Subject: **Request for Rulemaking Hearing**
Proposed New Part to 6 CCR 1011-3, Standards for Community Integrated Health Care Service Agencies, for the rulemaking hearing to occur in October of 2017

The Department is proposing rules to implement Senate Bill 16-069, which authorizes the Department to license Community Integrated Health Care Service (CIHCS) Agencies. The Department requests the Board to set a rulemaking hearing to consider the proposed rules at its October 19, 2017 meeting. The Department will be requesting a January 1, 2018 effective date for the rules.

Over the last several years the delivery of health care has undergone significant changes. As a result, new and innovative programs have emerged that are referred to as "community paramedicine," (CP) "mobile integrated healthcare," (MIH) and now, CIHCS. In general, these programs address the needs of "gap" patients within a community, those who lack the resources, financial or otherwise, to receive appropriate care in the most effective manner. Currently these gap patients are using emergency medical service agencies and departments to address medical needs that do not require those levels of resources. By providing a coordinated and holistic assessment of the patient's needs, these programs can provide more effective, appropriate and targeted care and navigation to appropriate resources.

In the mid-2000's a few Colorado emergency medical service agencies developed various CP programs to serve their communities. The Department was aware of the programs; however, because the Department does not license EMS agencies (EMS agencies are licensed by counties), no existing regulatory framework clearly applied to EMS agencies that utilized their personnel to provide non-emergent services in the home. In 2012, the Department convened a group of interested stakeholders to discuss issues surrounding the practice, but their robust discussion did not result in an agreed-upon path forward. In January 2015 the Department concluded that the existing EMS and home care agency laws required EMS agencies providing non-emergency, skilled home health or personal care services to be licensed by the department as a home care agency.

That same month, the State Emergency Medical and Trauma Services Advisory Council (SEMTAC) created a CP/MIH Task Force with representatives from various stakeholder groups to address questions concerning the role of CP programs in Colorado. Among other things, the task force was charged with defining the scope of work to be performed by CP versus those provided by traditional "emergency" services, and to determine whether CP and home health service providers could collaborate to address the needs of medically underserved patients without overlap. Moreover, the task force sought to determine whether local CP programs could more effectively promote collaboration and innovation, and avoid excessive regulatory burdens, by focusing on the community's underserved medical needs. Its resulting recommendation forms the building block

for the CIHCS healthcare services program that utilizes CPs and other types of healthcare business entities and providers in a more broad-based and inclusive model.

Senate Bill 16-069 is a bill that was based, in part, on the 2015 task force recommendation. After extensive negotiations among many interested parties, the bill was passed by the General Assembly and signed into law on June 8, 2016. The bill, now codified within Title 25, Part 3.5 of the Colorado Revised Statutes, creates three new community healthcare constructs.

First, Senate Bill 16-069 creates a CP endorsement for emergency medical service providers who meet required educational and credentialing requirements. The Department formed a separate CP endorsement task force to develop these rules, which will be presented to the Board of Health and Executive Director and Chief Medical Officer, Dr. Larry Wolk, for hearings in October under a separate rulemaking.

Second, the statute creates Community Assistance Referral and Education Services (“CARES”) programs to provide consumers with medical resource navigation and referral information as alternatives to 911 and emergency medical services. The statute does not allow regulation of CARES programs, but does require annual reporting requirements for new programs.

Third, it creates a new licensing category and pathway for agencies to offer out-of-hospital medical services as licensed CIHCS Agencies. By law, the Board’s rules must become effective on or before January 1, 2018. Consequently, in September 2016, the Department convened a task force to develop implementing rules. The rules now before the Board apply to the newly-created licensure category, and address CIHCS agency licensure standards. Under the law, the rules must address: (1) CIHCS agency medical direction requirements; (2) Department inspection of agencies; (3) Minimum educational training and experience standards for administrator and staff; (4) License fees from applicants, including governmental entities; (5) Insurance requirements; (6) Occurrence reporting; and (7) Record retention and agency reporting requirements. In addition to addressing these requirements, the rules set forth necessary definitions such as “out-of-hospital medical services” and standards governing CIHCS Agency operations, including consumer eligibility, types of services CIHCS Agencies may provide, and required service plan, assessment, and discharge procedures. The rules also restrict currently-regulated CIHCS Agency providers to their existing scopes of practice, and follow the CP endorsement task force’s recommendation regarding CP scope of practice by prohibiting unendorsed EMS providers from performing direct non-emergent medical care to CIHCS Agency consumers.

