrophic plate count (HPC) bacteria[4]			

TABLE 11.33-VI TABLE OF STANDARD HEALTH EFFECTS LANGUAGE FOR PUBLIC NOTIFICATION			
Contaminant	MCLG mg/L	MCL mg/L	Standard health effects language for public notification
Legionella			
Cryptosporidium			
Inorganic Chemicals			
Antimony	0.006	0.006	Some people who drink water containing antimony well in excess of the MCL over many years could experience increases in blood cholesterol and decreases in blood sugar.
Arsenic	0	0.010	Some people who drink water containing arsenic in excess of the MCL over many years could experience skin damage or problems with their circulatory system, and may have an increased risk of getting cancer.
Asbestos (10 µm)	7 MFL	7 MFL	Some people who drink water containing asbestos in excess of the MCL over many years may have an increased risk of developing benign intestinal polyps.
Barium	2	2	Some people who drink water containing barium in excess of the MCL over many years could experience an increase in their blood pressure.
Beryllium	0.004	0.004	Some people who drink water containing beryllium well in excess of the MCL over many years could develop intestinal lesions.
Cadmium	0.005	0.005	Some people who drink water containing cadmium in excess of the MCL over many years could experience kidney damage.
Chromium (total)	0.1	0.1	Some people who use water containing chromium well in excess of the MCL over many years could experience allergic dermatitis.
Cyanide	0.2	0.2	Some people who drink water containing cyanide well in excess of the MCL over many years could experience nerve damage or problems with their thyroid.
Fluoride	4.0	4.0	Some people who drink water containing fluoride in excess of the MCL over many years could get bone disease, including pain and tenderness of the bones. Fluoride in drinking water at half the MCL or more may cause mottling of children's teeth, usually in children less than nine years old. Mottling, also known as dental fluorosis, may include brown staining and/or pitting of the teeth, and occurs only in developing teeth before they erupt from the gums.
Mercury (inorganic)	0.002	0.002	Some people who drink water containing inorganic mercury well in excess of the MCL over many years could experience kidney damage.
Nitrate	10	10	Infants below the age of six months who drink water containing nitrate in excess of the MCL could become seriously ill and, if untreated, may die. Symptoms include shortness of breath and blue baby syndrome.
Nitrite	1	1	Infants below the age of six months who drink water containing nitrite in excess of the MCL could become seriously ill and, if untreated, may die. Symptoms include shortness of breath and blue baby syndrome.

TABLE 11.33-VI TABLE OF STANDARD HEALTH EFFECTS LANGUAGE FOR PUBLIC NOTIFICATION			
Contaminant	MCLG mg/L	MCL mg/L	Standard health effects language for public notification
Total Nitrate and Nitrite	10	10	Infants below the age of six months who drink water containing nitrate and nitrite in excess of the MCL could become seriously ill and, if untreated, may die. Symptoms include shortness of breath and blue baby syndrome.
Selenium	0.05	0.05	Selenium is an essential nutrient. However, some people who drink water containing selenium in excess of the MCL over many years could experience hair or fingernail losses, numbness in fingers or toes, or problems with their circulation.
Thallium	0.0005	0.002	Some people who drink water containing thallium in excess of the MCL over many years could experience hair loss, changes in their blood, or problems with their kidneys, intestines, or liver.
Lead and Copper			
Lead	Zero	TT[5]	Exposure to lead in drinking water can cause serious health effects in all age groups. Infants and children can have decreases in IQ and attention span. Lead exposure can lead to new learning and behavior problems or exacerbate existing learning and behavior problems. The children of women who are exposed to lead before or during pregnancy can have increased risk of these adverse health effects. Adults can have increased risks of heart disease, high blood pressure, kidney or nervous system problems.
Copper	1.3	TT[6]	Copper is an essential nutrient, but some people who drink water containing copper in excess of the action level over a relatively short amount of time could experience gastrointestinal distress. Some people who drink water containing copper in excess of the action level over many years could suffer liver or kidney damage. People with Wilson's Disease should consult their personal doctor.
Synthetic Organic Chemicals (SOCs)			
2,4–D	0.07	0.07	Some people who drink water containing the weed killer 2,4–D well in excess of the MCL over many years could experience problems with their kidneys, liver, or adrenal glands.
2,4,5–TP (Silvex)	0.05	0.05	Some people who drink water containing silvex in excess of the MCL over many years could experience liver problems.
Alachlor	Zero	0.002	Some people who drink water containing alachlor in excess of the MCL over many years could have problems with their eyes, liver, kidneys, or spleen, or experience anemia, and may have an increased risk of getting cancer.
Atrazine	0.003	0.003	Some people who drink water containing atrazine well in excess of the MCL over many years could experience problems with their cardiovascular system or reproductive difficulties.
Benzo(a)pyrene (PAHs)	Zero	0.0002	Some people who drink water containing benzo(a)pyrene in excess of the MCL over many years may experience reproductive difficulties and may have an increased risk of getting cancer.
Carbofuran	0.04	0.04	Some people who drink water containing carbofuran in excess of the MCL over many years could experience problems with their blood, or nervous or reproductive systems.

TABLE 11.33-VI TABLE OF STANDARD HEALTH EFFECTS LANGUAGE FOR PUBLIC NOTIFICATION			
Contaminant	MCLG mg/L	MCL mg/L	Standard health effects language for public notification
Chlordane	Zero	0.002	Some people who drink water containing chlordane in excess of the MCL over many years could experience problems with their liver or nervous system, and may have an increased risk of getting cancer.
Dalapon	0.2	0.2	Some people who drink water containing dalapon well in excess of the MCL over many years could experience minor kidney changes.
Di (2-ethylhexyl) adipate	0.4	0.4	Some people who drink water containing di (2-ethylhexyl) adipate well in excess of the MCL over many years could experience general toxic effects such as weight loss, liver enlargement or possible reproductive difficulties.
Di (2-ethylhexyl) phthalate	Zero	0.006	Some people who drink water containing di (2-ethylhexyl) phthalate well in excess of the MCL over many years may have problems with their liver, or experience reproductive difficulties, and may have an increased risk of getting cancer.
Dibromochloro-propane (DBCP)	Zero	0.0002	Some people who drink water containing DBCP in excess of the MCL over many years could experience reproductive difficulties and may have an increased risk of getting cancer.
Dinoseb	0.007	0.007	Some people who drink water containing dinoseb well in excess of the MCL over many years could experience reproductive difficulties.
Dioxin (2,3,7,8-TCDD)	Zero	$3x10^{-8}$	Some people who drink water containing dioxin in excess of the MCL over many years could experience reproductive difficulties and may have an increased risk of getting cancer.
Diquat	0.02	0.02	Some people who drink water containing diquat in excess of the MCL over many years could get cataracts.
Endothall	0.1	0.1	Some people who drink water containing endothall in excess of the MCL over many years could experience problems with their stomach or intestines.
Endrin	0.002	0.002	Some people who drink water containing endrin in excess of the MCL over many years could experience liver problems.
Ethylene dibromide	Zero	0.00005	Some people who drink water containing ethylene dibromide in excess of the MCL over many years could experience problems with their liver, stomach, reproductive system, or kidneys, and may have an increased risk of getting cancer.
Glyphosate	0.7	0.7	Some people who drink water containing glyphosate in excess of the MCL over many years could experience problems with their kidneys or reproductive difficulties.
Heptachlor	Zero	0.0004	Some people who drink water containing heptachlor in excess of the MCL over many years could experience liver damage and may have an increased risk of getting cancer.
Heptachlor epoxide	Zero	0.0002	Some people who drink water containing heptachlor epoxide in excess of the MCL over many years could experience liver damage, and may have an increased risk of getting cancer.
Hexachlorobenzene	Zero	0.001	Some people who drink water containing hexachlorobenzene in excess of the MCL over many years could experience problems with their liver or kidneys, or adverse reproductive effects, and may have an increased risk of getting cancer.

TABLE 11.33-VI TABLE OF STANDARD HEALTH EFFECTS LANGUAGE FOR PUBLIC NOTIFICATION			
Contaminant	MCLG mg/L	MCL mg/L	Standard health effects language for public notification
Hexachlorocyclo-pentadiene	0.05	0.05	Some people who drink water containing hexachlorocyclopentadiene well in excess of the MCL over many years could experience problems with their kidneys or stomach.
Lindane	0.0002	0.0002	Some people who drink water containing lindane in excess of the MCL over many years could experience problems with their kidneys or liver.
Methoxychlor	0.04	0.04	Some people who drink water containing methoxychlor in excess of the MCL over many years could experience reproductive difficulties.
Oxamyl (Vydate)	0.2	0.2	Some people who drink water containing oxamyl in excess of the MCL over many years could experience slight nervous system effects.
Pentachlorophenol	Zero	0.001	Some people who drink water containing pentachlorophenol in excess of the MCL over many years could experience problems with their liver or kidneys, and may have an increased risk of getting cancer.
Picloram	0.5	0.5	Some people who drink water containing picloram in excess of the MCL over many years could experience problems with their liver.
Polychlorinated biphenyls (PCBs)	Zero	0.0005	Some people who drink water containing PCBs in excess of the MCL over many years could experience changes in their skin, problems with their thymus gland, immune deficiencies, or reproductive or nervous system difficulties, and may have an increased risk of getting cancer.
Simazine	0.004	0.004	Some people who drink water containing simazine in excess of the MCL over many years could experience problems with their blood.
Toxaphene	Zero	0.003	Some people who drink water containing toxaphene in excess of the MCL over many years could have problems with their kidneys, liver, or thyroid, and may have an increased risk of getting cancer.
Volatile Organic Chemicals (VOCs)			
Benzene	Zero	0.005	Some people who drink water containing benzene in excess of the MCL over many years could experience anemia or a decrease in blood platelets, and may have an increased risk of getting cancer.
Carbon tetrachloride	Zero	0.005	Some people who drink water containing carbon tetrachloride in excess of the MCL over many years could experience problems with their liver and may have an increased risk of getting cancer.
Chlorobenzene (monochloro- benzene)	0.1	0.1	Some people who drink water containing chlorobenzene in excess of the MCL over many years could experience problems with their liver or kidneys.
o-Dichlorobenzene	0.6	0.6	Some people who drink water containing o-dichlorobenzene well in excess of the MCL over many years could experience problems with their liver, kidneys, or circulatory systems.
p-Dichlorobenzene	0.075	0.075	Some people who drink water containing p-dichlorobenzene in excess of the MCL over many years could experience anemia, damage to their liver, kidneys, or spleen, or changes in their blood.
1,2-Dichloroethane	Zero	0.005	Some people who drink water containing 1,2-dichloroethane in excess of the MCL over many years may have an increased risk of getting cancer.

TABLE 11.33-VI TABLE OF STANDARD HEALTH EFFECTS LANGUAGE FOR PUBLIC NOTIFICATION			
Contaminant	MCLG mg/L	MCL mg/L	Standard health effects language for public notification
1,1-Dichloroethylene	0.007	0.007	Some people who drink water containing 1,1-dichloroethylene in excess of the MCL over many years could experience problems with their liver.
cis-1,2-Dichloroethylene	0.07	0.07	Some people who drink water containing cis-1,2-dichloroethylene in excess of the MCL over many years could experience problems with their liver.
trans-1,2-Dichloroethylene	0.1	0.1	Some people who drink water containing trans-1,2-dichloroethylene well in excess of the MCL over many years could experience problems with their liver.
Dichloromethane	Zero	0.005	Some people who drink water containing dichloromethane in excess of the MCL over many years could have liver problems and may have an increased risk of getting cancer.
1,2-Dichloropropane	Zero	0.005	Some people who drink water containing 1,2-dichloropropane in excess of the MCL over many years may have an increased risk of getting cancer.
Ethylbenzene	0.7	0.7	Some people who drink water containing ethylbenzene well in excess of the MCL over many years could experience problems with their liver or kidneys.
Styrene	0.1	0.1	Some people who drink water containing styrene well in excess of the MCL over many years could have problems with their liver, kidneys, or circulatory system.
Tetrachloroethylene	Zero	0.005	Some people who drink water containing tetrachloroethylene in excess of the MCL over many years could have problems with their liver, and may have an increased risk of getting cancer.
Toluene	1	1	Some people who drink water containing toluene well in excess of the MCL over many years could have problems with their nervous system, kidneys, or liver.
1,2,4-Trichlorobenzene	0.07	0.07	Some people who drink water containing 1,2,4-trichlorobenzene well in excess of the MCL over many years could experience changes in their adrenal glands.
1,1,1-Trichloroethane	0.2	0.2	Some people who drink water containing 1,1,1-trichloroethane in excess of the MCL over many years could experience problems with their liver, nervous system, or circulatory system.
1,1,2-Trichloroethane	0.003	0.005	Some people who drink water containing 1,1,2-trichloroethane well in excess of the MCL over many years could have problems with their liver, kidneys, or immune systems.
Trichloroethylene	Zero	0.005	Some people who drink water containing trichloroethylene in excess of the MCL over many years could experience problems with their liver and may have an increased risk of getting cancer.
Vinyl chloride	Zero	0.002	Some people who drink water containing vinyl chloride in excess of the MCL over many years may have an increased risk of getting cancer.
Xylenes (total)	10	10	Some people who drink water containing xylenes in excess of the MCL over many years could experience damage to their nervous system.
Radionuclides			
Beta/photon emitters	Zero	4 mrem/yr	Certain minerals are radioactive and may emit forms of radiation known as photons and beta radiation. Some people who drink water containing beta and photon emitters in excess of the MCL over many years may have an increased risk of getting cancer.

TABLE 11.33-VI TABLE OF STANDARD HEALTH EFFECTS LANGUAGE FOR PUBLIC NOTIFICATION			
Contaminant	MCLG mg/L	MCL mg/L	Standard health effects language for public notification
Alpha emitters	Zero	15 pCi/L	Certain minerals are radioactive and may emit a form of radiation known as alpha radiation. Some people who drink water containing alpha emitters in excess of the MCL over many years may have an increased risk of getting cancer.
Combined radium (226 & 228)	Zero	5 pCi/L	Some people who drink water containing radium 226 or 228 in excess of the MCL over many years may have an increased risk of getting cancer.
Uranium	Zero	30µg/L	Some people who drink water containing uranium in excess of the MCL over many years may have an increased risk of getting cancer and kidney toxicity.
Disinfection Byproducts (DBPs), Disinfection Byproduct Precursors, Disinfectant Residuals Where disinfection is used in the treatment of drinking water, disinfectants combine with organic and inorganic matter present in water to form chemicals called disinfection byproducts (DBPs). The Department sets standards for controlling the levels of disinfectants and DBPs in drinking water, including trihalomethanes (THMs) and haloacetic acids (HAAs).[18]			
Total trihalomethanes (TTHMs)	N/A	0.080[7]	Some people who drink water containing trihalomethanes in excess of the MCL over many years may experience problems with their liver, kidneys, or central nervous system, and may have an increased risk of getting cancer.
Haloacetic Acids (HAA)	N/A	0.060[8]	Some people who drink water containing haloacetic acids in excess of the MCL over many years may have an increased risk of getting cancer.
Bromate	Zero	0.010	Some people who drink water containing bromate in excess of the MCL over many years may have an increased risk of getting cancer.
Chlorite	0.08	1.0	Some infants and young children who drink water containing chlorite in excess of the MCL could experience nervous system effects. Similar effects may occur in fetuses of pregnant women who drink water containing chlorite in excess of the MCL. Some people may experience anemia.
Chlorine	4 (MRDLG)	4.0 (MRDL)	Some people who use water containing chlorine well in excess of the MRDL could experience irritating effects to their eyes and nose. Some people who drink water containing chlorine well in excess of the MRDL could experience stomach discomfort.
Chloramines	4 (MRDLG)	4.0 (MRDL)	Some people who use water containing chloramines well in excess of the MRDL could experience irritating effects to their eyes and nose. Some people who drink water containing chloramines well in excess of the MRDL could experience stomach discomfort or anemia.

TABLE 11.33-VI TABLE OF STANDARD HEALTH EFFECTS LANGUAGE FOR PUBLIC NOTIFICATION			
Contaminant	MCLG mg/L	MCL mg/L	Standard health effects language for public notification
Chlorine dioxide, where any 2 consecutive daily samples collected at the entrance to the distribution system are above the MRDL.	0.8 (MRDLG)	0.8 (MRDL)	Some infants and young children who drink water containing chlorine dioxide in excess of the MRDL could experience nervous system effects. Similar effects may occur in fetuses of pregnant women who drink water containing chlorine dioxide in excess of the MRDL. Some people may experience anemia. Add for public notification only: The chlorine dioxide violations reported today are the result of exceedances at the treatment facility only, not within the distribution system, which delivers water to consumers. Continued compliance with chlorine dioxide levels within the distribution system minimizes the potential risk of these violations to consumers.
Chlorine dioxide, where one or more distribution system samples are above the MRDL.	0.8 (MRDLG)	0.8 (MRDL)	Some infants and young children who drink water containing chlorine dioxide in excess of the MRDL could experience nervous system effects. Similar effects may occur in fetuses of pregnant women who drink water containing chlorine dioxide in excess of the MRDL. Some people may experience anemia. Add for public notification only: The chlorine dioxide violations reported today include exceedances of the State standard within the distribution system, which delivers water to consumers. Violations of the chlorine dioxide standard within the distribution system may harm human health based on short-term exposures. Certain groups, including fetuses, infants, and young children, may be especially susceptible to nervous system effects from excessive chlorine dioxide exposure.
Control of DBP precursors (TOC)	None	TT	Total organic carbon (TOC) has no health effects. However, total organic carbon provides a medium for the formation of disinfection byproducts. These byproducts include trihalomethanes (THMs) and haloacetic acids (HAAs). Drinking water containing these by-products in excess of the MCL may lead to adverse health effects, liver or kidney problems, or nervous system effects, and may lead to an increased risk of getting cancer.
Other Treatment Techniques			
Acrylamide	Zero	TT	Some people who drink water containing high levels of acrylamide over a long period of time could have problems with their nervous system or blood, and may have an increased risk of getting cancer.
Epichlorohydrin	Zero	TT	Some people who drink water containing high levels of epichlorohydrin over a long period of time could experience stomach problems, and may have an increased risk of getting cancer.
Backflow Prevention and Cross-Connection Control Rule	None	TT	Uncontrolled cross-connections can lead to a back pressure or siphonage event that may allow contaminants or disease-causing organisms to enter the drinking water, which can cause diarrhea, nausea, cramps, and associated headaches.
Storage Tank Rule	None	TT	Inadequately maintained storage tanks, identified through inspections, may allow contaminants or disease-causing organisms to enter the drinking water, which can cause diarrhea, nausea, cramps, and associated headaches.
Failure to Correct a Significant Deficiency	None	TT	An uncorrected significant deficiency may allow contaminants or disease-causing organisms to enter the drinking water, which can cause diarrhea, nausea, cramps, and associated headaches.

TABLE 11.33-VI TABLE OF STANDARD HEALTH EFFECTS LANGUAGE FOR PUBLIC NOTIFICATION			
Contaminant	MCLG mg/L	MCL mg/L	Standard health effects language for public notification
Direct Potable Reuse Rule			
Critical control point for pathogen reduction of *Cryptosporidium*, *Giardia lamblia*, and/or viruses	None	TT	Inadequately treated water from direct potable reuse may contain disease-causing organisms. These organisms include bacteria, viruses, and parasites, which can cause symptoms such as nausea, cramps, diarrhea, and associated headaches
Critical control point for chemical reduction	None	TT	The direct potable reuse processes are intended to remove or reduce the following list of compounds (Target chemicals list from application). Inadequately treated water from direct potable reuse may contain elevated levels of the compounds above. These compounds can cause adverse health effects including (Target chemical health effects language as defined in the *Direct Potable Reuse Policy* and included in department approval). Inadequately treated water from direct potable reuse may also contain elevated levels of unknown compounds that may be present in treated wastewater. Because these chemicals are not identified, the health effects for these compounds are unknown.

1 If the supplier is collecting at least 40 samples per month, no more than 5.0 percent of the monthly samples may be positive for total coliforms. If the supplier is collecting fewer than 40 samples per month, no more than one sample per month may be positive for total coliforms.

2 E. coli-positive repeat sample following a total coliform-positive routine sample, total coliform-positive repeat sample following an E. coli-positive routine sample, failure to collect all required repeat samples following an E. coli-positive routine sample, or failure to analyze a total-coliform positive repeat sample for E. coli.

3 11.8 treatment technique violations that involve turbidity exceedances may use the health effects language for turbidity instead.

4 The bacteria detected by heterotrophic plate count (HPC) are not necessarily harmful. HPC is simply an alternative method of determining disinfectant residual levels. The number of such bacteria is an indicator of whether there is enough disinfection in the distribution system.

5 Action Level = 0.015 mg/L

6 Action Level = 1.3 mg/L

7 The MCL for total trihalomethanes is the sum of the concentrations of the individual trihalomethanes.

8 The MCL for haloacetic acids is the sum of the concentrations of the individual haloacetic acids.

11.34 CONSUMER CONFIDENCE REPORT (CCR) RULE

******

11.34(2) Content Requirements for the CCR

(a) General Content Requirements for the CCR

(i) The supplier must include data collected for compliance purposes during the previous calendar year in the CCR.

(A) If the supplier sampled for a contaminant less frequently than annually, the supplier must include the date and result(s) of the most recent sampling for that contaminant.

(I) The supplier must include a brief statement that explains that the data presented are from the most recent sampling conducted.

(II) The supplier is not required to include data older than five years.

(ii) The supplier must include all of the following definitions in the CCR:

(A) *Maximum Contaminant Level Goal* (MCLG) means the level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

(B) *Maximum Contaminant Level* (MCL) means the highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

(iii) If the CCR includes any of the following terms, the supplier must include the applicable definition(s) in the CCR:

(A) *Treatment Technique* means a required process intended to reduce the level of a contaminant in drinking water.

(B) *Action Level* means the concentration of a contaminant, which if exceeded, triggers treatment or other requirements that a water system must comply with.

(C) *Maximum residual disinfectant level goal* (MRDLG) means the level of a drinking water disinfectant below which, there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.

(D) *Maximum residual disinfectant level* (MRDL) means the highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.

(E) *Variances and Exemptions* mean that the supplier has Department permission to not meet an MCL or a treatment technique requirement under certain conditions.

(F) *Level 1 assessment* means a study of the water system to identify possible problems and determine, if possible, why total coliform bacteria have been found in our water system.

(G) *Level 2 assessment* means a very detailed study of the water system to identify possible problems and determine, if possible, why an *E. coli* MCL violation has occurred and/or why total coliform bacteria have been found in our water system on multiple occasions.

(iv) The supplier must include in the CCR the telephone number for the system that the consumer may call for additional information about the CCR.

(v) The supplier must include in the CCR information about opportunities for public participation in decisions that may affect the quality of the water (e.g., time and place of regularly scheduled board meetings).

(vi) For systems supplying a large proportion of non-English speaking consumers, as determined by the Department, the supplier must include either of the following in the CCR:

(A) Information in the appropriate language(s) regarding the importance of the CCR.

(B) A telephone number or address where the consumer may contact the supplier to obtain a translated copy of the CCR or request assistance in the appropriate language.

(vii) For each violation that occurs during the year covered by the CCR specified in 11.34(2)(d)(vi), the supplier must include a clear and readily understandable explanation of each violation, any potential adverse health effects, and the steps the supplier has taken to correct the violation.

(viii) For CCRs due on or after July 1, 2025, the supplier must include in the CCR a statement that a service line inventory has been prepared as required under 11.17(2)(a) and include instructions to access the service line inventory, including inventories consisting only of a statement under 11.17(2)(b)(i)(C).

(ix) For CCRs due on or after July 1, 2025, the supplier must include in the CCR a statement notifying consumers that complete lead tap sampling data are available for review and must include instructions on how to access the data.

(b) Language Requirements for the CCR

(i) The supplier must include all of the following language in the CCR, exactly as written:

(A) “Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline (800-426-4791).”

(B) “Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbial contaminants are available from the Safe Drinking Water Hotline (800-426-4791).”

(ii) The supplier must also include in the CCR a brief explanation regarding contaminants which may reasonably be expected to be found in drinking water including bottled water.

(A) The supplier may use the following language or comparable language:

(I) "The sources of drinking water include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity.

Contaminants that may be present in source water include:

- Microbial contaminants, such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.

- Inorganic contaminants, such as salts and metals, which can be naturally-occurring or result from urban storm water runoff, industrial or domestic wastewater discharges, oil and gas production, mining, or farming.

- Pesticides and herbicides, which may come from a variety of sources such as agriculture, urban storm water runoff, and residential uses.

- Organic chemical contaminants, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and also may come from gas stations, urban storm water runoff, and septic systems.

- Radioactive contaminants, which can be naturally occurring or be the result of oil and gas production and mining activities.

In order to ensure that tap water is safe to drink, the Colorado Department of Public Health and Environment prescribes regulations which limit the amount of certain contaminants in water provided by public water systems. The Food and Drug Administration regulations establish limits for contaminants in bottled water that must provide the same protection for public health."

(iii) The supplier must include in the CCR a short informational statement about lead in drinking water and its effects on children.

(A) The supplier may use the following language, providing the specific information for the text in brackets, or other Department-approved language written by the supplier:

(I) Lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. [NAME OF UTILITY] is responsible for providing high quality drinking water and removing lead pipes, but cannot control the variety of materials used in plumbing components in your home. You share the responsibility for protecting yourself and your family from the lead in your home plumbing.

You can take responsibility by identifying and removing lead materials within your home plumbing and taking steps to reduce your family's risk. Before drinking tap water, flush your pipes for several minutes by running your tap, taking a shower, doing laundry or a load of dishes. You can also use a filter certified by an American National Standards Institute accredited certifier to reduce lead in drinking water. If you are concerned about lead in your water and wish to have your water tested, contact [NAME OF UTILITY and CONTACT INFORMATION]. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available at http://www.epa.gov/safewater/lead.

(c) Source Water Content Requirements for the CCR

(i) The supplier must include all of the following information about each of the system's sources in the CCR:

(A) The type of source (e.g., surface water or groundwater).

(B) The commonly used name(s) of the source(s), if any.

(C) The general location(s) of the source(s).

(D) If a source water assessment has been completed, the supplier must include all of the following:

(I) Notification of the availability of this information.

(II) How to obtain this information.

(III) If the Department has provided a source water assessment, a brief summary of the system's susceptibility to potential sources of contamination, using language provided by the Department or written by the supplier.

(d) Detected Contaminant Content Requirements for the CCR

(i) The supplier must include in the CCR information on all of the following detected contaminants, except Cryptosporidium:

(A) Regulated contaminants.

(B) Unregulated contaminants that the supplier must sample for under 11.47.

(C) Unregulated detected contaminants in finished water that the supplier must monitor for under 11.14

(ii) The information for detected contaminants must be displayed in a table or several adjacent tables.

(A) If the supplier chooses to include information related to any additional sample results not required by 11.34(2)(d)(i), the supplier must display this information separately from the table(s) of detected contaminants.

(iii) For each regulated contaminant, the table(s) of detected contaminants must include all of the following:

(A) The MCL expressed as a whole number as specified in Table 11.34-I.

(I) If there is no MCL for a detected contaminant, the supplier must show in the table(s) that there is a treatment technique, or specify the action level, applicable to that contaminant.

(B) The MCLG expressed in the same units as the MCL.

(C) For contaminants subject to an MCL, except turbidity, total coliforms and *E. coli*, the highest contaminant level used to determine compliance and the range of detected levels as follows:

(I) If compliance with the MCL is determined annually or less frequently, the highest detected level and the range of all detected levels expressed in the same units as the MCL.

(II) If compliance with the MCL is determined based on a RAA, the RAA and range of all detected sample results expressed in the same units as the MCL.

(III) If compliance with the MCL is determined based on an LRAA, the highest LRAA and the range of all LRAAs expressed in the same units as the MCL.

(a) For the TTHM and HAA5 MCLs, the supplier must also include the range of all individual sample results expressed in the same units as the MCL.

(b) For the TTHM and HAA5 MCLs, if more than one LRAA exceeds the MCL, the supplier must include the LRAAs for all sampling locations that exceeded the MCL.

(D) For turbidity reported under 11.8, the highest single turbidity measurement and the lowest monthly percentage of samples meeting the turbidity limit specified in 11.8 for the filtration technology being used.

(I) The supplier should include an explanation of the reasons for measuring turbidity.

(E) For lead and copper, the 90^{th} percentile value(s) and the number of sampling sites that exceeded the action levels.

(F) For *E. coli*, the total number of E. coli-positive samples that are not special purpose samples, collected under 11.16.

(iv) For each unregulated contaminant for which the supplier must monitor, the table(s) of detected contaminants must include the average of the sample results and the range of all detected levels.

(A) The supplier may include a brief explanation of the reasons for monitoring for unregulated contaminants.

