Subject:	Rulemaking

Delta County has participated with the ESRC conference calls and agree with the comments the committee is providing as a whole.

In addition to we wanted to add 18.5.2 (A)(2) If a ballot is truly blank the resolution board <u>must code</u> the ballot as a blank ballot containing no valid votes in the voting system's resolution application….. During the ESRC we discussed <u>must code</u> should be changed to <u>record</u>. We are concerned the language <u>must code</u> makes it sound like the voting system must code a ballot into the voting system resolution application, and our system currently is not capable of doing coding a ballot in this manner.

Thank you for your consideration

Rene Loy Maas
