F. Additional Comments

1. Please provide any additional comments regarding other strengths or weaknesses, and positive or negative aspects, of this voting equipment that you observed or experienced. Please feel free to attach additional pages to this evaluation form, if necessary.

If a disabled voter is using the select button & turn wheel - the highlighted section is surrounded by a dark blue line but is on a blue background & is hard to see when moving from one area to another.

It would be recommended by our judges to change the color of the highlight to a bright red or other brighter, contrasting color.

The scanner ballot box sits too low! This is especially a problem because many of our judges are older & getting down on their hands & knees to unlock the doors is troublesome to them. It should be placed on a table if possible.

Question - Why have doors on both the front & back of ballot box - we believe there only needs to be a door on the front. Some election sites have limited space & it would set up & work better if the scanner <sup>ballot box</sup> could be turned so the back of it was towards a wall