During its eleven-month tenure, the CIHCS task force worked to identify and reach consensus concerning: (1) the defined categories of eligible CIHCS service recipients; (2) the characteristics distinguishing CIHCS agencies and providers from other health facility agencies and providers; and (3) the level of medical direction necessary in a CIHCS agency. The task force ultimately reached consensus regarding all these issues.

The Colorado State Fire Chiefs Association (CSFCA) representative raised an objection concerning the statutory limitations on CIHCS services that non-endorsed EMS providers may perform. The new law permits CIHCS Agencies to provide services, “as determined by rule, that a community paramedic may provide.” The statute defines “community paramedic” as an EMS provider who obtains the newly-created endorsement. Toward the beginning of the task force process, the Department interpreted the totality of Senate Bill 16-069’s plain language to require EMS personnel who provide direct medical CIHCS services to obtain the CP endorsement. The CP endorsement task force concurred; therefore, its proposed rules require these credentials to provide direct medical services as a CIHCS provider. The CIHCS task force developed congruent rules that limit unendorsed EMS personnel to providing ancillary non-medical CIHCS and CARES services, as provided in Section 25-3.5-1203(3), C.R.S.

The statute further requires all EMS providers who wish to obtain a CP endorsement to pass a national test certifying competency to practice community paramedicine. Currently the only

nationally offered community paramedicine test available is for individuals at the paramedic level (versus the EMT, Advanced EMT and Intermediate EMT levels). Consequently, EMS providers who are not certified paramedics cannot take the test at this time.¹ The Department understands the rule will impact EMS programs that utilize unendorsed EMS personnel, but believes the situation will be remedied when the national testing agency develops additional tests for other EMS personnel. The Department believes that the rule, as developed, is necessary because of the plain statutory language. The CSFCA stakeholder acknowledges that the statutory CP endorsement requirement will necessarily limit unendorsed EMS providers from performing certain out-of-hospital medical services on behalf of a CIHCS Agency, but reiterated his concern that the requirement may disrupt existing CIHCS-type programs.

Senate Bill 16-069 is included in this rulemaking packet for reference.

¹ The International Board of Specialty Certification (IBSC) testing agency anticipates developing national CP competency tests for other non-paramedic EMS providers in the future.

Basis and Purpose.

Senate Bill 16-069 was signed into law on June 8, 2016. The legislation creates a new licensing category for agencies to offer out-of-hospital medical services as licensed Community Integrated Health Care Service (CIHCS) Agencies.

The Board of Health is directed to promulgate rules that establish the minimum licensing requirements for CIHCS Agencies. The proposed CIHCS Agency rules were developed collaboratively by the Department and a task force consisting of representatives of affected entities and interested parties. These rules address the CIHCS Agency licensure standards.

The rules establish definitions necessary to implement the law, such as “out-of-hospital medical services,” and “community integrated health care services provider.”² The rules also delineate the requirements for:

- License applications, including:
 - The applicant’s submission of a community needs assessment that identifies the medical service gaps in the community to be served,
 - Provision of written notice to the board of county commissioners in any jurisdictions in which the applicant plans to operate as a CIHCS Agency,
 - Criminal background checks--including fingerprint checks--of the Agency owner[s] and administrator[s],
 - Required Colorado Adult Protective Services Data System (“CAPS”) check for all Agency employees providing direct consumer care, beginning January 1, 2019,
 - Liability insurance for injuries to persons, in amounts determined by the board, and as required by Colorado law,
 - Establishing reasonable fees for licensure and for on-site inspections, investigations, changes of ownership, and other activities related to licensure, and
 - Issuance of initial, renewal, and provisional licenses, and other necessary licenses;
- Minimum qualifications, training, and roles and responsibilities for CIHCS administrators, endorsed Community Paramedics, other CIHCS providers and administrative staff;
- Minimum qualifications, training, and roles and responsibilities for CIHCS Agency medical directors who supervise Community Paramedics and/or other CIHCS providers;

² Rule 2.9 defines a CIHCS provider as “A person who, through employment or under contract, performs certain out-of-hospital medical services, as determined by rule, on behalf of a CIHCS Agency” CIHCS providers include: (1) CPs; (2) health care providers who are licensed, registered, or certified by the Department of Regulatory Agencies (DORA) and are supervised and directed by a CIHCS medical director; (3) unlicensed individuals who lawfully engage in practices not regulated by DORA and are supervised and directed by a CIHCS medical director; (4) individuals who fulfill a consumer’s CIHCS service plan while employed by or contracted with a CIHCS Agency; and (5) unendorsed EMS providers, who may perform ancillary non-medical services for non-emergent conditions and any services that may be provided through a CARES Program as set forth in Section 25-3.5-1203(3), C.R.S.

