

Al,

Thanks for the opportunity to comment on the revised version of the Uniform Voting System RFP.

I was very happy to see the addition to G-10 that defined a risk limiting audit and to G-23 that included the capacity to perform a risk limiting audit.

I suggest a minor change to support risk limiting and other audits.

“Auditing G-9 Have a permanent paper record of each vote for audit purposes. **Preferably all paper records of all votes are in the same format and indistinguishable other than by ballot style.**”

I suggest adding: Each paper record has a unique identified that can be matched to the electronic record of that vote, so that each paper record can be compared with the recorded vote.

Thanks,

Paul
