**Subject:** RE: Citizen Center Comments on DRAFT RFP for UVS project --p.s.

Apologies for this late-arriving question and comment.

Perhaps I missed it in the instructions, but are the responding vendors to assume that in addition to the RFP requirements that the 2002VVSG requirements must be met? Or are they to assume that the Secretary will be adopting updated VVSG/EAC standards? If so, which standards would the Secretary adopt? This seems like an essential assumption in order to obtain consistent and comparable responses.

See the following statute---

**1-5-601.5. Compliance with federal requirements.** All voting systems and voting equipment offered for sale on or after May 28, 2004, shall meet the voting systems standards that were promulgated in 2002 by the federal election commission. At his or her discretion, the secretary of state may require by rule that voting systems and voting equipment satisfy voting systems standards promulgated after January 1, 2008, by the federal election assistance commission as long as such standards meet or exceed those promulgated in 2002 by the federal election commission. Subject to section 1-5-608.2, nothing in this section shall be construed to require any political subdivision to replace a voting system that is in use prior to May 28, 2004.
