

Be it Enacted by the People of the State of Colorado:

SECTION 1. Declaration of purpose.

The People of the State of Colorado find and declare that protecting Colorado's land, air, and water depends upon an expeditious transition from polluting fossil fuel energy sources to clean energy sources. Oil and gas operations in our state contribute significantly to water shortages and degradation, ozone pollution, and greenhouse gas emissions, which lead to increased drought, wildfires, and dangerous air quality. This results in significant harm to public health and safety, agriculture, winter sports and other sectors of our economy. Ending the expansion of oil and gas operations in an orderly and planned manner through a gradual phase out of new permits by 2030, and prioritizing permit reductions in disproportionately impacted communities will reduce greenhouse gas emissions and other pollution, protect lands and water, and enhance economic growth in the state as part of an ongoing transition to clean renewable energy.

SECTION 2. In Colorado Revised Statutes, 34-60-103, **add** (4.1) as follows:

34-60-103. Definitions.
