Subject: Sec Griswold (8 CCR 1505-1) Amendment Changes

After taking the time to read the document, I have a few comments. The most important and sacred areas needing protected aren't in minor adjustments.

Seek to achieve the following:

- Protect the Electoral College, and don't support a socialistic popular vote.
- Move to making it mandatory to verify citizenship before casting votes from any medium.
- Allow a more verifiable accountability or receipt of cast votes.
- Utilize a web based voting system for military and other Colorado resident US citizens outside of the state or country. Included should be for the disabled or others unable to physically attend a ballot box, so as to avoid unnecessary delay, errors or uncasted votes from registered citizens. As stated above, insure this system has a verifiable ballot received and accountable receipt.

Thank you.
