Subject: Internet Voting

Re: Rule 16.2.1 (c), If you believe in responsible citizenship you would have to oppose this proposal. If, however, you believe in winning at any cost, you have to say: What A Great Idea! The vote manipulators already have enough trouble getting fraudulent voters to register and go to the polls, much less to bother affixing a stamp to their mail ballots. With internet voting, their community organizer, shop steward or other volunteer can just punch their iPhone buttons for them. We can stop pretending that we tolerate voter fraud in the name of greater democracy. Now we can actually manufacture voter fraud whenever we need a few hundred votes. Old Mayor Daley would be so proud! It's the Democratic way.
