Initiative 3

## INITIAL FISCAL IMPACT STATEMENT

---

**Date:** January 15, 2019

**Fiscal Analyst:** Greg Sobetski (303-866-4105)

---

**LCS TITLE:** STATE FISCAL POLICY

***Disclaimer.** This initial fiscal impact statement has been prepared for the Title Board. If the initiative is placed on the ballot, Legislative Council Staff may revise this estimate for the ballot information booklet (Blue Book) if new information becomes available.*

---

### Summary of Measure

This measure repeals Article X, Section 20, of the Colorado Constitution. This section is titled "The Taxpayer's Bill of Rights" and often called "TABOR".

### Background

Article X, Section 20, of the Colorado Constitution restricts the authority of state and local government legislative bodies to make certain fiscal decisions. It requires state and local governments to obtain approval from voters in order to establish new taxes, raise tax rates, or create multiyear debt, and sets parameters for these elections. It also prohibits certain types of new taxes, including a state property tax, local income taxes, and the taxation of income at different rates.

Article X, Section 20, also establishes limits on the amounts of revenue that the state and local governments are permitted to retain and spend or save.

### Assumptions

Most of the effects of the measure are indeterminate because they depend on subsequent decisions by policy makers. By repealing constitutional restrictions on revenue and spending, the measure may allow the state and local governments to raise tax rates or impose new taxes without voter approval and to authorize higher levels of government spending. This fiscal impact statement does not make assumptions about what subsequent policy changes would be made if current constitutional restrictions were no longer to exist. Further, for some governments, current constitutional provisions are codified in statute, regulation, or ordinance, which would continue to bind local policy makers unless and until these provisions are amended or repealed.

### State Revenue

The measure has no direct impact on state revenue. Indirect impacts on revenue are indeterminate as discussed in the Assumptions section of this fiscal impact statement.

## State Expenditures

The measure reduces state expenditures for refunds to taxpayers in all future years for which a refund obligation would otherwise be refunded, and reduces workload for state agencies responsible for administering current constitutional provisions. Other impacts on state expenditures are indeterminate for the reasons given in the Assumptions section of this fiscal impact statement.

**TABOR refunds.** Current state law includes mechanisms to refund revenue collected in excess of the constitutional limit to taxpayers. Under the measure, the constitutional limit would no longer apply, and these refund mechanisms would no longer be used to refund revenue.

It is assumed that the measure would apply beginning in FY 2020-21. Under the December 2018 Legislative Council Staff forecast, the state is not expected to collect excess revenue during FY 2020-21. For this reason, the measure is not expected to reduce the amount set aside for a refund obligation that would otherwise be generated during this year.

A forecast of state revenue subject to the limit is not available beyond FY 2020-21. For years when excess revenue otherwise would have been collected, the measure eliminates the requirement that this revenue be set aside to pay refunds in the following fiscal year, allowing increased expenditures or savings at the discretion of the General Assembly.

**Administration.** Under current law, the Division of Taxation in the Department of Revenue is responsible for the administration of TABOR refunds. In future years when TABOR refunds would otherwise occur, the measure will cause a reduction in workload for the processing and review of refund payments. The timing of workload reductions depends on economic and revenue conditions for years beyond the current forecast period. To the extent that reductions in personnel allocations are required, these are assumed to be handled through the annual budget process.

Various state agencies responsible for accounting, tracking, reporting, or projecting state revenue subject to the constitutional limit will experience workload reductions if the limit no longer applies. These include Legislative Council Staff, the Office of the State Auditor, the Office of the State Controller in the Department of Personnel and Administration, the Department of the Treasury, and the Office of State Planning and Budgeting. For Legislative Council Staff, reductions in staff time are expected to manifest in FY 2022-23 after accounting for the period immediately after the measure's effective date, when research and analysis of the measure's effects are expected to drive workload. To the extent that reductions in personnel allocations are required, these are assumed to be handled through the annual budget process.

## Local Government Impact

The measure is expected to increase local government revenue and decrease local government expenditures for refunds beginning in FY 2020-21.

