It's obvious when counties have more people voting than their population that there's some serious voter fraud. You have been found out! There's too many of us—43,000 tuned in—to ignore what you want to pretend didn't happen. It's also obvious that you are trying to hard to hide what went on. Innocent people have nothing to hide!

I will be following this issue closely seeking a full forensic audit. Right now neighborhood canvassing is being done which points to major issues everywhere we look! Next is the forensic audit.
