.5% sales tax increase

Be it enacted by the People of the State of Colorado:

SECTION 1. Legislative declaration.

(1) The voters of the state of Colorado hereby find and declare that:

(a) It is critical to construct, improve, and maintain transportation infrastructure throughout the state in order to meet the demands created by both current and future statewide economic expansion and population growth;

(b) Sufficient, sustainable, steady, and dedicated funding streams are needed to fund the critical transportation infrastructure construction, improvement, and maintenance that will allow the statewide transportation system to meet both current and future demands;

(c) Current sources of dedicated transportation funding are not generating enough revenue to fund current and future transportation infrastructure needs throughout the state. The state last increased the rates of the taxes on gasoline and special fuel, the largest source of dedicated transportation funding, in the early 1990s, and these taxes do not increase with inflation. As a result, the declining purchasing power of the revenue generated by these taxes has prevented the state's transportation budget from keeping pace with the growing transportation infrastructure needs throughout the state.

(d) An additional source of voter-approved funding for transportation is needed to meet statewide transportation infrastructure funding needs.

(2) The voters further find and declare that all new voter-approved transportation funding will be spent throughout the state to:

(a) Address poor road and bridge conditions like potholes and rough pavement that damage vehicles, require vehicle owners to pay for expensive vehicle repairs, and increase costs for Colorado families;

(b) Reconstruct and rehabilitate state highways to better maintain them and prevent and avoid costly future repairs;

(c) Support local government efforts to fund local transportation projects that are critical for their communities;

(d) Improve highways to increase their capacity and accommodate population growth;

(e) Provide additional seasonal maintenance on state highways;

(f) Address increased traffic congestion through multimodal transportation options;

(g) Allow the state's growing population of seniors to age in place and provide greater mobility for persons with disabilities; and

(h) Invest in the economic future of the state by providing a modern multimodal statewide transportation system that will support and strengthen the economy of the state and attract more businesses and employers to the state.