(v) The table(s) of detected contaminants must also include the likely source(s) of the contaminants to the best of the supplier's knowledge.

(A) If the supplier lacks specific information on the likely source, the supplier must include one or more of the typical sources for that contaminant listed in Table 11.34-I that is most applicable to the system.

(vi) The table(s) of detected contaminants must clearly identify any data that show a violation of any of the requirements listed below that occurred during the year covered by the CCR:

(A) MCLs.

(B) MRDLs.

(C) Treatment techniques.

(D) Monitoring and reporting of compliance data.

(E) Filtration and disinfection as specified in 11.8.

(F) Recordkeeping of compliance data.

(G) Special monitoring requirements as specified in 11.47 and 11.20.

(H) If applicable, the terms of a variance, an exemption, or an administrative or judicial order.

(vii) If a system supplies water through multiple hydraulically independent distribution systems that use different sources, the supplier should identify each separate distribution system in the CCR and should include a separate column for each independent distribution system in the table(s) of detected contaminants.

(A) Alternatively, the supplier may produce separate CCRs that only include data for each independent distribution system.

(e) Additional Content Requirements for the CCR

(i) If the supplier is required to comply with 11.11:

(A) The supplier must include all of the following information in the CCR about any significant deficiency that has not been corrected at the time of delivery of the CCR:

(I) The nature of the significant deficiency(s).

(II) The date(s) the significant deficiency(s) was identified by the Department.

(III) For each significant deficiency that was required to be addressed under 11.38(3) that has not been addressed, the Department-approved plan and schedule for correction, including interim measures, progress to date, and any interim measures completed.

(B) The supplier must continue to include the information under 11.34(2)(e)(i)(A) each year until the Department determines that the significant deficiency was corrected under 11.38(3).

(C) If directed by the Department, the supplier must include all of the following information for any significant deficiency that was corrected before the CCR is issued:

(I) Inform the customers of the significant deficiency.

(II) How the deficiency was corrected.

(III) The date of correction.

(D) The supplier must include all of the following information in the CCR about any fecal indicator-positive groundwater source sample:

(I) The source of the fecal contamination, if the source is known.

(II) The date(s) of the fecal indicator-positive groundwater source sample(s).

(III) For each fecal indicator-positive contamination event in the groundwater source that was required to be addressed under 11.11(6)(b) that has not been addressed, the Department-approved plan and schedule for correction, including interim measures, progress to date, and any interim measures completed.

(IV) If the fecal contamination in the groundwater source was addressed under 11.11(6), the date of such action.

(V) The applicable potential health effects language specified in Table 11.34-I for a fecal indicator-positive groundwater source sample(s) that was not invalidated by the Department.

(E) The supplier must continue to include the information specified in 11.34(2)(e)(i)(D) each year until the Department determines that the fecal contamination in the groundwater source was addressed under 11.11(6)(b).

(ii) If the supplier has nitrate sample result(s) greater than (>) 5 mg/L but less than (<) the MCL, the supplier must include a short informational statement about nitrate's effect on children.

(A) The supplier may use the following language or other Department-approved language written by the supplier:

(I) "Nitrate in drinking water at levels above 10 ppm is a health risk for infants of less than six months of age. High nitrate levels in drinking water can cause blue baby syndrome. Nitrate levels may rise quickly for short periods of time because of rainfall or agricultural activity. If you are caring for an infant you should ask advice from your health care provider."

(iii) If the supplier has arsenic sample result(s) greater than (>) 0.005 mg/L but less than or equal to (≤) 0.010 mg/L, the supplier must include a short informational statement about arsenic.

(A) The supplier may use the following language or other Department-approved language written by the supplier:

(I) "While your drinking water meets the EPA's standard for arsenic, it does contain low levels of arsenic. The EPA's standard balances the current understanding of arsenic's possible health effects against the costs of removing arsenic from drinking water. The EPA continues to research the health effects of low levels of arsenic, which is a mineral known to cause cancer in humans at high concentrations and is linked to other health effects such as skin damage and circulatory problems."

(iv) If the supplier sampled for *Cryptosporidium* and the sample results show that *Cryptosporidium* may be present in the source water or the finished water, the supplier must include all of the following:

(A) A summary of the sample results.

(B) An explanation of the significance of the sample results.

(v) If the supplier sampled for radon and the sample results show that radon may be present in the finished water, the supplier must include all of the following:

(A) The sample results.

(B) An explanation of the significance of the sample results.

(vi) If a supplier is operating under a variance or an exemption as specified in 11.43, the supplier must include all of the following:

(A) An explanation of the reasons for the variance or exemption.

(B) The date on which the variance or exemption was issued.

(C) A brief status report on the steps the supplier is taking to install treatment, find alternative sources of water, or otherwise comply with the terms and schedules of the variance or exemption.

(D) A notice of any opportunity for public input in the review or renewal, of the variance or exemption.

(vii) For surface water systems, if the supplier failed to install adequate filtration or disinfection equipment or processes, or has had a failure of such equipment or processes which are a violation as specified in 11.8, the supplier must include the following language exactly as written as part of the explanation of potential adverse health effects:

(A) "Inadequately treated water may contain disease-causing organisms. These organisms include bacteria, viruses, and parasites, which can cause symptoms such as nausea, cramps, diarrhea, and associated headaches."

(viii) If the supplier failed to take one or more actions for lead and copper control as specified in 11.17 or 11.26, the supplier must include the applicable language from Table 11.34-I.

(ix) If the supplier failed to comply with the acrylamide and epichlorohydrin certification requirements as specified in 11.21(5), the supplier must include the applicable language from Table 11.34-I.

(x) The supplier must include a clear and readily understandable explanation of any violation specified in 11.34(2)(d)(vi), including the length of the violation, any potential adverse health effects, and the actions the supplier has taken to correct the violation.

(A) To describe the potential adverse health effects, the supplier must include the applicable language from Table 11.34-I.

(xi) If the supplier has collected additional voluntary samples and the sample results show the presence of other contaminants in the finished water, the Department strongly encourages the supplier to report any sample results which may show a health concern.

(A) To determine if results may show a health concern, the Department recommends that the supplier find out if EPA has proposed a National Primary Drinking Water Regulation or has issued a health advisory for that contaminant by calling the Safe Drinking Water Hotline (800-426-4791).

(B) Detects above a proposed MCL or health advisory level show possible health concerns. For such contaminants, the Department recommends that the supplier include all of the following:

(I) The sample results.

(II) An explanation of the significance of the sample results noting the existence of a health advisory or a proposed regulation.

(xii) If a backflow prevention and cross-connection control violation occurs under 11.39(6), the supplier must include the following.

(A) The following language exactly as written:

(I) “We have an inadequate backflow prevention and cross-connection control program. Uncontrolled cross-connections can lead to inadvertent contamination of the drinking water.”

(B) If applicable, one or both of the following statements:

(I) We have installed or permitted an uncontrolled cross-connection.

(II) We experienced a backflow contamination event.

(xiii) If the supplier is required to conduct a Level 1 assessment and/or a Level 2 assessment that is not triggered by an *E. coli* MCL violation, the supplier must include the following:

(A) The following language exactly as written:

(I) “Coliforms are bacteria that are naturally present in the environment and are used as an indicator that other, potentially harmful, waterborne pathogens may be present or that a potential pathway exists through which contamination may enter the drinking water distribution system. We found coliforms indicating the need to look for potential problems in water treatment or distribution. When this occurs, we are required to conduct assessment(s) to identify problems and to correct any problems that were found during these assessments.”

(B) The following applicable language for a Level 1 assessment and/or a Level 2 assessment exactly as written, providing the specific information for the text in brackets:

(I) During the past year we were required to conduct [INSERT NUMBER OF LEVEL 1 ASSESSMENTS] Level 1 assessment(s). [INSERT NUMBER OF LEVEL 1 ASSESSMENTS] Level 1 assessment(s) were completed. In addition, we were required to take [INSERT NUMBER OF CORRECTIVE ACTIONS] corrective actions and we completed [INSERT NUMBER OF CORRECTIVE ACTIONS] of these actions.

(II) During the past year [INSERT NUMBER OF LEVEL 2 ASSESSMENTS] Level 2 assessments were required to be completed for our water system. [INSERT NUMBER OF LEVEL 2 ASSESSMENTS] Level 2 assessments were completed. In addition, we were required to take [INSERT NUMBER OF CORRECTIVE ACTIONS] corrective actions and we completed [INSERT NUMBER OF CORRECTIVE ACTIONS] of these actions.

(xiv) If the supplier is required to conduct a Level 2 assessment that is triggered by an *E. coli* MCL violation, the supplier must include the following language exactly as written, providing the specific information for the text in brackets:

(A) "*E. coli* are bacteria whose presence indicates that the water may be contaminated with human or animal wastes. Human pathogens in these wastes can cause short-term effects, such as diarrhea, cramps, nausea, headaches, or other symptoms. They may pose a greater health risk for infants, young children, the elderly, and people with severely compromised immune systems. We found *E. coli* bacteria, indicating the need to look for potential problems in water treatment or distribution. When this occurs, we are required to conduct assessment(s) to identify problems and to correct any problems that were found during these assessments."

(B) We were required to complete a Level 2 assessment because we found *E. coli* in our water system. In addition, we were required to take [INSERT NUMBER OF CORRECTIVE ACTIONS] corrective actions and we completed [INSERT NUMBER OF CORRECTIVE ACTIONS] of these actions.

(xv) If a treatment technique violation occurs under 11.16(11)(b)(i), the supplier must include one or both of the following statements, as applicable:

(A) During the past year we failed to conduct all of the required assessment(s).

(B) During the past year we failed to correct all identified sanitary defects that were found during the assessment.

(xvi) If an *E. coli*-positive sample has not violated the *E. coli* MCL, in addition to completing the table in 11.34(2)(d), the supplier must include a statement that explains that although they have detected *E. coli*, they are not in violation of the *E. coli* MCL.

(xvii) If an *E. coli* MCL violation occurs, in addition to completing the table in 11.34(2)(d), the supplier must include one or more of the following statements, as applicable:

(A) We had an *E. coli*-positive repeat sample following a total coliform-positive routine sample.

(B) We had a total coliform-positive repeat sample following an *E. coli*-positive routine sample.

(C) We failed to take all required repeat samples following an *E. coli*-positive routine sample.

(D) We failed to test for *E. coli* when any repeat sample tests positive for total coliform.

(xviii) If the supplier is subject to the requirements specified in 11.14, the supplier must include the following information:

(A) A description of direct potable reuse.

(B) A description of the supplier's direct potable reuse pathogen and chemical critical control points.

(C) A description or depiction of the service area that is supplied with finished water from the direct potable reuse project.

(xix) The supplier may include additional information necessary for public education consistent with, and not detracting from, the purpose of the CCR.

TABLE 11.34-I TABLE OF REGULATED CONTAMINANTS						
Contaminant (units)	MCL (in mg/L unless otherwise noted)	To convert for CCR, multiply by	MCL in CCR units	MCLG	Major sources in drinking water	Health effects language
Microbiological Contaminants						
Total coliform bacteria	TT	N/A	TT	N/A	Naturally present in the environment	Coliforms are bacteria that are naturally present in the environment and are used as an indicator that other, potentially harmful, waterborne pathogens may be present or that a potential pathway exists through which contamination may enter the drinking water distribution system. We found coliforms indicating the need to look for potential problems in water treatment or distribution.
Fecal Indicators: 1) *E. coli*, 2) enterococci or 3) coliphage	TT	N/A	TT	N/A	Human and animal fecal waste	Fecal indicators are microbes whose presence indicates that the water may be contaminated with human or animal wastes. Microbes in these wastes can cause short- term health effects, such as diarrhea, cramps, nausea, headaches, or other symptoms. They may pose a special health risk for infants, young children, some of the elderly, and people with severely compromised immune systems.

TABLE 11.34-I TABLE OF REGULATED CONTAMINANTS						
Contaminant (units)	MCL (in mg/L unless otherwise noted)	To convert for CCR, multiply by	MCL in CCR units	MCLG	Major sources in drinking water	Health effects language
E. coli	*E. coli*-positive repeat sample following a total coliform-positive routine sample, total coliform-positive repeat sample following an *E. coli*-positive routine sample, failure to collect all required repeat samples following an *E. coli*-positive routine sample, or failure to analyze a total-coliform positive repeat sample for *E. coli*.	N/A	*E. coli*-positive repeat sample following a total coliform-positive routine sample, total coliform-positive repeat sample following an *E. coli*-positive routine sample, failure to collect all required repeat samples following an *E. coli*-positive routine sample, or failure to analyze a total-coliform positive repeat sample for *E. coli*.	0	Human and animal fecal waste	*E. coli* are bacteria whose presence indicates that the water may be contaminated with human or animal wastes. Human pathogens in these wastes can cause short-term effects, such as diarrhea, cramps, nausea, headaches, or other symptoms. They may pose a greater health risk for infants, young children, the elderly, and people with severely-compromised immune systems.

TABLE 11.34-I TABLE OF REGULATED CONTAMINANTS						
Contaminant (units)	MCL (in mg/L unless otherwise noted)	To convert for CCR, multiply by	MCL in CCR units	MCLG	Major sources in drinking water	Health effects language
Total organic carbon (ppm)	TT	N/A	TT	N/A	Naturally present in the environment.	Total organic carbon (TOC) has no health effects. However, total organic carbon provides a medium for the formation of disinfection by products. These byproducts include trihalomethanes (TTHMs) and haloacetic acids (HAA5s). Drinking water containing these byproducts in excess of the MCL may lead to adverse health effects, liver or kidney problems, or nervous system effects, and may lead to an increased risk of getting cancer.
Turbidity (NTU)	TT	N/A	TT	N/A	Soil runoff.	Turbidity has no health effects. However, turbidity can interfere with disinfection and provide a medium for microbial growth. Turbidity may indicate the presence of disease-causing organisms. These organisms include bacteria, viruses, and parasites that can cause symptoms such as nausea, cramps, diarrhea, and associated headaches.
Disinfectant residual[2]	TT (in the distribution system)	N/A	TT (in the distribution system)	N/A	Water additive used to control microbes.	Disinfectant residual serves as one of the final barriers to protect public health. Lack of an adequate disinfectant residual may increase the likelihood that disease-causing organisms are present.

TABLE 11.34-I TABLE OF REGULATED CONTAMINANTS						
Contaminant (units)	MCL (in mg/L unless otherwise noted)	To convert for CCR, multiply by	MCL in CCR units	MCLG	Major sources in drinking water	Health effects language
Radionuclides						
Beta/photon emitters (mrem/yr)	4 mrem/yr	N/A	4	0	Decay of natural and man-made deposits.	Certain minerals are radioactive and may emit forms of radiation known as photons and beta radiation. Some people who drink water containing beta particle and photon radioactivity in excess of the MCL over many years may have an increased risk of getting cancer.
Alpha emitters (pCi/L)	15 pCi/L	N/A	15	0	Erosion of natural deposits.	Certain minerals are radioactive and may emit a form of radiation known as alpha radiation. Some people who drink water containing alpha emitters in excess of the MCL over many years may have an increased risk of getting cancer.
Combined radium (pCi/L)	5 pCi/L	N/A	5	0	Erosion of natural deposits.	Some people who drink water containing radium -226 or -228 in excess of the MCL over many years may have an increased risk of getting cancer.
Uranium (µg/L)	30 µg/L	N/A	30	0	Erosion of natural deposits.	Some people who drink water containing uranium in excess of the MCL over many years may have an increased risk of getting cancer and kidney toxicity.
Inorganic Chemicals						
Antimony (ppb)	0.006	1000	6	6	Discharge from petroleum refineries; fire retardants; ceramics; electronics; solder.	Some people who drink water containing antimony well in excess of the MCL over many years could experience increases in blood cholesterol and decreases in blood sugar.

TABLE 11.34-I TABLE OF REGULATED CONTAMINANTS						
Contaminant (units)	MCL (in mg/L unless otherwise noted)	To convert for CCR, multiply by	MCL in CCR units	MCLG	Major sources in drinking water	Health effects language
Arsenic (ppb)	0.010	1000	10[4]	0[4]	Erosion of natural deposits; Runoff from orchards; Runoff from glass and electronics production wastes.	Some people who drink water containing arsenic in excess of the MCL over many years could experience skin damage or problems with their circulatory system, and may have an increased risk of getting cancer.
Asbestos (MFL)	7 MFL	N/A	7	7	Decay of asbestos cement water mains; Erosion of natural deposits.	Some people who drink water containing asbestos in excess of the MCL over many years may have an increased risk of developing benign intestinal polyps.
Barium (ppm)	2	N/A	2	2	Discharge of drilling wastes; Discharge from metal refineries; Erosion of natural deposits.	Some people who drink water containing barium in excess of the MCL over many years could experience an increase in their blood pressure.
Beryllium (ppb)	0.004	1000	4	4	Discharge from metal refineries and coal burning factories; Discharge from electrical, aerospace, and defense industries.	Some people who drink water containing beryllium well in excess of the MCL over many years could develop intestinal lesions.
Bromate (ppb)	0.010	1000	10	0	By-product of drinking water disinfection.	Some people who drink water containing bromate in excess of the MCL over many years may have an increased risk of getting cancer.
Cadmium (ppb)	0.005	1000	5	5	Corrosion of galvanized pipes; Erosion of natural deposits; Discharge from metal refineries; Runoff from waste batteries and paints.	Some people who drink water containing cadmium in excess of the MCL over many years could experience kidney damage.

TABLE 11.34-I TABLE OF REGULATED CONTAMINANTS						
Contaminant (units)	MCL (in mg/L unless otherwise noted)	To convert for CCR, multiply by	MCL in CCR units	MCLG	Major sources in drinking water	Health effects language
Chloramines (ppm)	MRDL = 4	N/A	MRDL = 4	MRDLG = 4	Water additive used to control microbes.	Some people who use water containing chloramines well in excess of the MRDL could experience irritating effects to their eyes and nose. Some people who drink water containing chloramines well in excess of the MRDL could experience stomach discomfort or anemia.
Chlorine (ppm)	MRDL = 4	N/A	MRDL = 4	MRDLG = 4	Water additive used to control microbes.	Some people who use water containing chlorine well in excess of the MRDL could experience irritating effects to their eyes and nose. Some people who drink water containing chlorine well in excess of the MRDL could experience stomach discomfort.
Chlorine dioxide (ppb)	MRDL = 0.8	1000	MRDL = 800	MRDLG = 800	Water additive used to control microbes.	Some infants and young children who drink water containing chlorine dioxide in excess of the MRDL could experience nervous system effects. Similar effects may occur in fetuses of pregnant women who drink water containing chlorine dioxide in excess of the MRDL. Some people may experience anemia.
Chlorite (ppm)	1	N/A	1	0.8	By-product of drinking water disinfection.	Some infants and young children who drink water containing chlorite in excess of the MCL could experience nervous system effects. Similar effects may occur in fetuses of pregnant women who drink water containing chlorite in excess of the MCL. Some people may experience anemia.

TABLE 11.34-I TABLE OF REGULATED CONTAMINANTS						
Contaminant (units)	MCL (in mg/L unless otherwise noted)	To convert for CCR, multiply by	MCL in CCR units	MCLG	Major sources in drinking water	Health effects language
Chromium (ppb)	0.1	1000	100	100	Discharge from steel and pulp mills; Erosion of natural deposits.	Some people who use water containing chromium well in excess of the MCL over many years could experience allergic dermatitis.
Copper (ppm)	AL=1.3	N/A	AL=1.3	1.3	Corrosion of household plumbing systems; Erosion of natural deposits.	Copper is an essential nutrient, but some people who drink water containing copper in excess of the action level over a relatively short amount of time could experience gastrointestinal distress. Some people who drink water containing copper in excess of the action level over many years could suffer liver or kidney damage. People with Wilson's Disease should consult their personal doctor.
Cyanide (ppb)	0.2	1000	200	200	Discharge from steel/metal factories; Discharge from plastic and fertilizer factories.	Some people who drink water containing cyanide well in excess of the MCL over many years could experience nerve damage or problems with their thyroid.
Fluoride (ppm)	4.0	N/A	4.0	4.0	Erosion of natural deposits; Water additive that promotes strong teeth; Discharge from fertilizer and aluminum factories.	Some people who drink water containing fluoride in excess of the MCL over many years could get bone disease, including pain and tenderness of the bones. Fluoride in drinking water at half the MCL or more may cause mottling of children's teeth, usually in children less than nine years old. Mottling, also known as dental fluorosis, may include brown staining and/or pitting of the teeth, and occurs only in developing teeth before they erupt from the gums.

TABLE 11.34-I TABLE OF REGULATED CONTAMINANTS						
Contaminant (units)	MCL (in mg/L unless otherwise noted)	To convert for CCR, multiply by	MCL in CCR units	MCLG	Major sources in drinking water	Health effects language
Lead (ppb)	AL=0.015	1000	AL=15	0	Corrosion of household plumbing systems; Erosion of natural deposits.	Exposure to lead in drinking water can cause serious health effects in all age groups. Infants and children can have decreases in IQ and attention span. Lead exposure can lead to new learning and behavior problems or exacerbate existing learning and behavior problems. The children of women who are exposed to lead before or during pregnancy can have increased risk of these adverse health effects. Adults can have increased risks of heart disease, high blood pressure, kidney or nervous system problems.
Mercury (inorganic) (ppb)	0.002	1000	2	2	Erosion of natural deposits; Discharge from refineries and factories; Runoff from landfills; Runoff from cropland.	Some people who drink water containing inorganic mercury well in excess of the MCL over many years could experience kidney damage.
Nitrate (ppm)	10	N/A	10	10	Runoff from fertilizer use; Leaching from septic tanks, sewage; Erosion of natural deposits.	Infants below the age of six months who drink water containing nitrate in excess of the MCL could become seriously ill and, if untreated, may die. Symptoms include shortness of breath and blue baby syndrome.
Nitrite (ppm)	1	N/A	1	1	Runoff from fertilizer use; Leaching from septic tanks, sewage; Erosion of natural deposits.	Infants below the age of six months who drink water containing nitrite in excess of the MCL could become seriously ill and, if untreated, may die. Symptoms include shortness of breath and blue baby syndrome.

TABLE 11.34-I TABLE OF REGULATED CONTAMINANTS						
Contaminant (units)	MCL (in mg/L unless otherwise noted)	To convert for CCR, multiply by	MCL in CCR units	MCLG	Major sources in drinking water	Health effects language
Selenium (ppb)	0.05	1000	50	50	Discharge from petroleum and metal refineries; Erosion of natural deposits; Discharge from mines.	Selenium is an essential nutrient. However, some people who drink water containing selenium in excess of the MCL over many years could experience hair or fingernail losses, numbness in fingers or toes, or problems with their circulation.
Thallium (ppb)	0.002	1000	2	0.5	Leaching from ore-processing sites; Discharge from electronics, glass, and drug factories.	Some people who drink water containing thallium in excess of the MCL over many years could experience hair loss, changes in their blood, or problems with their kidneys, intestines, or liver.
Synthetic Organic Chemicals (SOCs)						
2,4-D (ppb)	0.07	1000	70	70	Runoff from herbicide used on row crops.	Some people who drink water containing the weed killer 2,4-D well in excess of the MCL over many years could experience problems with their kidneys, liver, or adrenal glands.
2,4,5-TP (Silvex)(ppb)	0.05	1000	50	50	Residue of banned herbicide.	Some people who drink water containing silvex in excess of the MCL over many years could experience liver problems.
Acrylamide	N/A	N/A	TT	0	Added to water during sewage/wastewater treatment.	Some people who drink water containing high levels of acrylamide over a long period of time could have problems with their nervous system or blood, and may have an increased risk of getting cancer.

TABLE 11.34-I TABLE OF REGULATED CONTAMINANTS						
Contaminant (units)	MCL (in mg/L unless otherwise noted)	To convert for CCR, multiply by	MCL in CCR units	MCLG	Major sources in drinking water	Health effects language
Alachlor (ppb)	0.002	1000	2	0	Runoff from herbicide used on row crops.	Some people who drink water containing alachlor in excess of the MCL over many years could have problems with their eyes, liver, kidneys, or spleen, or experience anemia, and may have an increased risk of getting cancer.
Atrazine (ppb)	0.003	1000	3	3	Runoff from herbicide used on row crops.	Some people who drink water containing atrazine well in excess of the MCL over many years could experience problems with their cardiovascular system or reproductive difficulties.
Benzo(a)pyrene (PAH) (nanograms/L)	0.0002	1,000,000	200	0	Leaching from linings of water storage tanks and distribution lines.	Some people who drink water containing benzo(a)pyrene in excess of the MCL over many years may experience reproductive difficulties and may have an increased risk of getting cancer.
Carbofuran (ppb)	0.04	1000	40	40	Leaching of soil fumigant used on rice and alfalfa.	Some people who drink water containing carbofuran in excess of the MCL over many years could experience problems with their blood, or nervous or reproductive systems.
Chlordane (ppb)	0.002	1000	2	0	Residue of banned termiticide.	Some people who drink water containing chlordane in excess of the MCL over many years could experience problems with their liver or nervous system, and may have an increased risk of getting cancer.
Dalapon (ppb)	0.2	1000	200	200	Runoff from herbicide used on rights of way.	Some people who drink water containing dalapon well in excess of the MCL over many years could experience minor kidney changes.

TABLE 11.34-I TABLE OF REGULATED CONTAMINANTS						
Contaminant (units)	MCL (in mg/L unless otherwise noted)	To convert for CCR, multiply by	MCL in CCR units	MCLG	Major sources in drinking water	Health effects language
Di(2-ethylhexyl) adipate (ppb)	0.4	1000	400	400	Discharge from chemical factories.	Some people who drink water containing di(2-ethylhexyl) adipate well in excess of the MCL over many years could experience toxic effects, such as weight loss, liver enlargement or possible reproductive difficulties.
Di(2-ethylhexyl) phthalate (ppb)	0.006	1000	6	0	Discharge from rubber and chemical factories.	Some people who drink water containing di(2-ethylhexyl) phthalate well in excess of the MCL over many years may have problems with their liver, or experience reproductive difficulties, and may have an increased risk of getting cancer.
Dibromochloro-propane (ppt)	0.0002	1,000,000	200	0	Runoff/leaching from soil fumigant used on soybeans, cotton, pineapples, and orchards.	Some people who drink water containing DBCP in excess of the MCL over many years could experience reproductive problems and may have an increased risk of getting cancer.
Dinoseb (ppb)	0.007	1000	7	7	Runoff from herbicide used on soybeans and vegetables.	Some people who drink water containing dinoseb well in excess of the MCL over many years could experience reproductive difficulties.
Diquat (ppb)	0.02	1000	20	20	Runoff from herbicide use.	Some people who drink water containing diquat in excess of the MCL over many years could get cataracts.
Dioxin (2,3,7,8-TCDD) (ppq)	0.00000003	1,000,000,000	30	0	Emissions from waste incineration and other combustion; discharge from chemical factories.	Some people who drink water containing dioxin in excess of the MCL over many years could experience reproductive difficulties and may have an increased risk of getting cancer.

TABLE 11.34-I TABLE OF REGULATED CONTAMINANTS						
Contaminant (units)	MCL (in mg/L unless otherwise noted)	To convert for CCR, multiply by	MCL in CCR units	MCLG	Major sources in drinking water	Health effects language
Endothall (ppb)	0.1	1000	100	100	Runoff from herbicide use	Some people who drink water containing endothall in excess of the MCL over many years could experience problems with their stomach or intestines.
Endrin (ppb)	0.002	1000	2	2	Residue of banned insecticide	Some people who drink water containing endrin in excess of the MCL over many years could experience liver problems.
Epichlorohydrin	TT	N/A	TT	0	Discharge from industrial chemical factories; an impurity of some water treatment chemicals.	Some people who drink water containing high levels of epichlorohydrin over a long period of time could experience stomach problems, and may have an increased risk of getting cancer.
Ethylene dibromide (ppt)	0.00005	1,000,000	50	0	Discharge from petroleum refineries.	Some people who drink water containing ethylene dibromide in excess of the MCL over many years could experience problems with their liver, stomach, reproductive system, or kidneys, and may have an increased risk of getting cancer.
Glyphosate (ppb)	0.7	1000	700	700	Runoff from herbicide use.	Some people who drink water containing glyphosate in excess of the MCL over many years could experience problems with their kidneys or reproductive difficulties.
Heptachlor (ppt)	0.0004	1,000,000	400	0	Residue of banned pesticide.	Some people who drink water containing heptachlor in excess of the MCL over many years could experience liver damage and may have an increased risk of getting cancer.

