Subject: Internet Voting

Look

It won't work because the PEOPLE don't want any more corrupt politicians finding new ways to get in office, we prefer going to our voting locations or mail in ballots - the American way.

We are tired of these terrible crony ideas that make people rich and create more problems for the tax payers.

Hackers will find a way to coerce the vote to either Left or Right.

The FCC power grabbed the internet and now propaganda will continue in a new form.

NO internet voting - programmers/Williams need to focus their thoughts on more reservoirs and water conservation instead of this disaster.
