Subject: [EXTERNAL] Remote Notary for COVID

I personally have refused to use the new COVID option of remote notary, since it requires too much back and forth with clients and requires me to be responsible to retain video of signings for several years. I don't have the ability for this type of storage. I don't see any exceptions made for cases where I may know the person, like a coworker, who needs a remote signing. I suggest a better way be made for this remote video option.

Thank you,

Heather Gutierrez
