Sirs,

I have grave concerns that one person, in this case Colorado SOS, has taken the unilateral step to take away my right to know if my vote counted in the 2020 election by forbidden a closer look at the voting machines used. This should not be the decision of one person. I have a right to know, by forensic audit, that my state's election was fair and not fraudulent. I ask that this unilateral decision made by the Secretary of State be revoked and that Colorado hold a full forensic audit.