- Eligibility requirements for CIHCS consumers;
- Standards applying to single CIHCS visits;
- Standards and procedures applying to recurrent Agency services, including assessment and discharge standards;
- Minimum standards, policies, and procedures governing CIHCS Agency operations, including consumer rights, staffing, training, service planning, care coordination, access to Agency services and consumer records, complaints, required reporting requirements, agency quality management program, and record retention requirements;
- Standards governing CIHCS Agency provision of CARES program services; and
- The procedure and grounds for the suspension, revocation, or denial of a license.

The legislation requires the rules to be in effect on or before January 1, 2018; therefore, the Department requests an effective date of December 31, 2017.

Senate Bill 16-069 also required the creation of a Community Paramedic endorsement for emergency medical service providers who meet certain educational and credentialing requirements, which mandates changes to 6 CCR 1015-3, Chapter One and Chapter Two. The proposed changes to Chapter One, Rules Pertaining to EMS Education and Certification will be presented to the Board of Health for a request for hearing to take place in October 2017. Under a separate rulemaking, proposed changes to Chapter Two, Rules Pertaining to EMS Practice and Medical Director Oversight, will be heard by the Executive Director/Chief Medical Officer at the same time.

The statute also creates Community Assistance Referral and Education Services programs (“CARES”) for the purpose of providing consumers with medical resource navigation and referral information as alternatives to 911 and emergency medical services. Any entity that provided services prior to January 1, 2015 that now qualifies as a CARES program is exempt from complying with the statutory reporting requirements of Sections 25-3.5-1201 through 1204, C.R.S. The proposed rules do not include any regulation of CARES programs.

Specific Statutory Authority.

REGULATORY ANALYSIS
for new rule

6 CCR 1011-3 Standards for Community Integrated Health Care Service Agencies

1. A description of the classes of persons who will be affected by the proposed rule, including classes that will bear the costs of the proposed rule and classes that will benefit from the proposed rule.

By statute the proposed new rules affect any qualified applicant³ who seeks to manage and offer, directly or by contract, community integrated healthcare services in the state of Colorado. In addition, the proposed new rules benefit any individual who is a recipient of community integrated health care services within the state of Colorado. The proposed rules should reduce the burden on emergency services such as 911 and emergency departments by decreasing unnecessary utilization of their resources.

To the extent that current EMS programs are performing out-of-hospital medical services upon patients with non-emergent conditions, these programs will need to make a determination whether they will require a CIHCS Agency license or will limit their services with CARES program requirements.

2. To the extent practicable, a description of the probable quantitative and qualitative impact of the proposed rule, economic or otherwise, upon affected classes of persons.

The proposed rules create a new agency licensing category that permit a community-based team of qualified CIHCS providers to provide non-duplicative out-of-hospital medical services to individuals who are experiencing intermittent health care issues.

CIHCS Agency services are intended to address the unmet medical needs of individuals in the community in which it operates who fall within primary and public health care system gaps. Once the CIHCS Agency identifies its community gap consumers, the Agency will assess and treat them outside of the hospital for the purposes of preventing or improving a particular medical condition.

As noted, the rules are intended to decrease the unnecessary utilization of 911 and emergency department medical services, which, in turn, will benefit those resources and decrease costs to the health care system. However, entities who apply for a CIHCS Agency license to provide these services will incur licensing fees and attendant compliance costs. Likewise, entities currently providing these types of services will be required to obtain a license to continue to provide these services.

3. The probable costs to the agency and to any other agency of the implementation and enforcement of the proposed rule and any anticipated effect on state revenues.

The Department received General Fund to support the stakeholder and rulemaking processes. The General Fund will be eliminated as of June 30, 2018. On July 1, 2018 all agencies will need to be licensed and at that point the program becomes funded solely on cash funds generated from application fees. The new rule proposes a fee structure that covers costs related to the applicant CIHCS Agency's licensing and inspection costs, costs relative to changes in ownership, travel costs, and legal costs associated with complaints and adverse licensing actions. The Colorado Bureau of Investigations (CBI) and Federal Bureau of Investigations (FBI) will also incur costs associated with the processing of owner

³ "Any individual, sole proprietorship, partnership, corporation, non-profit entity, special district, governmental unit or agency, or licensed or certified health care facility that is subject to regulation under Article 1.5 or Article 3 of Title 25 that manages and offers, directly or by contact, community integrated health care services within the state of Colorado." Section 25-3.5-301(1), C.R.S.

and administrator criminal background checks. Payment for criminal background checks will be paid by the applicant directly to the CBI and/or FBI.