TABLE 11.34-I TABLE OF REGULATED CONTAMINANTS						
Contaminant (units)	MCL (in mg/L unless otherwise noted)	To convert for CCR, multiply by	MCL in CCR units	MCLG	Major sources in drinking water	Health effects language
Heptachlor epoxide (ppt)	0.0002	1,000,000	200	0	Breakdown of heptachlor.	Some people who drink water containing heptachlor epoxide in excess of the MCL over many years could experience liver damage, and may have an increased risk of getting cancer.
Hexachlorobenzene (ppb)	0.001	1000	1	0	Discharge from metal refineries and agricultural chemical factories.	Some people who drink water containing hexachlorobenzene in excess of the MCL over many years could experience problems with their liver or kidneys, or adverse reproductive effects, and may have an increased risk of getting cancer.
Hexachloro-cyclopentadiene (ppb)	0.05	1000	50	50	Discharge from chemical factories.	Some people who drink water containing hexachlorocyclopentadiene well in excess of the MCL over many years could experience problems with their kidneys or stomach.
Lindane (ppt)	0.0002	1,000,000	200	200	Runoff/leaching from insecticide used on cattle, lumber, gardens.	Some people who drink water containing lindane in excess of the MCL over many years could experience problems with their kidneys or liver.
Methoxychlor (ppb)	0.04	1000	40	40	Runoff/leaching from insecticide used on fruits, vegetables, alfalfa, livestock.	Some people who drink water containing methoxychlor in excess of the MCL over many years could experience reproductive difficulties.
Oxamyl (Vydate) (ppb)	0.2	1000	200	200	Runoff/leaching from insecticide used on apples, potatoes and tomatoes.	Some people who drink water containing oxamyl in excess of the MCL over many years could experience slight nervous system effects.

TABLE 11.34-I TABLE OF REGULATED CONTAMINANTS						
Contaminant (units)	MCL (in mg/L unless otherwise noted)	To convert for CCR, multiply by	MCL in CCR units	MCLG	Major sources in drinking water	Health effects language
PCBs (Polychlorinated biphenyls) (ppt)	0.0005	1,000,000	500	0	Runoff from landfills; discharge of waste chemicals.	Some people who drink water containing PCBs in excess of the MCL over many years could experience changes in their skin, problems with their thymus gland, immune deficiencies, or reproductive or nervous system difficulties, and may have an increased risk of getting cancer.
Pentachloro-phenol (ppb)	0.001	1000	1	0	Discharge from wood preserving factories.	Some people who drink water containing pentachlorophenol in excess of the MCL over many years could experience problems with their liver or kidneys, and may have an increased risk of getting cancer.
Picloram (ppb)	0.5	1000	500	500	Herbicide runoff.	Some people who drink water containing picloram in excess of the MCL over many years could experience problems with their liver.
Simazine (ppb)	0.004	1000	4	4	Herbicide runoff.	Some people who drink water containing simazine in excess of the MCL over many years could experience problems with their blood.
Toxaphene (ppb)	0.003	1000	3	0	Runoff/leaching from insecticide used on cotton and cattle.	Some people who drink water containing toxaphene in excess of the MCL over many years could have problems with their kidneys, liver, or thyroid, and may have an increased risk of getting cancer.
Volatile Organic Chemicals (VOCs)						

TABLE 11.34-I TABLE OF REGULATED CONTAMINANTS						
Contaminant (units)	MCL (in mg/L unless otherwise noted)	To convert for CCR, multiply by	MCL in CCR units	MCLG	Major sources in drinking water	Health effects language
Benzene (ppb)	0.005	1000	5	0	Discharge from factories; leaching from gas storage tanks and landfills.	Some people who drink water containing benzene in excess of the MCL over many years could experience anemia or a decrease in blood platelets, and may have an increased risk of getting cancer.
Carbon tetrachloride (ppb)	0.005	1000	5	0	Discharge from chemical plants and other industrial activities.	Some people who drink water containing carbon tetrachloride in excess of the MCL over many years could experience problems with their liver and may have an increased risk of getting cancer.
Chlorobenzene (ppb)	0.1	1000	100	100	Discharge from chemical and agricultural chemical factories.	Some people who drink water containing chlorobenzene in excess of the MCL over many years could experience problems with their liver or kidneys.
o-Dichlorobenzene (ppb)	0.6	1000	600	600	Discharge from industrial chemical factories.	Some people who drink water containing o-dichlorobenzene well in excess of the MCL over many years could experience problems with their liver, kidneys, or circulatory systems.
p-Dichlorobenzene (ppb)	0.075	1000	75	75	Discharge from industrial chemical factories.	Some people who drink water containing p-dichlorobenzene in excess of the MCL over many years could experience anemia, damage to their liver, kidneys, or spleen, or changes in their blood.
1,2-Dichloroethane (ppb)	0.005	1000	5	0	Discharge from Industrial chemical factories.	Some people who drink water containing 1,2-dichloroethane in excess of the MCL over many years may have an increased risk of getting cancer.

TABLE 11.34-I TABLE OF REGULATED CONTAMINANTS						
Contaminant (units)	MCL (in mg/L unless otherwise noted)	To convert for CCR, multiply by	MCL in CCR units	MCLG	Major sources in drinking water	Health effects language
1,1-Dichloroethylene (ppb)	0.007	1000	7	7	Discharge from industrial chemical factories.	Some people who drink water containing 1,1-dichloroethylene in excess of the MCL over many years could experience problems with their liver.
cis-1,2-Dichloroethylene (ppb)	0.07	1000	70	70	Discharge from industrial chemical factories.	Some people who drink water containing cis-1,2- dichloroethylene in excess of the MCL over many years could experience problems with their liver.
trans-1,2-Dichloroethylene (ppb)	0.1	1000	100	100	Discharge from industrial chemical factories.	Some people who drink water containing trans-1,2-dichloroethylene well in excess of the MCL over many years could experience problems with their liver.
Dichloromethane (ppb)	0.005	1000	5	0	Discharge from pharmaceutical and chemical factories.	Some people who drink water containing dichloromethane in excess of the MCL over many years could have liver problems and may have an increased risk of getting cancer.
1,2-Dichloropropane (ppb)	0.005	1000	5	0	Discharge from industrial chemical factories.	Some people who drink water containing 1,2-dichloropropane in excess of the MCL over many years may have an increased risk of getting cancer.
Ethylbenzene (ppb)	0.7	1000	700	700	Discharge from petroleum refineries.	Some people who drink water containing ethylbenzene well in excess of the MCL over many years could experience problems with their liver or kidneys.

TABLE 11.34-I TABLE OF REGULATED CONTAMINANTS						
Contaminant (units)	MCL (in mg/L unless otherwise noted)	To convert for CCR, multiply by	MCL in CCR units	MCLG	Major sources in drinking water	Health effects language
Haloacetic Acids (HAA) (ppb)	0.060	1000	60	N/A	By-product of drinking water disinfection.	Some people who drink water containing haloacetic acids in excess of the MCL over many years may have an increased risk of getting cancer.
Styrene (ppb)	0.1	1000	100	100	Discharge from rubber and plastic factories; leaching from landfills.	Some people who drink water containing styrene well in excess of the MCL over many years could have problems with their liver, kidneys, or circulatory system.
Tetrachloro-ethylene (ppb)	0.005	1000	5	0	Discharge from factories and dry cleaners.	Some people who drink water containing tetrachloroethylene in excess of the MCL over many years could have problems with their liver, and may have an increased risk of getting cancer.
1,2,4-Trichloro-benzene (ppb)	0.07	1000	70	70	Discharge from textile-finishing factories.	Some people who drink water containing 1,2,4- trichlorobenzene well in excess of the MCL over many years could experience changes in their adrenal glands.
1,1,1-Trichloroethane (ppb)	0.2	1000	200	200	Discharge from metal degreasing sites and other factories.	Some people who drink water containing 1,1,1-trichloroethane in excess of the MCL over many years could experience problems with their liver, nervous system, or circulatory system.
1,1,2-Trichloroethane (ppb)	0.005	1000	5	3	Discharge from industrial chemical factories.	Some people who drink water containing 1,1,2-trichloroethane well in excess of the MCL over many years could have problems with their liver, kidneys, or immune systems.

TABLE 11.34-I TABLE OF REGULATED CONTAMINANTS						
Contaminant (units)	MCL (in mg/L unless otherwise noted)	To convert for CCR, multiply by	MCL in CCR units	MCLG	Major sources in drinking water	Health effects language
Trichloro-ethylene (ppb)	0.005	1000	5	0	Discharge from metal degreasing sites and other factories.	Some people who drink water containing trichloroethylene in excess of the MCL over many years could experience problems with their liver and may have an increased risk of getting cancer.
TTHMs (Total trihalomethanes) (ppb)	0.080	1000	80	N/A	Byproduct of drinking water disinfection.	Some people who drink water containing trihalomethanes in excess of the MCL over many years may experience problems with their liver, kidneys, or central nervous systems, and may have an increased risk of getting cancer.
Toluene (ppm)	1	N/A	1	1	Discharge from petroleum factories.	Some people who drink water containing toluene well in excess of the MCL over many years could have problems with their nervous system, kidneys, or liver.
Vinyl Chloride (ppb)	0.002	1000	2	0	Leaching from PVC piping; discharge from plastics factories.	Some people who drink water containing vinyl chloride in excess of the MCL over many years may have an increased risk of getting cancer.
Xylenes (ppm)	10	N/A	10	10	Discharge from petroleum factories; discharge from chemical factories.	Some people who drink water containing xylenes in excess of the MCL over many years could experience damage to their nervous system.

******

11.36 RECORDKEEPING REQUIREMENTS RULE

11.36(4) Additional Recordkeeping Requirements by Rule

(a) Recordkeeping Requirements for Monitoring Plans

For each sample result, the supplier must maintain the monitoring plan specified in 11.5 under which the sample was collected for the same time period that the sample result is required to be maintained.

(b) Recordkeeping Requirements for the Surface Water Treatment Rules

(i) The supplier must maintain all of the following information for at least three years:

(A) The results of individual filter monitoring collected under 11.8(2)(g).

(B) Any notification to the Department that the supplier will not conduct source water monitoring due to meeting the criteria specified in 11.10(2)(a)(v).

(C) The results of treatment monitoring associated with microbial toolbox options collected under 11.10(5)(b) through 11.10(5)(o), as applicable.

(ii) The supplier must maintain all of the following information for at least three years after bin classification under 11.10(3)(b):

(A) The initial round of source water monitoring results collected under 11.10(2).

(B) The second round of source water monitoring results collected under 11.10(2).

(iii) The supplier must maintain the records of turbidity sample results collected under 11.8 for at least five years.

(iv) The supplier must maintain the following recycle flow information:

(A) A copy of the recycle notification and information submitted to the Department under 11.9(4).

(B) A list of all recycle flows and the frequency with which they are returned.

(C) The average and maximum backwash flow rate through the filters and the average and maximum duration of the filter backwash process in minutes.

(D) The typical filter run length and a written summary of how filter run length is determined.

(E) The type of treatment provided for the recycle flow.

(F) Data on the physical dimensions of the equalization and/or treatment units, typical and maximum hydraulic loading rates, type of treatment chemicals used and average dose and frequency of use, and frequency at which solids are removed, if applicable.

(v) The supplier must maintain all of the following information indefinitely:

(A) The results of the disinfection profile, including raw data and analysis, specified in 11.8(4).

(B) The results of the disinfection benchmark, including raw data and analysis, specified in 11.8(5).

(c) Recordkeeping Requirements for the Groundwater Rules

(i) The supplier must maintain all of the following information for at least five years:

(A) For each minimum residual disinfection concentration treatment technique requirement sample collected under 11.11(2)(c):

(I) The date, place, and time of sample collection, and the name of the person(s) who collected and analyzed the sample;

(II) The analytical technique/method used; and

(III) The results of the analyses.

(B) Documentation specified in 11.11(2)(e)(i)(C) relating to any entry point minimum disinfection treatment technique violation.

(C) For systems operating under a disinfection waiver under 11.13, all records of all chlorination activities including:

(I) The date, duration, locations and purpose of each chlorination event; and

(II) The maximum and minimum chlorine dose in mg/L the supplier applied during each chlorination event and the results of any and all residual disinfectant concentration results collected during each chlorination event.

(D) Records of decisions that a total coliform-positive sample result meets Department criteria for distribution system conditions that cause total coliform-positive sample results under 11.11(4)(a)(ii)(B).

(E) Records of invalidation of fecal indicator-positive groundwater source samples under 11.11(4)(e)(i).

(F) For consecutive systems, documentation of notification to wholesalers of total-coliform positive samples specified in 11.11(4)(c)(i) that are not invalidated under 11.16(7).

(G) For systems that provide 4-log treatment of viruses using chemical disinfection and are required to comply with the requirements specified in 11.11(3):

(I) Records of the lowest daily residual disinfectant concentration; and

(II) Records of the date and duration of any failure to maintain the Department-specified minimum residual disinfectant concentration for a period of more than four hours.

(H) For systems that provide 4-log treatment of viruses using alternative treatment methods and are required to comply with 11.11(3):

(I) Records of Department-specified parameters for approved alternative treatment; and

(II) Records of the date and duration of any failure to meet the alternative treatment operating requirements for a period of more than four hours.

(ii) The supplier must maintain all of the following information for at least 10 years:

(A) For all systems that provide 4-log treatment of viruses that are required comply with 11.11(3), records of the Department-approved minimum residual disinfectant concentration.

(B) Documentation of corrective actions required in response to fecal indicator positive triggered source water monitoring sample results under 11.11(6).

(iii) For a system operating under a disinfection waiver, the supplier must maintain records of all correspondence and documentation relating to the requirements specified in 11.13 for as long as the system is operating under the disinfection waiver and for at least five years after waiver withdrawal.

(d) Recordkeeping Requirements for the Revised Total Coliform Rule

(i) The supplier must maintain all of the following information for at least five years after completion of the assessment or corrective action:

(A) Completed assessment forms, regardless of who conducts the assessment.

(B) Documentation of corrective actions completed as a result of those assessments.

(C) Available summary documentation of the sanitary defects and corrective actions as specified in 11.16(9).

(ii) If the supplier collects special purpose samples, the supplier must keep *E. coli*-positive sample results that are representative of water throughout the distribution system and a summary of any related follow-up activities on file for Department review for at least five years.

(iii) If the Department grants an extension to the 24-hour limit for collecting repeat samples, as specified in 11.16(5), the supplier must maintain a record of the repeat sample results for at least five years.

(e) Recordkeeping Requirements for the Disinfection Byproducts Rule

(i) If the supplier was required to complete an IDSE report, the supplier must maintain a complete copy of the IDSE report for at least 10 years after the date that the report was submitted.

(A) If the Department modified the supplier's sampling requirements that were in the system's IDSE report or if the Department approved alternative sampling locations, the supplier must keep a copy of the Department's notification on file for 10 years after the date of the Department's notification.

(B) The supplier must make the IDSE report and any Department notification available for review by the Department or the public.

(ii) If the supplier submitted a 40/30 certification, the supplier must maintain a complete copy of the 40/30 certification for at least 10 years after the date that the certification was submitted.

(A) "40/30 CERTIFICATION" means a historical requirement where the supplier certified to the Department that every individual sample result collected during eight consecutive quarters was less than or equal to (≤) 0.040 mg/L for TTHM and less than or equal to (≤) 0.030 mg/L for HAA5 and no TTHM or HAA5 violations occurred during that time.

(B) The supplier must make the 40/30 certification and any Department notification available for review by the Department or the public.

(f) Recordkeeping Requirements for the Lead and Copper Rule and Revisions

The supplier must maintain the original records of all sample results and analyses, reports, surveys, letters, evaluations, schedules, Department determinations, and any other information required by 11.17 and 11.26 for at least 12 years.

(g) Recordkeeping Requirements for the Storage Tank Rule

For each completed inspection, the supplier must maintain the inspection summary required by 11.28(3)(f) for at least ten years.

(h) Recordkeeping Requirements for the Public Notification Rule

The supplier must maintain copies of each public notice and certification made to the Department under 11.33 for at least three years after issuance.

(i) Recordkeeping Requirements for the Consumer Confidence Report (CCR) Rule

The supplier must retain copies of each CCR required by 11.34 for at least three years after issuance.

(j) Recordkeeping Requirements for the Sanitary Survey Rule

(i) The supplier must maintain all of the following information regarding sanitary surveys conducted under 11.38 for at least 10 years:

(A) Copies of any written reports, summaries or communications relating to sanitary surveys of the system conducted by the system itself, a private consultant, or a local, state or federal agency.

(B) Documentation of corrective actions required in response to significant deficiencies and/or violations identified on a sanitary survey under 11.38(3).

(k) Recordkeeping Requirements for the Backflow Prevention and Cross-Connection Control Rule

(i) The supplier must maintain all backflow prevention assembly and backflow prevention method testing, inspection, and maintenance records:

(A) For community water systems, for at least three years.

(B) For non-community water systems, for at least five years.

(ii) The supplier must maintain each annual backflow prevention and cross-connection control program report developed:

(A) For community water systems, for at least three years.

(B) For non-community water systems, for at least five years.

(l) Recordkeeping Requirements for the Water Hauler Rule

(i) The supplier must maintain all of the following information for at least five years for each tank or container:

(A) The date, time, and location of each water loading station used.

(B) The date, time, and location of each water delivery.

(C) The date, time, and result of each residual disinfectant concentration sample collected under 11.41(2)(b).

(D) The date, time, type and quantity of any chemical added to the tank or container containing water intended for delivery.

(E) A maintenance record for all hose materials, hose containers, pumps, fittings and tank and/or container including the date, time and method of cleaning and/or disinfection.

(m) Recordkeeping Requirements for the Variances and Exemptions Rule

The supplier must maintain records concerning a variance or exemption granted under 11.43 for at least five years after the expiration of the variance or exemption.

11.39 BACKFLOW PREVENTION AND CROSS-CONNECTION CONTROL RULE

11.39(1) Applicability and Definitions

(a) All public water systems must comply with the requirements specified in this rule.

(b) “BACKFLOW” means the reverse flow of water, fluid, or gas caused by back pressure or back siphonage.

(c) “BACKFLOW PREVENTION ASSEMBLY” means any mechanical assembly installed at a water service line or at a plumbing fixture to prevent a backflow contamination event, provided that the mechanical assembly is appropriate for the identified contaminant at the cross-connection and is an in-line field-testable assembly.

(d) “BACKFLOW PREVENTION METHOD” means any method and/or non-testable device installed at a water service line or at a plumbing fixture to prevent a backflow contamination event, provided that the method or non-testable device is appropriate for the identified contaminant at the cross-connection.

(e) “BACKFLOW PREVENTION ANNUAL COMPLIANCE RATIO” means the sum of backflow prevention methods inspected and backflow prevention assemblies tested during the calendar year divided by the sum of backflow prevention methods and backflow prevention assemblies installed at a cross-connection that were used during the calendar year.

(f) "CERTIFIED CROSS-CONNECTION CONTROL TECHNICIAN" means a person who possesses a valid Backflow Prevention Assembly Tester certification from one of the following approved organizations: American Society of Sanitary Engineering (ASSE) or the American Backflow Prevention Association (ABPA). If a certification has expired, the certification is invalid.

(g) "CONTROLLED CROSS-CONNECTION" means a cross-connection that has a properly installed, maintained, and tested or inspected backflow prevention assembly or backflow prevention method that prevents backflow.

(h) "SINGLE-FAMILY-RESIDENTIAL" means:

(i) A single living unit that is supplied by its own separate service line; or

(ii) Multiple living units where each individual living unit is supplied by a separate service line; or

(iii) Two separate single living units supplied by a common service line.

(i) "SURVEY COMPLIANCE RATIO" means the total number of connections surveyed, including the number of all non-single-family-residential connections to the public water system with the most protective backflow prevention assembly or method that was not surveyed as specified in 11.39(2)(c), divided by the total number of non-single-family-residential connections to the public water system and connections within the supplier's waterworks.

(i) The supplier is not required to include any non-single-family-residential connections identified after October 31 of the calendar year in the total number of non-single-family-residential connections to the public water system until the following calendar year.

(j) "UNCONTROLLED CROSS-CONNECTION" means a cross-connection that does not have a properly installed, maintained, and tested or inspected backflow prevention assembly or backflow prevention method, or the backflow prevention assembly or backflow prevention method does not prevent backflow.

11.39(2) Backflow Prevention and Cross-Connection Control Program Requirements

(a) The supplier must develop a written backflow prevention and cross-connection control program. The written backflow prevention and cross-connection control program must include all of the following:

(i) The supplier's process for conducting surveys.

(ii) The supplier's legal authority to perform a survey of a customer's property to determine whether a cross-connection is present unless the supplier controls all non-single-family-residential connections to the public water system with the most protective backflow prevention assembly or backflow prevention method.

(iii) The process the supplier will use to select a backflow prevention assembly or backflow prevention method to control a cross-connection.

(iv) The supplier's legal authority to install, maintain, test, and inspect backflow prevention assemblies and/or backflow prevention methods and/or require customers to install, maintain, test, and inspect backflow prevention assemblies and/or backflow prevention methods.

(v) The process the supplier will use to track the installation, maintenance, testing, and inspection of all backflow prevention assemblies and backflow prevention methods used to control cross-connections.

(vi) The process the supplier will use to ensure backflow prevention assemblies are tested by a Certified Cross-Connection Control Technician.

(b) The Department may review and revise the written backflow prevention and cross-connection control program.

(c) The supplier must survey all non-single-family-residential connections to the public water system to determine if the connection is a cross-connection unless the supplier controls that connection with the most protective backflow prevention assembly or backflow prevention method. The supplier must survey all connections within the supplier's waterworks to determine if the connection is a cross-connection.

(i) If the supplier identifies a cross-connection during a survey, the supplier must determine the type of backflow prevention assembly or backflow prevention method to control the cross-connection.

(ii) If the supplier becomes aware of a single-family-residential connection to the public water system that is a cross-connection, the supplier must determine the type of backflow prevention assembly or backflow prevention method to control the cross-connection.

(iii) The supplier must maintain a survey compliance ratio of 1.0 each year.

(iv) The supplier may apply to the Department for an alternative survey compliance ratio.

(A) In the application, the supplier must include all of the following information:

(I) An explanation of why the supplier is unable to comply with the survey compliance ratio of 1.0.

(II) The proposed alternative survey compliance ratios and compliance dates.

(a) The proposed alternative survey compliance ratios must meet the survey compliance ratio of 1.0 within a timeline approved by the Department.

(III) A discussion of the supplier's strategy to achieve the proposed alternative survey compliance ratios and the survey compliance ratio of 1.0 within a timeline specified by the Department.

(B) If the supplier receives written Department-approval for alternative survey compliance ratios, the supplier must comply with any Department-specified requirements in the approval.

11.39(3) Treatment Technique Requirements for the Control of Cross-Connections

(a) If the supplier learns of a suspected or confirmed backflow contamination event, the supplier must notify and consult with the Department on any appropriate corrective measures no later than 24 hours after learning of the backflow contamination event.

(b) The supplier is prohibited from installing or permitting any uncontrolled cross-connection to the distribution system or within the supplier's waterworks.

(c) If the supplier discovers an uncontrolled cross-connection and a suspected or confirmed backflow contamination event has not occurred, the supplier must:

(i) No later than 120 days after its discovery, or within a timeline specified in an alternative schedule, install and maintain or require the customer to install and maintain a backflow prevention assembly or backflow prevention method at the uncontrolled cross-connection, suspend service to the customer, or remove the cross-connection.

(A) The supplier must provide justification for an alternative schedule in the written backflow prevention and cross-connection control program.

(I) For situations not specified in Policy DW-007, Backflow Prevention and Cross-Connection Control, the supplier must consult with the Department for approval of an alternative schedule.

(B) The supplier can either control a discovered cross-connection within a customer's service area by containment or containment by isolation.

(I) "CONTAINMENT" means the installation of a backflow prevention assembly or a backflow prevention method at any connection to the public water system that supplies an auxiliary water system, location, facility, or area such that backflow from a cross-connection into the public water system is prevented.

(II) "CONTAINMENT BY ISOLATION" means the installation of backflow prevention assemblies or backflow prevention methods at all cross-connections identified within a customer's water system such that backflow from a cross-connection into the public water system is prevented.

(C) The supplier must ensure that all installed backflow prevention assemblies used to control cross-connections are tested by a Certified Cross-Connection Control Technician upon installation.

(D) The supplier must ensure that all installed backflow prevention methods used to control cross-connections are inspected by the supplier or a Certified Cross-Connection Control Technician upon installation.

(d) The supplier must ensure that backflow prevention assemblies used to control cross-connections are tested annually by a Certified Cross-Connection Control Technician and maintained. The supplier must also ensure that backflow prevention methods used to control cross-connections are inspected annually by the supplier or a Certified Cross-Connection Control Technician and maintained. The supplier must achieve a backflow prevention annual compliance ratio of greater than or equal to (≥) 0.90.

(i) No later than 120 days after the supplier is notified of a failed test, or within a timeline specified in an alternative schedule, the supplier must ensure that the backflow prevention assembly that produced the failed test is repaired or replaced and tested, service is suspended to the customer, or the cross-connection is removed.

(A) The supplier must provide justification for an alternative schedule in the written backflow prevention and cross-connection control program.

(I) For situations not specified in Policy DW-007, Backflow Prevention and Cross-Connection Control, the supplier must consult with the Department for approval of an alternative schedule.

(ii) The supplier must ensure that no backflow prevention assembly is present for more than two consecutive calendar years without being tested, service being suspended to the customer, or the cross-connection being removed.

(iii) No later than 120 days after the supplier is notified of an inadequate backflow prevention method, or within a timeline specified in an alternative schedule, the supplier must ensure that the inadequate backflow prevention method is repaired or replaced, service is suspended to the customer, or the cross-connection is removed.

(A) The supplier must provide justification for an alternative schedule in the written backflow prevention and cross-connection control program.

(I) For situations not specified in Policy DW-007, Backflow Prevention and Cross-Connection Control, the supplier must consult with the Department for approval of an alternative schedule.

(iv) The supplier must ensure that no backflow prevention method is utilized for more than two consecutive calendar years without being inspected, service being suspended to the customer, or the cross-connection being removed.

(e) The supplier must control or remove any uncontrolled cross-connection or ensure that any cross-connection is controlled no later than 10 days after being ordered in writing by the Department.

11.39(4) Backflow Prevention and Cross-Connection Control Program Annual Written Report

(a) The supplier must develop a written backflow prevention and cross-connection control program report for the previous calendar year that includes all of the following information:

(i) The total number of non-single-family-residential connections to the public water system and connections within the supplier's waterworks.

(A) The supplier is not required to include any non-single-family-residential connections identified after October 31 of the calendar year in the total number of non-single-family-residential connections to the public water system until the following calendar year.

(ii) The total number of connections surveyed to determine if cross-connections are present.

(iii) The survey compliance ratio.

(iv) The total number of identified cross-connections.

(v) The number of uncontrolled cross-connections identified during the calendar year, including all of the following:

(A) The number of identified uncontrolled cross-connections that were controlled within 120 days of discovery or within a Department-approved alternative schedule.

(B) The number of identified uncontrolled cross-connections that were not controlled within 120 days of discovery or within a Department-approved alternative schedule.

(C) The number of identified uncontrolled cross-connections that are within 120 days of discovery or a Department-approved alternative schedule.

(vi) The number of backflow prevention assemblies and backflow prevention methods installed at cross-connections that were used during the calendar year.

(vii) The number of backflow prevention assemblies used to control cross-connections that were tested by a Certified Cross-Connection Control Technician and backflow prevention methods used to control cross-connections that were inspected during the calendar year.

(viii) The backflow prevention annual compliance ratio.

(ix) The number of backflow prevention assemblies not tested and backflow prevention methods not inspected during the two most recent consecutive calendar years that were not otherwise controlled or removed from the system.

(b) For each calendar year, the supplier must complete the annual backflow prevention and cross-connection control program report no later than May 1 of the following calendar year.

11.39(5) Compliance Determinations for Backflow Prevention and Cross-Connection Control

(a) Compliance with the survey treatment technique requirement is based on the survey compliance ratio.

(i) The supplier is not required to include any non-single-family-residential connections identified after October 31 of the calendar year in the total number of non-single-family-residential connections to the public water system until the following calendar year.

(b) Compliance with the backflow prevention assembly testing and backflow prevention method inspection treatment technique requirement is based on the backflow prevention annual compliance ratio.

11.39(6) Violations for Backflow Prevention and Cross-Connection Control

(a) The following constitute backflow prevention and cross-connection control treatment technique violations:

(i) The supplier fails to notify the Department of any suspected or confirmed backflow contamination event as specified in 11.39(3)(a).

(ii) The supplier installs or permits an uncontrolled cross-connection. Installing or permitting an uncontrolled cross-connection includes any of the following:

(A) The supplier discovers an uncontrolled cross-connection and fails to comply with the requirements specified in 11.39(3)(c).

(B) The supplier fails to comply with the backflow prevention assembly failed test requirements specified in 11.39(3)(d)(i).

(C) The supplier fails to comply with the backflow prevention assembly testing requirements specified in 11.39(3)(d)(ii).

