For the Pilot Election Review Committee:

I would like to submit that I have witnessed demonstrations or pilot activity from all four vendors involved in this process. I am convinced that Dominion has the most fitting solution for Colorado.

The programming and logic of the Election is simple to learn, the application of the definition onto the central scanners and VSPC solution is simple. The ADA solutions are well developed. The audit log that is present with each ballot image is reassuring and made the post audit easy, understandable and instilled confidence. I understand the risk limiting audit test went very well. I think it is important that their UOCAVA system produces scanable ballots that do not have to have manual processing before they can be read. In fact since they are the same format as the in-person ballots it alleviates the chances that a Military ballot will not be anonymous.

For these reasons, I urge the Committee to suggest Dominion.
