Subject: In-Person Voter Evaluation and County Evaluation Form

Eddie—

I think both forms are very thorough and seem to cover everything, but I do have a couple of comments on the County Evaluation form:

Question 6 – If the person answering the survey (responder) answers "No," what would the other option be? It seems like there needs to be a "If you answered No to question 1 and No to question 6" question. For example: Question 8: If the answer to Question 1 is no, and the answer to Question 6 is No, please explain how your election database was built. Does that make sense? Or maybe there are no other means of building a database and it's a moot point, in which case the responder should not be able to answer "No" to Question 6.

Question 27 – What is the Scytl election night reporting system? Is that something new?

Question 30 – robustness? I would use the word strength instead…

I also don't really understand the wording on Questions 33 and 34. What does that mean exactly? Could you clarify these questions?

Thanks for letting us provide our input—

Corinne