(D) The supplier fails to comply with the backflow prevention method inadequate method requirements specified in 11.39(3)(d)(iii).

(E) The supplier fails to comply with the backflow prevention method inspection requirements specified in 11.39(3)(d)(iv).

(iii) The supplier fails to achieve the backflow prevention annual compliance ratio specified in 11.39(3)(d).

(iv) The supplier fails to comply with a written order from the Department specified in 11.39(3)(e).

(b) The following constitute backflow prevention and cross-connection control violations:

(i) The supplier fails to develop or implement a written backflow prevention and cross-connection control program as specified in 11.39(2).

(ii) The supplier fails to achieve the survey compliance ratio specified in 11.39(2)(c)(iii) or the Department-approved alternative survey compliance ratios.

(iii) The supplier fails to complete an annual backflow prevention and cross-connection control program report as specified in 11.39(4).

11.39(7) Response to Violations for Backflow Prevention and Cross-Connection Control

(a) In the event of a backflow prevention and cross-connection control treatment technique violation, the supplier must:

(i) Notify the Department no later than 48 hours after the violation occurs.

(ii) Distribute Tier 2 public notice as specified in 11.33.

(b) In the event of a backflow prevention and cross-connection control violation, the supplier must:

(i) Notify the Department no later than 48 hours after the violation occurs.

(ii) Distribute Tier 3 public notice as specified in 11.33.

11.45 MCLs, MCLGs, SMCLs, MRDLs, MRDLGs, TRIGGER LEVEL, AND ACTION LEVELS

11.45(7) Trigger Level, Action Levels, and MCLGs for Lead and Copper

The following trigger level for lead and action levels for lead and copper apply to all community and non-transient, non-community water systems.

TABLE 11.45-VIII TRIGGER LEVEL, ACTION LEVELS, AND MCLGs FOR LEAD AND COPPER

Contaminant	Trigger Level (mg/L)	Action level (mg/L)	MCLG (mg/L)
Copper	N/A	1.3	1.3
Lead	0.010	0.015	Zero

11.46 ANALYTICAL REQUIREMENTS AND LABORATORY CERTIFICATION RULE

11.46(9) Lead and Copper Analytical Requirements

The testing requirements and analytical methods for lead, copper, pH, conductivity, calcium, alkalinity, orthophosphate, silica, and temperature are specified in 40 CFR 141.89(a)(1-4).

11.46(12) Certified Laboratories and Laboratory Certification

(a) Certified Laboratories

The requirements for a certified laboratory are specified in 40 CFR 141.28(a).

(b) Laboratory Certification for Inorganic Chemicals

The laboratory certification requirements for inorganic chemicals are specified in 40 CFR 141.23(k)(3).

(c) Laboratory Certification for VOCs

The laboratory certification requirements for VOCs are specified in 40 CFR 141.24(f)(17) and 40 CFR 141.24(f)(20).

(d) Laboratory Certification for SOCs

The laboratory certification requirements for SOCs are specified in 40 CFR 141.24(h)(19).

(e) Laboratory Certification for *Cryptosporidium*, *E. coli*, and Turbidity

The laboratory certification requirements for *Cryptosporidium*, *E. coli*, and turbidity are specified in 40 CFR 141.705(a-c).

(f) Laboratory Certification for Lead and Copper

The laboratory certification requirements for lead and copper are specified in 40 CFR 141.89(a)(1).

******

11.63 STATEMENT OF BASIS, SPECIFIC STATUTORY AUTHORITY AND PURPOSE: August 14, 2023 rulemaking; Final Action August 14, 2023; Effective Date October 15, 2023

The Water Quality Control Commission made the following revisions in this rulemaking hearing: Adoption of Section 11.17 – Lead and Copper Rule Revisions with amendments to Sections 11.26(1)(a) - Lead and Copper Rule, 11.27(4) - Compositing Samples for Lead and Copper Entry Point Samples, 11.33(1), (2), and (7) - Public Notification Rule, 11.34(2)(a), (b), and (e) - Consumer Confidence Report (CCR) Rule, 11.36(4)(f) - Recordkeeping Requirements Rule, 11.45(7) - Trigger Level, Action Levels, and MCLGs for Lead and Copper, 11.46(9) and (12)(f) - Analytical Requirements and Laboratory Certification Rule, and revisions to 11.39 - Backflow Prevention and Cross-Connection Control Rule, with amendments to section 11.36(4)(j) - Recordkeeping Requirements for the Cross-Connection Control Rule. The provisions of the Colorado Revised Statutes (CRS), section 25-1.5-202, provide specific statutory authority for adoption of these regulatory amendments. The Commission also adopted, in compliance with section 24-4-103(4), CRS, the following statement of basis and purpose.

BASIS AND PURPOSE

Background

All suppliers of drinking water in Colorado are subject to regulations adopted by the U.S. Environmental Protection Agency (EPA) under the Safe Drinking Water Act, (42 U.S.C. 300f et seq.) as well as regulations adopted by the Commission. Colorado, with the Colorado Department of Public Health and Environment (Department) as the administering agency, has been granted primary enforcement authority (primacy) for the public water system supervision program under the federal Safe Drinking Water Act. The Water Quality Control Division (Division) is part of the Department and is responsible for implementing and enforcing the drinking water regulations that are adopted by the Commission. In order to maintain primacy from the EPA, states must also promulgate new federal regulations that are no less stringent than those adopted by the federal government. In this rulemaking the Commission is adopting the Lead and Copper Rule Revisions which are no less stringent than the federally-mandated Lead and Copper Rule Revisions. By retaining primacy, the Department is able to protect public health by ensuring that public water systems provide safe drinking water to Colorado citizens and visitors.

In addition to adopting the federally-mandated Lead and Copper Rule Revisions to maintain primacy, this rulemaking also included revisions to Colorado-specific requirements for backflow prevention and cross-connection control. The Commission adopted these revisions to address outdated references within the Backflow Prevention and Cross-Connection Control Rule, combining compliance ratios for backflow assemblies and methods, and changing the way compliance is tracked and calculated for those assemblies not tested during a given calendar year.

Policies, Handbooks and Guidance and Regulation 11

The Commission adopts regulations that create binding norms or legal obligations of the Department or regulated entities. The Department may develop implementation policies and guidance/handbooks where implementation of Regulation 11 may require interpretation, decision-making flexibility, or a streamlined approach for meeting compliance requirements. These amendments to Regulation 11 include references to guidance/handbooks that the Department intends to develop as part of the ongoing implementation of Regulation 11.

The Division originally adopted WQCD Policy Number 1, *Implementation Policy Framework* (Policy 1) in November 2010 and the associated *Procedure 1* in August 2012; both were prepared in accordance with the Colorado Administrative Procedure Act, Article 4, Title 24 of the CRS.Policy 1 specifically states that implementation policies and associated procedures are not binding regulations and are not to be applied as such. The referenced guidance/handbooks in these amendments are not independent requirements. Violations or other notices of non-compliance cannot be issued against a policy or guidance/handbook. Violations or other notices of non-compliance can, and will, only be issued for a failure to comply with Regulation 11 or an applicable statute (law) included in the CRS. Implementation policies and guidance/handbooks have no compliance expectation.

Lead and Copper Rule Revisions

The Commission replaced the Lead and Copper Rule in Section 11.26 with the Lead and Copper Rule Revisions in Section 11.17. The Lead and Copper Rule Revisions increase public health protection by reducing exposure to lead and copper in drinking water. The Lead and Copper Rule Revisions include the following provisions of the federal regulations as published in the Federal Register, Volume 86, Number 10, January 15, 2021, pages 4198 through 4312, *National Primary Drinking Water Regulations*:

- Additional definitions and recordkeeping and reporting requirements.
- Development and maintenance of a lead service line inventory.
- Establishment of a lead trigger level.
- Changes to lead and copper sample site tier classifications.

- Increased requirements for lead and copper sampling procedures and protocols.
- Additional requirements for lead service line replacement and changes to the rate of lead service line replacement.
- Modifications to optimizing and re-optimizing corrosion control treatment.
- Additional public notification and public education requirements.
- Lead testing in schools and child care facilities.

The amendments adopted by the Commission remain as stringent as the federal requirements for the Lead and Copper Rule Revisions.

By adopting these amendments, the Commission is ensuring the Division can maintain primacy and enforcement authority for the Lead and Copper Rule Revisions when the rule becomes effective on October 16, 2024. A complicating factor is that the EPA has announced plans to strengthen the Lead and Copper Rule Revisions by promulgating the Lead and Copper Rule Improvements prior to the effective date of the Lead and Copper Rule Revisions (86 Fed. Reg. 71,574). As a result, Colorado did not propose more stringent requirements with the exception of establishing one requirement that is more protective than the federal requirements by modifying the Small System Flexibility Compliance Options section to require public water systems to evaluate and identify corrosion control treatment before selecting their compliance option. After EPA promulgates the Lead and Copper Rule Improvements, Colorado will conduct a stakeholder process and consider additional Colorado-specific requirements that are more stringent than the federal requirements.

The Lead and Copper Rule Revisions have been structured so that different elements of the rule will have effective dates that align with the Lead and Copper Rule Improvements. For example, the requirement to complete an initial lead service line inventory by October 16, 2024 will go into effect immediately, whereas requirements that may be modified in the Lead and Copper Rule Improvements, such as tap monitoring requirements, could have a delayed compliance requirement. As a result, the Lead and Copper Rule Revisions also include language staying or extending the rule in case EPA also stays or extends this rule. EPA's intent to modify the rule and effective dates so quickly after a prior final action presents challenges for states and public water systems nationwide. The Division will work closely with the EPA, other states, and stakeholders to address this complexity and transition to the new rule requirements as efficiently as possible.

The Division engaged with stakeholders in 21 virtual meetings between July 2022 and March 2023 to incorporate the Lead and Copper Rule Revisions into proposed regulatory language for Regulation 11. The Division and stakeholders were able to find overall consensus in bringing clarity and organization to the federal requirements while remaining as stringent as the federal rule.

The Commission acknowledges that the Lead and Copper Rule Revisions present complex, data and resource intensive requirements for both public water systems and the Division. As a result, adequate resources will need to be devoted to this rule for successful implementation.

Revisions to Backflow Prevention and Cross-Connection Control Rule

In 2015, the Commission amended the Backflow Prevention Cross-Connection Control (BPCCC) Rule in Section 11.39 to further protect public health and public water systems from potential contamination associated with cross-connections. Furthermore, the Commission continued to ensure public water system compliance with Sections 25-1-114 and 25-1-114.1, CRS. In 2018, the Commission amended the BPCCC Rule to equate duplexes as single family homes. The 2018 update was a direct result of working with suppliers of water on implementing the BPCCC Rule. The 2018 update achieved equal protection of public health and drinking water quality while reducing a burdensome requirement within the rule. In 2020,

the Commission further amended the BPCCC Rule to allow flexibility during the time of the COVID-19 pandemic while continuing to protect public health and public water systems from potential contamination associated with cross-connections.

The Division committed during each of the above rulemaking processes to continue to engage with stakeholders, solicit input, and further evaluate implementation challenges in the adopted rule.

Through this rulemaking, the Commission has further revised the BPCCC Rule to provide additional flexibility to water systems while continuing to protect public health and public water systems from potential contamination associated with cross-connections. The Division recommended that the Commission focus the improvements in several key areas as outlined below. The timing of this enhancement to the BPCCC Rule is due primarily to two factors: 1. Improving the feasibility of meeting certain deadlines to test cross-connections while still protecting public health, and 2. The rule has become 'fully mature' meaning that the ramping up of survey and assembly testing ratios has reached full maturity and a single compliance percentage is now required. The key areas of rule enhancements are as follows:

- Combining cross-connection control method and cross-connection control assembly testing ratios into a combined ratio for compliance with the rule.
- Modifying the extension request language to allow for 'common extension requests' to be automatically granted.
- Modifying the compliance determination for assemblies that were used but not tested in a given calendar year to allow an additional calendar year for the supplier to take mitigating steps. The Commission acknowledges that with this update, the concept of tracking 'active date' on a given assembly will be removed.
- Cleanup of older dates within the rule.

The Division and stakeholders agreed that combining method and assembly ratios into a single compliance ratio now that the rule is mature will simplify compliance reporting within the rule while maintaining public health protection. Also, the Division asserted and the stakeholders agreed that in the seven years of evaluating proper justification for extension requests, several 'general categories' of extensions have been identified. Given that the majority of extension requests are now viewed as relatively low risk and are nearly universally approved, the Division recommended that these categories be included within Policy 7, the Division's Backflow Policy. Only when a system wants to deviate from these 'common extensions' would they have to submit for Division approval. It should be noted that the system would still have to track all extensions and report out on them. This change makes the rule more cohesive and still protects public health.

The Division also recommended that the Commission amend the rule regarding tracking and achieving compliance for any assemblies not tested during a given calendar year. Note, suppliers of water will still have to achieve 90% method verification and assembly testing and track all assemblies. However, for any assemblies not tested during a calendar year, the supplier of water would then have to ensure all of those were tested or removed during the following calendar year, removing the burden of tracking the 'active date' and making the calculation similar. The stakeholders agreed that this change would allow for more flexibility and achievement of compliance while maintaining public health protections.

The Commission agrees with the Division that the above revisions allow public water systems that are working hard to comply with the requirements of the rule more flexibility to achieve compliance while also ensuring that public health is protected.

Additional Amendments

The Lead and Copper Rule Revisions affect several other sections of Regulation 11. The BPCCC Rule revisions affect one other section of Regulation 11. The Commission made the following amendments to be consistent with Department practices, to add clarity, or update outdated requirements:

- 11.27(4) - Addition of reference to 11.17 under sample compositing requirements for lead and copper.

- 11.33(1) and (2) - Addition of Lead and Copper Rule Revisions situations requiring a Tier 1 public notice to Tables 11.33-I and 11.33-II of the Public Notice Rule.

- 11.33(7) - Addition of Lead and Copper Rule Revisions treatment technique violations and exceedance of the lead action level to Table 11.33-V of the Public Notice Rule. Updates to the standard health effects language for lead in Table 11.33-VI of the Public Notice Rule.

- 11.34(2) (a), (b), and (e) - Consumer Confidence Report Rule updates to include notice of the availability of the service line inventory and lead tap sampling data, and changes to the health effects language for lead in Table 11.34-I.

- 11.36(4)(f) - Addition of reference to 11.17 under recordkeeping requirements for lead and copper.

- 11.36(4)(j) - Removal of outdated recordkeeping requirements for the Cross-Connection Rule. Recordkeeping for the BPCCC Rule is captured in 11.36(4)(l).

- 11.45(7) - Addition of the lead trigger level to Table 11.45-VIII.

- 11.46(9) and (12)(f)- Lead and Copper Rule analytical requirements section modified to include requirements under the Lead and Copper Rule Revisions. Addition of laboratory certification requirements for lead and copper.

- Typographical errors, renumbering, and updated cross references revised as necessary throughout Regulation 11.

RULES CONCERNING CAMPAIGN AND POLITICAL FINANCE

Rules as Adopted - Clean

August 18, 2023

(Publication instructions/notes):

Amendments to 8 CCR 1505-6 are as follows:

Amendments to Rule 1 include recodifying the definition rules in Rule 24.2, New Rules, and amendments to current rules:

Rule 1.1 is recodified from current Rule 24.2.1 with a citation amendment:

1.1 "Administrative complaint" means a complaint alleging that one or more violations of Colo. Const. Article XXVIII, Article 45 of Title 1, C.R.S., such other constitutional or statutory provisions that are incorporated or referenced therein, or the rules has occurred and that is filed by the division, or its designee, with a hearing officer pursuant to sections 1-45-111.7(5) and (7), C.R.S.

Rule 1.2 is recodified from current Rule 24.2.2:

1.2 "Agency" or "Department" means the Colorado Department of State.

[Not shown: renumbering current Rule 1.1 to Rule 1.3.]

Amendments to current Rule 1.2, renumbering to Rule 1.4 and concerning a grammatical change:

1.4 "Business activities" for purposes of Colo. Const. Article XXVIII:

1.4.1 "Business activities" means providing goods or services that result in income or any other revenue-generating activity not expressly for political purposes.

1.4.2 "Cannot engage in business activities," means that the articles of incorporation and bylaws, either expressly or implicitly, prohibit the corporation from engaging in any business activities.

[*McConnell v. Federal Elections Commission*, 540 U.S. 93 (2003)]

[Not shown: renumbering current Rule 1.3 to Rule 1.5.]

Amendments to current Rule 1.4, renumbering to Rule 1.6 and concerning a grammatical change:

1.6 "Contribution" has the same meaning as set forth in Colo. Const. Article XXVIII, Section 2(5)(a), and section 1-45-103(6), C.R.S.

1.6.1 A contribution does not include an endorsement of a candidate or an issue by any person, or include interest earned in an interest-bearing bank account, dividend income from invested committee funds, earned income from commercially reasonable transactions, or transfers of money within a political party.

1.6.2 Volunteer services

(a) Time-based services volunteered by an individual are not considered a contribution if the individual receives no direct or indirect compensation for the time volunteered.

(b) If an individual volunteers only a portion of his or her time-based services, the volunteered portion is not considered a contribution.

(c) Any unpaid services that create a thing of value are not considered a contribution. If volunteer services yield a thing of value, "contribution" only includes the reasonable value of the materials involved, unless the value is de minimis.

1.6.3 "Contribution in support of the candidacy" as outlined in Colo. Const. Article XXVIII, Section 2(2), includes all contributions given directly to, or expenditures or spending coordinated with, a candidate for a specific public office, including those to a person who maintains a candidate committee after an election cycle.

Rule 1.7 is recodified from current Rule 24.2.3 and amended:

1.7 "C.R.C.P." means Colorado Rules of Civil Procedure.

[Not shown: renumbering current Rule 1.5 to Rule 1.8.]

Rule 1.9 is recodified from current Rule 24.2.4:

1.9 "Deputy secretary" means the person appointed by the Secretary of State as the deputy secretary of state pursuant to section 24-21-105, C.R.S., with authority under section 1-45-111.7, C.R.S., or such other person as may be designated by the deputy secretary of state as the deputy secretary's designee under section 1-45-111.7(1)(b), C.R.S.

New Rule 1.10, concerning the definition of direct ballot measure expenditure throughout 8 CCR 1505-6:

1.10 "Direct ballot measure expenditure" means a direct ballot issue expenditure or a direct ballot question expenditure.

New Rule 1.11, concerning the definition of direct spending throughout 8 CCR 1505-6:

1.11 "Direct spending", as used in section 1-45-103(7.2), C.R.S., includes both a monetary and non-monetary purchase, payment, distribution, loan, advance, deposit, monetary or non-monetary gift, contract, promise, or agreement to expend funds.

Rule 1.12 is re-codified from current Rule 24.2.5 and amended:

1.12 "Division" or "elections division" has the same meaning as in section 1-45-111.7(1)(c), C.R.S., which is commonly known as the Elections Division of the Colorado Department of State.

[Not shown: renumbering current Rule 1.6 to Rule 1.13.]

New Rule 1.14, concerning the definition of funding intermediary throughout 8 CCR 1505-6:

1.14 "Funding intermediary", as used in section 1-45-103(12)(b)(II)(E), C.R.S., means acting as a pass-through for contributions earmarked for an issue committee. A person becomes an intermediary when they accept an earmarked contribution from one person and then make a contribution to an issue committee as directed.

Rule 1.15 is re-codified from current Rule 24.2.6:

1.15 "Hearing officer" has the same meaning as in section 1-45-111.7(1)(d), C.R.S., and is the person who has been retained by the agency to conduct hearings and issue initial decisions under section 1-45-111.7(6), C.R.S.

[Not shown: renumbering current Rules 1.7 through 1.8 to Rule 1.16 through 1.17.]

Rule 1.18 is re-codified from current Rule 24.2.7:

1.18 "Initial complaint" means a complaint alleging that one or more violations of Colo. Const. Article XXVIII, Article 45 of Title 1, C.R.S., such other constitutional or statutory provisions that are incorporated or referenced therein, or the rules has occurred and that is filed by any person, including the division, with the division pursuant to section 1-45-111.7(2)(a) and (7), C.R.S.

Rule 1.19 is re-codified from current Rule 24.2.8:

1.19 "Initial decision" has the same meaning as section 24-4-102, C.R.S., and includes the initial determination referenced in section 1-45-111.7(6)(b), C.R.S.

[Not shown: renumbering current Rules 1.9 through 1.13 to Rule 1.20 through 1.24.]

New Rule 1.25, concerning the definition of organization throughout 8 CCR 1505-6:

1.25 "Organization", as used in section 1-45-103(12)(b)(II), C.R.S., means a person other than a natural person or two or more natural persons that work together with a particular purpose.

[Not shown: renumbering current Rules 1.14 through 1.16 to Rule 1.26 through 1.28.]

Amendments to current Rule 1.17, renumbered to Rule 1.29, fixing a grammatical error:

1.29 "Political committee" has the same meaning as set forth in Colo. Const. Article XXVIII, Section 2(12), and does not include a married couple.

[Not shown: renumbering current Rules 1.18 through 1.21 to Rule 1.30 through 1.33.]

New Rule 1.34, concerning the definition of respondent throughout 8 CCR 1505-6:

1.34 "Respondent" means a person or entity who is the subject of a campaign and political finance complaint.

Amendments to current Rule 1.22, renumbered to Rule 1.35 concerning a grammatical change:

1.35 "Standalone candidate" means a candidate without a committee who does not accept contributions.

New Rule 1.36, concerning the definition of substantial evidence throughout 8 CCR 1505-6:

1.36 “Substantial evidence”, as used in these rules, means evidence that is probative, credible, and competent and of such weight as to be adequate for the division to accept a fact as true. This standard of proof requires a greater weight of evidence than that which is required for finding “probable cause”.

Amendments to current Rule 1.23, including renumbering to Rule 1.37:

1.37 “Support or oppose”, for the purpose of determining if a person or group of persons is a political committee as defined by Colo. Const. Article XXVIII, Section 2(12)(a), means that the person or group of persons that contributed or made an expenditure did so in coordination with the candidate or candidate committee.

[Not shown: renumbering current Rule 1.24 to Rule 1.38.]

Amendments to Rule 2:

Amendments to Rule 2.1 pertaining to a grammatical change:

2.1 Standalone candidates

[No changes to Rules 2.1.1-2.1.2.]

Amendments to Rule 2.2.4 updating the management of unexpended campaign funds, in accordance with the passage of Senate Bill 23-276. This includes amending subsections (a) and (c) and the repeal and replacement of subsection (d):

2.2.4 Managing unexpended campaign contributions

(a) A candidate committee’s ending balance on the report filed 35 days after the major election must reflect the committee’s unexpended balance and that total is reported as the beginning balance on the first report due in the next election cycle. The candidate committee’s beginning balance must reflect what amount is retained for use in a subsequent election cycle and what amount is retained for use as unexpended funds.

[No changes to subsection (b).]

(c) Candidates seeking election to a different office

(1) A candidate committee may transfer funds to a new candidate committee established by the same candidate for a different public office, subject to the political party contribution limit for the prior office sought. [Colo. Const. Article XXVIII, Section 3, and section 1-45-103.7(12)(b), C.R.S.]

(A) Funds held in excess of the party limit must be disbursed before the new election cycle in accordance with section 1-45-106(5), C.R.S., and cannot be rolled over.

(B) Funds previously designated as unexpended funds from a prior election cycle cannot be transferred to the new committee and must be disbursed as specified in section 1-45-106(1)(a) and (b), C.R.S.

(2) Contributions from persons or committees made to the prior candidate committee do not apply toward the contribution limits for the new candidate committee.

(3) A candidate committee transferring funds to a candidate committee for a different office must terminate within ten days of registering the new candidate committee.

(4) A candidate seeking election to a state, county, or local office may not transfer funds from a federal candidate committee to a Colorado candidate committee that is subject to the provisions of the Fair Campaign Practices Act.

(d) Funds rolled over, up to the political party limit of a new candidate committee, from a candidate's prior candidate committee will have the effect of offsetting how much the candidate may receive in party contributions during that election cycle by the amount of the rollover.

Amendments to Rule 2.4 concerning personal financial disclosures, including New Rule 2.4.2, pertaining to failing to file personal financial disclosures and necessary amendments and renumbering, and repealing Rule 2.4.6 due to being duplicative of statute:

2.4 Personal financial disclosures

2.4.1 Filing of personal financial disclosures

(a) A candidate need not file a new personal financial disclosure statement if the candidate filed either a full or amended disclosure statement less than 90 days before filing a candidate affidavit. [Section 1-45-110(2)(a) and (b), C.R.S.]

(b) An amended or updated disclosure statement satisfies the full disclosure statement requirement if all required amended statements have been filed since the filing of the full disclosure statement. [Sections 1-45-110 and 24-6-202, C.R.S.]

(c) If a candidate withdraws his or her candidacy by submitting appropriate documentation before filing the disclosure statement required in section 1-45-110(2)(a), C.R.S., the candidate need not file a disclosure statement. Any delinquent filing fines that the candidate accrued before withdrawing may be waived by the appropriate filing office.

(d) All personal financial disclosure filings required under sections 1-45-110 and 24-6-202, C.R.S., must be filed electronically by 11:59 p.m. MT on the date due and will be publicly available online.

(e) Incumbents seeking re-election need not file a new personal financial disclosure statement if they have already filed their annual personal financial disclosure statement. [Section 24-6-202(4)(b), C.R.S.]

New Rule 2.4.2:

2.4.2 Failure to file

(a) If a complaint is filed alleging that the personal financial disclosure was incomplete, inaccurate, or not updated, the division may consider the following

responses from the candidate or incumbent, without limitation, in determining whether the personal financial disclosure, amendment, or update meets statutory requirements:

(1) Documentation refuting the allegation of inaccuracy or incompleteness, including without limitation, for example:

(A) Federal tax returns;

(B) Banking, investment, or other financial statements;

(C) Deeds of trust or other property records;

(D) A financial manager's or auditor's certified statement of the candidate's or incumbent's financial holdings; or

(E) Other independently verifiable documentary evidence; or

(2) A signed affirmation under penalty of perjury from the candidate or incumbent attesting that the allegation of inaccuracy or incompleteness is not true and the substance of the personal financial disclosure, including amendments and annual update, is complete and accurate.

(b) If there is evidence of willful behavior outlined in section 24-6-202(7), C.R.S., such complaint may be referred to the applicable law enforcement without prejudice to the division's concurrent investigation of the matter and the pursuit of civil or administrative penalties independent of any criminal sanction.

(c) If a person subject to a complaint related to a personal financial disclosure under section 1-45-110(2), C.R.S., meets the criteria of section 1-45-110(5), C.R.S., and is defeated or withdraws from the candidacy, that person will not be required to file, supplement, or correct a personal financial disclosure after the election but may still be subject to a complaint and potential monetary penalty.

Amendments to Rule 4, including New Rule 4.3 regarding the major purpose standard and necessary renumbering:

4.3 Major purpose standard

4.3.1 For an organization supporting or opposing a non-statewide ballot measure, a major purpose of the organization as that phrase is used in Colo. Const. Article XXVIII, Section 2(10)(a), is determined based on the consideration of:

(a) The organization's specifically identified objectives in its organizational documents at the time it is established or as such documents are later amended; or

(b) The organization's demonstrated pattern of conduct, as reflected through the following non-exclusive set of factors, including:

(1) The scope of the issues addressed in the organization's print and electronic publications;

(2) The length of time the organization had existed;

(3) The organization's original purpose;

(4) The organization's organizational structure;

(5) The various issues in which the organization had been involved; and

(6) The amount of money the organization had spent on the issue in question in relation to its annual budget.

[*Cerbo v. Protect Colo. Jobs, Inc*., 240 P.3d 495, (Colo. App. 2010)]

4.3.2 For an organization supporting or opposing a statewide ballot measure, a major purpose as outlined in section 1-45-103(12)(b), C.R.S., is determined as follows:

(a) The organization's specifically identified objectives in its organizational documents at the time it is established or as such documents are later amended; or

(b) The organization's demonstrated pattern of conduct which is evidenced by its spending. Specifically,

(1) During the current and two preceding years, did the organization:

(A) Make contributions to a single statewide issue committee or make direct ballot measure expenditures in support of or opposition to one statewide ballot measure that, combined, exceeded 20% of the organization's total spending (in any location and for any reason) during the current and two preceding years; or

(B) Make contributions to more than one statewide issue committee or make direct ballot measure expenditures in support of more than one statewide ballot measure that combined exceeded 30% of the organization's total spending (in any location and for any reason) during the current and two preceding years; or

(2) Does the organization have a pattern of conduct as acting as a funding intermediary by making earmarked contributions to an issue committee.

