Subject: Comments on Proposed COGOP Independent Expenditure Committee

RE: Proposed COGOP Independent Expenditure Committee

I am writing to express my strong opposition to such a committee which would, in essence, represent the death of grassroots activism in the Republican party. Indeed, small donors and activists are the lifeblood of any political party, the GOP would, in essence, silence them completely.

This will represent the GOP's own demise, they have completely lost the will of the people; the real losers are the citizens of this country because this cronyistic GOP wealthy minority is not of the people and will never win a election, leaving us with marxism/communism. To think otherwise is delusional and a tragic commentary on how greed destroys nations and societies.

If we have any hope at all, we call for the Secretary of State to disallow this in its entirety. Scott Gessler's ability to stand for the people would do alot to ensure his victory as Colorado's next governor.

Thank you,
