---

Ms. Griswold:

I have read the numerous election rule changes you have proposed under the guise of streamlining the election process in our state. It is painfully obvious that this is a partisan attempt to eliminate citizen involvement, thus paving the way for increased election dishonesty, all at a time when our nation's confidence in election integrity is at an all time low.

Every single one of the proposed changes would have the effect of opening the door to additional unscrupulous election practices, while perpetuating the voter fraud which has become the norm at the state and national levels. If you do not believe this, you are just not paying attention to what is so evident today.

With regard to Rule 9.2.2, it is unfathomable that you would wish to keep confirmed dead voters names on the rolls. This does not warrant further elaboration other than to point out that it makes it far easier to manipulate records and come up with illegal votes.

What is even more unbelievable to me is that the state election process is governed by a list of bureaucratic "rules". This should be governed by state statute where it cannot be easily changed at the whims of the current political party in power.

Making any of these changes is simply wrong and ill-timed. I sincerely voice my strong objections to their consideration.

Robert W. McGlasson, a live and registered Colorado voter