4.3.3 For campaign and political finance complaints involving whether the respondent is an organization that has a major purpose of supporting or opposing one or more ballot measures, a rebuttable presumption that the organization met the standard for having a major purpose under section 1-45-103(12)(b), C.R.S., is created if:

(a) A campaign and political finance complaint has been filed and the division initially determines that the complaint alleges a potential violation in which the respondent may have a major purpose of supporting or opposing one or more ballot measures; and

(b) The respondent fails to provide substantial evidence, as defined in Rule 1.36, that they have not met the major purpose standard.

4.3.4 This presumption will be considered sufficient information to support the filing of an administrative complaint with a hearing officer under section 1-45-111.7(5), C.R.S. The presumption of meeting the major purpose standard can be rebutted by the respondent

during the administrative hearing process. The presumption of meeting the major purpose standard no longer applies once the respondent has appeared and answered an administrative complaint in a hearing before a hearing officer.

[Not shown: renumbering current Rules 4.3 through 4.5 to Rules 4.4 through 4.6.]

Amendments to Rule 5.1, including New Rules 5.1.4 through 5.1.6 and concerning the amount that an independent expenditure committee is required to report:

5.1 An independent expenditure committee must report donations over $20 given for the purpose of making an independent expenditure.

5.1.1 An independent expenditure committee must itemize donations of $250 or more per year given for the purpose of making an independent expenditure and include the name and address of the donor.

5.1.2 If the committee is unable to gather the information required by section 1-45-107.5(4)(b)(II), or (III), C.R.S., within 30 days after receipt of the donation, the committee must return the donation to the donor no later than the 31st day after receipt.

5.1.3 An independent expenditure committee must itemize independent expenditures made in an aggregate amount of $1,000 in any one calendar year and include the information required by section 1-45-107.5, C.R.S.

5.1.4 An independent expenditure committee must list all expenditures of $250 or more during a reporting period, including the name and address of payees. The committee may report any disbursement not defined as an expenditure to the appropriate officer.

5.1.5 An independent expenditure committee must list individual expenditures in amounts of less than $250 that aggregate to total of $250 or more to the same payee during the reporting period.

5.1.6 An independent expenditure committee may report all other expenditures of less than $250 during a reporting period, in total, as non-itemized expenditures.

Amendments to Rule 10.1, concerning an outdated language and inclusion of statutory references:

10.1 Unexpended campaign contributions.

[No changes to Rules 10.1.1 to 10.1.2]

10.1.3 Unexpended contributions may not be used for personal purposes except to reimburse a candidate or incumbent for reasonable and necessary expenses for the care of a child or a dependent as allowed under sections 1-45-103.7(6.5) and 1-45-106(1)(b)(VI), C.R.S.

New Rule 10.19, concerning the reporting of a direct ballot measure expenditure:

10.19 Reporting a direct ballot measure expenditure

10.19.1 The disclosure report required by section 1-45-108(1)(a)(VI), C.R.S.

(a) The aggregate of $5,000 in direct ballot measure expenditures can be met with expenditures of any amount.

(b) Once a person makes $5,000 in direct ballot measure expenditures in the aggregate within a calendar year, each additional expenditure of $1,000 or more must be reported.

(c) A single direct ballot measure expenditure of less than $1,000 does not need to be reported.

(d) Direct ballot measure expenditure disclosure reports must be filed within 48 hours of when the direct spending occurs or when a contractual agreement is made.

(e) Expenditures by an issue committee are not direct ballot measure expenditures and should be reported in accordance with Rule 10.3 and section 1-45-108(1), C.R.S.

(f) Notwithstanding any other provision of law, a foreign government, foreign corporation, or natural person who is not a United States citizen may not make a direct ballot measure expenditure, and a person making a direct ballot measure expenditure may not knowingly accept funds from a foreign government, foreign corporation, or a natural person who is not a citizen of the United States for the purpose of making a direct ballot measure expenditure.

10.19.2 Each direct ballot measure expenditure disclosure must include:

(a) The name and address of the payor;

(b) The name and address of payee;

(c) The name of the original source of the funds, if the direct ballot measure expenditure was paid with earmarked funds;

(d) The amount of the direct ballot measure expenditure;

(e) The date of the direct ballot measure expenditure;

(f) The purpose for which the direct ballot measure expenditure was made, including the ballot measure and whether the direct ballot measure expenditure was in support or opposition of the ballot measure; and

(g) An affirmation signed by an authorized representative on a form provided by the Department or appropriate officer that the filer does not meet the definition of an issue committee and only used permissible sources for the expenditure.

New Rule 10.20, regarding earmarked contributions:

10.20 Earmarked contributions

10.20.1 A contribution will be considered earmarked if it includes or is accompanied by a direction or instruction which results in all or any part of a contribution or expenditure being made to, or expended on behalf of, a candidate, committee, or ballot measure.

10.20.2 Disclosure reports of earmarked contributions must include the original source of the funds as well as conduits, funding intermediaries, or other persons involved in the transaction.

10.20.3 Recipients of earmarked contributions must disclose the original source of the contribution and the person who made the contribution.

Amendments to Rule 12.3, including New Rule 12.3.5 and concerning the termination of candidate committees as required by Senate Bill 23-276:

12.3 A committee may file a termination report terminating the committee if the following conditions are met:

12.3.1 The committee no longer intends to receive contributions or make expenditures;

12.3.2 The committee's TRACER account has a zero balance, indicating it has no cash or assets on hand and there are no outstanding debts, penalties, or obligations;

12.3.3 A committee may dispose of assets remaining in its possession before termination in the same manner as allowed for unexpended contributions;

12.3.4 The committee has no pending campaign and political finance complaints or related proceedings pending before the elections division or any court; and

12.3.5 In addition to the requirements outlined in this Rule 12.3, candidate committees must terminate within:

(a) One year after the election, if the candidate was not elected; or

(b) One year after an elected candidate leaves office.

[Sections 1-45-103.7(12)(a)(I) and (II), C.R.S.]

Amendments to Rule 19.1, concerning the removal of outdate language with the passage of Senate Bill 23-276 and a grammatical change:

19.1 All disclosure reports filed with the Secretary of State under Colo. Const. Article XXVIII and Article 45 of Title 1, C.R.S., must be filed electronically on the Secretary of State's TRACER system, except as provided in Rule 19.2. Paper reports will not be accepted.

Amendments to Rule 23.1, concerning filing initial complaints and including New Rule 23.1.3 and necessary renumbering:

23.1 Filing initial complaints

23.1.1 Campaign and political finance complaints must be filed in writing and can be submitted by hardcopy or electronically. Electronic signatures are permitted for any complaint documentation that requires a signature by complaint, respondent, or the elections division.

23.1.2 A complaint must identify both a respondent and a complainant. Anonymous complaints or complaints that fail to identify a complainant and respondent may be rejected and not reviewed by the elections division.

23.1.3 Complaints must meet the plausibility pleadings standard by presenting a plausible basis, based on concrete, non-conclusory allegations of particularized facts, to support the allegations that a potential campaign and political finance violation occurred. The plausibility of an allegation is determined while accepting as true the concrete, non-conclusory assertions of fact upon which the allegation is based.

23.1.4 Complaints that stem from a common set of operative facts as a pending complaint will be consolidated when practicable. When consolidation is not practicable and the outcome of the initial case will be determinative of the later case, a complaint will be stayed until a final agency decision issues on the initial complaint and any appeals are resolved.

23.1.5 Violations stemming from late or missing filings that have had a late filing penalty assigned or the assigned penalty has been waived under Rule 18 are not subject to additional monetary penalties under Rule 23.3 for the late filing violation.

Amendments to Rule 23.3, regarding the settlement of complaints and fine structure for violations, and including necessary renumbering and grammatical changes:

23.3 Settlement of complaints and fine structure for violations

23.3.1 After a complaint has been filed with a hearing officer the elections division may enter into a settlement agreement with the respondent.

23.3.2 In assessing a fine amount or approving a settlement, the deputy secretary of state or a hearing officer, as applicable, will consider all of the following factors:

(a) Specific fine amounts outlined in Rule 23.3.3;

(b) Any appropriate specific action in Rule 23.3.4;

(c) Whether Rule 18 late filing penalties have been issued and if a waiver was granted;

(d) Sanctions available under section 1-45-111.5, C.R.S.; and

(e) The mitigating and aggravating factors, including those listed in Rule 23.3.5, to increase or decrease the monetary fine or terms.

23.3.3 Fine amounts

[No changes to subsection (a).]

(b) Failure to file complete and accurate affidavits, disclosures, contributions, expenditures, or other finance reports

(1) Failure to file complete and accurate reports is a $100 fine per report plus 5 percent of the activity not accurately or completely reported.

(2) Failure to file an accurate candidate affidavit

(A) If the affidavit is submitted within 14 days of registration deadline, the fine is at least $50; or

(B) If the affidavit is submitted after 14 days post deadline, the fine is at least $100.

(3) Failure to file an accurate or complete initial, updated, or amended personal financial disclosure as required under section 1-45-110, C.R.S., which includes content required by section 24-6-202(2), C.R.S.

(A) If the personal financial disclosure is filed or corrected within 14 days of the applicable filing due date, the fine is at least $50;

(B) If the personal financial disclosure is filed or corrected prior to the filing of any complaint alleging an insufficient filing of a personal financial disclosure, so long as the disclosure is submitted at least 30 days prior to the first election in which the candidate is running, the fine is at least $100;

(C) If the personal financial disclosure is filed or corrected after the filing of any complaint alleging an insufficient filing of a personal financial disclosure, so long as the disclosure is submitted at least 30 days prior to the first election in which the candidate is running, the fine is at least $250;

(D) If the personal financial disclosure is filed or corrected fewer than 30 days before the election in which the candidate is running, the fine is at least $500;

(E) If the candidate or incumbent is defeated or withdraws and the personal financial disclosure was not corrected, the fine will be at least $500; or

(F) If the personal financial disclosure is corrected after the election, and the respondent was not defeated or did not withdraw, the fine is at least $1,000.

(4) Failure to file an initial disclosure report or an annual update as required under section 24-6-202, C.R.S.

(A) If the disclosure report is filed within 14 days of due date, the fine is at least $50;

(B) If the disclosure report is filed within 28 days of due date, the fine is at least $100;

(C) If the disclosure report is filed more than 28 days late but at least 30 days prior to an election in which the official is running, the fine is at least $500; or

(D) If the disclosure report is filed after an election in which the official is running, the fine is at least $1,000.

(5) Filing an inaccurate or incomplete personal financial disclosure or failure to correct an inaccurate or incomplete personal financial disclosure could result in criminal and civil penalties under section 24-6-202(7), C.R.S.

[No changes to subsections (c) and (d).]

New subsection (e) including fines for violations by the state or political subdivisions:

(e) Violations by the state or a political subdivision under section 1-45-117, C.R.S.

(1) If the violation is cured before the election but there was no substantial compliance, the fine will be at least $500;

(2) If the violation is not cured before the election, the fine will be at least $1,000; or

(3) If the amount of funds improperly used is ascertainable, the fine will be at least three times the amount of the improperly used funds.

(f) Other violations of campaign and political finance rules and regulations will be assessed penalties based on the circumstances of the violations and factors outlined in Rule 23.3.4.

Amendments to Rule 23.3.4, including a grammatical change:

23.3.4 Specific action(s)

[No changes to subsection (a).]

[Not shown: current Rule 24.2 is repealed and re-codified throughout Rule 1.1. This is shown at the beginning of the document.]

[Not shown: renumbering of current Rules 24.3 through 24.22 to Rules 24.2 through 24.21.]

MEDICAL RULES AND REGULATIONS

3 CCR 713-1

[Editor's Notes follow the text of the rules at the end of this CCR Document.]

...

1.15 RULES AND REGULATIONS REGARDING THE LICENSURE OF AND PRACTICE BY PHYSICIAN ASSISTANTS

…

C. EXTENT AND MANNER IN WHICH A PHYSICIAN ASSISTANT MAY PERFORM ACTS CONSTITUTING THE PRACTICE OF MEDICINE WITH A COLLABORATIVE AGREEMENT IN PLACE

1. The requirements for a Collaborative Agreement applies to all collaborating physicians and physician assistants as of August 7, 2023.

2. Responsibilities of the Physician Assistant

   a. Compliance with these Rules. A physician assistant is responsible for implementing and complying with statutory requirements and the provisions of these Rules.

   b. License. A physician assistant shall ensure that the individual's license to practice as a physician assistant is active and current prior to performing any acts requiring a license.

   c. Collaborative Agreement. A physician assistant must keep on file their Collaborative Agreement at their primary location of practice and make it available to the Board upon request.

   d. Identification As A Physician Assistant. While performing acts defined as the practice of medicine, a physician assistant shall clearly identify both visually (e.g. by nameplate or embroidery on a lab coat) and verbally as a physician assistant.

   e. Chart Note. A physician assistant shall make a chart note for every patient for whom the physician assistant performs any act defined as the practice of medicine in section 12-240-107(1), C.R.S. When a physician assistant consults with any physician about a patient, the physician assistant shall document in the chart note the names of any physician consulted and the date of the consultation.

   f. Documentation. A physician assistant shall keep such documentation as necessary to assist a collaborating or other physician in performing an adequate performance assessment as set forth below in Section (C)(3)(b) of this Rule.

   g. Emergency Department Settings

(1) Collaborative Agreements entered into by physician assistants in emergency departments in hospitals with Level I or II trauma center settings shall take the form of a supervisory agreement as identified in section 12-240-114.5(2)(b)(IV)(A), C.R.S.

(2) For Collaborative Agreements entered into by physician assistants in emergency departments in hospitals other than with Level I or II trauma center settings, a supervising physician or physician group may increase the number of hours for which the Collaborative Agreement is a supervisory agreement, pursuant to section 12-240-114.5(2)(b)(IV)(B), C.R.S.

3. Requirements for Physicians and Physician Groups Entering into Collaborating Agreements

a. Physicians must be actively practicing medicine in Colorado by means of a regular and reliable physical presence in Colorado. For purposes of this Rule, to practice medicine based primarily on telecommunication devices or other telehealth technologies does not constitute “actively practicing medicine in Colorado.”

b. Performance Evaluation

(1) A physician or physician group who has entered into a Collaborating Agreement with a physician assistant shall develop and carry out a periodic Performance Evaluation as required by these Rules and section 12-240-114.5(1)(c), C.R.S. The Performance Evaluation should include domains of competency relevant to the particular practice and utilize more than one modality of assessment to evaluate those domains of competency. The Performance Evaluation should take into account the education, training, experience, competency, and knowledge of the individual physician assistant for whatever practice area in which the physician assistant is engaged.

(2) The statutory relationship between the physician or physician group and physician assistant is by its nature a team relationship. The purpose of the Performance Evaluation is to enhance the collaborative nature of the team relationship, promote public safety, clarify expectations, and facilitate the professional development of an individual physician assistant.

(3) The domains of competency may be dependent upon the type of practice the physician assistant is engaged in and may include but are not limited to:

(a) Medical knowledge;

(b) Ability to perform an appropriate history and physical examination;

(c) Ability to manage, integrate and understand objective data, such as laboratory studies, radiographic studies, and consultations;

(d) Clinical judgment, decision-making and assessment of patients;

(e) Accurate and appropriate patient management;

(f) Communication skills (patient communication and communication with other care providers);

(g) Documentation and record keeping;

(h) Collaborative practice and professionalism;

(i) Procedural and technical skills appropriate to the practice.

(4) The modalities of assessment to evaluate domains of competency may include but are not limited to:

(a) Co-management of patients;

(b) Direct observation;

(c) Chart review with identification of charts reviewed;

(d) Feedback from patients and other identified providers.

(5) Performance evaluations must occur with at least the minimum frequency required in section 12-240-114.5(2)(b)(I)(C), C.R.S.

(6) A physician or physician group must maintain accurate records and documentation of the Performance Evaluations, including the initial Performance Evaluation and periodic Performance Evaluations for each physician assistant with whom they have entered into a Collaborative Agreement.

(7) The Board may audit a physician's or physician group's performance assessment records. Upon request, the physician or physician group shall produce records of the performance assessments as required by the Board.

4. Waiver of Provisions of these Rules

a. Criteria for Obtaining Waivers.

(1) Upon a showing of good cause, the Board may permit waivers of any provision of these Rules.

(2) Factors to be considered in granting such waivers include, but are not limited to: whether the physician assistant is located in an underserved or rural area; the quality of protocols setting out the responsibilities of a physician assistant in the particular practice; any disciplinary history on the part of the physician assistant or the physician entering into a Collaborating Agreement; and whether the physician assistant in question works less than a full schedule.

(3) All such waivers shall be in the sole discretion of the Board. All waivers shall be strictly limited to the terms provided by the Board. No waivers shall be granted if in conflict with state law.

b. Procedure for Obtaining Waivers.

(1) Applicants for waivers must submit a written application on forms approved by the Board detailing the basis for the waiver request.

(2) The written request should address the pertinent factors listed in Section (C)(4)(a)(2) of this Rule and include a copy of any written protocols in place for the supervision of physician assistants.

(3) Upon receipt of the waiver request and documentation, the matter will be considered at the next available Board meeting.

D. PRESCRIPTION AND DISPENSING OF DRUGS.

1. Prescribing Provisions:

a. A physician assistant may issue a prescription order for any drug or controlled substance provided that:

(1) Each prescription and refill order is entered on the patient's chart.

(2) For each written prescription issued by a physician assistant, the prescription shall contain, in legible form imprinted on the prescription, the physician assistant's name and the address of the health facility where the physician assistant is practicing.

(a) If the health facility is a multi-specialty organization, the name and address of the specialty clinic within the health facility where the physician assistant is practicing must be imprinted on the prescription.

(3) A physician assistant may not issue a prescription order for any controlled substance unless the physician assistant has received a registration from the United States Drug Enforcement Administration.

(4) For the purpose of this Rule electronic prescriptions are considered written prescription orders.

(5) The dispensing of prescription medication by a physician assistant is subject to section 12-280-120(6)(a), C.R.S.

2. Obtaining Prescription Drugs or Devices to Prescribe, Dispense, Administer or Deliver

a. No drug that a physician assistant is authorized to prescribe, dispense, administer, or deliver shall be obtained by said physician assistant from a source other than a collaborating physician, pharmacist, or pharmaceutical representative.

b. No device that a physician assistant is authorized to prescribe, dispense, administer, or deliver shall be obtained by said physician assistant from a source

other than a collaborating physician, pharmacist, or pharmaceutical representative.

E. REPORTING REQUIREMENTS

1. Collaborative Agreements.

a. A Collaborative Agreement must be in writing and maintained at the main practice location for the physician assistant.

b. The Collaborative Agreement must include the requirements set forth in section 12-240-114.5(2)(a), C.R.S.

c. The form shall be signed by the physician and the physician assistant.

d. Collaborative Agreements for physician assistants with fewer than five thousand practice hours, or for physician assistants changing practice areas with fewer than three thousand hours in the new practice area shall be a supervisory agreement and include the additional requirements set forth in section 12-240-114.5(2)(b), C.R.S.

Effective 12/30/83; Revised 05/30/85; Revised 12/30/85; Revised 8/30/92; Revised 11/30/94; Revised 12/1/95; Revised 12/14/95; Revised 3/30/96; Revised 3/30/97; Revised 9/30/97; Revised 3/30/98; Revised 9/30/98; Revised 06/30/00; Revised 12/30/01; Revised 9/30/04; Revised 2/9/06, Effective 3/31/06; Emergency Rule Revised and Effective 7/01/10; Revised 08/19/10, Effective 10/15/10; Revised 11/15/12, Effective 01/14/2013; Revised 5/22/14, Effective 7/15/14; Revised 8/20/15, Effective 10/15/15; Emergency Rule Revised And Effective 8/18/16; Permanent Rule Revised 8/18/16; Effective 10/15/16; Permanent Rule Revised 2/15/18; Emergency Rule Revised 8/17/23 and Effective 8/17/23; Permanent Rule Revised 8/17/23 and Effective 10/15/23;

COLORADO
Department of Regulatory Agencies
Division of Professions and Occupations

COLORADO MEDICAL BOARD

JUSTIFICATION OF EMERGENCY STATUS

August 17, 2023

The basis for these rules is to carry out the provisions of the Medical Practice Act at section 12-240-101, *et seq.*, C.R.S. These emergency rules are promulgated to comply with state law.

The immediate adoption of amendments to Rule 1.15, RULES AND REGULATIONS REGARDING THE LICENSURE OF AND PRACTICE BY PHYSICIAN ASSISTANTS, is to implement Colorado Senate Bill 23-083 (Concerning an Expansion of a Physician Assistant's Ability to Practice, and, in Connection Therewith, Changing the Relationship between a Physician Assistant and a Physician or Podiatrist from Supervision to Collaboration).

The Board finds it is imperatively necessary to adopt the amendments on an emergency basis in order to comply with state law, SB23-083, which took effect on August 7, 2023. The Board further finds that compliance with the requirements of section 24-4-103, C.R.S. would be contrary to the public interest.

3 CCR 713-1

[Editor's Notes follow the text of the rules at the end of this CCR Document.]

...

1.32 RULES AND REGULATIONS REGARDING GENERALLY ACCEPTED STANDARDS OF MEDICAL PRACTICE REGARDING PREGNANCY-RELATED SERVICES

A. Basis: The authority for promulgation of Rule 1.32 ("these Rules") by the Colorado Medical Board ("Board") is set forth in sections 24-4-103, 12-240-106(1)(a), and 12-30-120(2), C.R.S.

B. Purpose: The purpose of these rules and regulations is to implement the requirements of section 12-30-120(2), C.R.S.

C. Definitions

1. "Abortion" has the meaning set forth in section 25-6-402(1), C.R.S.

2. "Medication abortion" has the meaning set forth in section 12-30-120(1)(b), C.R.S.

3. "Medication abortion reversal" has the meaning set forth in section 12-30-120(1)(c), C.R.S.

D. Standard of Care Considerations

1. Compliance with generally accepted standards of medical practice requires a licensee to exercise the same degree of knowledge, skill, and care as exercised by licensees in the same field of medicine at the time care is rendered. Substandard care cannot be excused on the grounds that other licensees also provided care which deviates from generally accepted medical standards. Ascertaining the objectively reasonable standard of care is more than just a factual finding of what all, most, or even a "respectable minority" of licensees do. Rather, licensees will be judged according to the tenets of the school of practice to which the licensee professes to follow.

2. The Board evaluates generally accepted standards of medical practice on a case-by-case basis. Each instance of medical care will involve its own unique set of facts that the Board must evaluate against the backdrop of evidence-based practice standards when available.

3. In evaluating whether a licensee's provision of medication abortion reversal meets generally accepted standards of medical practice, the Board will evaluate the scope and nature of information exchanged between the licensee and patient prior to services being provided. The Board anticipates that a fully informed consent will include, at a minimum, information about the risks, benefits, likelihood of intended outcome of the proposed treatment, and likelihood of achieving the intended outcome without the proposed treatment in order for the patient to make an informed decision about whether to undertake the treatment. The Board anticipates that the licensee will document the

substance of all informed consent discussions and will place a copy of all written informed consent disclosures within the patient's chart.

4. Although the Board will not treat medication abortion reversal as a *per se* act of unprofessional conduct, the Board does not consider administering, dispensing, distributing, or delivering progesterone with the intent to interfere with, reverse, or halt a medication abortion undertaken through the use of mifepristone and/or misoprostol to meet generally accepted standards of medical practice under section 12-240-121(1)(j), C.R.S. For other conduct that could meet the definition of medication abortion reversal, the Board will investigate such deviation on a case-by-case basis. Licensees are expected to practice evidence-based medicine, and any licensee who provides unscientific treatments that fall below the generally accepted standard of care may be subject to discipline.

Emergency Rule Adopted 8/17/23 and Effective 10/1/23; Permanent Rule Adopted 8/17/23 and Effective 10/15/23;

…

COLORADO
Department of
Regulatory Agencies
Division of Professions and Occupations

COLORADO MEDICAL BOARD

JUSTIFICATION OF EMERGENCY STATUS

August 17, 2023

The basis for these rules is to carry out the provisions of the Medical Practice Act at section 12-240-101, *et seq.*, C.R.S. These emergency rules are promulgated to comply with state law.

The Board finds that immediate adoption of new Rule 1.32, RULES AND REGULATIONS REGARDING GENERALLY ACCEPTED STANDARDS OF MEDICAL PRACTICE REGARDING PREGNANCY-RELATED SERVICES, is imperatively necessary to comply with state law or for the preservation of public health, safety, or welfare and compliance with the requirements of section 24-4-103, C.R.S. would be contrary to the public interest.

The Board finds it is imperatively necessary to adopt Rule 1.32 on an emergency basis in order to comply with the legislature's directive in SB23-190 to promulgate rules no later than October 1, 2023.

4 CODE OF COLORADO REGULATIONS (CCR) 723-3

PART 3
RULES REGULATING ELECTRIC UTILITIES

BASIS, PURPOSE, AND STATUTORY AUTHORITY.

The basis and purpose of these rules is to describe the electric service to be provided by jurisdictional utilities and master meter operators to their customers; to designate the manner of regulation over such utilities and master meter operators; and to describe the services these utilities and master meter operators shall provide. In addition, these rules identify the specific provisions applicable to public utilities or other persons over which the Commission has limited jurisdiction. These rules address a wide variety of subject areas including, but not limited to, service interruption, meter testing and accuracy, safety, customer information, customer deposits, rate schedules and tariffs, discontinuance of service, master meter operations, flexible regulation, procedures for administering the Low-Income Energy Assistance Act, electric service low-income program, cost allocation between regulated and unregulated operations, recovery of costs, the acquisition of renewable energy, small power producers and cogeneration facilities, and appeals regarding local government land use decisions. The statutory authority for these rules can be found at §§ 29-20-108, 40-1-103.5, 40-2-108, 40-2-124(2), 40-2-202, 40-2-203, 40-3-102, 40-3-102.5, 40-3-103, 40-3-104.3, 40-3-106, 40-3-111, 40-3-114, 40-4-101, 40-4-106, 40-4-108, 40-4-109, 40-5-103, 40-7-113.5, 40-7-116.5, 40-8.7-105(5), and 40-9.5-107(5), C.R.S.

GENERAL PROVISIONS

* * * *

[indicates omission of unaffected rules]

3001. Definitions.

The following definitions apply throughout this Part 3, except where a specific rule or statute provides otherwise. In addition to the definitions here, the definitions found in the Public Utilities Law and Part 1 apply to these rules. In the event of a conflict between these definitions and a statutory definition, the statutory definition shall apply. In the event of a conflict between these definitions and a definition in Part 1, these definitions shall apply.

(a) "Affiliate" of a utility means a subsidiary of a utility, a parent corporation of a public utility, a joint venture organized as a separate corporation or partnership to the extent of the individual utility's involvement with the joint venture, a subsidiary of a parent corporation of a utility or where the utility or the parent corporation has a controlling interest over an entity.

(b) “Aggregated data” means customer data, alone or in combination with non-customer data, resulting from processing (e.g., average of a group of customers) and/or the compilation of customer data of one or more customers from which all unique identifiers and personal information has been removed.

(c) "Applicant for service" means a person who applies for utility service and who either has taken no previous utility service from that utility or has not taken utility service from that utility within the most recent 30 days.

(d) “Base rate” means charges used to recover costs of utility infrastructure and operations, including a return on capital investment, not otherwise recovered through a utility rate adjustment mechanism.

(e) "Basis point" means one-hundredth of a percentage point (100 basis points = one percent).

(f) "Benefit of service" means the use of utility service by each person of legal age who resides at a premises to which service is delivered and who is not registered with the utility as the customer of record.

(g) "Commission" means the Colorado Public Utilities Commission.

(h) “Contracted agent” means any person that has contracted with a utility in compliance with rule 3030 to assist in the provision of regulated utility services (e.g., an affiliate or vendor).

(i) "Customer" means any person who is currently receiving utility service. Any person who moves within a utility’s service territory and obtains utility service at a new location within 30 days shall be considered a "customer." Unless stated in a particular rule, "customer" applies to any class of customer as defined by the Commission or by utility tariff.

(j) “Customer data” means customer-specific data or information, excluding personal information as defined in paragraph 1004(x), that is:

(I) collected from the electric meter by the utility and stored in its data systems (e.g., kWh, kW, voltage, VARs and power factor);

(II) combined with customer-specific energy usage information on bills issued to the customer for regulated utility service when not publicly or lawfully available to the general public; or

(III) about the customer’s participation in regulated utility programs, such as renewable energy, demand-side management, load management, or energy efficiency programs.

(k) "Distribution facilities" are those lines designed to operate at the utility's distribution voltages in the area as defined in the utility’s tariffs including substation transformers that transform electricity to a distribution voltage and also includes other equipment within a transforming substation which is not integral to the circuitry of the utility’s transmission system.

(l) "Energy assistance organization" means the nonprofit corporation established for low-income energy assistance pursuant to § 40-8.5-104, C.R.S.