The fiscal note to SB 16-069 estimated an initial license fee. This estimate was evaluated during the stakeholder process and the rule now proposes a \$3,000 initial license fee. The Department will monitor the fee and return to the board with a request to adjust the fee when appropriate. The fiscal note to SB 16-069 also anticipated 25 CIHCS Agencies will be licensed in FY 2018-2019. Based on working with stakeholders through the stakeholder process, this assumption has changed. The Department anticipates that the new licensing category will attract ten initial license applications in year one of operation (FY18-19). During year two, the Department projects that another five applicants will seek initial CIHCS Agency licensure.

For licenses other than provisional, the license is valid for one year. On-site inspections are on a three-year renewal cycle after the initial inspection has occurred, unless complaints, occurrences, or other events necessitate Department action. The three-year cycle recognizes the state resources needed for a site visit and balances this cost with the need for reasonable fees so Coloradans can receive services. The complaint process enables the Department to investigate and take appropriate measures to ensure public health and safety between inspections.

The Department anticipates it will collect state revenue in the amount of \$30,000 in the first year of licensure. It will incur expenses from initial inspections and complaint investigations in the amount of \$22,160.

Estimated Cash Fund Revenues			
Type of Revenue	Year 1	Year 2	2-year Total
Initial Agency Licenses*	\$30,000	\$15,000	\$45,000
Renewal Licenses	\$0	\$17,000	\$17,000
Total	\$30,000	\$32,000	\$62,000
Estimated Expenditures			
Type of Expenditure	Year 1	Year 2**	2-year Total
Initial Survey	(\$13,339)	(\$6,669)	(\$20,008)
Renewal Survey	\$0	(\$9,142)	(\$9,142)
Complaint Survey	(\$8,822)	(\$13,232)	(\$22,054)
Total	(\$22,161)	(\$29,043)	(\$51,204)

* The Department also assumes 10 initial licenses in Year 1; 5 initial licenses in Year 2.

**The Department assumes a complaint rate of 40%.

4. A comparison of the probable costs and benefits of the proposed rule to the probable costs and benefits of inaction.

Inaction is not an option. Senate Bill 16-069 requires promulgation of rules by January 1, 2018.

5. A determination of whether there are less costly methods or less intrusive methods for achieving the purpose of the proposed rule.

There is no less costly or intrusive method for achieving the purpose of the proposed rules. Senate Bill 16-069 requires rules to be promulgated by the Board of Health, as well as fees

to be set to cover all costs incurred by the Department to implement the new licensing program. The proposed rules were created through a collaborative process between the Department and a task force consisting of interested and potentially affected entities.

6. Alternative Rules or Alternatives to Rulemaking Considered and Why Rejected.

The statute mandates the rules. Therefore, no alternative methods were considered. Senate Bill 16-069 requires promulgation of rules by January 1, 2018. The task force has been meeting at least once a month from September 2016 through June 2017 to reach consensus on the proposed rule language.

7. To the extent practicable, a quantification of the data used in the analysis; the analysis must take into account both short-term and long-term consequences.

The Department surveyed a majority of jurisdictions across the U.S. that operate community paramedicine and/or mobile integrated healthcare programs in other states and presented the information to the task force. After consideration, the task force and department determined which elements were congruent with the Colorado law and compatible with existing facility licensing. As Senate Bill 16-069 creates a unique health care business model in the United States, it is difficult to quantify short and long-term consequences at this time.

Recently several governmental entities, including states, counties, and municipalities, have created mobile integrated /community paramedicine programs through statute or code, or pilot programs to provide out-of-hospital non-emergent medical services to gap patients who have little access to medical services, or who otherwise access emergency medical services or emergency departments for their medical needs. The Department conducted an extensive survey of these programs and found that numerous community paramedicine programs solely and exclusively utilize EMS providers from EMS agencies. Colorado's statutory program is unique in that it does not confine either the agency, or the provision of community integrated health care services, to an EMS model. Instead, the legislation directs the Department to license any qualified applicant and allows licensed CIHCS agencies to employ or contract with many different types of providers to serve the out-of-hospital medical needs of eligible CIHCS consumers.

Over the course of several months, the task force considered these various models. Within the boundaries of Colorado's law and existing regulatory structure, the task force then integrated some of these components into a new framework of regulatory requirements to meet the needs of Coloradans.

In the short-term, the proposed rules will require entities that are already providing these types of services to comply with uniform minimum requirements through the licensure process and, consequently, to protect the health and safety of Colorado consumers.

In the long term, the Department anticipates that the rule's implementation will encourage local community providers to collaborate and assess the needs of the consumers they serve, address those needs responsively and without redundancy, and reduce the demands made upon emergency and 911 providers by people who require non-urgent medical attention.

