Hello Wayne,

All we do is fight the fight for voting integrity and now this new opportunity to vote by internet. What are you thinking?

Internet voting is critical for our 'out of touch' service men and women who otherwise would not be able to vote.

But the rest of us? Voting is the foundation of our democracy. I am from VA originally - we went to the polls on election day, stood in line and voted on machines.

Some voted in advance - absentee voting.

Faster is not better if it means voting on the internet. Plus too many opportunities for fraud.

Thank you,
Beverlee White
