

6 CCR 1015-4 Chapter 3, TN2020-00096

Upon review of Chapter 3 of this rule, staff found a typo that is non-substantive and should be corrected. Publication Instructions below.

[Instructions: Please correct the typo at 6 CCR 1015-4, Chapter Three, 303.7.A.(5) which reads 'in the even that' and should read 'in the event that'.]

CHAPTER THREE - DESIGNATION OF TRAUMA FACILITIES

303. Trauma Facility Designation Criteria - Level I and II Facilities

7. Clinical Requirements for Neurosurgery

A. Role/Availability

(5) Level I availability:

The facility shall provide a neurosurgical on-call schedule, dedicated only to that facility, available 24 hours per day, and either a posted backup call schedule or a contingency plan that includes bypass and transfer guidelines with another designated Level I, or in the event that no other Level I is available, then to a Level II facility with the necessary resources to meet the patient's needs.

Rationale:

This is not a substantive change, and the Board of Health actually adopted language during the rulemaking hearing in April that said 'in the event that'. Correcting this improves clarity for readers.