The rules intend to tailor the needs of the gap consumer with an appropriate medical response, thereby advancing and protecting the health, safety, and welfare of Colorado citizens. At the same time, the Department anticipates that licensed CIHCS agencies may become eligible for reimbursement from governmental or private payer sources for their community integrated health care services in the future.

Summarize Major Factual and Policy Issues Encountered and the Stakeholder Feedback Received. If there is a lack of consensus regarding the proposed rule, please also identify the Department's efforts to address stakeholder feedback or why the Department was unable to accommodate the request.

By the end of the task force process consensus was reached regarding the general policy issues encountered. While the task force unanimously recommended that the proposed rules proceed to a

rulemaking hearing, the Colorado State Fire Chiefs Association (CSFCA) representative voiced objection to the part of the rules that prohibits non-Community Paramedic endorsed EMS providers from directly providing out-of-hospital medical services as part of a CIHCS Agency. However, the Department notes, and the CSFCA representative did not dispute, that this result is mandated by Senate Bill 16-069.

Please identify health equity and environmental justice (HEEJ) impacts. Does this proposal impact Coloradans equally or equitably? Does this proposal provide an opportunity to advance HEEJ? Are there other factors that influenced these rules?

This program is directed at underserved communities and is intended to serve gap patients, those who lack access to adequate health care services. Early in the process, the task force agreed that CIHCS Agency applicants must identify the needs of gap patients within their service areas by conducting a community needs assessment. Based on the community needs assessment, the CIHCS Agency will be able to identify health equity concerns and work to address those concerns. The department anticipates that the proposed rules will advance health equity for all Coloradans.

1318 **SECTION 8. PERMISSIBLE CIHCS AGENCY SERVICES**

1319 **8.1 Purpose**

1320 The activities of licensed CIHCS Agencies are directed towards integrating the services of a
1321 community-based team of qualified CIHCS providers, based on local need, to address gaps in a
1322 community's primary and public health care systems, to assess and treat consumers outside of
1323 the hospital setting for the purpose of preventing or improving a particular medical condition,
1324 and to reduce the burden of patients with non-emergent conditions who access the larger
1325 health care system through the emergency medical services system. CIHCS Agency services are
1326 intended to address the unmet needs of individuals who are experiencing intermittent health
1327 care issues and to prevent duplication of out-of-hospital medical care and services.
1328
1329

1330 **8.2 Standards Governing CIHCS Agency Evaluation and Treatment Services for Single Visits**

1331 8.2.1 A CIHCS Agency, under medical direction and within the applicable scope of the
1332 provider's practice, may utilize its appropriate personnel to assess, provide, and/or
1333 coordinate out-of-hospital medical services during single visits.
1334
1335

1336 8.2.2 A CIHCS Agency that is also an emergency medical services agency or that has
1337 contracted with an emergency medical services agency may utilize its appropriate
1338 personnel to:
1339

- 1344 B) Treat and transport, as authorized by law, consumers with non-
1345 emergent conditions to appropriate destinations other than a hospital

1349 care or urgent care facility;
1350
1351 D) Assess the consumer with a non-emergent condition and

1356

1357 8.3.1 If the eligible consumer's care provider, as defined in Section 2.6 of these rules, orders
1358 a CIHCS Agency to provide services specific to the consumer's needs in a series of
1359 visits, the CIHCS Agency shall approve a service plan before providing services to the
1360 consumer. For purposes of these rules, "approval" of the service plan means, at
1361 minimum, that the Agency must review the service plan and, pursuant to these rules
1362 and the Agency's policies and procedures, confirm that its providers can supply the
1363 ordered services within their scopes of practice.
1364

1365 8.3.2 If the Agency determines the consumer lacks adequate resources to obtain or access
1366 necessary out-of-hospital medical services, the CIHCS Agency may provide the
1367 consumer with such necessary services through a series of visits established in the
1368 consumer service plan that the CIHCS medical director shall approve.
1369

1370 8.3.3 The Agency will provide the services in accordance with the consumer's service plan
1371 within the scope of services of the Agency, and will ensure continuous oversight of the
1372 consumer's care up to and until the consumer's discharge.
1373

1374 8.3.4 Evaluations of the consumer's progress based on the goals established in the service
1375 plan shall be conducted as set forth in Sections 8.4.2 and 8.5.2 and documented in the
1376 consumer's service records. CIHCS providers shall notify the Agency and/or the care
1377 provider regarding any changes that suggest a need to alter the service plan.
1378

1379 8.3.5 Each consumer service plan shall incorporate a defined discharge summary, as
