Subject: Bonanza abandonment

I just received notice of this issue. As a long term full time resident of bonanza I am concerned about how this appears to be playing out.

1. Most residents have not received notice of this action. There was no public announcement. The majority of property owners are part time residents. Many are out of state now.
2. The records provided to the county have disappeared. This is unacceptable. The township complies then someone at the county level loses the evidence. What happened?
3. The hearing is today. I would be there however I have an appointment. I can not attend. Had I received public notice, I would have made it a point to attend.
4. In the last 5 years, the area has become more populated. From the looks of it; by a huge margin. If the county abandons bonanza, how does this effect our property values? Which brings up another question. Why do we wish to abandon a town that is experiencing a revival? this makes no sense. Then we choose to bring this issue up when few residents are here. Why?

I suppose if I have more time to discuss this I could list a few more points. Please move to table this issue until after memorial day. In the meantime, send a formal letter to all property owners outlining the county's position. Perhaps by then, we could find those lost papers. I would hope someone had a set of originals and can resubmit them. I would like to view them. Then attend the hearing as an informed individual. This to me, is highly inappropriate and sets a dangerous precedent.

All I ask is for the community to have a say in this extremely important issue. Thank you for your consideration.