(m) “Energy storage system” means a commercially available technology that is capable of retaining energy, storing the energy for a period of time, and delivering the energy as electricity after storage by chemical, thermal, mechanical, or other means.

(n) “Financial security” includes any stock, bond, note, or other evidence of indebtedness.

(o) “Generation facility” means a power plant that converts a primary energy resource into electricity. Primary energy resources include, but are not limited to: nuclear resources, coal, natural gas, hydro, wind, solar, biomass, and geothermal.

(p) "Heavy load" means not less than 60 percent, but not more than 100 percent, of the nameplate-rated capacity of a meter.

(q) "Informal complaint" means an informal complaint as defined and discussed in the Commission’s Rules Regulating Practice and Procedure.

(r) "Light load" means approximately five to ten percent of the nameplate-rated capacity of a meter.

(s) "Load" means the power consumed by an electric utility customer over time (measured in terms of either demand or energy or both).

(t) “Local government” means any Colorado county, municipality, city and county, home rule city or town, home rule city and county, or city or town operating under a territorial charter.

(u) "Local office" means any Colorado office operated by a utility at which persons may make requests to establish or to discontinue utility service. If the utility does not operate an office in Colorado, "local office" means any office operated by a utility at which persons may make requests to establish or to discontinue utility service in Colorado.

(v) "Main service terminal" means the point at which the utility’s metering connections terminate.

(w) “Major event” means an event as defined in and consistent with IEEE Standard Number 1366-2003, Guide for Electric Power Distribution Reliability Indices.

(x) "MVA" means mega-volt amperes and is the vector sum of the real power and the reactive power.

(y) “Non-standard customer data” means all customer data that are not standard customer data.

(z) "Output" means the energy and power produced by a generation system.

(aa) "Past due" means the point at which a utility can affect a customer’s account for regulated service due to non-payment of charges for regulated service.

(bb) "Principal place of business" means the place, in or out of the State of Colorado, where the executive or managing principals who directly oversee the utility's operations in Colorado are located.

(cc) “Property owner” means the legal owner of government record for a parcel of real property within the service territory of a utility. A utility may rely upon the records of a county clerk for the county within which a parcel of property is located to determine ownership of government record.

(dd) “Rate adjustment mechanism” or “rate rider” means a charge added to a utility bill to recover a specific cost that is not part of the base rate.

(ee) "Reference standard" means suitable indicating electrical equipment permanently mounted in a utility's laboratory and used for no purpose other than testing rotating standards.

(ff) "Regulated charges" means charges billed by a utility to a customer if such charges are approved by the Commission or contained in a tariff of the utility.

(gg) “RFP” means request for proposals.

(hh) "Rotating standard" means a portable meter used for testing service meters.

(ii) "RUS" means the Rural Utilities Service of the United States Department of Agriculture, or its successor agencies.

(jj) "Service connection" is the location on the customer’s premises/facilities at which a point of delivery of power between the utility and the customer is established. For example, in the case of a typical residential customer served from overhead secondary supply, this is the location at which the utility’s electric service drop conductors are physically connected to the customer’s electric service entrance conductors.

(kk) “Standard customer data” means customer data maintained by a utility in its systems in the ordinary course of business.

(ll) “Test year” means a twelve-month period that is examined to determine a utility's costs of service in a rate case.

(mm) “Third-party” means a person who is not the customer, an agent of the customer who has been designated by the customer with the utility and is acting of the customer’s behalf, a regulated utility serving the customer, or a contracted agent, of the utility.

(nn) "Transmission facilities" are those lines and related substations designed and operating at voltage levels above the utility's voltages for distribution facilities, including but not limited to related substation facilities such as transformers, capacitor banks, or breakers that are integral to the circuitry of the utility’s transmission system.

(oo) “Unique identifier” means a customer’s name, mailing address, telephone number, or email address that is displayed on a bill.

(pp) "Unregulated charges" means charges that are billed by a utility to a customer and that are not regulated or approved by the Commission, are not contained in a tariff filed with the Commission, and are for service or merchandise not required as a condition of receiving regulated utility service.

(qq) "Utility" means any public utility as defined in § 40-1-103, C.R.S., providing electric, steam, or associated services in the state of Colorado.

(rr) "Utility service" or "service" means a service offering of a utility, which service offering is regulated by the Commission.

(ss) “Whole building data” means the sum of the monthly electric use for either all meters at a building on a parcel or real property or all buildings on a parcel of real property.

3002. Applications.

(a) Any person may seek Commission action regarding any of the following matters through the filing of an appropriate application to request a(n):

(I) issuance or extension of a certificate of public convenience and necessity for a franchise, as provided in rule 3100;

(II) issuance or extension of a certificate of public convenience and necessity for service territory, as provided in rule 3101;

(III) issuance of a certificate of public convenience and necessity for construction of facilities, as provided in rule 3102;

(IV) amendment of a certificate of public convenience and necessity in order to change, extend, curtail, abandon, or discontinue any service or facility, as provided in rule 3103;

(V) transfer of a certificate of public convenience and necessity, to obtain a controlling interest in any utility, to transfer assets within the jurisdiction of the Commission or stock, or to merge a utility with another entity, as provided in rule 3104;

(VI) issuance, or assumption of any financial security or to create a lien pursuant to § 40-1-104, as provided in rule 3105;

(VII) flexible regulatory treatment to provide service without reference to tariffs, as provided in rule 3106;

(VIII) approval of an air quality improvement program, as provided for in rule 3107;

(IX) approval of a new tariff or an amendment of a tariff for a rate adjustment mechanism on less than statutory notice, as provided in rule 3109;

(X) variance of voltage standards, as provided in rule 3202;

(XI) approval of meter and equipment testing practices, as provided in rule 3303;

(XII) approval of a meter sampling program, as provided in rule 3304;

(XIII) approval of a refund plan, as provided in rule 3410;

(XIV) approval of a Low-Income Energy Assistance Plan, as provided in rule 3411;

(XV) approval of a cost assignment and allocation manual, as provided in rule 3503;

(XVI) approval of or for amendment to a least-cost resource plan, as provided in rules 3603, 3618, and 3619;

(XVII) approval of a compliance plan, as provided in rule 3657;

(XVIII) appeal of local government land use decision, as provided in rule 3703; or

(XIX) matter not specifically described in this rule, unless such matter is required to be submitted as a petition under rule 1304, as a motion, or as some other specific type of submittal.

[indicates omission of unaffected rules]

3108. Tariffs.

(a) A utility shall keep on file with the Commission the following documents pertaining to retail electric service: its current Colorado tariffs, forms of contracts and electric service agreements. These documents, unless filed under seal shall be available for public inspection at the Commission and at the principal place of business of the utility.

(b) All tariffs shall comply with rule 1210 of the Commission's Rules of Practice and Procedure.

(c) Filing and contents of tariff.

(I) In addition to the requirements and contents in rule 1210, the following shall be included in a utility's tariff, as applicable:

(A) information regarding the utility’s voltages, pursuant to rule 3202;

(B) information regarding the utility’s meter testing equipment and facilities, scheduled meter testing, meter testing records, fees for meter testing upon request, and meter reading, pursuant to rules 3303, 3304, 3305, 3306, and 3309;

(C) information regarding the utility’s benefit of service transfer policies, pursuant to paragraph 3401(c);

(D) information regarding the utility's installment payment plans and other plans, pursuant to rule 3404;

(E) information regarding the utility's collection fees or miscellaneous service charges, pursuant to subparagraphs 3404(c)(VI) and (VIII);

(F) information regarding the utility's after-hour restoration fees, pursuant to paragraph 3409(b);

(G) information regarding the utility's renewable energy program pursuant to subparagraphs 3657(a)(III), (V), (VI) and (VII);

(H) information regarding the utility's avoided costs, pursuant to paragraph 3902(b); and

(I) rules, regulations, and policies covering the relations between the customer and the utility.

3109. New or Changed Tariffs.

(a) A utility shall file with the Commission any new or changed tariffs. No new or changed tariff shall be effective unless it is filed with the Commission and either is allowed to go into effect by operation of law or is approved by the Commission.

(b) A utility shall use one of the following filing processes to seek to add a new tariff other than a tariff setting forth a base rate. If the new tariff represents an increase in the utility's rates, charges, fees, fares, tolls, rentals, or classifications, the utility shall include a rate trend report with the elements in subparagraphs 3109(e)(I) through (IV).

(I) The utility may file the proposed new tariff, including the proposed effective date, accompanied by an advice letter pursuant to rule 1210. The utility shall provide notice in accordance with rule 1207. If the Commission does not suspend the proposed tariff in accordance with rule 1305 prior to the tariff's proposed effective date, the proposed tariff shall take effect on the proposed effective date.

(II) The utility may file an application to implement a new tariff. The application shall include the information required in paragraphs 3002(b) and 3002(c); shall explain the details of the proposed tariff, including financial data if applicable; and shall note any prior Commission action, in any proceeding, pertaining to the present or proposed tariff. If the application is approved by the Commission, the utility shall file a compliance advice letter and tariff which tariff shall be the same in substance as was approved by decision. The advice letter and tariff shall be filed in a new proceeding with the prescribed notice period either in the decision or pursuant to paragraph 1207(g). In order to be eligible to make a compliance advice letter filing on less than 30 days' notice if the application is approved by the Commission, the utility shall provide notice in accordance with rule 1207 at the time of the application filing for any rate, fare, toll, rental, charge, classification, or in any rule, regulation, or contract relating to or affecting any rate, fare, toll, rental, charge, classification, or service or in any privilege or facility.

(c) A utility shall use the following filing process to change an existing tariff for a rate adjustment mechanism. A filing to increase a rate, charge, fee, fare, toll, rental, or classification pursuant to a tariff for an existing rate adjustment mechanism also shall include a rate trend report in accordance with paragraph 3109(e).

(I) The utility may file the proposed change to the tariff, including the proposed effective date, accompanied by an advice letter pursuant to rule 1210. The utility shall provide notice in accordance with rule 1207. If the Commission does not suspend the proposed tariff in accordance with rule 1305 prior to the tariff's proposed effective date, the proposed tariff shall take effect on the proposed effective date.

(II) The utility may file an application to implement the change to the tariff on less than 30-days' notice, accompanied by the proposed tariff, including the proposed effective date. The utility shall provide notice in accordance with rule 1207. The application shall include the information required in paragraphs 3002(b) and 3002(c); shall explain the details of the proposed tariff, including financial data if applicable; shall state the facts which are the basis for the request that the proposed tariff become effective on less than 30-days' notice; and shall note any prior Commission action, in any proceeding, pertaining to the present or proposed tariff.

(d) A utility shall use the following filing process to change a tariff setting forth a base rate. A filing to increase a base rate also shall include a rate trend report in accordance with paragraph 3109(e).

(I) The utility shall file the proposed new tariff, including the proposed effective date, accompanied by an advice letter pursuant to rule 1210. The utility shall provide notice in accordance with rule 1207.

(II) The Commission shall certify the advice letter filing for completeness in accordance with paragraph 3109(f).

(e) A utility filing that introduces or increases any rate, charge, fee, fare, toll, rental, or classification shall include a rate trend report. Unless not required by another rule, the rate trend report shall include:

(I) the amount of increase in the rate, charge, fee, fare, toll, rental, or classification relative to the amount in effect on the date of the utility's filing;

(II) the amount in change in annual revenues collected by the utility as a result of the utility's filing;

(III) a chart, graph, or other pictographic demonstration of each of the utility's rates, charges, fees, fares, tolls, rentals, or classifications, including the total of all utility bill line items such as base rates and rate adjustment mechanisms, for the ten years prior to the date of the utility filing; and

(IV) for the same rate, charge, fee, fare, toll, rental, or classification as the utility's filing over the ten years prior to the date of the utility's filing:

(A) the dates when a previous increase or decrease went into effect;

(B) the amount of the rate, charge, fee, fare, toll, rental, or classification before a previous increase or decrease went into effect;

(C) the amount of increase or decrease relative to the amount before the previous increase or decrease went into effect;

(D) the change in annual revenues collected by the utility as a result of the utility's filing; and

(E) the proceeding number for the tariff filing where the rate, charge, fee, fare, toll, rental, or classification either was allowed to go into effect by operation of law or was approved by the Commission.

(f) The Commission shall certify by written decision that a utility base rate tariff filing made in accordance with paragraph 3109(d) includes sufficient information to compare test years and to satisfy other purposes as determined by the Commission.

(I) The utility shall include in its base rate tariff filing:

(A) a cost of service study that calculates the utility's base rate revenue requirement for a twelve-month period concluding no later than six months prior to the date of the utility's base rate tariff filing;

(B) detailed explanations of all adjustments made to the auditable historical data used in all of the cost of service studies presented in the utility's filing;

(C) an executable copy of each of the cost of service studies presented in the utility's filing, with links and formulas intact;

(D) workpapers, in executable format, to which the executable copies of the cost of service study are linked; and

(E) any other information or documentation, as determined by the Commission.

(II) To prevent delay in a base rate tariff proceeding and the potential for a Commission decision deeming the base rate tariff filing incomplete, the utility may confer with Commission staff and the Office of Utility Consumer Advocate and file in the advice letter proceeding an unopposed motion for an order certifying the base rate tariff filing to be complete.

(III) The process for certifying a utility base rate tariff filing as complete shall be implemented as follows.

(A) The utility shall serve a copy of the utility base rate tariff filing on all parties to its previous base rate proceeding within three business days of the utility's base rate tariff filing with the Commission.

(B) Any person affected by the base rate tariff filing may submit a written protest addressing the certification of the filing. Such protest must be filed sufficiently in advance of the effective date of the base rate tariffs.

(C) The Commission will address the certification of utility's base rate tariff filing at a regular weekly meeting prior to the effective date of the base rate tariffs. The Commission may suspend the proposed tariff's effective date by ordering that a hearing be held on the certification of the utility base rate tariff filing in accordance with § 40-6-111(1), C.R.S.

(D) The Commission shall provide the utility an opportunity to cure any deficiencies of its base rate tariff filing. The Commission may condition the certification of the remedied utility base rate tariff filing on the utility's filing of an amended advice letter extending the proposed effective date of the base rate tariffs.

(IV The Commission shall not issue a decision approving a base rate whose base rate tariff filing has been determined to be incomplete until any deficiencies are cured.

(V) The Commission may permanently suspend the effective date of the proposed base rate tariffs and the proposed tariffs shall not go into effect if the Commission deems the utility's base rate tariff filing incomplete.

3110. Advice Letters.

(a) All advice letter filings shall comply with rule 1210 of the Commission's Rules of Practice and Procedure.

(b) In addition to the requirements and contents in rule 1210, the advice letter shall include the estimated amounts, if any, by which the utility's revenues will be affected, calculated on an annual basis.

(c) Customer notice of advice letter. If the utility is required by statute, Commission rule, or order to provide notice to its customers of the advice letter, such notice shall include the requirements of subparagraph 3002(d)(I) – (XII).

BASE RATE PROCEEDINGS

3350. Annual Reporting on Costs Prohibited from Rates.

On or before April 30th of each year, each investor-owned utility shall file with the Commission a report that demonstrates compliance with prohibitions of costs recoverable through the utility's rates in accordance with § 40-3-114, C.R.S. The report must include the purpose, payee, and amount of any expenses associated with the costs and activities that are not permitted to be recovered from customers. The report shall be filed concurrently with and in the same proceeding as the investor-owned utility's annual report filed in accordance with rule 3006.

Decision No. C23-0538

BEFORE THE PUBLIC UTILITIES COMMISSION OF THE STATE OF COLORADO

PROCEEDING NO. 23R-0408EG

IN THE MATTER OF TEMPORARY RULES AMENDING THE COMMISSION'S RULES REGULATING ELECTRIC UTILITIES, 4 CODE OF COLORADO REGULATIONS 723-3, AND ITS RULES REGULATING GAS UTILITIES, 4 CODE OF COLORADO REGULATIONS 723-4, TO IMPLEMENT CERTAIN PROVISIONS IN SENATE BILL 23-291 ADDRESSING RATE TREND REPORTS AND FILING REQUIREMENTS FOR BASE RATE TARIFF FILINGS.

COMMISSION DECISION
ADOPTING TEMPORARY RULES

Mailed Date: August 14, 2023
Adopted Date: August 9, 2023

TABLE OF CONTENTS

I. BY THE COMMISSION

A. Statement

1. By this Decision, the Commission adopts temporary rules to amend provisions in the Commission's Rules Regulating Electric Utilities (Electric Rules), 4 *Code of Colorado Regulations* (CCR) 723-4 and provisions in the Commission's Rules Regulating Gas Utilities (Gas Rules), 4 CCR 723-3. The temporary rules implement the provisions in § 40-3-102.5(1)(b), C.R.S requiring the filing of certain information with a utility's base rate tariff filing. The temporary rules also implement § 40-3-102.5(2)(a), C.R.S., requiring the filing of rate trend reports when an electric or gas utility seeks to increase a rate or charge. The temporary rules further implement the annual reporting requirement related to costs prohibited from utility rates in § 40-3-114, C.R.S. The statutory provisions requiring these temporary rules were enacted by Senate Bill (SB) 23-291 effective August 7, 2023.

2. As discussed below, the temporary rules are adopted by this Decision without compliance with the procedures prescribed in § 24-4-103, C.R.S. to provide continuity in the process by which electric and gas utilities change their rates for providing service to their Colorado customers. The annual reporting provisions in these temporary rules are likewise necessary because the statute requires the utilities to file reports on certain costs prohibited from their rates pursuant to a directive from the Commission. As indicated *supra*, we find on the record the adoption of these rules is imperatively necessary to protect the public health, welfare, and safety.

3. These temporary rules are effective for 210 days from the effective date of this Decision, August 14, 2023, or until the Commission's permanent rules implementing SB 23-291 are effective. *See* § 40-2-108(2), C.R.S. The Commission will, by separate order,

open a rulemaking to adopt permanent rules, which it expects to issue on or around November 1, 2023.

4. The temporary rules in legislative (strikeout and underline) format and in final version format are available through the Commission's website at:

5. https://www.dora.state.co.us/pls/efi/EFI.Show_Docket?p_session_id=&p_docket_id=23R-0408EG.

6. Attachments A and C to this Decision are the temporary rules in legislative (strikeout and underline) format modifying the Electric Rules and the Gas Rules, respectively. Attachments B and D to this Decision are the temporary rules in final version format modifying the Electric Rules and the Gas Rules, respectively.

B. Discussion, Findings, and Conclusions

7. Consistent with the requirements enacted in SB 23-291, the temporary rules adopted through this Decision require Colorado electric and gas utilities to file certain information with a base rate tariff filing and require the submission of rate trend reports when an electric or gas utility seeks to increase a rate or charge. They also require utilities to file reports annually demonstrating that they do not use ratepayer funds to subsidize nonregulated activities or to recover certain costs prohibited from rates as set forth in statute, including a percentage of costs associated with compensation for the utility's board of directors, certain other expenses incurred by such boards, tax penalties or fines, investor-relation expenses, certain advertising and public relations expenses, certain other communication expenses, lobbying expenses, charitable expenses, certain organizational or membership dues, political contributions, entertainment and gift expenses.

8. SB 23-291 became effective on August 7, 2023, the day following the expiration of the 90-day period after final adjournment of the Colorado General Assembly. Consequently, in order to avoid disruption of the continuity in the process by which electric and gas utilities change rates for the provision of service to their customers, it is imperative the Commission adopt temporary rules at this time to comply with state law, until permanent rules can be promulgated under the requirements of § 24-4-103, C.R.S. We find on the record it is imperatively necessary to adopt these rules on a temporary basis in order to allow such utilities to continue to file for necessary changes in rates and comply with the requirements set forth in SB23-291 codified at § 40-3-102.5, C.R.S. We further find that without adoption of these temporary rules, electric and gas utilities may find it difficult to continue to operate effectively in the ordinary course of business, which would be contrary to the public interest. For these reasons, and as authorized by § 24-4-103(6)(a), C.R.S., the Commission finds immediate adoption of these temporary rules is imperatively necessary to comply with state law and to provide for the health, safety, and welfare of the public.

9. The statutory authority for adoption of these rules is set forth in §§ 40-3-102.5(1)(b) and 40-3-102.5(2)(a), C.R.S., and SB 23-291.

10. The adopted temporary rules are described below along with discussion of the statutory and policy reasons for adopting each rule.

1. Applicability

11. Section 40-3-102.5(1)(d), C.R.S., defines "utility" to mean "an investor-owned electric or gas utility." Accordingly, these temporary rules apply to the investor-owned electric and gas utilities subject to the Commission's Electric Rules or Gas Rules.

2. Definitions

12. Section 40-3-102.5(1)(d), C.R.S., introduces new defined terms that are commonly used in electric and gas proceedings before the Commission but are absent from the Electric Rules and the Gas Rules.

13. SB 23-291 defines a "base rate" to mean: "charges used to recover costs of utility infrastructure and operations, including a return on capital investment, not otherwise recovered through a utility rate rider or rate adjustment mechanism."[1]

14. The term "test year" is further defined to mean: "a twelve-month period that is examined to determine a utility's costs of service in a rate case." [2]

15. Accordingly, we add definitions for the terms "base rate" and "test year" within Rule 3001 of the Electric Rules and within Rule 4001 of the Gas Rules.

16. We also add a definition of "rate adjustment mechanism" for clarity, since the term is used in the rule provisions that relate to the filing of utility rates and charges in both the Electric Rules and the Gas Rules as modified by this Decision. The definition of rate adjustment mechanism derives from § 40-3-114(6)(i), C.R.S., also enacted by SB 23-291.

3. Certification of the Completeness of a Base Rate Tariff Filing

17. Section 40-3-102.5(1)(b), C.R.S., requires the Commission to certify that a filing from an electric or gas utility to modify its base rates is complete. The Commission must determine whether the base rate tariff filing includes sufficient information both to compare test years presented by the utility and prospective parties in the case to what is commonly called a "historic test year" and whether the filing includes sufficient information to satisfy other

[1] Section 40-3-102.5(1)(d)(I), C.R.S.
[2] Section 40-3-102.5(1)(d)(II), C.R.S.

purposes as established by the Commission. At a minimum, the filing must include a comprehensive cost and revenue requirement analysis based on actual, auditable, historic data, or, in other words, a historic test year. Such analysis also must be accompanied by workpapers and other supporting materials.

18. Section 40-3-102.5(1)(b), C.R.S., specifically identifies "an investor-owned utility's application to modify base rates." In accordance with the use of the term "application" both in Title 40 and in the Commission's rules, the statute implicitly references the Commission's practice of determining whether an application filing is "complete." The determination of completeness of an application is principally governed by § 40-6-109.5, C.R.S., and the purpose of the Commission's determination of completeness pursuant to § 40-6-109.5, C.R.S., is to establish a deadline for the Commission's decision on the application.

19. The process by which the Commission determines the completeness of an application filed by an electric or gas utility is set forth in paragraph 1303(c) of the Commission's Rules of Practice and Procedure, 4 CCR 723-1. For an application, the determination of completeness is not, and shall not be taken or assumed to be, a decision on the merits of the application.[3] Subparagraph 1303(c)(II) sets forth the process by which the Commission determines an application to be complete, short of a determination on the application's merits, including an opportunity for the utility to cure the application filing. Notably, "The Commission shall not issue a decision granting an application that has been determined to be incomplete until any deficiencies are cured."[4]

[3] 4 CCR 723-1-1303(c)(I).
[4] 4 CCR 723-1-1303(c)(II).

20. Notwithstanding the language in § 40-3-102.5(1)(b), C.R.S., the filing mechanism for an electric or gas utility seeks to modify its base rates is not an application, as generally used in Title 40 and as defined in the Commission's rules, but is instead an advice letter tariff filing.[5] Advice letter filings are distinct from application filings in terms of critical process and procedures as specified in the Commission's Rules of Practice and Procedure as well as its Electric Rules and Gas Rules. Advice letter tariff filings for rates and charges are further governed by several statutes in Title 40 and by provisions in the Commission's rules that are separate from the statutes and provisions applicable to application filings with the Commission.

21. Paragraph 3109(b) of the Electric Rules and paragraph 4109(b) of the Gas Rules as modified by this Decision specify the filing mechanisms required for utilities to introduce or change tariffs. Neither the Electric Rules nor the Gas Rules specifically define the term tariff; instead, the rules state that: "'Regulated charges' means charges billed by a utility to a customer if such charges are approved by the Commission or contained in a tariff of the utility."[6]

22. We find it necessary to modify paragraphs 3109(b) of the Electric Rules and paragraph 4109(b) of the Gas Rules to properly implement § 40-3-102.5(1)(b), C.R.S.[7] These changes are necessary to reflect the distinctions between utility filings to modify base rate tariffs from utility filings to modify non-base rate tariffs, including tariffs that implement a rate adjustment mechanism.

23. We modify paragraph 3109(b) and paragraph 4109(b) to specifically address the situations where the utility seeks to add a new tariff other than a base rate tariff. The two filing

[5] 4 CCR 723-1-1210.

[6] 4 CCR 723-3-3001(dd) and 4 CCR 723-4-4001(rr).

[7] As discussed below, the modifications to paragraph 3109(b) of the Electric Rules and paragraph 4109(b) of the Gas Rules are also necessary to implement the provisions in § 40-3-102.5(2), C.R.S.

mechanisms available to the utility include: (1) a tariff filing with an advice letter filed on not less than 30-days' notice in accordance with Rule 1207 of the Commission's Rules of Practice and Procedure; or (2) an application that includes a pro forma tariff that takes effect upon an advice letter compliance tariff filing in accordance with a decision of the Commission on the application. The introduction of the application process in these rules is necessary to clarify the potential role of an application relative to a utility's tariffs given the language used in § 40-3-102.5(1)(b), C.R.S. As explained below, the introduction of the application process is further necessary to fulfill the new statutory requirement for informing the public about potential increases in utility rates and the historical context for such rate increases pursuant to § 40-3-102.5(2)(a), C.R.S

24. We introduce paragraph 3109(c) to the Electric Rules and paragraph 4109(c) to the Gas Rules to address the situations where the utility seeks to change an existing rate adjustment mechanism. This paragraph includes the same filing options for rate adjustment mechanism as in the currently effective paragraphs 3109(b) in the Electric Rules and 4109(b) in the Gas Rules.

25. We further introduce paragraph 3109(d) to the Electric Rules and paragraph 4109(d) to the Gas Rules to clarify that a filing to modify a base rate tariff remains an advice letter as well as to apply the new certification process for determining the completeness of a base rate tariff filing in accordance with § 40-3-102.5(1)(b), C.R.S.

26. The process by which the Commission shall certify the completeness of an advice letter filing is set forth in paragraph 3109(f) of the modified Electric Rules and 4109(f) of the modified Gas Rules. Specifically, the Commission shall certify by written decision that a utility

base rate tariff filing made in accordance with paragraph 3909(d) includes sufficient information to compare test years and to satisfy other purposes as determined by the Commission.

27. Subparagraphs 3109(f)(I) and 4109(f)(I) list the required elements in the advice letter filing informed by the elements listed in § 40-3-102.5(1)(a)(IV), C.R.S., linking the Commission's determination of completeness of the advice letter tariff filing with respect to certain information necessary to compare test years with the information the Commission requires the utility to disclose to parties in its base rate proceedings to reduce time and costs associated with the discovery process, at least with respect to test year analyses. This paragraph is further required to set a standard by which the completeness of a base rate tariff filing will be determined by the Commission. In contrast to an application, where completeness is generally a function of whether the applicant has stated the relief requested, identified all applicable requirements of Commission rule and decision(s), and address each of those respective requirements,[8] completeness for an advice letter tariff filing requires the Commission to analyze the prospects for test year comparability in the rate proceeding and to specify what other purposes the information required from the utility will serve.

28. Subparagraphs 3109(f)(II) and 4109(f)(II) offer the utility a means to mitigate the risk of the Commission suspending the effective date of the base rate tariff and a finding by the Commission that the filing is incomplete. To prevent a delay in a base rate tariff proceeding and the potential for a Commission decision deeming the base rate tariff filing incomplete, the utility may confer with Commission Staff and the Office of Utility Consumer Advocate and file in the advice letter proceeding an unopposed motion for an order certifying the base rate tariff filing to be complete.

[8] 4 CCR 723-1-1303(b).

29. Subparagraphs 3109(f)(III) and 4109(f)(III) set forth the process by which the Commission will certify a utility base rate tariff filing as complete.

30. First, the utility shall serve a copy of the utility base rate tariff filing on all parties to its previous base rate proceeding within three business days of the utility's base rate tariff filing with the Commission.

31. Second, any person affected by the base rate tariff filing may submit a written protest addressing the certification of the filing with respect to completeness. Such protest must be filed sufficiently in advance of the effective date of the base rate tariffs.

