Subject: [EXTERNAL] Response to these rule making proposals
Date: Thursday, August 5, 2021 8:28:07 PM

Free and fair elections are at the heart of a free democratic nation. Our Republic was established with these principles as the backbone of trust and accountability. Accountability and confidence in our elections and elected officials are essential to a free society.

- Not only is it vital to assure that we are who we say we are, the machines that verify our signatures must be certified so that there's confidence that the process is accurate
- Trained observers (poll watchers) add another layer of essential confidence in the accuracy of the election process.
- Chain of Custody Logs, Transfer Logs as well as Logs to record administrative functions are essential for the checks and balances so important in accurate record keeping.

<!--[if !supportLists]-->

We elect County Clerks to keep accurate up to date voter registration rolls in each area of our state.

This system has been working well. One centralized location is not only unwieldy but much less efficient.

All voting equipment at vote centers must be required to maintain serial numbers to assure security.

Up to date Certification must be done for the vote counting machines before they are used for Any Election.

These proposed rule changes would compromise our entire election process. It is Hard to imagine why they are being proposed.

Please reverse course and withdraw All of these harmful proposals.

Respectfully yours,
Naomi Hunter
