Subject: [EXTERNAL] Concerns

I have left a lengthy voicemail in regards to my concerns regarding the proposed election reform proposals of Ms. Griswold. The authoritarian approach to negate the opportunity to have free and fair transparent elections is not acceptable. Ms. Griswold is an elected official charged with the responsibility to represent the will of the People of the State of Colorado! She is our employee and might be reminded that she answers to us. We have serious concerns about how these proposed changes would make reporting and investigation of fraudulent activity impossible. Seems strange to not want to promote honest and transparent reporting of the People's votes. When there is nothing to hide then there is no reason to create a system by which authentic results are not openly displayed and possible fraudulent activity is not thoroughly investigated and rooted out. Our Republic depends on honest public servants and should We the People decide that they are not as such it is our duty to rid our elected offices of any indication of corruption and deception as soon as possible.

We fervently implore Ms. Griswold to ensure us that she stands for free and fair, transparent elections by requiring a full forensic audit of the 2020 election. Certainly she is in support of that as she feels we have the gold standard in our election procedures. I am sure the rest of the country would like to see how that actually works here in Colorado as a model! Please indicate the person from the SOS office and contact information that will be attending the Cyber Symposium in South Dakota next week. I would like to email them the support of my group of Concerned Colorado citizens. We would also request information on the details of how the packet captures for Colorado showed how perfectly correct our election results were. Certainly a delegation is attending.

Thank you for your time,
Emily Erickson Cook
