Subject: Comments: Review CCR 1505-11 Notary Rules

2.2.4 (a) says to get a separate DAN for each electronic notarization. The reg doesn't say how to get the DAN.

2.2.5 There's no explanation that I find that says how a signer "adopts" an "electronic signature", so the notary won't know how to determine if the signor has done so.

2.2.6(a)(5) says the notary's authorization to notarize electronically expires automatically upon expiration or revocation of the technology described in the notification. What notification is it referring to? If the authority expires automatically then there wouldn't be any notification that it expired, it would be automatic.