32. Third, the Commission will address the certification of utility's base rate tariff filing at a regular weekly meeting prior to the effective date of the base rate tariffs. The filing of advice letters for utility tariffs is governed, in part, by the provisions in § 40-6-111, C.R.S. For instance, pursuant to § 40-6-111(1), C.R.S., the Commission may suspend tariff sheets for 120 days by setting the matter for hearing. Subparagraphs 3109(f)(III)(c) of the modified Electric Rules and subparagraph 4109(f)(III)(c) of the modified Gas Rules thus incorporate the suspension provisions for advice letter tariff filings in § 40-6-111, C.R.S., so that the utility and the parties are afforded the time to implement procedures in order for the Commission to resolve whether a base rate tariff filing is complete pursuant to § 40-3-102.5(1)(b), C.R.S.

33. Finally, subparagraphs 3109(f)(III)(d) of the modified Electric Rules and subparagraph 4109(f)(III)(d) of the modified Gas Rules provide the utility an opportunity to remedy its base rate tariff filing so that the Commission may determine that the filing is complete. The Commission may condition the certification of the remedied utility base rate tariff

filing on the utility's filing of an amended advice letter extending the proposed effective date of the base rate tariffs.

34. In accordance with § 40-3-102.5(1)(b), C.R.S., subparagraphs 3109(f)(IV) and 4109(f)(IV) state that the Commission shall not issue a decision approving a modified base rate if the base rate tariff filing has been determined to be incomplete and the filing has not been cured by the utility. Likewise, subparagraphs 3109(f)(V) and 4109(f)(V) specify that the Commission may permanently suspend the effective date of the proposed base rate tariffs and the proposed tariffs shall not go into effect if the Commission deems the utility's base rate tariff filing incomplete.

35. Due to the modifications to Rule 3109 of the Electric Rules and Rule 4109 of the Gas Rules described above, we strike the provisions in subparagraph 3109(b)(III) and 4109(b)(III) because they are no longer necessary.

4. Rate Trend Report

36. Section 40-3-102.5(2), C.R.S., requires electric and gas utilities to provide a "rate trend report" when filing any request to increase a rate, charge, fee, fare, toll, rental, or classification. A rate trend report presents changes in the rate, charge, etc., over the previous ten years and includes: (1) the amount of increase relative to the amount in effect on the date of the utility's filing; (2) the "annual total amount" of the rate, charge, etc.; and (3) a chart, graph, or "other visualization" of each of the utility's rates, charges, etc., including the total of all utility bill line items such as base rates and rate adjustment mechanisms, for the ten years prior to the date of the utility filing. In addition, a rate trend report must include, for the same rate, charge, etc., over the ten years prior to the date of the utility's filing: (1) the dates when a previous increase or decrease went into effect; (2) the amount of the rate, charge, etc. before a previous

increase or decrease went into effect; (3) the amount of increase or decrease relative to the amount before the previous increase or decrease went into effect; and (4) the proceeding number for the tariff filing where the rate, charge, etc. either was allowed to go into effect by operation of law or was approved by the Commission.

37. Section 40-3-102.5(2)(b), C.R.S., emphasizes the role of the rate trend report plays in informing the public about potential increases in utility rates and about the historical context for such rate increases. The utility is required to post on its website the rate trend report data, including the chart, graph, or pictographic demonstration for the ten-year historical trend submitted as part of each filed rate trend report.

38. Paragraph 3109(e) of the modified Electric Rules and paragraph 4109(e) of the modified Gas Rules implement the provisions in § 40-3-102.5(2)(a), C.R.S. Most of the provisions in these modified rules correspond directly to the language in the statute, however some terms are modified to match the common ratemaking lexicon of the Commission, the utilities, and the parties to rate cases.

39. Notably, the temporary rules make a specific clarification in the rules to implement the provision requiring the rate trend report provide the "the annual total amount of the rate, charge, fee, fare, toll, rental, or classification." We conclude that the "annual total amount" is best represented by the annual revenues collected or expected to be collected from the rate as proposed in the utility's filing and that the historic trend is demonstrated by the collected annual revenues in the ten years prior to the filing. This interpretation of "annual total amount" aligns with the new statutory definition of a test year and the concept of a revenue requirement being calculated for a given test year

40. In accordance with § 40-3-102.5(2)(a), C.R.S., a rate trend report is required only in instances where a utility files a request to increase any rate, charge, etc. The rules that address the types of filings a utility makes to request to change a rate or tariff are therefore modified to cross-reference paragraph 3109(e) of the Electric Rules and paragraph 4109(e) of the Gas Rules.

5. Annual Rate Compliance Report

41. Section 40-3-114, C.R.S., requires the Commission to prohibit electric and gas utilities from using ratepayer funds to subsidize nonregulated activities. The new statute further prohibits utilities from recovering several types of expenses from ratepayers.

42. Although we conclude that temporary rules are not necessary to implement the provisions in §§ 40-3-114(1) through (4), C.R.S, upon the effective date of SB 23-291, § 40-3-114(5), C.R.S, states that the Commission shall require electric and gas utilities to file an annual report to ensure their compliance with the requirements in § 40-3-114, C.R.S. The report must include the purpose, payee, and amount of any expenses associated with the costs and activities that are not permitted to be recovered from customers as set forth in the statute.

43. Accordingly, through these temporary rules adopted by this Decision, we introduce a new Rule 3350 in the Electric Rules and Rule 4350 in the Gas Rules to cause the annual reporting to take effect pursuant to a Commission requirement upon the effective date of SB 23-291. Rule 3350 and 4350 will be the location of the rules promulgated in the permanent rulemaking to fully implement the rate-related provisions of SB 23-291.

II. ORDER

A. The Commission Orders That:

1. The rules in final version format available in this proceeding, through the Commission's E-Filings system, are hereby adopted as temporary rules, consistent with the discussion above.

2. The temporary rules shall be effective on the Mailed Date of this Decision. Such rules shall remain in effect until permanent rules become effective or for 210 days, whichever period is less.

3. The 20-day period provided in § 40-6-114, C.R.S., within which to file applications for rehearing, reargument, or reconsideration, begins on the first day following the effective date of this Decision.

4. This Decision is effective on its Mailed Date.

B. ADOPTED IN COMMISSIONERS' WEEKLY MEETING August 9, 2023.

4 *CODE OF COLORADO REGULATIONS* (CCR) 723-4

PART 4
RULES REGULATING GAS UTILITIES

BASIS, PURPOSE, AND STATUTORY AUTHORITY.

The basis and purpose of these rules is to set forth the manner of regulation over jurisdictional gas utilities, the services they provide, and their actions to maintain just and reasonable rates, ensure system safety, reliability, and resiliency, protect disproportionately impacted communities, and reduce greenhouse gas emissions from the use of gas by their customers and from leaks in their facilities. These rules also set forth the manner of regulation over master meter operators. These rules address a wide variety of subject areas including, but not limited to, planning, expenditure and demand forecasting, cost and rate impacts, system safety and integrity planning, service interruption, meter testing and accuracy, safety, customer information, customer deposits, rate schedules and tariffs, discontinuance of service, master meter operations, transportation service, flexible regulation, procedures for administering the Low-Income Energy Assistance Act, gas service low-income programs, cost allocation between regulated and unregulated operations, recovery of gas costs, appeals regarding local government land use decisions, demand side management programs, the reduction of greenhouse gas emissions from the distribution and end-use consumption of gas, and authority of the Commission to impose civil penalties on public utilities. The statutory authority for these rules can be found at §§ 29-20-108, 40-1-103.5, 40-2-108, 40-3-102, 40-3-102.5, 40-3-103, 40-3-104.3, 40-3-106, 40-3-111, 40-3-114, 40-3-101, 40-3.2-103, 40-3.2-106, 40-3.2-107, 40-3.2-108, 40-4-101, 40-4-106, 40-4-108, 40-4-109, 40-5-103, 40-7-117, 40-7-113.5, 40-7-116.5; and 40-8.7-105(5), C.R.S.

GENERAL PROVISIONS

* * * *

[indicates omission of unaffected rules]

4001. Definitions.

The following definitions apply throughout this Part 4, except where a specific rule or statute provides otherwise. In addition to the definitions here, the definitions found in the Public Utilities Law and Part 1 apply to these rules. In the event of a conflict between these definitions and a statutory definition, the statutory definition shall apply. In the event of a conflict between these definitions and a definition in Part 1, these definitions shall apply.

(a) "Affiliate" of a utility means a subsidiary of a utility, a parent corporation of a utility, a joint venture organized as a separate corporation or partnership to the extent of the individual utility's

involvement with the joint venture, a subsidiary of a parent corporation of a utility or where the utility or the parent corporation has a controlling interest over an entity.

(b) “Aggregated data” means customer data, alone or in combination with non-customer data, resulting from processing (e.g., average of a group of customers) or a compilation of customer data of one or more customers from which and personal information has been removed.

(c) "Applicant for service" means a person who applies for utility service and who either has taken no previous utility service from that utility or has not taken utility service from that utility within the most recent 30 days.

(d) “Air Pollution Control Division” means the Air Pollution Control Division of the Colorado Department of Public Health and Environment established by § 25-1-102(2)(a), C.R.S.

(e) “Air Quality Control Commission” means the decision-making body within the Colorado Department of Public Health and Environment established by § 25-7-104, C.R.S., to oversee and promulgate the rules to administer Colorado’s air quality programs.

(f) “Base rate” means charges used to recover costs of utility infrastructure and operations, including a return on capital investment, not otherwise recovered through a utility rate adjustment mechanism.

(g) "Basis Point" means one-hundredth of a percentage point (100 basis points = 1 percent).

(h) "Benefit of service" means the use of utility service by each person of legal age who resides at a premises to which service is delivered and who is not registered with the utility as the customer of record.

(i) “Best value employment metrics” means additional labor metrics required to be obtained by a utility from bidders and contractors for a utility construction contract, specifically, the length and type of training and apprenticeship programs available to the workforce, the percentage of labor estimated to be Colorado residents as compared to out of-state workers, the number and type of long-term careers supported by the project, whether the workforce will be covered by a labor agreement, and the wage rates and health care and pension benefits, including employer pension contribution rates, provided to protect labor.

(j) “Biomethane” means:

(I) a mixture of carbon dioxide and hydrocarbons released from the biological decomposition of organic materials that is primarily methane and provides a net reduction in greenhouse gas emissions; and

(II) includes biomethane recovered from manure management systems or anaerobic digesters that has been processed to meet pipeline quality gas standards.

(k) "Commission" means the Colorado Public Utilities Commission.

(l) “Contracted agent” means any person that has contracted with a utility in compliance with rule 4030 to assist in the provision of regulated utility services (e.g., an affiliate or vendor).

(m) "Cubic foot" means, as the context requires.

(I) At Local Pressure Conditions. For the purpose of measuring gas to a customer at local pressure conditions, a cubic foot is that amount of gas which occupies a volume of one cubic foot under the conditions existing in the customer's meter as and where installed. When gas is metered at a pressure in excess of eight inches of water column gauge pressure, a suitable correction factor shall be applied to provide for measurement of gas as if delivered and metered at a pressure of six inches of water column gauge pressure. A utility may also apply appropriate factors to correct local pressure measurement to standard conditions.

(II) At Standard Conditions. For all other purposes, including testing gas, a standard cubic foot is that amount of gas at standard conditions which occupies a volume of one cubic foot.

(n) "Curtailment" means the inability of a transportation customer or a sales customer to receive gas due to a shortage of gas supply.

(o) "Customer" means any person who is currently receiving utility service. Any person who moves within a utility's service territory and obtains utility service at a new location within 30 days shall be considered a "customer." Unless stated in a particular rule, "customer" applies to any class of customer as defined by the Commission or by utility tariff.

(p) "Customer data" means customer specific information, excluding personal information as defined in paragraph 1004(x), that is:

(I) collected from the gas meter by the utility and stored in its data systems;

(II) combined with customer-specific energy usage information on bills issued to the customer for regulated utility service when not publicly or lawfully available to the general public; or

(III) about the customer's participation in regulated utility programs, such as renewable energy, demand-side management, load management, or energy efficiency programs.

(q) "Dekatherm" (Dth) means a measurement of gas commodity heat content. One Dekatherm is the energy equivalent of 1,000,000 British Thermal Units (1 MMBtu).

(r) "Dedicated recovered methane pipeline" means a conveyance of recovered methane that is not a part of a common carrier pipeline system, and which conveys recovered methane from where it is generated to a common carrier pipeline or to the end user in Colorado for which the recovered methane was produced so long as the recovered methane replaces geologic gas supplied by a gas distribution utility or small gas distribution utility.

(s) "Design peak demand" refers to the maximum gas flow rate projected for a utility system, or a portion thereof, which is utilized by a utility for gas infrastructure capacity planning.

(t) "Disproportionately impacted community" means a geographic area defined pursuant to § 40-2-108(3)(d), C.R.S., and as may be further modified by Commission rule or order. Mapping of such

geographic areas shall be conducted in accordance with the best available mapping tool developed by the Colorado Department of Public Health and Environment, until such time as a different practice is adopted by Commission rule or order.

(u) "Distribution system" means the utility-owned piping and associated facilities used to deliver gas to customers, excluding facilities owned by a utility that are classified on the books and records of the utility as production, storage, or transmission facilities.

(v) "Energy assistance organization" means the nonprofit corporation established for low-income energy assistance pursuant to § 40-8.5-104, C.R.S.

(w) "Gas" means natural or geological gas; hydrogen, or recovered methane, or any mixture thereof transported by a common carrier or dedicated pipeline; flammable gas; manufactured gas; petroleum or other hydrocarbon gases including propane; or any mixture of gases injected into a pipeline and transmitted, distributed, or furnished by any utility.

(x) “Income-qualified utility customer” or “low-income customer” is a customer meeting the requirements of § 40-3-106(1)(d)(II), C.R.S.

(y) "Informal complaint" means an informal complaint as defined and discussed in the Commission’s Rules Regulating Practice and Procedure, 4 CCR 723-1.

(z) "Interruption" means a utility’s inability to provide transportation to a transportation customer, or its inability to serve a sales customer, due to constraints on the utility’s pipeline system.

(aa) "Intrastate transmission pipeline" or "ITP" means generally any person that provides gas transportation service for compensation to or for another person in the State of Colorado using transmission facilities rather than distribution facilities and is exempt from FERC jurisdiction.

(bb) "Local distribution company" (LDC) means any person, other than an interstate pipeline or an intrastate transmission pipeline, engaged in the sale and distribution of gas for end-user consumption. A LDC may also perform transportation services for its end-use customers, for another LDC or its end-use customers, as authorized under its effective Colorado jurisdictional tariffs.

(cc) “Local government” means any Colorado county, municipality, city and county, home rule city or town, home rule city and county, or city or town operating under a territorial charter.

(dd) "Local office" means any Colorado office operated by a utility at which persons may make requests to establish or to discontinue utility service. If the utility does not operate an office in Colorado, "local office" means any office operated by a utility at which persons may make requests to establish or to discontinue utility service in Colorado.

(ee) “Mandatory relocation” means a project to relocate the utility’s gas infrastructure as required by a federal, tribal, state, county, or local governmental body.

(ff) "Main" means a distribution line that serves, or is designed to serve, as a common source of supply for more than one service lateral.

(gg) "Mcf" means 1,000 standard cubic feet.

(hh) "MMBtu" means 1,000,000 British Thermal Units, or one Dekatherm.

(ii) “Natural gas” or “geological gas” means methane or other hydrocarbons that occur underground without human intervention and may be used as fuel.

(jj) “Non-pipeline alternative” means programs, equipment, or actions that avoid, reduce, or delay the need for investment in certain types of new gas infrastructure and may include energy efficiency, demand response, and beneficial electrification.

(kk) “Non-standard customer data” means all customer data that are not standard customer data.

(ll) "Past due" means the point at which a utility can affect a customer’s account for regulated service due to non-payment of charges for regulated service.

(mm) "Pipeline system" means the utility-owned piping and associated facilities used in the transmission or distribution of gas.

(nn) "Principal place of business" means the place, in or out of the State of Colorado, where the executive or managing principals who directly oversee the utility's operations in Colorado are located.

(oo) “Pressure district” means a localized area within a utility’s service territory whereby an established minimum and maximum pressure range is intended to be maintained and is distinct from neighboring regions.

(pp) “Property owner” means the legal owner of government record for a parcel of real property within the service territory of a utility. A utility may rely upon the records of a county clerk for the county within which a parcel of real property is located to determine ownership of government record.

(qq) “Pyrolysis” means the thermochemical decomposition of material at elevated temperatures without the participation of oxygen.

(rr) “Rate adjustment mechanism” or “rate rider” means a charge added to a utility bill to recover a specific cost that is not part of the base rate.

(ss) “Recovered methane” means any of the following that are located in the State of Colorado and meet the recovered methane protocol approved by the Air Quality Control Commission: biomethane; methane derived from municipal solid waste, the pyrolysis of municipal solid waste, biomass pyrolysis or enzymatic biomass, or wastewater treatment; coal mine methane as defined in § 40-2-124(1)(a)(II), C.R.S, the capture of which is not otherwise required by law; or methane that would have leaked without repairs of the gas distribution or service pipelines from the city gate to customer end use.

(tt) "Regulated charges" means charges billed by a utility to a customer if such charges are approved by the Commission, presented on a tariff sheet, or contained in a tariff of the utility.

(uu) "Sales customer" or “full service customer” means a customer who receives sales service from a utility and is not served under a utility’s gas transportation service at that same meter.

(vv) "Sales service" means a bundled gas utility service in which the utility both purchases gas commodity for resale to the customer and delivers the gas to the customer.

(ww) "Security" includes any stock, bond, note, or other evidence of indebtedness.

(xx) "Service lateral" means that part of a distribution system from the utility’s main to the entrance to a customer’s physical location.

(yy) "Standard conditions" means gas at a temperature of 60 degrees Fahrenheit and subject to an absolute pressure equal to 14.73 pounds per square inch absolute.

(zz) “Standard customer data” means customer data maintained by a utility in its systems in the ordinary course of business.

(aaa) "Standby capacity" means the maximum daily volumetric amount of capacity reserved in the utility's system for use by a transportation customer, if the customer purchased optional standby service.

(bbb) "Standby supply" means the daily volumetric amount of gas reserved by a utility for the use by a transportation customer should that customer's supply fail, if the customer purchased optional standby service.

(ccc) “Test year” means a twelve-month period that is examined to determine a utility's costs of service in a rate case.

(ddd) “Third party” means a person who is not the customer, an agent of the customer who has been designated by the customer with the utility and is acting on the customer’s behalf, a regulated utility serving the customer, or a contracted agent of the utility.

(eee) "Transportation" means the exchange, forward-haul, backhaul, flow reversal, or displacement of gas between a utility and a transportation customer through a pipeline system.

(fff) "Transportation customer" means a person who, by signing a gas transportation agreement, elects to subscribe to gas transportation service offered by a utility.

(ggg) “Unique identifier” means customer’s name, mailing address, telephone number, or email address that is displayed on a bill.

(hhh) "Unregulated charges" means charges that are billed by a utility to a customer and that are not regulated or approved by the Commission, are not contained in a tariff, and are for service or merchandise not required as a condition of receiving regulated utility service.

(iii) "Utility" means a public utility as defined in § 40-1-103, C.R.S., providing sales service or transportation service (or both) in Colorado. This term includes both an ITP and a LDC.

(jjj) "Utility service" or "service" means a service offering of a utility, which service offering is regulated by the Commission.

(kkk) “Whole building data” means the sum of the monthly gas use for either all service connections at a building on a parcel of real property or all buildings on a parcel of real property.

4002. Applications.

(a) Any person may seek Commission action regarding any of the following matters through the filing of an appropriate application to request a(n):

(I) issuance or extension of a certificate of public convenience and necessity for a franchise, as provided in rule 4100;

(II) issuance or extension of a certificate of public convenience and necessity for service territory, as provided in rule 4101;

(III) issuance of a certificate of public convenience and necessity for construction of facilities, as provided in rule 4102;

(IV) amendment of a certificate of public convenience and necessity to change, extend, curtail, abandon, or discontinue any service or facility, as provided in rule 4103;

(V) transfer a certificate of public convenience and necessity, to obtain a controlling interest in any utility, to transfer assets within the jurisdiction of the Commission or stock, or to merge a utility with another entity, as provided in rule 4104;

(VI) approval of the issuance or assumption of any security, or to create a lien pursuant to § 40-1-104, C.R.S., as provided in rule 4105;

(VII) flexible regulatory treatment to provide service without reference to tariffs, as provided in rule 4106;

(VIII) approval of a new tariff or an amendment of a tariff for a rate adjustment mechanism on less than statutory notice, as provided in rule 4109;

(IX) approval of a meter sampling program, as provided in rule 4304;

(X) approval of a refund plan, as provided in rule 4410;

(XI) approval of a Low-Income Energy Assistance Plan, as provided in rule 4411;

(XII) approval of a cost assignment and allocation manual, as provided in rule 4503;

(XIII) approval of a gas infrastructure plan, as provided in rule 4552;

(XIV) approval of a clean heat plan, as provided in rule 4729 or 4734;

(XV) approval of a gas demand side management plan, as provided in paragraph 4752(e) and rule 4753, or for determinations on demand side management strategic issues, as provided in rule 4761;

(XVI) appeal of a local government land use decision, as provided in rule 4703; or

(XVII) any other matter not specifically described in this rule, unless such matter is required to be submitted as a petition under rule 1304, as a motion, or as some other specific type of submittal.

OPERATING AUTHORITY

* * * *

[indicates omission of unaffected rules]

4108. Tariffs.

(a) A utility shall keep on file with the Commission the following documents pertaining to gas sales service and gas transportation service: its current Colorado tariffs, forms of contracts (including gas sales agreements), and those gas transportation service agreements which are not the same as the standard gas transportation service agreement contained in the utility's tariffs. These documents, unless filed under seal, shall be available for public inspection at the Commission and at the principal place of business of the utility.

(b) All tariffs shall comply with rule 1210 of the Commission's Rules of Practice and Procedure.

(c) Filing and contents of tariff.

(I) In addition to the requirements and contents in rule 1210, the following shall be included in a utility's tariff as applicable:

(A) a description of the minimum heating value for gas service as required by paragraph 4202(a);

(B) a description of testing methods for gas quality as required by paragraph 4202(f);

(C) interruption and curtailment criteria, policies, and implementation priorities, as required by rule 4203;

(D) transportation service rates, terms, and conditions, as required by rule 4205;

(E) the utility’s transportation service request form as required by paragraph 4206(a);

(F) information regarding the utility's meter testing equipment and facilities, scheduled meter testing, meter testing records, fees for meter testing upon request, and meter reading, as required by rules 4303, 4304, 4305, 4306, and 4309;

(G) information regarding benefit of service transfer policies as required by paragraph 4401(c);

(H) information regarding installment payment plans and other plans, as required by rule 4404;

(I) information regarding collection fees or miscellaneous service charges, as required by subparagraph 4404(c)(VI) and (c)(VIII).

(J) information regarding any after-hour restoration fees, as required by paragraph 4409(b); and

(K) all other rules, regulations, and policies covering the relations between the customer and the utility.

4109. New or Changed Tariffs.

(a) A utility shall file with the Commission any new or changed tariffs. No new or changed tariff shall be effective unless it is filed with the Commission and either is allowed to go into effect by operation of law or is approved by the Commission.

(b) A utility shall use one of the following filing processes to seek to add a new tariff other than a tariff setting forth a base rate. If the new tariff represents an increase in the utility's rates, charges, fees, fares, tolls, rentals, or classifications, the utility shall include a rate trend report with the elements in subparagraphs 4109(e)(I) through (IV).

(I) The utility may file the proposed new tariff, including the proposed effective date, accompanied by an advice letter pursuant to rule 1210. The utility shall provide notice in accordance with rule 1206. If the Commission does not suspend the proposed tariff in accordance with rule 1305 prior to the tariff's proposed effective date, the proposed tariff shall take effect on the proposed effective date.

(II) The utility may file an application to implement a new tariff. The application shall include the information required in paragraphs 4002(b) and 4002(c); shall explain the details of the proposed tariff, including financial data if applicable; and shall identify any prior Commission action, in any proceeding, pertaining to the present or proposed tariff. If the application is approved by the Commission, the utility shall file a compliance advice letter and tariff which tariff shall be the same in substance as was approved by decision. The advice letter and tariff shall be filed in a new proceeding with the prescribed notice period either in the decision or pursuant to paragraph 1207(g). In order to be eligible to make a compliance advice letter filing on less than 30 days' notice if the application is approved by the Commission, the utility shall provide notice in accordance with rule 1207 at the time of the application filing for any rate, fare, toll, rental, charge, classification, or in any

rule, regulation, or contract relating to or affecting any rate, fare, toll, rental, charge, classification, or service or in any privilege or facility.

(c) A utility shall use the following filing process to change an existing tariff for a rate adjustment mechanism. A filing to increase a rate, charge, fee, fare, toll, rental, or classification pursuant to a tariff for an existing rate adjustment mechanism also shall include a rate trend report in accordance with paragraph 4109(e).

(I) The utility may file the proposed change to the tariff, including the proposed effective date, accompanied by an advice letter pursuant to rule 1210. The utility shall provide notice in accordance with rule 1207. If the Commission does not suspend the proposed tariff in accordance with rule 1305 prior to the tariff's proposed effective date, the proposed tariff shall take effect on the proposed effective date.

(II) The utility may file an application to implement the change to the tariff on less than 30-days' notice, accompanied by the proposed tariff, including the proposed effective date. The utility shall provide notice in accordance with rule 1207. The application shall include the information required in paragraphs 3002(b) and 3002(c); shall explain the details of the proposed tariff, including financial data if applicable; shall state the facts which are the basis for the request that the proposed tariff become effective on less than 30-days' notice; and shall note any prior Commission action, in any proceeding, pertaining to the present or proposed tariff.

(d) A utility shall use the following filing process to change a tariff setting forth a base rate. A filing to increase a base rate also shall include a rate trend report in accordance with paragraph 4109(e).

(I) The utility shall file the proposed new tariff, including the proposed effective date, accompanied by an advice letter pursuant to rule 1210. The utility shall provide notice in accordance with rule 1207.

(II) The Commission shall certify the advice letter filing for completeness in accordance with paragraph 4109(f).

(e) A utility filing that introduces or increases any rate, charge, fee, fare, toll, rental, or classification shall include a rate trend report. Unless not required by another rule, the rate trend report shall include:

(I) the amount of increase in the rate, charge, fee, fare, toll, rental, or classification relative to the amount in effect on the date of the utility's filing;

(II) the amount in change in annual revenues collected by the utility as a result of the utility's filing;

(III) a chart, graph, or other pictographic demonstration of each of the utility's rates, charges, fees, fares, tolls, rentals, or classifications, including the total of all utility bill line items such as base rates and rate adjustment mechanisms, for the ten years prior to the date of the utility filing; and

(IV) for the same rate, charge, fee, fare, toll, rental, or classification as the utility's filing over the ten years prior to the date of the utility's filing:

(A) the dates when a previous increase or decrease went into effect;

(B) the amount of the rate, charge, fee, fare, toll, rental, or classification before a previous increase or decrease went into effect;

(C) the amount of increase or decrease relative to the amount before the previous increase or decrease went into effect;

(D) the change in annual revenues collected by the utility as a result of the utility's filing; and

(E) the proceeding number for the tariff filing where the rate, charge, fee, fare, toll, rental, or classification either was allowed to go into effect by operation of law or was approved by the Commission.

(f) The Commission shall certify by written decision that a utility base rate tariff filing made in accordance with paragraph 4109(d) includes sufficient information to compare test years and to satisfy other purposes as determined by the Commission.

(I) The utility shall include in its base rate tariff filing:

(A) a cost of service study that calculates the utility's base rate revenue requirement for a twelve-month period concluding no later than six months prior to the date of the utility's base rate tariff filing;

(B) detailed explanations of all adjustments made to the auditable historical data used in all of the cost of service studies presented in the utility's filing;

(C) an executable copy of each of the cost of service studies presented in the utility's filing, with links and formulas intact;

(D) workpapers, in executable format, to which the executable copies of the cost of service study are linked; and

(E) any other information or documentation, as determined by the Commission.

(II) To prevent delay in a base rate tariff proceeding and the potential for a Commission decision deeming the base rate tariff filing incomplete, the utility may confer with Commission staff and the Office of Utility Consumer Advocate and file in the advice letter proceeding an unopposed motion for an order certifying the base rate tariff filing to be complete.

(III) The process for certifying a utility base rate tariff filing as complete shall be implemented as follows.

(A) The utility shall serve a copy of the utility base rate tariff filing on all parties to its previous base rate proceeding within three business days of the utility's base rate tariff filing with the Commission.

(B) Any person affected by the base rate tariff filing may submit a written protest addressing the certification of the filing. Such protest must be filed sufficiently in advance of the effective date of the base rate tariffs.

