**Subject:** UVS implementation - Lincoln County

Eddie—

My hope is to implement the new UVS voting equipment in 2016. Our current equipment has been on its last leg for a couple of years now, so I am getting extremely concerned with how much longer it will last. While I don't particularly want to put my small staff through implementing an entire system in a presidential election year, I feel worse about trying to limp our current equipment through one.

We have been put in a very difficult situation and I would just like to make my thoughts known on that. UVS should have been implemented in an odd year—no questions. Putting counties in this situation was a horrible thing to do. I realize it's not your fault, but again, just wanted to make my feelings known.

I would hope that there will be EXTENSIVE training and support available for next year's elections for those of us who plan on implementing new equipment.

Thanks for your time—

*Corinne M. Lengel*