The current constitutional revenue limit applies to all local governments. As a means of refunding excess revenue through property taxes, certain counties, municipalities, and special districts have imposed temporary reductions in their mill levies. In these jurisdictions, mill levies are set to return to their full approved values when the taxing entity's revenue limit is eliminated. Where mill levies increase automatically, jurisdictions will collect additional revenue under the measure than under current law, and will have additional funds available to spend or save in future years.

The discussion of contingent impacts in the Assumptions section above also applies to local jurisdictions. Under the measure, city councils, boards of county commissioners, and leadership boards of special districts will be empowered to enact new taxes or raise tax rates without voter approval unless otherwise constrained by local ordinance or other provisions of state law. This fiscal impact statement assumes that these outcomes depend on policy decisions to be made subsequent to the measure's adoption, and therefore does not treat these potential contingencies as direct impacts of the measure.

### **Economic Impact**

The measure empowers state and local government entities to raise revenue through policies that are currently prohibited, or through policies that currently require voter approval. The specific effects of this change will depend on decisions made by governments in the future. To the extent that state and local governments increase revenue and spending as a result of the measure, taxpayers will pay higher taxes and fees resulting in less household and business income to spend or save elsewhere in the economy. Higher spending on public services, including health care, education, social services, infrastructure, and public safety, will increase demand for some private goods and services. Demand for goods and services sold by other private industries will be reduced to the extent that governments offer these services, or to the extent that households and businesses have less income to spend on these products.

Direct impacts are expected to occur in local jurisdictions where mill levies are currently reduced as necessary to accommodate the revenue limit or to issue refunds. Property taxes will increase to varying extents in these jurisdictions. Property tax increases will allow for increased government spending and reduce disposable income for homeowners and for businesses owning nonresidential property, correspondingly reducing household and business consumption and/or saving. Increased property taxes may also diminish property values in affected jurisdictions, and may slow rates of migration to these areas.

### **Technical Note**

Because this measure is assumed to appear before voters at the 2020 General Election, the constitutional revenue limit is assumed to remain in effect through FY 2019-20. Under the December 2018 Legislative Council Staff forecast, the state government is expected to collect an estimated \$189.0 million in excess of the limit for FY 2019-20. This fiscal impact statement assumes that this amount will be refunded to taxpayers in FY 2020-21 on income tax returns for tax year 2020, as required under current law. However, if refunds are not made after the measure is passed, the amount of state General Fund revenue available to be spent or saved in FY 2020-21 would increase by \$189.0 million.

### **Effective Date**

If approved by voters at the 2020 general election, this measure takes effect upon proclamation of the Governor, no later than 30 days after the official canvass of the vote is completed.

## **Abstract of Initiative 3: STATE FISCAL POLICY**

*The abstract includes estimates of the fiscal impact of the proposed initiative. If this initiative is to be placed on the ballot, Legislative Council Staff will prepare new estimates as part of a fiscal impact statement, which includes an abstract of that information. All fiscal impact statements are available at [www.ColoradoBlueBook.com](http://www.ColoradoBlueBook.com) and the abstract will be included in the ballot information booklet that is prepared for the initiative.*

**This initial fiscal estimate, prepared by the nonpartisan Director of Research of the Legislative Council as of January 2019, identifies the following impacts:**

**State revenue.** The measure has no direct impact on state revenue, but will allow state lawmakers to raise revenue without voter approval in future years.

**State expenditures.** The measure reduces state expenditures for refunds to taxpayers in all future years for which a refund obligation would otherwise be refunded, and reduces workload for state agencies responsible for administering the constitutional provisions repealed in the measure. It will also allow state lawmakers to increase spending above the limit currently imposed in the constitution.

**Local government impact.** The measure is expected to increase local government revenue and decrease local government expenditures for refunds to taxpayers beginning in FY 2020-21.

**Economic impacts.** The measure is expected to increase revenue and spending for state and local governments over the long term, shifting a portion of the state's economy from the private sector to the public sector. Government spending for public goods and services, including for example health care, education, social services, infrastructure, and public safety, will increase. Household and business spending or saving will be correspondingly reduced.