(C) The Commission will address the certification of utility's base rate tariff filing at a regular weekly meeting prior to the effective date of the base rate tariffs. The Commission may suspend the proposed tariff's effective date by ordering that a hearing be held on the certification of the utility base rate tariff filing in accordance with § 40-6-111(1), C.R.S.

(D) The Commission shall provide the utility an opportunity to cure any deficiencies of its base rate tariff filing. The Commission may condition the certification of the remedied utility base rate tariff filing on the utility's filing of an amended advice letter extending the proposed effective date of the base rate tariffs.

(IV) The Commission shall not issue a decision approving a base rate whose base rate tariff filing has been determined to be incomplete until any deficiencies are cured.

(V) The Commission may permanently suspend the effective date of the proposed base rate tariffs and the proposed tariffs shall not go into effect if the Commission deems the utility's base rate tariff filing incomplete.

4110. Advice Letters.

(a) All advice letter filings shall comply with rule 1210 of the Commission's Rules of Practice and Procedure.

(b) In addition to the requirements and contents in rule 1210, the advice letter shall include the estimated amounts, if any, by which the utility's revenues will be affected, calculated on an annual basis.

(c) Customer notice of advice letter. If the utility is required by statute, Commission rule or order to provide notice to its customers of the advice letter, such notice shall include the requirements of subparagraphs 4002(d)(I) – (XII).

BASE RATE PROCEEDINGS

4350. Annual Reporting on Costs Prohibited from Rates.

(a) On or before April 30th of each year, each utility shall file with the Commission a report that demonstrates compliance with prohibitions of costs recoverable through the utility's rates in accordance with § 40-3-114, C.R.S. The report must include the purpose, payee, and amount of any expenses associated with the costs and activities that are not permitted to be recovered from customers. The report shall be filed concurrently with and in the same proceeding as the investor-owned utility's annual report filed in accordance with rule 4006.

Decision No. C23-0538

BEFORE THE PUBLIC UTILITIES COMMISSION OF THE STATE OF COLORADO

PROCEEDING NO. 23R-0408EG

IN THE MATTER OF TEMPORARY RULES AMENDING THE COMMISSION'S RULES REGULATING ELECTRIC UTILITIES, 4 CODE OF COLORADO REGULATIONS 723-3, AND ITS RULES REGULATING GAS UTILITIES, 4 CODE OF COLORADO REGULATIONS 723-4, TO IMPLEMENT CERTAIN PROVISIONS IN SENATE BILL 23-291 ADDRESSING RATE TREND REPORTS AND FILING REQUIREMENTS FOR BASE RATE TARIFF FILINGS.

COMMISSION DECISION
ADOPTING TEMPORARY RULES

Mailed Date: August 14, 2023
Adopted Date: August 9, 2023

TABLE OF CONTENTS

I. BY THE COMMISSION

A. Statement

1. By this Decision, the Commission adopts temporary rules to amend provisions in the Commission's Rules Regulating Electric Utilities (Electric Rules), 4 *Code of Colorado Regulations* (CCR) 723-4 and provisions in the Commission's Rules Regulating Gas Utilities (Gas Rules), 4 CCR 723-3. The temporary rules implement the provisions in § 40-3-102.5(1)(b), C.R.S requiring the filing of certain information with a utility's base rate tariff filing. The temporary rules also implement § 40-3-102.5(2)(a), C.R.S., requiring the filing of rate trend reports when an electric or gas utility seeks to increase a rate or charge. The temporary rules further implement the annual reporting requirement related to costs prohibited from utility rates in § 40-3-114, C.R.S. The statutory provisions requiring these temporary rules were enacted by Senate Bill (SB) 23-291 effective August 7, 2023.

2. As discussed below, the temporary rules are adopted by this Decision without compliance with the procedures prescribed in § 24-4-103, C.R.S. to provide continuity in the process by which electric and gas utilities change their rates for providing service to their Colorado customers. The annual reporting provisions in these temporary rules are likewise necessary because the statute requires the utilities to file reports on certain costs prohibited from their rates pursuant to a directive from the Commission. As indicated *supra*, we find on the record the adoption of these rules is imperatively necessary to protect the public health, welfare, and safety.

3. These temporary rules are effective for 210 days from the effective date of this Decision, August 14, 2023, or until the Commission's permanent rules implementing SB 23-291 are effective. *See* § 40-2-108(2), C.R.S. The Commission will, by separate order,

open a rulemaking to adopt permanent rules, which it expects to issue on or around November 1, 2023.

4. The temporary rules in legislative (strikeout and underline) format and in final version format are available through the Commission's website at:

5. https://www.dora.state.co.us/pls/efi/EFI.Show_Docket?p_session_id=&p_docket_id=23R-0408EG.

6. Attachments A and C to this Decision are the temporary rules in legislative (strikeout and underline) format modifying the Electric Rules and the Gas Rules, respectively. Attachments B and D to this Decision are the temporary rules in final version format modifying the Electric Rules and the Gas Rules, respectively.

B. Discussion, Findings, and Conclusions

7. Consistent with the requirements enacted in SB 23-291, the temporary rules adopted through this Decision require Colorado electric and gas utilities to file certain information with a base rate tariff filing and require the submission of rate trend reports when an electric or gas utility seeks to increase a rate or charge. They also require utilities to file reports annually demonstrating that they do not use ratepayer funds to subsidize nonregulated activities or to recover certain costs prohibited from rates as set forth in statute, including a percentage of costs associated with compensation for the utility's board of directors, certain other expenses incurred by such boards, tax penalties or fines, investor-relation expenses, certain advertising and public relations expenses, certain other communication expenses, lobbying expenses, charitable expenses, certain organizational or membership dues, political contributions, entertainment and gift expenses.

8. SB 23-291 became effective on August 7, 2023, the day following the expiration of the 90-day period after final adjournment of the Colorado General Assembly. Consequently, in order to avoid disruption of the continuity in the process by which electric and gas utilities change rates for the provision of service to their customers, it is imperative the Commission adopt temporary rules at this time to comply with state law, until permanent rules can be promulgated under the requirements of § 24-4-103, C.R.S. We find on the record it is imperatively necessary to adopt these rules on a temporary basis in order to allow such utilities to continue to file for necessary changes in rates and comply with the requirements set forth in SB23-291 codified at § 40-3-102.5, C.R.S. We further find that without adoption of these temporary rules, electric and gas utilities may find it difficult to continue to operate effectively in the ordinary course of business, which would be contrary to the public interest. For these reasons, and as authorized by § 24-4-103(6)(a), C.R.S., the Commission finds immediate adoption of these temporary rules is imperatively necessary to comply with state law and to provide for the health, safety, and welfare of the public.

9. The statutory authority for adoption of these rules is set forth in §§ 40-3-102.5(1)(b) and 40-3-102.5(2)(a), C.R.S., and SB 23-291.

10. The adopted temporary rules are described below along with discussion of the statutory and policy reasons for adopting each rule.

1. Applicability

11. Section 40-3-102.5(1)(d), C.R.S., defines "utility" to mean "an investor-owned electric or gas utility." Accordingly, these temporary rules apply to the investor-owned electric and gas utilities subject to the Commission's Electric Rules or Gas Rules.

2. Definitions

12. Section 40-3-102.5(1)(d), C.R.S., introduces new defined terms that are commonly used in electric and gas proceedings before the Commission but are absent from the Electric Rules and the Gas Rules.

13. SB 23-291 defines a "base rate" to mean: "charges used to recover costs of utility infrastructure and operations, including a return on capital investment, not otherwise recovered through a utility rate rider or rate adjustment mechanism."[1]

14. The term "test year" is further defined to mean: "a twelve-month period that is examined to determine a utility's costs of service in a rate case." [2]

15. Accordingly, we add definitions for the terms "base rate" and "test year" within Rule 3001 of the Electric Rules and within Rule 4001 of the Gas Rules.

16. We also add a definition of "rate adjustment mechanism" for clarity, since the term is used in the rule provisions that relate to the filing of utility rates and charges in both the Electric Rules and the Gas Rules as modified by this Decision. The definition of rate adjustment mechanism derives from § 40-3-114(6)(i), C.R.S., also enacted by SB 23-291.

3. Certification of the Completeness of a Base Rate Tariff Filing

17. Section 40-3-102.5(1)(b), C.R.S., requires the Commission to certify that a filing from an electric or gas utility to modify its base rates is complete. The Commission must determine whether the base rate tariff filing includes sufficient information both to compare test years presented by the utility and prospective parties in the case to what is commonly called a "historic test year" and whether the filing includes sufficient information to satisfy other

[1] Section 40-3-102.5(1)(d)(I), C.R.S.
[2] Section 40-3-102.5(1)(d)(II), C.R.S.

purposes as established by the Commission. At a minimum, the filing must include a comprehensive cost and revenue requirement analysis based on actual, auditable, historic data, or, in other words, a historic test year. Such analysis also must be accompanied by workpapers and other supporting materials.

18. Section 40-3-102.5(1)(b), C.R.S., specifically identifies "an investor-owned utility's application to modify base rates." In accordance with the use of the term "application" both in Title 40 and in the Commission's rules, the statute implicitly references the Commission's practice of determining whether an application filing is "complete." The determination of completeness of an application is principally governed by § 40-6-109.5, C.R.S., and the purpose of the Commission's determination of completeness pursuant to § 40-6-109.5, C.R.S., is to establish a deadline for the Commission's decision on the application.

19. The process by which the Commission determines the completeness of an application filed by an electric or gas utility is set forth in paragraph 1303(c) of the Commission's Rules of Practice and Procedure, 4 CCR 723-1. For an application, the determination of completeness is not, and shall not be taken or assumed to be, a decision on the merits of the application.[3] Subparagraph 1303(c)(II) sets forth the process by which the Commission determines an application to be complete, short of a determination on the application's merits, including an opportunity for the utility to cure the application filing. Notably, "The Commission shall not issue a decision granting an application that has been determined to be incomplete until any deficiencies are cured."[4]

[3] 4 CCR 723-1-1303(c)(I).
[4] 4 CCR 723-1-1303(c)(II).

20. Notwithstanding the language in § 40-3-102.5(1)(b), C.R.S., the filing mechanism for an electric or gas utility seeks to modify its base rates is not an application, as generally used in Title 40 and as defined in the Commission's rules, but is instead an advice letter tariff filing.[5] Advice letter filings are distinct from application filings in terms of critical process and procedures as specified in the Commission's Rules of Practice and Procedure as well as its Electric Rules and Gas Rules. Advice letter tariff filings for rates and charges are further governed by several statutes in Title 40 and by provisions in the Commission's rules that are separate from the statutes and provisions applicable to application filings with the Commission.

21. Paragraph 3109(b) of the Electric Rules and paragraph 4109(b) of the Gas Rules as modified by this Decision specify the filing mechanisms required for utilities to introduce or change tariffs. Neither the Electric Rules nor the Gas Rules specifically define the term tariff; instead, the rules state that: "'Regulated charges' means charges billed by a utility to a customer if such charges are approved by the Commission or contained in a tariff of the utility."[6]

22. We find it necessary to modify paragraphs 3109(b) of the Electric Rules and paragraph 4109(b) of the Gas Rules to properly implement § 40-3-102.5(1)(b), C.R.S.[7] These changes are necessary to reflect the distinctions between utility filings to modify base rate tariffs from utility filings to modify non-base rate tariffs, including tariffs that implement a rate adjustment mechanism.

23. We modify paragraph 3109(b) and paragraph 4109(b) to specifically address the situations where the utility seeks to add a new tariff other than a base rate tariff. The two filing

[5] 4 CCR 723-1-1210.

[6] 4 CCR 723-3-3001(dd) and 4 CCR 723-4-4001(rr).

[7] As discussed below, the modifications to paragraph 3109(b) of the Electric Rules and paragraph 4109(b) of the Gas Rules are also necessary to implement the provisions in § 40-3-102.5(2), C.R.S.

mechanisms available to the utility include: (1) a tariff filing with an advice letter filed on not less than 30-days' notice in accordance with Rule 1207 of the Commission's Rules of Practice and Procedure; or (2) an application that includes a pro forma tariff that takes effect upon an advice letter compliance tariff filing in accordance with a decision of the Commission on the application. The introduction of the application process in these rules is necessary to clarify the potential role of an application relative to a utility's tariffs given the language used in § 40-3-102.5(1)(b), C.R.S. As explained below, the introduction of the application process is further necessary to fulfill the new statutory requirement for informing the public about potential increases in utility rates and the historical context for such rate increases pursuant to § 40-3-102.5(2)(a), C.R.S

24. We introduce paragraph 3109(c) to the Electric Rules and paragraph 4109(c) to the Gas Rules to address the situations where the utility seeks to change an existing rate adjustment mechanism. This paragraph includes the same filing options for rate adjustment mechanism as in the currently effective paragraphs 3109(b) in the Electric Rules and 4109(b) in the Gas Rules.

25. We further introduce paragraph 3109(d) to the Electric Rules and paragraph 4109(d) to the Gas Rules to clarify that a filing to modify a base rate tariff remains an advice letter as well as to apply the new certification process for determining the completeness of a base rate tariff filing in accordance with § 40-3-102.5(1)(b), C.R.S.

26. The process by which the Commission shall certify the completeness of an advice letter filing is set forth in paragraph 3109(f) of the modified Electric Rules and 4109(f) of the modified Gas Rules. Specifically, the Commission shall certify by written decision that a utility

base rate tariff filing made in accordance with paragraph 3909(d) includes sufficient information to compare test years and to satisfy other purposes as determined by the Commission.

27. Subparagraphs 3109(f)(I) and 4109(f)(I) list the required elements in the advice letter filing informed by the elements listed in § 40-3-102.5(1)(a)(IV), C.R.S., linking the Commission's determination of completeness of the advice letter tariff filing with respect to certain information necessary to compare test years with the information the Commission requires the utility to disclose to parties in its base rate proceedings to reduce time and costs associated with the discovery process, at least with respect to test year analyses. This paragraph is further required to set a standard by which the completeness of a base rate tariff filing will be determined by the Commission. In contrast to an application, where completeness is generally a function of whether the applicant has stated the relief requested, identified all applicable requirements of Commission rule and decision(s), and address each of those respective requirements,[8] completeness for an advice letter tariff filing requires the Commission to analyze the prospects for test year comparability in the rate proceeding and to specify what other purposes the information required from the utility will serve.

28. Subparagraphs 3109(f)(II) and 4109(f)(II) offer the utility a means to mitigate the risk of the Commission suspending the effective date of the base rate tariff and a finding by the Commission that the filing is incomplete. To prevent a delay in a base rate tariff proceeding and the potential for a Commission decision deeming the base rate tariff filing incomplete, the utility may confer with Commission Staff and the Office of Utility Consumer Advocate and file in the advice letter proceeding an unopposed motion for an order certifying the base rate tariff filing to be complete.

[8] 4 CCR 723-1-1303(b).

29. Subparagraphs 3109(f)(III) and 4109(f)(III) set forth the process by which the Commission will certify a utility base rate tariff filing as complete.

30. First, the utility shall serve a copy of the utility base rate tariff filing on all parties to its previous base rate proceeding within three business days of the utility's base rate tariff filing with the Commission.

31. Second, any person affected by the base rate tariff filing may submit a written protest addressing the certification of the filing with respect to completeness. Such protest must be filed sufficiently in advance of the effective date of the base rate tariffs.

32. Third, the Commission will address the certification of utility's base rate tariff filing at a regular weekly meeting prior to the effective date of the base rate tariffs. The filing of advice letters for utility tariffs is governed, in part, by the provisions in § 40-6-111, C.R.S. For instance, pursuant to § 40-6-111(1), C.R.S., the Commission may suspend tariff sheets for 120 days by setting the matter for hearing. Subparagraphs 3109(f)(III)(c) of the modified Electric Rules and subparagraph 4109(f)(III)(c) of the modified Gas Rules thus incorporate the suspension provisions for advice letter tariff filings in § 40-6-111, C.R.S., so that the utility and the parties are afforded the time to implement procedures in order for the Commission to resolve whether a base rate tariff filing is complete pursuant to § 40-3-102.5(1)(b), C.R.S.

33. Finally, subparagraphs 3109(f)(III)(d) of the modified Electric Rules and subparagraph 4109(f)(III)(d) of the modified Gas Rules provide the utility an opportunity to remedy its base rate tariff filing so that the Commission may determine that the filing is complete. The Commission may condition the certification of the remedied utility base rate tariff

filing on the utility's filing of an amended advice letter extending the proposed effective date of the base rate tariffs.

34. In accordance with § 40-3-102.5(1)(b), C.R.S., subparagraphs 3109(f)(IV) and 4109(f)(IV) state that the Commission shall not issue a decision approving a modified base rate if the base rate tariff filing has been determined to be incomplete and the filing has not been cured by the utility. Likewise, subparagraphs 3109(f)(V) and 4109(f)(V) specify that the Commission may permanently suspend the effective date of the proposed base rate tariffs and the proposed tariffs shall not go into effect if the Commission deems the utility's base rate tariff filing incomplete.

35. Due to the modifications to Rule 3109 of the Electric Rules and Rule 4109 of the Gas Rules described above, we strike the provisions in subparagraph 3109(b)(III) and 4109(b)(III) because they are no longer necessary.

4. Rate Trend Report

36. Section 40-3-102.5(2), C.R.S., requires electric and gas utilities to provide a "rate trend report" when filing any request to increase a rate, charge, fee, fare, toll, rental, or classification. A rate trend report presents changes in the rate, charge, etc., over the previous ten years and includes: (1) the amount of increase relative to the amount in effect on the date of the utility's filing; (2) the "annual total amount" of the rate, charge, etc.; and (3) a chart, graph, or "other visualization" of each of the utility's rates, charges, etc., including the total of all utility bill line items such as base rates and rate adjustment mechanisms, for the ten years prior to the date of the utility filing. In addition, a rate trend report must include, for the same rate, charge, etc., over the ten years prior to the date of the utility's filing: (1) the dates when a previous increase or decrease went into effect; (2) the amount of the rate, charge, etc. before a previous

increase or decrease went into effect; (3) the amount of increase or decrease relative to the amount before the previous increase or decrease went into effect; and (4) the proceeding number for the tariff filing where the rate, charge, etc. either was allowed to go into effect by operation of law or was approved by the Commission.

37. Section 40-3-102.5(2)(b), C.R.S., emphasizes the role of the rate trend report plays in informing the public about potential increases in utility rates and about the historical context for such rate increases. The utility is required to post on its website the rate trend report data, including the chart, graph, or pictographic demonstration for the ten-year historical trend submitted as part of each filed rate trend report.

38. Paragraph 3109(e) of the modified Electric Rules and paragraph 4109(e) of the modified Gas Rules implement the provisions in § 40-3-102.5(2)(a), C.R.S. Most of the provisions in these modified rules correspond directly to the language in the statute, however some terms are modified to match the common ratemaking lexicon of the Commission, the utilities, and the parties to rate cases.

39. Notably, the temporary rules make a specific clarification in the rules to implement the provision requiring the rate trend report provide the "the annual total amount of the rate, charge, fee, fare, toll, rental, or classification." We conclude that the "annual total amount" is best represented by the annual revenues collected or expected to be collected from the rate as proposed in the utility's filing and that the historic trend is demonstrated by the collected annual revenues in the ten years prior to the filing. This interpretation of "annual total amount" aligns with the new statutory definition of a test year and the concept of a revenue requirement being calculated for a given test year

40. In accordance with § 40-3-102.5(2)(a), C.R.S., a rate trend report is required only in instances where a utility files a request to increase any rate, charge, etc. The rules that address the types of filings a utility makes to request to change a rate or tariff are therefore modified to cross-reference paragraph 3109(e) of the Electric Rules and paragraph 4109(e) of the Gas Rules.

5. Annual Rate Compliance Report

41. Section 40-3-114, C.R.S., requires the Commission to prohibit electric and gas utilities from using ratepayer funds to subsidize nonregulated activities. The new statute further prohibits utilities from recovering several types of expenses from ratepayers.

42. Although we conclude that temporary rules are not necessary to implement the provisions in §§ 40-3-114(1) through (4), C.R.S, upon the effective date of SB 23-291, § 40-3-114(5), C.R.S, states that the Commission shall require electric and gas utilities to file an annual report to ensure their compliance with the requirements in § 40-3-114, C.R.S. The report must include the purpose, payee, and amount of any expenses associated with the costs and activities that are not permitted to be recovered from customers as set forth in the statute.

43. Accordingly, through these temporary rules adopted by this Decision, we introduce a new Rule 3350 in the Electric Rules and Rule 4350 in the Gas Rules to cause the annual reporting to take effect pursuant to a Commission requirement upon the effective date of SB 23-291. Rule 3350 and 4350 will be the location of the rules promulgated in the permanent rulemaking to fully implement the rate-related provisions of SB 23-291.

II. ORDER

A. The Commission Orders That:

1. The rules in final version format available in this proceeding, through the Commission's E-Filings system, are hereby adopted as temporary rules, consistent with the discussion above.

2. The temporary rules shall be effective on the Mailed Date of this Decision. Such rules shall remain in effect until permanent rules become effective or for 210 days, whichever period is less.

3. The 20-day period provided in § 40-6-114, C.R.S., within which to file applications for rehearing, reargument, or reconsideration, begins on the first day following the effective date of this Decision.

4. This Decision is effective on its Mailed Date.

B. ADOPTED IN COMMISSIONERS' WEEKLY MEETING August 9, 2023.

EMERGENCY RULE ADOPTION ORDER

Office of Naturopathic Doctor Registration

IT IS HEREBY ORDERED:

The attached emergency rule is promulgated in compliance with sections 12-20-204, 12-250-105(1)(a), and 24-4-103, C.R.S., to implement Colorado Senate Bill 23-167 (Concerning the Regulation of Certified Midwives by the State Board of Nursing, and, in Connection Therewith, Making an Appropriation) by adding "certified midwife" to the rule definition of "Licensed Pediatric Health Care Provider."

Basis

The basis for this rule is to carry out the provisions of the Naturopathic Practice Act at section 12-250-101, *et seq.*, C.R.S. The specific statutory authorities that authorize this rulemaking are pursuant to sections 12-20-204, 12-250-105(1)(a), and 24-4-103, C.R.S.

Purpose

The purpose of adopting revisions to Rule 1.8 is imperatively necessary to comply with the requirements of state law. Therefore, I hereby adopt these rules on a permanent basis, and incorporate by reference the statements of basis, purpose, and statutory authority, pursuant to section 24-4-103(4)(c), C.R.S.

JUSTIFICATION

Pursuant to section 24-4-103(6)(a), C.R.S., a emergency rule may be adopted without compliance with section 24-4-103(4),C.R.S., which requires the agency to hold a public hearing "at which it shall afford interested persons an opportunity to submit written a data, views, or arguments and to present the same orally"; and with less than the twenty days' notice set forth in section 24-4-103(3), C.R.S., or without notice where circumstances imperatively require, only if the agency finds that "[i]mmediate adoption of the rule is imperatively necessary to comply with a state or federal law or federal regulation or for preservation of the public health, safety or welfare and compliance with the requirements of this section would be contrary to the public interest." Such findings must be made on the record.

The adoption of this rule on an emergency basis is imperatively necessary to comply with the requirements and effective date of state law. Therefore, I hereby adopt this rule as printed and amended, and incorporate by reference the statements of basis, purpose, and statutory authority, pursuant to section 24-4-103(4)(c), C.R.S. These temporary/emergency rules take effect on the date of adoption, and remain in effect for no more than 120 days after adoption of this emergency rule.

Adopted this 22nd day of August, 2023.

DEPARTMENT OF PUBLIC SAFETY DIVISION OF HOMELAND SECURITY AND EMERGENCY MANAGEMENT

Urgent Incident

Response Fund 8 CCR

1507-49

STATEMENT OF BASIS, STATUTORY AUTHORITY, AND PURPOSE

The General Assembly enacted section 24-33.5-1623, C.R.S. via House Bill 23-1270 to create the Urgent Incident Response Fund. The bill was signed into law on June 1, 2023. The statute mandates that the Director of the Division of Homeland Security and Emergency Management shall promulgate rules and regulations concerning the criteria for applying for reimbursement, eligibility for determining the amount of reimbursement, and the distribution of receipt of an approved reimbursement from this fund.

The purpose of this emergency rulemaking is to establish new rules as soon as practicable after a reappropriation has been made and the funds have been transferred from the General Fund to the Urgent Incident Response Cash Fund as set forth in section 24-33.5-1623(2) and (3), C.R.S. Because the statute is necessary for the immediate preservation of the public peace, health or safety, delay in the promulgation of these rules would be contrary to the statutory mandate. The absence of implementing rules to carry out the purpose of the statute would be contrary to this declaration. For these reasons, it is imperatively necessary that the proposed rules be adopted.

Colorado Urgent Incident Response Fund

1. Authority

This regulation is adopted pursuant to the authority in section 24-33.5-1623, C.R.S., and is intended to be consistent with the requirements of the State Administrative Procedures Act, section 24-4-101 et seq. (the "APA").

2. Scope and Purpose

This regulation shall govern the use of the Colorado Urgent Response Incident Fund (Fund), including:

1. Applying for reimbursement;
2. Eligibility for determining the amount of reimbursement; and
3. The distribution and receipt of an approved reimbursement.

This regulation does not apply to reimbursement to state agencies and local governments at the level of disasters, emergencies, or disaster emergencies as defined in sections 24-33.5-702, 24-33.5-703, and 24-33.5-704, C.R.S.

3. Applicability

The provisions of this section shall be applicable to all eligible applicants as provided by law.

4. Definitions

"Division" means the Division of Homeland Security and Emergency Management, within the Colorado Department of Public Safety.

"Fund" means the urgent incident response fund created in section 24-33.5-1623 (2), C.R.S.

"Local Government" means a city, county, municipality, city and county, tribal government, or any other political subdivision of the state that is not a state agency.

"Quarterly Progress Report" means a written form or other document determined by the state agency to indicate and report the operational and financial activity of the recipient during the time period specified.

"Reimbursement Request" means a written form or other document determined by the state agency to be used by the fund recipient to request reimbursement from the fund for qualifying expenditures.

"State Agency" means any department, division, commission, council, board, bureau, committee, office, agency, or other governmental unit of the state.

"Summary Report" means a written form or other document determined by the state agency allowing the fund recipients to report the final operational and financial activity of the funds.

"Urgent Incident" means any incident that does not rise to the level of a disaster, an emergency, or a disaster emergency and for which programmatic responsibilities are already in place.

5. Program Requirements

5.1 Eligibility

A. Eligibility is limited to State Agencies and Local Governments as defined above.

5.2 Urgent Incident Need

A. Eligible recipients must demonstrate an urgent need beyond expected programmatic responsibilities and document why the circumstances were not programmed and are urgent, but do not rise to the level of an emergency, a disaster, or a disaster emergency.

5.3 Request for Funding

A. Eligible applicants must submit a written request in the application developed by the Division.

5.4 Amount of the Reimbursement

A. Reimbursement shall not exceed the annual appropriation.

5.5. Determining the Amount of Reimbursement

A. The amount of the reimbursement is at the discretion of the Division and will be determined in a collaborative process with the eligible applicant.

B. The Division will take into consideration:

1. The urgency of the circumstances;
2. The financial capability of the applicant;
3. Cost sharing; and,
4. Other factors that may be applicable to the applicant's need.

5.6 Distribution of Funds

A. For local government awardees, funds will be distributed according to the terms of the Division.

B. For state agency awardees, funds will be distributed according to the terms in the approved State of Colorado Interagency Agreement.

C. Based upon an articulated need, the Division may advance funds to awardees.

5.7 Reporting Requirements

A. Awardees will provide the division with reports consistent with the requirements in the appropriate grant agreement or interagency agreement including, but not limited to:

1. Quarterly Progress Reports
2. Summary Report upon completion of the project; and,
3. Reimbursement Requests

6. Restrictions

A. The Fund cannot be used for any of the following purposes:

1. For any of the purposes specified in section 24-33.5-702, C.R.S.;

2. To reimburse state agencies or local governments for the costs of responding to disasters as defined in section 24-33.5-703 (3) or emergencies as defined in section 24-33.5-703 (3.5), C.R.S.; or

3. For the purpose of responding to a disaster emergency declared pursuant to section 24-33.5-704, C.R.S.

PUBLIC NOTICE

September 25, 2023

Medicaid State Plan Amendment – Rate Update for Hospice Services

The Department intends to submit a State Plan Amendment, effective October 1, 2023, to increase Hospice provider rates by 3.1% in accordance with the Department's appropriated budget. Hospice services are reimbursed in accordance with federal CMS guidelines based on the hospice wage index and are regionally adjusted for Routine Care and Continuous Home Care.

An updated fee schedule reflecting these rate changes will be posted on the Department's Website upon approval.

The annual aggregate increase in hospice expenditures (including state funds and federal funds) is $497,447 (state share $248,723.50; federal share $248,723.50) in FFY 2024 and $516,210 (state share $258,105; federal share $258,105) in FFY 2025.
