**Date:** Thursday, August 5, 2021 12:57:55 PM

---

For the record,

I do not believe in our electronic voting system, when it comes to any kind of voting machine it can be manipulated too easy.

I do on the other hand truly believe that if we would just use **paper ballots** and count every one and verify every one.

I do not believe that a person should be able to vote unless pre registered to do so.

I am not satisfied that our election in Colorado It has been corrupted and needs to be corrected.

We need a **full forensic audit**. If this is **NOT** done then how can we trust our elections any more

I do not want any of the Temporary Rules put into law none are for the people.

We want a Free and Fair election are needed not just a convenient one for the people counting votes and that what these laws you want to pass.
